COMPLETE GUIDE · SETUP, THE FRONT DESK AND EVERY SCREEN

Hotel Management PMS for Odoo 19

Rooms, reservations, check-in and check-out, the guest folio, housekeeping and the occupancy figures, for a hotel, resort or guest house. Every screen and every step, shown on a live demo. No Odoo background needed.

START

About this guide

A small hotel keeps three lists that have to agree: which rooms are booked for which nights, who is in the building tonight, and what each guest owes. This guide shows how the Hotel Management PMS module keeps all three in one place on Odoo 19 Community, one screen at a time. You do not need to have used Odoo before.

Who it is for

The owner or manager setting the property up, the receptionist on the front desk, the housekeeping supervisor, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks every field and button, step by step.

The live demo

A sample property of twelve rooms on four floors, with guests in house, arrivals, a departure, a cancellation, open folios and housekeeping tasks already on it.

HOW IT WORKS

The demo property

Address	**hotel.way4tech.com**
Sign in	**w4demo** / **Demo2026**
Property	12 rooms, 4 room types, 4 floors including a sea view wing, 6 services
Runs on	Odoo 19, Community edition, with Invoicing and Discuss

The demo is shared and resets from time to time, so anything you change may be changed back or seen by the next visitor. Treat it as a hotel to walk around, not your own books.

What is in the guide

PART 1 What the module is and what it does

PART 2 Signing in and who can see what

PART 3 Setting up the property from zero

PART 4 The Front Desk dashboard

PART 5 Taking a reservation

PART 6 Checking a guest in

PART 7 During the stay: the folio

PART 8 Checking a guest out

PART 9 Cancellations, no-shows and starting again

PART 10 The room board

PART 11 Housekeeping

PART 12 From folio to invoice, and closing the folio

PART 13 Guests

PART 14 Reporting

PART 15 The printed documents and the confirmation email

PART 16 What runs by itself

PART 17 A fifteen minute walk-through

PART 18 The menu map

PART 1 What the module is and what it does

Standard Odoo has invoicing, contacts and a calendar, but no rooms, no bookings by the night, no check-in and no guest bill. This module adds them as one app called Hotel. It is a property management system, or PMS: the record of rooms, stays and charges that a front desk runs on.

IN THIS PART YOU WILL LEARN

- The five things a stay passes through, from booking to a clean room
- Which screens belong to the front desk, housekeeping and the manager
- The words a hotel uses: folio, ADR, RevPAR, no-show, out of order
- What the module does not do, so you know before you start

One stay, five steps

The life of a stay

1. **Reservation** — Guest, dates and rooms. The availability check runs on confirm
2. **Check-in** — Rooms go to Occupied and the folio opens with the room charges
3. **During the stay** — Extras are added to the folio as the guest uses them
4. **Check-out** — Rooms go back to Available and are marked Dirty
5. **Housekeeping** — A cleaning task is raised. Done puts the room back to Clean

Everything else in the module hangs off that line. The dashboard counts it, the room board shows it, the folio bills it and the reports add it up.

What is in the app

AREA	WHAT IT HOLDS	WHO USES IT
Front Desk	A live dashboard of occupancy, rates, today's arrivals and departures, room states and the booking pipeline	Everyone
Reservations	Bookings with one or more rooms, dates, guests, source and status	Front desk
Front Office	The room board, the guest folios and the guest list	Front desk
Housekeeping	Cleaning, turndown, inspection, maintenance and linen tasks per room	Housekeeping, manager
Reporting	A pivot and graph of reservations	Manager
Configuration	Settings, room types, floors, amenities and services	Manager

The words used in this guide

Word	Meaning
Folio	The guest's running bill for a stay. Room nights and extras go on it, and it is turned into an invoice at the end.
Room type	A category of room with its own nightly rate, such as Standard, Deluxe or Suite.
Occupancy	Rooms occupied tonight as a share of all rooms.
ADR	Average daily rate: room revenue divided by the room nights sold.

RevPAR	Revenue per available room: room revenue divided by every room, every day, sold or not.
No-show	A confirmed guest who never arrived.
Out of order	A room taken off sale, for repairs for example. It cannot be booked or checked into.
In house	Guests checked in and still in the building.

What it does not do

It is worth knowing the edges before you start. The module does not connect to Booking.com, Expedia or any channel manager. A booking from an online agency is typed in with the source set to OTA / Travel Agent. There is no public booking page on the website. Rates are one figure per room type or per room, with no seasonal rate plans, and there is no night audit. It suits small and mid-sized properties that sell rooms by the night from one front desk.

> **Needs:** Odoo 19 Community (or Enterprise) with Invoicing and Discuss, which install with it. A chart of accounts must be set up before a folio can be invoiced.

PART 2 Signing in and who can see what

Everyone signs in to the same Odoo with their own user. What they see in the Hotel app depends on the role they are given, so the housekeeper sees the cleaning board and the manager sees the reports.

IN THIS PART YOU WILL LEARN

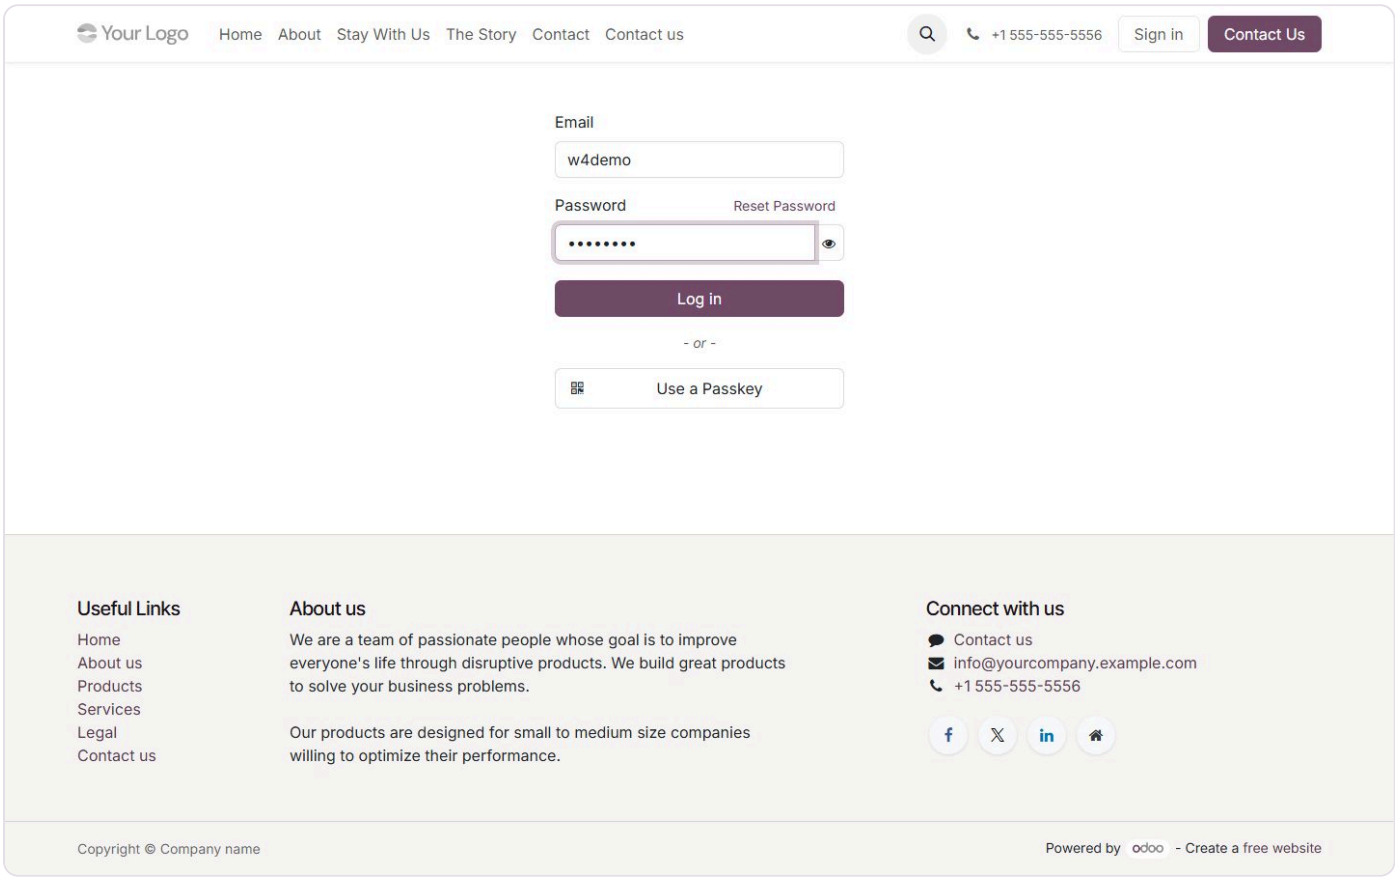

- Signing in to the demo
- Opening the Hotel app
- The three roles and what each can do

TRY IT YOURSELF ON THE DEMO

1. Open hotel.way4tech.com and sign in as w4demo
2. Open the Hotel app from the home screen
3. Click each top menu once to see where things live

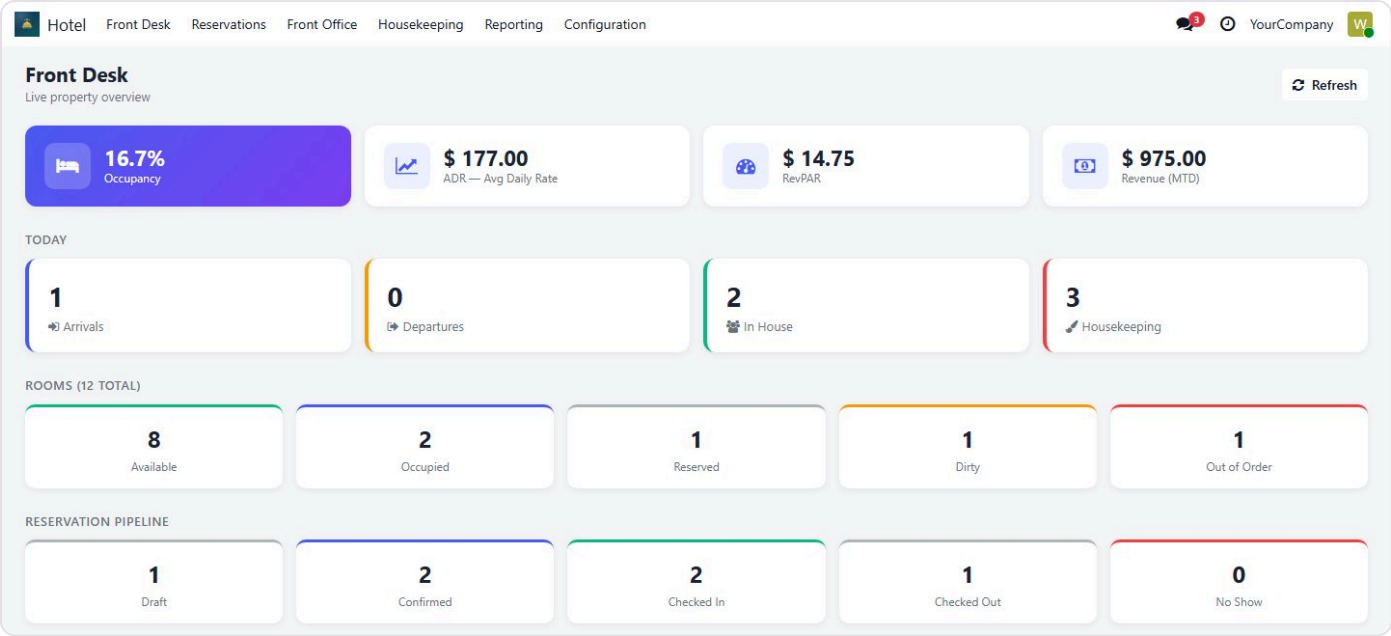

1 Sign in

Go to the address, type the login and password, and press Log in. On your own system each person has their own user.

2 Open the Hotel app

The app opens on Front Desk, the live dashboard. The top bar holds the six menus: Front Desk, Reservations, Front Office, Housekeeping, Reporting and Configuration.

The three roles

A user is given one of three hotel roles under Settings, then Users. The Hotel Manager role includes the other two and also gives billing rights in Invoicing.

CAN THEY...	RECEPTIONIST / FRONT DESK	HOUSEKEEPING	HOTEL MANAGER
See the Hotel app and the dashboard	Yes	Yes	Yes
Create, change and delete reservations	Yes	Read only	Yes
Open and add charges to folios	Yes (cannot delete a folio)	Read only	Yes
Change a room's status and housekeeping state	Yes	Yes	Yes
Create and work housekeeping tasks	Yes	Yes	Yes, and delete them
See the Housekeeping menu	No	Yes	Yes
See Reporting and Configuration	No	No	Yes
Create rooms, room types, floors, amenities, services	No	No	Yes
Raise invoices from a folio	Needs Invoicing rights too	No	Yes

> Every hotel record carries a company, and a user only sees the records of the companies they are allowed into. Two properties run as two companies keep their rooms, bookings and folios apart.

PART 3 Setting up the property from zero

Before the first booking the property has to exist in the system: the settings, the floors, what a room can have, the kinds of room you sell, the rooms themselves and the extras you charge for. Do them in this order, because each one is picked on the next.

IN THIS PART YOU WILL LEARN

- The four hotel settings and what each one changes
- Floors and wings
- Amenities and their categories
- Room types: rate, occupancy, bed, size and standard amenities
- Rooms: number, type, floor, rate and photo
- Services and recurring daily charges such as breakfast

TRY IT YOURSELF ON THE DEMO

1. Configuration, then Settings: read the Hotel block
2. Configuration, then Room Types: open Deluxe Room
3. Configuration, then Services: find the one marked as daily

The order to set up in

Set up once, in this order

1. **Settings** — Times, auto housekeeping, no-show detection
2. **Floors** — Where the rooms are
3. **Amenities** — What a room can have
4. **Room types** — What you sell and at what rate
5. **Rooms** — Each door you can put a guest behind
6. **Services** — The extras, with their taxes

Step 1: the settings

Open Configuration, then Settings. The Hotel block on the Settings page holds four switches, kept per company so two properties can work differently. The Settings page needs administrator rights.

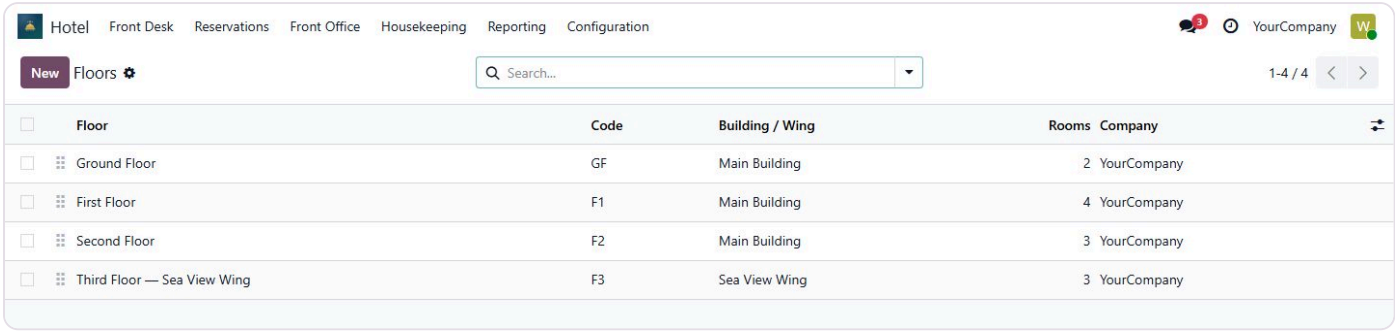

SETTING	WHAT IT DOES	DEFAULT
Default Check-in Time	The standard arrival time, kept on the company for your own reference and paperwork.	14:00
Default Check-out Time	The standard departure time, kept the same way.	12:00
Auto Housekeeping on Check-out	When a guest checks out, a Full Cleaning task is raised for each of their rooms, dated today.	On
Auto No-show Detection	Meant to let the daily job mark confirmed bookings whose arrival date has passed as no-shows.	On

Good to know: the daily no-show job marks every confirmed booking whose check-in date is before today, whatever this switch says. If you do not want that, ask your administrator to pause the scheduled action named Hotel: Detect No-shows.

