COMPLETE GUIDE · SETUP, EVERY SCREEN AND EVERY STEP

Auto Parts Wholesale and Dealer Portal for Odoo 19

A trade only parts webshop: the catalogue and prices open only to approved dealers, parts found by the car they fit or by any part number, dealer price tiers, pack and minimum quantities, a wall of what is selling, and reorder in one click. Shown step by step on a live demo.

BACK OFFICE DEALER SHOP

START

About this guide

A parts wholesaler sells to garages and shops, not to the public, and its customers search by the car or by a part number. This module turns the standard Odoo website shop into that trade counter. This guide shows the back office first, then the shop as a dealer sees it.

Who it is for

The owner or sales manager setting the shop up, the people keeping the catalogue, and the dealers who order from it.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the demo, then walks every screen step by step.

The live demo

Shaheen Auto Parts, a worked example wholesaler in Lahore pricing in PKR, with 39 parts, 20 vehicle models, six dealers on three price tiers and a month of orders.

Two sides, two badges

BACK OFFICE

What your own staff use in Odoo: the parts catalogue, dealers, vehicles, brands, settings, price lists and orders.

DEALER SHOP

What a visitor, an applicant and an approved dealer see on the website: the landing, the shop, the product page, the cart and their orders.

HOW IT WORKS

The demo

Address	**autoparts-demo.way4tech.com**
Back office	**w4demo** / **Demo2026** (staff also see the shop)
Approved dealer	**dealer** / **Dealer2026**
Pending applicant	**applicant** / **Applicant2026**
Runs on	Odoo 19 Community with eCommerce, Sales and Inventory

The demo is shared and resets from time to time. Please browse, but do not place orders on it.

What is in the guide

PART 1	How the trade shop works	PART 2	Sign in and set up
PART 3	The parts catalogue	PART 4	Dealers
PART 5	The public landing and the gate	PART 6	Shopping as a dealer
PART 7	Cart, checkout and reorder	PART 8	Behind the scenes
PART 9	A 15 minute demo	PART 10	Questions people ask
PART 11	Menu map		

PART 1 How the trade shop works

Four ideas carry the whole module: who may see the shop, how a part is found, how it is priced and packed, and what is selling.

IN THIS PART YOU WILL LEARN

- Who sees prices and who does not
- Fitment, OEM numbers and cross references
- Price tiers, packs and minimum quantities
- Hot, new and low stock

WHO	WHAT THEY SEE
A visitor (not signed in)	The dealer landing at /dealer with a sign in button, an apply button and the names of the hot parts. No product page, no price. /shop, a product page and /shop/cart all send them to the landing.
A customer not yet approved	The landing with a message that the account is not approved yet. Still no prices.
An approved dealer	The whole shop at their own price list, fitment search, part details, cart, checkout and their past orders with Reorder.
Staff (internal users)	Always the whole shop, so the counter can work it.

Approval is one tick, **Approved Dealer**, on the dealer's company. Every contact and login under that company is let in by the same tick. Turning off *Shop open to approved dealers only* in Settings opens the shop to everyone.

A dealer's order DEALER SHOP

1. **Sign in** — Dealer account
2. **Find the part** — By vehicle or by number
3. **Add to cart** — Rounded to whole packs
4. **Check out** — At their tier price
5. **You confirm** — Hot wall refreshed
6. **Reorder** — Next month, one click

The menus and pages

Auto Parts

Parts Catalogue BACK OFFICE	Every product marked as an auto part
Dealers BACK OFFICE	Every contact approved as a dealer
Vehicles > Makes BACK OFFICE	Suzuki, Toyota, Honda and the rest
Vehicles > Models BACK OFFICE	Each model with its years and fitted parts
Brands BACK OFFICE	Genuine, premium, standard, economy
Configuration > Settings BACK OFFICE	Dealer only shop, hot window, cross references

Website

/dealer DEALER SHOP	The public dealer landing, no prices
/shop DEALER SHOP	The trade shop, dealers and staff only
/shop/cart DEALER SHOP	The cart, gated the same way
/my/orders DEALER SHOP	Past orders, each with Reorder

PART 2 Sign in and set up

BACK OFFICE

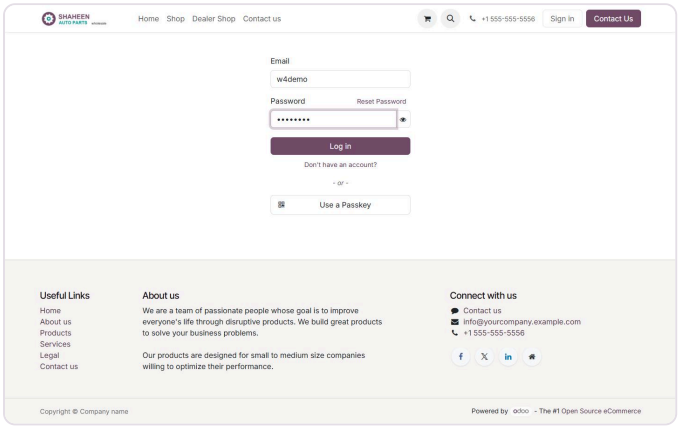

Install the module, set the four switches, and build the vehicle and brand lists the catalogue hangs on.

IN THIS PART YOU WILL LEARN

- What the module installs with it
- The four settings
- Makes, models with their years, and brands
- Price lists for the dealer tiers

TRY IT YOURSELF ON THE DEMO

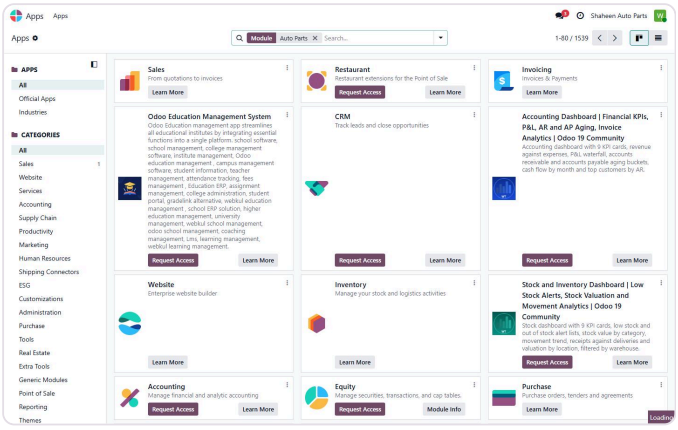

1. Sign in to autoparts-demo.way4tech.com as w4demo / Demo2026
2. Open Auto Parts > Vehicles > Models and open Toyota Corolla
3. Open Auto Parts > Brands

1 BACK OFFICE

Sign in

Open **autoparts-demo.way4tech.com/web/login** and sign in with `w4demo` / `Demo2026`. Open **Auto Parts**.

