COMPLETE GUIDE · SETUP, EVERY SCREEN AND EVERY STEP

Car Wash Management for Odoo 19

Bookings from the counter, the phone and your website, a wash menu with prices and times, the board, sale orders and invoices, materials used, technician commission and monthly targets, plus the POS add-on for the till. Shown step by step on a live demo.

BASE | POS ADD-ON

START

About this guide

A car wash sells time on a bay and a person with a hose, priced off a menu. This guide follows one booking from the moment it is made, at the counter, on the phone or on your website, to the invoice, the materials it used and the commission it earned. You do not need to have used Odoo before.

Who it is for

The owner or manager setting the wash up, the receptionist taking bookings, the technician washing the cars, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the demo, then walks every screen with a numbered step for each action.

The live demo

Sparkle Auto Spa, a worked example car wash in Dubai with a full wash menu, seven technicians, three months of bookings, commission and targets already on it.

Two modules, two badges

BASE

Car Wash Management (wt_carwash_management). Bookings, the wash menu, stages, sale orders and invoices, materials, commission, targets, the website booking pages and the customer portal.

POS ADD-ON

POS Car Wash (wt_car_wash_pos). Installs on top of the base and Odoo Point of Sale. A car wash screen inside the till: today's bookings, book or take a walk-in, load a booking onto the order, pay, and the booking closes itself.

HOW IT WORKS

The demo car wash

Address	**carwash-app.way4tech.com**
Sign in	**w4demo / Demo2026**
Business	Sparkle Auto Spa, Dubai · prices in AED with 5% VAT
Installed	Car Wash Management and POS Car Wash, on Odoo 19 Community

The demo is shared and resets from time to time, so anything you change may be changed back or seen by the next visitor. No till has been set up on the demo, so the POS screens are described rather than shown.

What is in the guide

PART 1	How a car wash booking runs	PART 2	Sign in and set up
PART 3	Take a booking	PART 4	Wash it, finish it, bill it
PART 5	Online booking and the customer portal	PART 6	Commission and sales targets
PART 7	Customers	PART 8	The till: POS Car Wash
PART 9	A 15 minute demo	PART 10	Questions people ask
PART 11	Menu map		

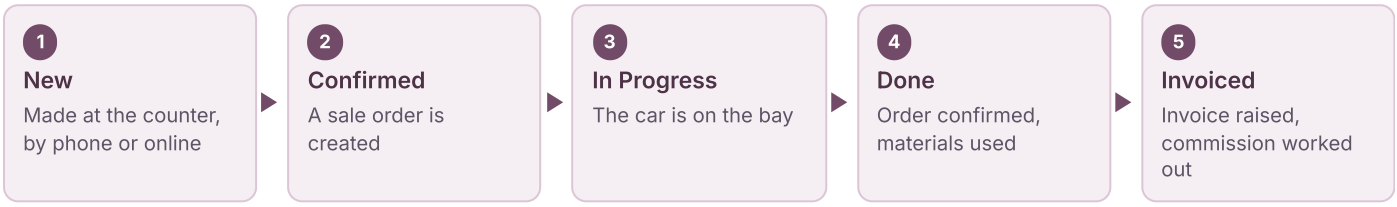

PART 1 How a car wash booking runs

Every booking is one record that moves through six stages. Knowing the stages, and what each button does to the money behind them, is most of the system.

IN THIS PART YOU WILL LEARN

- The six stages of a booking and what moves it
- Where the sale order, the invoice and the commission come from
- The four ways a booking arrives
- The three roles and what each sees

The life of a booking BASE

A sixth stage, **Cancelled**, takes a booking off the board and cancels its draft sale order. Stages are records you can rename, reorder and fold under Configuration, but the buttons look for the six stages the module installs.

BUTTON	MOVES TO	WHAT ELSE HAPPENS
Confirm	Confirmed	A sale order is created from the service lines, one order line per service with a product
Start Service	In Progress	Nothing else; the technician has started
Mark Done	Done	A draft sale order is confirmed, and the bill of materials of each service is taken out of stock
Invoice	Invoiced	A customer invoice is created straight from the lines, and commission lines are worked out
Invoice (Custom)	Invoiced	A wizard to change the lines, date and terms first, or to invoice through the confirmed sale order
Cancel	Cancelled	A draft sale order is cancelled too
Reset to New	New	Back to the first stage

Where a booking comes from BASE

Each booking records its **Booking Source**: *Walk-in*, *Phone*, *Online Portal* (made on the website) or *Staff Booking*. The POS add-on books walk-ins from the till as well.

Who sees what BASE

ROLE	SEES AND DOES
Technician	The CarWash app and the appointments they lead or have a service line on. Their own commission and targets.
Receptionist	Every booking, the services menu, invoicing.
Manager	Everything: staff, commission rules and earnings, targets, settings, stages and categories.

The menus

Appointments

All Appointments BASE	Every booking: list, kanban, calendar, activity
Today BASE	Today's bookings
Calendar BASE	Bookings on the calendar, coloured by technician
Kanban Board BASE	Bookings as cards by stage

Services

Services BASE	The wash menu: price, time, product, materials
Categories BASE	Exterior, interior, detailing and the rest

Staff

Technicians BASE	The wash team (employees)
Commission Rules BASE	Percent or fixed per technician and service
Commission Earnings BASE	One line per service done, draft to paid
Sales Targets BASE	A monthly figure per technician, with a bonus

Configuration

Settings BASE	Online booking hours and slot length
Appointment Stages BASE	New to Invoiced, with legends
Service Categories BASE	The same list as under Services

Website

Our Services (/carwash) BASE	The public wash menu
Book Appointment (/carwash/book) BASE	The public booking form
My Account (/my/carwash-appointments) BASE	A customer's own bookings

Point of Sale

Car Wash button POS ADD-ON	Opens the car wash screen inside the till
Car Wash screen POS ADD-ON	Today's bookings, book, walk-in, pay
Orders POS ADD-ON	POS orders with booking, technician and service

PART 2 Sign in and set up

BASE

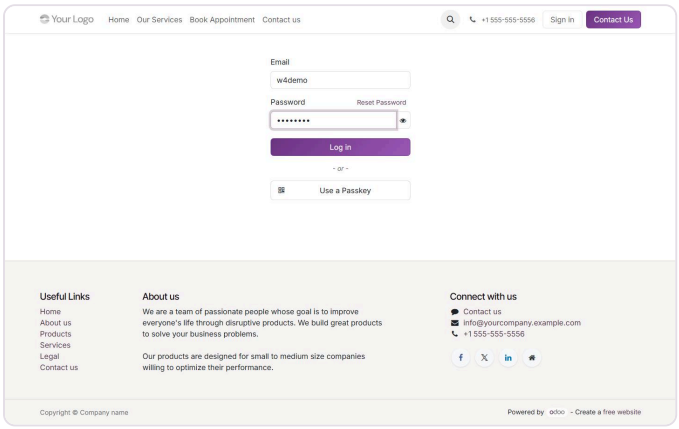

Install the module, set the booking hours, build the wash menu and name the team. On the demo it is all done; this part shows where each piece lives.

IN THIS PART YOU WILL LEARN

- What installing the module brings with it
- The three online booking settings
- Services: product, price, time, technicians and materials
- Categories, stages and technicians

TRY IT YOURSELF ON THE DEMO

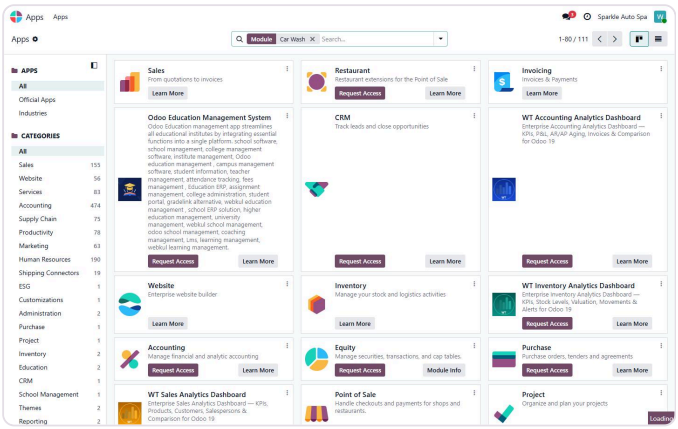

1. Sign in to carwash-app.way4tech.com as w4demo / Demo2026
2. Open CarWash > Services > Services and open the Platinum Package
3. Look at its price, its time and who may do it

1 BASE

Sign in

Open **carwash-app.way4tech.com/web/login** and sign in with `w4demo` and `Demo2026`. Open the **CarWash** app.

2 BASE POS ADD-ON

The modules

Car Wash Management needs Sales, Invoicing, Inventory, Manufacturing (for the bill of materials), Employees, Website and the portal, and installs them. POS Car Wash adds Point of Sale on top.

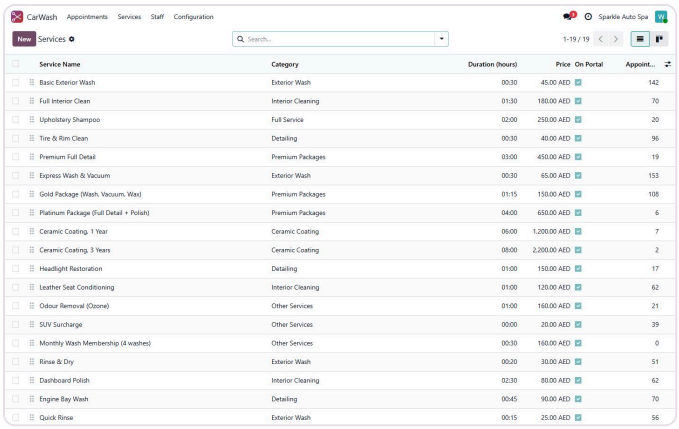

The base runs without the POS add-on. Install the add-on only if you take payment at a till.