Step 2: floors and wings

1 Configuration, then Floors

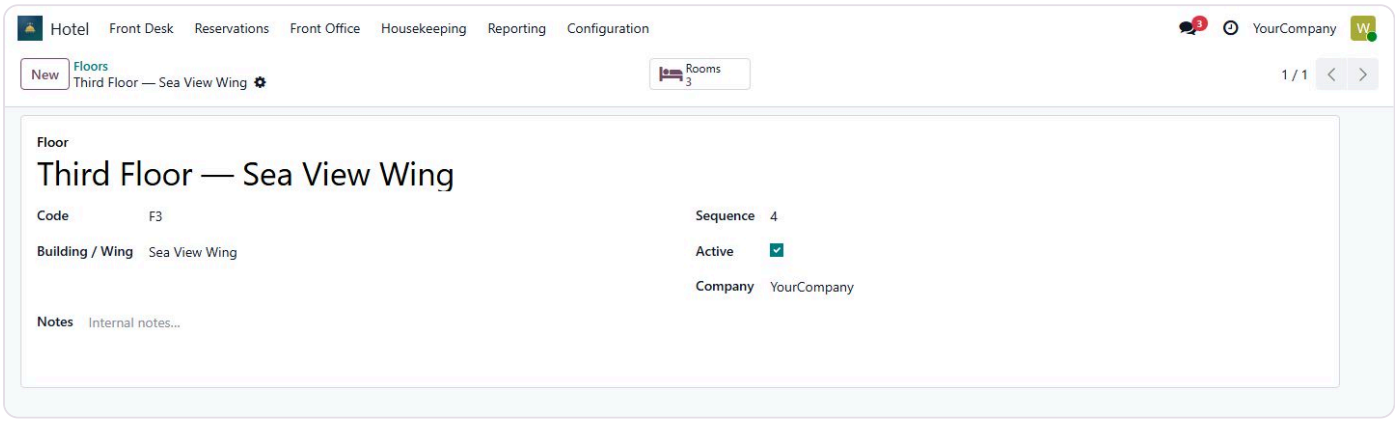

One line per floor, in the order of its sequence. The Rooms column counts the rooms on it.

Floor	Code	Building / Wing	Rooms	Company
Ground Floor	GF	Main Building	2	YourCompany
First Floor	F1	Main Building	4	YourCompany
Second Floor	F2	Main Building	3	YourCompany
Third Floor — Sea View Wing	F3	Sea View Wing	3	YourCompany

2 Open a floor

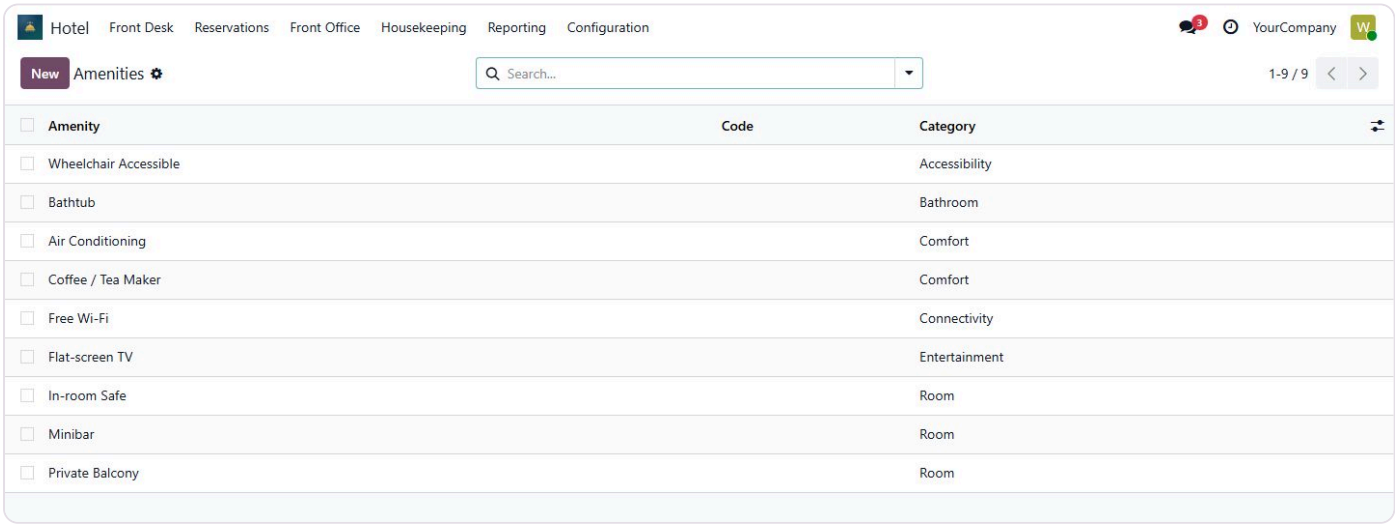

Give it a name, a short code and, if the property has more than one building, the building or wing. The Rooms button opens the rooms on that floor, and a room created from there is put on the floor for you.

Step 3: amenities

3 Configuration, then Amenities

The things a room can have, each in a category: Room, Bathroom, Entertainment, Comfort, Connectivity, Accessibility or Other. An amenity can carry a Font Awesome icon name such as fa-wifi, and a short description.

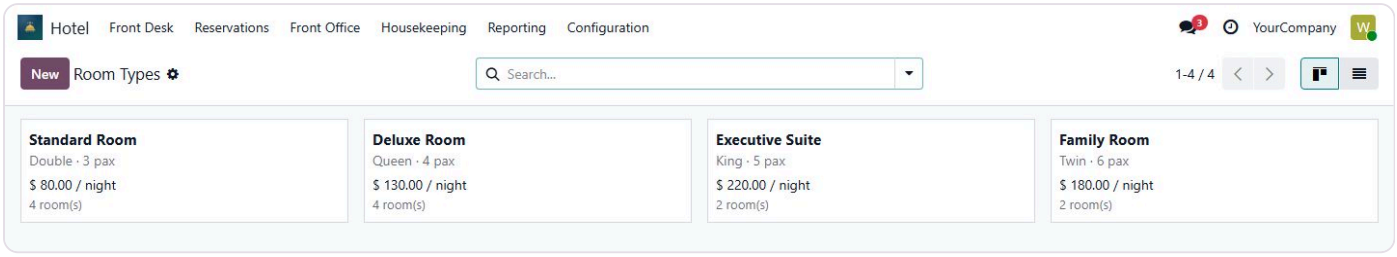

Amenity	Code	Category
Wheelchair Accessible		Accessibility
Bathtub		Bathroom
Air Conditioning		Comfort
Coffee / Tea Maker		Comfort
Free Wi-Fi		Connectivity
Flat-screen TV		Entertainment
In-room Safe		Room
Minibar		Room
Private Balcony		Room

Step 4: room types

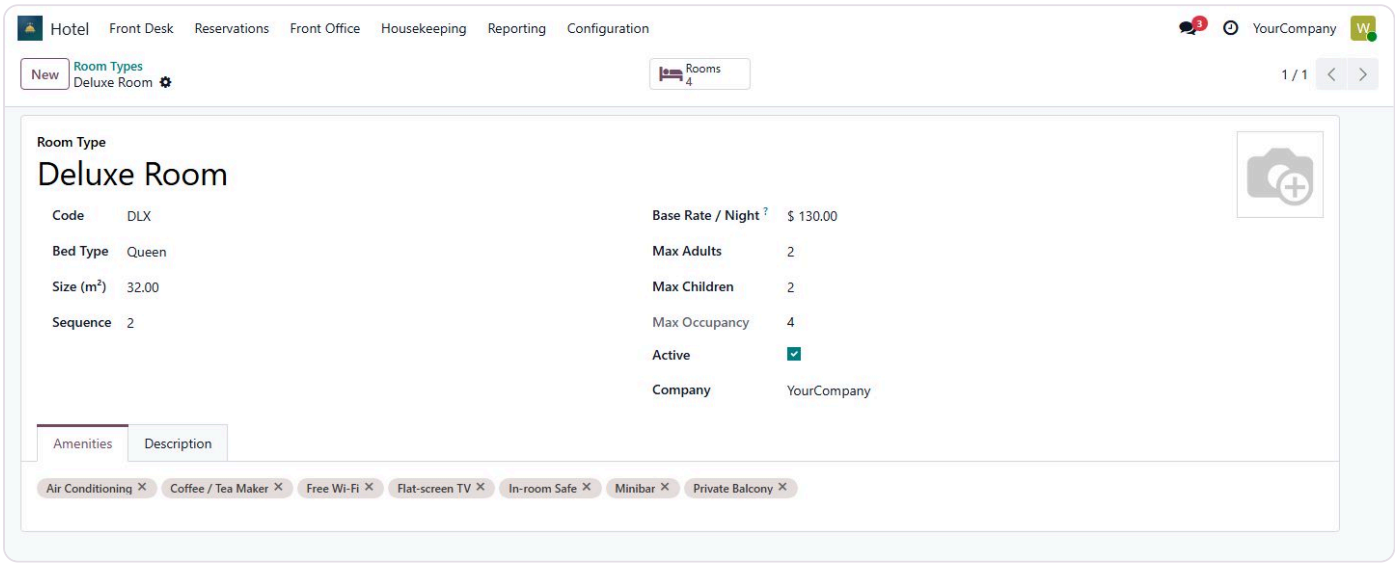

4 Configuration, then Room Types

Each kind of room you sell, shown as a card with its photo, rate and room count. Switch to the list view to see them in a table.

5 Open a room type

Fill in the name and code, the base rate per night, the maximum adults and children, the bed type and the size in square metres, then add a photo, a description and the standard amenities. The Rooms button lists every room of this type.

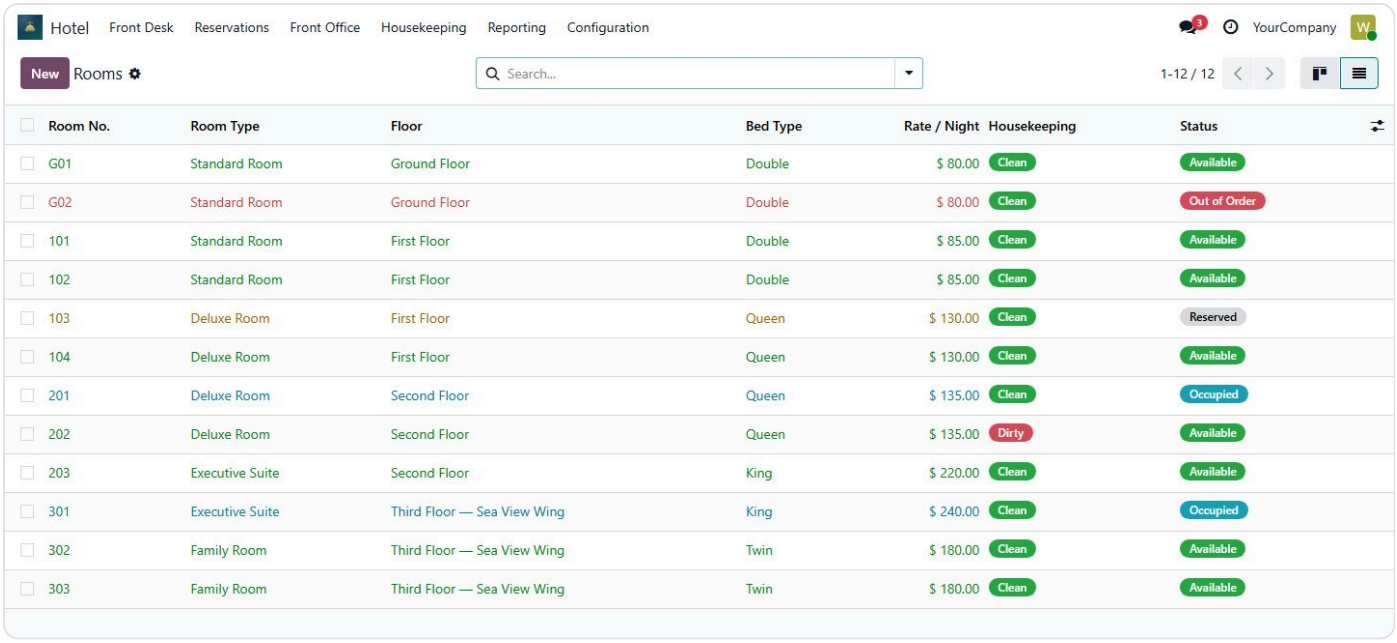

FIELD	WHAT IT IS FOR
Base Rate / Night	The nightly rate a new room of this type starts with, and the rate a booking line takes when no room rate is set.
Max Adults, Max Children	How many people the type sleeps. Max Occupancy is the two added together.
Bed Type	Single, Twin, Double, Queen, King or Suite. It shows on the room cards.
Size (m²)	The floor area, for your own description.
Standard Amenities	Copied onto a room when you pick this type on it.
Sequence	The order types appear in lists.

Step 5: rooms

6 Front Office, then Rooms, in the list view

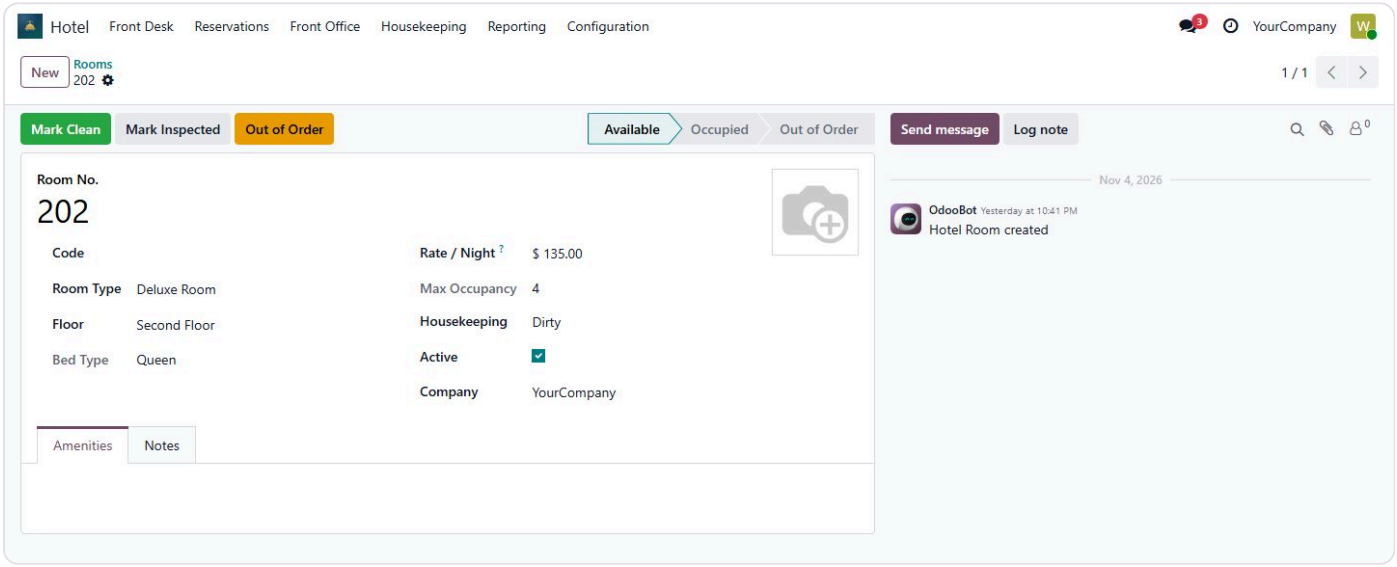

Every room with its type, floor, bed, occupancy, rate and both of its states. The manager creates rooms here or from a floor or a room type.

Room No.	Room Type	Floor	Bed Type	Rate / Night	Housekeeping	Status
G01	Standard Room	Ground Floor	Double	$ 80.00	Clean	Available
G02	Standard Room	Ground Floor	Double	$ 80.00	Clean	Out of Order
101	Standard Room	First Floor	Double	$ 85.00	Clean	Available
102	Standard Room	First Floor	Double	$ 85.00	Clean	Available
103	Deluxe Room	First Floor	Queen	$ 130.00	Clean	Reserved
104	Deluxe Room	First Floor	Queen	$ 130.00	Clean	Available
201	Deluxe Room	Second Floor	Queen	$ 135.00	Clean	Occupied
202	Deluxe Room	Second Floor	Queen	$ 135.00	Dirty	Available
203	Executive Suite	Second Floor	King	$ 220.00	Clean	Available
301	Executive Suite	Third Floor — Sea View Wing	King	$ 240.00	Clean	Occupied
302	Family Room	Third Floor — Sea View Wing	Twin	$ 180.00	Clean	Available
303	Family Room	Third Floor — Sea View Wing	Twin	$ 180.00	Clean	Available

7 Open a room

Give it its number, the room type and the floor. The rate fills in from the type and can be changed for one room, a corner room with a view for example. Picking the type also copies its standard amenities. Add a photo and notes if you like.