2 BACK OFFICE

The module

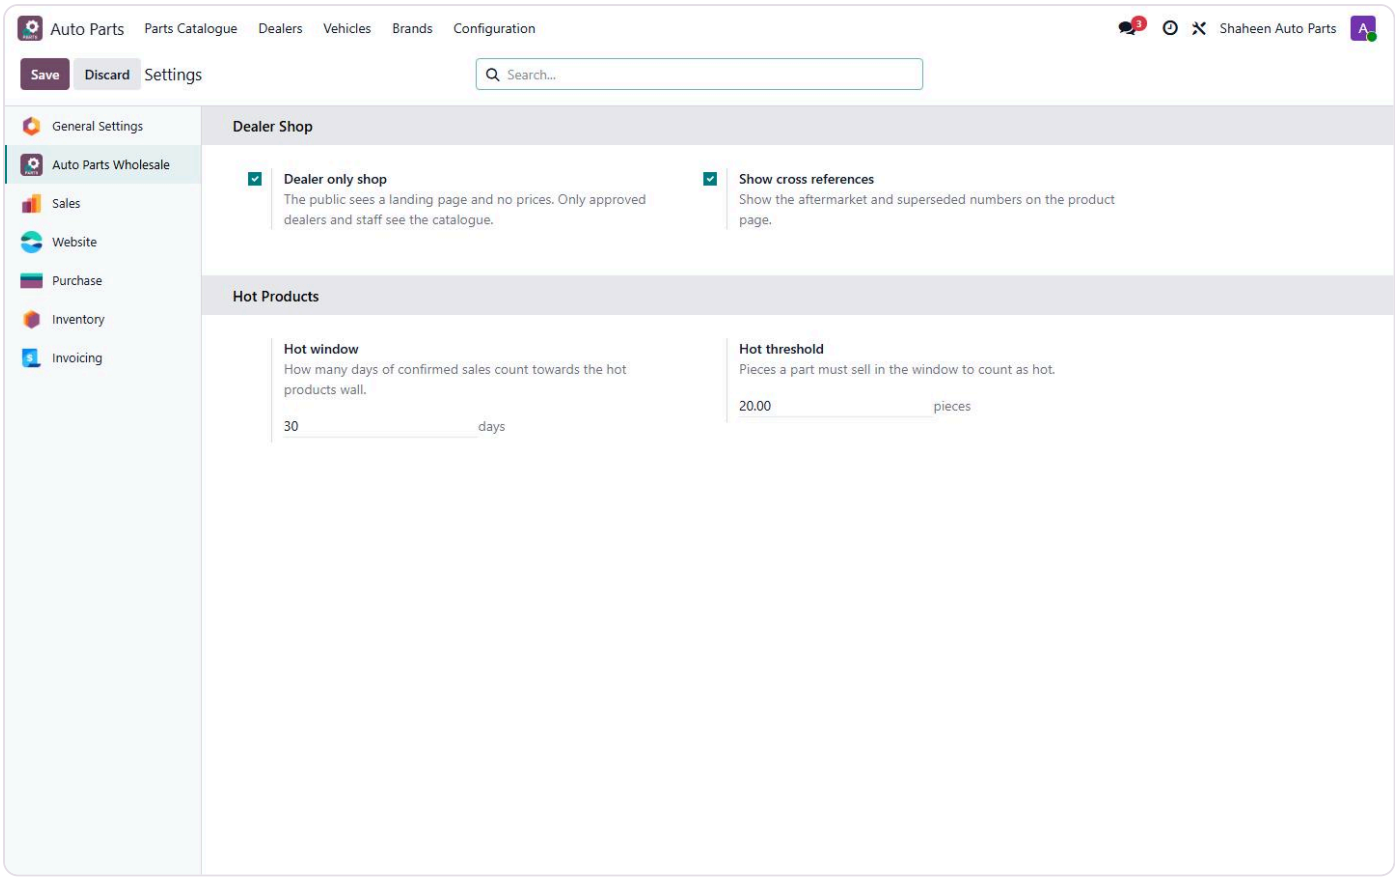

Auto Parts Wholesale & Dealer Portal needs eCommerce, Sales and Sales Stock and installs them. A daily job, *Auto Parts: refresh hot products*, comes with it.

The Auto Parts menu is for salespeople; Configuration is for the Auto Parts Manager, which every Sales manager has.

Settings BACK OFFICE

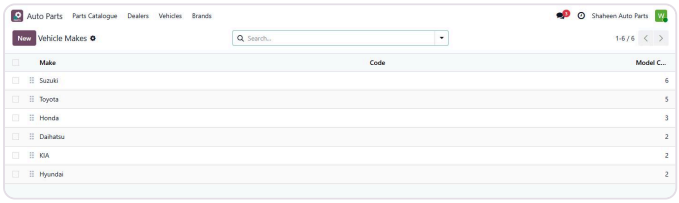

Auto Parts > Configuration > Settings.

SETTING	WHAT IT DOES	DEFAULT
Shop open to approved dealers only	When on, the public sees the dealer landing and no prices. Only approved dealers and staff see the catalogue.	On
Show cross references on the product page	Lists the cross reference numbers in the part details.	On
Hot products window (days)	How many days of confirmed sales count towards hot.	30
Hot products threshold (pieces)	Pieces a part must sell in the window to count as hot.	1

BACK OFFICE **Auto Parts settings.** Saving them refreshes the hot flags at once.

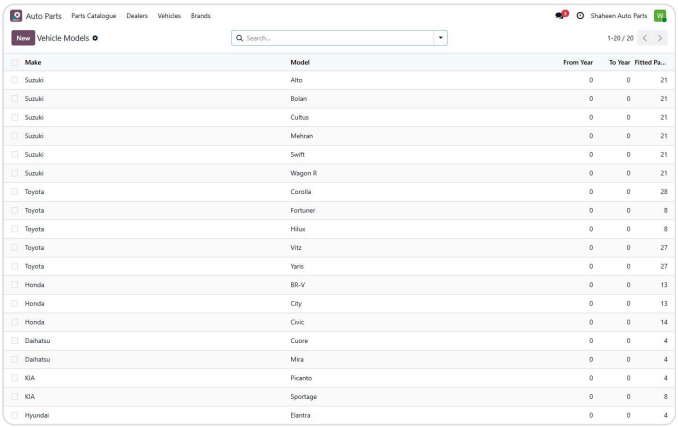

Vehicles BACK OFFICE

3 BACK OFFICE

Makes

Vehicles > Makes: a name, an optional short code and a count of models. A make name is unique.

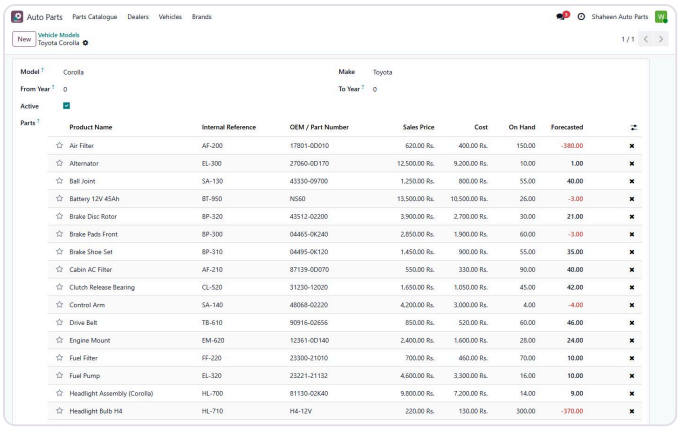

4 BACK OFFICE

Models

Vehicles > Models: the make, the model name, an optional **From Year** and **To Year**, and how many parts fit it. A model reads as make, model and years, for example a model with 2014 and 2020 reads *Toyota Corolla (2014-2020)*.

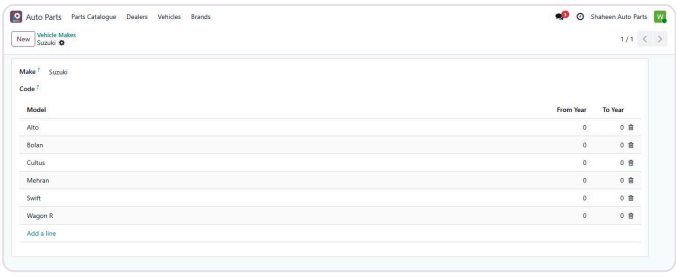

The last year cannot be before the first.

5 BACK OFFICE

A model

The model form lists every part fitted to it.