Online booking settings BASE

CarWash > Configuration > Settings, block **Online Booking**. Three numbers decide the time slots the public booking form offers:

SETTING	WHAT IT DOES	DEFAULT
Booking Start Hour	The first slot of the day (0 to 23)	9
Booking End Hour	The last slot of the day	19
Slot Interval (minutes)	The gap between slots	30

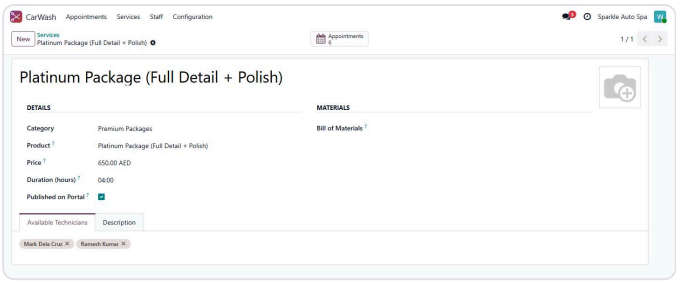

The wash menu: services BASE

3 BASE

Services

CarWash > Services > Services. The module installs eighteen services in seven categories; the demo has its own menu from a quick rinse to a three year ceramic coating. List and kanban views.

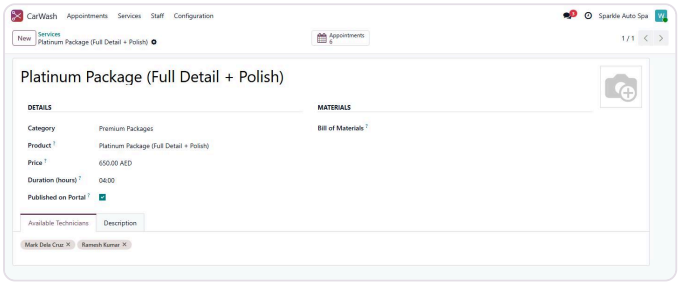

4 BASE

A service

Each service has a name, a category, a **Product** (a service product, required; it is what goes on the sale order and the invoice), a **Price** (the product's sales price, editable here), a **Duration** in hours, a photo, a description, **Published on Portal**, and an optional **Bill of Materials**: the shampoo, wax or coating used each time.

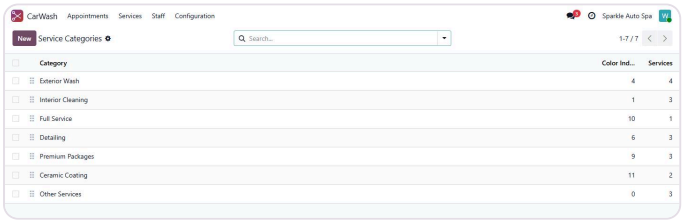

The Appointments button on the service opens every booking that used it.

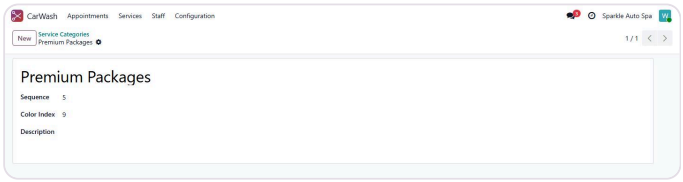

5 BASE

Who may do it

The **Available Technicians** tab limits a service to the people trained for it. Leave it empty and anybody can. On a booking line, the lead technician fills in only if they are allowed on it.

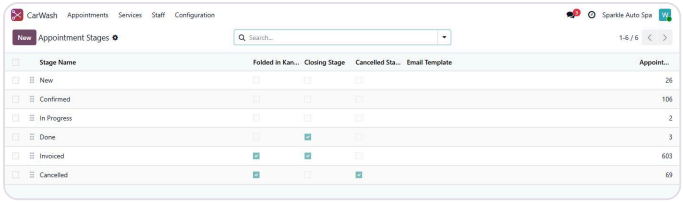

BASE **Categories.** Exterior, interior, full service, detailing, packages, ceramic and other.

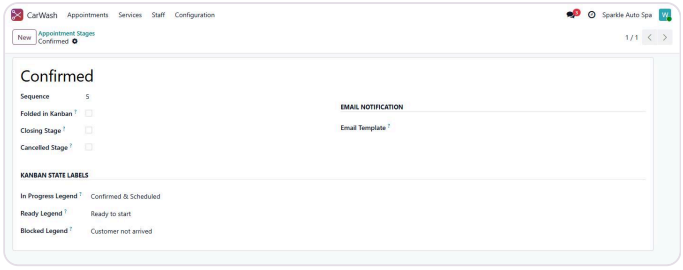

BASE **A category** with its services and colour.

Stages BASE

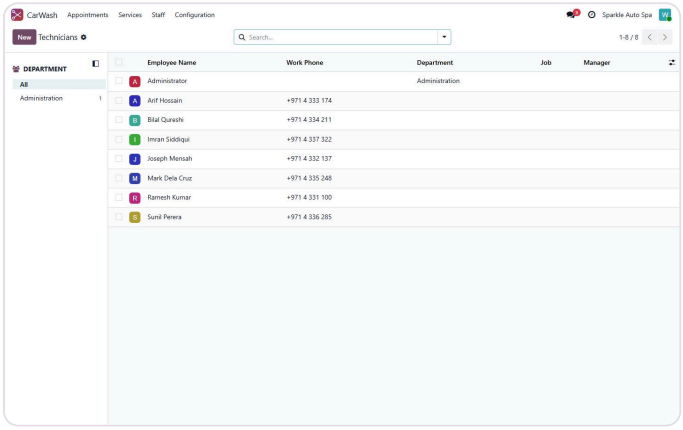

BASE **Appointment Stages.** The six stages in order.

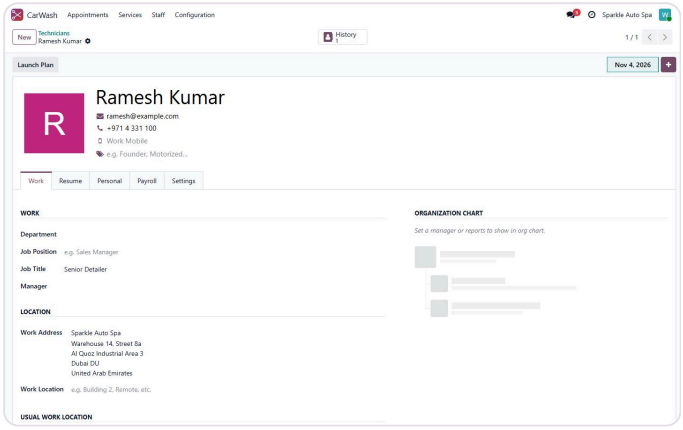

BASE **A stage.** Folded in kanban, closing or cancelled stage, the three kanban legends and an email template field.

> A stage carries an **Email Template** field described as sent when a booking enters the stage. In this version nothing sends it; the only automatic email is the confirmation sent after an online booking.

Technicians BASE

BASE **Staff > Technicians.** The wash team, which are standard Odoo employees.

BASE **A technician** is an employee record; link a user to let them see their own work.

PART 3 Take a booking

BASE

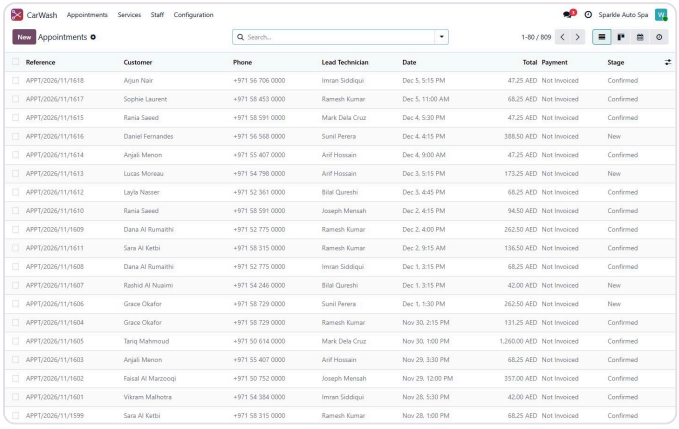

At the counter or on the phone, a booking is a customer, a time and the services they want. The duration, end time and price add themselves up.

IN THIS PART YOU WILL LEARN

- Every field on the booking form
- Service lines: technician, quantity, price, discount and tax
- How duration, end time and the totals are worked out
- The four ways to see the bookings

TRY IT YOURSELF ON THE DEMO

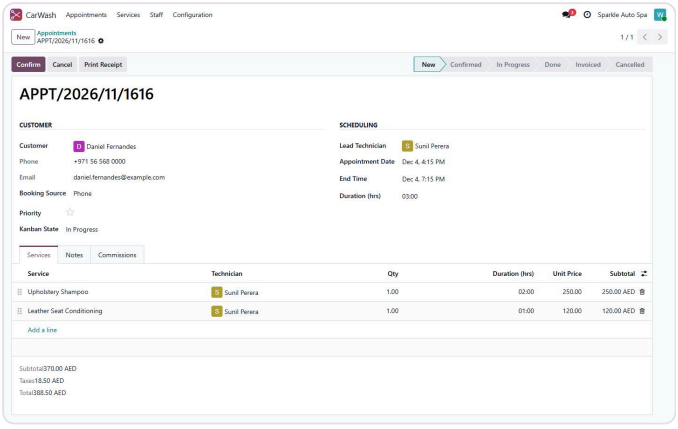

1. Open CarWash > Appointments > All Appointments
2. Switch to the calendar and then the kanban
3. Open APPT/2026/11/1616, a new booking

1 BASE

All appointments

Appointments > All Appointments lists every booking with its reference, customer, date, lead technician, source, stage, payment status and total. It also has kanban, calendar and activity views.

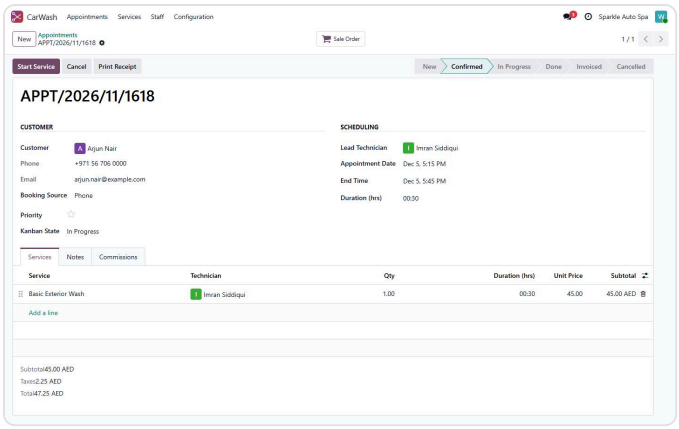

2 BASE

A new booking

Press New. Pick the **Customer** (phone and email show from the contact), the **Appointment Date**, the **Lead Technician** and the **Booking Source**. Set a priority star if it is urgent. The reference APPT/year/month/number is given on save.

