COMPLETE GUIDE · THE TRADE, SETUP AND EVERY SCREEN

Equipment Rental Management for Odoo 19

Plant, tool and machinery hire run unit by unit: rate cards where the cheapest rate wins, availability that refuses a double booking, hand-over and off-hire with meters, overuse, damage, deposits, the workshop and the statutory examinations, and what each machine is earning. Every screen and every step, shown on a live demo.

START

About this guide

A hire yard earns money from one thing: a machine that goes out, comes back in one piece and goes out again. Everything else, the rate card, the meter, the deposit, the workshop and the examiner, exists to keep that loop turning and to bill it properly. This guide follows one machine round that loop, screen by screen. You do not need to have used Odoo before.

Who it is for

The owner or depot manager setting a yard up, the hire desk that quotes and books, the fitters in the workshop, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks through every field and every button.

The live demo

Kestrel Plant & Tool Hire Ltd, an invented hire company with depots in Leicester and Nottingham, 33 machines bought in May 2026 and five months of hires since. Open it and follow along.

HOW IT WORKS

The demo yard

Address	**equipmentrental-demo.way4tech.com**
Sign in	**w4demo** / **Demo2026**
Hire company	Kestrel Plant & Tool Hire Ltd · Leicester Depot (LEI) and Nottingham Depot (NOT), prices in GBP with 20% VAT
Runs on	Odoo 19, Community edition, with Inventory and Invoicing

Every company, person, phone number and machine serial on the demo is invented. The demo is shared and is reset from time to time, so anything you change may be changed back or seen by the next person. Treat it as a yard to walk round, not as your own records.

This is the module for hiring out **machines one by one**: excavators, access platforms, generators, tools, vans. If you hire out a stock of identical items from a shop, such as bikes or party kit, with online booking, that is a different product, Way4Tech Rental Management, with its own guide.

What is in the guide

PART 1	How plant and tool hire works	PART 2	The yard at a glance
PART 3	Open the demo, then set up from zero	PART 4	Rate cards: the cheapest rate wins
PART 5	The fleet: one record per machine	PART 6	Availability: nothing promised twice
PART 7	From quotation to reservation	PART 8	Handing the machine over
PART 9	Due back, late and overdue	PART 10	Off-hire: meters, overuse and condition
PART 11	Damage: report, assess, charge or waive	PART 12	Invoicing the hire and settling the deposit
PART 13	The workshop	PART 14	Examinations and certificates
PART 15	What the fleet is earning	PART 16	Printed documents
PART 17	A fifteen minute walk-through	PART 18	The menu map

PART 1 How plant and tool hire works

Plant hire has its own habits: a month is four weeks, a week is cheaper than five days, a machine is billed on its meter as well as the calendar, and anything that lifts must have a current examination before it leaves the yard. This part is the trade in five minutes, so the screens make sense.

IN THIS PART YOU WILL LEARN

- Why every machine is a record of its own, not a stock quantity
- How a rate card is read, and why the cheapest rate wins
- What a meter allowance and an overuse charge are
- Deposits, damage and the hand-over sheet
- Statutory examinations: LOLER, PUWER, PAT and pressure systems

A unit, not a quantity

A shop selling drills counts them. A hire yard cannot: the 3 tonne excavator with 3,900 hours on it and a dent in the cab is not the same as the one with 1,600 hours. Each has its own serial number, its own meter, its own service history and its own certificate. So the module keeps one record per physical machine, called a **unit**, and every hire, workshop job and examination hangs off it.

HOW IT WORKS

The four things a unit belongs to

Depot	the yard it lives at: Leicester or Nottingham on the demo
Category	the class of kit: meter type, daily allowance, service interval, examination scheme, deposit
Rate cards	the prices: for the category, for this one unit, or for one customer
Hire product	the line the revenue lands on in the accounts, with its VAT

Reading a rate card

A card carries an hourly, a daily, a weekly and a four weekly rate. The trade sells a month as **four weeks, 28 days**, so February is not cheaper than March. Weekly rates are set well under five days, which is the point: a customer who keeps a machine for five days pays the week, not five days. The module works out the cheapest mix of four weeks, weeks and days for the length of the hire, so the desk never has to.

HIRE LENGTH	DAY RATE ONLY	WHAT THE CARD CHARGES
3 days at £110 a day, £330 a week	£330	£330 (3 x day)
5 days	£550	£330 (1 x week)
10 days	£1,100	£660 (2 x week)
30 days, four weeks £990	£3,300	£1,210 (1 × 4 weeks, 2 x day)

The meter and the allowance

An excavator is hired for a single shift: eight hours a day is included. A site that runs it for two shifts has had twice the wear for the same day rate, so anything past the allowance is charged at an **overuse rate** per hour. Vans work the same way in kilometres. The meter is read when the machine goes out and when it comes back; the difference, less the allowance for the days charged, is the overuse. Tools and slings have no meter.

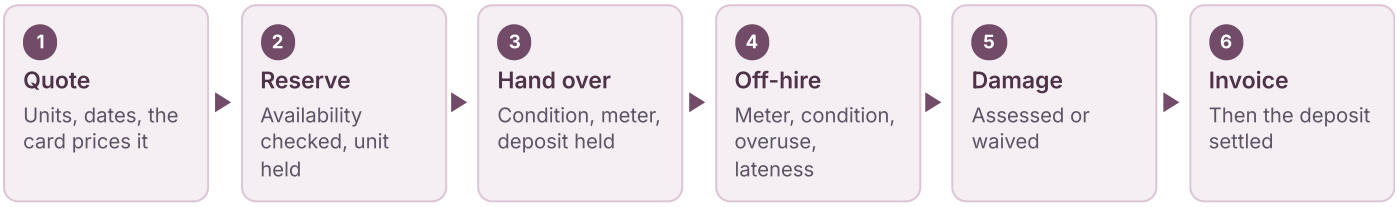

Hand-over, damage and the deposit

Every argument about damage is settled by what was written down when the machine left. So the hand-over records the condition and a note for every unit, and the return records it again. A **deposit** is held while the machine is out and given back after the off-hire, in full or with part kept back against damage, and part can only be kept with a reason on the record.

Examinations

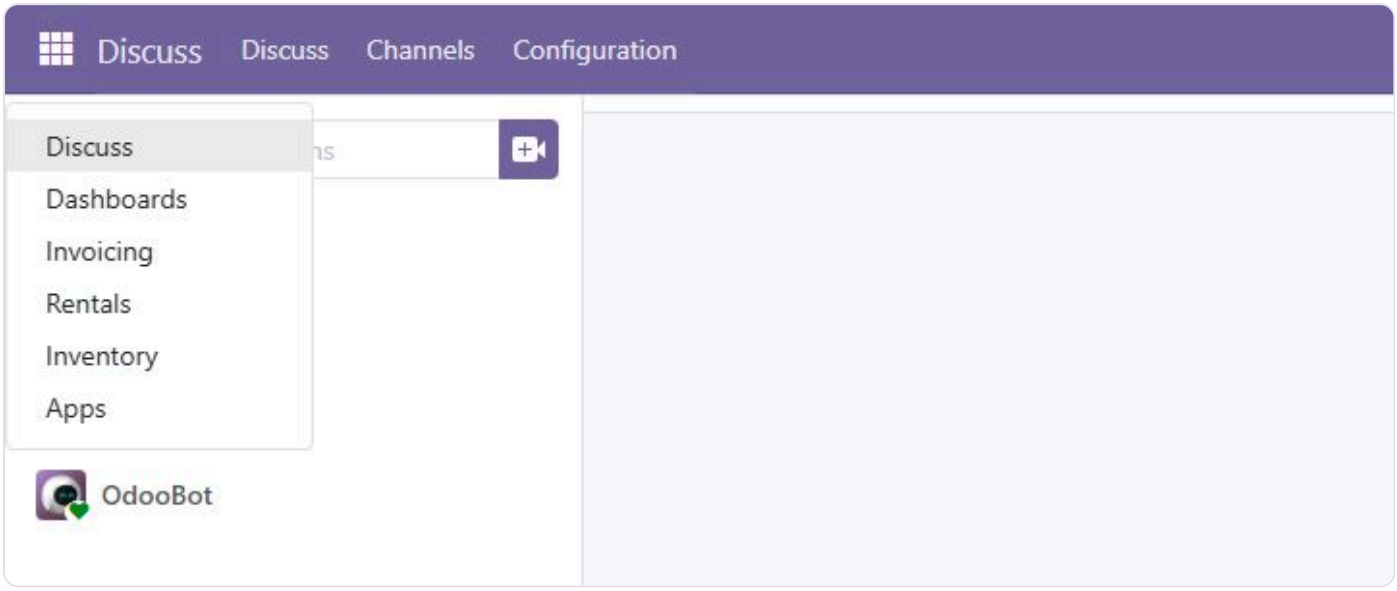

In the UK, lifting equipment is examined under **LOLER**: every six months for anything that lifts people, every twelve for anything that lifts a load. Work equipment in general is inspected under **PUWER**, electrical tools get a **portable appliance test**, and compressors are examined as **pressure systems**. A machine whose certificate has lapsed must not go out. The module holds each certificate against the unit and, unless you switch it off, refuses the hand-over when there is no current one.

The life of one hire

PART 2 The yard at a glance

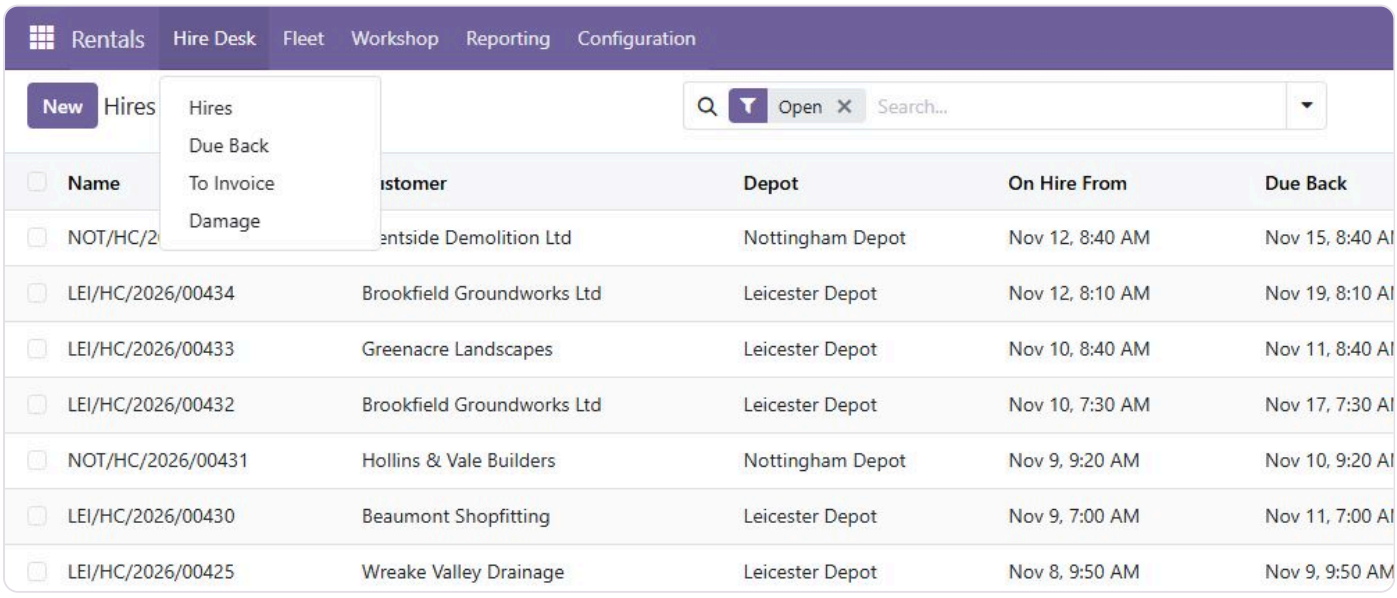

The module adds one app, Rentals, with five menus. This part is the map, and the three roles that decide who sees what.

The Rentals app on the Odoo home screen. Inventory and Invoicing come with it.

The five menus

MENU	WHAT IS UNDER IT
Hire Desk	Hires, Due Back, To Invoice, Damage
Fleet	Equipment, Availability, Hire Lines
Workshop	Jobs, Examinations, Certificates
Reporting	Utilisation and Revenue, Earning Nothing
Configuration	Settings, Depots, Categories, Rate Cards

The Hire Desk menu dropped down. Each top menu opens the same way.

Three roles

Under Settings, Users, each user gets one Equipment Rental role. Each role includes the one below it.

Fitter

Works the workshop jobs on their own list and records examinations. Reads the fleet and the hires but cannot change a machine or a hire. Sees only the jobs given to them.

Hire Desk

Quotes, reserves, hands machines over, takes them back, reports and assesses damage, invoices. Sees every workshop job. Cannot see what a machine cost.

Rental Manager

Everything: depots, categories and rate cards, the purchase value of each machine, the payback figure and the reporting menu. The administrator gets this role when the module is installed.

SCREEN	FITTER	HIRE DESK	MANAGER
Jobs, Examinations, Certificates	own jobs	all	all
Equipment	read	edit	create and edit
Hires, Due Back, To Invoice, Damage, Availability, Hire Lines	-	yes	yes
Purchase value, Paid Back (%)	-	-	yes
Reporting, Depots, Categories, Rate Cards	-	-	yes
Settings	-	-	administrator only

> The demo login w4demo has the Rental Manager role, so you can see every screen in this guide. It is not an administrator and cannot open Settings.

PART 3 Open the demo, then set up from zero

First sign in to the demo. Then read what a new yard does on day one, before the first machine goes out. On the demo this is done, so it shows you what each setting means and where it lives.

IN THIS PART YOU WILL LEARN

- What installing the app brings with it
- The five settings and their defaults
- Depots, categories and hire products
- The four scheduled jobs and which ship switched off

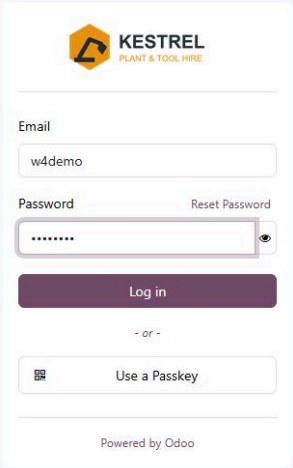

TRY IT YOURSELF ON THE DEMO

1. Open equipmentrental-demo.way4tech.com and sign in with w4demo / Demo2026
2. Click Rentals on the home screen
3. Open Configuration, Depots, then Leicester Depot
4. Open Configuration, Categories, then Access Platforms

1 Sign in

Open **equipmentrental-demo.way4tech.com**. User `w4demo`, password `Demo2026`. It is the standard Odoo sign-in screen; there is nothing to install.

The demo is shared, so look at everything and expect anything you change to be put back.

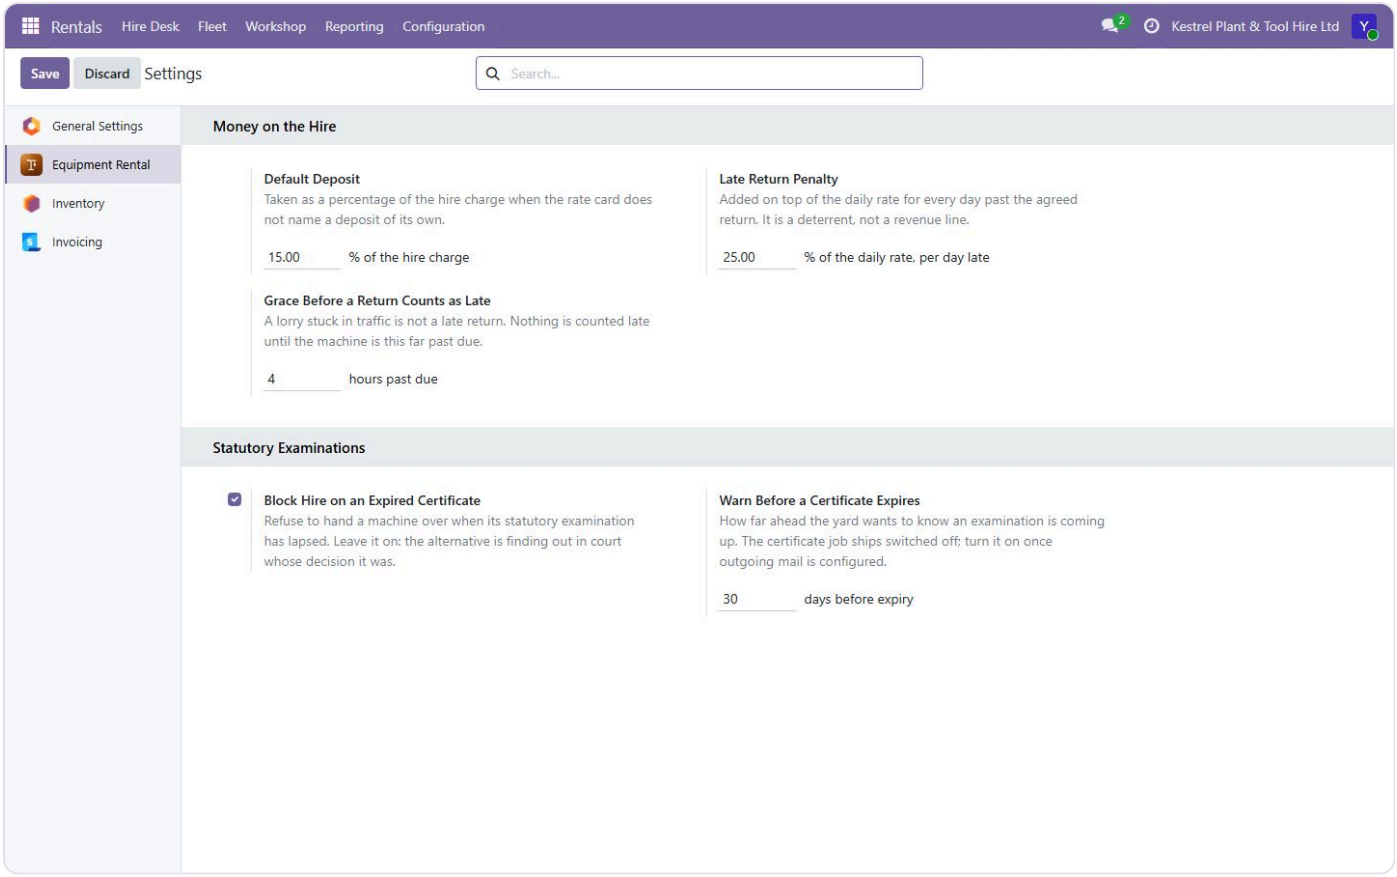

Install the app

The module is **Equipment Rental Management** (technical name wt_equipment_rental, USD 249 on the Odoo App Store, version 19.0.1.0.0). Open Apps, search for it and press Install. It brings in Inventory, because each depot has a yard location, and Invoicing, because a hire ends in a customer invoice. Both are part of Odoo Community. Nothing from Odoo Enterprise is needed.

The settings

Rentals, Configuration, Settings (administrator only). Each setting is per company.

The Equipment Rental section of Settings, opened with the administrator because the demo login cannot reach Settings.

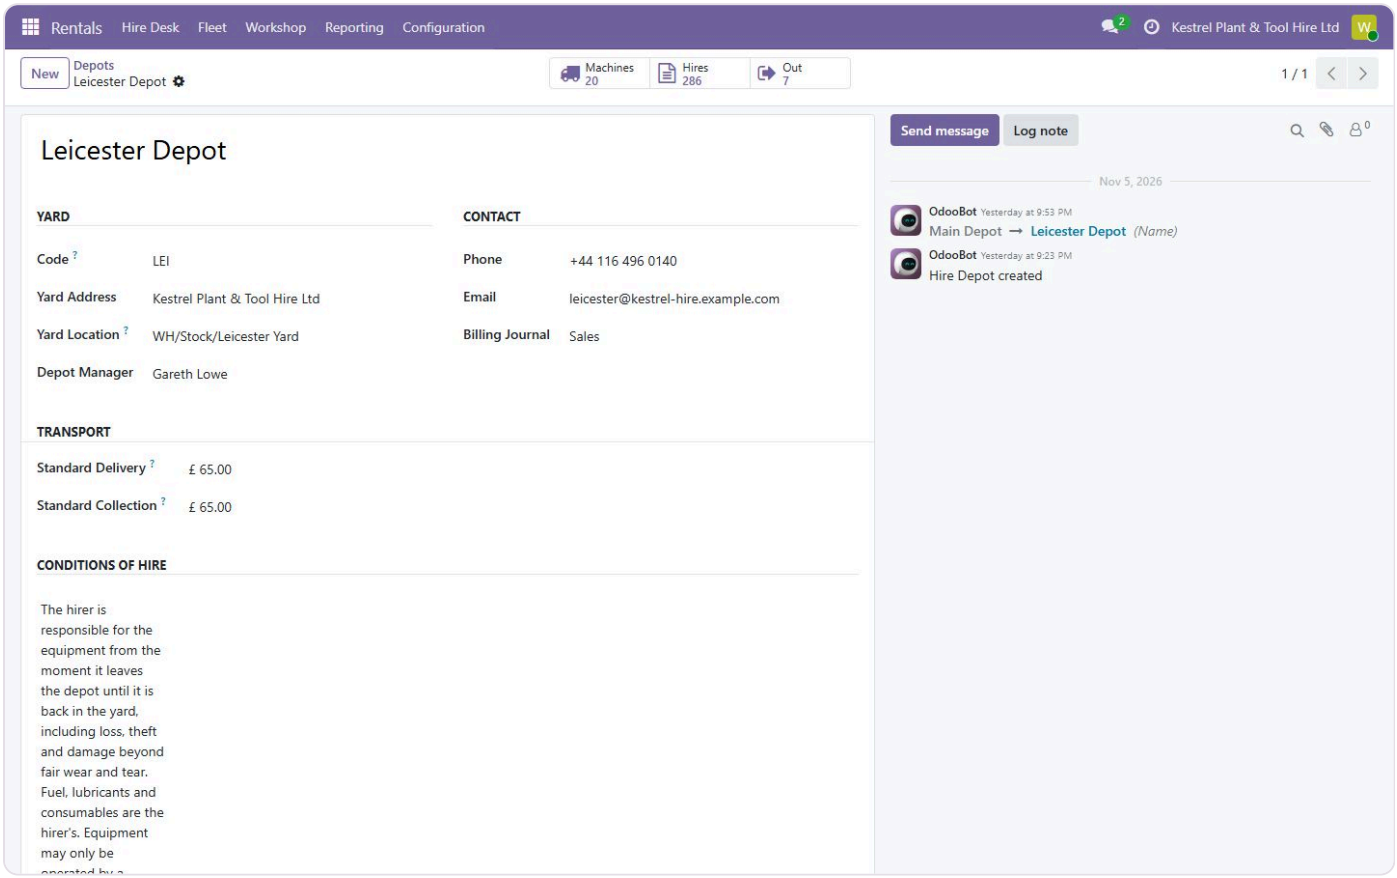

SETTING	WHAT IT DOES	DEFAULT
Default Deposit (%)	The deposit as a percentage of the hire charge, used when no rate card or category on the hire names a deposit.	15
Late Return Penalty (%)	Added for every day a hire is late: days late x the daily rate of every unit on it x this percentage.	25
Grace Before Late (hours)	Nothing counts as late until the machine is this many hours past due, so a lorry in traffic is not a penalty.	4
Warn on Certificates (days)	How far ahead a certificate shows as Due Soon and the reminder goes to the depot manager.	30
Block Hire on an Expired Certificate	Refuses the hand-over of a unit with no current examination. Leave it on.	On

Depots

2 Create the depot

Configuration, Depots. A depot has a **code** (LEI on the demo) that prefixes every asset number and hire number from that yard, so LEI/HC/2026/00042 tells you where it came from. Set the **yard location** (off-hire puts the machine back there), the **billing journal**, the **depot manager** who gets the reminders, the **standard delivery and collection** charges and the **hire conditions** printed on the agreement. The buttons at the top count the fleet, the hires and what is out today.

A yard with one site renames the Main Depot the module creates and never thinks about it again.

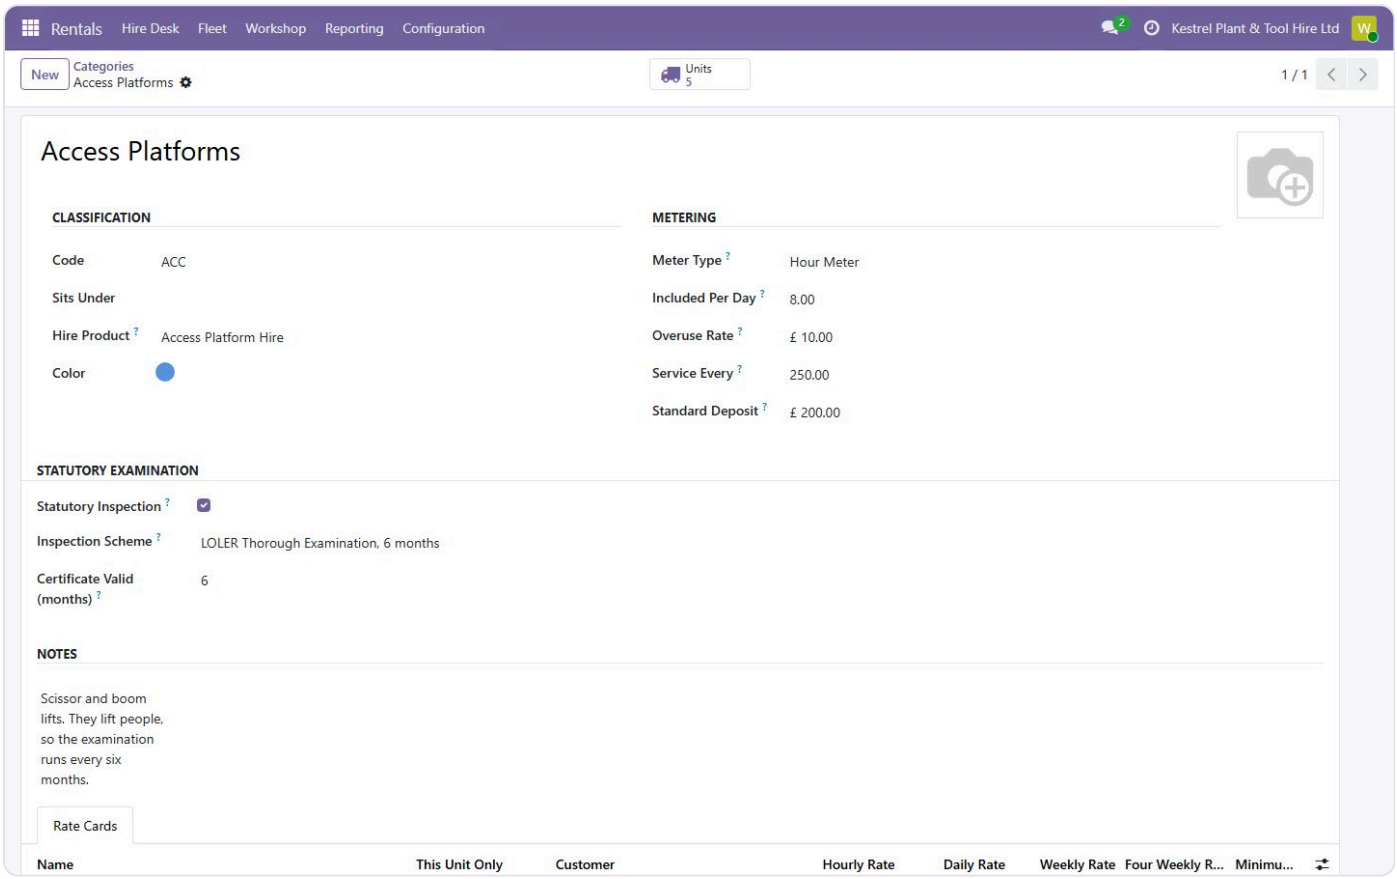

Categories

3 Describe each class of kit

Configuration, Categories. The category carries the rules every unit in it follows: the **meter type** (hours, kilometres or none), the **allowance per day** and the **overuse rate**, the **service interval** in meter units, the **standard deposit**, and whether it needs a **statutory inspection**, under which scheme and how many months a certificate lasts. Every category needs a **hire product**: the service product the revenue and VAT land on. A category can sit under another (Mini and Midi Excavators sits under Earthmoving).