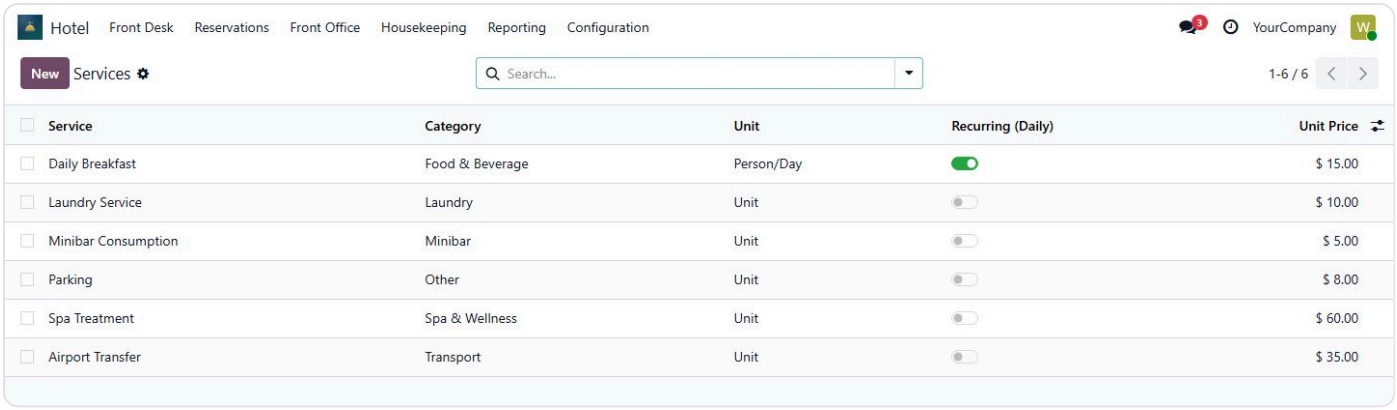

A room has two states that are kept apart on purpose. **Status** says whether it can be sold: Available, Reserved, Occupied or Out of Order. **Housekeeping** says whether it is ready: Clean, Dirty, Cleaning in Progress or Inspected. A room can be Available and Dirty at the same time, which is exactly the case just after a check-out.

Step 6: services and extras

8 Configuration, then Services

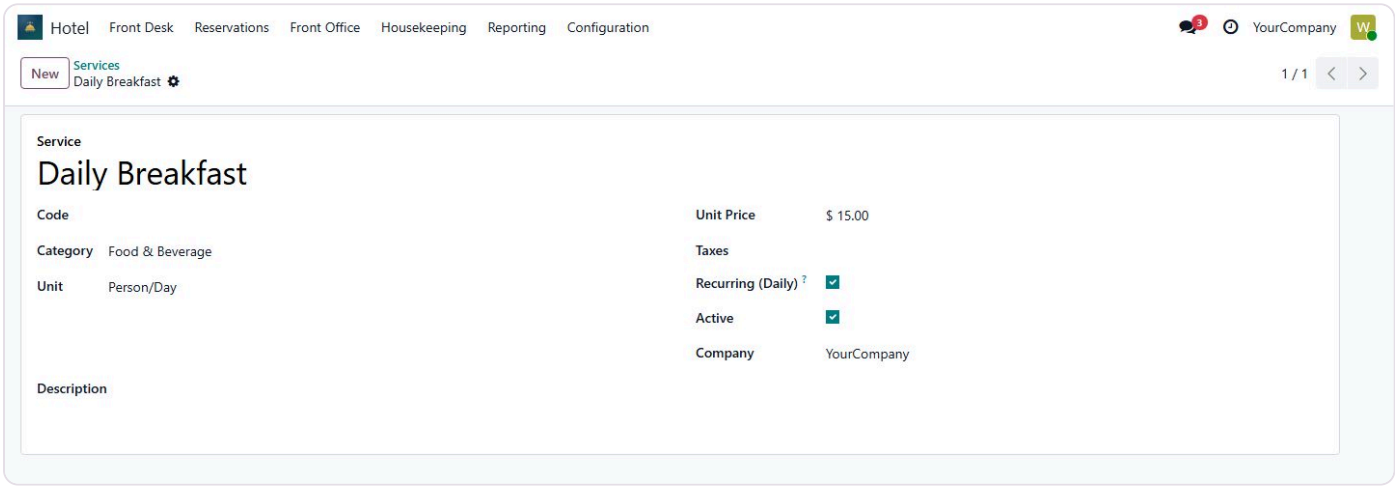

Every extra a guest can be charged for, grouped by category: Food and Beverage, Laundry, Spa and Wellness, Transport, Minibar, Business Center, Excursion or Activity, and Other.

Service	Category	Unit	Recurring (Daily)	Unit Price
Daily Breakfast	Food & Beverage	Person/Day	on	$ 15.00
Laundry Service	Laundry	Unit	off	$ 10.00
Minibar Consumption	Minibar	Unit	off	$ 5.00
Parking	Other	Unit	off	$ 8.00
Spa Treatment	Spa & Wellness	Unit	off	$ 60.00
Airport Transfer	Transport	Unit	off	$ 35.00

9 Open a service

Set the unit price, the unit it is sold in, the sales taxes and a description. Tick **Recurring (Daily)** for a charge that applies every night of every stay, such as breakfast included in the rate.

Recurring services are added to the folio automatically at check-in, once per service, with the quantity set to the number of nights in the stay. Every recurring service of the company is added to every stay, so only tick it for charges that truly apply to everybody.

Before invoicing: a folio is invoiced to an income account from your chart of accounts. Install your country's accounting package under Invoicing before the first check-out, or invoicing will stop with a message asking for one.

PART 4 The Front Desk dashboard

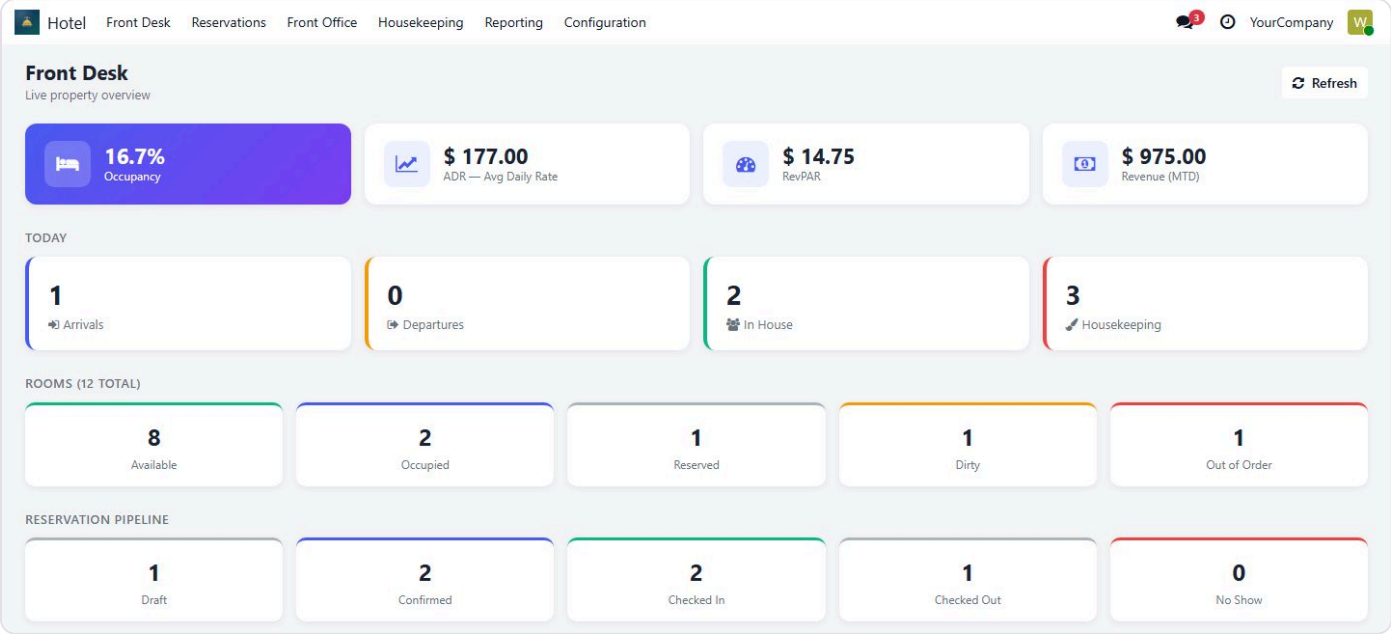

The first screen of the app is a live picture of the property. Every figure on it is counted the moment you open it, and almost every tile opens the records behind it.

IN THIS PART YOU WILL LEARN

- What occupancy, ADR, RevPAR and month to date revenue are counted from
- The Today row: arrivals, departures, in house and housekeeping
- The room states and the reservation pipeline
- Which tile opens which list

TRY IT YOURSELF ON THE DEMO

1. Open Front Desk and press Refresh
2. Click the In House tile and see the two guests in the building
3. Go back and click the Dirty tile

The Front Desk dashboard on the demo: occupancy, the rates, today's movements, the twelve rooms by state and the bookings by status.

The four headline figures

FIGURE	HOW IT IS WORKED OUT
Occupancy	Rooms with the status Occupied, divided by all rooms, as a percentage.
ADR, average daily rate	Room charge lines on folios dated from the first of the month to today: their untaxed total divided by the nights on them.
RevPAR	The same room revenue divided by the number of rooms times the days of the month so far.
Revenue (MTD)	Every folio line dated this month so far, rooms and extras, including tax. Click it to open the folios with a balance due.

Room charges are dated on the check-in day and carry every night of the stay. A stay that starts on the 30th is counted in the month it started, which is worth knowing when you compare ADR month by month.

Today, rooms and the pipeline

TILE	COUNTS	OPENS
Arrivals	Confirmed or checked in bookings with check-in today	Reservations, Arrivals Today
Departures	Checked in bookings with check-out today	Reservations, Departures Today
In House	Every booking checked in	Reservations, In House
Housekeeping	Tasks still To Do or In Progress	Housekeeping, To Do
Available, Occupied, Dirty, Out of Order	Rooms in each state. Dirty is the housekeeping state	Rooms, filtered the same way
Reserved	Rooms whose status is Reserved	Not clickable
Draft, Confirmed, Checked In, Checked Out	Bookings in each status	Reservations, filtered
No Show	Bookings marked no-show	Not clickable

The Refresh button at the top right recounts everything without reloading the page. Keep the dashboard open on the front desk screen and press it after each check-in or check-out.

PART 5 Taking a reservation

A reservation is the guest, the dates and one or more rooms. It starts as a draft, is confirmed when the guest commits, and from then on the room cannot be sold to anybody else for those nights.

IN THIS PART YOU WILL LEARN

- The five ways to look at bookings: list, board, calendar, graph and pivot
- Filling in a new reservation: guest, dates, source and rooms
- Booking several rooms on one reservation for a family or a group
- How the rate and the room revenue are worked out
- Confirming, and the availability check that stops a double booking

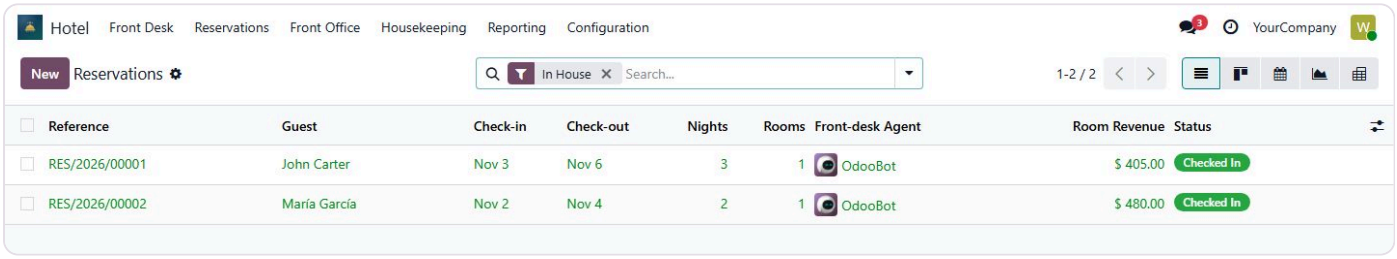

TRY IT YOURSELF ON THE DEMO

1. Reservations, then Reservations: switch between list, board and calendar
2. Open RES/2026/00005, the draft, and read its Rooms tab
3. Open RES/2026/00004, the two room family booking

Five ways to see the bookings

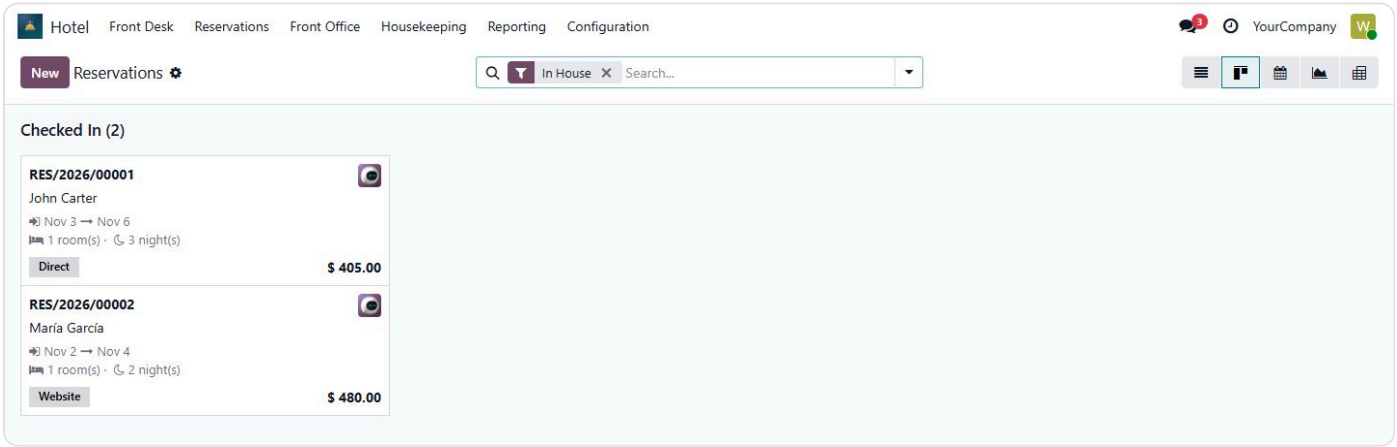

1 Reservations, then Reservations

The list shows the reference, guest, check-in and check-out, nights, rooms, source, room revenue and status. Use the search bar filters: Draft, Confirmed, In House, Departed, Arrivals Today, Departures Today and My Reservations, or group by status, guest, source, agent or check-in month.

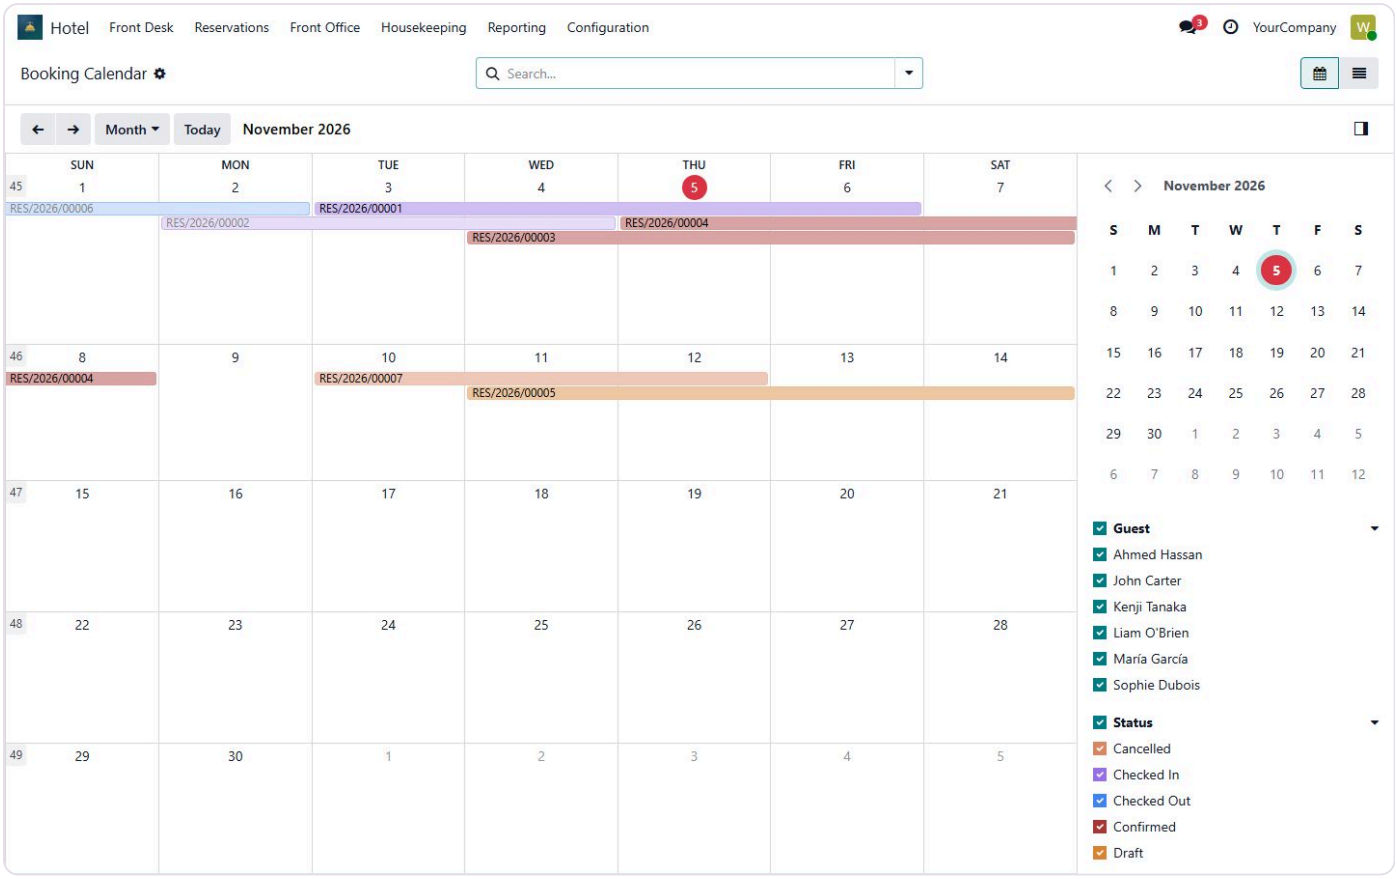

2 The board

The same bookings as cards in a column per status. It is the quickest way to see what is waiting to be confirmed and who is due in.