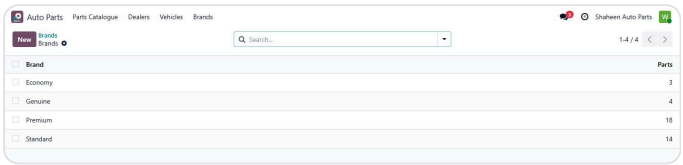

6 BACK OFFICE

A make

The make form lists its models.

BACK OFFICE **Brands.** Each with the number of parts sold under it.

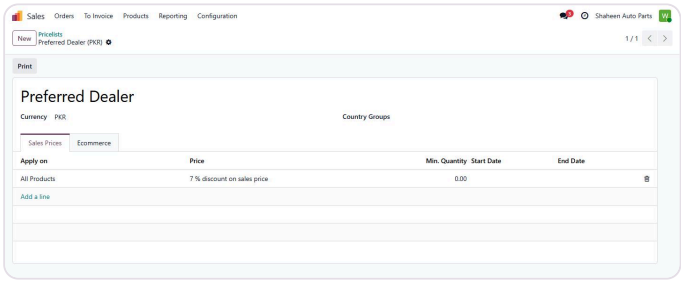

BACK OFFICE **A brand.** A unique name.

Dealer price tiers BACK OFFICE

Each tier is a standard Odoo price list. The demo has *Dealer Trade*, *Preferred Dealer* and *Key Account*. A dealer sees the shop at the price list set on their contact.

BACK OFFICE **Price lists.** One per dealer tier.

BACK OFFICE **A tier.** The discount or prices it gives.

PART 3 The parts catalogue

BACK OFFICE

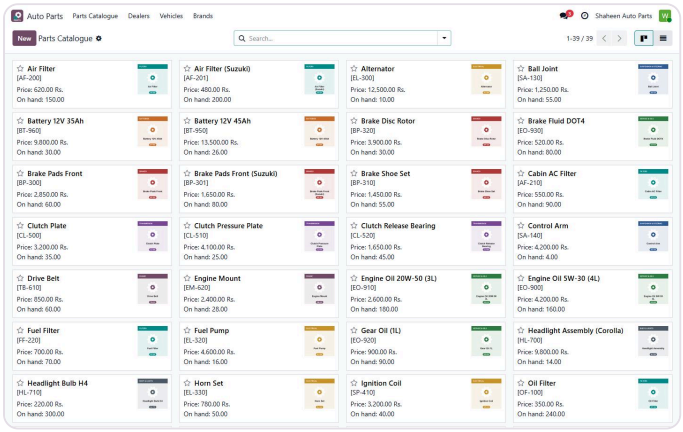

A part is an ordinary Odoo product with one tick, Auto Part, and a tab that carries everything a parts counter needs.

IN THIS PART YOU WILL LEARN

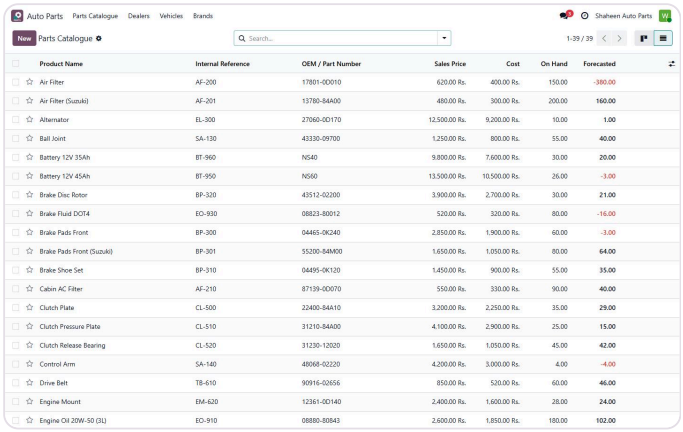

- The Auto Part tab, field by field
- OEM numbers and cross references
- Fitment to vehicle models
- Pack size, minimum order and the hot flag

TRY IT YOURSELF ON THE DEMO

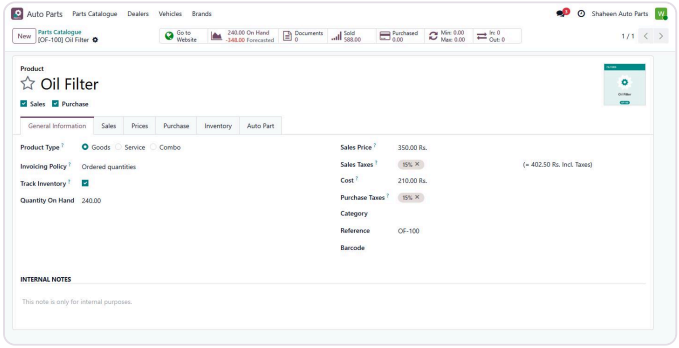

1. Open Auto Parts > Parts Catalogue and open the Oil Filter
2. Open the Auto Part tab and read the cross references
3. Look at Fits Vehicles

BACK OFFICE **Parts Catalogue, kanban.** Only products marked as auto parts.

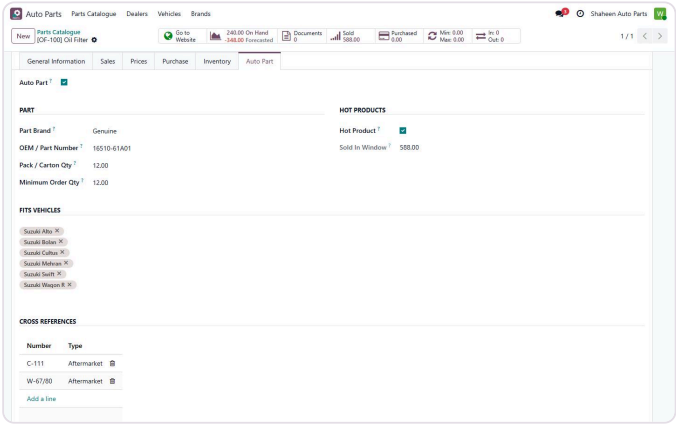

BACK OFFICE **Parts Catalogue, list.**

1 BACK OFFICE

A part

A new part from the catalogue starts as a storable goods product with Auto Part ticked. Set the name, internal reference, sales price, cost and the website publishing as for any product.

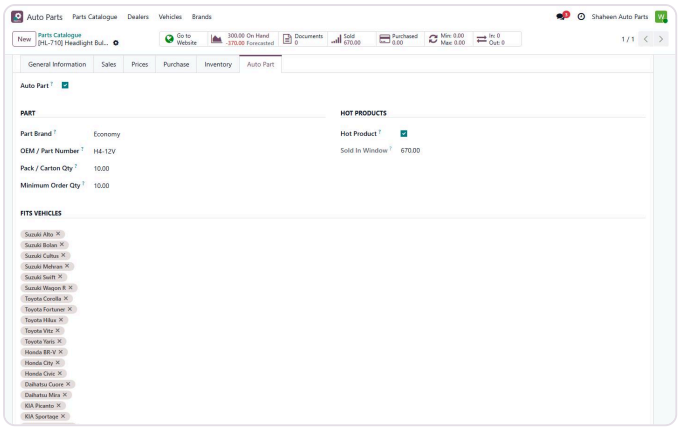

2 BACK OFFICE

The Auto Part tab

Part Brand, **OEM / Part Number** (the genuine number), **Cross References** (other numbers, each typed as OEM / Genuine, Aftermarket or Superseded), **Fits Vehicles** (the models), **Pack / Carton Qty**, **Minimum Order Qty**, **Hot Product** and **Sold In Window**.

The OEM number and every cross reference are searched on the shop.