Choosing No Meter clears the allowance, overuse rate and service interval, since there is nothing to measure.

CATEGORY ON THE DEMO	METER	INCLUDED A DAY	OVERUSE	EXAMINATION
Mini and Midi Excavators	hours	8	£12 an hour	PUWER, 12 months
Site Dumpers	hours	8	£9 an hour	PUWER, 12 months
Telehandlers	hours	8	£18 an hour	LOLER, 12 months
Access Platforms	hours	8	£10 an hour	LOLER, 6 months
Breakers and Power Tools	none	-	-	PAT, 6 months
Generators and Lighting Towers	hours	10	£3.50 an hour	none
Compressors	hours	8	£5 an hour	Pressure system, 12 months
Tippers and Site Vans	km	150	£0.35 a km	none
Lifting Accessories	none	-	-	LOLER, 6 months

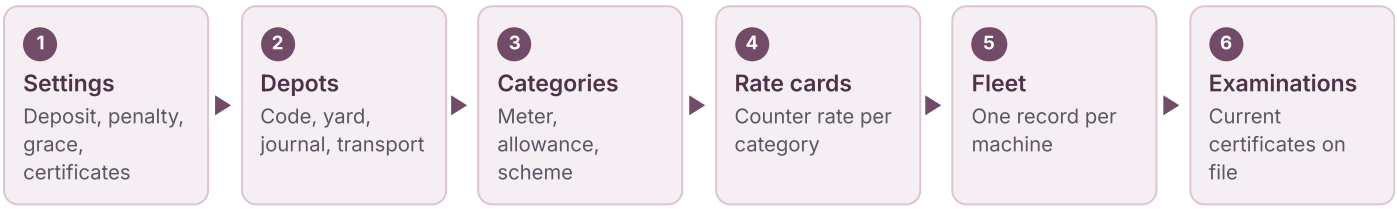

The scheduled jobs

Four jobs run every night. Two are on from the start. The two that send email to customers and managers are off, so a new yard is not writing to people before it is ready. Switch on developer mode and open Settings, Technical,

Scheduled Actions to change them.

JOB	DOES	SHIPS
Rental: watch inspection certificates	Marks lapsed certificates expired, quarantines units standing in the yard with no current certificate, and schedules a reminder (plus an email to the depot manager) for those inside the warning window	off
Rental: raise services that have fallen due	Opens a service job for every unit whose meter has passed its service point	on
Rental: refresh fleet utilisation	Recalculates days owned, days on hire and utilisation, which move with the calendar	on
Rental: chase overdue hires	Schedules a reminder for the depot manager, posts a note and emails the customer for every hire past due	off

Day one

PART 4 Rate cards: the cheapest rate wins

The rate card is where a hire yard makes or loses its margin. The module keeps four kinds of card and picks the right one for each machine on each hire, then prices the period the cheapest way the card allows.

IN THIS PART YOU WILL LEARN

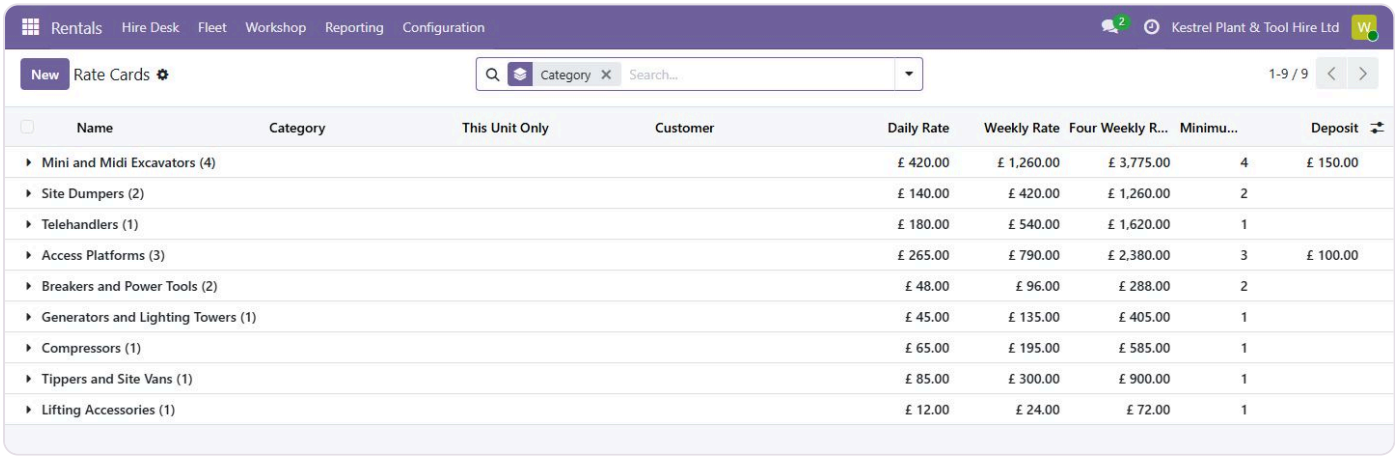

- Counter, single unit, customer and season cards
- The order the module picks a card in
- How a hire length is turned into a price
- Minimum periods and the hourly rate
- What else a card can override: allowance, deposit, transport

TRY IT YOURSELF ON THE DEMO

1. Open Configuration, Rate Cards
2. Open the Brookfield Groundworks season rate
3. Use the filters Counter Rates and Customer Rates
4. Open a hire for Brookfield and read Priced As on its line

1 The cards, grouped by category

Configuration, Rate Cards opens grouped by category. Each row is one card: its hourly, daily, weekly and four weekly rate, the minimum days, and whether it is limited to one unit or one customer. The list is editable in place for quick price changes. Filters: **Counter Rates** (no customer), **Customer Rates**, **Single Unit** and **In Date**.

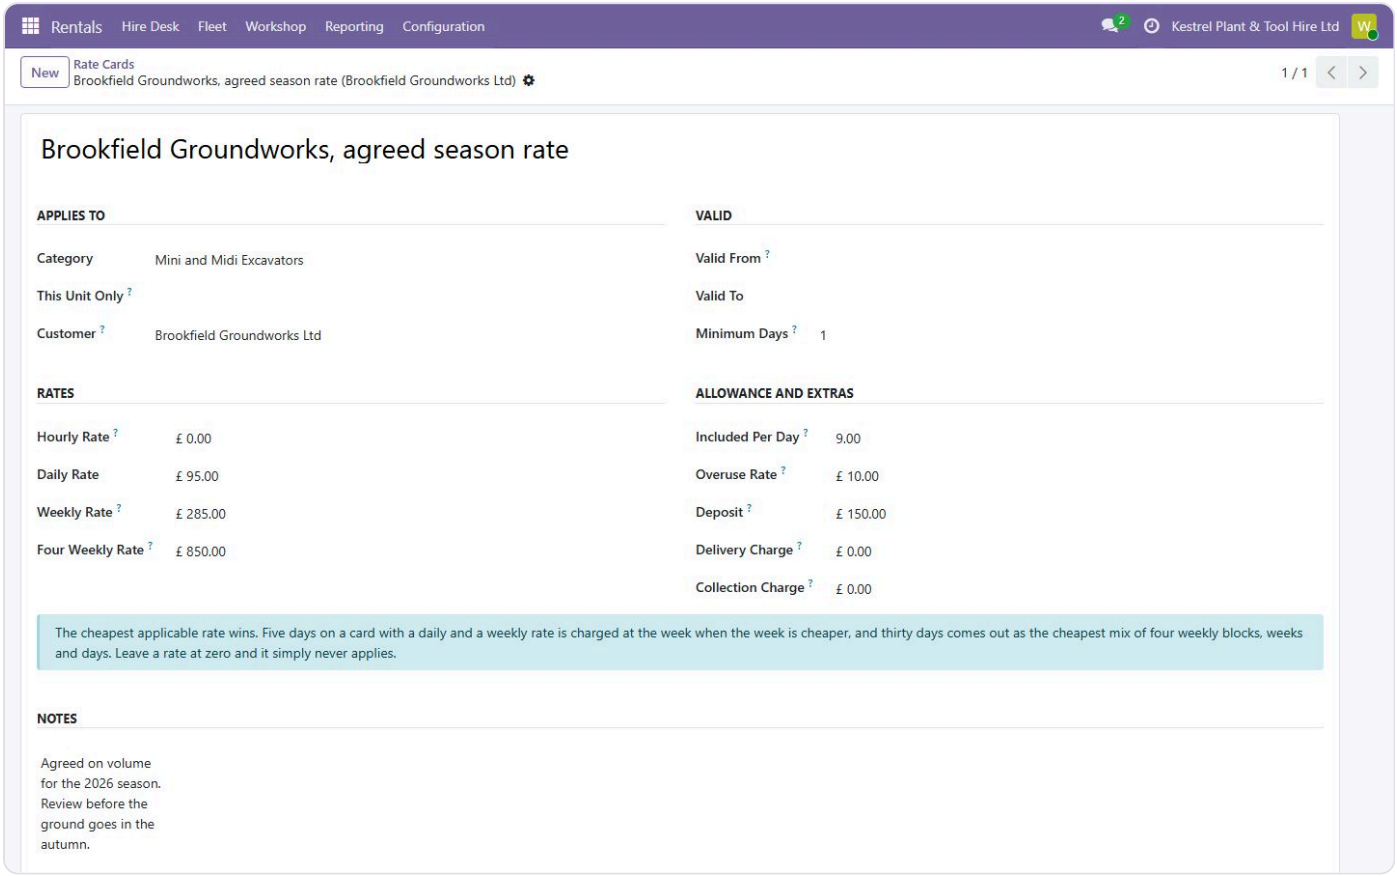

Name	Category	This Unit Only	Customer	Daily Rate	Weekly Rate	Four Weekly R...	Minimu...	Deposit
Mini and Midi Excavators (4)				£ 420.00	£ 1,260.00	£ 3,775.00	4	£ 150.00
Site Dumpers (2)				£ 140.00	£ 420.00	£ 1,260.00	2	
Telehandlers (1)				£ 180.00	£ 540.00	£ 1,620.00	1	
Access Platforms (3)				£ 265.00	£ 790.00	£ 2,380.00	3	£ 100.00
Breakers and Power Tools (2)				£ 48.00	£ 96.00	£ 288.00	2	
Generators and Lighting Towers (1)				£ 45.00	£ 135.00	£ 405.00	1	
Compressors (1)				£ 65.00	£ 195.00	£ 585.00	1	
Tippers and Site Vans (1)				£ 85.00	£ 300.00	£ 900.00	1	
Lifting Accessories (1)				£ 12.00	£ 24.00	£ 72.00	1	

2 One card

A card names its **category**, and optionally **This Unit Only** and a **Customer**. It needs at least one of daily, weekly or four weekly: an hourly rate on its own cannot price a week. **Minimum Hire** is the shortest period the yard invoices. The card can also override the category's **included per day**, **overuse rate** and **deposit**, and the depot's **delivery** and **collection** charges. **Valid From** and **Valid To** let next season's card sit ready.

A unit can only be priced on a card of its own category; the module refuses the mismatch.

Which card applies

When a unit is put on a hire, the module looks for a card in date for that unit's category, in this order, and takes the first it finds (lowest sequence first when two match):

#	CARD	ON THE DEMO
1	This unit, this customer	none set
2	This unit, any customer	the older Takeuchi TB230 at £100 a day; the old Bosch breaker at £20
3	This category, this customer	Brookfield Groundworks on excavators and dumpers; Castlegate Construction on access
4	This category, counter rate	one counter card per category

The card is chosen on the date the line starts, so a hire quoted for December picks up the winter access rate and one in March 2027 the new excavator card, with nobody changing anything. The desk can still pick a different card on the line.

Turning hours into a price

The hire length is counted in hours from hand-over to return (or the planned dates until then), rounded up to whole days, and never less than the card's minimum. The module then finds the cheapest way to make up those days from the day, week and four week rates on the card, and writes how it did it on the line as **Priced As**, for example "1 x week, 2 x day".

The hourly rate is used only when the hire is 24 hours or less and the minimum is one day, and only if it comes out cheaper than the day. On the demo the breakers carry £8 an hour against £28 a day, so a three hour job costs £24.

> A month on a card is **28 days**, as the trade quotes it, not a calendar month. A hire of 30 days is priced as four weeks plus two days, or whatever mix is cheaper on that card.

PART 5 The fleet: one record per machine

Equipment is the heart of the module. Every machine has its own record with its meter, its certificate, its status and what it has earned, and every hire, job and examination is reachable from it.

IN THIS PART YOU WILL LEARN

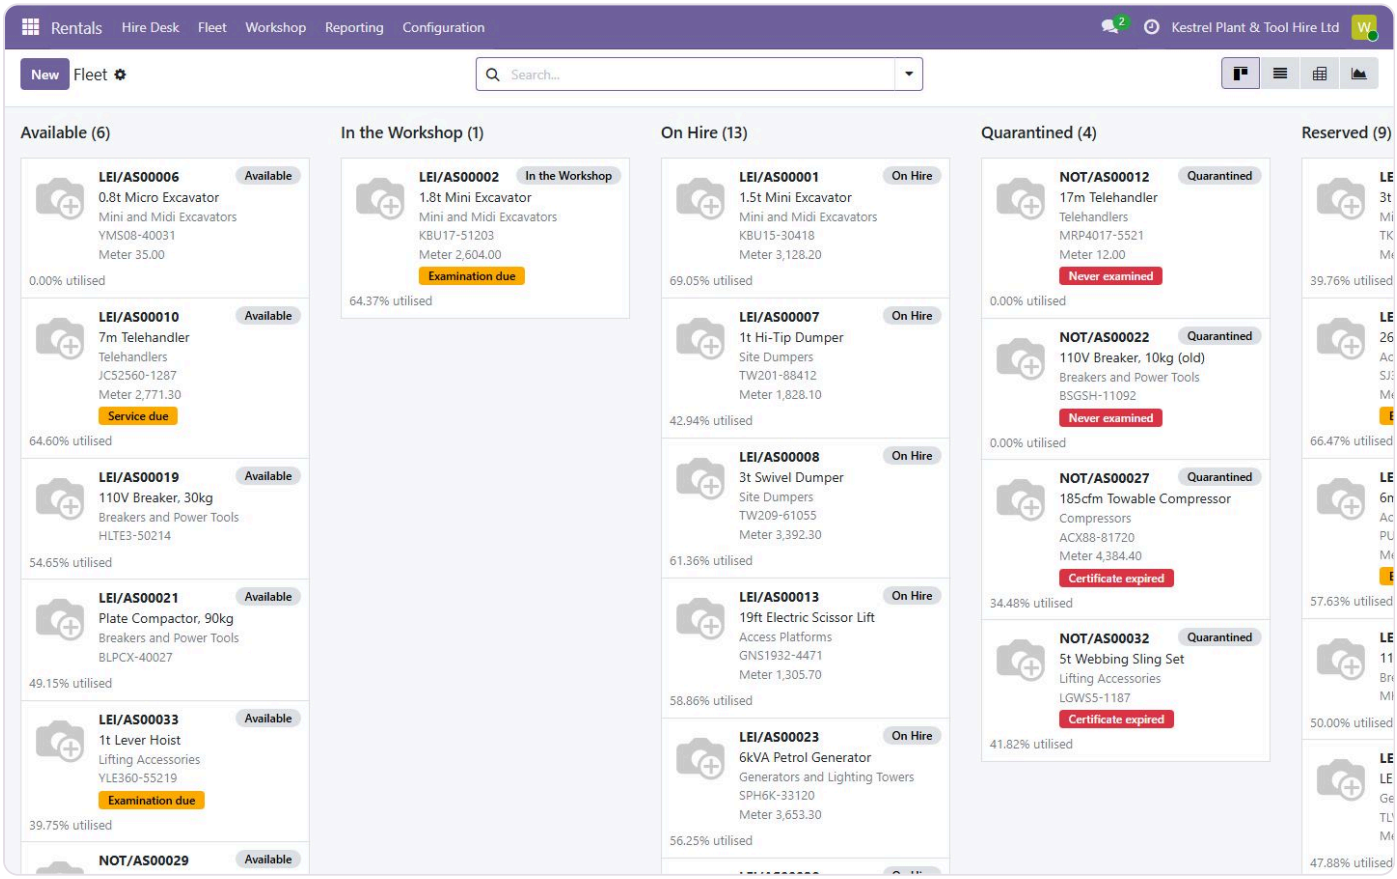

- The fleet board and its six statuses
- Every field on a unit, and who can see the purchase value
- Quarantine, back on the hire list, retire
- The record card and the history tabs
- The fleet filters the yard uses every day

TRY IT YOURSELF ON THE DEMO

1. Open Fleet, Equipment: the board is grouped by status
2. Open a unit that is On Hire and look at the Hire History tab
3. Open a Quarantined unit and read why from its chatter
4. Try the filters Examination Due and Service Due

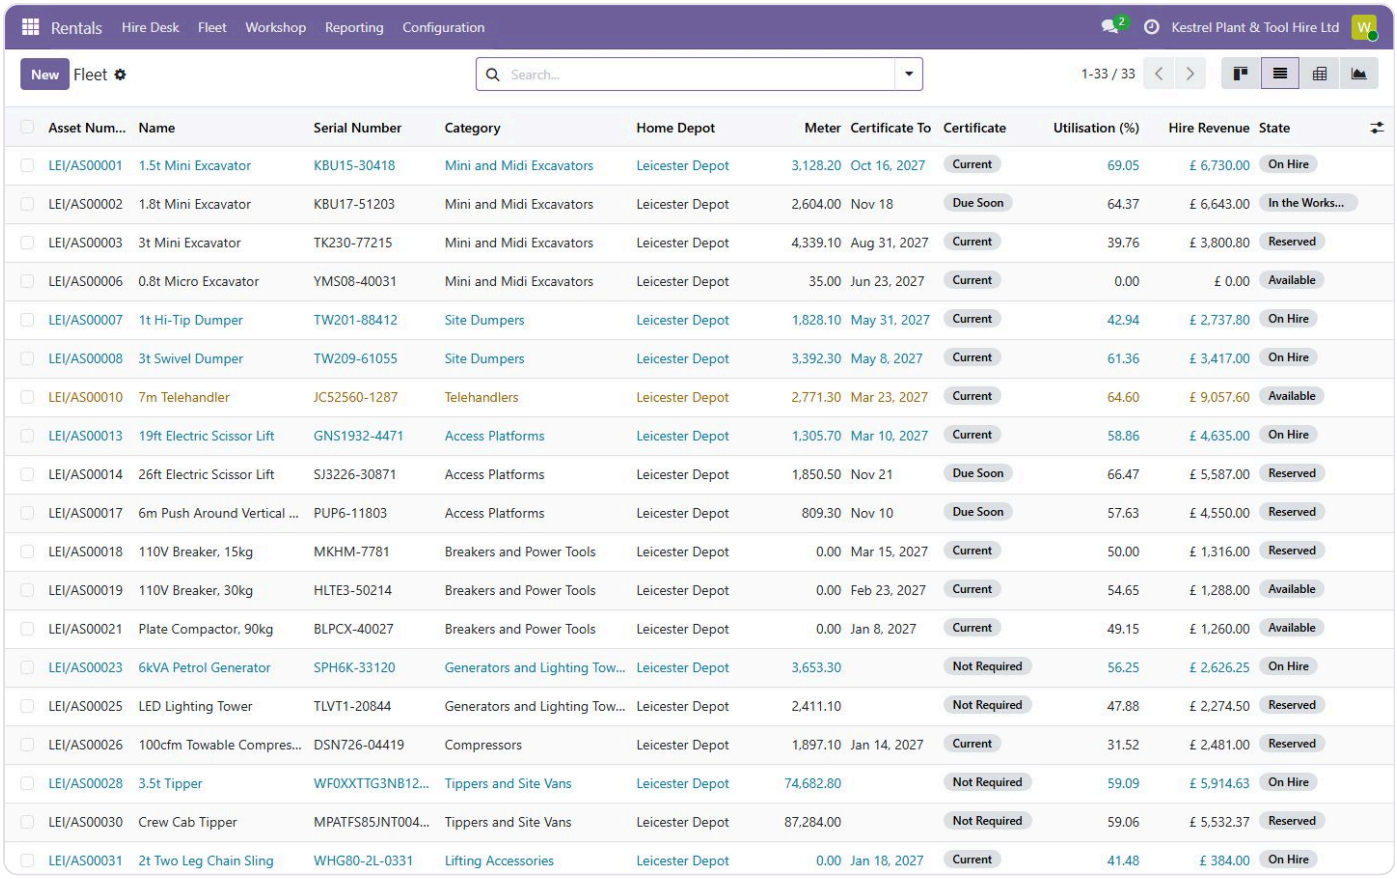

1 The fleet board

Fleet, Equipment opens as a board grouped by status: **Available**, **Reserved**, **On Hire**, **In the Workshop**, **Quarantined** and **Retired**. Each card shows the asset number, the machine, its depot, the meter and the certificate badge. The board can be switched to a list, a pivot or a graph.

2 The fleet as a list

The list shows asset number, machine, serial, category, depot, make, model, year, meter, certificate expiry and state, condition, hires, days on hire, utilisation, revenue, purchase value and payback (the last two for managers only), and the status. Group by category, depot, status, certificate or condition from the search bar.

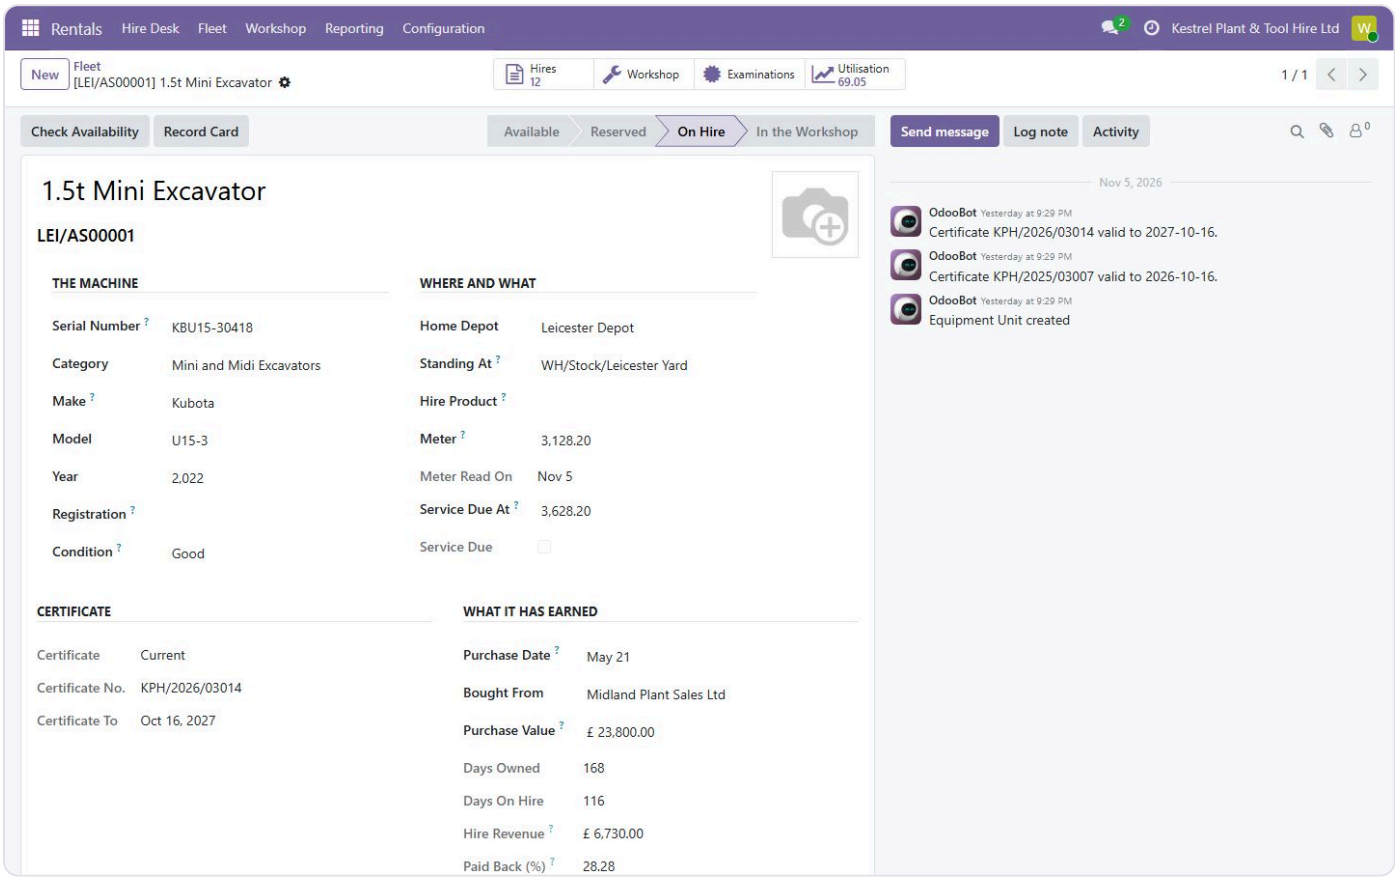

Asset Num...	Name	Serial Number	Category	Home Depot	Meter	Certificate To	Certificate	Utilisation (%)	Hire Revenue	State
LEI/AS00001	1.5t Mini Excavator	KBU15-30418	Mini and Midi Excavators	Leicester Depot	3,128.20	Oct 16, 2027	Current	69.05	£ 6,730.00	On Hire
LEI/AS00002	1.8t Mini Excavator	KBU17-51203	Mini and Midi Excavators	Leicester Depot	2,604.00	Nov 18	Due Soon	64.37	£ 6,643.00	In the Works...
LEI/AS00003	3t Mini Excavator	TK230-77215	Mini and Midi Excavators	Leicester Depot	4,339.10	Aug 31, 2027	Current	39.76	£ 3,800.80	Reserved
LEI/AS00006	0.8t Micro Excavator	YMS08-40031	Mini and Midi Excavators	Leicester Depot	35.00	Jun 23, 2027	Current	0.00	£ 0.00	Available
LEI/AS00007	1t Hi-Tip Dumper	TW201-88412	Site Dumpers	Leicester Depot	1,828.10	May 31, 2027	Current	42.94	£ 2,737.80	On Hire
LEI/AS00008	3t Swivel Dumper	TW209-61055	Site Dumpers	Leicester Depot	3,392.30	May 8, 2027	Current	61.36	£ 3,417.00	On Hire
LEI/AS00010	7m Telehandler	JC52560-1287	Telehandlers	Leicester Depot	2,771.30	Mar 23, 2027	Current	64.60	£ 9,057.60	Available
LEI/AS00013	19ft Electric Scissor Lift	GNS1932-4471	Access Platforms	Leicester Depot	1,305.70	Mar 10, 2027	Current	58.86	£ 4,635.00	On Hire
LEI/AS00014	26ft Electric Scissor Lift	SJ3226-30871	Access Platforms	Leicester Depot	1,850.50	Nov 21	Due Soon	66.47	£ 5,587.00	Reserved