Choosing a technician colours the booking on the calendar, one colour per person.

3 BASE

Add the services

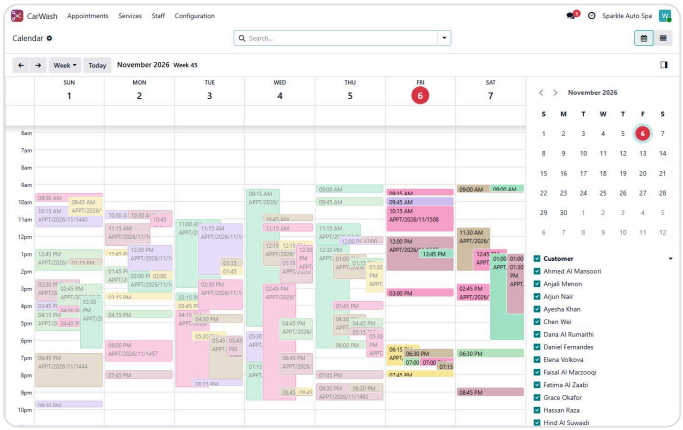

On the **Services** tab, add a line per service. The unit price comes from the service and the tax from its product. Set a technician per line if different people do different parts, a quantity, a discount and a note.

Duration is the sum of each service's time times its quantity; the end time is the start plus the duration.

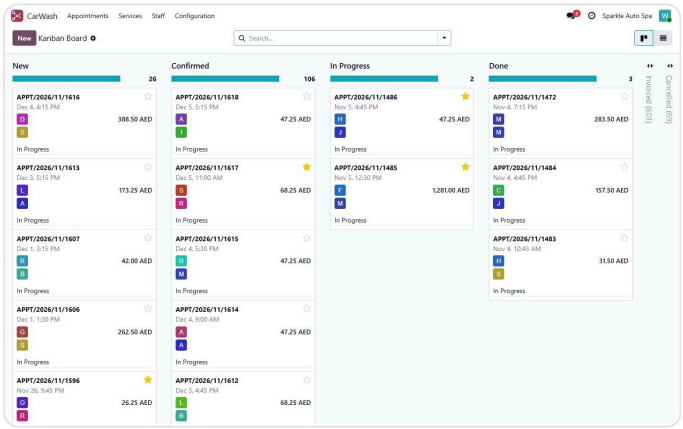

HOW IT WORKS

How the totals are worked out

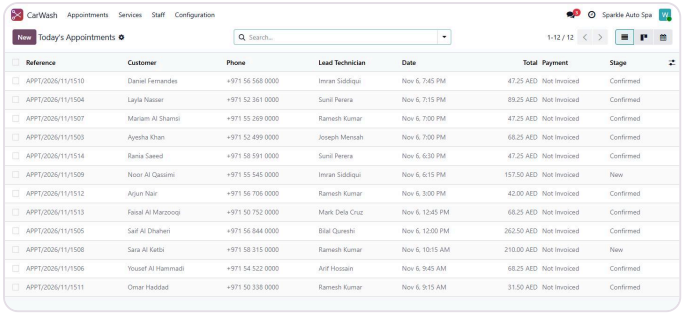

Line subtotal	unit price less the discount, times the quantity
Taxes	each line through its taxes, on the discounted price
Total	**subtotal plus taxes**

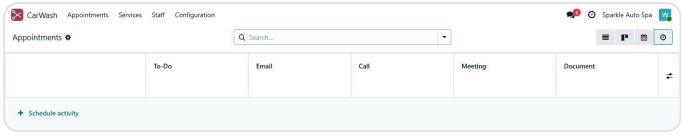

BASE **Calendar.** Bookings by day or week, coloured by technician.

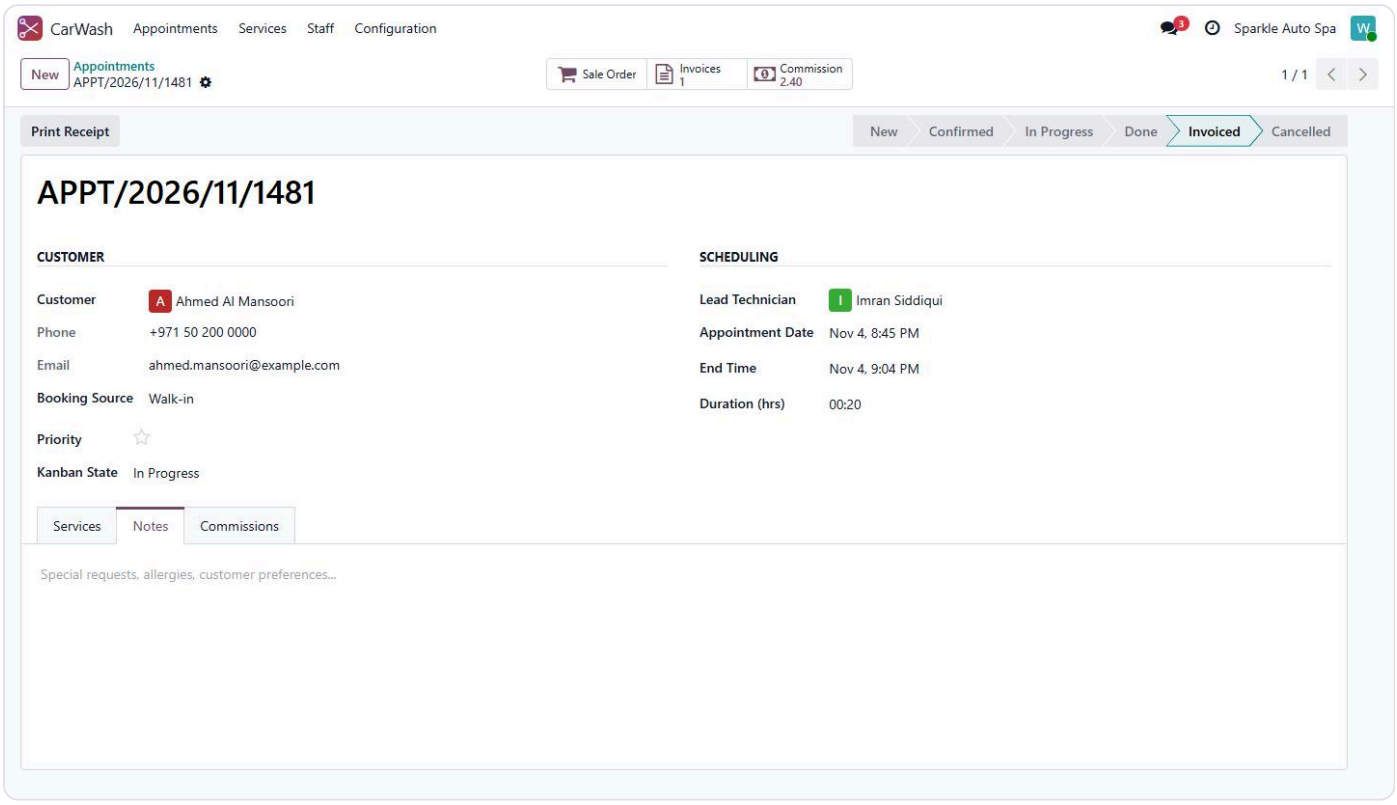

BASE **Kanban Board.** Bookings as cards in their stage columns.

BASE **Today.** Only today's bookings, the list the counter works from.

BASE **Activity view.** Calls and to-dos planned on bookings.

BASE **The Notes tab.** Special requests and notes, kept on the booking.

PART 4 Wash it, finish it, bill it

BASE

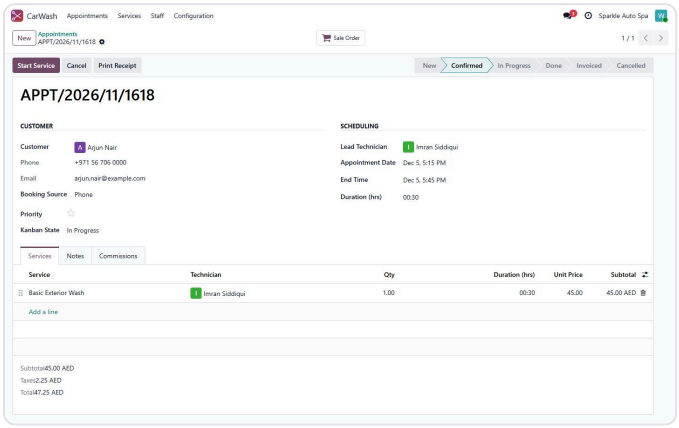

Three buttons take a confirmed booking to an invoice, with the sale order, the stock and the commission following behind.

IN THIS PART YOU WILL LEARN

- Confirm and the sale order it creates
- Start Service and Mark Done, and the materials taken out of stock
- Invoice and Invoice (Custom)
- Payment status, the receipt and the appointment sheet

TRY IT YOURSELF ON THE DEMO

1. Open APPT/2026/11/1486, in progress
2. Open APPT/2026/11/1472, done, and look at the sale order button
3. Open APPT/2026/11/1481, invoiced, and open its invoice

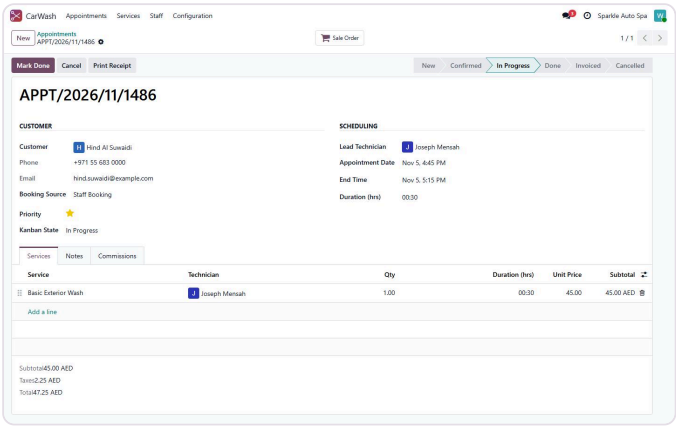

1 BASE

Confirm

Confirm moves the booking to Confirmed and creates a quotation for the customer with one line per service (product, quantity, price, discount, taxes). A **Sale Order** smart button appears.