3 Reservations, then Booking Calendar

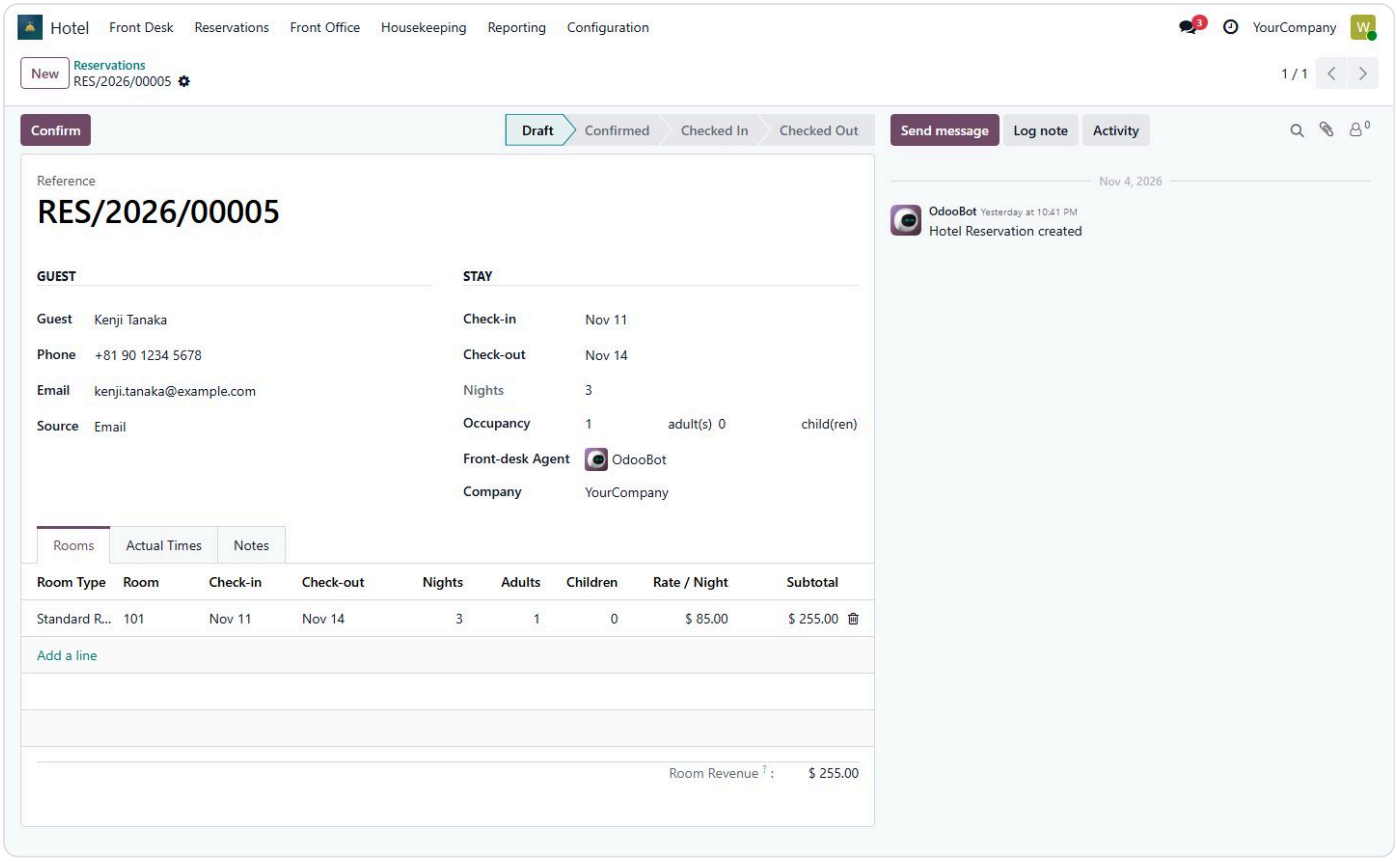

Every booking drawn from its check-in to its check-out date. Use it to see a busy weekend at a glance before you promise a room on the phone.

Create the booking

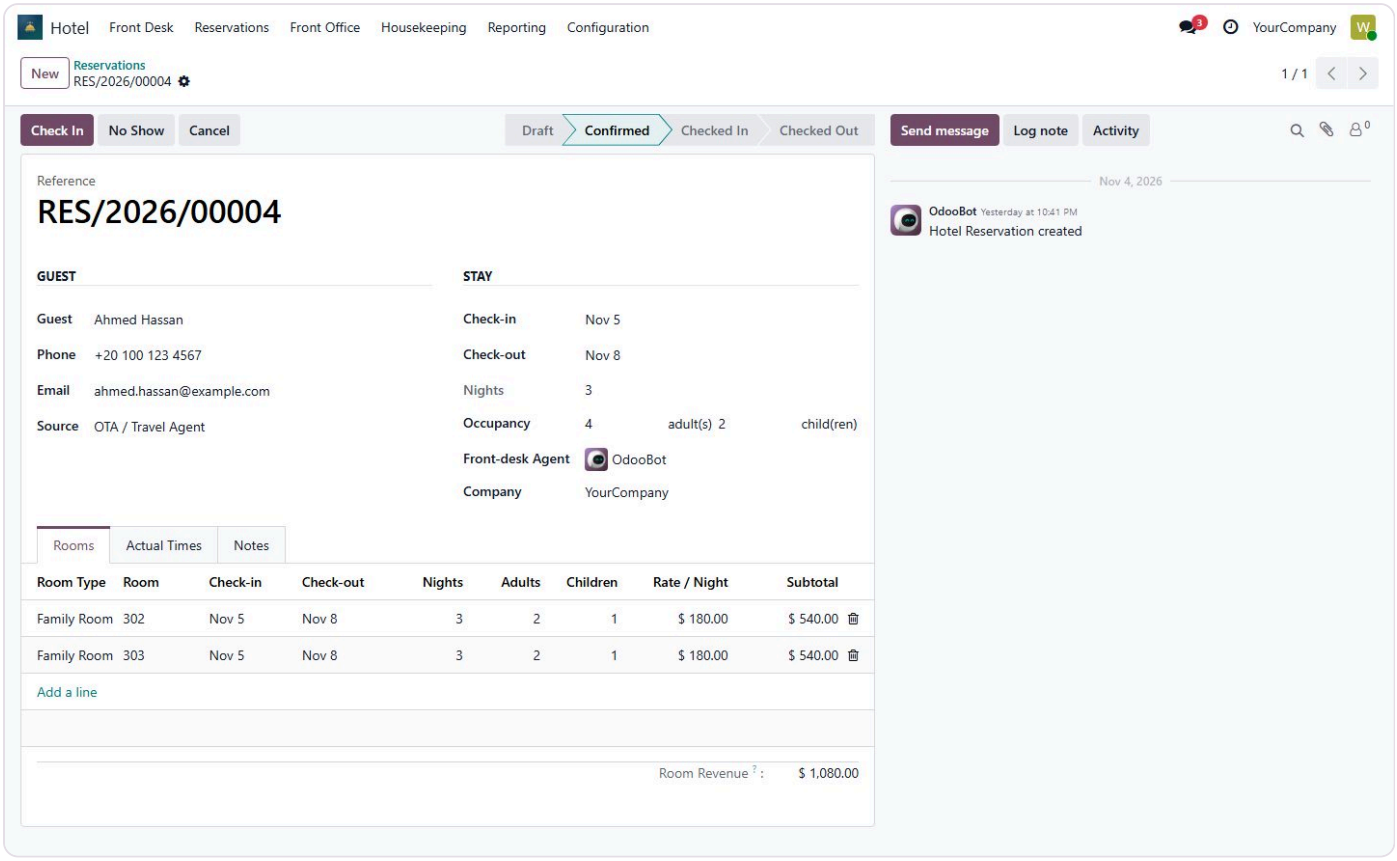

4 Press New and fill in the header

Pick the guest, or type a new name to create one. The phone and email show from the contact and can be corrected here. Set the check-in and check-out dates, the number of adults and children, and the source: Direct, Walk-in, Phone, Email, Website or OTA / Travel Agent. The front desk agent is you by default. The reference, RES/2026/00005 on the demo, is given when the booking is saved.

5 Add the rooms

On the Rooms tab add one line per room. Pick the room type first: the rate fills in from the type and the dates from the header. Then pick the room, which only offers rooms of that type. Picking a room fills in its own rate. Each line has its own dates, adults and children, so a family booking two rooms can have one room for longer.

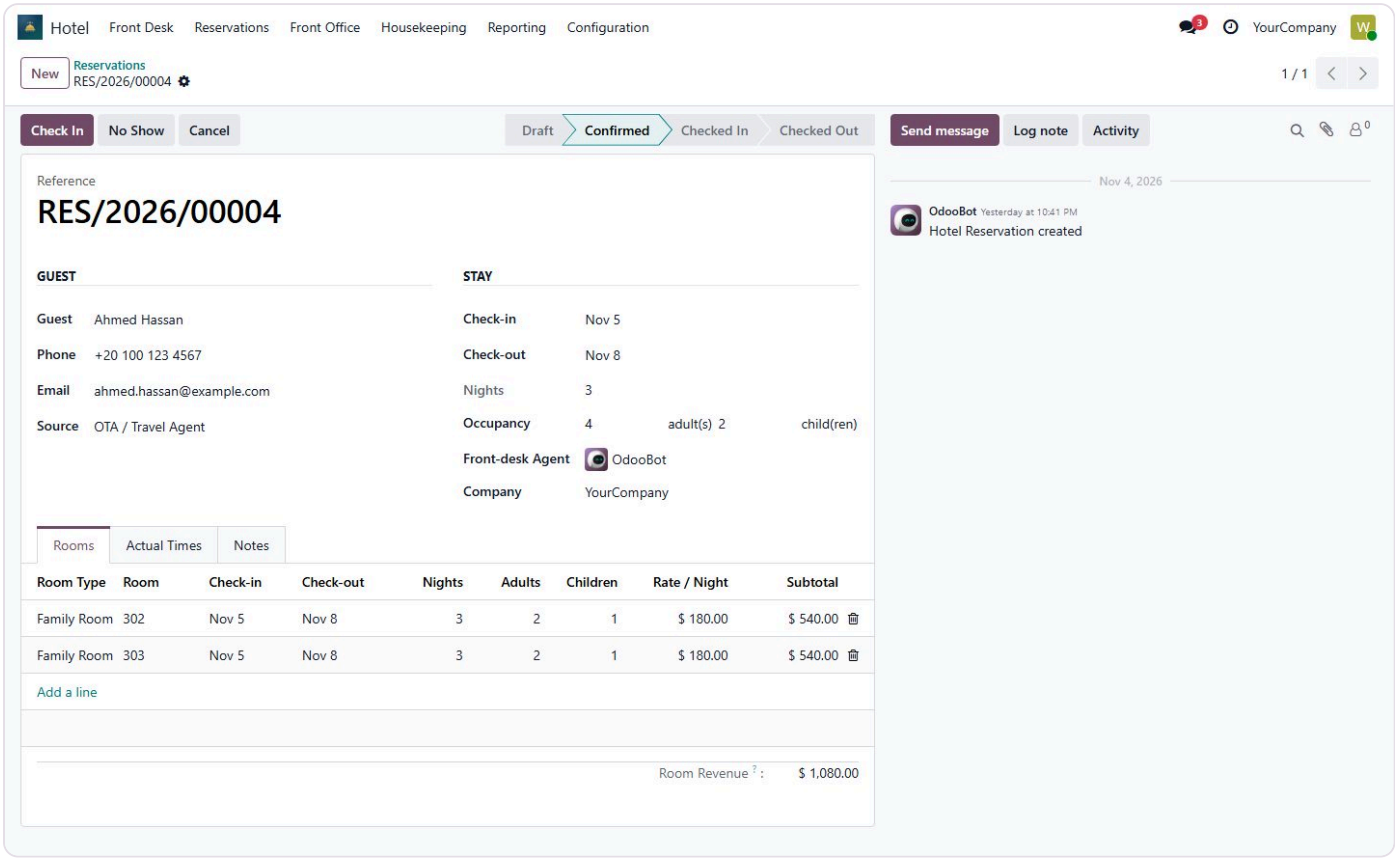

FIELD	WHAT IT MEANS
Nights	Check-out date less check-in date. Check-out has to be after check-in, on the header and on every line.
Rate / Night	From the room if it has its own rate, otherwise from the room type. It can be typed over for a deal.
Subtotal	Rate times nights for that line.
Room Revenue	The lines added up. This is a forecast: what the guest is billed is on the folio.
Room Count	How many rooms the booking holds.

Confirm, and the availability check

6 Press Confirm

Confirming needs at least one room line. For every line that has a room, the system looks for any other booking of the same room whose nights overlap and that is not cancelled, a no-show or checked out. If it finds one, or the room is Out of Order, it stops and names the room and the dates. If not, the booking moves to Confirmed and a line is written in its history.

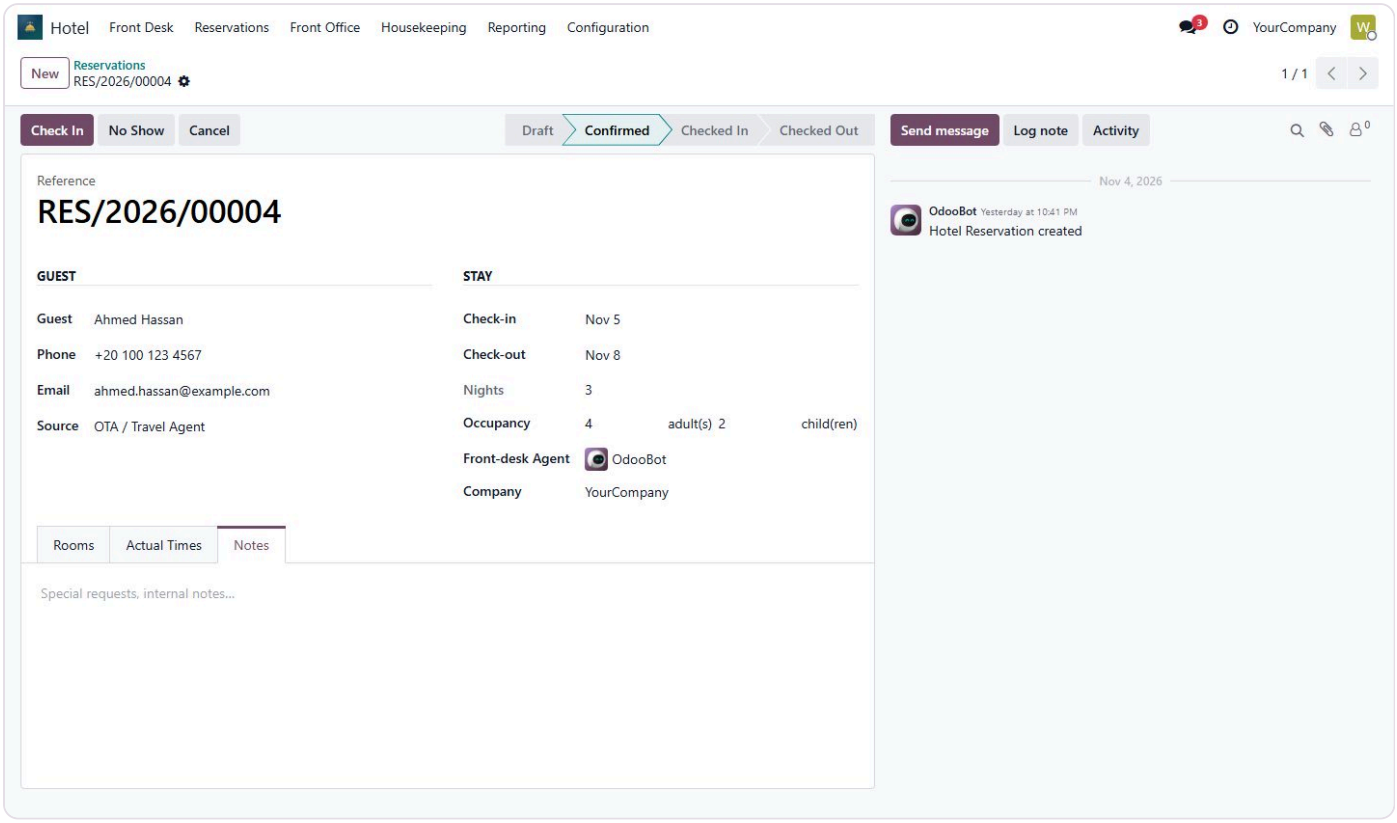

A line can be confirmed with only a room type and no room yet, which suits a booking taken weeks ahead. The room must be assigned before check-in, and the availability check runs again then.