LEI/AS00018	110V Breaker, 15kg	MKHM-7781	Breakers and Power Tools	Leicester Depot	0.00	Mar 15, 2027	Current	50.00	£ 1,316.00	Reserved
LEI/AS00019	110V Breaker, 30kg	HLTE3-50214	Breakers and Power Tools	Leicester Depot	0.00	Feb 23, 2027	Current	54.65	£ 1,288.00	Available
LEI/AS00021	Plate Compactor, 90kg	BLPCX-40027	Breakers and Power Tools	Leicester Depot	0.00	Jan 8, 2027	Current	49.15	£ 1,260.00	Available
LEI/AS00023	6kVA Petrol Generator	SPH6K-33120	Generators and Lighting Tow...	Leicester Depot	3,653.30		Not Required	56.25	£ 2,626.25	On Hire
LEI/AS00025	LED Lighting Tower	TLVT1-20844	Generators and Lighting Tow...	Leicester Depot	2,411.10		Not Required	47.88	£ 2,274.50	Reserved
LEI/AS00026	100cfm Towable Compres...	DSN726-04419	Compressors	Leicester Depot	1,897.10	Jan 14, 2027	Current	31.52	£ 2,481.00	Reserved
LEI/AS00028	3.5t Tipper	WF0XXTTG3NB12...	Tippers and Site Vans	Leicester Depot	74,682.80		Not Required	59.09	£ 5,914.63	On Hire
LEI/AS00030	Crew Cab Tipper	MPATFS85JNT004...	Tippers and Site Vans	Leicester Depot	87,284.00		Not Required	59.06	£ 5,532.37	Reserved
LEI/AS00031	2t Two Leg Chain Sling	WHG80-2L-0331	Lifting Accessories	Leicester Depot	0.00	Jan 18, 2027	Current	41.48	£ 384.00	On Hire

3 A unit

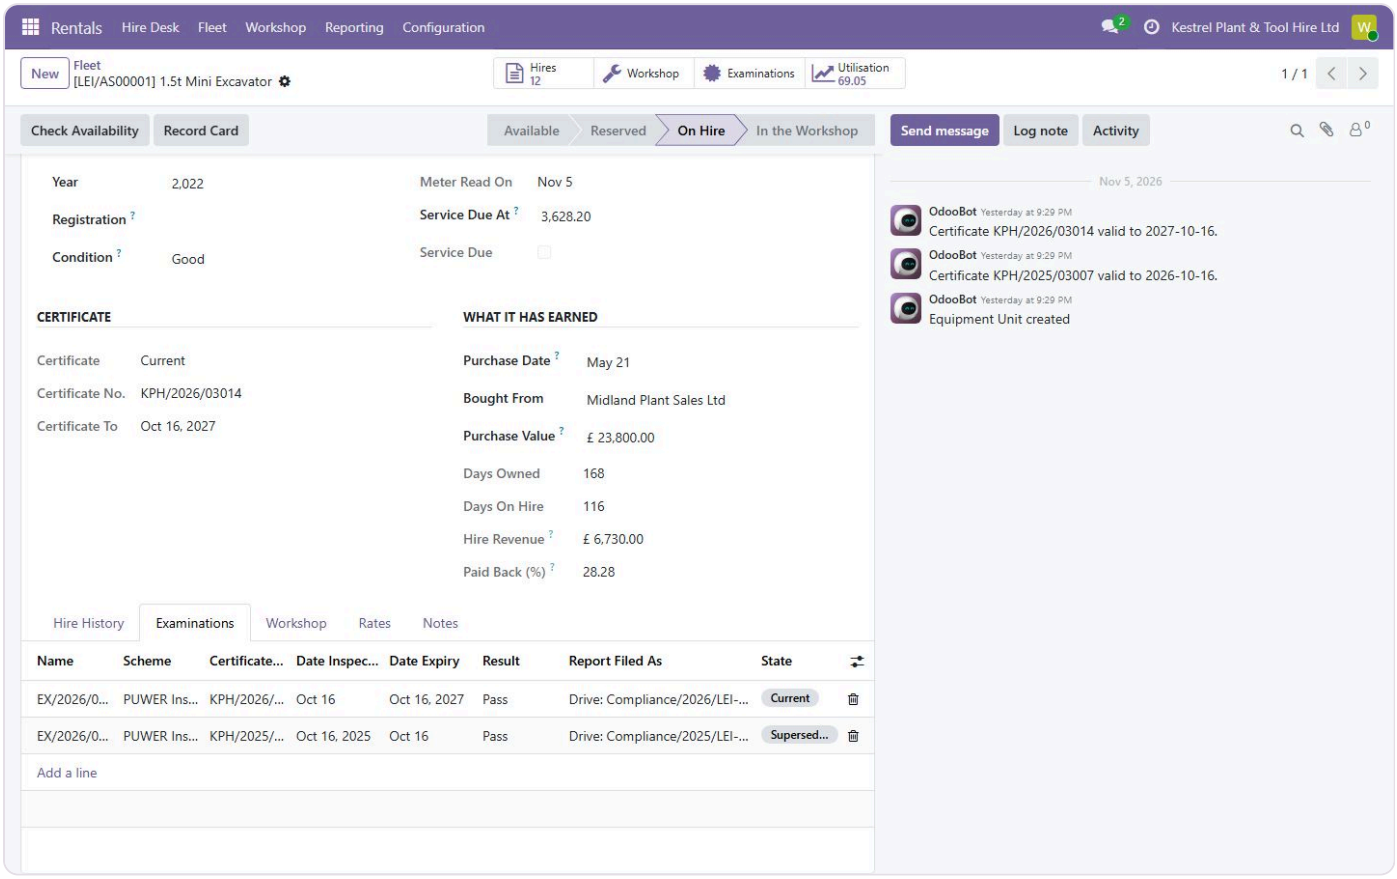

The **asset number** is given on save: the depot code, then AS and a number (LEI/AS00012). The record holds the **serial number** (unique in the company), make, model, year built, road **registration**, supplier, **purchase date** (day one for utilisation) and **purchase value**, the home depot, where it is standing, and a hire product override for a machine billed to its own revenue line. The meter block shows the reading, the date it was read and the **Service Due At** point. The condition (new, good, fair, worn, damaged) is updated on every off-hire.

Purchase value and Paid Back (%) are shown to the Rental Manager only. The hire desk never sees what a machine cost.

4 The history tabs

Hire History lists every hire line for the unit with dates, customer, meters and state. **Examinations** and **Workshop** list its certificates and jobs, **Rates** any unit-only cards, and **Notes** the yard notes. The buttons at the top open the hires, workshop jobs and examinations, and show the utilisation.

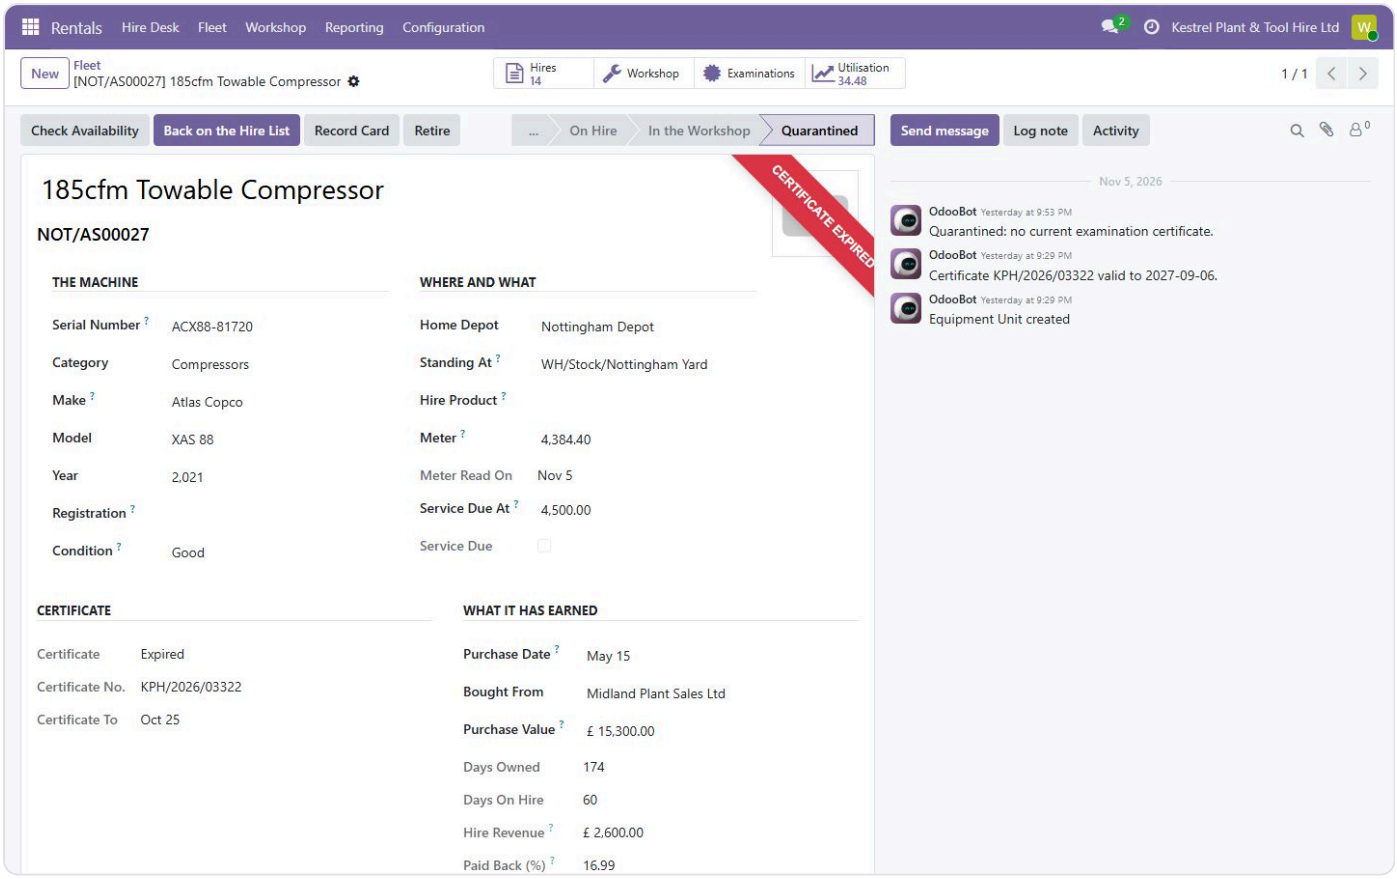

The buttons on a unit

BUTTON	WHAT IT DOES	REFUSED WHEN
Check Availability	Says whether the unit is free for the next 14 days, or which units are held	-
Quarantine	Takes the unit off the hire list without retiring it	it is on hire
Back on the Hire List	Returns a quarantined or workshop unit to Available	it has no current certificate
Record Card	Prints the unit record card (Part 16)	-
Retire	Retires and archives the unit	it is on hire

5 A quarantined unit

A unit goes to Quarantined when an examination fails, when the certificate watch finds no current certificate, when it comes back from hire with a lapsed certificate, or by hand. The chatter says which. It cannot be reserved until it is back on the hire list.

The filters

FILTER	SHOWS
Available, On Hire, In the Workshop, Quarantined	the unit status
Certificate Expired, Examination Due	certificates lapsed, or inside the warning window
Service Due	meter at or past the Service Due At point
Earning Nothing	no billed hire revenue yet
Under 40% Utilised	days on hire under 40% of days owned

PART 6 Availability: nothing promised twice

The question the hire desk is asked all day is "have you got one for next Tuesday". The module answers it across the whole date range, counting other hires and workshop bookings, and refuses a double booking outright rather than warning about it.

IN THIS PART YOU WILL LEARN

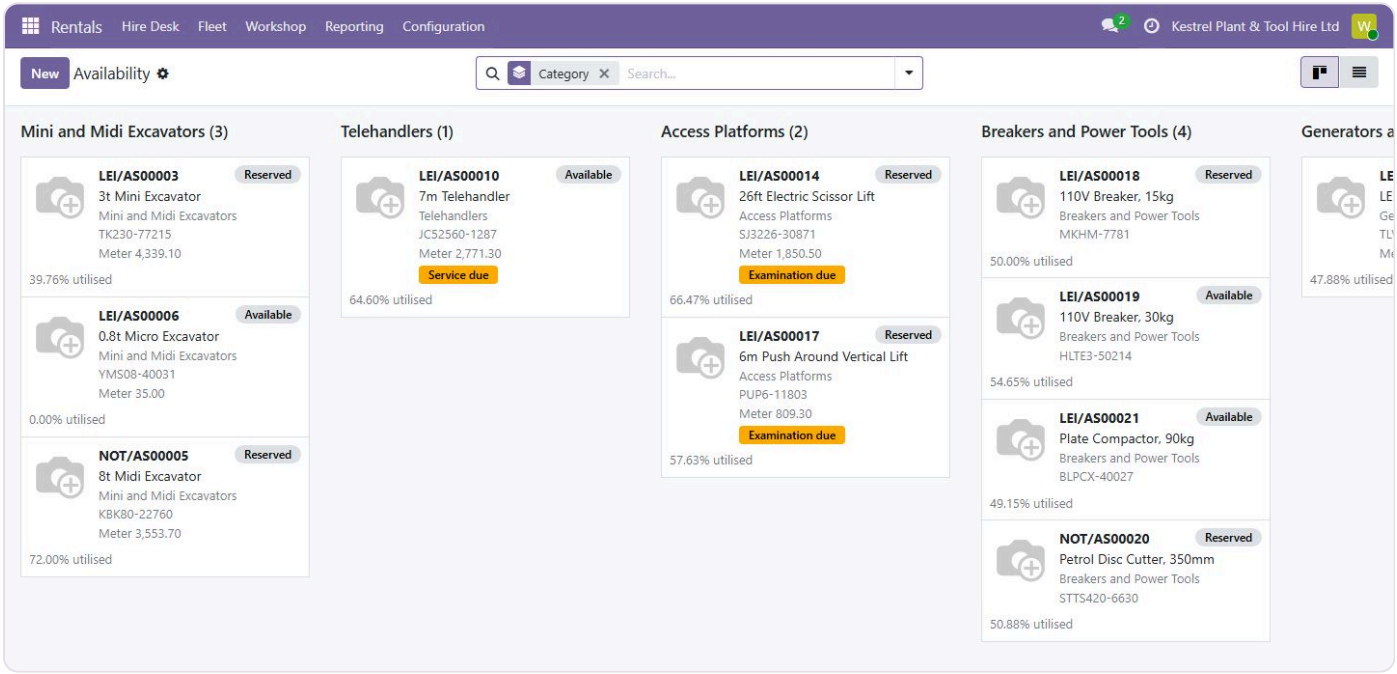

- The Availability screen
- Free Units from inside a hire
- What counts as holding a machine
- The double booking refusal

TRY IT YOURSELF ON THE DEMO

1. Open Fleet, Availability
2. Open a quotation on Hire Desk, Hires and press Free Units
3. Open any unit and press Check Availability

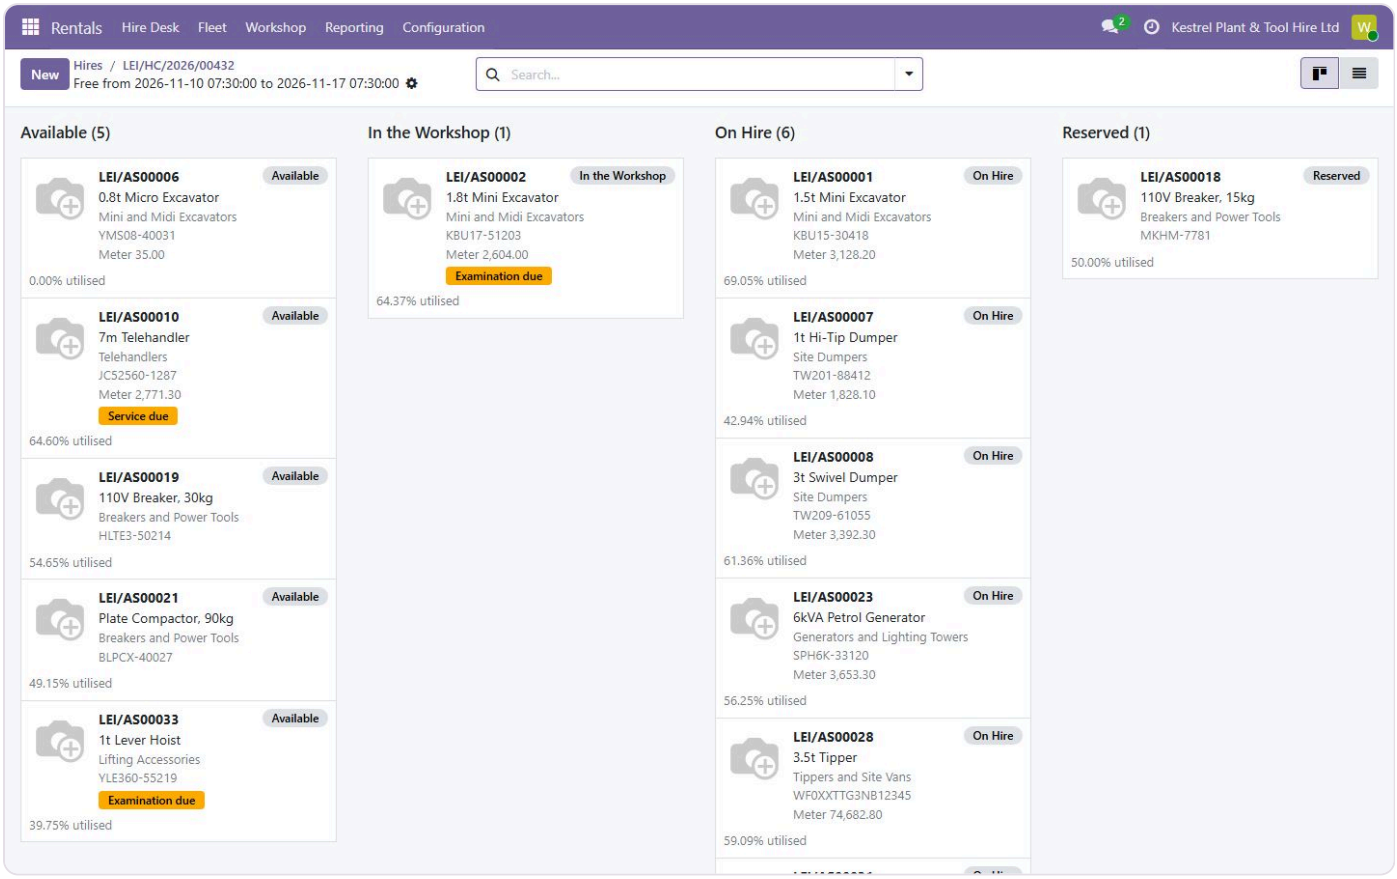

1 Availability

Fleet, Availability shows the units that are Available or Reserved, grouped by category, as a board or a list. It is the quick view for the phone: what is standing in the yard and what is already promised.

2 Free for this hire

On a quotation or reservation, **Free Units** opens every unit at the hire's depot that is free for the whole window from **On Hire From** to **Due Back**, leaving out the units already on this hire. This is the list to pick from.

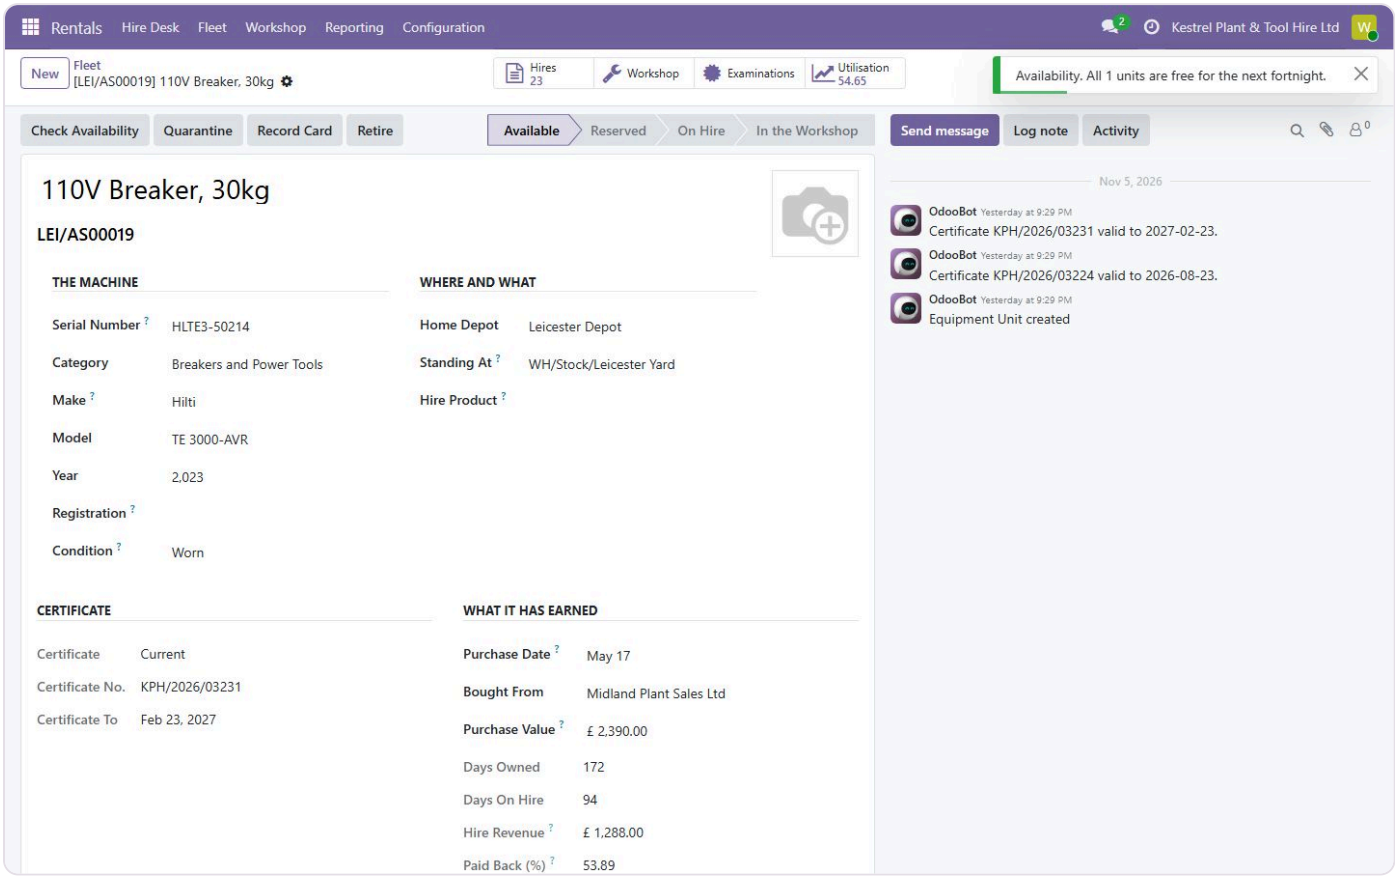

What holds a machine

A unit is held over a window when any of these overlaps it: a hire line that is **Reserved** or **On Hire**, or a workshop job that is **Planned** or **In the Workshop**. Retired and quarantined units are never free. A quotation does not hold anything: two quotes can name the same machine, and the second one to be reserved is refused.

3 The check on a unit

Check Availability on a unit (or on several selected in the list) looks at the next fourteen days and says either that they are all free or which asset numbers are held.

> The refusal works both ways. Reserving a unit over a workshop booking is refused on the hire, and booking the workshop over a live hire is refused on the job. The message names the customer and the contract that holds the machine.

PART 7 From quotation to reservation

A hire starts as a quotation. Reserving it checks every machine over the whole period and holds them. This part walks the hire form from the top.