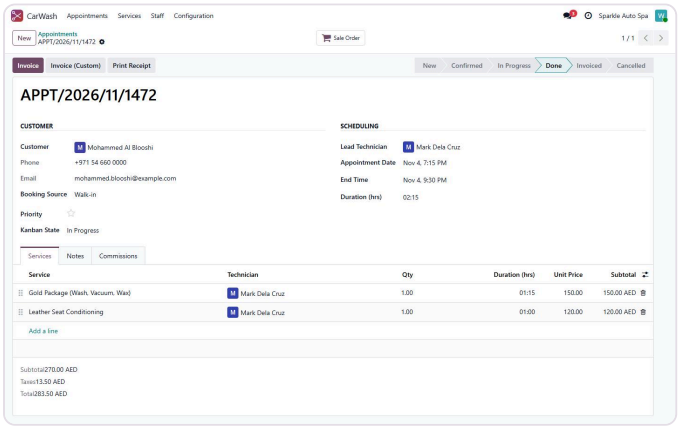

Services without a product are left off the order.

2 BASE

Start the wash

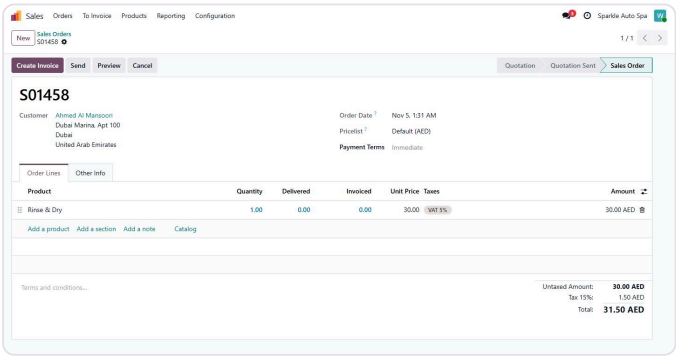

Start Service moves it to In Progress when the car is on the bay.

3 BASE

Mark it done

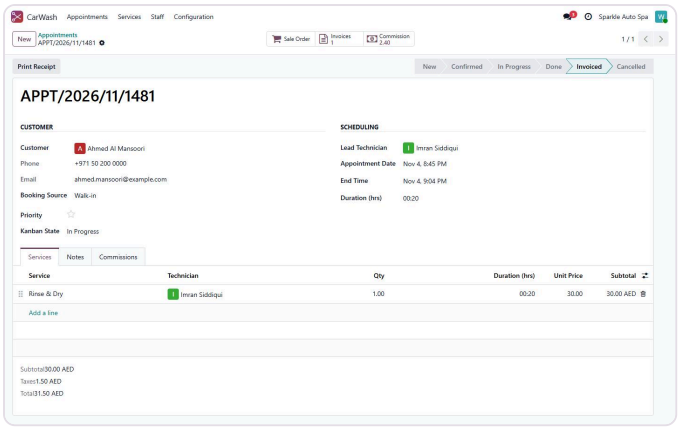

Mark Done moves it to Done, confirms the quotation, and for each service with a bill of materials takes the components out of the main warehouse stock into production, times the quantity.

4 BASE

The sale order

The confirmed sale order is a normal Odoo order with the booking reference as its source.

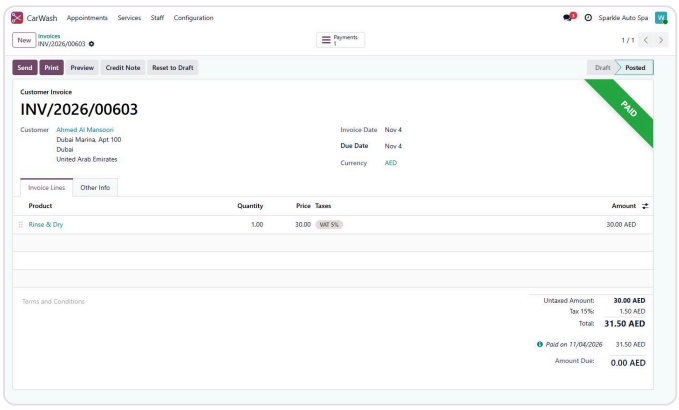

5 BASE

Invoice

Invoice creates a customer invoice from the service lines dated today, links it, moves the booking to **Invoiced** and works out the commission. If a posted invoice already exists, it opens that instead.

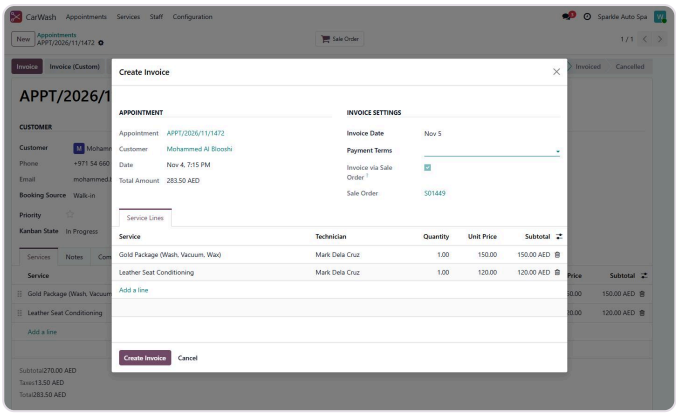

Payment shows Not Invoiced, Unpaid, Partial or Paid from the posted invoices.

7 BASE

The invoice

A standard customer invoice with the booking reference as its origin. Post it and register the payment the usual Odoo way.

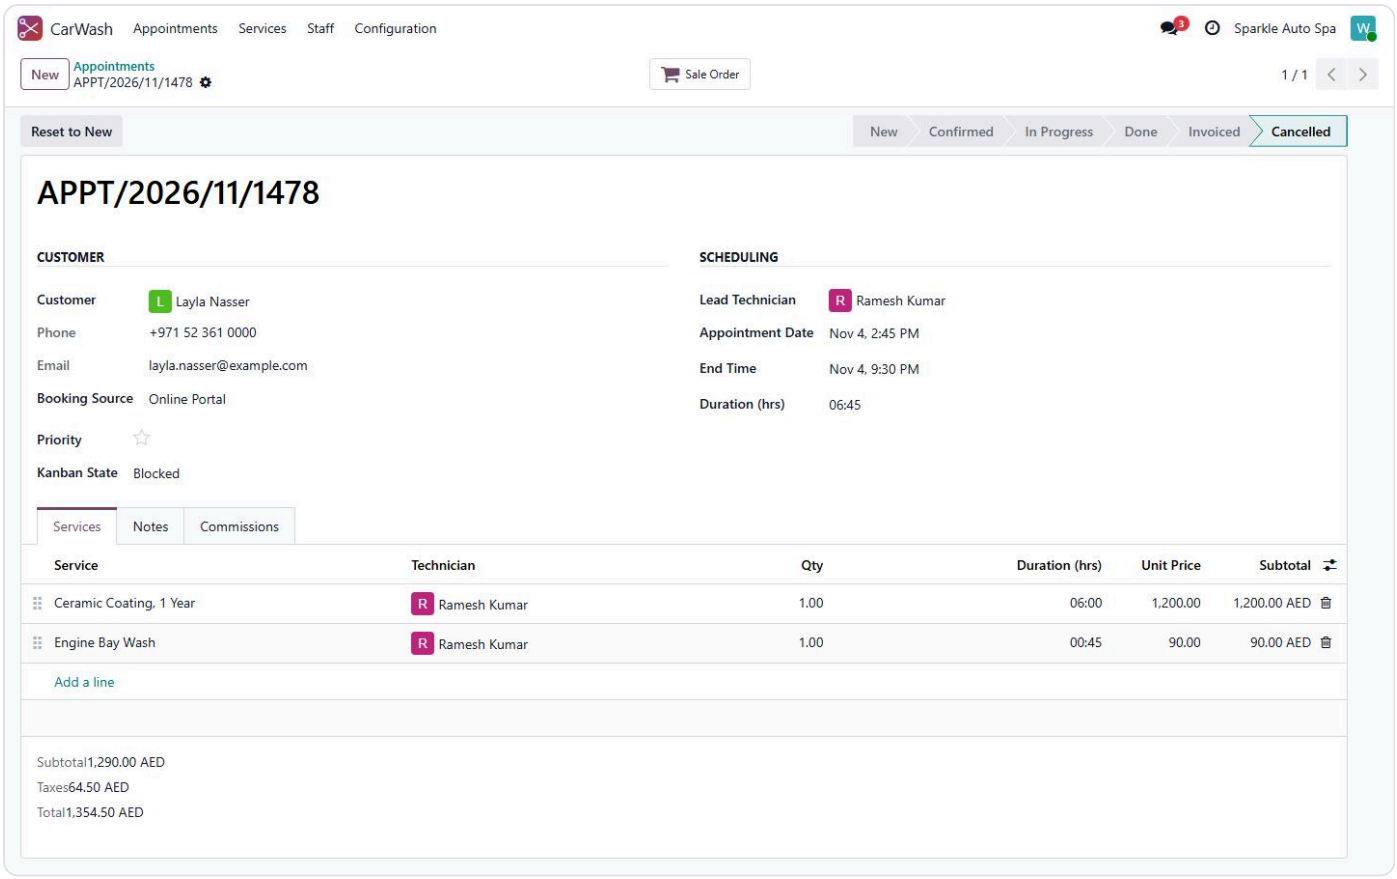

6 BASE

Invoice (Custom)

Invoice (Custom) opens a wizard with the lines, the invoice date and payment terms. If the sale order is confirmed it invoices through the order; otherwise it builds the invoice from the wizard lines, which you can change first.

Cancel and reset BASE

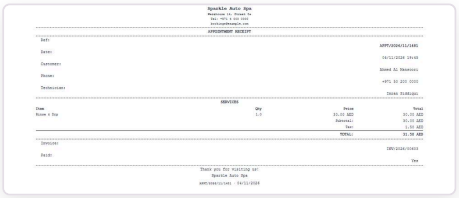

BASE **A cancelled booking.** Cancel also cancels a draft sale order. Reset to New brings a booking back to the first stage.

Printed documents BASE

BASE **Appointment Sheet** (Print menu): customer, time, technician, services and totals.

BASE **Print Receipt**: an 80 mm thermal receipt for the customer.