The Notes tab

7 Notes

A free text box for anything the front desk needs to know: a late arrival, an airport pick-up, a cot for the baby. Use Send message and Log note on the right for anything you want on the record with a date and a name.

PART 6 Checking a guest in

Check-in is one button, but it does four things at once: it checks the rooms again, marks them occupied, stamps the arrival time and opens the folio with the room charges already on it.

IN THIS PART YOU WILL LEARN

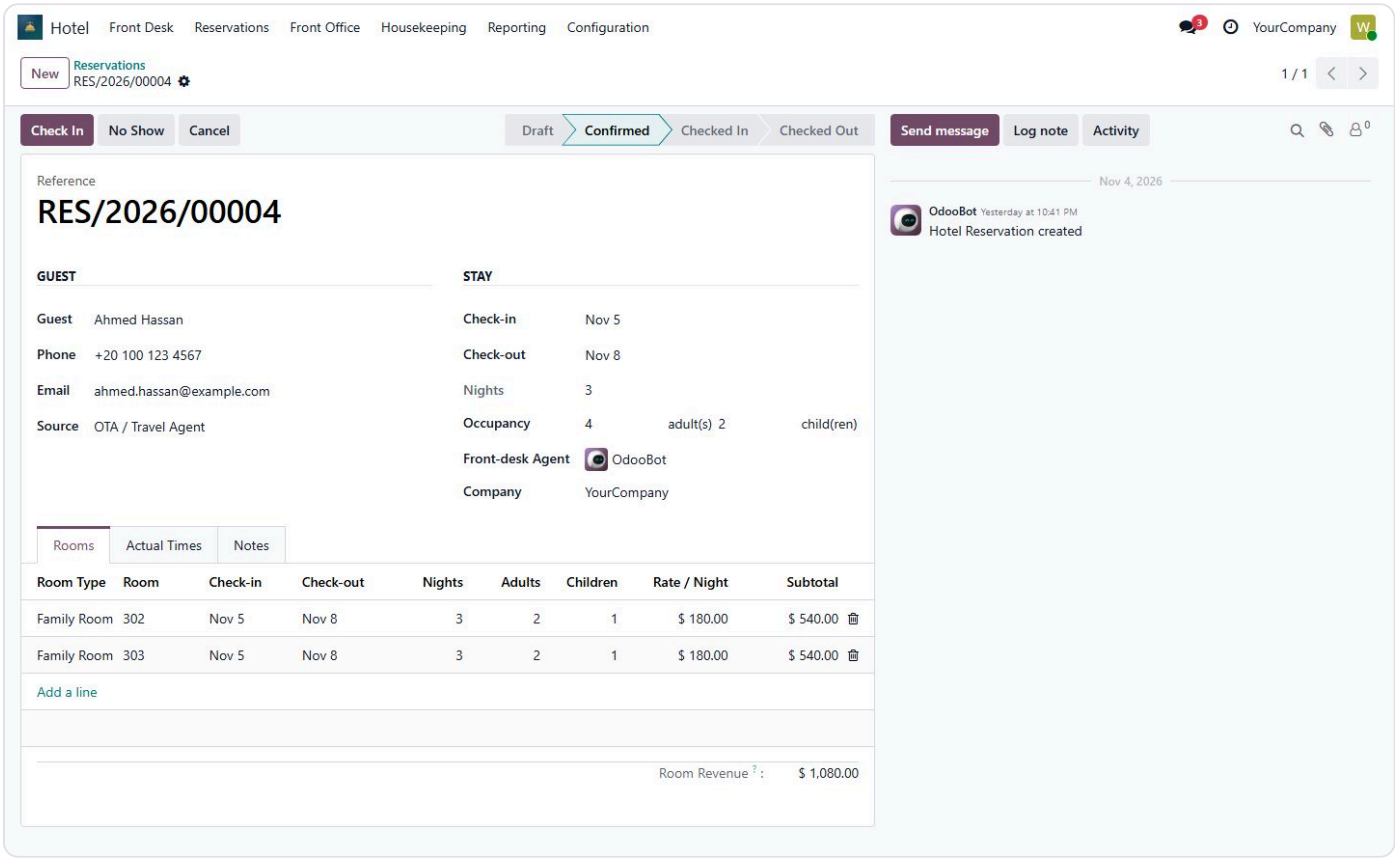

- What has to be true before check-in will go through
- What changes on the rooms, the booking and the folio
- The Actual Times tab
- Printing the guest registration card

TRY IT YOURSELF ON THE DEMO

1. Open RES/2026/00004, which is confirmed, and look at the header buttons
2. Open RES/2026/00001, which is checked in, and open its Folio button
3. Print its registration card from the Print menu

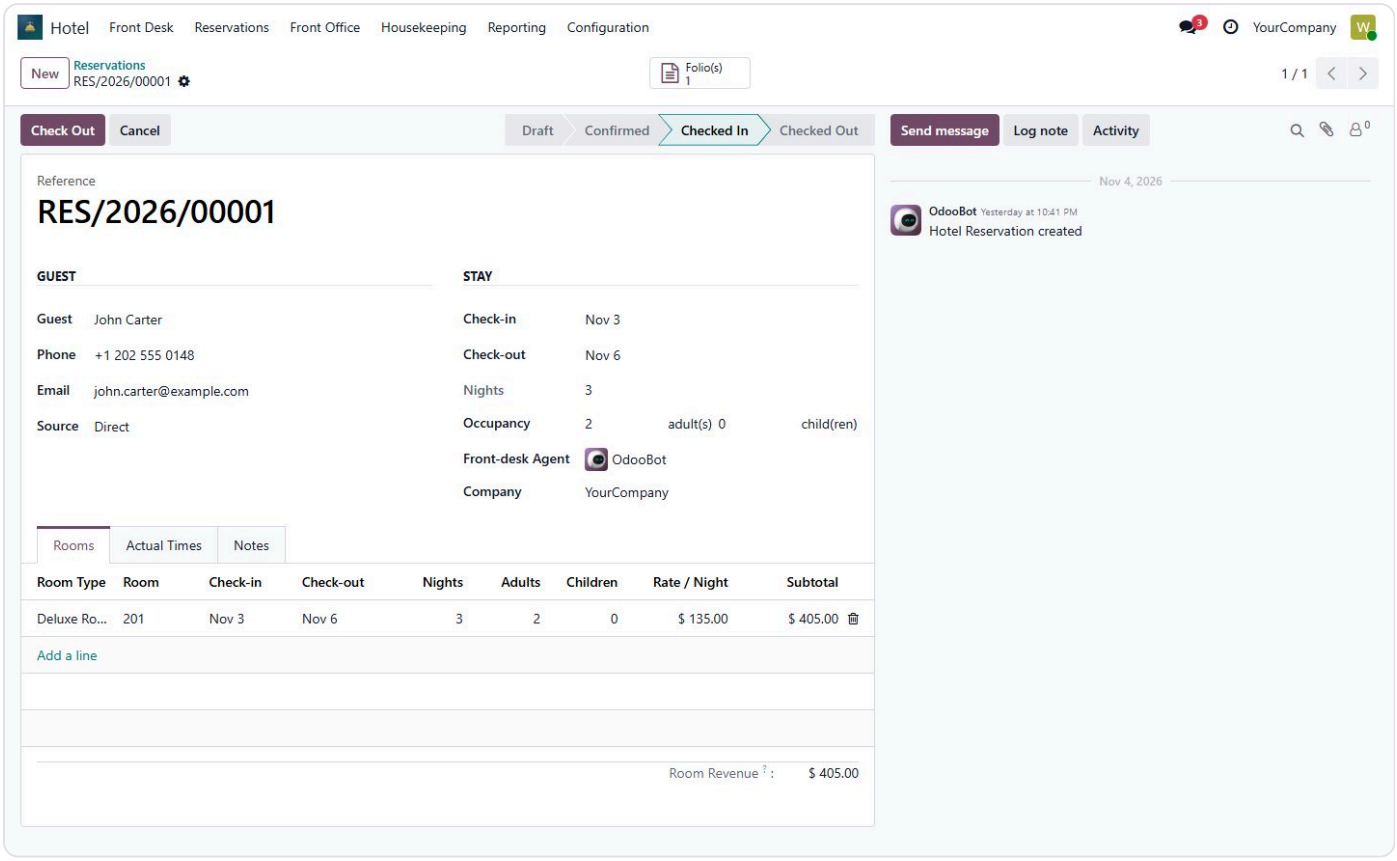

1 Open the confirmed booking

On a confirmed booking the header shows Check In, No Show and Cancel. Make sure every line has a room. Check-in refuses a line with only a room type.

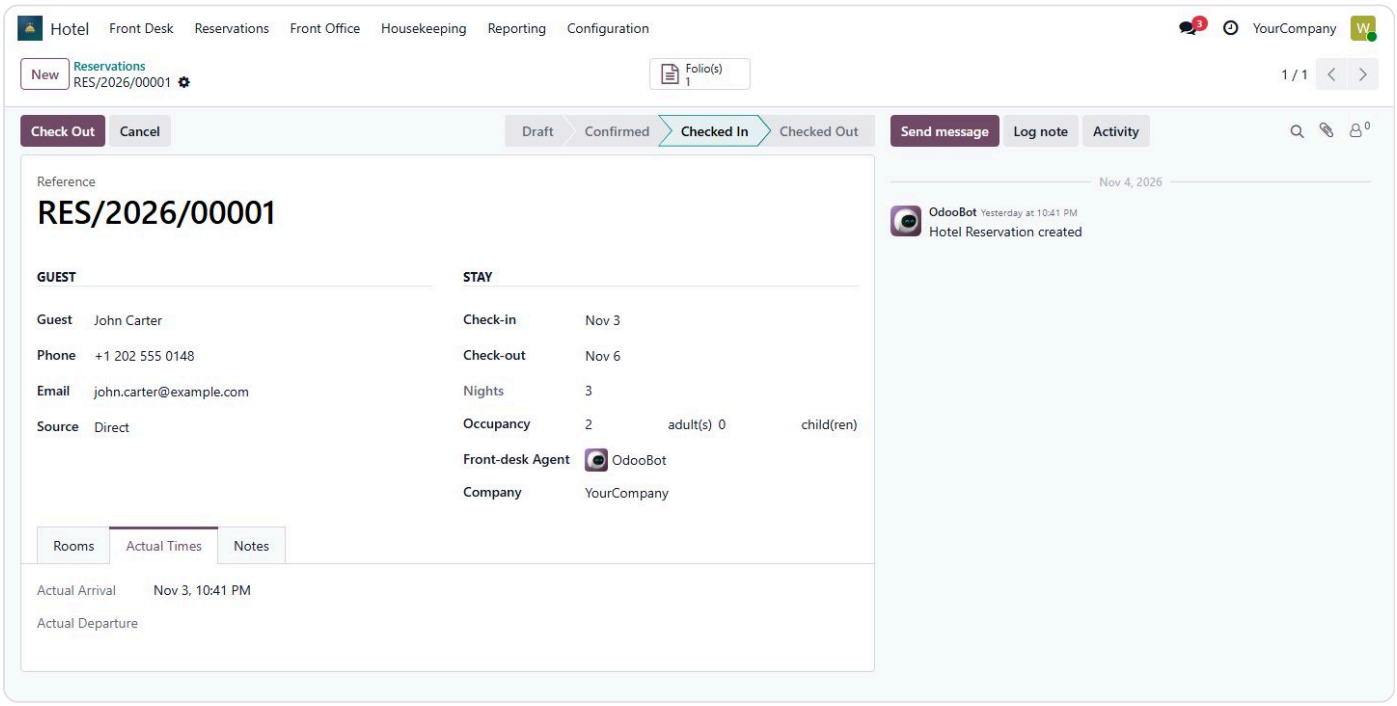

2 Press Check In

The availability check runs once more. The booking moves to Checked In, every room on it goes to Occupied, and the Folio button appears at the top. The header now offers Check Out and Cancel.

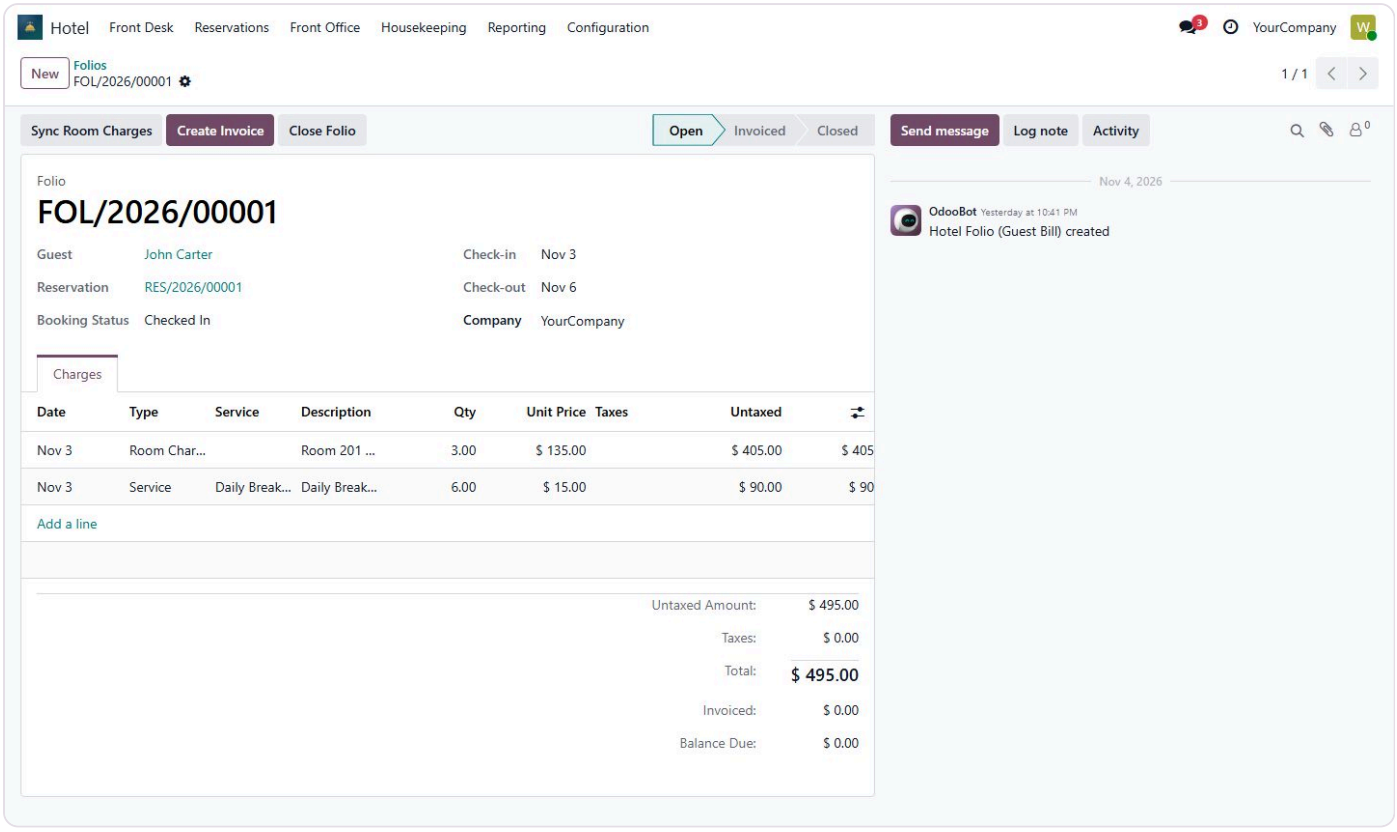

3 The Actual Times tab

Actual Arrival is stamped with the moment you pressed Check In. Actual Departure fills in at check-out. Both are read only, so they are a true record.