IN THIS PART YOU WILL LEARN

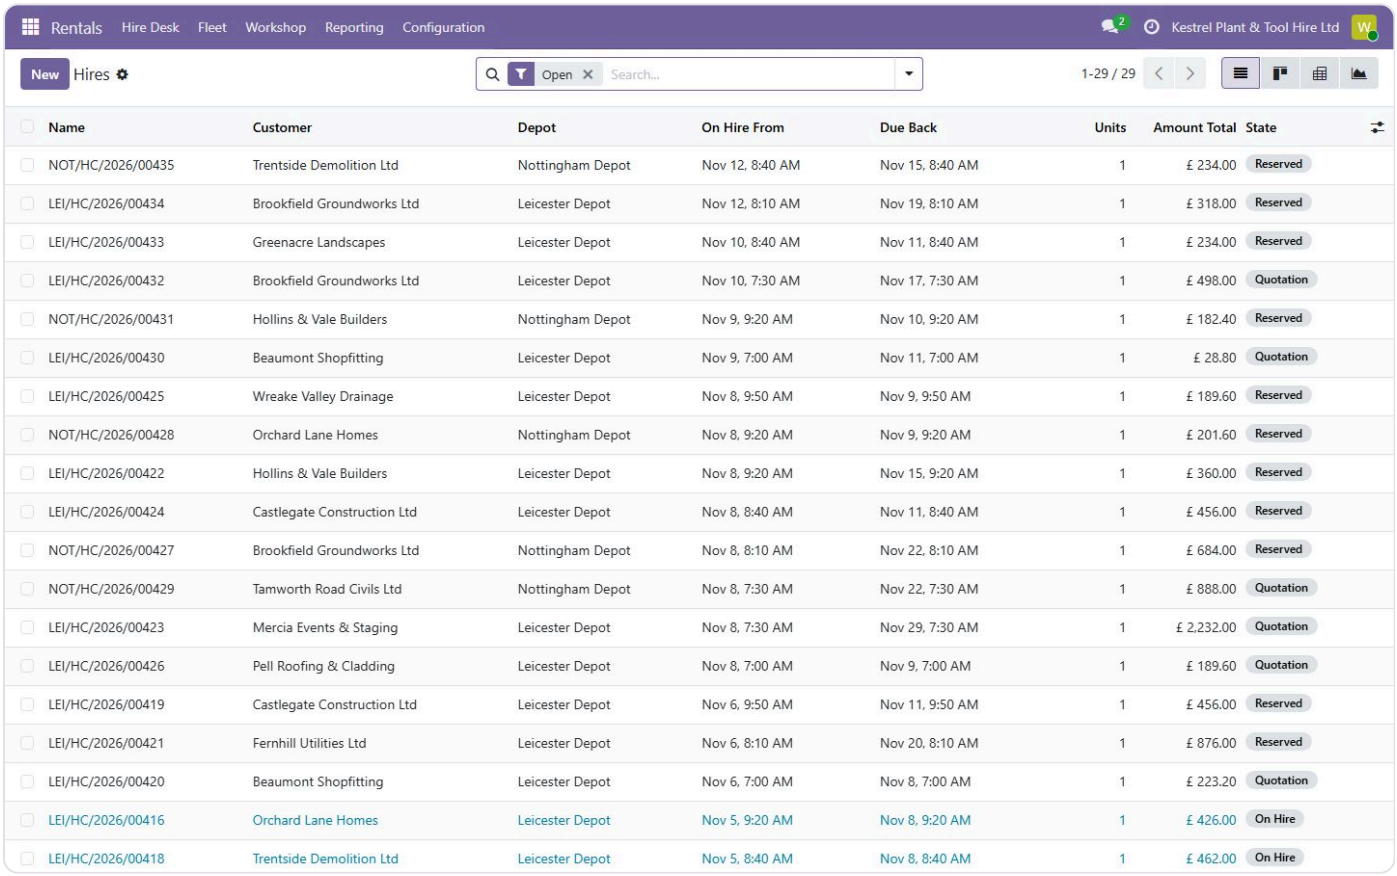

- The Hires list, board and filters
- Every field on a hire and on its unit lines
- Delivery, collection and the deposit, and where they come from
- Reserve, Cancel and Back to Quotation
- Why the status cannot be dragged

TRY IT YOURSELF ON THE DEMO

1. Open Hire Desk, Hires and remove the Open filter
2. Switch to the board view and look at the columns
3. Open a Quotation, then a Reserved hire
4. Open the Units tab and read Rate Card and Priced As

1 The Hires list

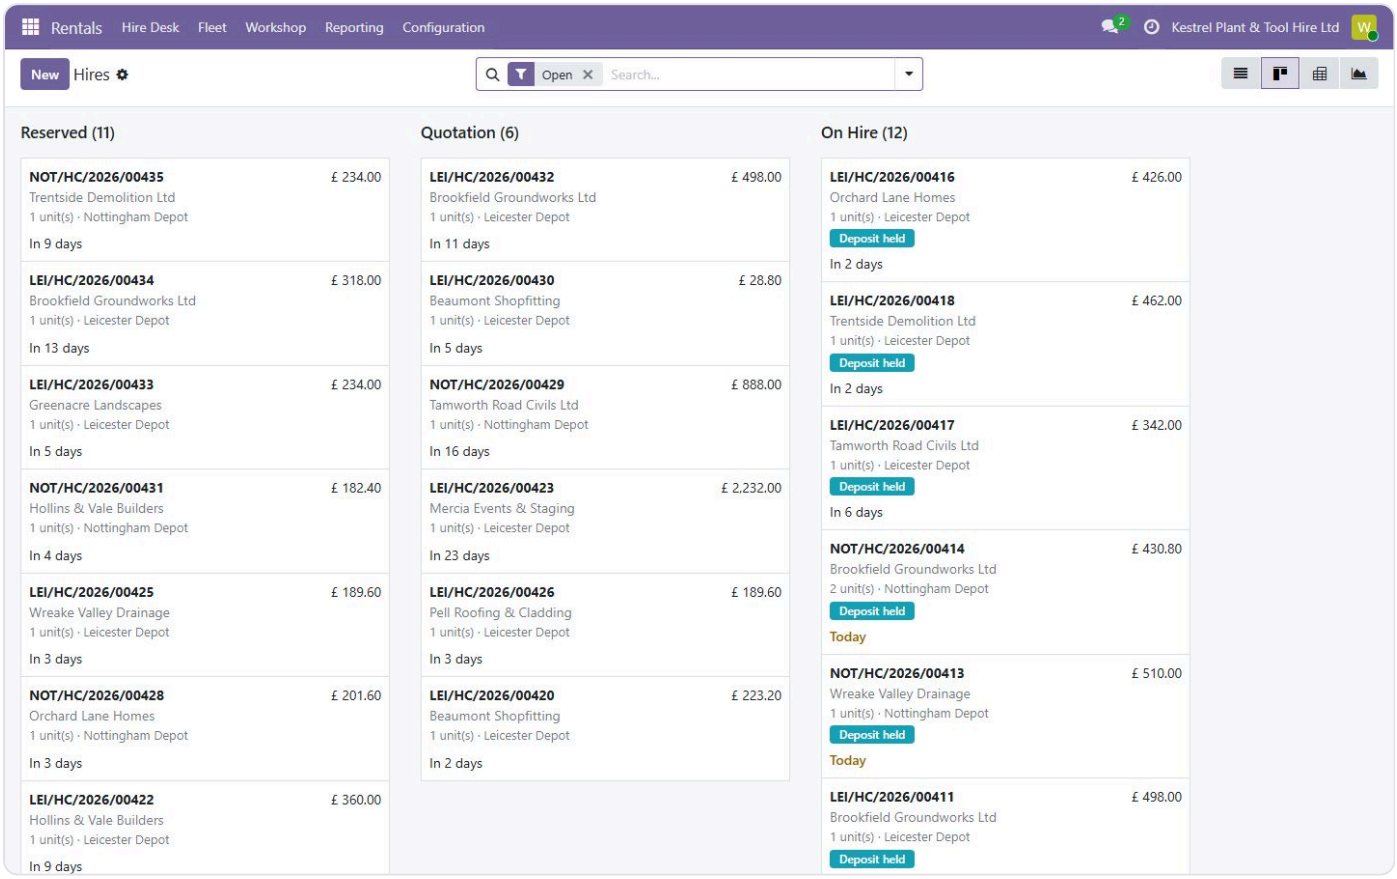

Hire Desk, Hires opens on the **Open** filter (everything not invoiced or cancelled). Each row shows the number, customer, depot, dates, units, days late, hire and overuse amounts, total, deposit state, the customer order number and the status. Overdue hires show in red. Other filters: **On Hire**, **Overdue**, **Off-Hired**, **To Invoice**, **Deposit Held** and **Due Back This Week**.

Name	Customer	Depot	On Hire From	Due Back	Units	Amount Total	State
NOT/HC/2026/00435	Trentside Demolition Ltd	Nottingham Depot	Nov 12, 8:40 AM	Nov 15, 8:40 AM	1	£ 234.00	Reserved
LEI/HC/2026/00434	Brookfield Groundworks Ltd	Leicester Depot	Nov 12, 8:10 AM	Nov 19, 8:10 AM	1	£ 318.00	Reserved
LEI/HC/2026/00433	Greenacre Landscapes	Leicester Depot	Nov 10, 8:40 AM	Nov 11, 8:40 AM	1	£ 234.00	Reserved
LEI/HC/2026/00432	Brookfield Groundworks Ltd	Leicester Depot	Nov 10, 7:30 AM	Nov 17, 7:30 AM	1	£ 498.00	Quotation

2 The board

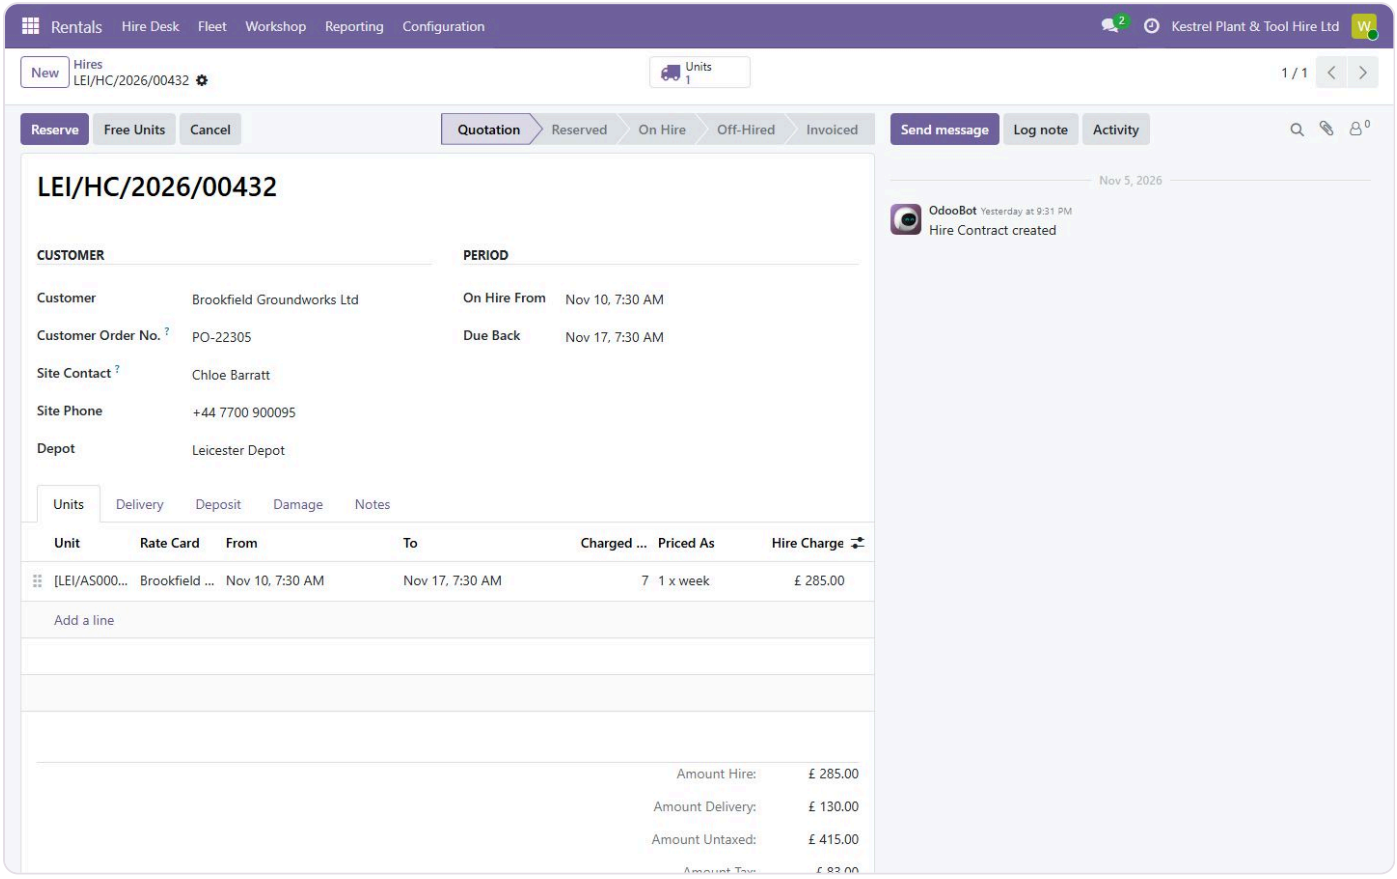

The board groups hires by status from Quotation to Invoiced. A card cannot be dragged to another column: the status only moves with the buttons on the hire, because dragging would skip the availability check, the hand-over sheet, the meters and the damage.

3 A quotation

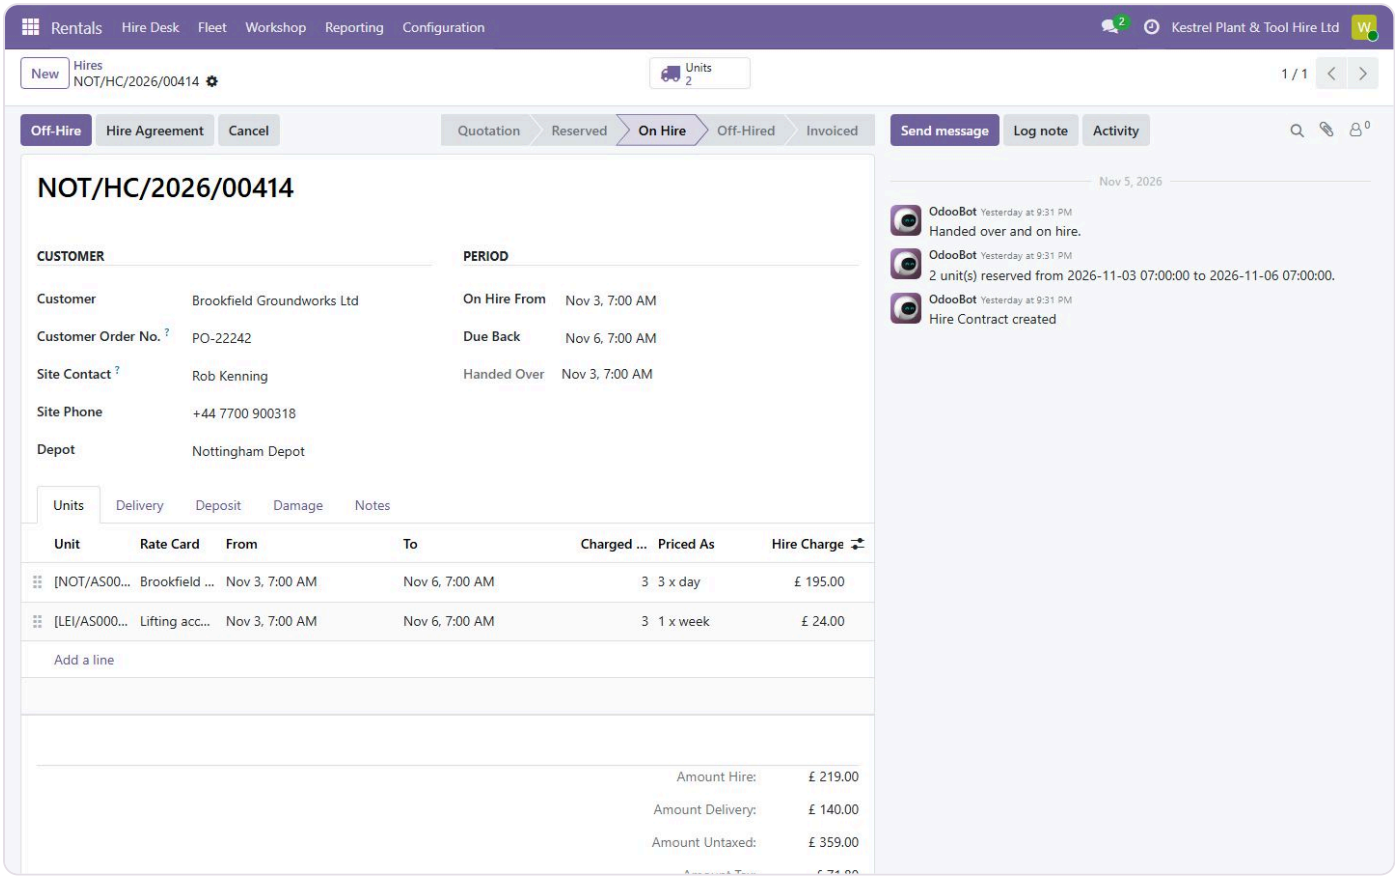

The top of the form: **Customer**, **Depot**, **On Hire From** and **Due Back**, the **Customer Order No.** (main contractors will not pay without it, so it goes on the invoice as the reference), the **site contact**, **site phone** and **site address** (filled from the customer, and changeable because the machine is going to a site, not an office). The number is given on save: the depot code, HC, the year and a number.

A hire can only be created as a quotation. Changing the dates on the hire moves every line to the same dates.

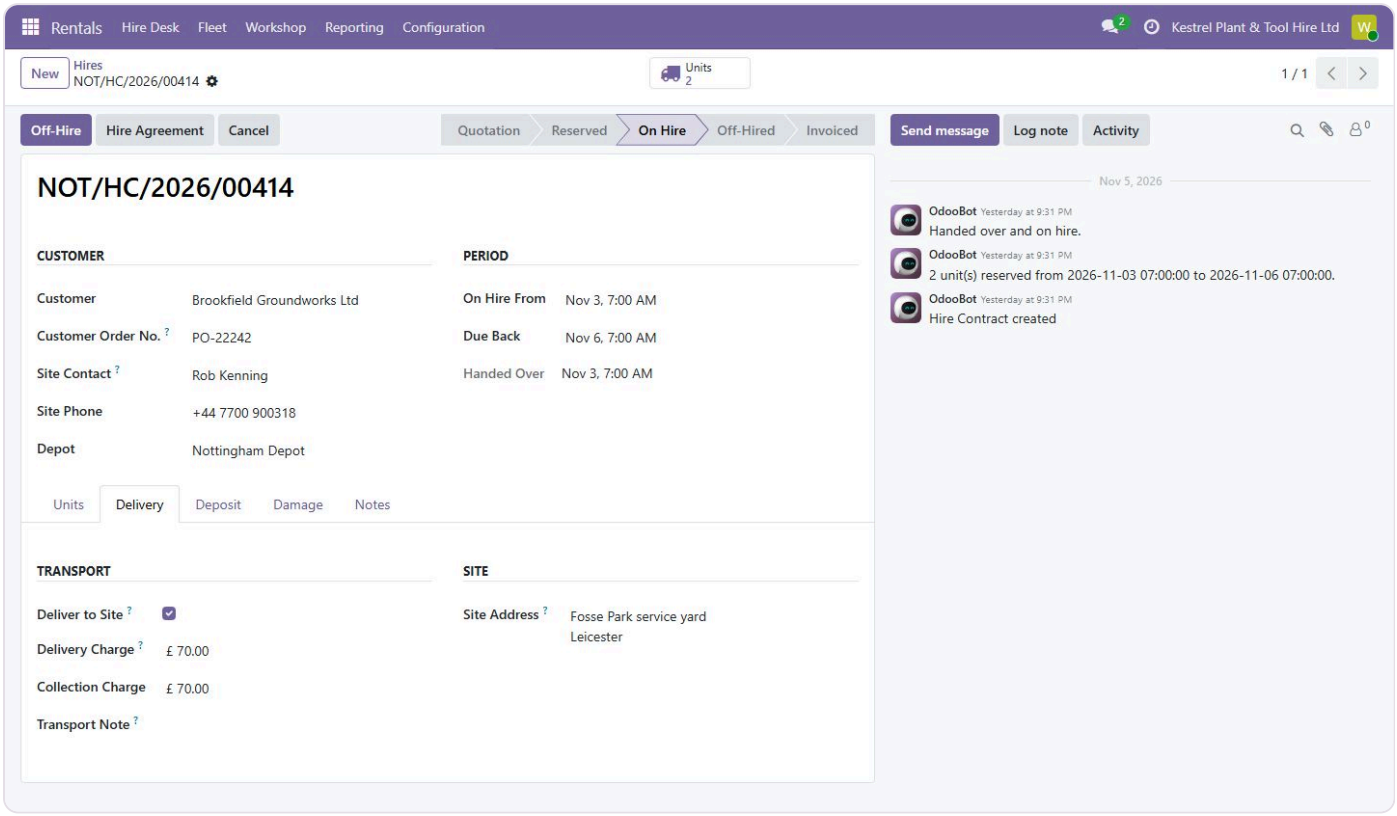

4 The units on the hire

The **Units** tab has one line per machine: the unit, its rate card (picked as Part 4 describes and changeable), from and to, charged days, **Priced As**, the hire charge, taxes, meter out and in, the condition out and in, and the line status. The hire charge can be typed over for an agreed price. Taxes are taken from the hire product when the unit is added and stay as written, so the total quoted is the total invoiced.

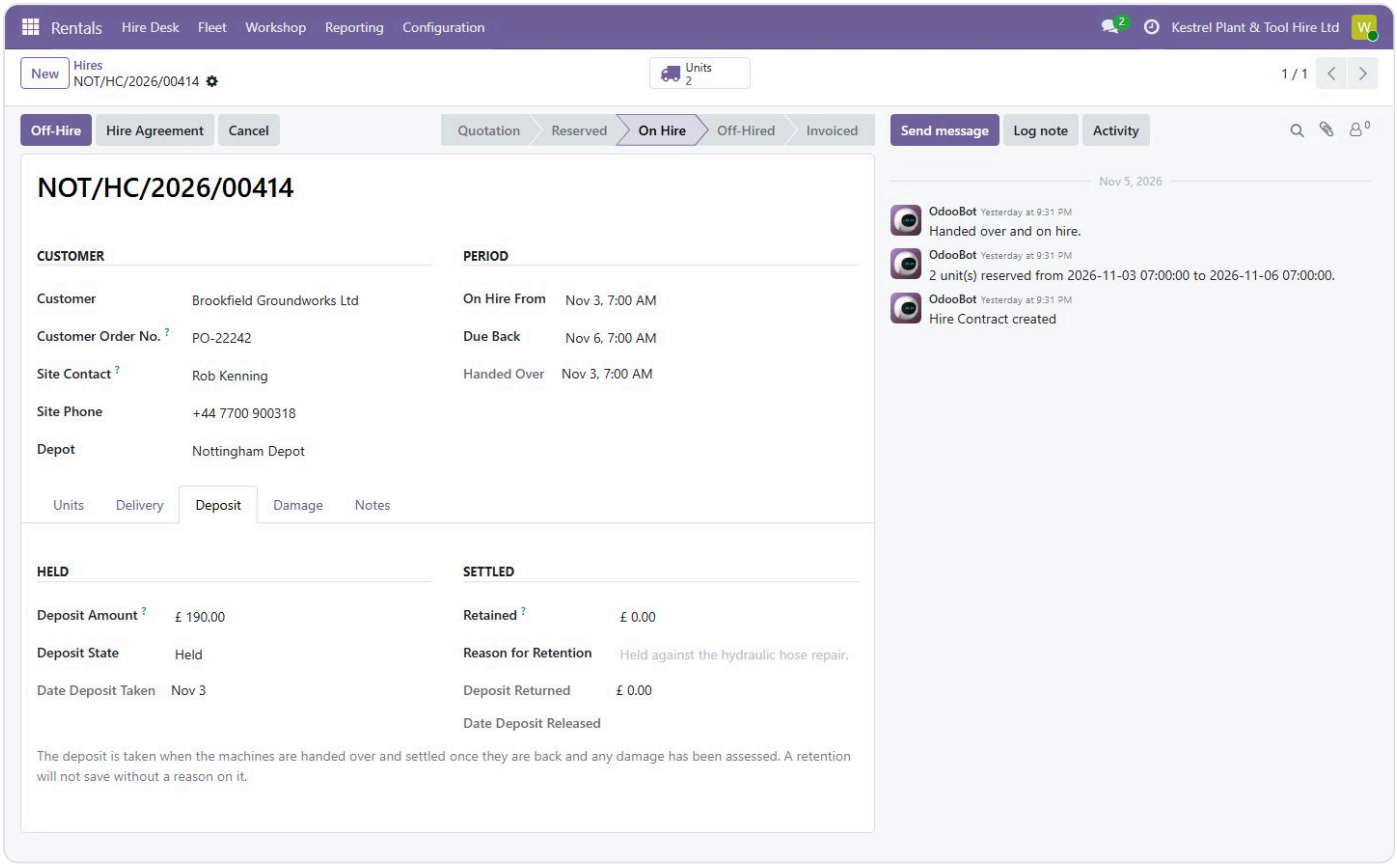

5 Delivery and collection

The **Delivery** tab: tick **Deliver to Site** or clear it when the customer collects. Delivery and collection are taken from the first line's rate card, or the depot's standard charges when the card has none, and can be typed over for a long haul. The **Transport Note** is for the driver: access, gate codes, the width of the lane.

6 The deposit

The **Deposit** tab shows the amount, worked out as the sum of the deposits on the rate cards (or the categories) of the units on the hire, or the company percentage of the hire charge when none sets one. It can be changed. Its status starts as **Not Taken**.

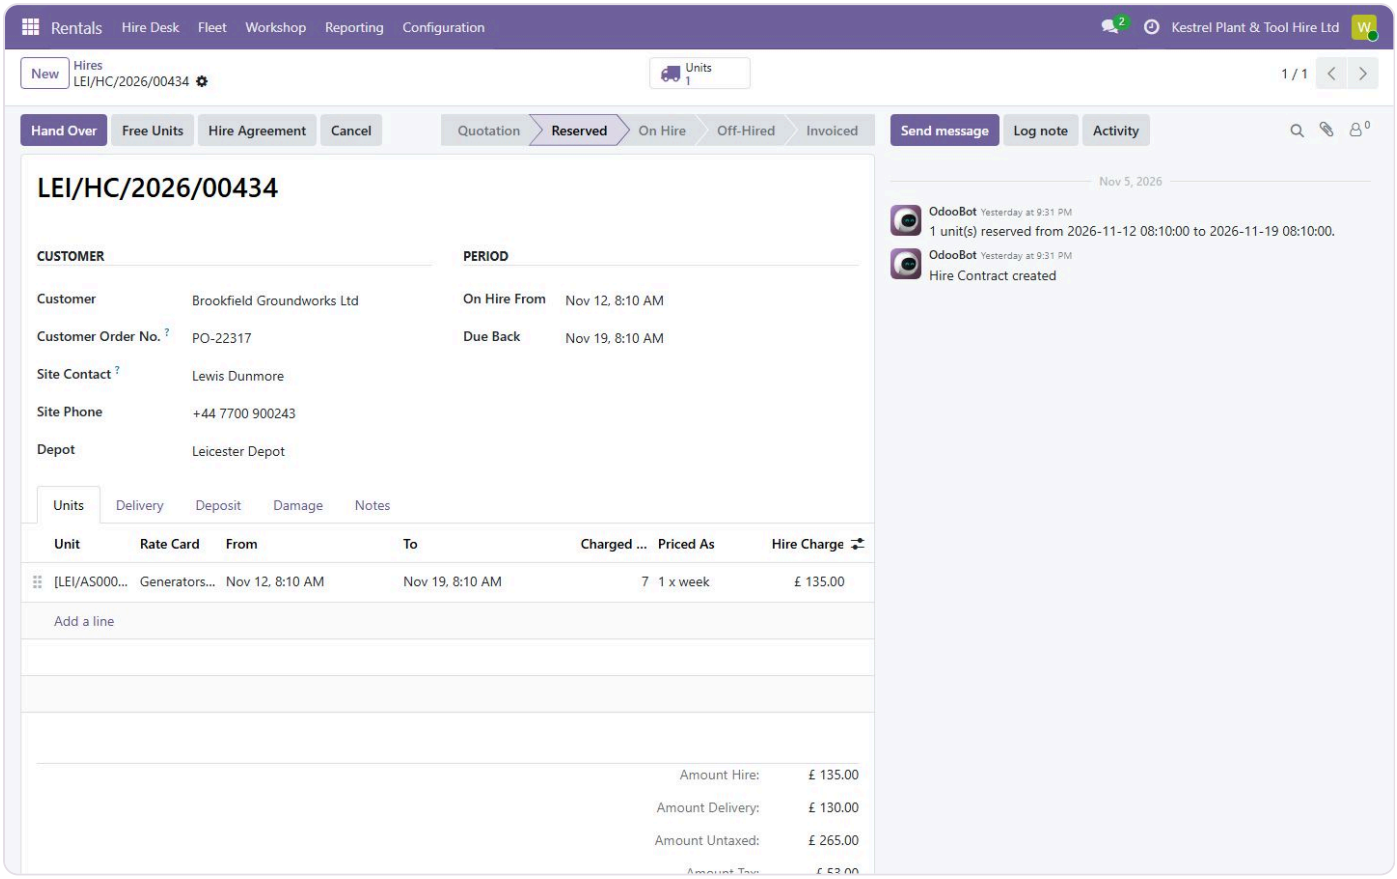

Reserve

Reserve checks every line: the unit must not be retired or quarantined, not held by another reserved or live hire over the period, and not booked into the workshop. Then every line and every unit goes to Reserved, the chatter records the period, and the customer gets the **Hire Confirmed** email if they have an address.