3 BACK OFFICE

Another part

A part sold in tens: pack quantity 10 and a minimum of 10, so a dealer cannot order loose bulbs.

A part's pack quantity must be at least one; a minimum cannot be negative.

HOW IT WORKS

Pack and minimum on a website order

When a dealer adds a part to the cart or changes its quantity, the quantity is rounded **up** to whole packs, then up to the minimum (in whole packs). Seven of a pack of four becomes eight. Orders keyed in the back office are not rounded, so staff can still sell any quantity.

HOW IT WORKS

Hot, new and low stock

- **Hot:** a part whose confirmed sales in the window reach the threshold. Refreshed every night and whenever an order with the part is confirmed. You can also tick it by hand.
- **New:** a part that is not hot and has sold nothing in the window.
- **Low stock:** a storable part with more than zero and at most five on hand.

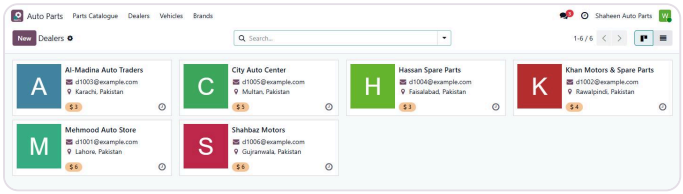

PART 4 Dealers

BACK OFFICE

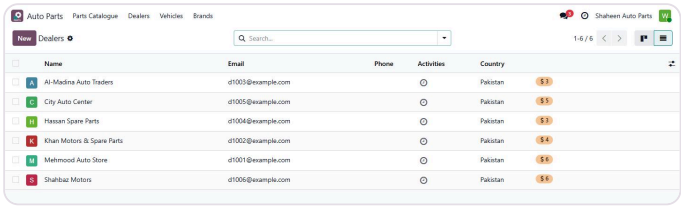

A dealer is a customer you have approved. The approval, a dealer code and the date sit on the contact, next to the price list.

TRY IT YOURSELF ON THE DEMO

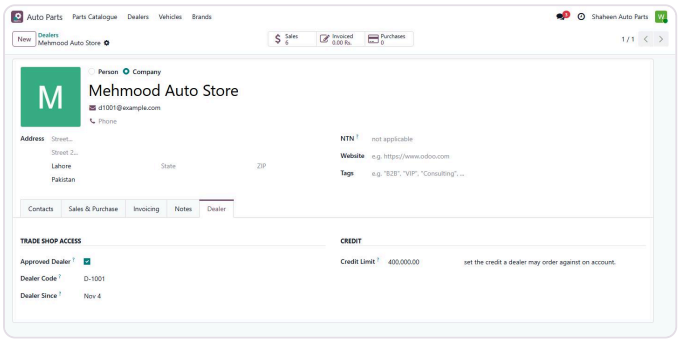

1. Open Auto Parts > Dealers and open Mehmood Auto Store
2. Open the Dealer tab, then Sales & Purchase for the price list

BACK OFFICE **Dealers, kanban.** Only contacts ticked as approved dealers.

BACK OFFICE **Dealers, list.**

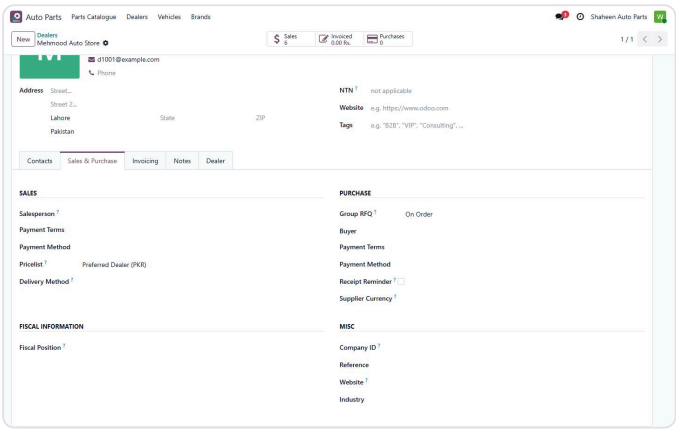

1 BACK OFFICE

Approve a dealer

On the contact's **Dealer** tab, tick **Approved Dealer**. **Dealer Since** fills with today. Add your own **Dealer Code**. The **Credit** block beside it holds Odoo's credit limit for the account. Do it on the company: everybody under it is let in.

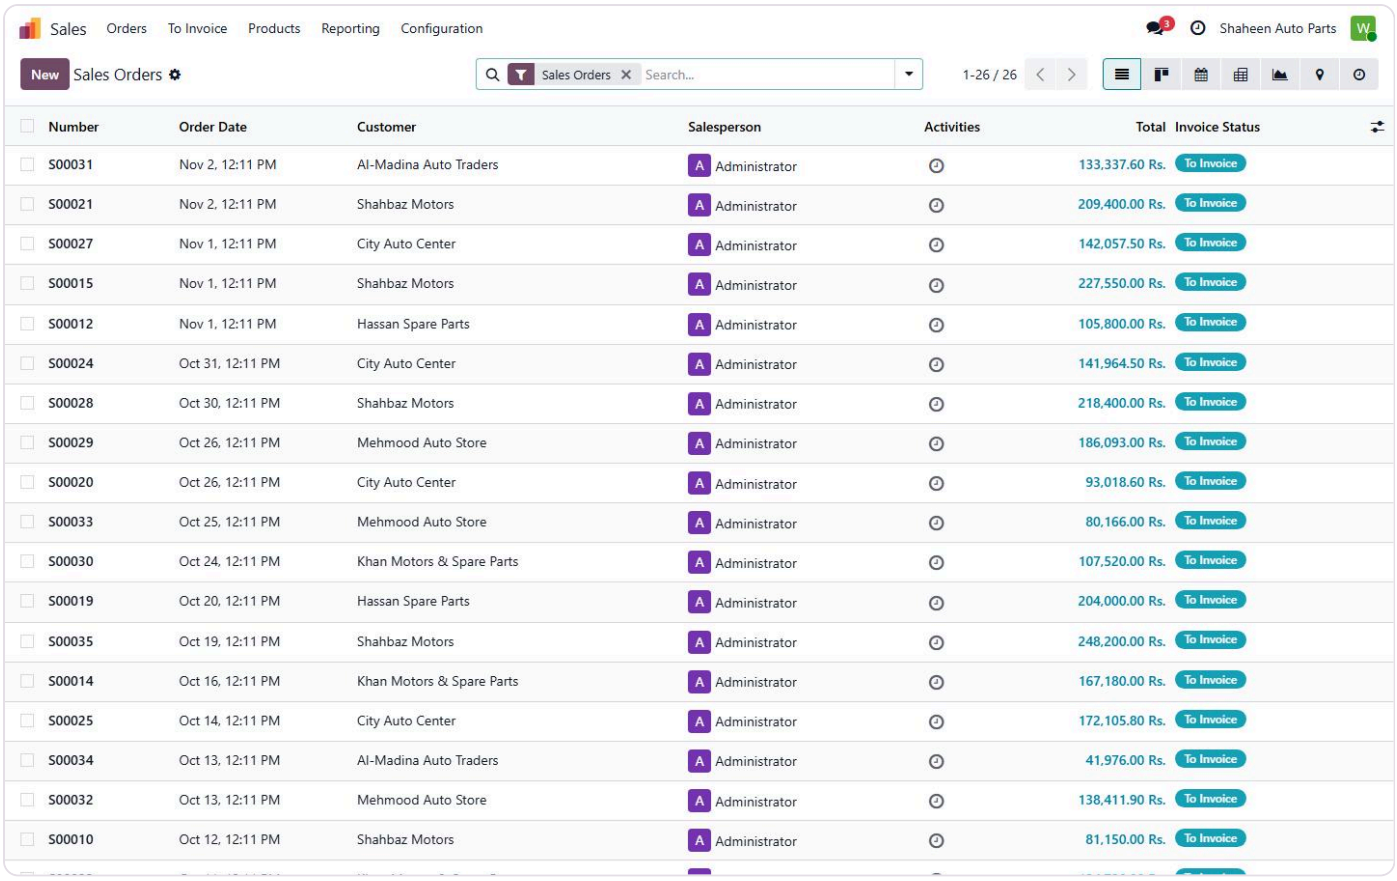

New dealers created from the Dealers menu start ticked and as customers.