PART 5 Online booking and the customer portal

BASE

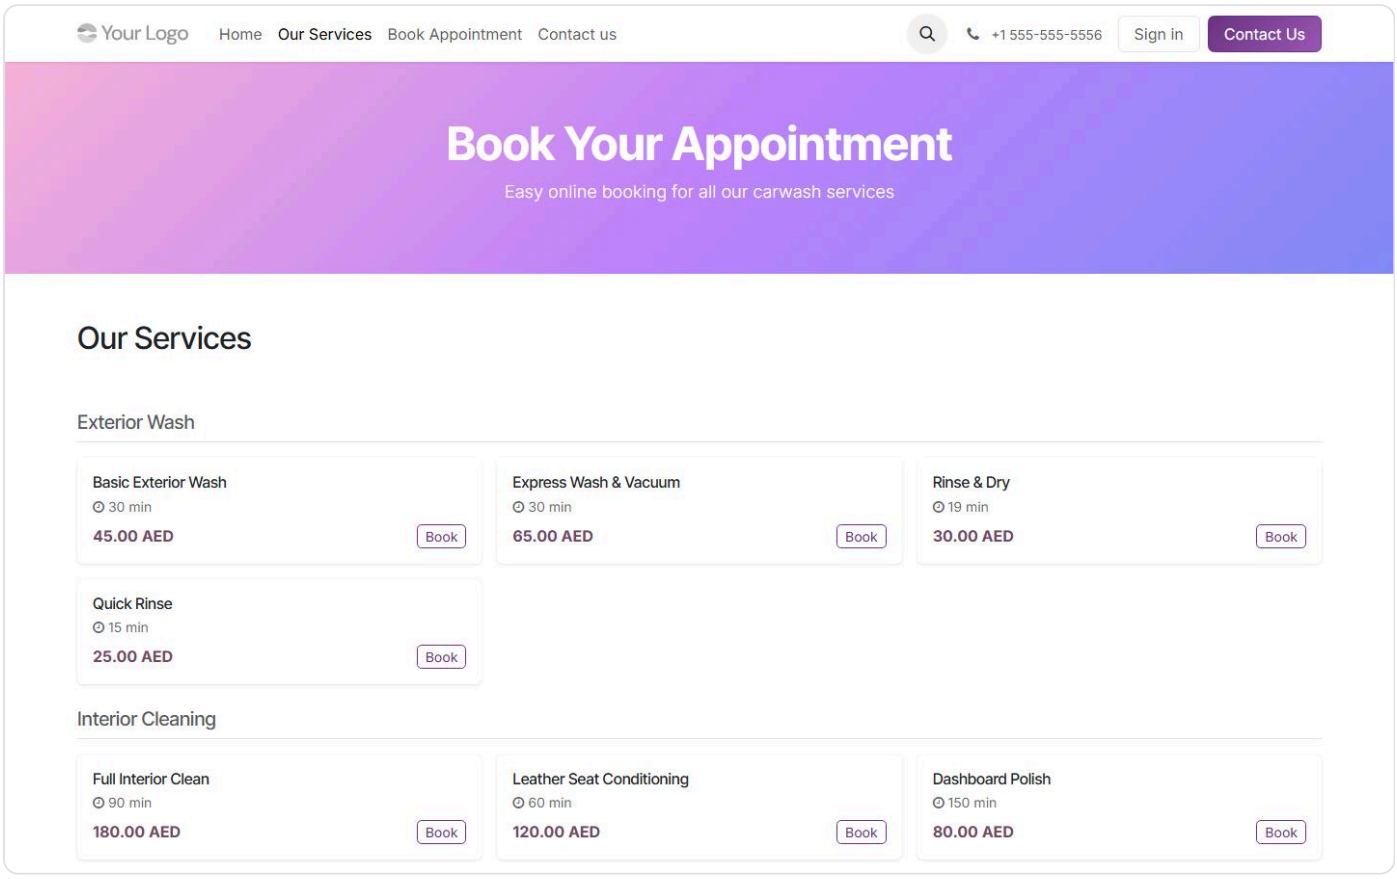

Customers book on your website, and see their own bookings under My Account. The pages are standard Odoo website pages in your own theme.

IN THIS PART YOU WILL LEARN

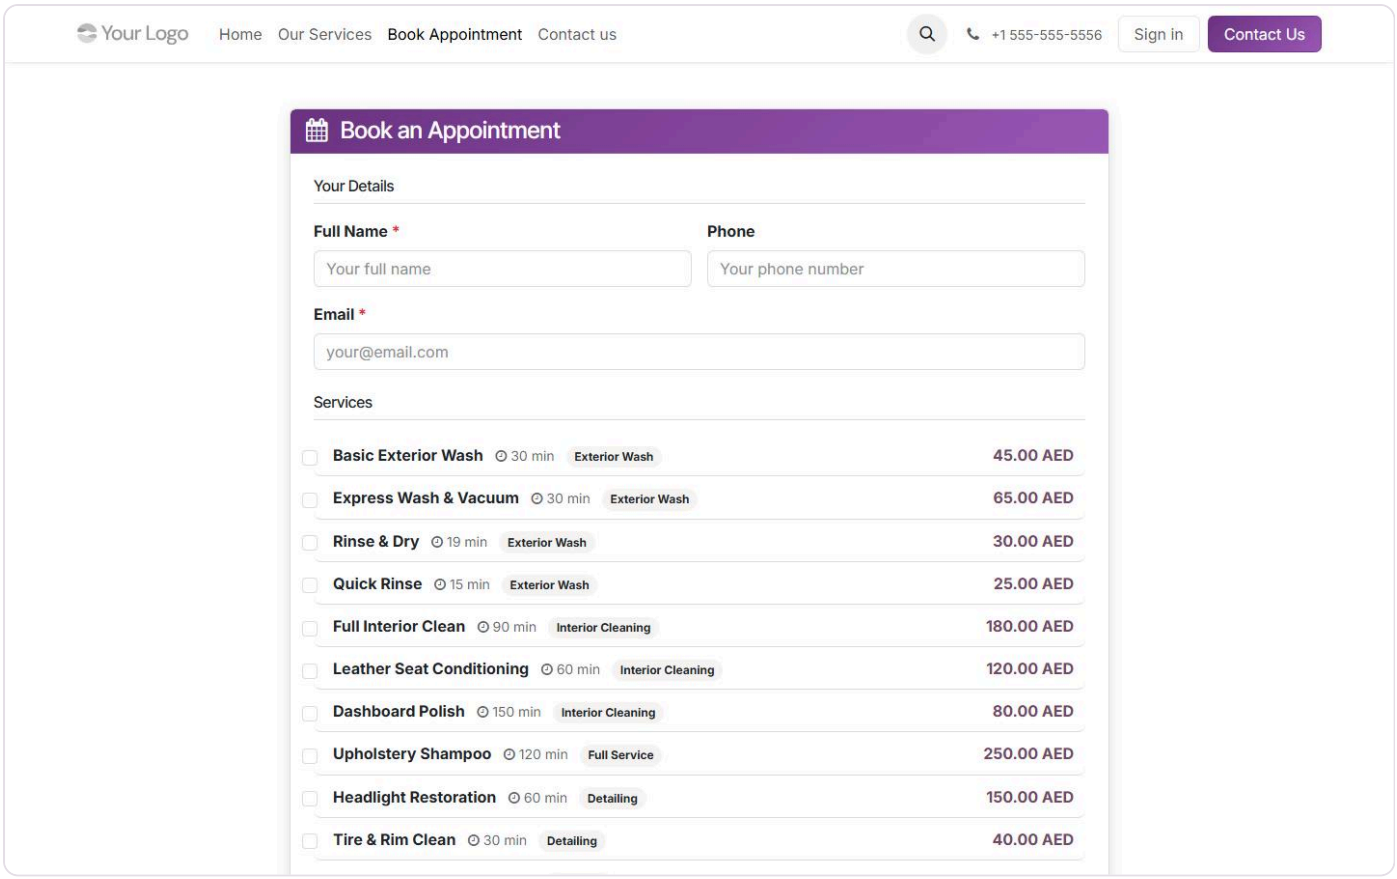

- The public services page and the booking form
- What the form checks before it books
- What happens after the customer presses Book
- The customer's own bookings in the portal

TRY IT YOURSELF ON THE DEMO

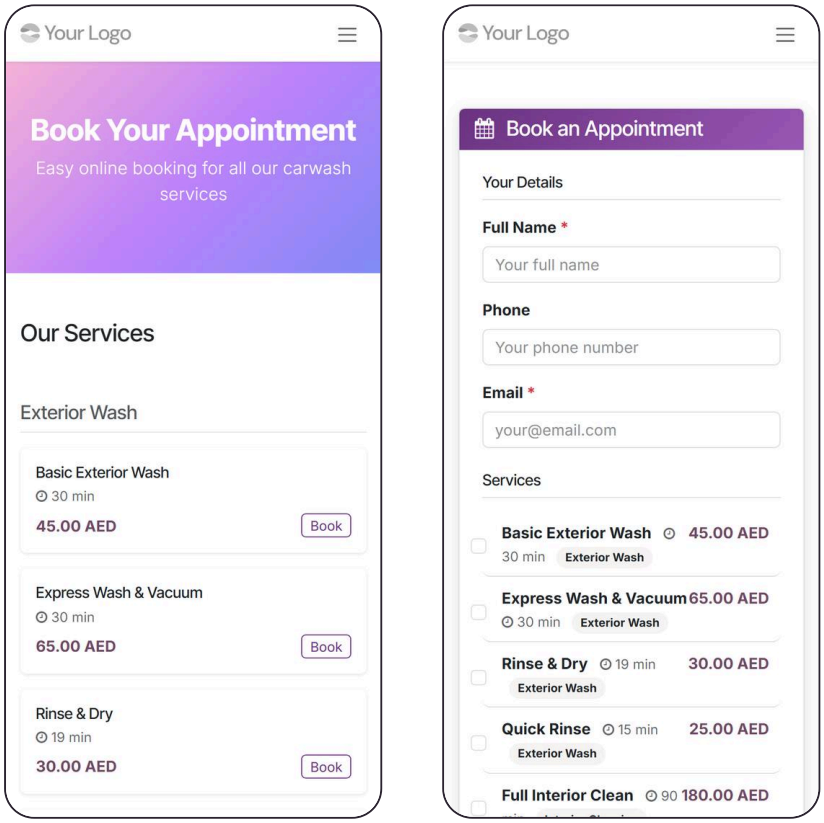

1. Open carwash-app.way4tech.com/carwash in a private window
2. Open Book Appointment and look at the time slots
3. Do not submit the form on the demo

BASE **Our Services (/carwash).** Every published service, by category, with its price and time and a Book button.

BASE **Book Appointment (/carwash/book).** Name, email, phone, the services, a technician if they have one in mind, the date, a time slot and notes. Signed in customers find their details filled in.