7 A reserved hire

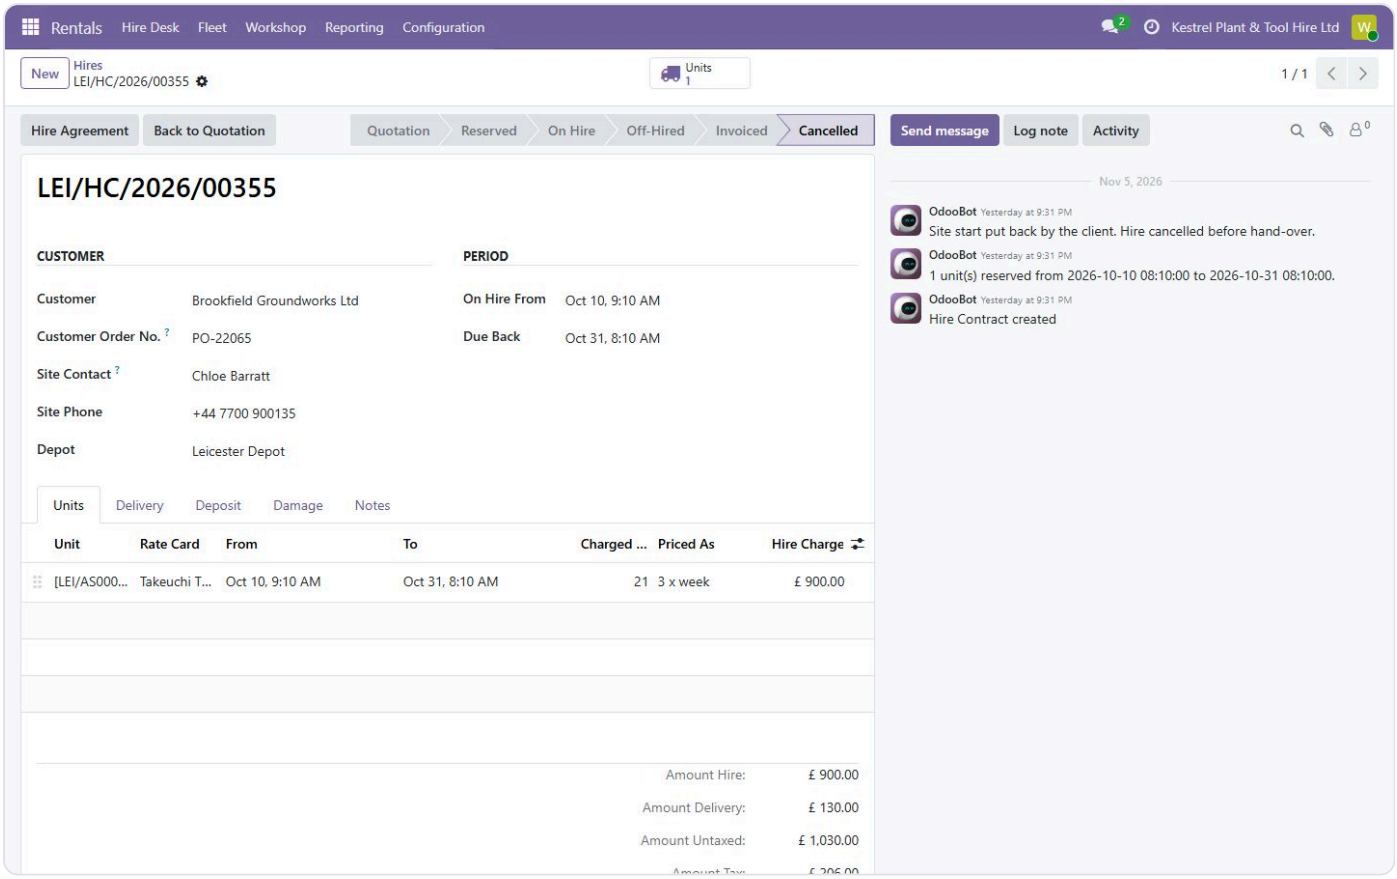

Reserved hires have the **Hand Over** button and the **Hire Agreement** print. **Free Units** is still there for adding another machine.

BUTTON	FROM	DOES
Reserve	Quotation	Checks availability, holds the units, emails the customer
Cancel	anything but On Hire and Invoiced	Frees reserved units, cancels a draft invoice and puts its damage charges back to Assessed
Back to Quotation	Cancelled	Reopens the hire and its lines as a quotation
Free Units	Quotation, Reserved	The units free at this depot for the period

8 A cancelled hire

Cancel is refused while the machines are on site (off-hire them first) and once the hire is on a posted invoice (credit the invoice instead).

PART 8 Handing the machine over

Hand-over is the moment the hire starts and the moment the yard writes down what state the machine left in. The module will not let a machine go without it.

IN THIS PART YOU WILL LEARN

- What has to be filled in before Hand Over works
- The certificate block
- What changes on the unit and the deposit
- The hire agreement

TRY IT YOURSELF ON THE DEMO

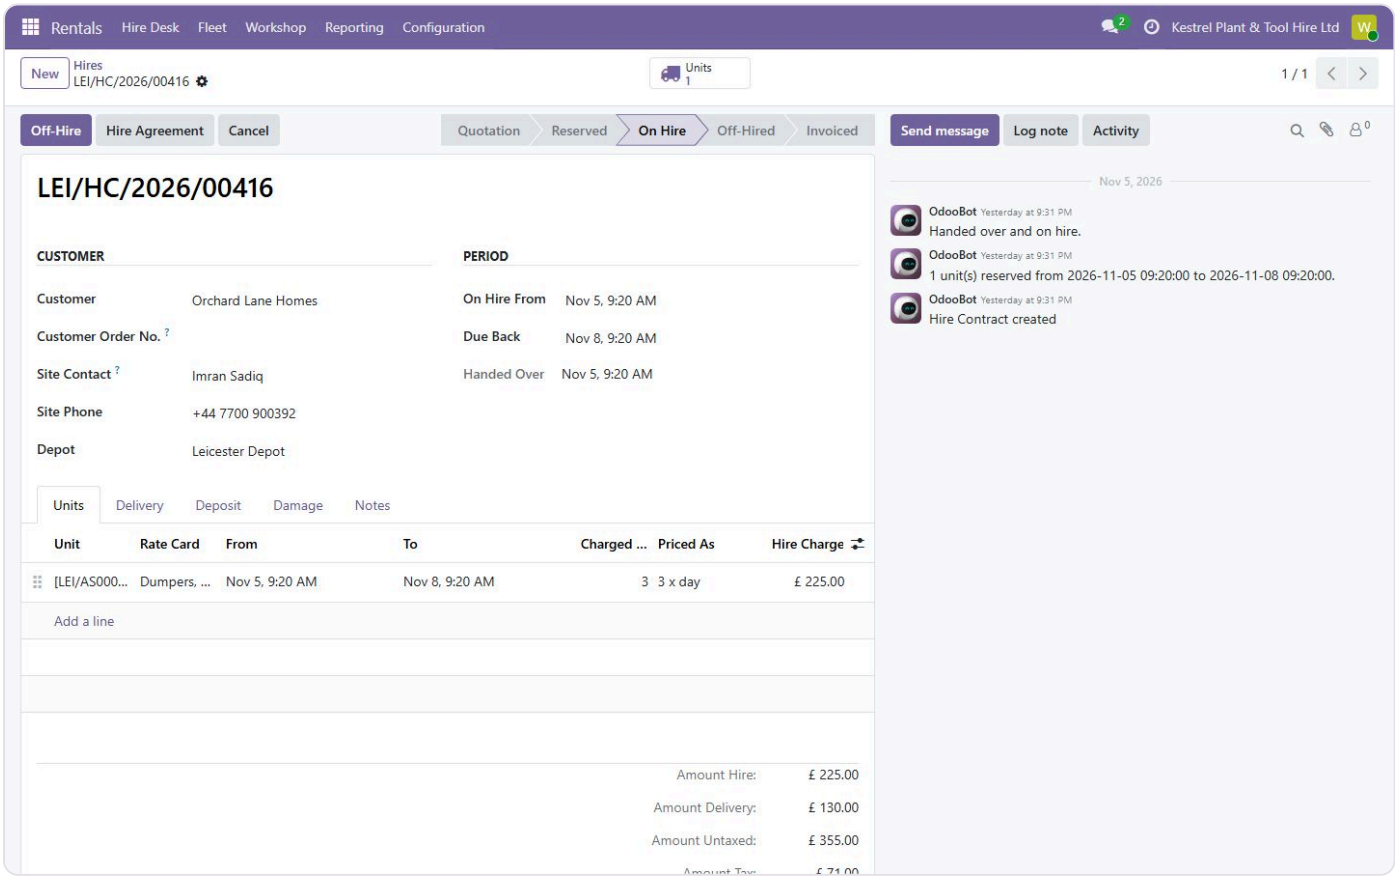

1. Open Hire Desk, Hires, filter On Hire, and open one
2. Look at Condition Out, the hand-over note and Meter Out on each line
3. Look at the Deposit tab: Held, and the date it was taken
4. Press Hire Agreement to see the print

Before **Hand Over**, each line needs a **Condition Out** and, on a machine with a meter, a **Meter Out** reading (filled from the unit when it is added, so usually just checked). The **Hand-over Note** is for every mark, missing key and worn tooth: it is the document a damage charge stands on.

> With **Block Hire on an Expired Certificate** switched on, a unit that needs an examination and has none current, or never had one, cannot be handed over. The message names the unit.

1 A hire on hire

Hand Over moves the hire and every line to **On Hire** and stamps **Handed Over**. Each unit goes to On Hire with its meter set from Meter Out. If there is a deposit and it has not been taken, it moves to **Held** with today's date.

2 The hire agreement

Hire Agreement prints the A4 agreement: the hirer, order number, site contact, phone and address, the depot, the period, each unit with asset number, serial, Priced As, meter and condition out, the hand-over note and its charge, then hire, transport, VAT, total and the deposit, the transport note, the depot's conditions of hire and two signature boxes, one for the hirer and one for the depot.

Delivery and collection	£ 130.00
Tax	£ 71.00
Total	**£ 426.00**
Deposit held	£ 150.00

Conditions of hire

The hirer is responsible for the equipment from the moment it leaves the depot until it is back in the yard, including loss, theft and damage beyond fair wear and tear. Fuel, lubricants and consumables are the hirer's. Equipment may only be operated by a trained and competent person, and any defect must be reported to the depot before the equipment is used again. Hire is charged until the equipment is off-hired by phone or email and a collection number has been given.

Signed for the hirer

Signed for the depot

PART 9 Due back, late and overdue

Every day a machine stands on a finished site is a day it is not earning anywhere else. The desk needs the list of what is coming back, and what should have.

IN THIS PART YOU WILL LEARN

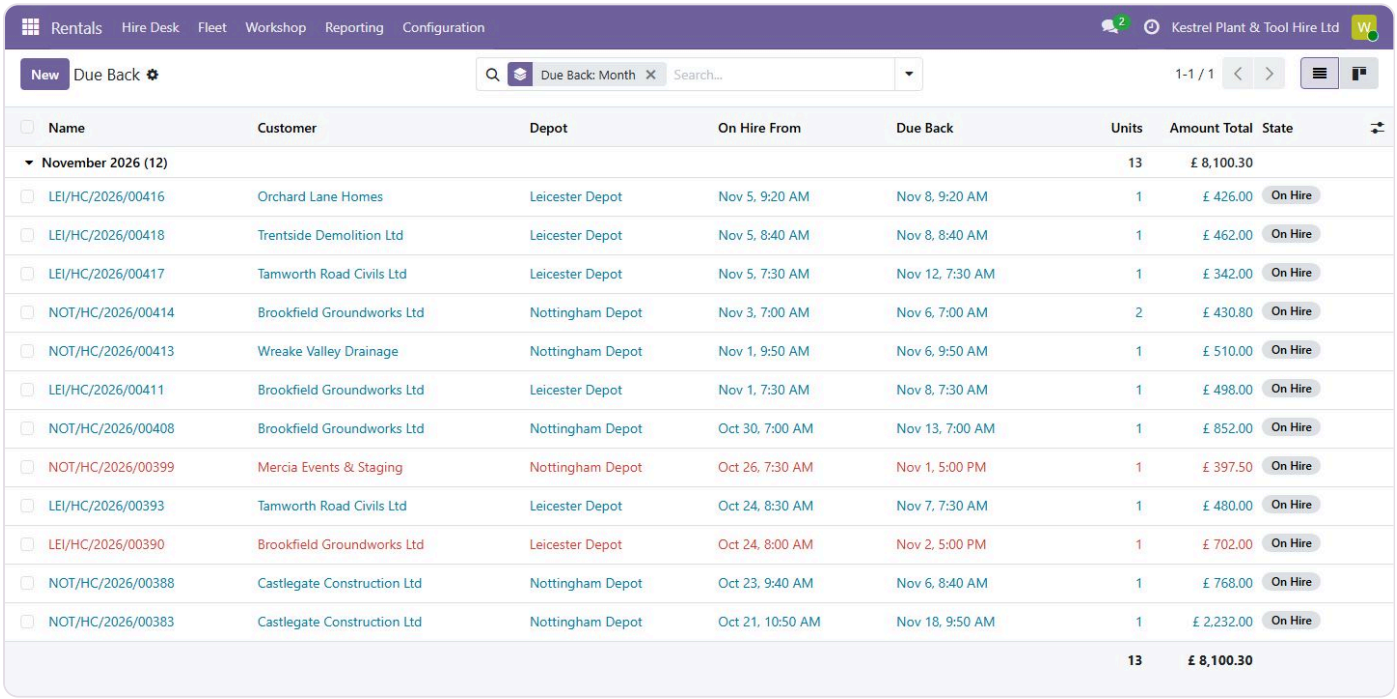

- The Due Back screen
- How lateness is counted, and the grace period
- How the late return penalty is worked out
- The overdue chase job

TRY IT YOURSELF ON THE DEMO

1. Open Hire Desk, Due Back
2. Open a hire with the red Overdue ribbon
3. Look at Days Late and the reminder in the chatter

1 Due Back

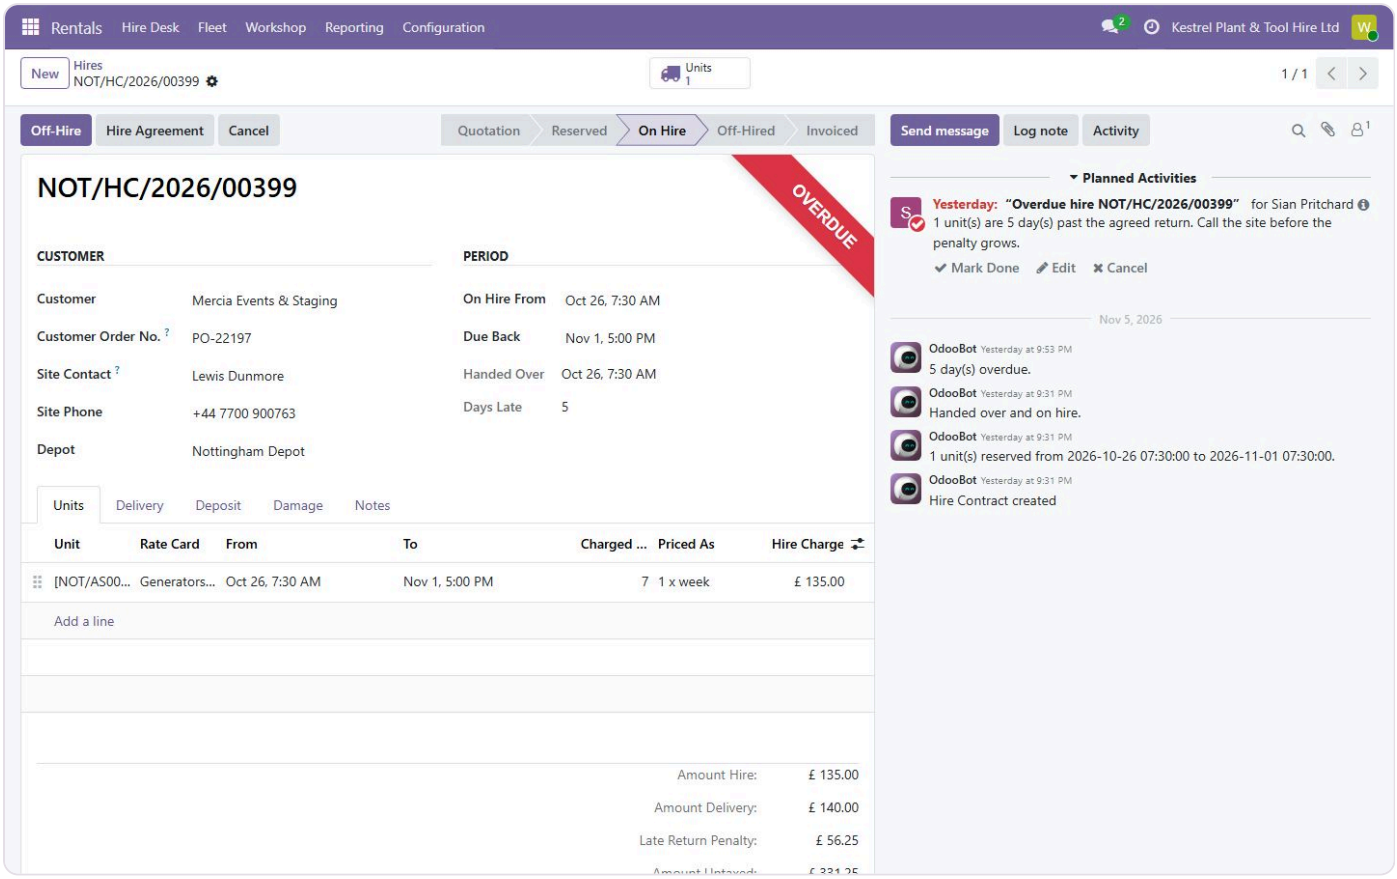

Hire Desk, Due Back lists every hire on hire, grouped by the day it is due back, earliest first. Overdue rows are red.

Name	Customer	Depot	On Hire From	Due Back	Units	Amount Total	State
November 2026 (12)					13	£ 8,100.30	
LEI/HC/2026/00416	Orchard Lane Homes	Leicester Depot	Nov 5, 9:20 AM	Nov 8, 9:20 AM	1	£ 426.00	On Hire

LEI/HC/2026/00393	Tamworth Road Civils Ltd	Leicester Depot	Oct 24, 8:30 AM	Nov 7, 7:30 AM	1	£ 480.00	On Hire
LEI/HC/2026/00390	Brookfield Groundworks Ltd	Leicester Depot	Oct 24, 8:00 AM	Nov 2, 5:00 PM	1	£ 702.00	On Hire
NOT/HC/2026/00388	Castlegate Construction Ltd	Nottingham Depot	Oct 23, 9:40 AM	Nov 6, 8:40 AM	1	£ 768.00	On Hire
NOT/HC/2026/00383	Castlegate Construction Ltd	Nottingham Depot	Oct 21, 10:50 AM	Nov 18, 9:50 AM	1	£ 2,232.00	On Hire
					13	£ 8,100.30	

2 An overdue hire

The form carries a red **Overdue** ribbon. **Days Late** is the hours past **Due Back**, less the grace hours from the settings, rounded up to whole days.

EXAMPLE	FIGURE
Due back	Monday 17:00
Grace	4 hours (the default)
Returned	Wednesday 09:00, 40 hours late, 36 after grace
Days late	2 (36 hours rounded up to days)
Penalty at 25% on a £110 a day excavator	2 x £110 × 25% = £55

The **late return penalty** is days late, times the daily rate on the card of every unit on the hire, times the penalty percentage. It is added to the hire as its own amount and its own invoice line.

The overdue chase

The scheduled job **Rental: chase overdue hires** (off when installed) runs daily. For every hire past due it brings Days Late up to date, schedules a reminder for the depot manager, posts "n day(s) overdue" in the chatter and sends the customer the **Hire Overdue** email. On the demo it has been run once, so the overdue hires carry their reminder.

> Days late on a hire still out is a stored figure. It moves when the hire is edited or when the chase job runs, so switch the job on if the desk relies on the Overdue filter.

PART 10 Off-hire: meters, overuse and condition

Off-hire is where the money is decided: the meter says how hard the machine worked, the clock says how long it was out, and the condition says whether there is a damage report to raise.

IN THIS PART YOU WILL LEARN

- What Off-Hire needs and what it does to each unit
- How the allowance and overuse are worked out
- Where each unit goes next: yard, workshop or quarantine
- The off-hire note

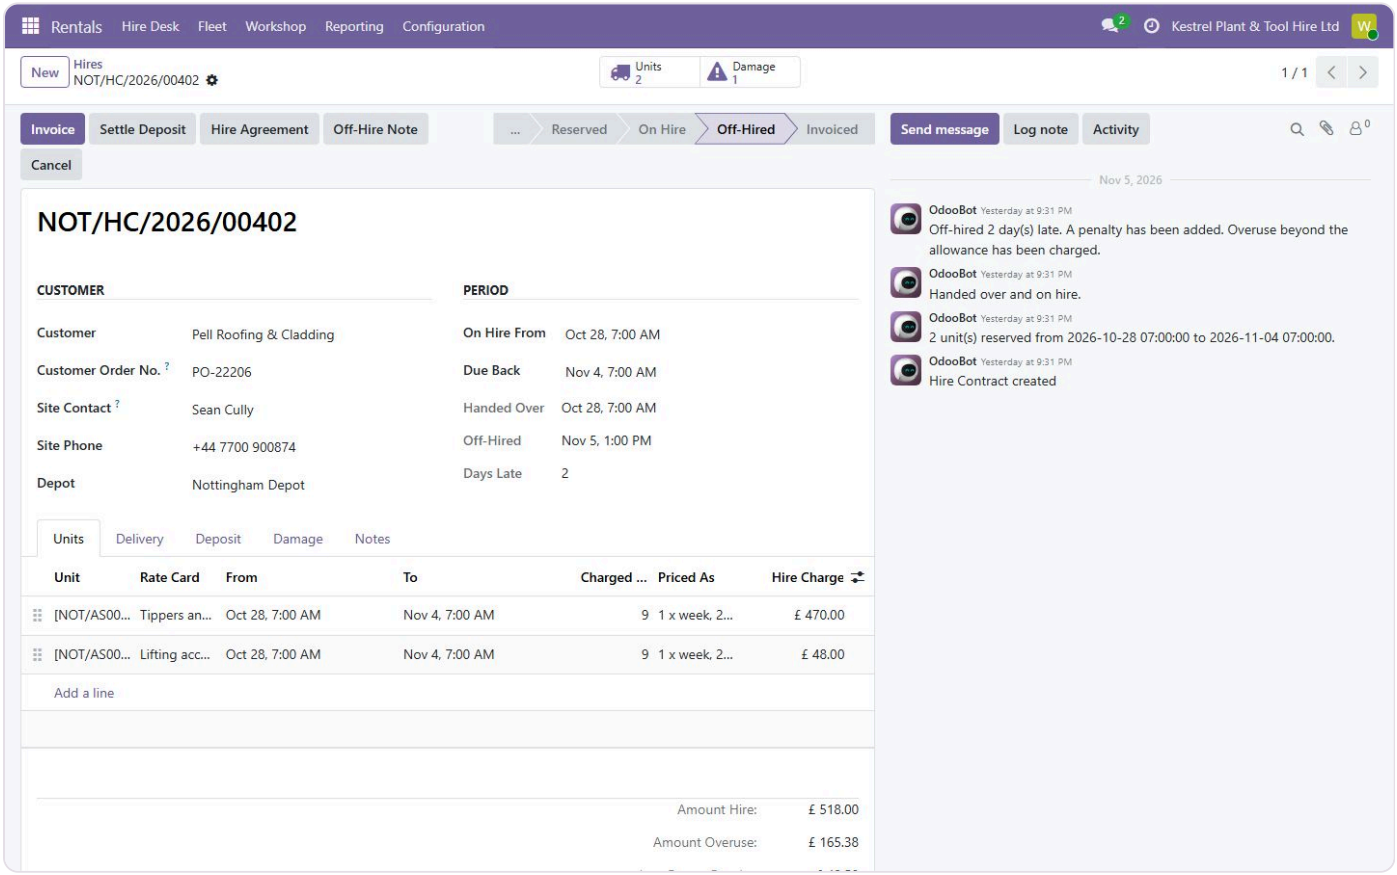

TRY IT YOURSELF ON THE DEMO

1. Open Hire Desk, Hires, filter Off-Hired
2. Open the Units tab: Meter In, Included, Over the Allowance
3. Open Fleet, Hire Lines and use the filter Over the Allowance
4. Press Off-Hire Note on an off-hired hire

Before **Off-Hire**, every line still out needs a **Meter In** on a metered machine and a **Condition In**, with a **Return Note** if there is something to say. A meter cannot run backwards: a reading in below the reading out is refused.

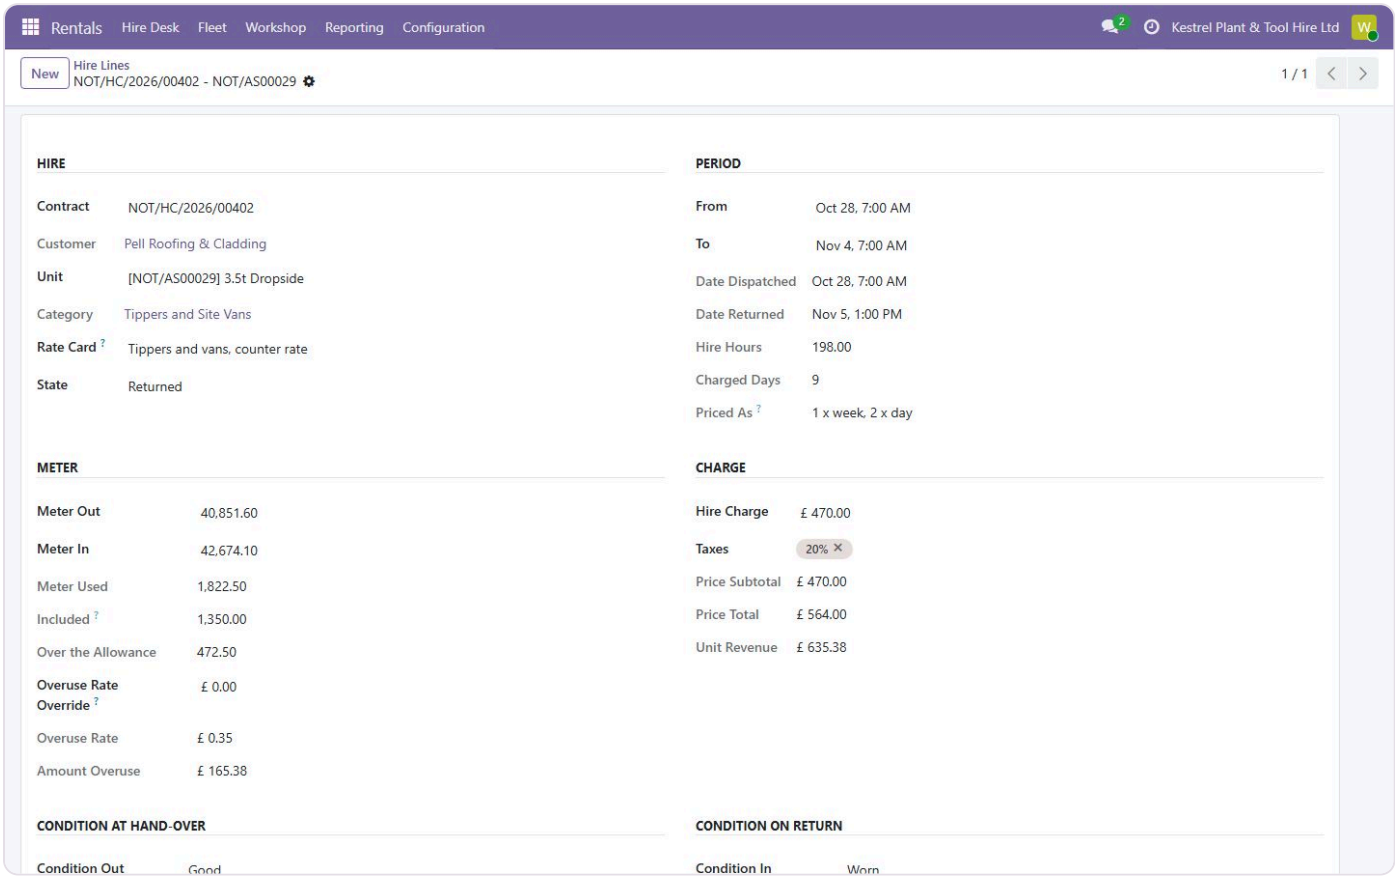

1 An off-hired hire

Off-Hire stamps **Off-Hired** on the hire and each line, and the hire length is now counted to the actual return. Each unit takes the meter in and the condition, goes back to the depot's yard location, and moves to **Available**, to **In the Workshop** if it came back damaged, or to **Quarantined** if its certificate lapsed while it was out. The chatter says if the hire was late and if overuse was charged.