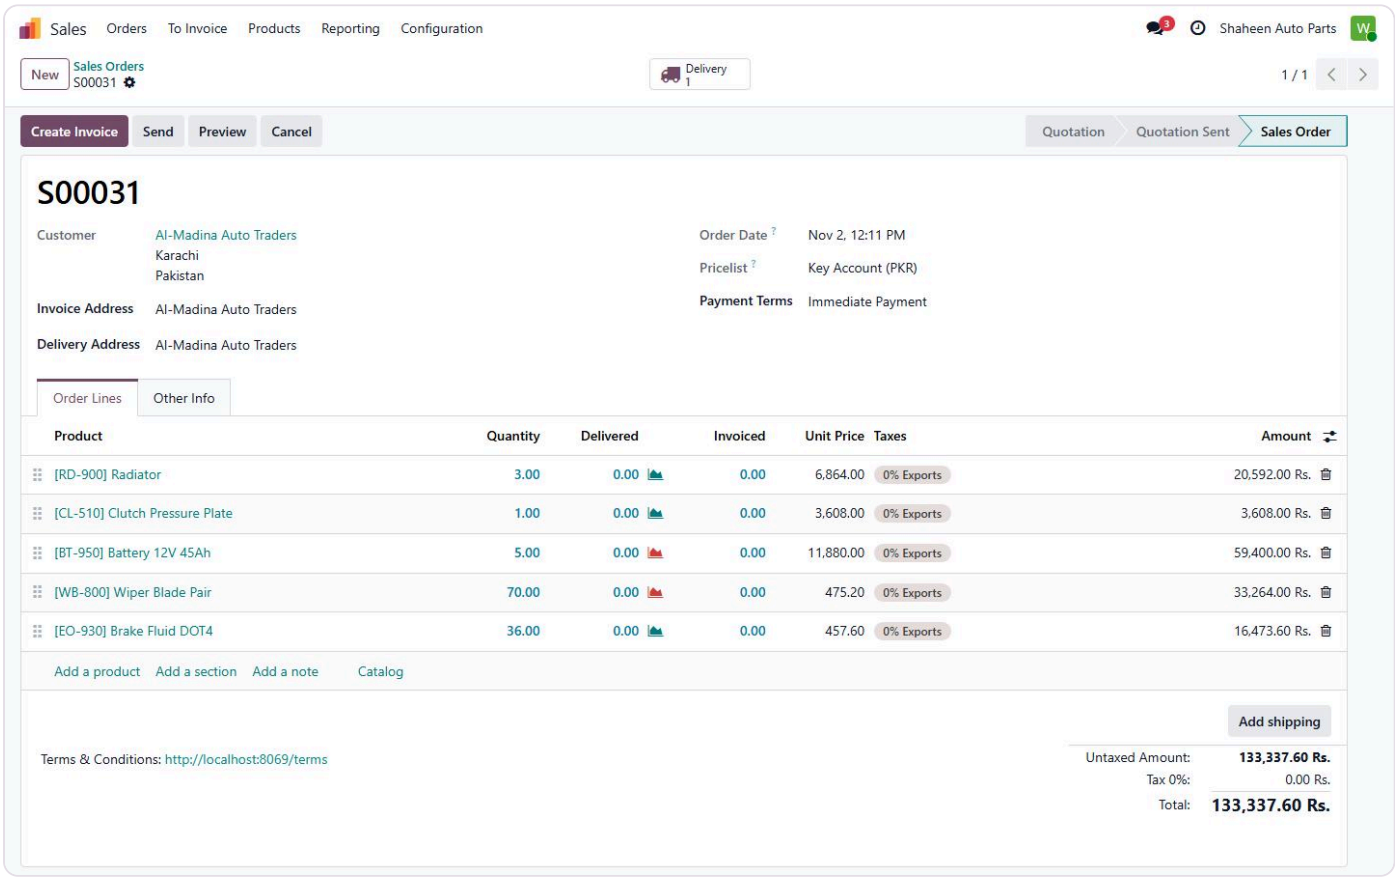

2 BACK OFFICE

Their price tier

On **Sales & Purchase**, set the **Pricelist** to their tier, and the payment terms you give them.

BACK OFFICE **Sales > Orders.** Website orders from dealers land here like any order. Confirm them as usual; confirming refreshes the hot flags.

BACK OFFICE **A dealer's order** with tier prices and whole pack quantities.

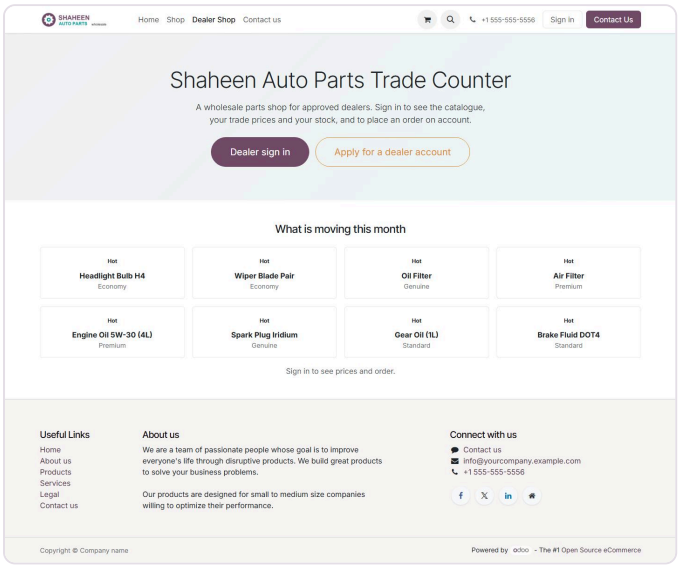

PART 5 The public landing and the gate

DEALER SHOP

What somebody who is not an approved dealer sees. Nothing on these pages shows a price.

TRY IT YOURSELF ON THE DEMO

1. Open autoparts-demo.way4tech.com/dealer in a private window
2. Try /shop: you are sent back to the landing
3. Sign in as applicant / Applicant2026 and try /shop again

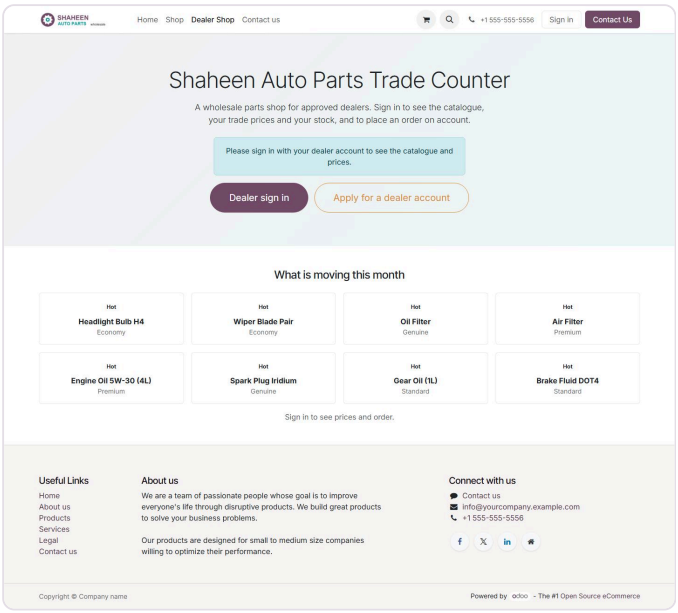

1 DEALER SHOP

The dealer landing

/dealer (also the Dealer Shop menu): the company name as a Trade Counter, a line on what the shop is, **Dealer sign in** and **Apply for a dealer account** (to the contact page), and *What is moving this month*: up to eight hot parts by name and brand, no price.