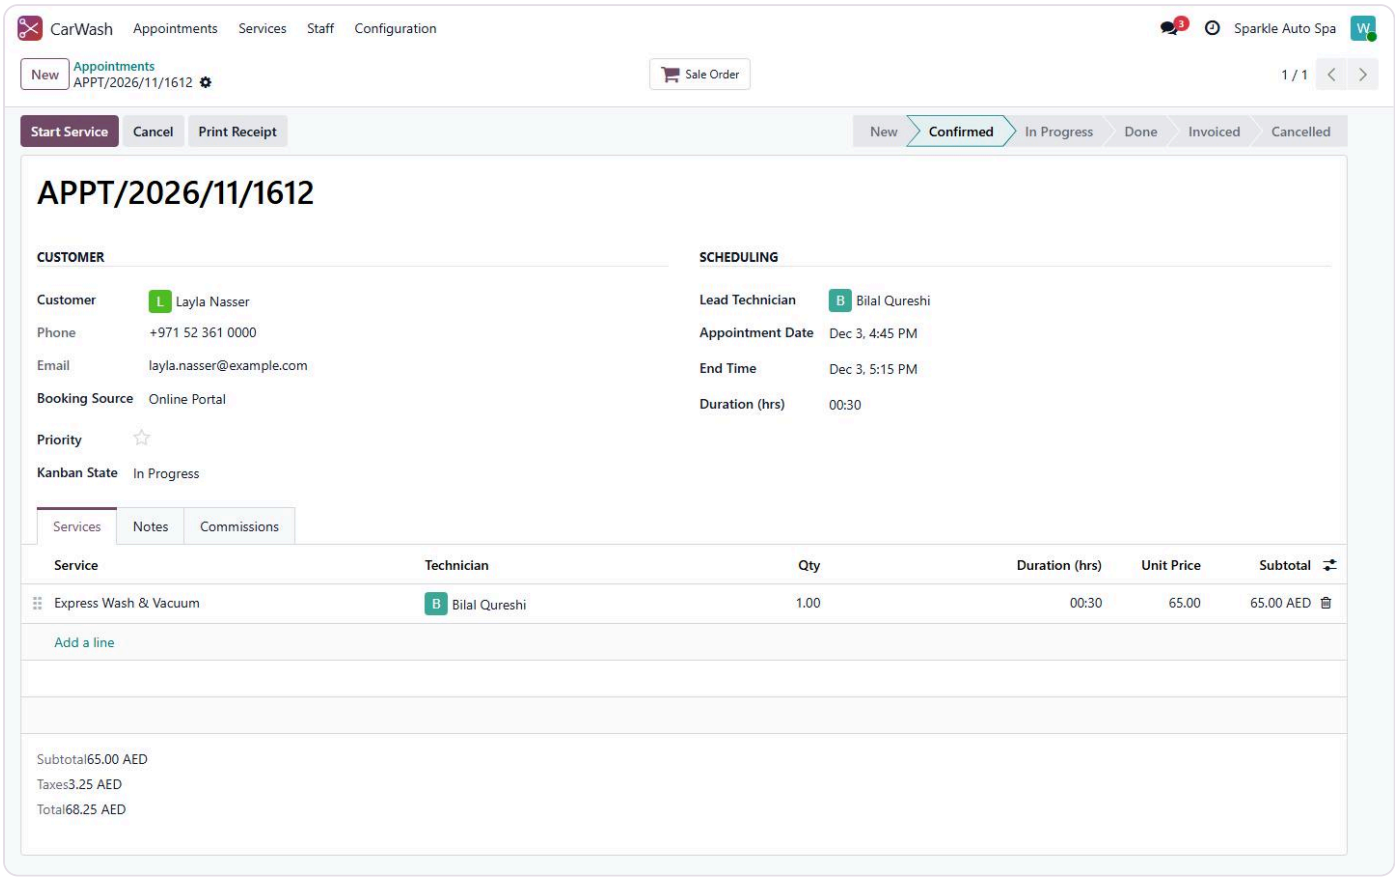

The same two pages on a phone.

When the customer presses Book BASE

1. Name, email, date and time are required, and at least one service.
2. The customer is found by email, or created as a new contact.

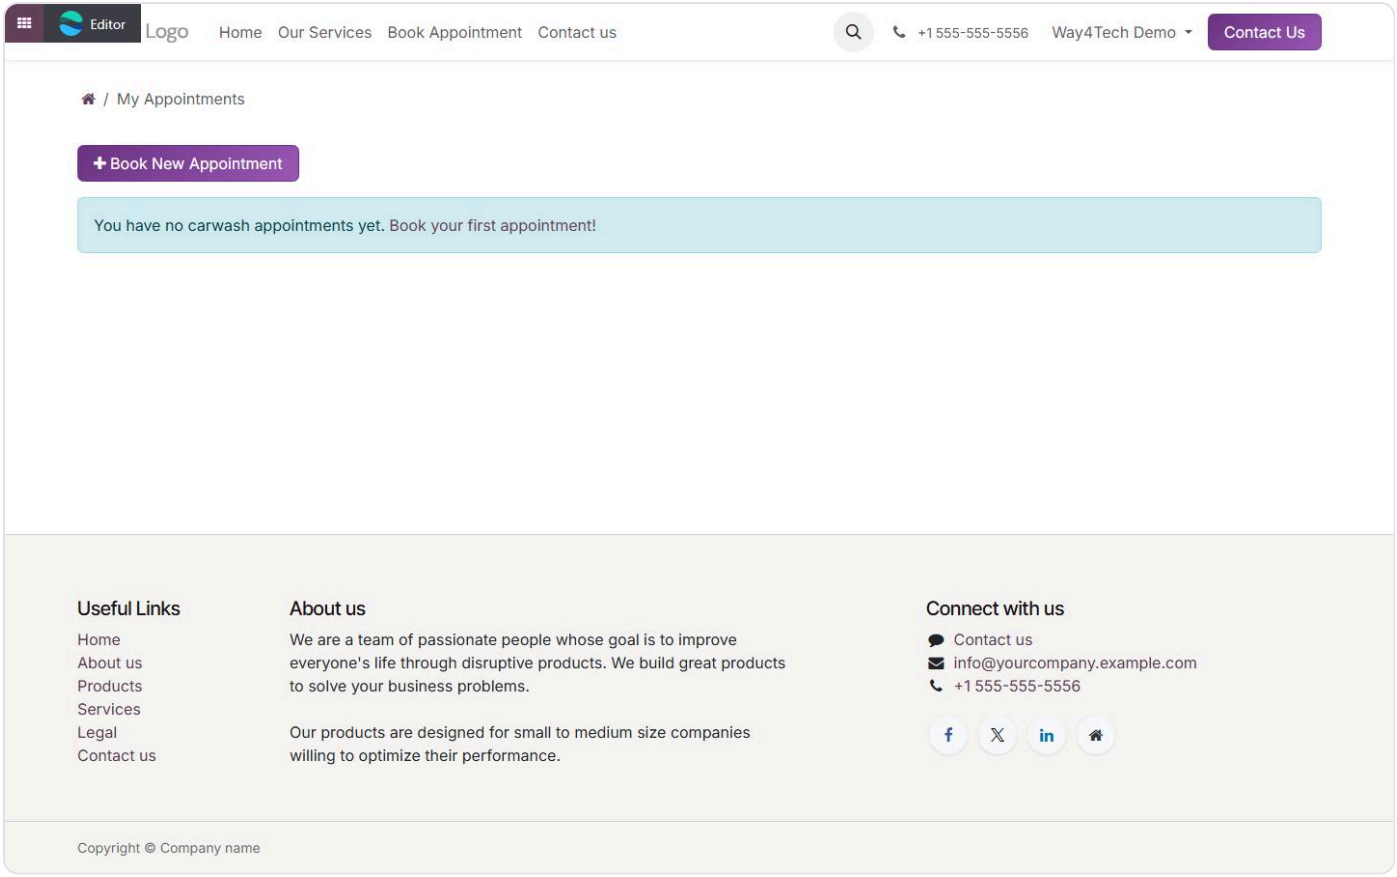

3. If a technician was chosen, the booking is refused when they already have a booking or a blocked period (a break, holiday or training) overlapping the time, with a message to pick another time.
4. The booking is created with source *Online Portal* at each service's price, and the *Booking Confirmation* email goes to the customer at once.
5. A confirmation page shows the reference.

BASE **A booking that came from the website.** Source Online Portal; the reception confirms it from here.

My Account BASE

Once a signed in customer has bookings, a **Car Wash Appointments** entry with a count appears on /my. The list at /my/carwash-appointments sorts by newest, reference, stage or total, and each booking opens a detail page with its services, time and total. A booking can also be opened from a shared link with its access token.

BASE **/my/carwash-appointments.** Shown here for the demo user, who has no bookings of their own, with the Book New Appointment button.

PART 6 Commission and sales targets

BASE

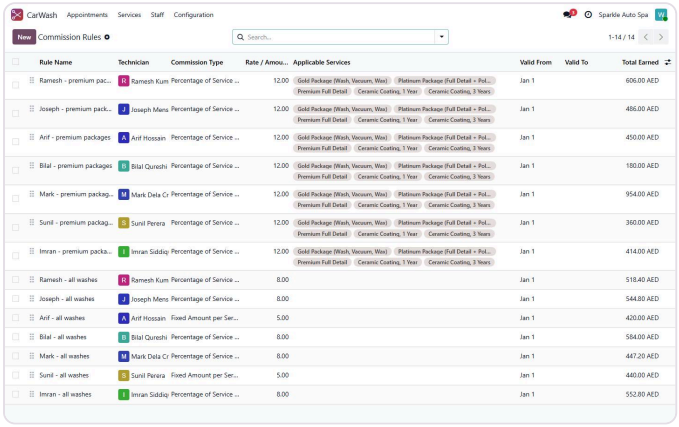

Technicians are paid on what they wash. A rule says how, a line records each service's commission, and a target tracks the month.