4 The folio opens by itself

One room charge line per room on the booking, dated the check-in day, with the quantity set to the nights and the price to the line's rate. Every recurring service, such as daily breakfast, is added too.

The registration card

Many countries require a signed registration card for each stay. Open the booking, press the gear or Print menu and choose **Guest Registration Card**. It carries the reservation, the guest's name, nationality, ID type and number, phone and email, the rooms and the dates, with a space for the guest to sign. The ID details come from the guest's contact, so fill them in on the Guests screen first.

Check-in / Check-out	11/03/2026 → 11/06/2026 (3 nights)
Room(s)	201
Guests	2 Adult(s), 0 Child(ren)

Guest Signature

Front-desk Agent

I confirm the above details are correct and agree to the hotel's terms, conditions and privacy policy.

The guest registration card for RES/2026/00001, ready to print and sign.

PART 7 During the stay: the folio

The folio is the guest's running bill. The room nights are already on it from check-in. Everything else the guest uses during the stay, a laundry bag, a spa treatment, a taxi to the airport, is added as a line.

IN THIS PART YOU WILL LEARN

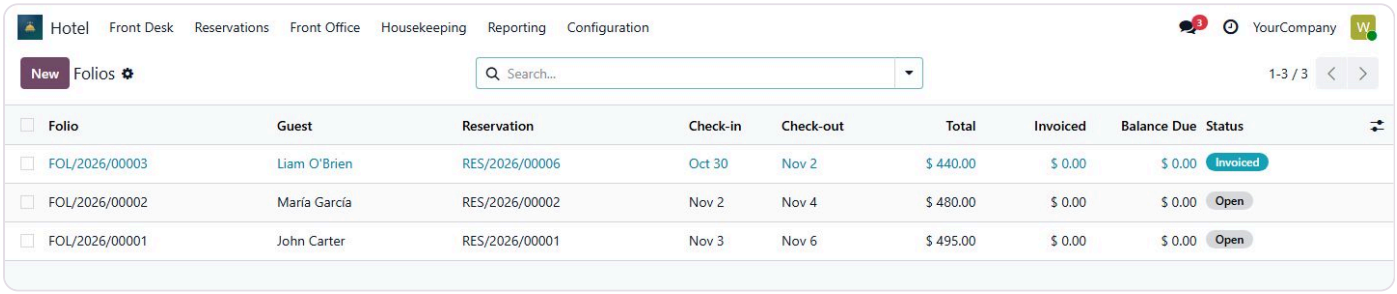

- Opening a guest's folio from the booking or from Front Office
- Adding an extra from the service list
- Adding a one-off charge that is not on the list
- Keeping the room charges right when a stay is extended

TRY IT YOURSELF ON THE DEMO

1. Front Office, then Folios: open FOL/2026/00001
2. Read the room line and the breakfast line
3. Open FOL/2026/00002 and compare

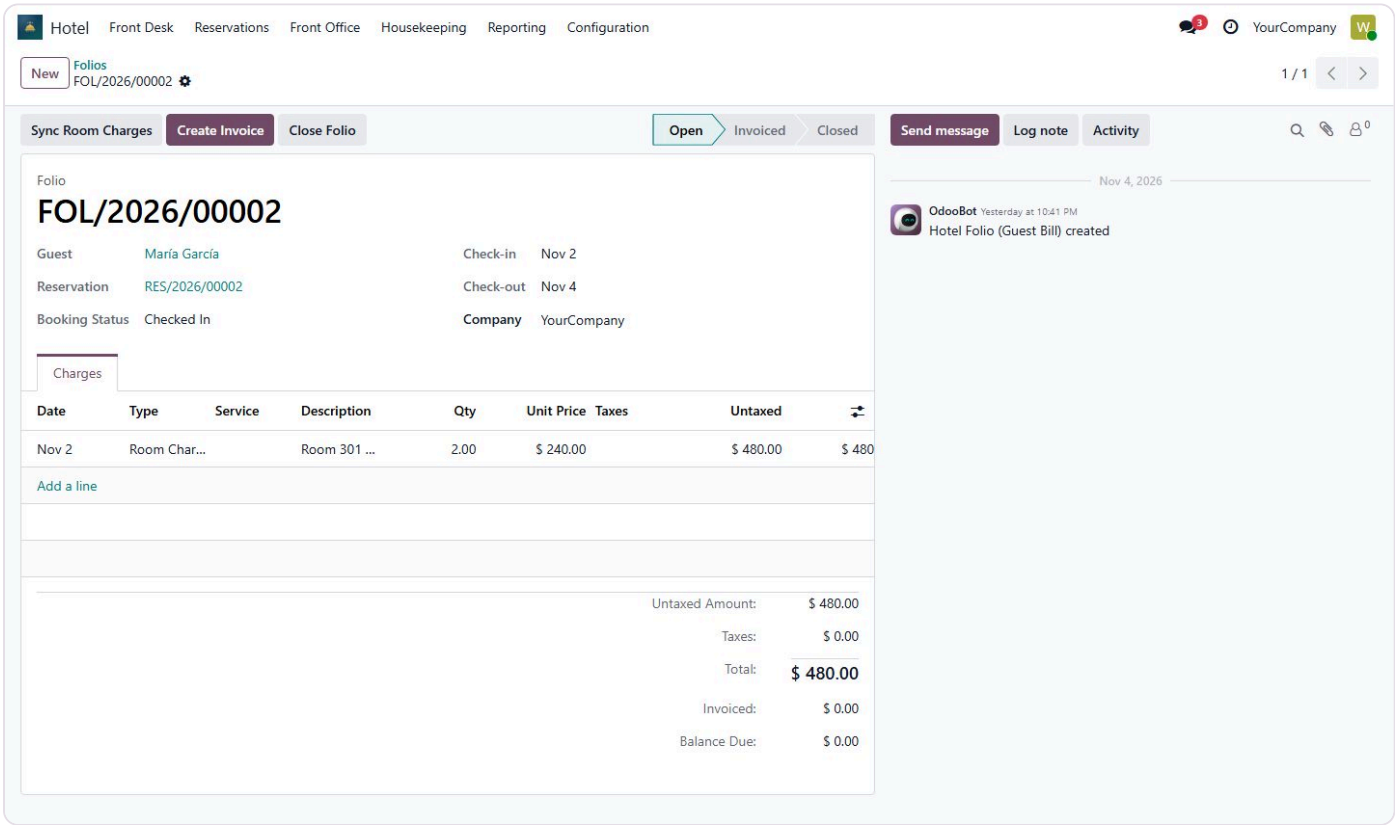

1 Front Office, then Folios

Every folio with its guest, booking, dates, booking status, total, balance due and status. Filter on Open, Invoiced, Closed or Balance Due, or group by status or guest.

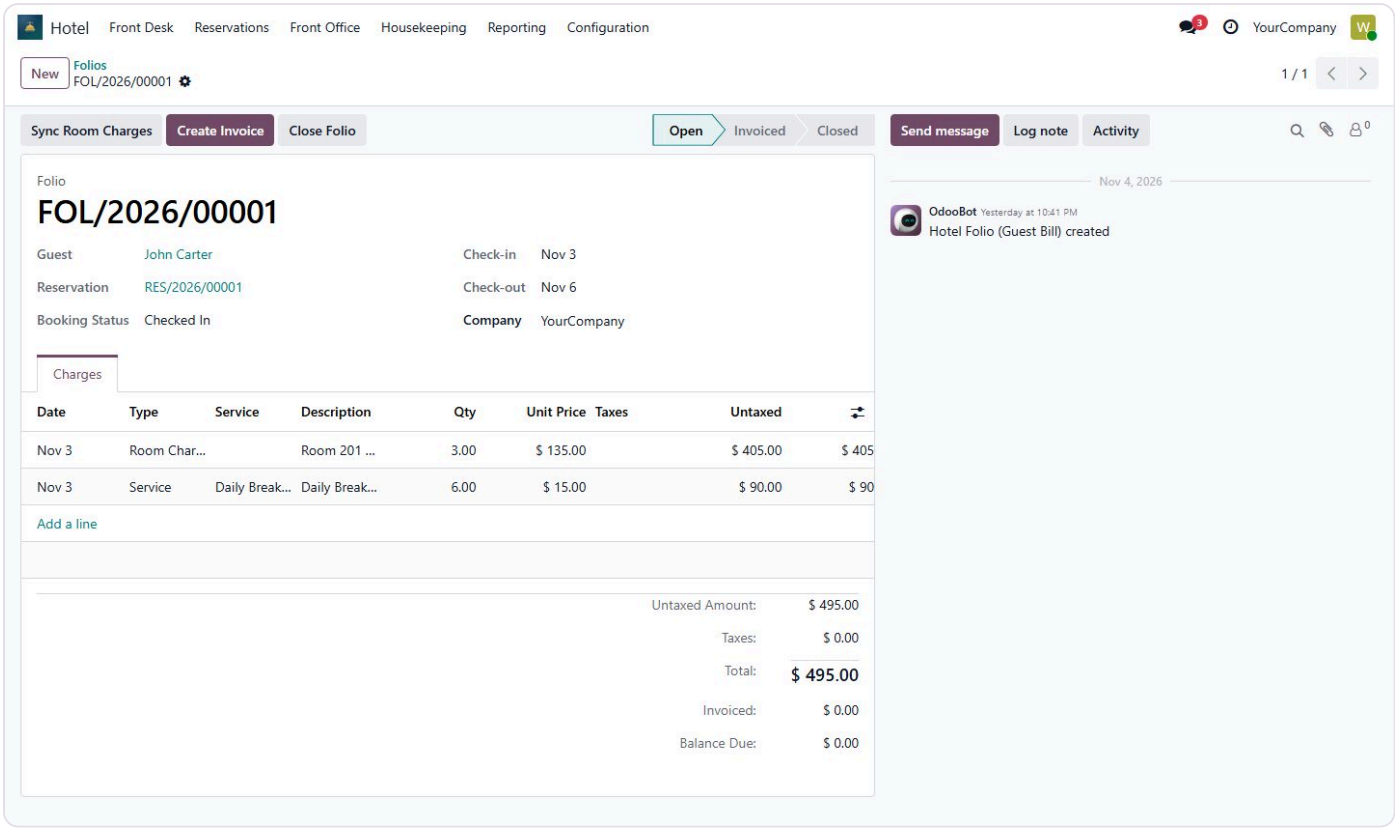

2 Open the folio

The header shows the guest, the booking and its status, and the dates. The Charges tab holds the lines: date, type, service, description, quantity, unit price, taxes, untaxed amount and total.

3 Add an extra

Press Add a line. Pick the service and the description, the price and the taxes fill in from it, and the type becomes Service. Set the quantity and the date it was used. For a charge that is not on the service list, leave the service empty, set the type to Other and type the description and the price.

LINE TYPE	WHERE IT COMES FROM
Room Charge	Written by check-in, one per room on the booking, and kept in line with the stay.
Service	Picked from the service list, by hand or automatically for recurring services.
Other	Anything typed in by hand: a damage charge, a late check-out fee.

Extending or shortening a stay

If the guest stays an extra night, change the check-out date on the booking and on its room line. Then press **Sync Room Charges** on the folio. Each room charge line is rewritten with the current nights, rate and room, without adding a second line. The same sync also runs every night for every checked in guest, as a safety net.

> Recurring services are added once at check-in with the nights the stay had then. If the stay changes, correct the quantity on the breakfast line by hand: the sync only touches room charges.

Folio totals

TOTAL	WHAT IT IS
Untaxed Amount	The lines before tax.
Taxes	The taxes on the lines, worked out by Odoo's own tax engine.
Total	What the guest owes for the stay.
Invoiced	The total of the posted invoices raised from this folio.
Balance Due	What is still unpaid on those posted invoices.

PART 8 Checking a guest out

Check-out frees the rooms for the next guest and tells housekeeping. Invoice the folio before or after, whichever suits your desk.

IN THIS PART YOU WILL LEARN

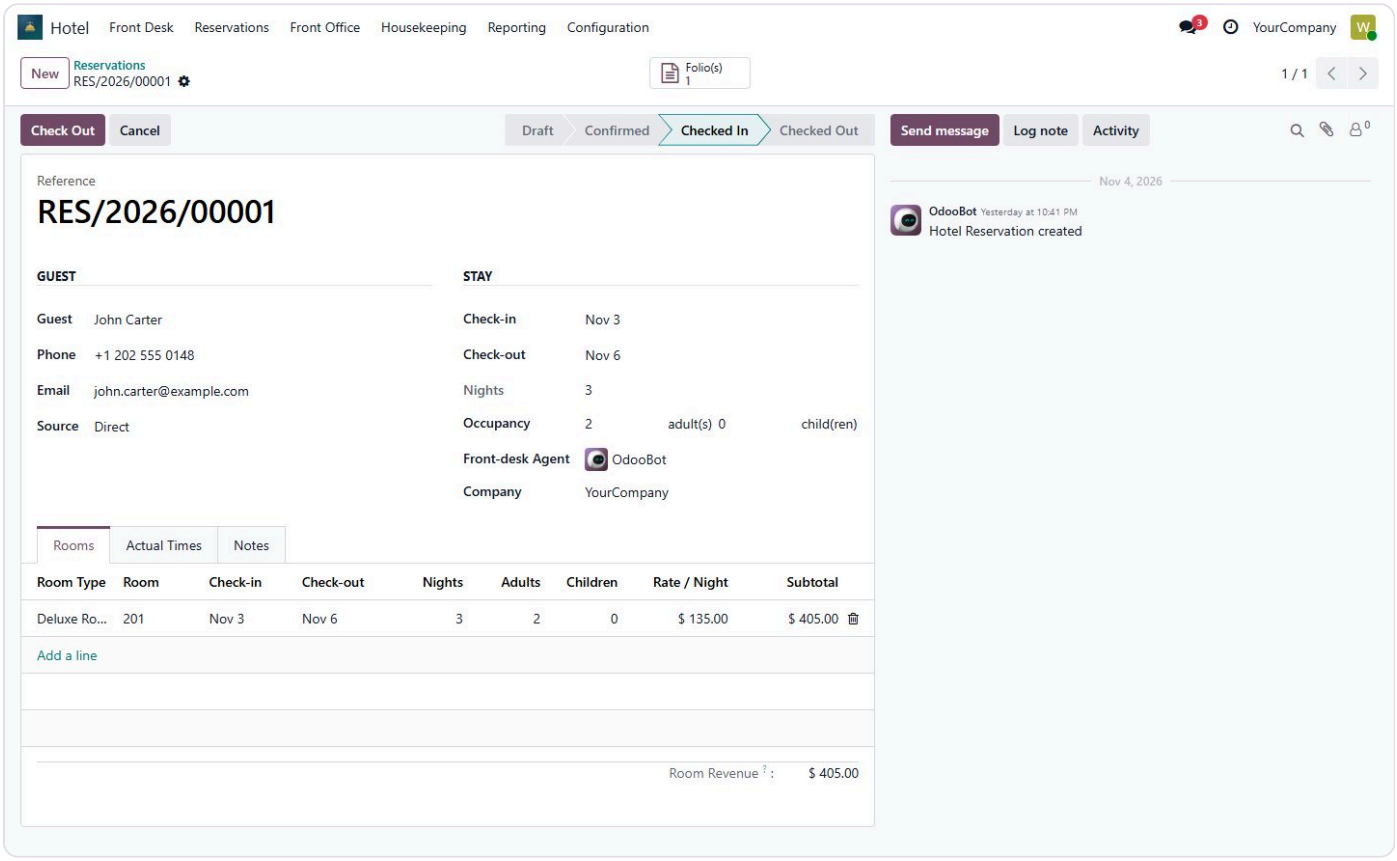

- What check-out changes on the booking and the rooms
- The cleaning task that is raised for each room
- The departure reminder that lands on the agent's list

TRY IT YOURSELF ON THE DEMO

1. Open RES/2026/00006, which is checked out
2. Read its Actual Times tab
3. Open Housekeeping and find the tasks raised by departures