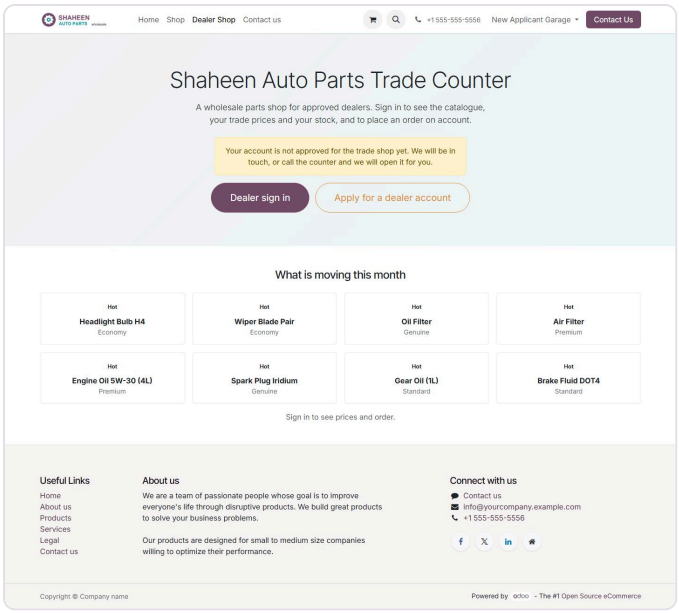

A signed in approved dealer who opens /dealer is sent straight to the shop.

2 DEALER SHOP

The gate

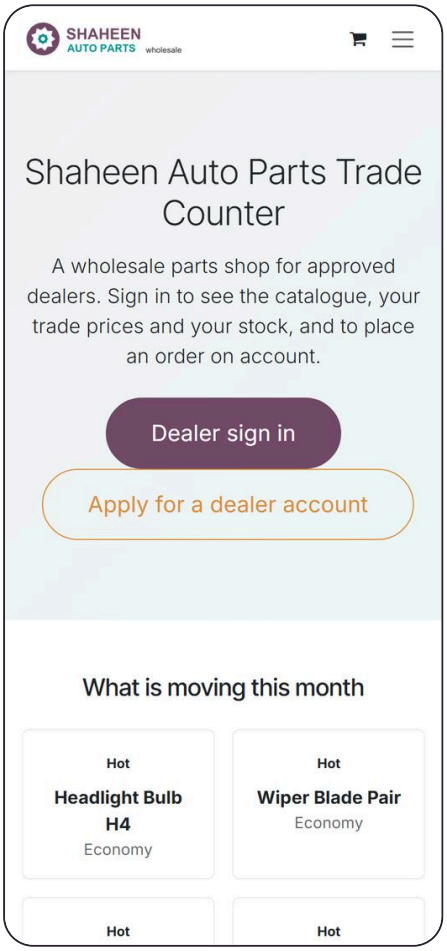

A visitor who opens /shop, any product page or the cart is sent to /dealer with *Please sign in with your dealer account*.

3 DEALER SHOP

Not approved yet

A signed in customer whose company is not approved is sent to the landing with *Your account is not approved for the trade shop yet*.

The landing on a phone.

PART 6 Shopping as a dealer

DEALER SHOP

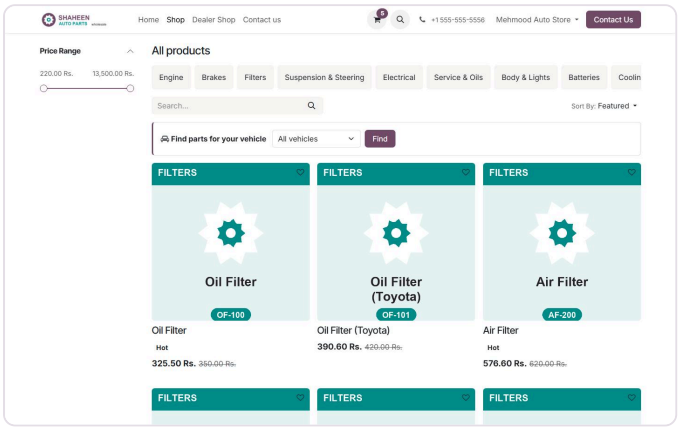

Signed in as an approved dealer, the shop opens at the dealer's own prices, with the vehicle filter and the part details on top of the standard Odoo shop.

IN THIS PART YOU WILL LEARN

- Find parts for your vehicle
- Search by OEM or cross reference number
- The part details on the product page
- The badges on the cards

TRY IT YOURSELF ON THE DEMO

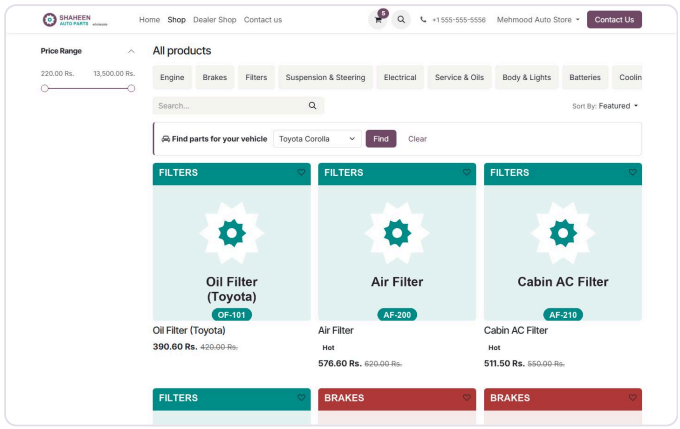

1. Sign in as dealer / Dealer2026 and open the shop
2. Pick Toyota Corolla in Find parts for your vehicle
3. Search W-67/80, an aftermarket number, and open the part

1 DEALER SHOP

The shop

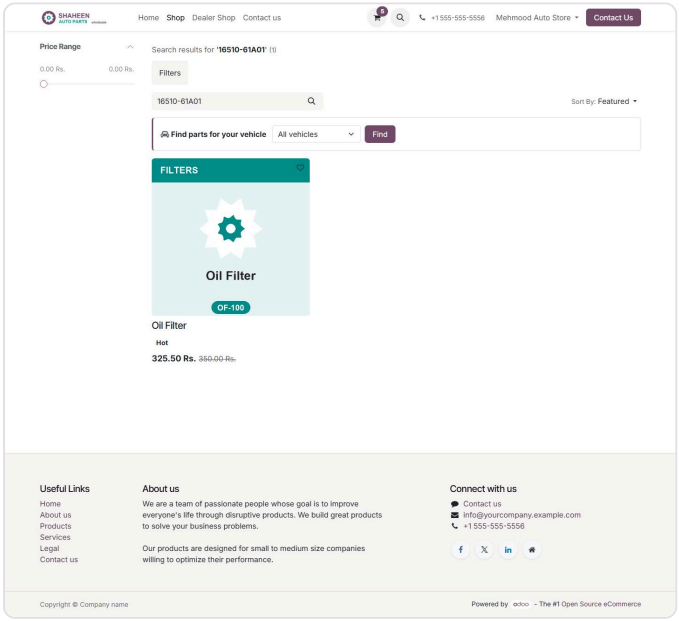

The standard shop grid at the dealer's tier prices, with a **Find parts for your vehicle** bar above it and Hot, New or Low stock badges under each name.