IN THIS PART YOU WILL LEARN

- Commission rules: percent or fixed, all services or some
- When commission lines are made, and their three states
- Sales targets, achievement and the bonus

TRY IT YOURSELF ON THE DEMO

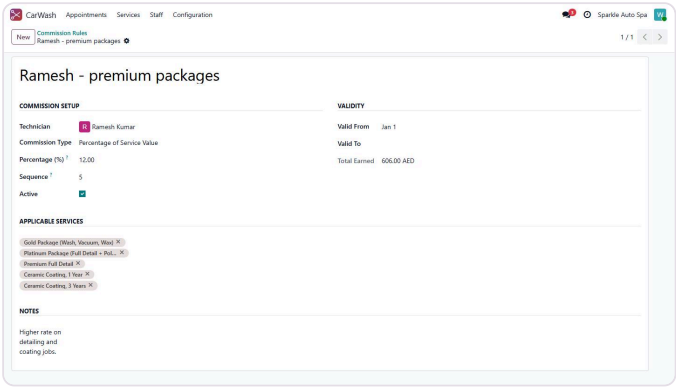

1. Open Staff > Commission Rules and compare a premium rule with an all washes rule
2. Open Staff > Commission Earnings
3. Open Staff > Sales Targets and open an October target

1 BASE

Commission rules

Staff > Commission Rules. Each rule names a technician, a type (*Percentage of Service Value* or *Fixed Amount per Service*), the rate or amount, and the services it covers (empty means all). Lower sequence rules are tried first.

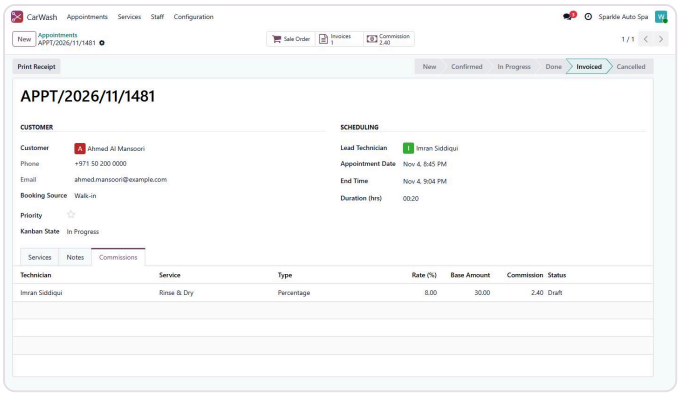

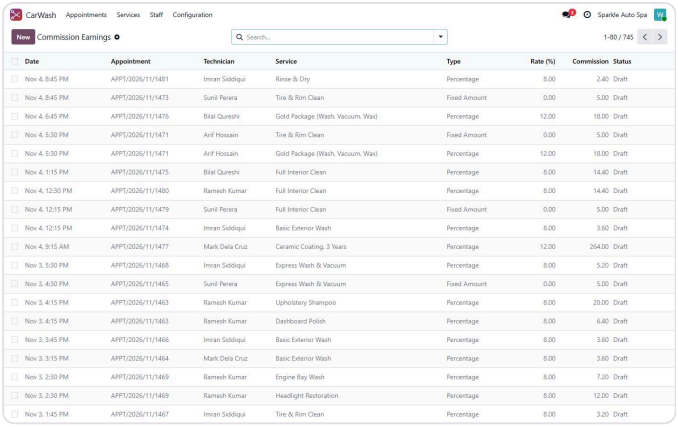

2 BASE

A rule

The rule shows the **Total Earned** from its confirmed and paid lines. The Valid From and Valid To dates are kept on the rule for reference.

Put the specific rule (premium packages) above the general one (all washes), because the first match wins.

3 BASE

Lines on the booking

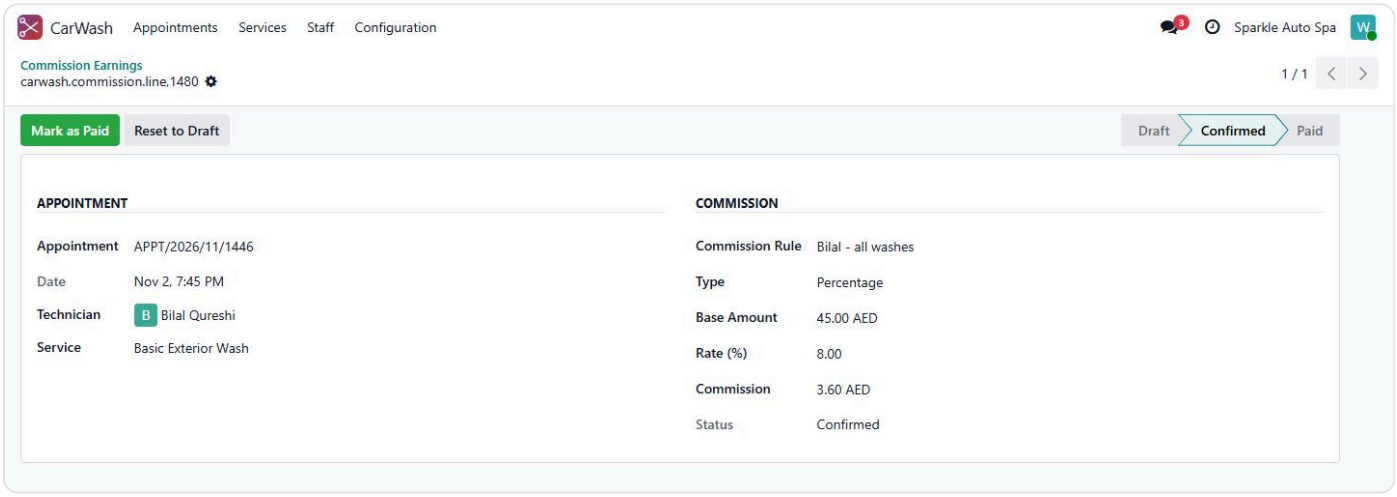

When a booking is invoiced, each service line with a value gets one commission line for its technician (or the lead technician) from the first matching rule: the base amount, the rate and the commission. The **Commissions** tab and smart button show them.

Invoicing again replaces the draft lines, never confirmed or paid ones.

4 BASE

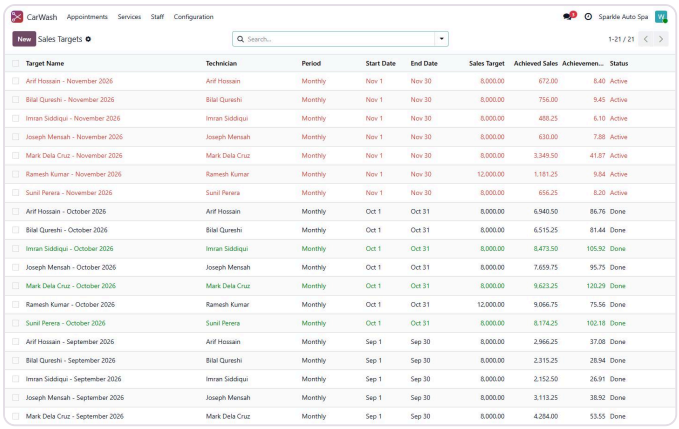

Commission earnings

Staff > Commission Earnings lists every line by booking and technician. **Confirm**, then **Mark as Paid**; **Reset to Draft** is there for anything not yet paid.

BASE **A commission line.** Booking, service line, technician, rule, base, type, rate, commission and date.

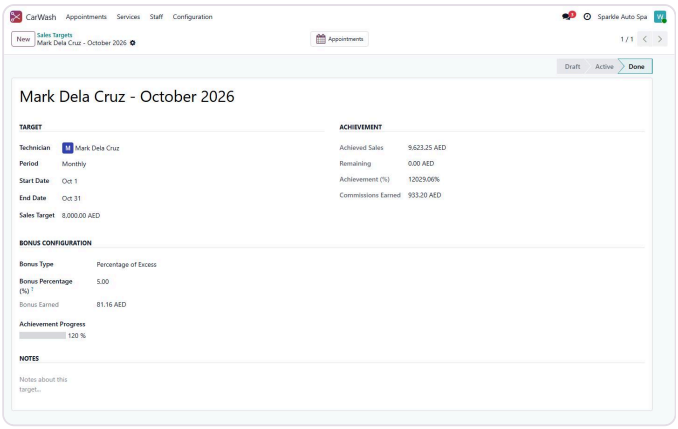

Sales targets BASE

5 BASE

Targets

Staff > Sales Targets. One target per technician per period (monthly, quarterly, yearly or custom) with the figure to reach and a bonus type: none, a percentage of the sales above target, or a fixed bonus on reaching it.