2 One hire line

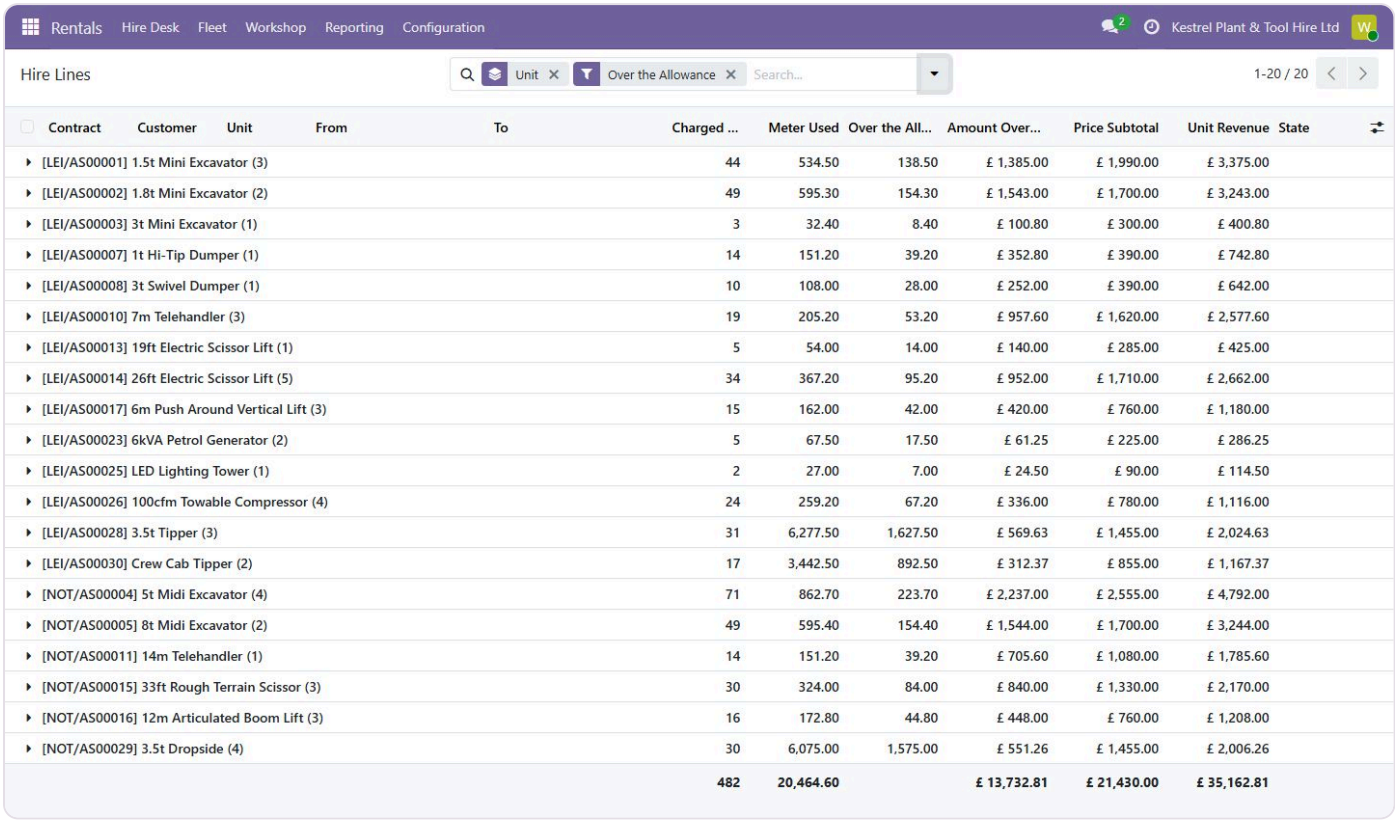

Fleet, Hire Lines opens every line, grouped by unit. A line shows the period and hours, charged days and Priced As, the meters, **Used**, **Included** (allowance per day x charged days), **Over the Allowance**, the overuse rate applied and the overuse amount, and the unit revenue. An **Overuse Rate Override** on the line replaces the card's rate for a hire agreed differently.

OVERUSE EXAMPLE (EXCAVATOR, 8 HOURS A DAY, £12 AN HOUR)	FIGURE
Charged days	5
Included	5 × 8 = 40 hours
Meter out, meter in	2,210.0 and 2,264.0: 54 hours used
Over the allowance	14 hours
Overuse charge	14 x £12 = £168

3 Lines over the allowance

The filter **Over the Allowance** on Hire Lines is the list of hires where a site ran the machine harder than it paid for.

Contract	Customer	Unit	From	To	Charged ...	Meter Used	Over the All...	Amount Over...	Price Subtotal	Unit Revenue	State

PART 11 Damage: report, assess, charge or waive

Damage is reported when it is found and assessed when it is priced. A charge stands only against what the hand-over sheet did not already say, and never for more than the repair.

IN THIS PART YOU WILL LEARN

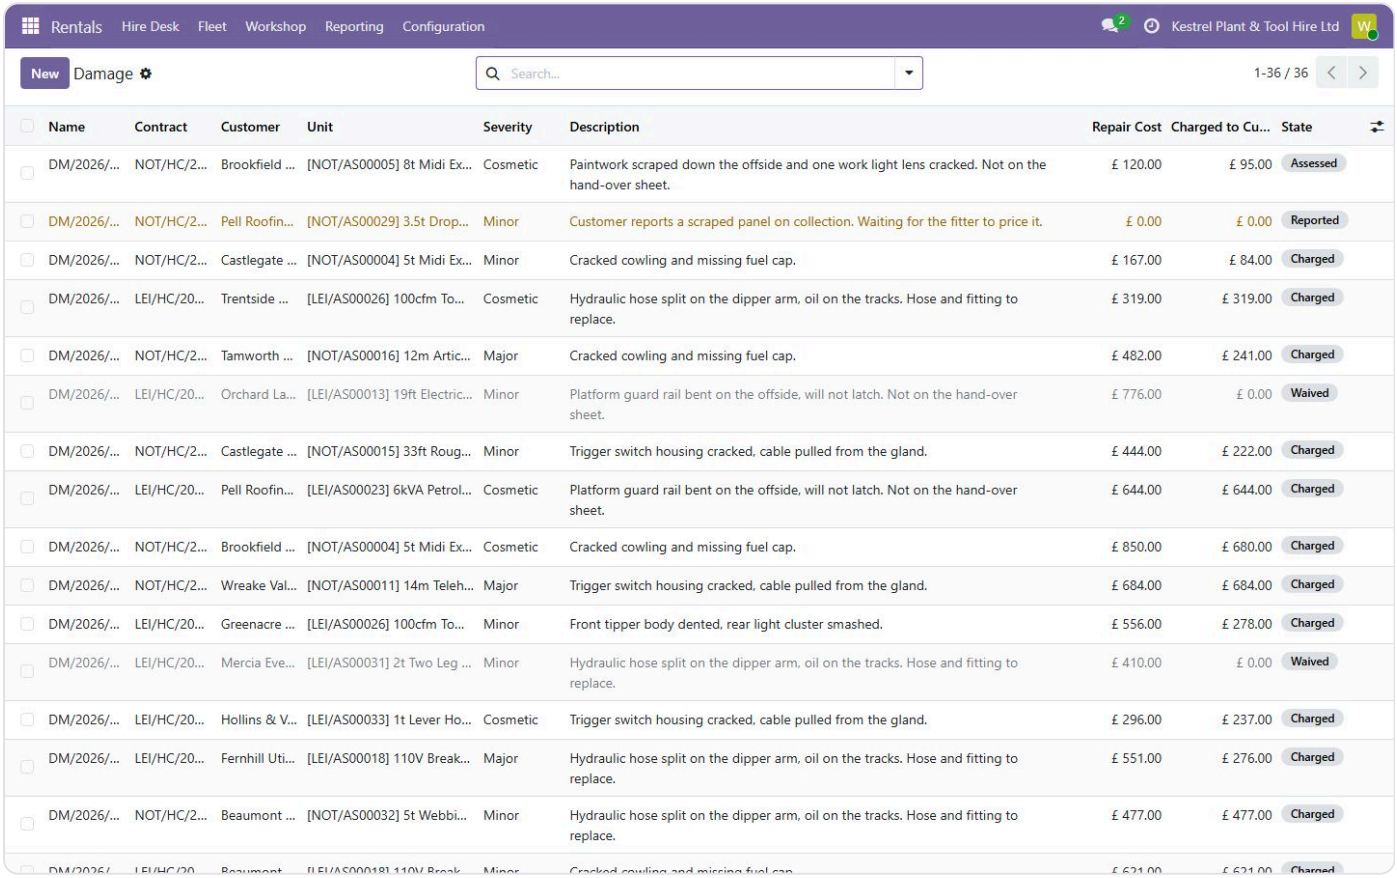

- The Damage list and its filters
- Reporting damage from a hire
- Assess and Waive, and the checks on each
- Raising a workshop job from a damage report

TRY IT YOURSELF ON THE DEMO

1. Open Hire Desk, Damage
2. Open an Assessed report and compare Condition at Hand-over
3. Open a Waived report and read the reason
4. Open a Charged report: it is on an invoice

1 The Damage list

Hire Desk, Damage lists every report with its number, hire, unit, customer, severity, repair cost, the amount charged and the status. Filters: **Not Assessed**, **Chargeable**, **Major or Write Off**.

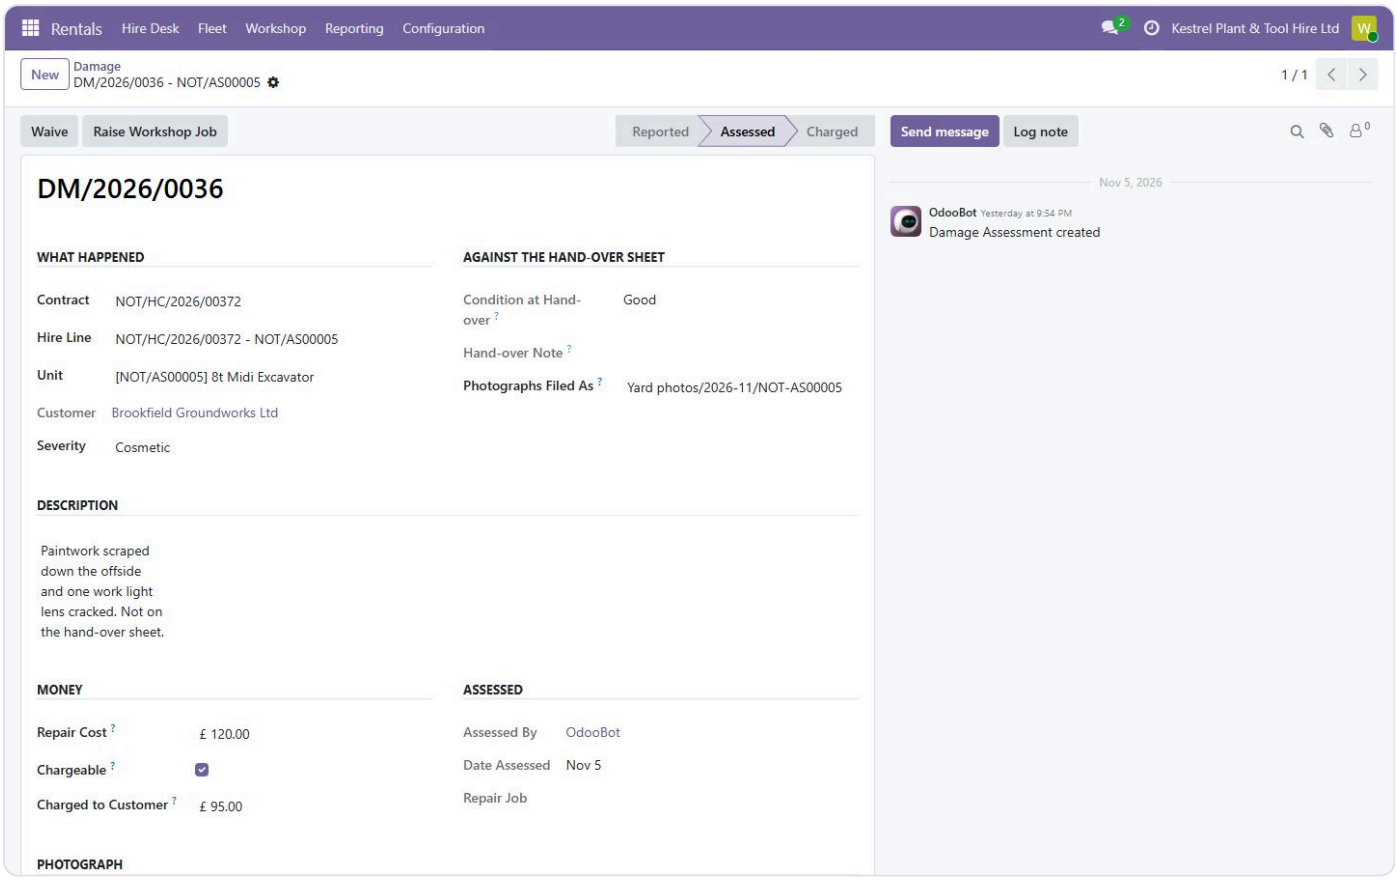

Name	Contract	Customer	Unit	Severity	Description	Repair Cost	Charged to Cu...	State
DM/2026/...	NOT/HC/2...	Brookfield ...	[NOT/AS00005] 8t Midi Ex...	Cosmetic	Paintwork scraped down the offside and one work light lens cracked. Not on the hand-over sheet.	£ 120.00	£ 95.00	Assessed

2 A damage report

Add a report from the hire's **Damage** tab or the Damage menu: the hire line (the unit fills in), **severity** (cosmetic, minor, major, write off), the description, a photo and where the full set of photographs is filed. Beside it, **Condition at Hand-over** and the hand-over note are read from the hire line. Then the **repair cost**, **Chargeable** and **Charged to Customer**.

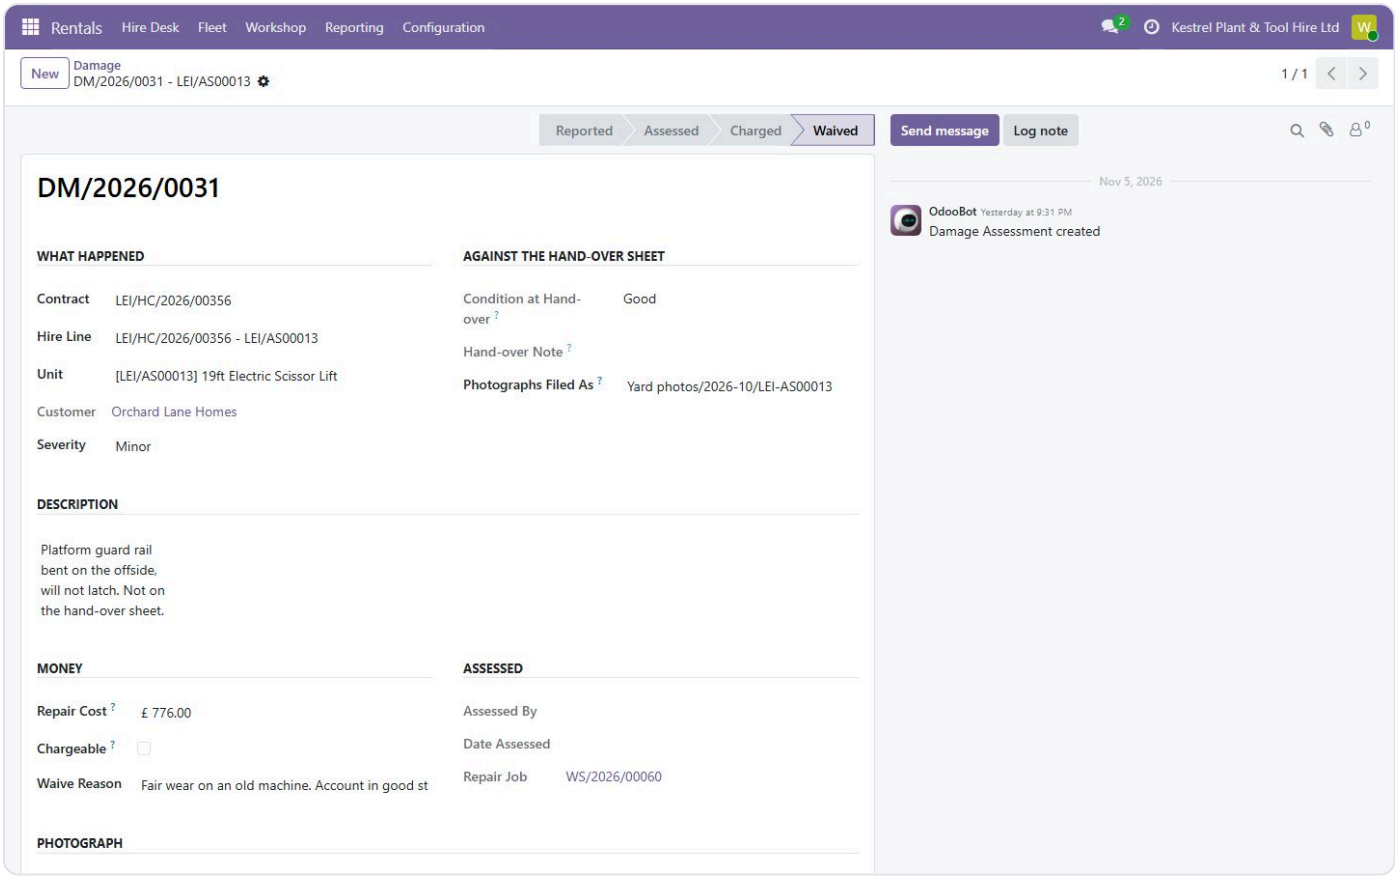

Clear Chargeable for fair wear and tear: the yard carries that, not the customer.

BUTTON	NEEDS	RESULT
Assess	condition in recorded, a repair cost, a charge if chargeable	Assessed: the charge is on the hire total
Waive	a waive reason; refused once charged	Waived: charge set to zero
Raise Workshop Job	assessed or waived, no job yet	A damage repair job for two days from now
(Invoice on the hire)	the hire invoiced	Charged: the report is on the invoice

3 A waived report

The charge can never be more than the repair cost, a report is created only as Reported, and its status cannot be typed over: once Charged it is on an invoice and has to be credited, not waived.

> While any damage report on a hire is still **Reported**, the hire cannot be invoiced and its deposit cannot be settled, so the charge is never missed.

PART 12 Invoicing the hire and settling the deposit

A hire is billed on off-hire, once the meters and the damage are known, as one ordinary Odoo customer invoice. Then the deposit goes back, in full or in part.

IN THIS PART YOU WILL LEARN

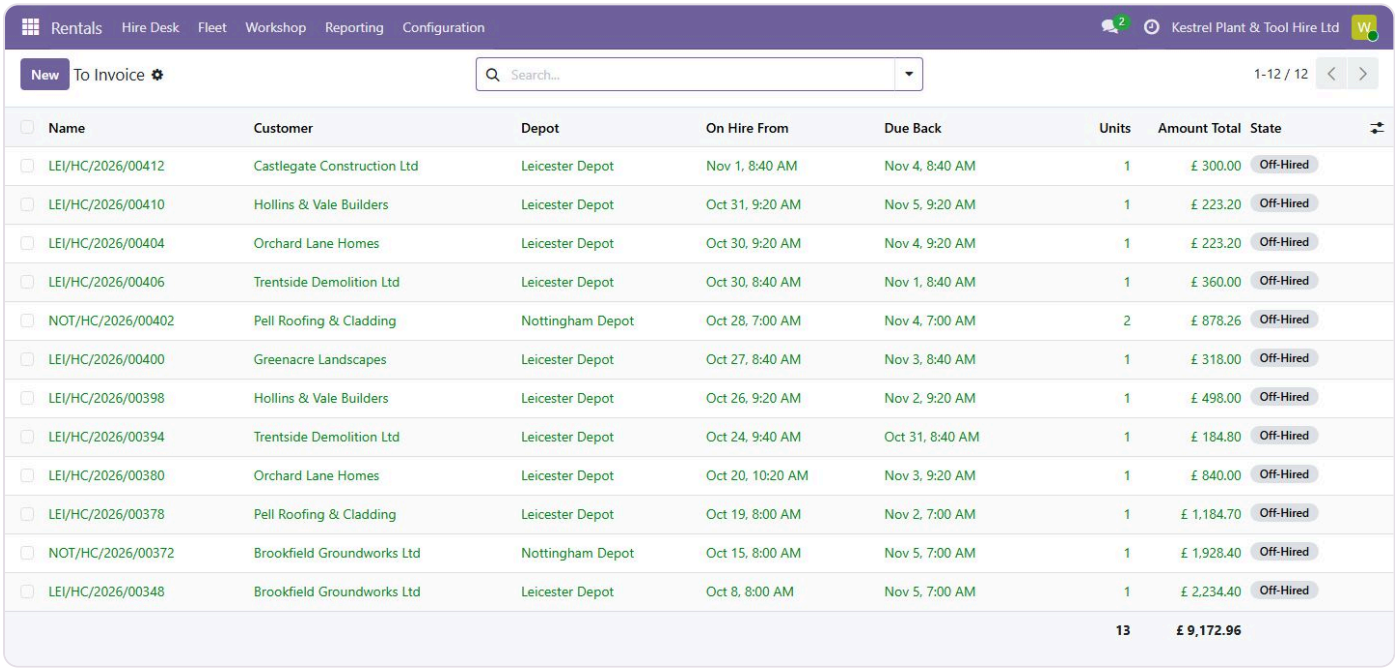

- The To Invoice list
- What goes on the invoice, line by line
- Settling the deposit in full or with a retention
- The figures on the hire

TRY IT YOURSELF ON THE DEMO

1. Open Hire Desk, To Invoice
2. Open an invoiced hire and press the Invoice button at the top
3. Look at the Deposit tab of a Partly Retained hire

1 To Invoice

Hire Desk, To Invoice lists the hires that are off-hired and not yet billed. **Invoice** is refused before off-hire and while a damage report is unassessed.

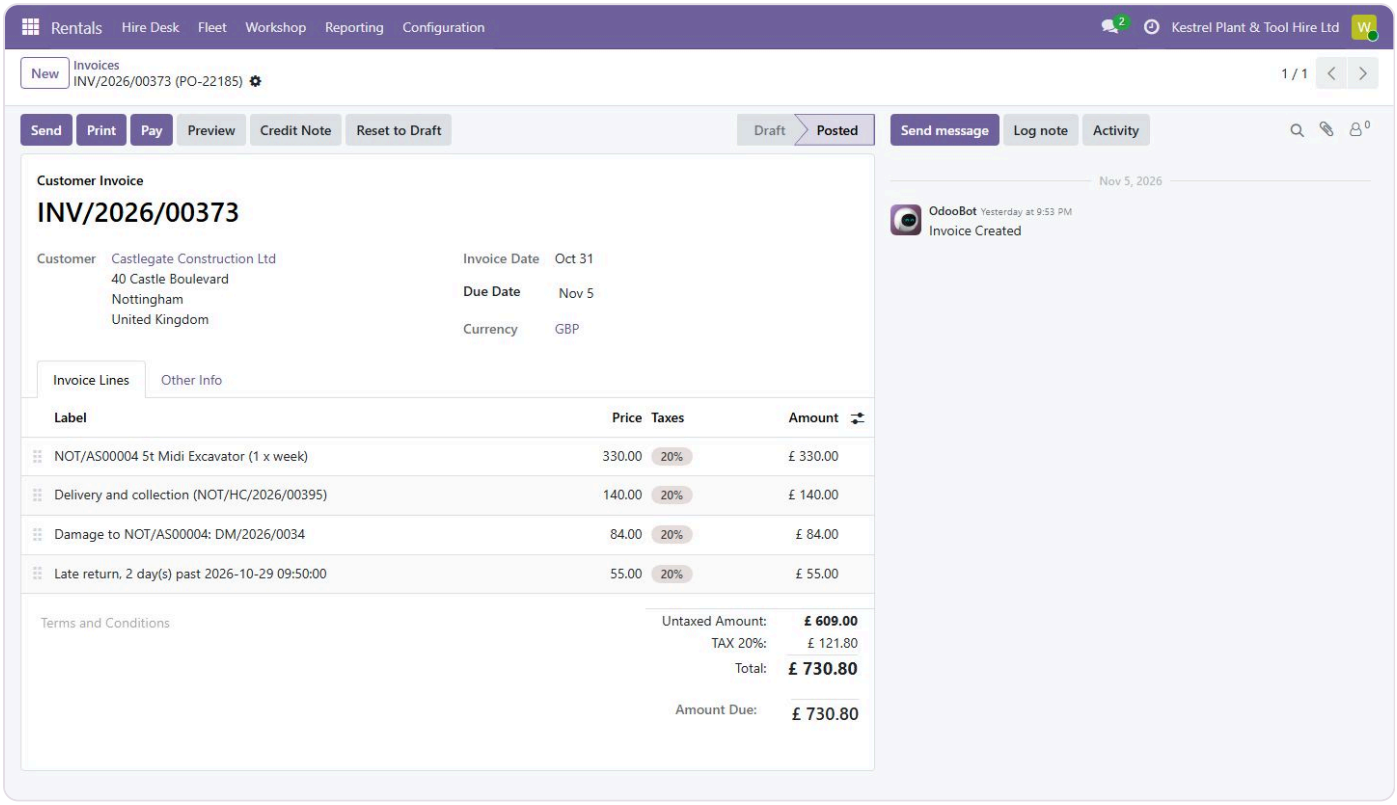

Name	Customer	Depot	On Hire From	Due Back	Units	Amount Total	State
LEI/HC/2026/00412	Castlegate Construction Ltd	Leicester Depot	Nov 1, 8:40 AM	Nov 4, 8:40 AM	1	£ 300.00	Off-Hired

NOT/HC/2026/00372	Brookfield Groundworks Ltd	Nottingham Depot	Oct 15, 8:00 AM	Nov 5, 7:00 AM	1	£ 1,928.40	Off-Hired
LEI/HC/2026/00348	Brookfield Groundworks Ltd	Leicester Depot	Oct 8, 8:00 AM	Nov 5, 7:00 AM	1	£ 2,234.40	Off-Hired
					13	£ 9,172.96	

The totals on a hire

The hire adds up **Hire** (the lines), **Overuse**, **Delivery** (delivery plus collection), **Damage** (assessed and charged reports), **Late Return Penalty**, the untaxed amount, VAT and the total. The extras are taxed through Odoo's tax engine at the first line's taxes. The totals sit under the Units tab of every hire.