2 DEALER SHOP

By vehicle

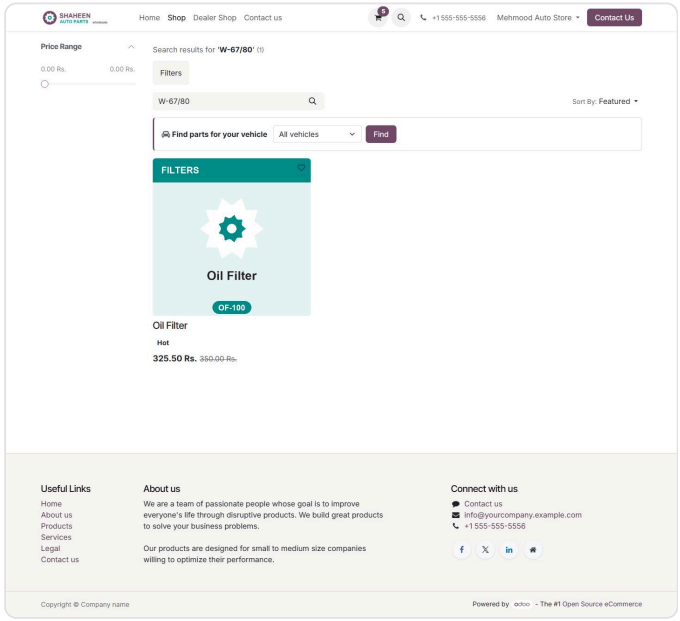

Pick a model in the bar (models are grouped by make, and only those with published parts are offered). The shop narrows to the parts that fit; the choice stays on the pager and sort links. **Clear** puts it back.

3 DEALER SHOP

By OEM number

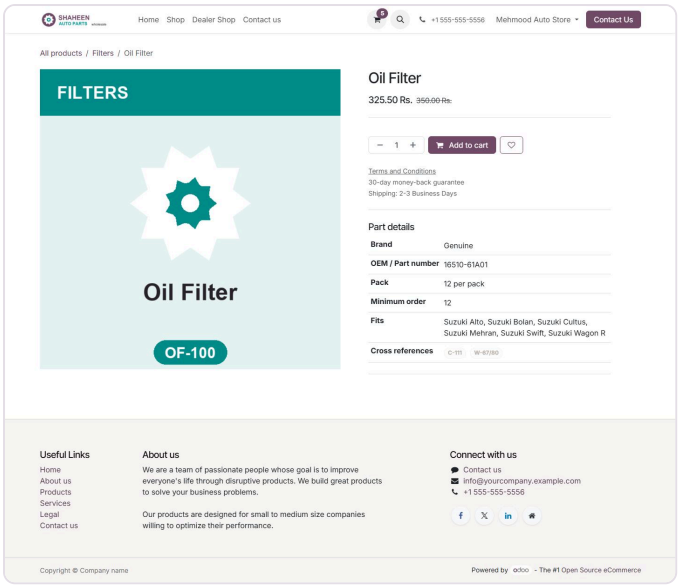

Type the genuine number in the shop search. The OEM number is searched like the name.

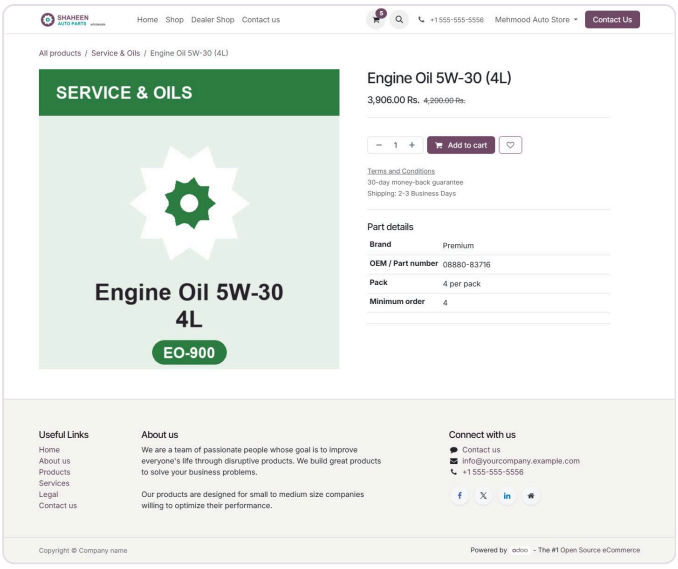

4 DEALER SHOP

By cross reference

An aftermarket or superseded number lands on the same part.

5 DEALER SHOP

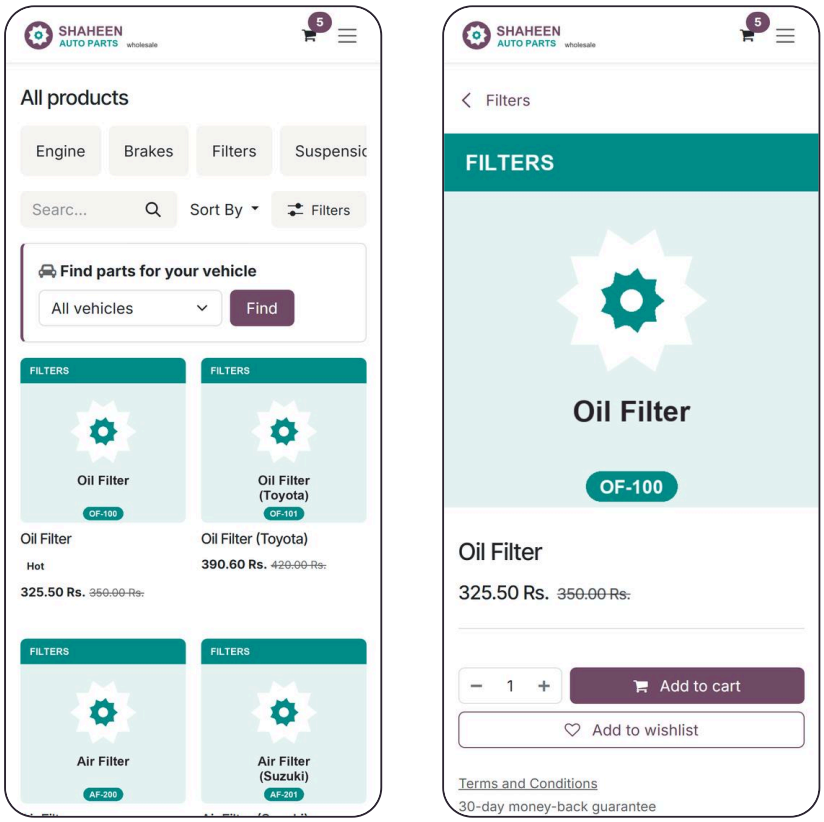

The product page

Under the add to cart button, **Part details**: brand, OEM / part number, pack, minimum order, the vehicles it fits and the cross references (if shown in Settings).

6 DEALER SHOP

A part sold in packs

Here, four per pack and a minimum of four.