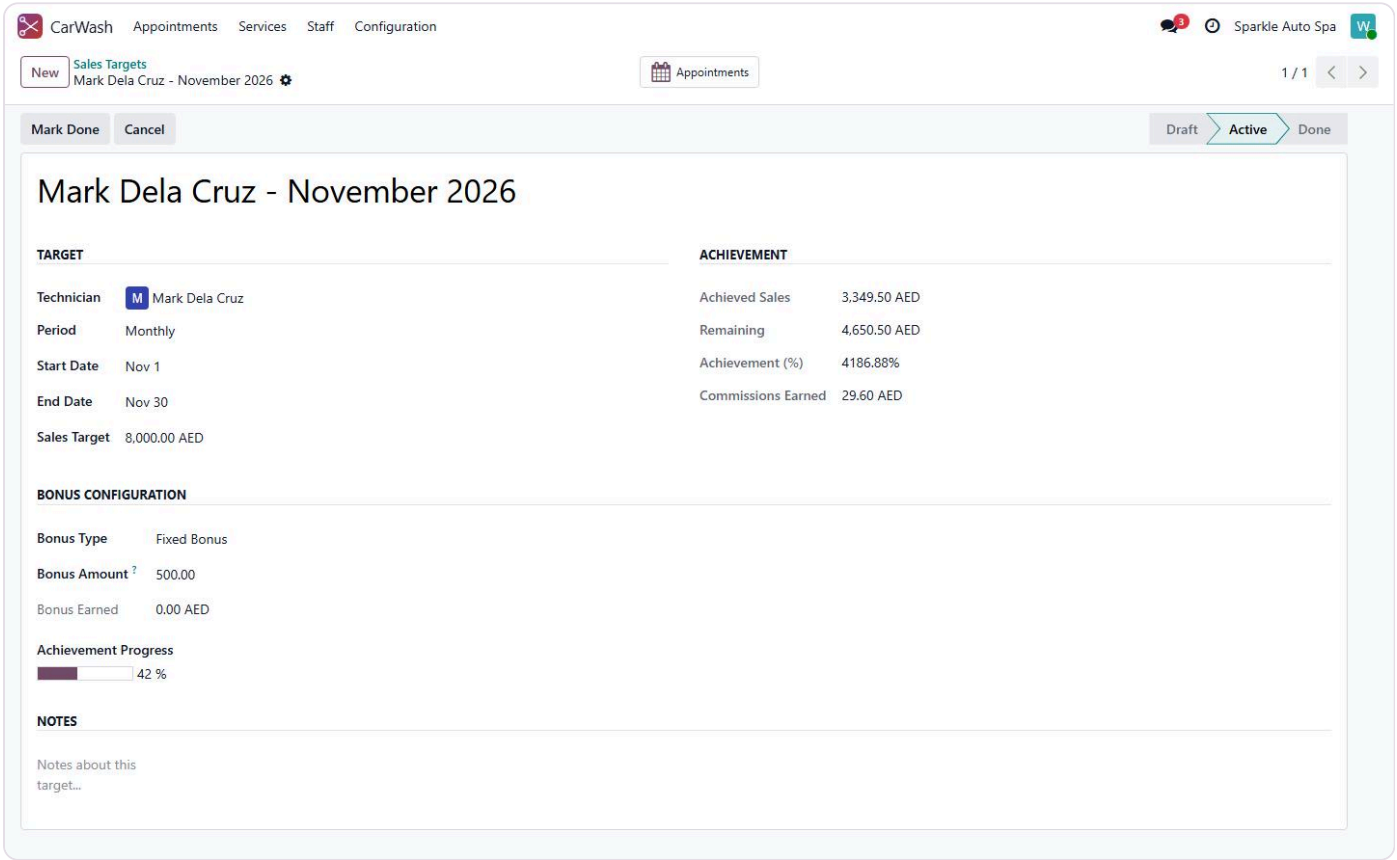

6 BASE

Achievement

Achieved Sales adds up the total of the technician's invoiced bookings in the period. The target shows the achievement, what remains, the bonus earned and the confirmed commission in the same period. **Activate**, **Mark Done**, **Cancel** and **Reset to Draft** move it on.

The appointments button opens the bookings behind the figure.

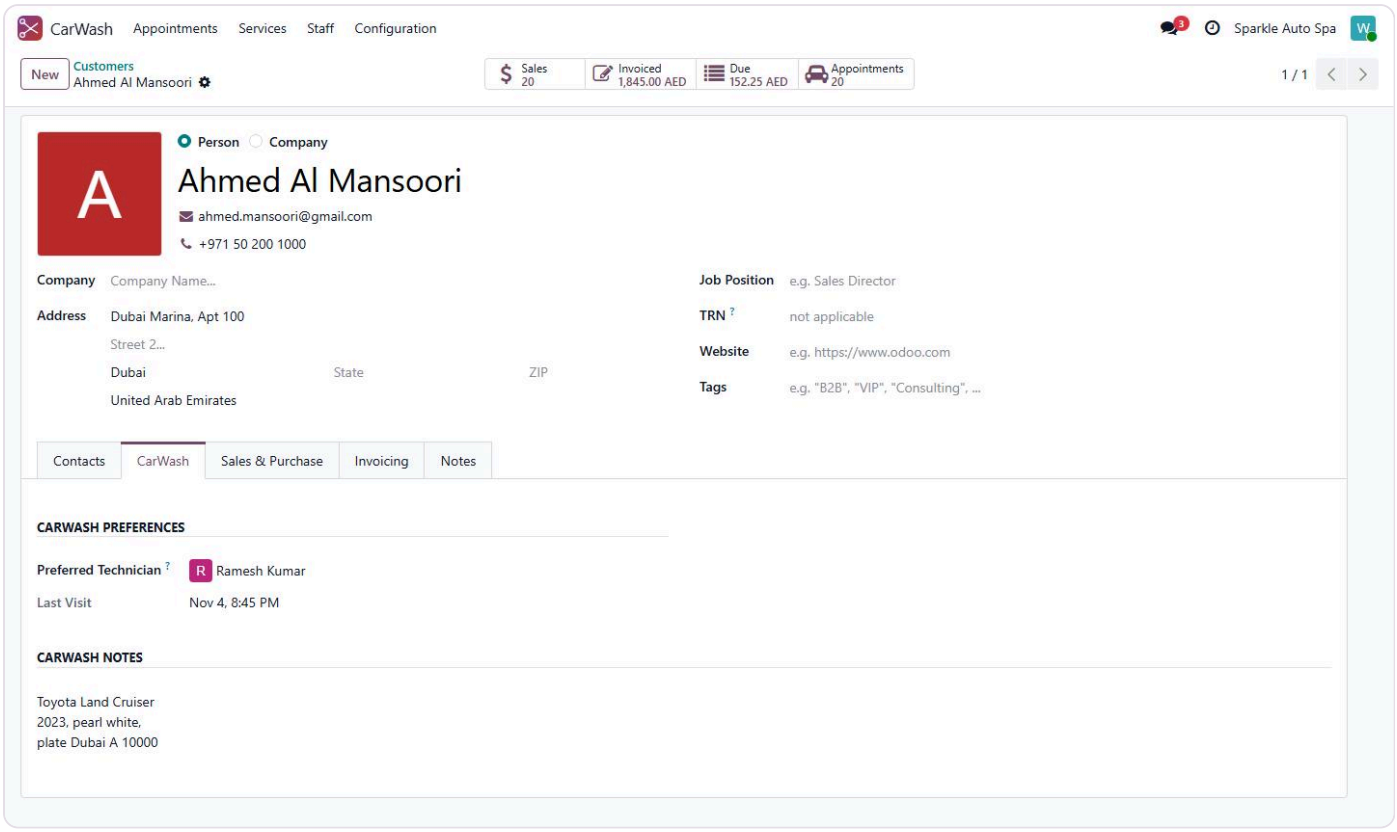

BASE **A running target** part way through the month.

PART 7 Customers

BASE

The car wash adds a tab to every contact, so the counter knows who it is talking to.

BASE **The CarWash tab on a contact.** Preferred technician, car wash notes (vehicle preferences, special instructions), the last visit (the newest closed booking) and an Appointments button with the count.

> Technicians can also have blocked periods (break, vacation, training, other) stored against them. The website booking form refuses a technician during one. There is no menu for them in this version; they are added by an administrator.

PART 8 The till: POS Car Wash

POS ADD-ON

With the add-on, the counter works the bookings from inside Odoo Point of Sale: see today, book or take a walk-in, put a booking on the order and take the money.

IN THIS PART YOU WILL LEARN

- Turning the car wash screen on for a till
- The car wash screen: filters, grouping, stats and the detail panel
- Booking and walk-ins from the till
- What paying does to the booking

Set it up POS ADD-ON

In Point of Sale > Configuration > Point of Sale, open the till and tick **Enable Car Wash**. Every car wash service's product is made available in the till automatically. A **Car Wash** button appears in the till's top bar, and after each sale the till returns to the car wash screen.

> No till has been set up on the shared demo, so the car wash screen inside the till is described here rather than shown.

The car wash screen POS ADD-ON

PART	WHAT IT DOES
Filter tabs	Pending (the default), All, Active, Done, Paid, Unpaid, Cancelled, each with a count
Stats bar	Appointments, revenue, paid (count and amount) and unpaid for the day
Kanban or list	Grouped by stage, technician, service, time of day (morning, afternoon, evening), source or payment
Cards	Reference, customer, service, technician, time, total; a running timer on cars in progress and a red Overdue mark past the planned end
Detail panel	Every service line, notes, customer history (total visits, total spent, preferred technician, the last five bookings) and the actions
Actions	Confirm, Start, Done, Edit, Add Note (time stamped), Cancel, and Order to load the booking onto a till order
Book	A popup: customer search or quick create, several services with total time and price, technician with today's workload, date, time and notes
Walk-In	One service for a customer at the counter: creates the booking (source walk-in) and loads it onto the order
Refresh	Silently every 30 seconds

Paying at the till POS ADD-ON

1. Press **Order** on a booking: a till order opens with its services and the booking linked.
2. Take payment as normal. Before the payment is validated the receipt details are fetched; the receipt shows the booking reference, services and technician.
3. After payment the booking is linked to the POS order, moved to Done, invoiced, the invoice posted and paid, and the booking set to **Invoiced**, so it shows as Paid on the screen.
4. Refunding the POS order moves the booking back to Confirmed.
5. The Order button is hidden on a booking that already has a POS order.

In the back office, Point of Sale > Orders shows each POS order's car wash booking, technician and wash service, on the form and in the list.

PART 9 A 15 minute demo

A route through the demo that shows the whole car wash. Sign in as w4demo / Demo2026. Nothing here needs a button that changes data.

MIN	OPEN	SAY
0	/carwash in a private window	*This is what your customers see: the menu with prices and times.*
1	/carwash/book	*They pick services, a time slot and, if they like, a technician.*
2	Appointments > Kanban Board	*Every booking by stage, from the counter, the phone and the website.*
3	Appointments > Calendar	*The day by technician, one colour each.*
4	APPT/2026/11/1616 (New)	*Customer, time, services; duration and price add themselves up.*
6	APPT/2026/11/1472 (Done)	*Confirm made the sale order; Done confirmed it and used the materials.*
8	APPT/2026/11/1481 (Invoiced)	*The invoice and, on the Commissions tab, what the technician earned.*
10	Services > Platinum Package	*Price, time, who may do it and the materials it uses.*
11	Staff > Commission Rules	*Premium packages pay more; the first matching rule wins.*
12	Staff > Sales Targets	*October against target, with the bonus.*
14	A contact, CarWash tab	*Preferred technician, notes and last visit.*

PART 10 Questions people ask

Does it need Odoo Enterprise?

No. Both modules run on Odoo 19 Community.

Can customers book online?

Yes, on /carwash/book in your own website, with your own opening hours and slot length. They get a confirmation email straight away.

Does it stop double booking?

On the website, a chosen technician is checked against their other bookings and blocked time. Bookings made in the back office are not checked, so the counter should look at the calendar.

How is stock used?

Give a service a bill of materials. Mark Done takes the components out of stock for every booking.

Can one booking have several technicians?

Yes. Each service line has its own technician, and commission is worked out per line.

Do I need the POS add-on?

Only if you take payment at a till. Without it, invoice from the booking and register the payment in Invoicing.

Can I rename the stages?

Yes, and add legends and fold them. Keep the six installed stages, because the buttons use them.

PART 11

Menu map

Every menu and page the two modules add.

Appointments

All Appointments BASE	Every booking: list, kanban, calendar, activity
Today BASE	Today's bookings
Calendar BASE	Bookings on the calendar, coloured by technician