2 The invoice

Invoice raises a draft customer invoice in the depot's billing journal, with the customer order number as reference: one line per unit with how it was priced, an overuse line per unit that went over, one line for delivery and collection, one per damage charge and one for the late penalty. The hire moves to **Invoiced** and the damage to Charged. Post it and register the payment as for any Odoo invoice.

3 The printed invoice

The invoice prints with the standard Odoo layout and the company logo.

Invoice INV/2026/00373

Invoice Date	Due Date	Source	Reference
10/31/2026	11/05/2026	NOT/HC/2026/00395	PO-22185

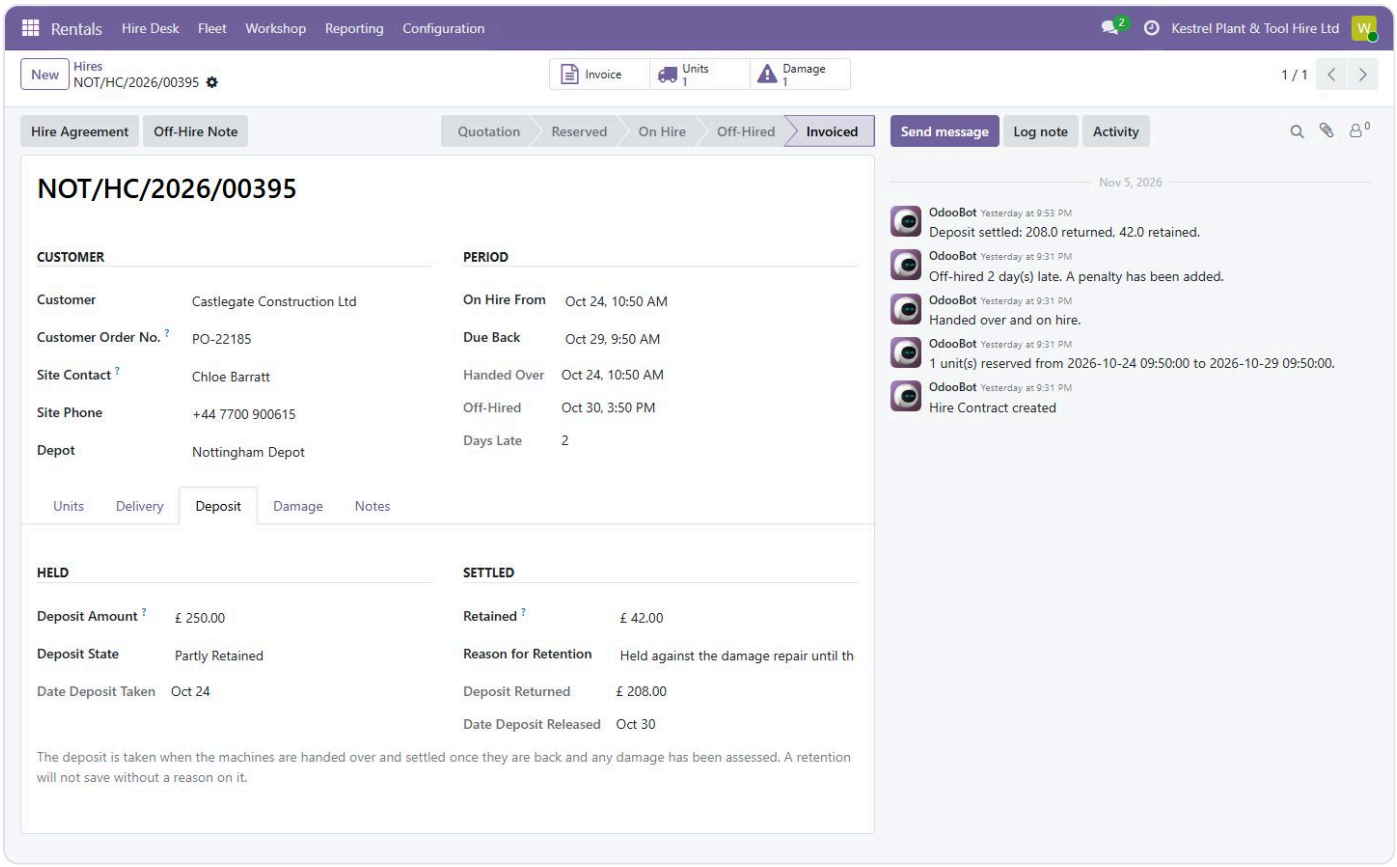

Description	Quantity	Unit Price	Taxes	Amount
NOT/AS00004 5t Midi Excavator (1 x week)	1.00	330.00	20%	£ 330.00
Delivery and collection (NOT/HC/2026/00395)	1.00	140.00	20%	£ 140.00
Damage to NOT/AS00004: DM/2026/0034	1.00	84.00	20%	£ 84.00
Late return, 2 day(s) past 2026-10-29 09:50:00	1.00	55.00	20%	£ 55.00
		Untaxed Amount		£ 609.00
Payment Communication: **INV/2026/00373**		TAX 20%		£ 121.80
		Total		**£ 730.80**

Settling the deposit

Settle Deposit appears once the hire is off-hired or invoiced and a deposit is held. To keep part, fill **Retained** and the **Reason for Retention** on the Deposit tab first: a retention without a reason is refused, and it can never be more than the deposit. The status becomes **Returned in Full** or **Partly Retained**, the date is stamped, and the chatter records what went back and what was kept.

4 A partly retained deposit

The amount returned is worked out as deposit minus retained.

> The deposit is a figure and a status on the hire. It does not post a payment or a refund in accounting; take and return the money as your yard does now.

PART 13 The workshop

Servicing, repairs and preparation happen between hires, and each job takes the machine out of availability for its window.

IN THIS PART YOU WILL LEARN

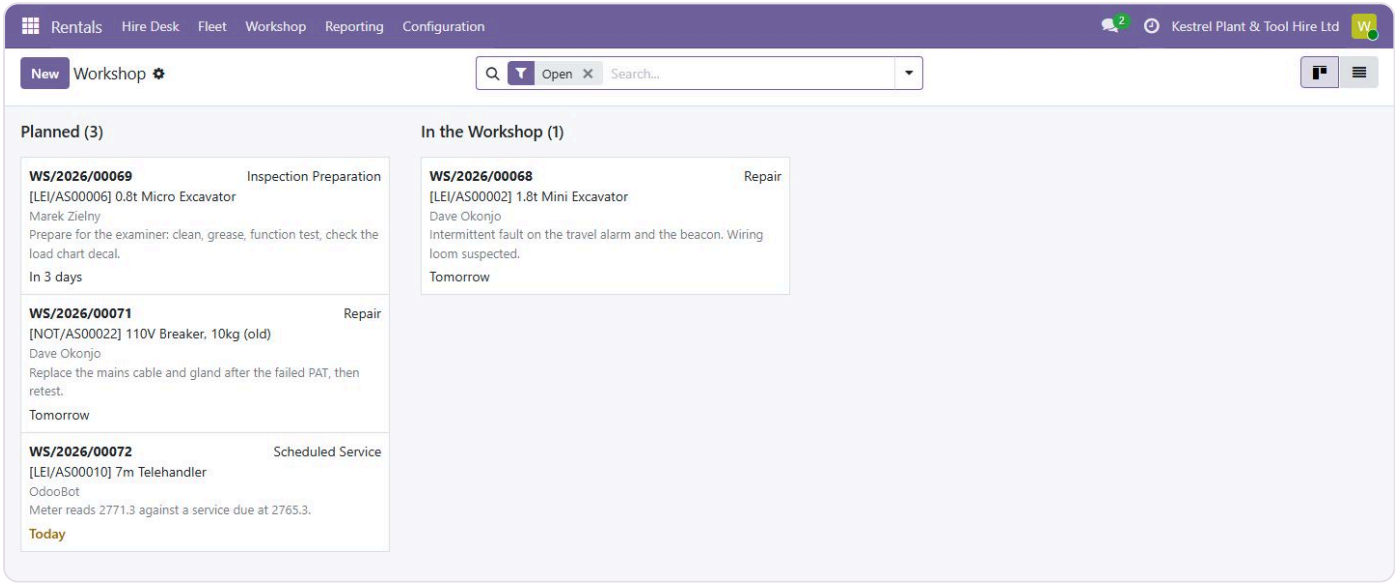

- The jobs board and the five kinds of job
- Take It In, Finished, Cancel, Reopen
- Service due by meter, and the job that raises it
- What a fitter sees

TRY IT YOURSELF ON THE DEMO

1. Open Workshop, Jobs: the board by status
2. Open the job In the Workshop and the unit it holds
3. Open a Finished service and read Work Done and the next service point
4. Use the filters Services and Damage Repairs

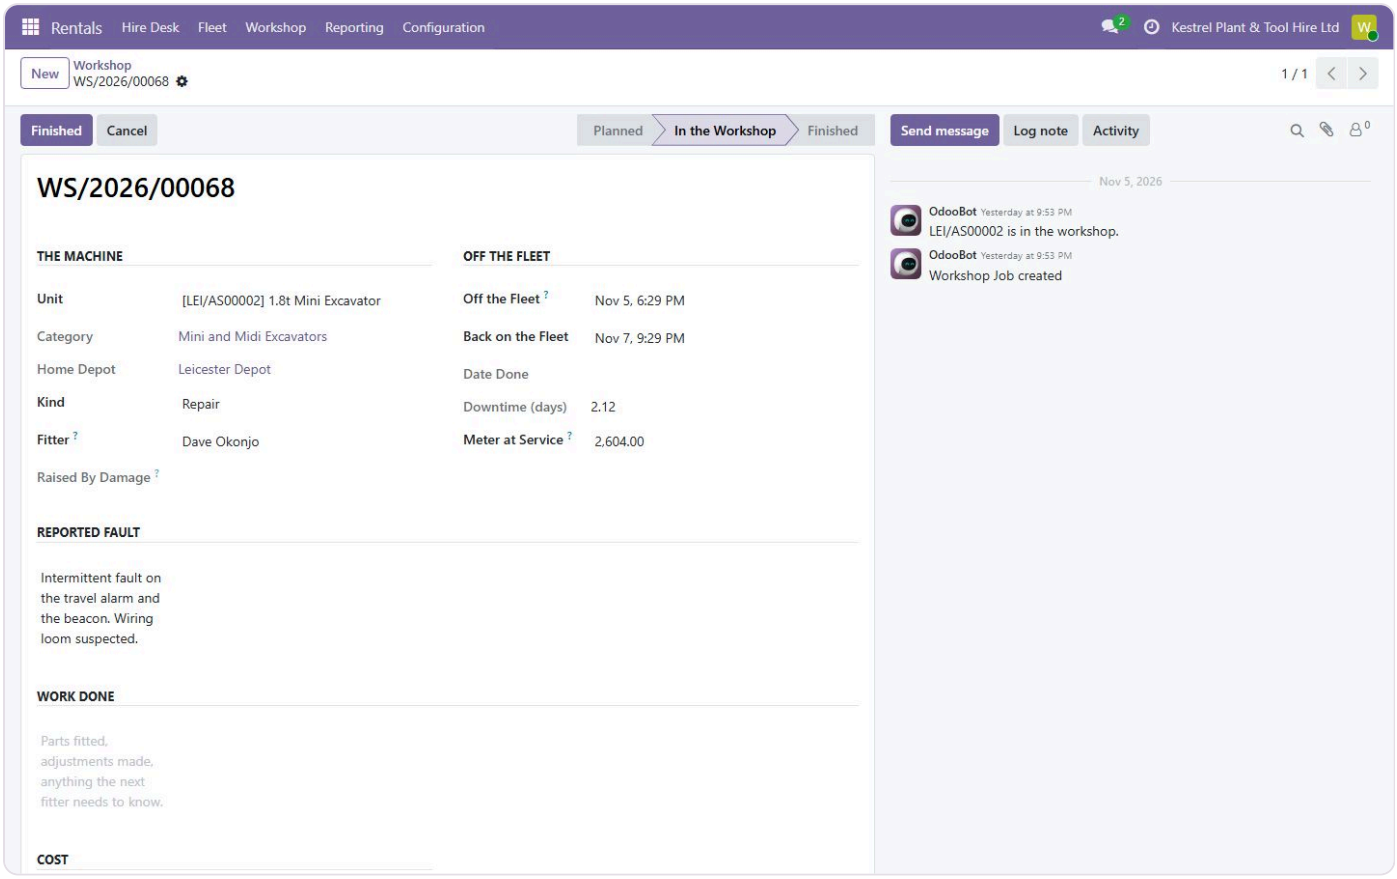

1 The jobs board

Workshop, Jobs opens on **Open** jobs as a board by status: **Planned**, **In the Workshop**, **Finished**, **Cancelled**. Filters: In the Workshop, My Jobs, Services, Damage Repairs; group by unit, type, fitter, status or depot.

2 A workshop job

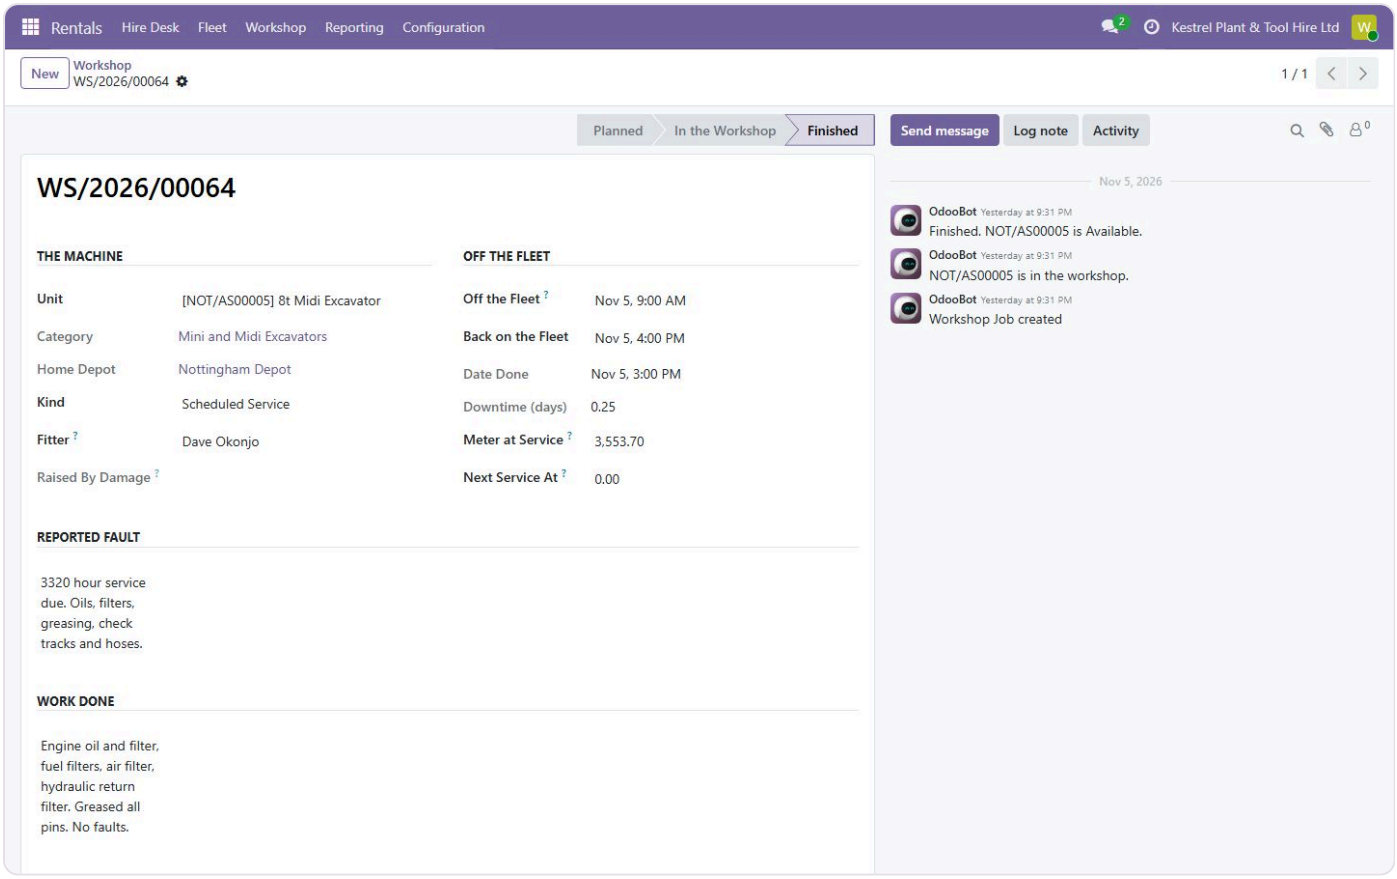

A job has the unit, the **type** (scheduled service, repair, damage repair, inspection preparation, function test), **Off the Fleet** and **Back on the Fleet**, the **fitter**, the meter at service, the next service point, the **reported fault** and the **work done**, parts cost, labour hours and labour cost, the total and the downtime in days. A job raised from damage links back to the report.

BUTTON	DOES	REFUSED WHEN
Take It In	Job to In the Workshop, unit to In the Workshop	the unit is on hire
Finished	Stamps the date, carries the meter, sets the next service point on a service, unit back to Available (or Quarantined with no current certificate)	work done or meter reading missing
Cancel	Cancels; a unit in the workshop goes back to Available	the job is finished
Reopen	A cancelled job back to Planned	-

3 A finished service

On a scheduled service, the next service point is the meter reading plus the category's service interval, unless a figure is typed in.

Service due

A unit is **Service Due** when its meter reaches its Service Due At point. The job **Rental: raise services that have fallen due** runs every night and opens a one day service job, starting now, for each due unit that is available, reserved or on hire and has no open service job.

> In this version the service job stops with an error when a unit that is **on hire** has reached its service point, because it tries to book the workshop over the live hire, and then no service jobs are raised that night. Until that is fixed, book the service by hand when the machine comes back, or move its Service Due At point.

> A planned job counts as holding the machine, so a job booked for next week stops the desk reserving the unit for that window, and a job cannot be booked over a live hire or another job.

Fitters see only the jobs where they are the fitter. The hire desk and the manager see them all.

PART 14 Examinations and certificates

Anything that lifts, anything under pressure and every electrical tool needs a current certificate. The module keeps each one against the unit and stops the unit going out when it lapses.

IN THIS PART YOU WILL LEARN

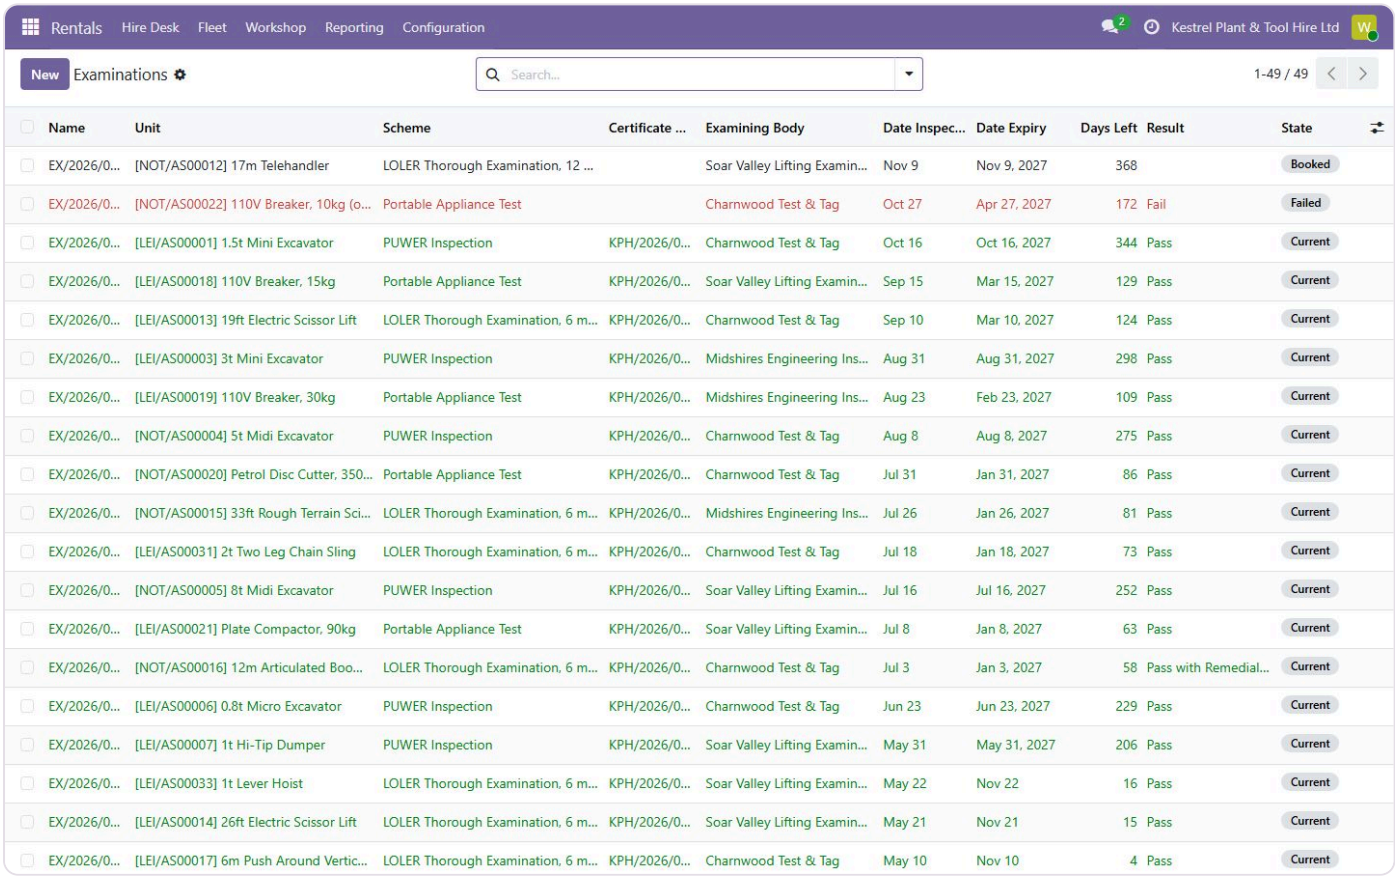

- Recording an examination and its result
- Pass, pass with remedial action and fail
- Superseded, expired and failed certificates
- The Certificates screen and the nightly watch

TRY IT YOURSELF ON THE DEMO

1. Open Workshop, Examinations and use the filter Expiring Within 30 Days
2. Open a Failed examination and then the unit
3. Open Workshop, Certificates: due, expired and never examined
4. Open the Booked examination for the new telehandler

1 Examinations

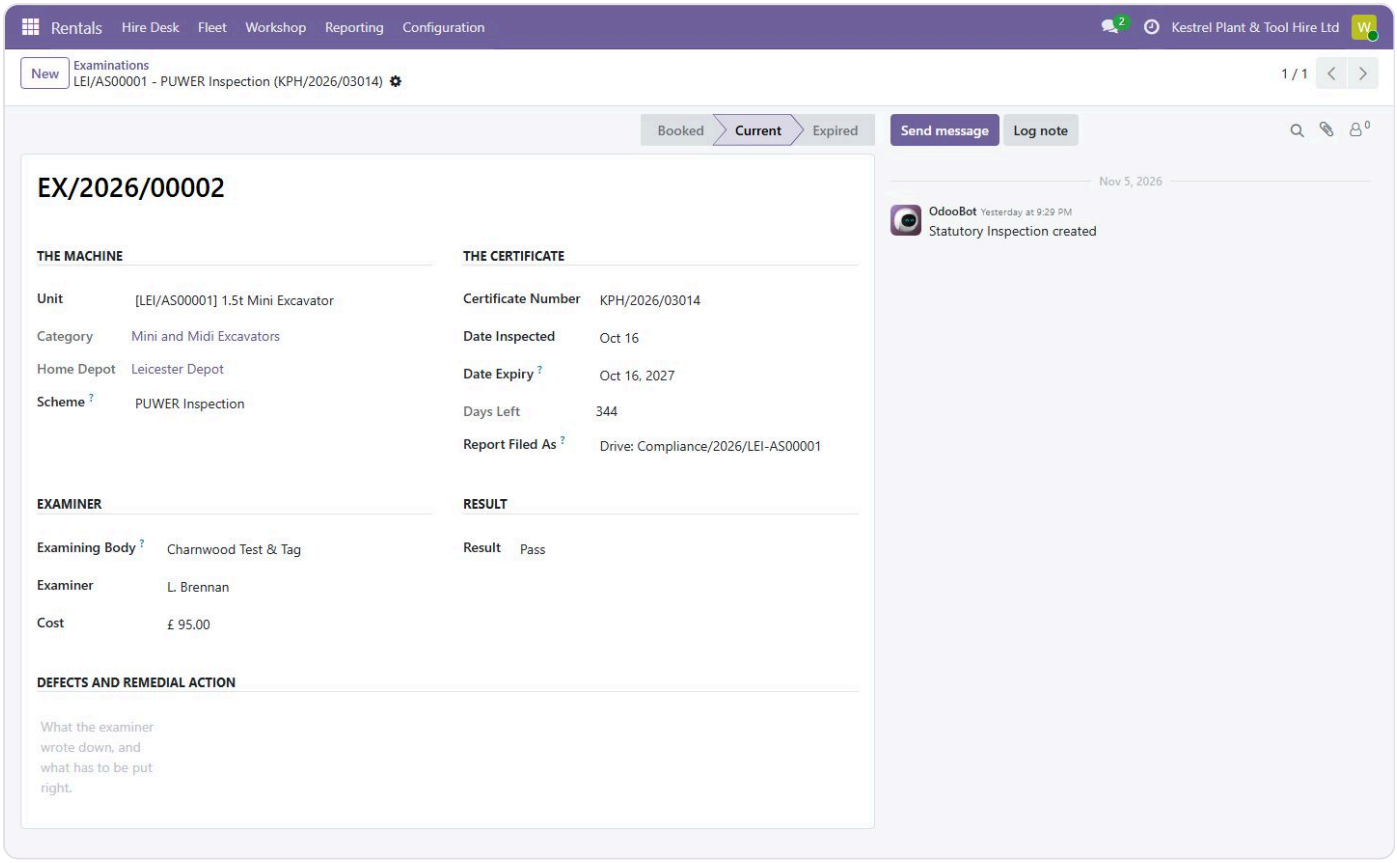

Workshop, Examinations lists every examination with the unit, scheme, certificate number, examining body, dates, days left, result and status. Filters: Current, Booked, Expired, Failed, Expiring Within 30 Days.