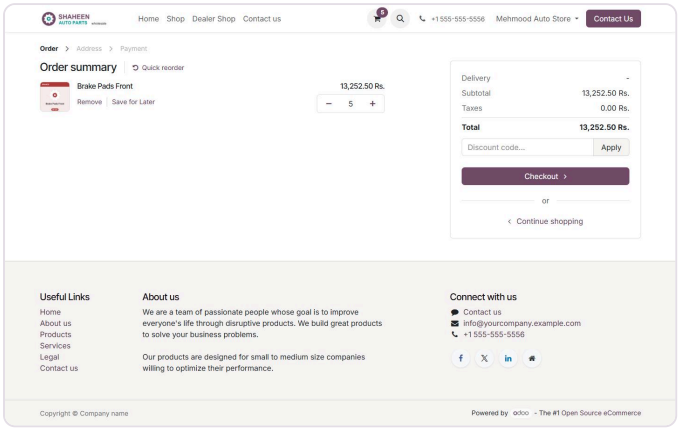

The shop and a product page on a phone.

PART 7 Cart, checkout and reorder

DEALER SHOP

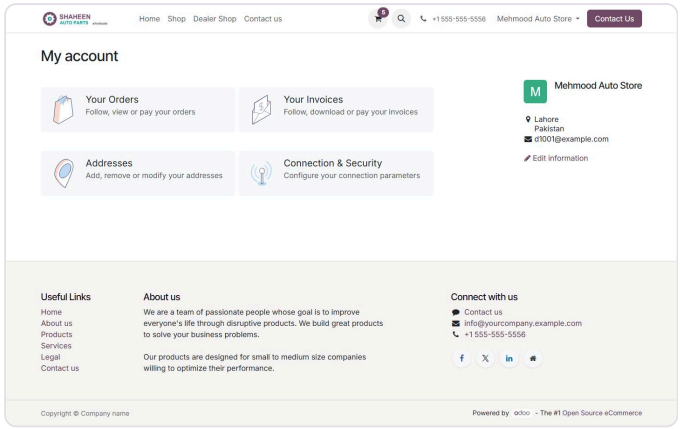

The cart rounds to whole packs, the checkout is the standard Odoo one, and a past order can be rebuilt into the cart from the portal.

1 DEALER SHOP

The cart

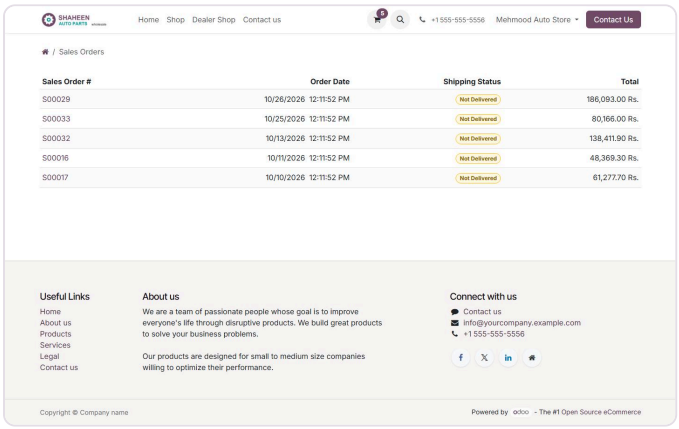

Each part line is held at whole packs and at least the minimum. Change a quantity and it is rounded up again.

2 DEALER SHOP

My account

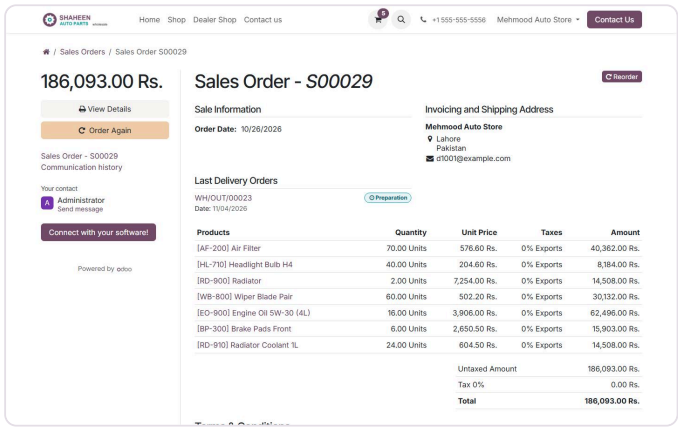

The dealer's portal: orders, invoices and addresses.

3 DEALER SHOP

Past orders

/my/orders lists every order.

4 DEALER SHOP

Reorder

A confirmed order shows a **Reorder** button. It adds every line to the cart at the quantity bought before and opens the cart. A part that is no longer listed is skipped, and the dealer is told how many lines could not be added.

The portal's own access check applies, so a dealer cannot reorder another dealer's order.

How the dealer pays DEALER SHOP

Checkout is Odoo's own. Which payment methods appear is set with Odoo's payment providers in the Website settings, for example a bank transfer or a pay later method for dealers on account terms. The order arrives in Sales for you to confirm.

PART 8 Behind the scenes

ITEM	WHAT IT DOES
Auto Parts: refresh hot products (daily)	Recounts confirmed sales of every part over the window, sets Sold In Window and the hot flag
Order confirmation	Refreshes the hot flag of the parts on that order
Saving the settings	Refreshes every part
Auto Parts Manager group	Configuration and settings; every Sales manager has it
Auto Parts menu	Salespeople and above

PART 9 A 15 minute demo

Have two windows: a private one for the public view, a normal one for the dealer and the back office. Do not place an order on the shared demo.

MIN	OPEN	SAY
0	/dealer, private window	*The public sees who we are and what moves, never a price.*
1	/shop, private window	*The shop is shut; it sends them back.*
2	Sign in as applicant	*A customer we have not approved is told so.*
3	Sign in as dealer, /shop	*Now the catalogue is open at this dealer's tier.*
5	Find parts for your vehicle: Toyota Corolla	*Only what fits.*
6	Search W-67/80	*An aftermarket number finds the genuine part.*
7	Open the part	*Brand, OEM number, pack, minimum, fitment, cross references.*
9	/my/orders, an order	*Reorder rebuilds last month's order in one click.*
11	Back office: Parts Catalogue, Oil Filter	*Everything on one tab.*
13	Dealers, Mehmood Auto Store	*One tick approves them, the price list sets their tier.*

PART 10 Questions people ask

Does it need Odoo Enterprise?

No. It runs on Odoo 19 Community with eCommerce.

Can the public see prices?

Not while the dealer only setting is on. They see the landing page.

Can one dealer have several logins?

Yes. Approve the company and every contact under it can sign in.

Can I filter by year?

Models carry a year range, shown in the name. The shop filter picks a model, not a year.

Can staff sell loose quantities?

Yes. Pack rounding applies only to website orders.

Can a dealer see stock?

Low stock shows as a badge; stock figures follow your eCommerce settings.

Credit limits?

The Dealer tab shows Odoo's own Credit Limit next to the approval. Odoo uses it for its usual warnings in Sales; the shop itself does not stop an order over the limit.

PART 11

Menu map

Auto Parts

Parts Catalogue BACK OFFICE	Every product marked as an auto part
Dealers BACK OFFICE	Every contact approved as a dealer
Vehicles > Makes BACK OFFICE	Suzuki, Toyota, Honda and the rest
Vehicles > Models BACK OFFICE	Each model with its years and fitted parts
Brands BACK OFFICE	Genuine, premium, standard, economy
Configuration > Settings BACK OFFICE	Dealer only shop, hot window, cross references

Website

/dealer DEALER SHOP	The public dealer landing, no prices
/shop DEALER SHOP	The trade shop, dealers and staff only
/shop/cart DEALER SHOP	The cart, gated the same way
/my/orders DEALER SHOP	Past orders, each with Reorder

Want this for your parts business?

We load your catalogue with its part numbers, cross references and vehicle fitment, set up your dealer tiers and price lists, open the trade shop on your own website and train your counter and your dealers.