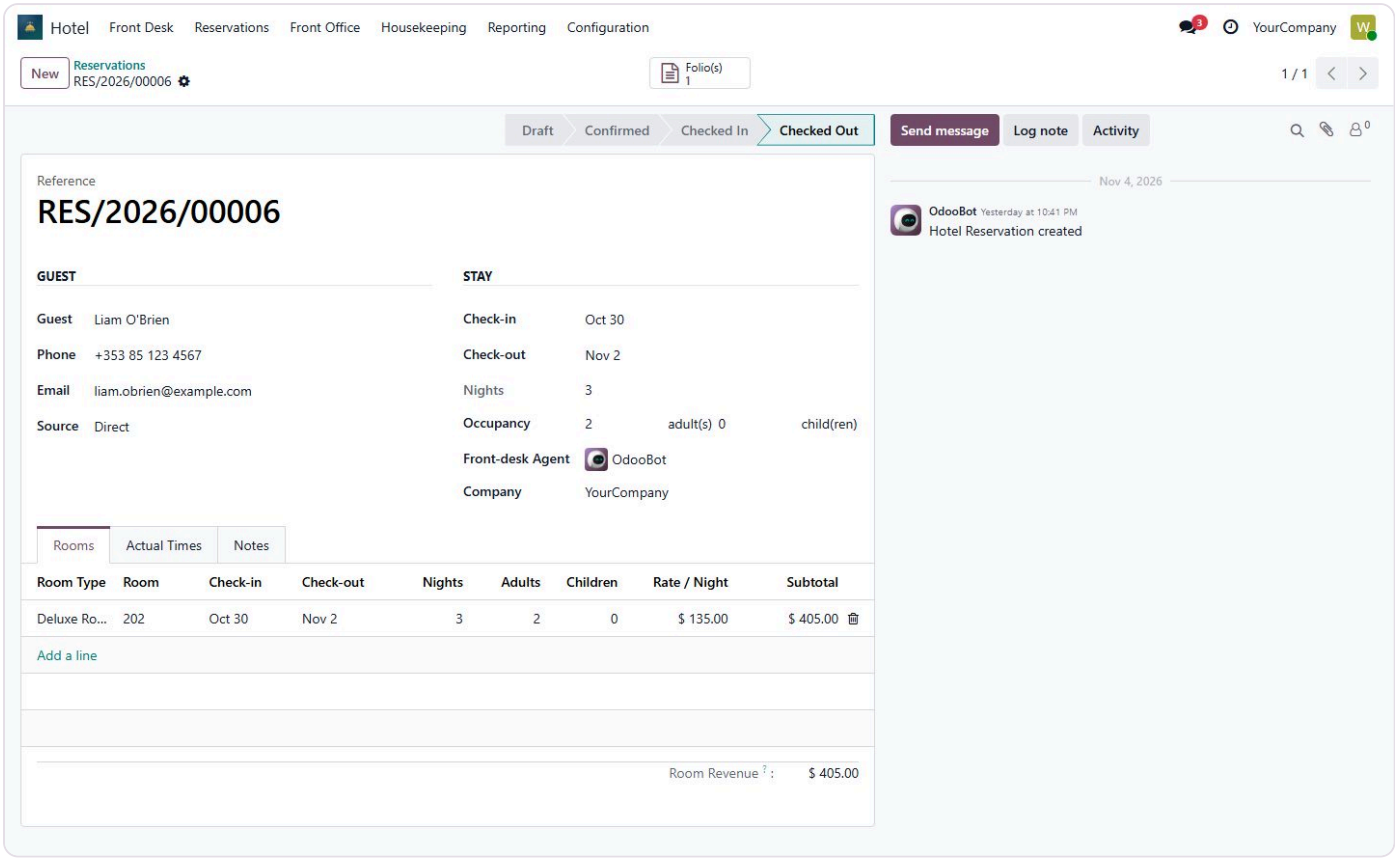

1 Press Check Out on the in house booking

Only a checked in booking can be checked out. The status moves to Checked Out and Actual Departure is stamped.

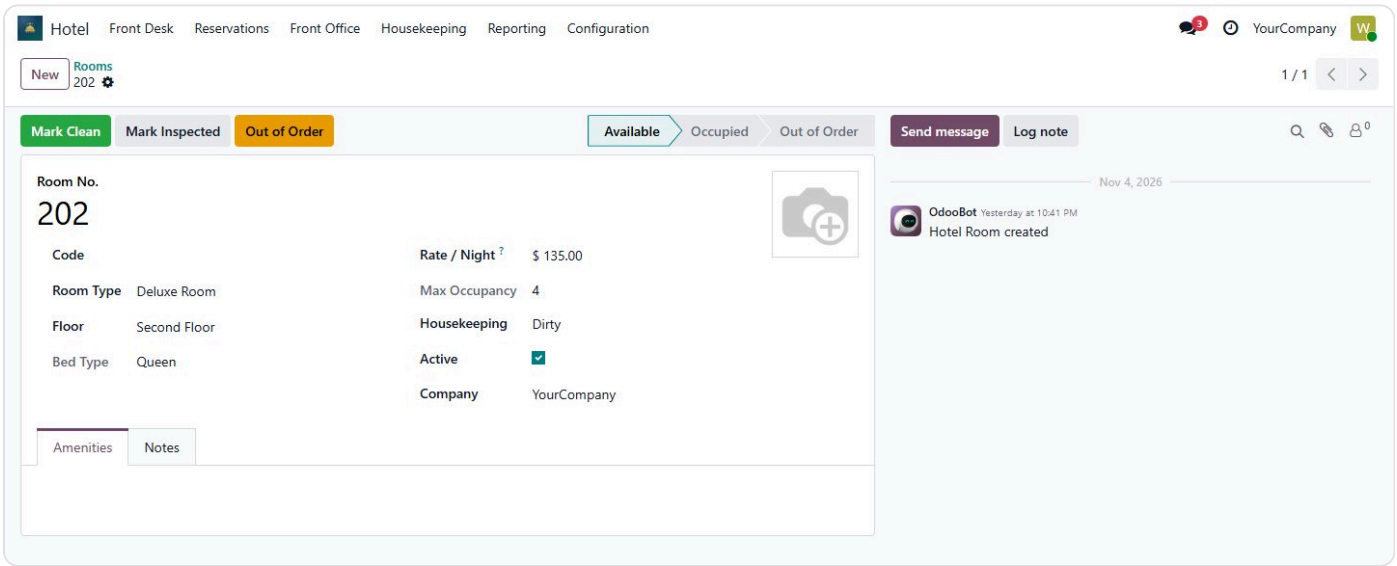

2 The booking is closed

A checked out booking keeps its folio link and its history. It cannot be cancelled any more, because the stay has happened.

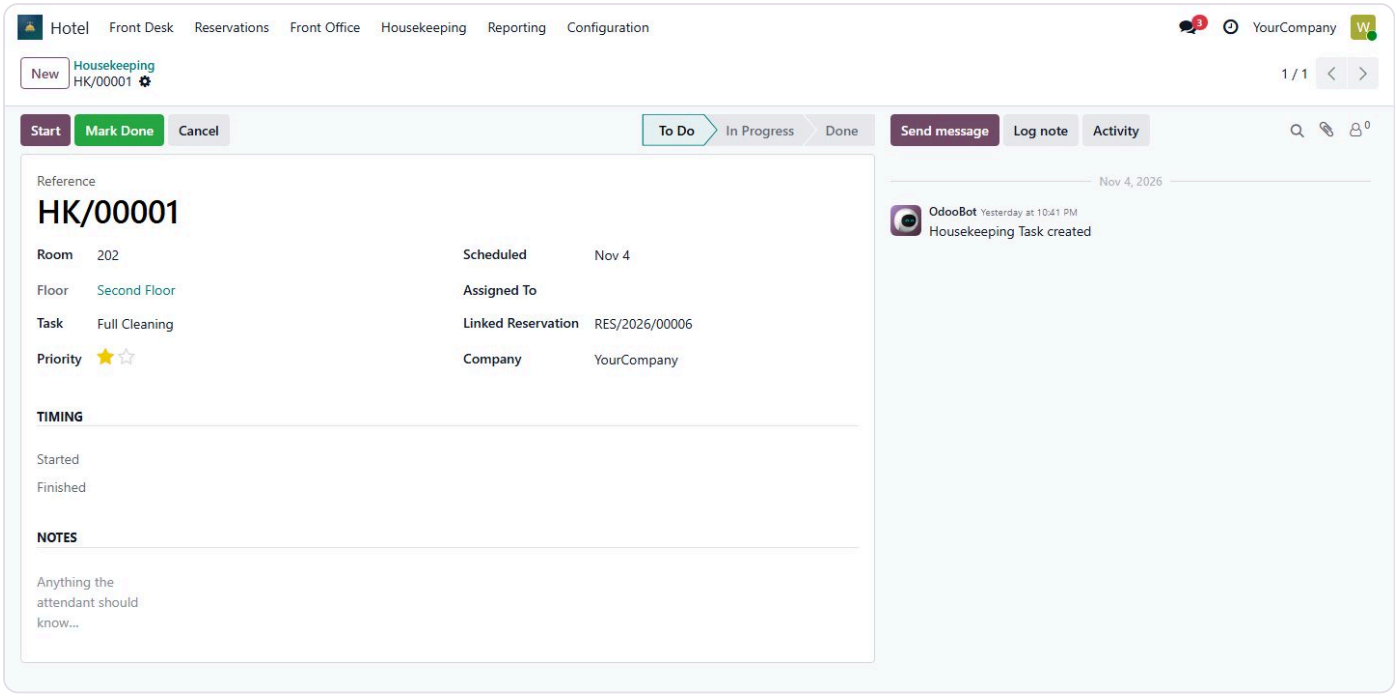

3 The room is freed and marked Dirty

Each room goes back to Available, so it can be sold again, and its housekeeping state goes to Dirty, so nobody puts a guest in it before it is cleaned.

4 A cleaning task is raised

With Auto Housekeeping on Check-out switched on, a Full Cleaning task dated today is created for each room, linked to the booking.

Departure reminders: each day a job looks for guests still checked in whose check-out date has come, and puts a to-do called Departure due on the front desk agent's activity list. Nobody leaves without being checked out in the system.

Check-out does not ask whether the folio has been paid. Make invoicing and taking payment part of the desk routine before you press the button.

PART 9 Cancellations, no-shows and starting again

Not every booking ends in a stay. A cancelled or no-show booking gives its rooms back at once, and either can be put back to draft if the guest comes back to you.

IN THIS PART YOU WILL LEARN

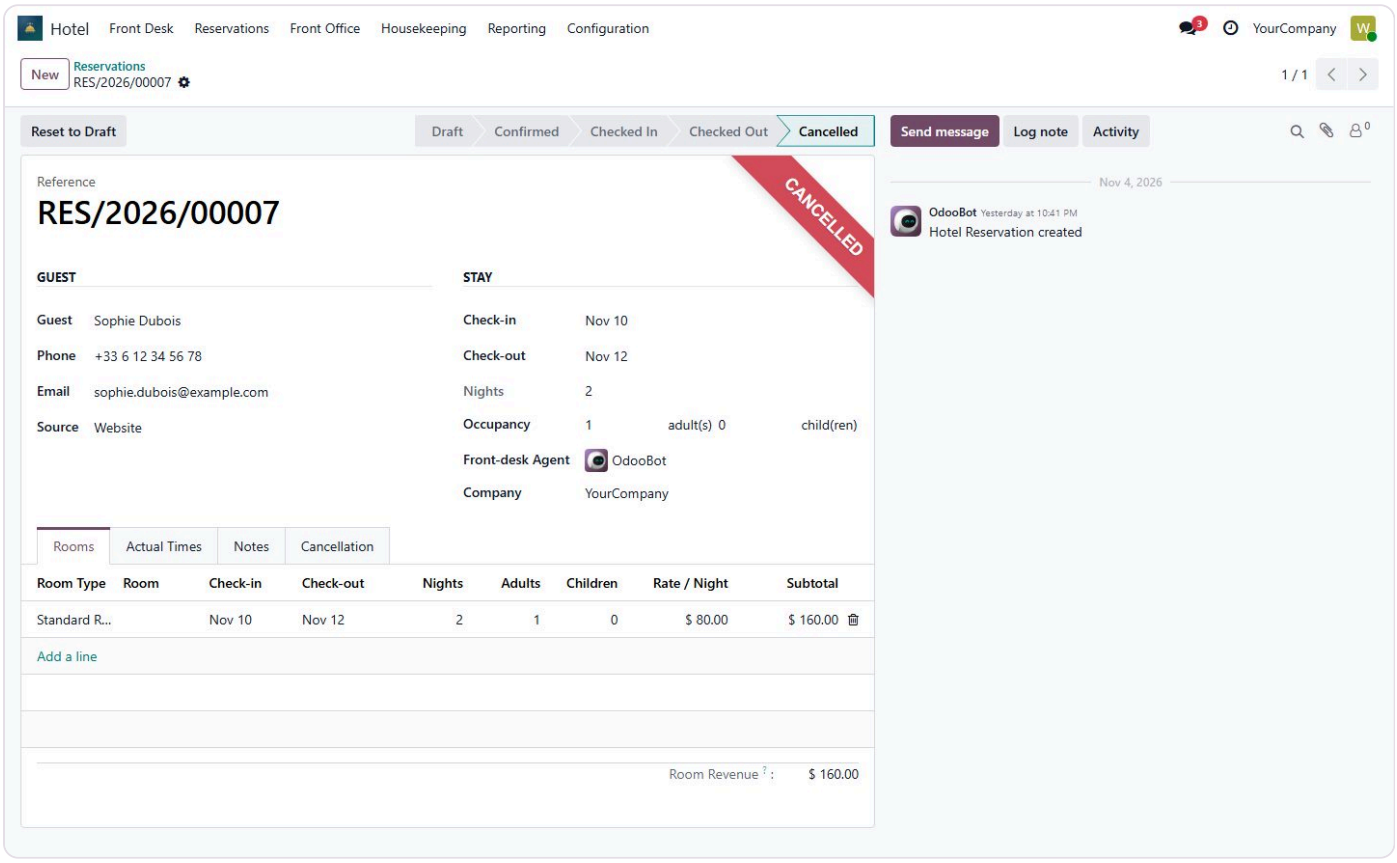

- Cancelling a booking at any stage before check-out
- Marking a no-show by hand, and the daily job that does it for you
- Reset to Draft

TRY IT YOURSELF ON THE DEMO

1. Open RES/2026/00007, the cancelled booking
2. Find the Reset to Draft button on it

1 Cancel

Press Cancel on a confirmed or checked in booking. The status moves to Cancelled and its rooms stop counting against availability. If the guest was checked in, the rooms are put back to Available. Write the reason in the Cancellation Reason field on the Notes tab so it is on record.

ACTION	ALLOWED FROM	WHAT HAPPENS
Cancel	Confirmed, Checked In	Status Cancelled. Rooms are free again. A draft has no Cancel button: it holds no room yet, so leave it or delete it. A checked out stay cannot be cancelled.
No Show	Confirmed	Status No Show. The rooms are free for those nights.
Reset to Draft	Cancelled, No Show	Back to Draft, ready to change and confirm again.

The daily no-show job

Every day the scheduled action **Hotel: Detect No-shows** marks every booking that is still Confirmed with a check-in date before today as a no-show, and writes "Automatically marked as no-show" in its history. A late arrival who turns up the next morning can be put back to draft, confirmed and checked in.

PART 10 The room board

The room board is the front desk's view of the building: one card per room, in a column per status, each with its housekeeping state.