Name	Unit	Scheme	Certificate ...	Examining Body	Date Inspec...	Date Expiry	Days Left	Result	State

2 An examination

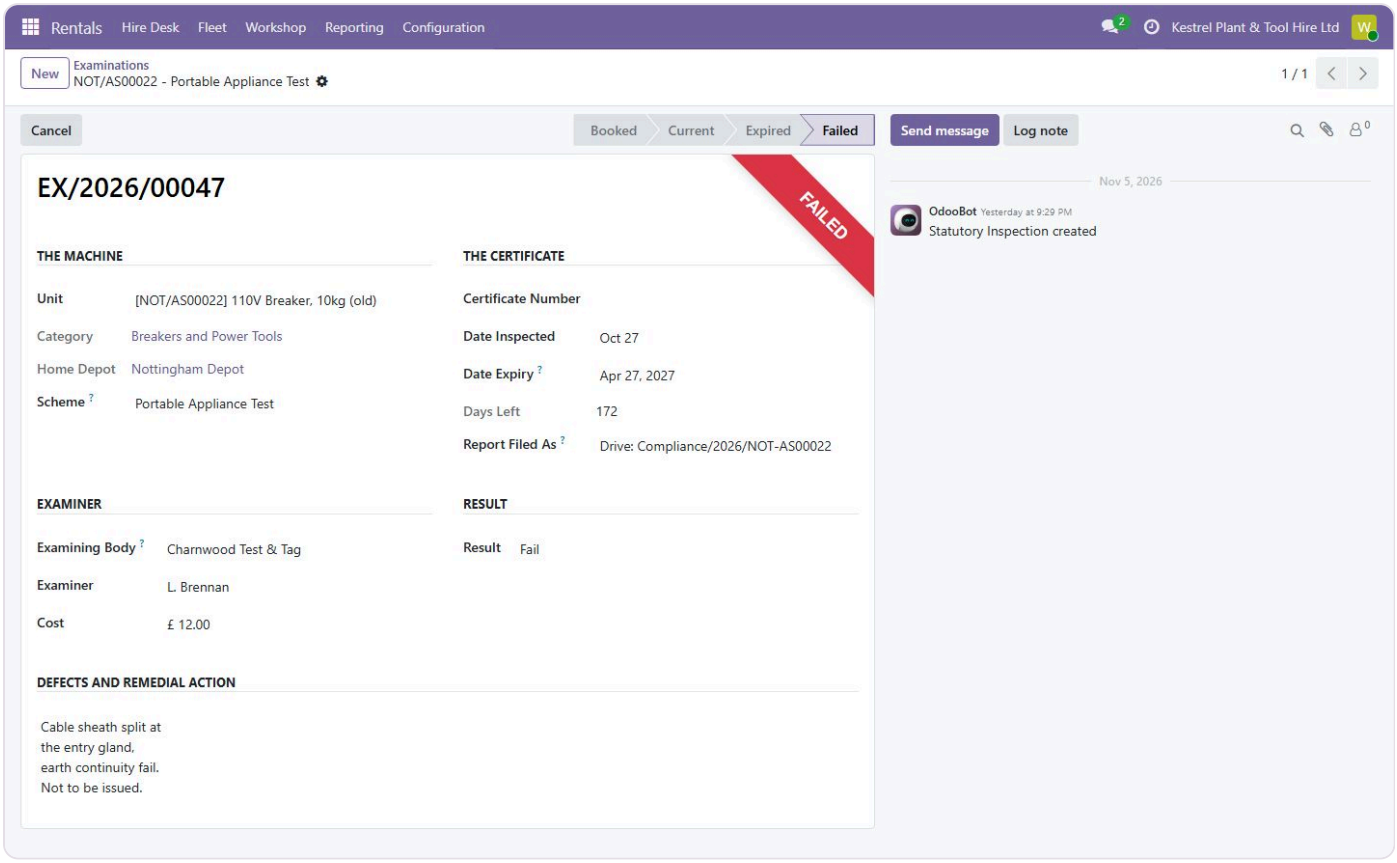

Book an examination with the unit (its category's scheme fills in), the **examining body**, the **examiner** and the date. The expiry is worked out: six months for LOLER 6, twelve for LOLER 12, otherwise the category's certificate months, and it can be shortened by hand. Then the **result**, the **certificate number**, the **defects** (required for a remedial pass), where the signed report is filed and the cost.

RESULT	RECORD THE RESULT DOES
Pass	Needs the certificate number. Current; the previous current certificate of the same scheme becomes Superseded
Pass with Remedial Action	The same, and the defects must be written down
Fail	Failed, and the unit is quarantined at once

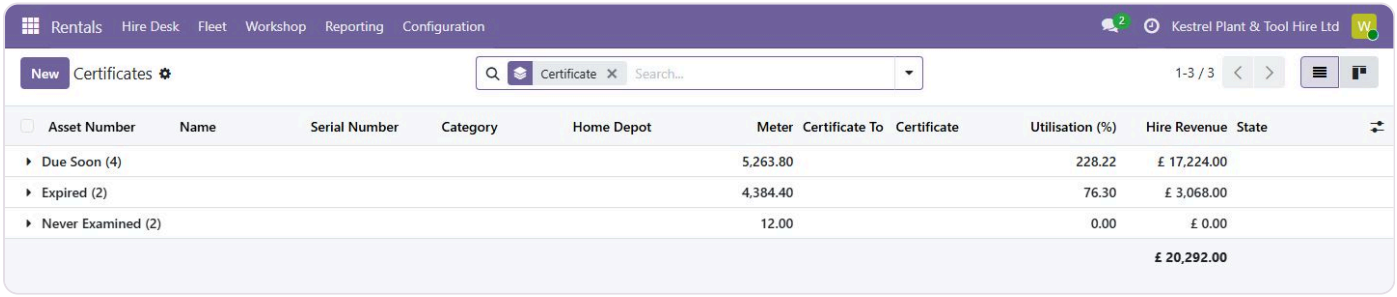

3 A failed examination

The current certificate cannot be cancelled: record the replacement examination instead. A cancelled booking can be reopened.

4 Certificates

Workshop, Certificates lists the units whose certificate is **Due Soon**, **Expired** or **Never Examined**, grouped by certificate state. This is the list to book the examiner from.

The certificate watch

Rental: watch inspection certificates (off when installed) runs daily. It marks certificates past their expiry as Expired, quarantines every available or reserved unit with no current certificate, and for each unit inside the warning window schedules a reminder for the depot manager and sends the **Examination Certificate Expiring** email. A unit already out on hire is left with the customer and is quarantined on its return.

PART 15 What the fleet is earning

Utilisation and payback are the two numbers a hire company is run on. They tell you which machines to buy more of and which to sell.

IN THIS PART YOU WILL LEARN

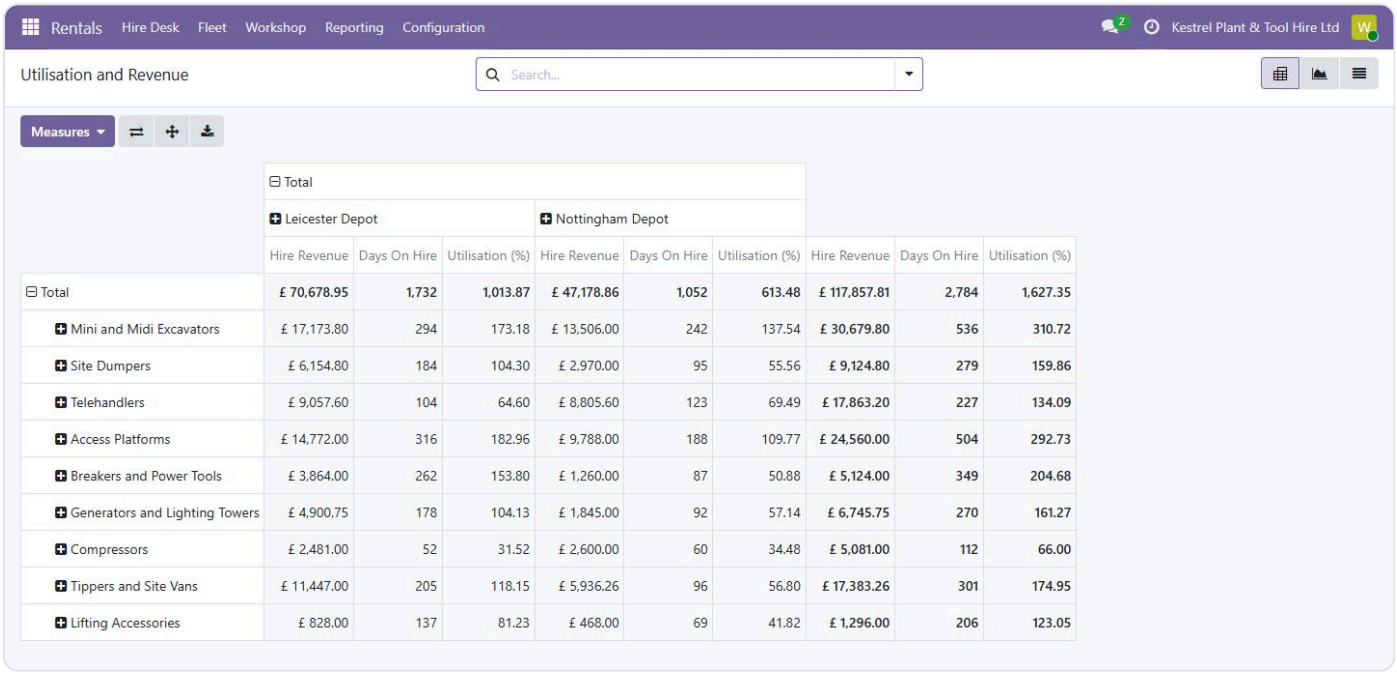

- Utilisation: days on hire against days owned
- Revenue and payback per unit
- The Earning Nothing list
- The hire revenue pivot and graph

TRY IT YOURSELF ON THE DEMO

1. Open Reporting, Utilisation and Revenue
2. Open Reporting, Earning Nothing
3. On Hire Desk, Hires, switch to the pivot

1 Utilisation and Revenue

Reporting, Utilisation and Revenue opens a pivot of the fleet, categories down and depots across: hire revenue, days on hire and utilisation. Switch to the graph for revenue per unit, or the list.

	Total			Leicester Depot			Nottingham Depot		
	Hire Revenue	Days On Hire	Utilisation (%)	Hire Revenue	Days On Hire	Utilisation (%)	Hire Revenue	Days On Hire	Utilisation (%)
Total	£ 70,678.95	1,732	1,013.87	£ 47,178.86	1,052	613.48	£ 117,857.81	2,784	1,627.35
Mini and Midi Excavators	£ 17,173.80	294	173.18	£ 13,506.00	242	137.54	£ 30,679.80	536	310.72
Site Dumpers	£ 6,154.80	184	104.30	£ 2,970.00	95	55.56	£ 9,124.80	279	159.86
Telehandlers	£ 9,057.60	104	64.60	£ 8,805.60	123	69.49	£ 17,863.20	227	134.09
Access Platforms	£ 14,772.00	316	182.96	£ 9,788.00	188	109.77	£ 24,560.00	504	292.73
Breakers and Power Tools	£ 3,864.00	262	153.80	£ 1,260.00	87	50.88	£ 5,124.00	349	204.68
Generators and Lighting Towers	£ 4,900.75	178	104.13	£ 1,845.00	92	57.14	£ 6,745.75	270	161.27
Compressors	£ 2,481.00	52	31.52	£ 2,600.00	60	34.48	£ 5,081.00	112	66.00
Tippers and Site Vans	£ 11,447.00	205	118.15	£ 5,936.26	96	56.80	£ 17,383.26	301	174.95
Lifting Accessories	£ 828.00	137	81.23	£ 468.00	69	41.82	£ 1,296.00	206	123.05

HOW IT WORKS

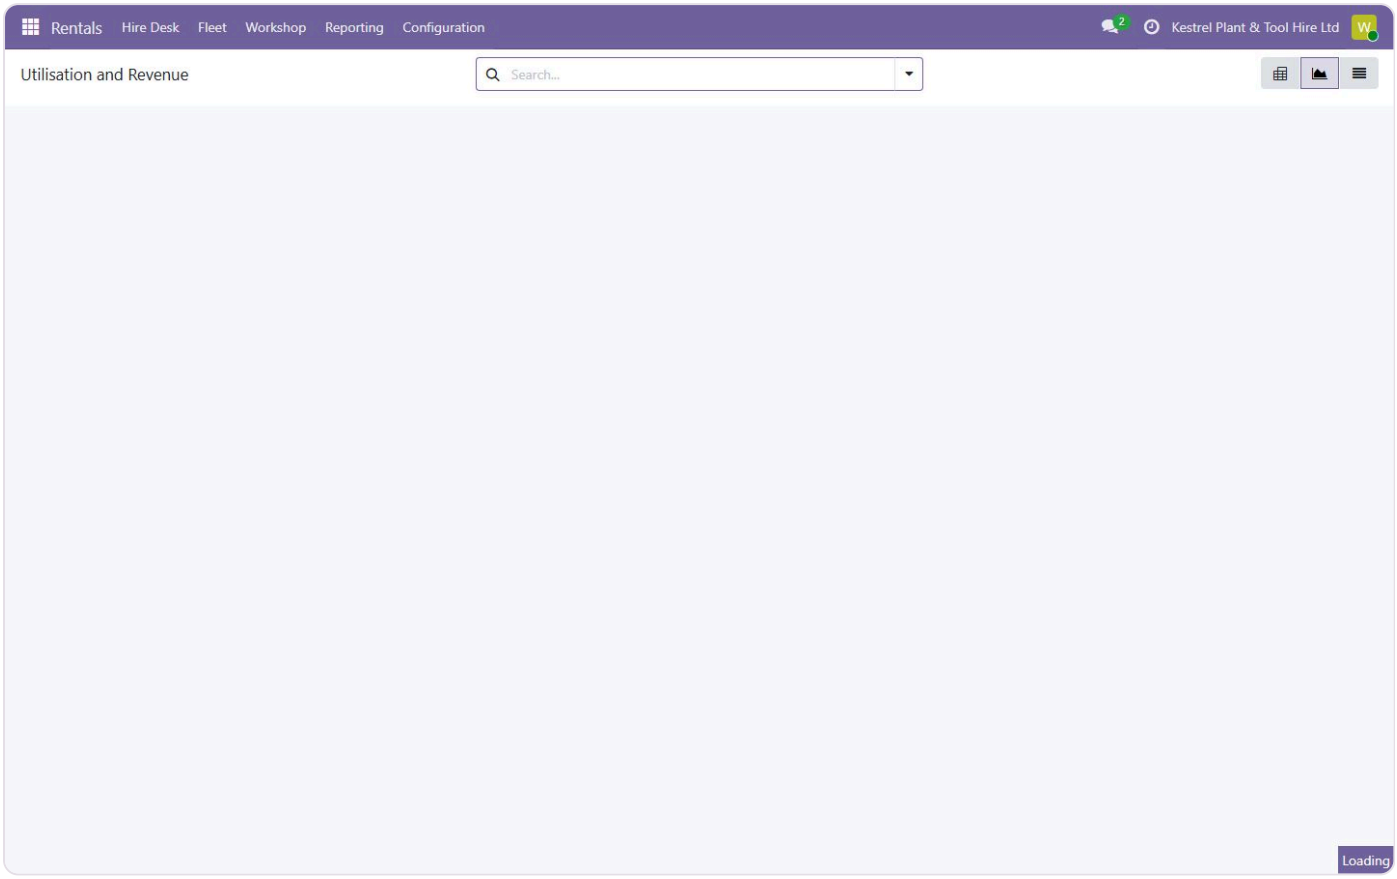

How the figures are worked out

- **Days owned**: days since the purchase date.
- **Days on hire**: for every line handed over, from hand-over to return (or to today), at least one day each.
- **Utilisation**: days on hire / days owned. Under 40% and a yard machine is costing money standing still.
- **Hire revenue**: untaxed hire plus overuse on lines that are back in the yard.
- **Paid back**: hire revenue / purchase value, managers only.

In the pivot, Utilisation (%) is added up rather than averaged, so a category or depot total shows the sum of its units' percentages. Read utilisation per unit, or divide days on hire by days owned yourself.

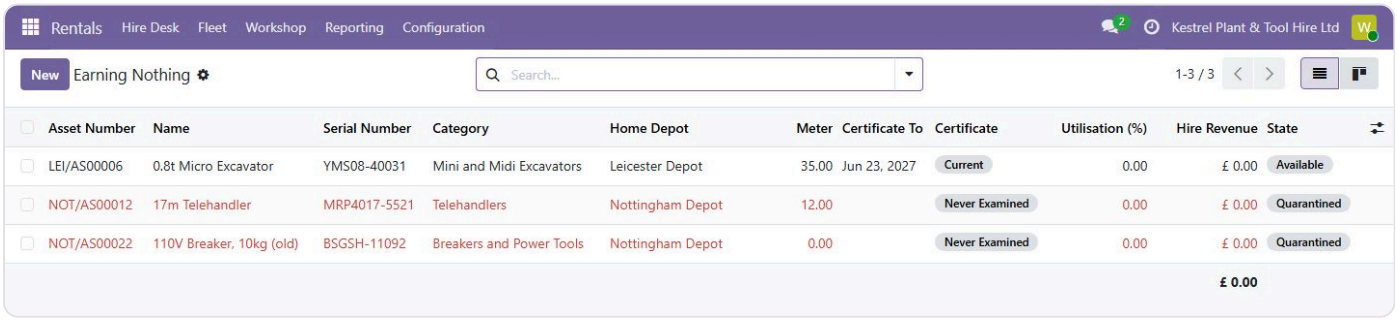

2 Revenue per unit

The graph shows hire revenue by category; group it by unit or depot from the search bar.

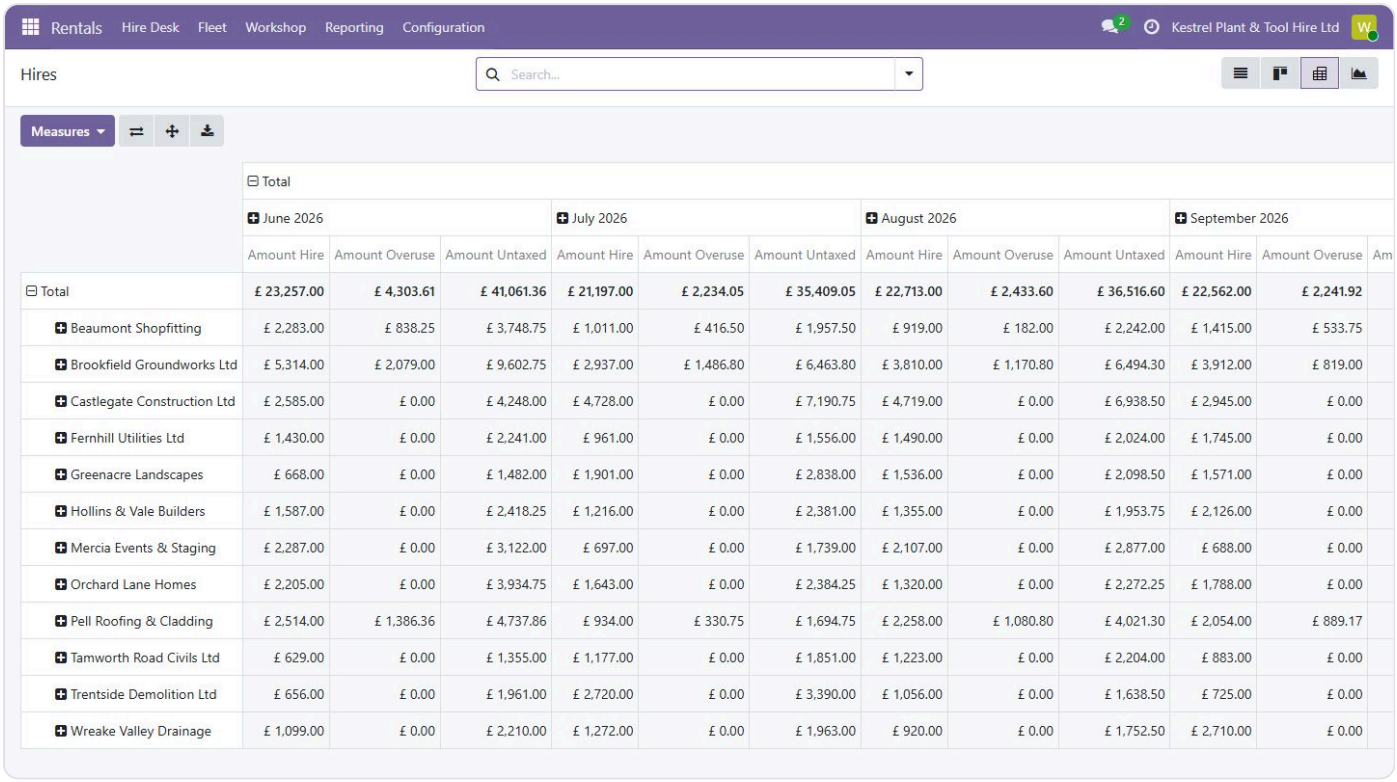

3 Earning Nothing

Reporting, Earning Nothing lists the units not retired with no billed revenue: a new machine still waiting for its first hire, or one nobody asks for.

4 Hire revenue

The Hires pivot and graph show hire, overuse and totals by customer, depot, status or month.

	Total											
	June 2026			July 2026			August 2026			September 2026		
	Amount Hire	Amount Overuse	Amount Untaxed	Amount Hire	Amount Overuse	Amount Untaxed	Amount Hire	Amount Overuse	Amount Untaxed	Amount Hire	Amount Overuse	Am

Orchard Lane Homes	£ 2,205.00	£ 0.00	£ 3,934.75	£ 1,643.00	£ 0.00	£ 2,384.25	£ 1,320.00	£ 0.00	£ 2,272.25	£ 1,788.00	£ 0.00	
Pell Roofing & Cladding	£ 2,514.00	£ 1,386.36	£ 4,737.86	£ 934.00	£ 330.75	£ 1,694.75	£ 2,258.00	£ 1,080.80	£ 4,021.30	£ 2,054.00	£ 889.17	
Tamworth Road Civils Ltd	£ 629.00	£ 0.00	£ 1,355.00	£ 1,177.00	£ 0.00	£ 1,851.00	£ 1,223.00	£ 0.00	£ 2,204.00	£ 883.00	£ 0.00	
Trentside Demolition Ltd	£ 656.00	£ 0.00	£ 1,961.00	£ 2,720.00	£ 0.00	£ 3,390.00	£ 1,056.00	£ 0.00	£ 1,638.50	£ 725.00	£ 0.00	
Wreake Valley Drainage	£ 1,099.00	£ 0.00	£ 2,210.00	£ 1,272.00	£ 0.00	£ 1,963.00	£ 920.00	£ 0.00	£ 1,752.50	£ 2,710.00	£ 0.00	

> Days owned grows every night with nothing written to the unit, so the job **Rental: refresh fleet utilisation** recalculates it. Purchase dates far in the past with few hires show low utilisation, which is the honest answer.

PART 16 Printed documents

Three prints come with the module, plus the standard Odoo invoice.

DOCUMENT	FROM	HOLDS
Hire Agreement (A4)	a hire, Reserved onwards	Hirer, site, period, units with serials, Priced As, meter and condition out, charges, VAT, deposit, transport note, conditions of hire, two signatures
Off-Hire Note (A4)	a hire, Off-Hired or Invoiced	Dates and days late, meters in and out, allowance and overuse, condition in, damage, all amounts, deposit returned and retained, signature
Unit Record Card	a unit	Serial, make, model, year, registration, category, depot, status, condition, meter, service point, hires, days on hire, utilisation, revenue, examinations, workshop history, yard notes
Customer invoice	Invoice on the hire	Standard Odoo invoice with the hire lines

WS/2026/00033	Scheduled Service	08/06/2026 10:00:00 AM	08/06/2026 04:00:00 PM	2,510.2	Engine oil and filter, fuel filters, air filter, hydraulic return filter. Greased all pins. No faults.	£ 439.55

The unit record card: the page an inspector or an insurer asks for, with the examinations and the workshop history.

PART 17 A fifteen minute walk-through

If you have the demo open and fifteen minutes, this path shows the whole yard. It is also the order to show it to somebody else in.

#	DO THIS	AND NOTICE
1	Fleet, Equipment	*The board by status: 33 machines in use, on hire, reserved, in the workshop and quarantined.*
2	Open LEI/AS00001, the 1.5t excavator	*Meter, certificate, 12 hires, the utilisation figure, and the examination history tab.*
3	Configuration, Rate Cards	*Counter cards per category, the Brookfield season rate, the older Takeuchi priced on its own, the winter access card waiting for December.*
4	Hire Desk, Hires, open LEI/HC/2026/00432 (a quotation)	*The units tab: the card it picked and Priced As. Press Free Units to see what else is free.*
5	Open a Reserved hire, then Hire Agreement	*The A4 agreement with serials, meters, conditions of hire and signatures.*
6	Hire Desk, Due Back	*What comes back this week, and the two red overdue hires.*
7	Open NOT/HC/2026/00402 (off-hired)	*Two days late, a van over its kilometre allowance, and a damage report still to assess, which holds the invoice.*
8	Hire Desk, Damage	*Charged, waived and assessed reports, each against the hand-over condition.*
9	Open NOT/HC/2026/00395 (invoiced), Deposit tab	*Late penalty on the invoice and part of the deposit kept, with the reason.*
10	Workshop, Jobs	*A repair in the workshop now, a service raised by the meter, planned preparation for the examiner.*
11	Workshop, Certificates	*Due soon, expired and the new telehandler never examined: quarantined until it is.*
12	Reporting, Utilisation and Revenue, then Earning Nothing	*Which classes of kit earn, and the machines that have earned nothing yet.*

Questions people ask

QUESTION	ANSWER
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community and installs Inventory and Invoicing, which are part of Community.
Is this the same as the Odoo Rental app?	No. The Rental app is Enterprise only and rents products from stock. This module tracks each machine as its own unit with meters, certificates and a workshop.
Can a machine be booked twice?	No. A second reservation over the same window, or a reservation over a workshop booking, is refused with the contract that holds it.
Can the price be changed on a hire?	Yes. The card is picked automatically and the hire charge, the card, the delivery and the deposit can all be typed over.

What stops an out of date machine going out?	The hand-over is refused when the unit has no current examination, unless the company switches that check off.
Do customers book online?	No. There is no portal or website booking in this module; the desk books every hire.
Does the deposit go through accounting?	No. The deposit is an amount and a status on the hire. Take and return the money as you do now.
Does it move stock?	No. The yard location on a unit is a label for where it stands; no stock transfers are made.
Can it run several depots or companies?	Yes. Each depot has its own code, yard, journal and manager, and each company sees only its own records.

PART 18 The menu map

Every screen in the module, on one page.

Hire Desk

Hires	Every hire from quotation to invoice
Due Back	Machines out, grouped by the day they are due
To Invoice	Off-hired and not yet billed
Damage	Reported, assessed, charged or waived

Fleet

Equipment	Every unit: meter, certificate, status, earnings
Availability	Units free or reserved, by category
Hire Lines	Each machine on each hire, meters and overuse

Workshop

Jobs	Services, repairs, damage repairs, tests
Examinations	LOLER, PUWER, PAT and pressure records
Certificates	Units due, expired or never examined

Reporting

Utilisation and Revenue	Days on hire, revenue, payback
Earning Nothing	Units with no billed revenue

Configuration

Settings	Deposit, late penalty, grace, certificates
Depots	Yards, managers, journals, transport
Categories	Meters, allowances, schemes, deposits
Rate Cards	Counter, unit, customer and season rates

Want this for your yard?

We set it up from your fleet list and your rate cards, load the machines with their meters and certificates, connect the invoices to your accounts and VAT, and train the hire desk and the workshop. The same module runs one depot or several, and several companies in one database.