IN THIS PART YOU WILL LEARN

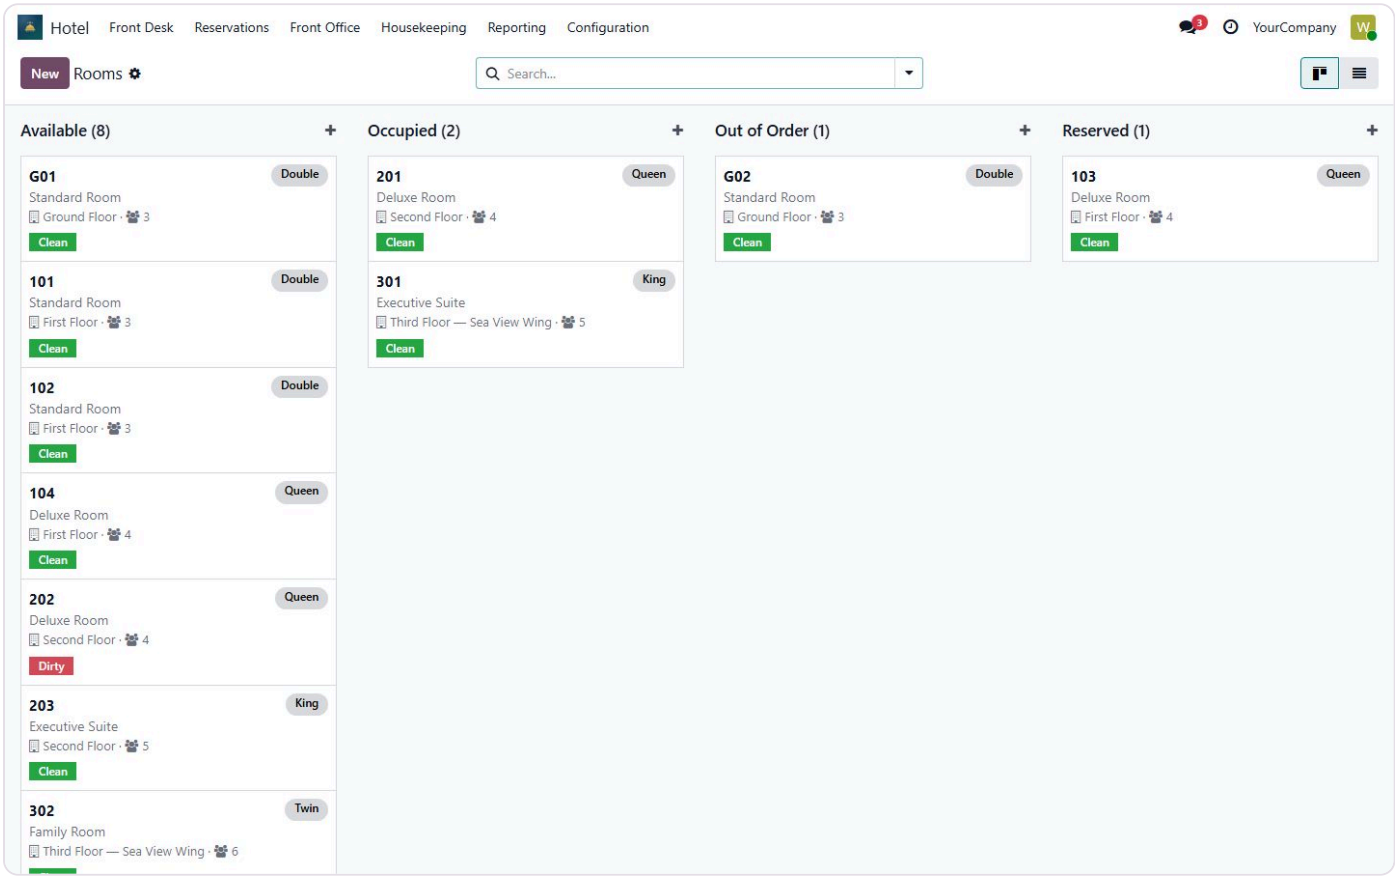

- Reading a room card
- The Current Occupancy block on a room
- Mark Clean, Mark Dirty and Mark Inspected
- Taking a room out of order and putting it back

TRY IT YOURSELF ON THE DEMO

1. Front Office, then Rooms: find the dirty room
2. Open room 201 and read who is in it
3. Open G02, the room out of order

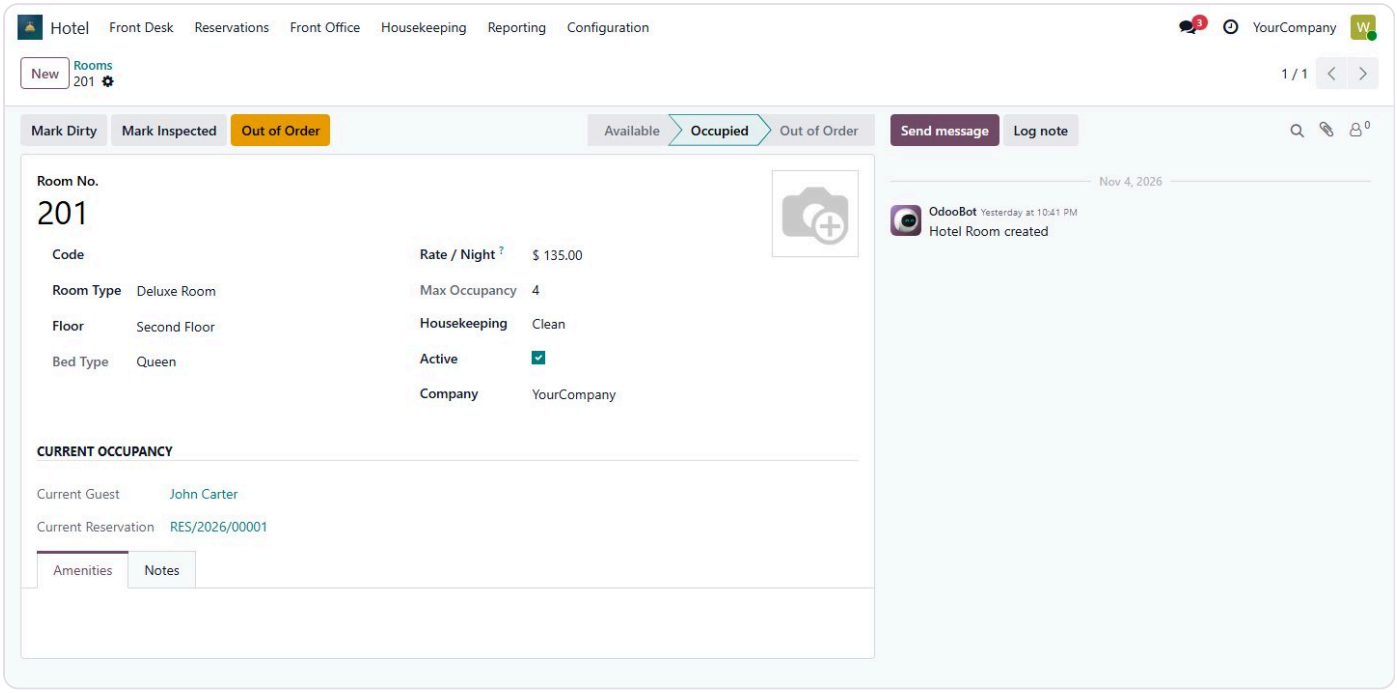

1 Front Office, then Rooms

Columns for Available, Occupied, Reserved and Out of Order. Each card shows the room number, type, floor, how many it sleeps, the bed and a coloured housekeeping badge. Filter on Available, Occupied, Out of Order, Clean or Dirty, or group by floor, type or housekeeping.

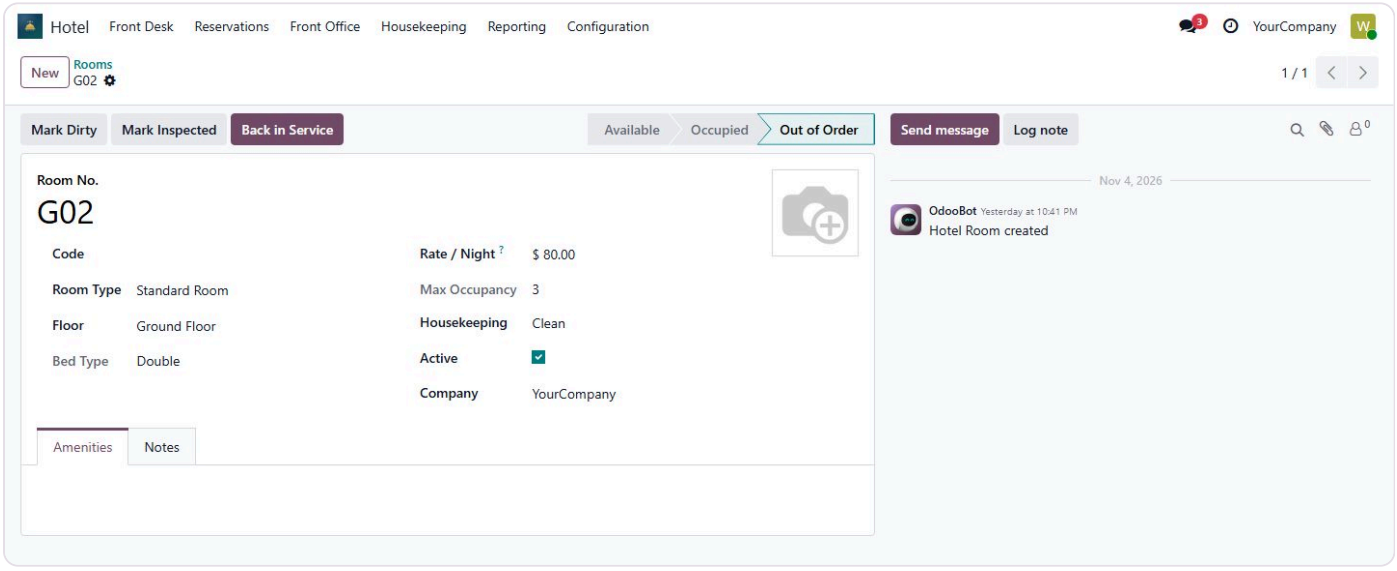

2 Open an occupied room

The Current Occupancy block names the booking that is checked in to this room and the guest. The header buttons change the housekeeping state by hand: Mark Clean, Mark Dirty, Mark Inspected.

3 Out of order

Press Out of Order to take a room off sale for a repair. It cannot be confirmed onto a booking or checked into while it is out of order. Back in Service puts it back to Available.

> Reserved is a status you can see and filter on. Confirming a booking does not move a room to Reserved by itself, so the Reserved count on the dashboard is what the desk has set by hand.

PART 11 Housekeeping

Housekeeping has its own board, and every task on it moves the room it belongs to. Start a cleaning and the room shows Cleaning in Progress. Finish it and the room is Clean, ready to sell.

IN THIS PART YOU WILL LEARN

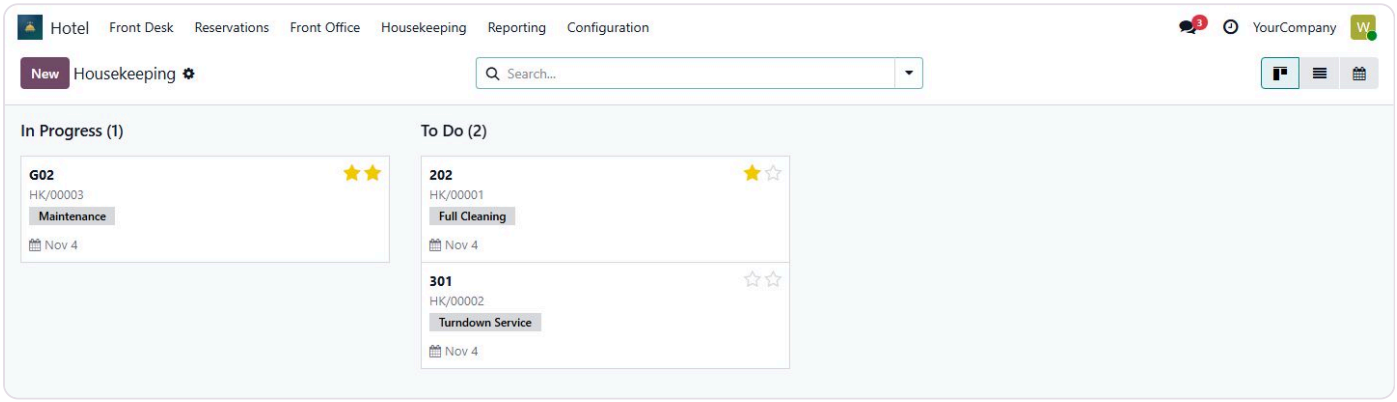

- The five kinds of task and the three priorities
- The board, the list and the calendar
- Start, Mark Done, Cancel and Reset, and what each does to the room
- Running the board from a phone

TRY IT YOURSELF ON THE DEMO

1. Open Housekeeping and read the three tasks
2. Open HK/00003, the urgent maintenance job in progress
3. Filter on Today, then on Assigned to Me

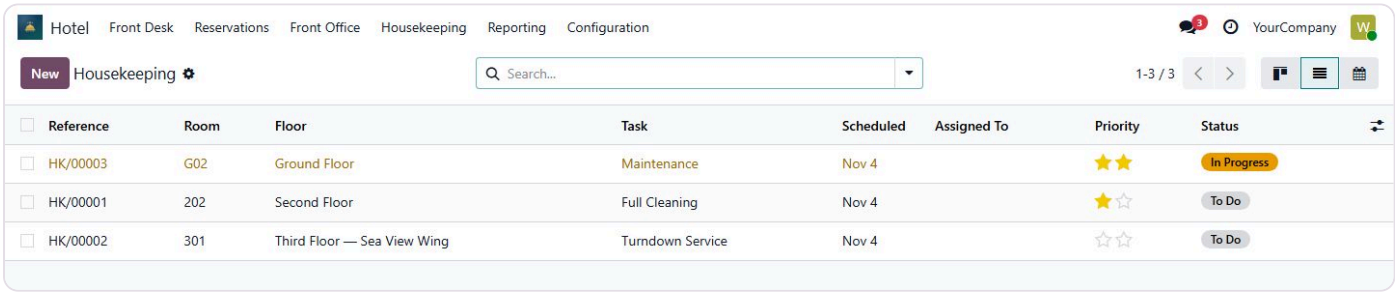

1 Open Housekeeping

A column per status: To Do, In Progress, Done and Cancelled. Each card shows the task, the room, the floor, the priority stars and who it is assigned to.

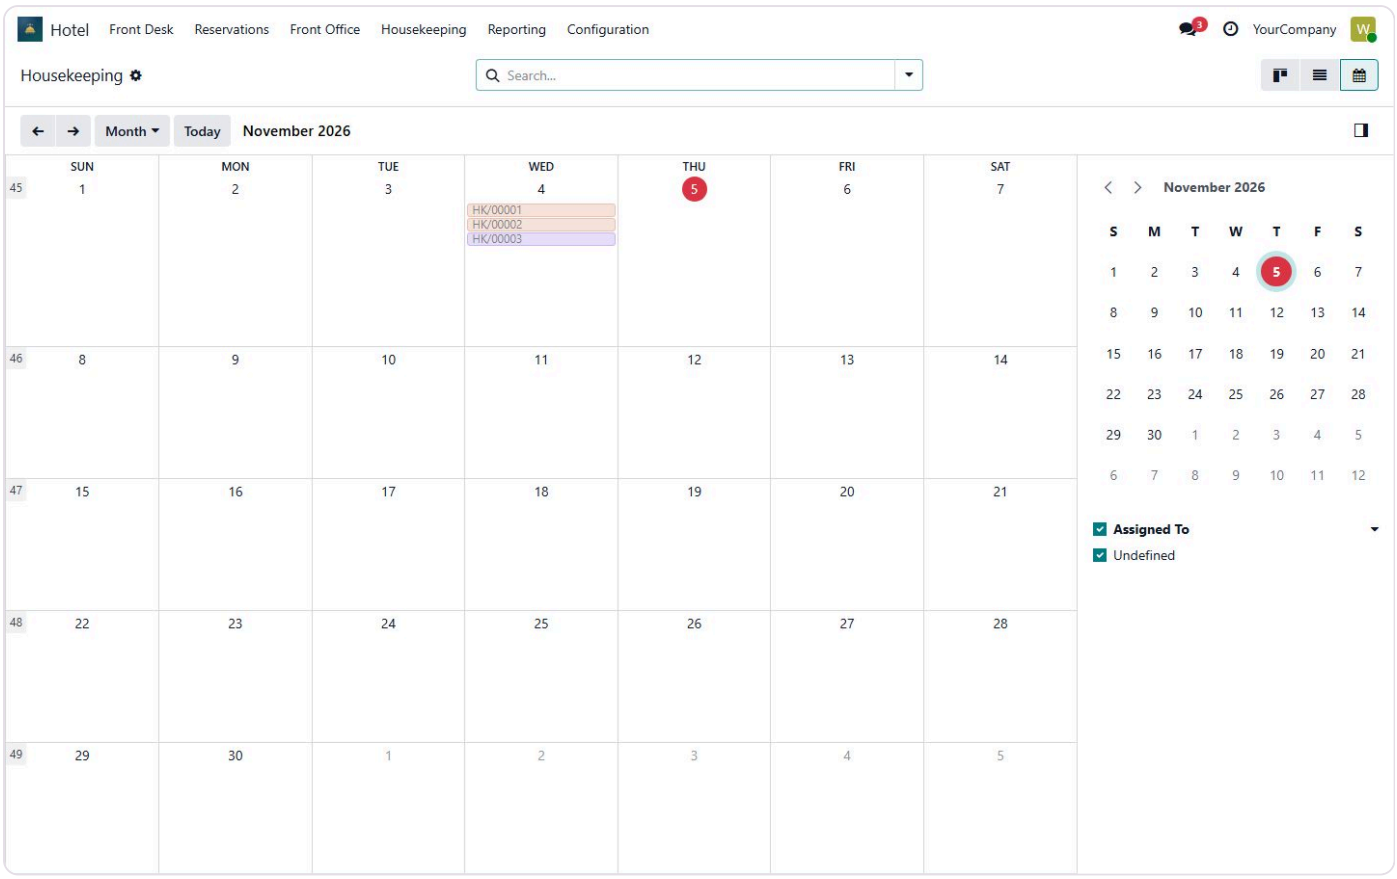

2 The list

The same tasks in a table. Filter on To Do, In Progress, Done, Today or Assigned to Me, or group by status, task type, floor, assignee or date.

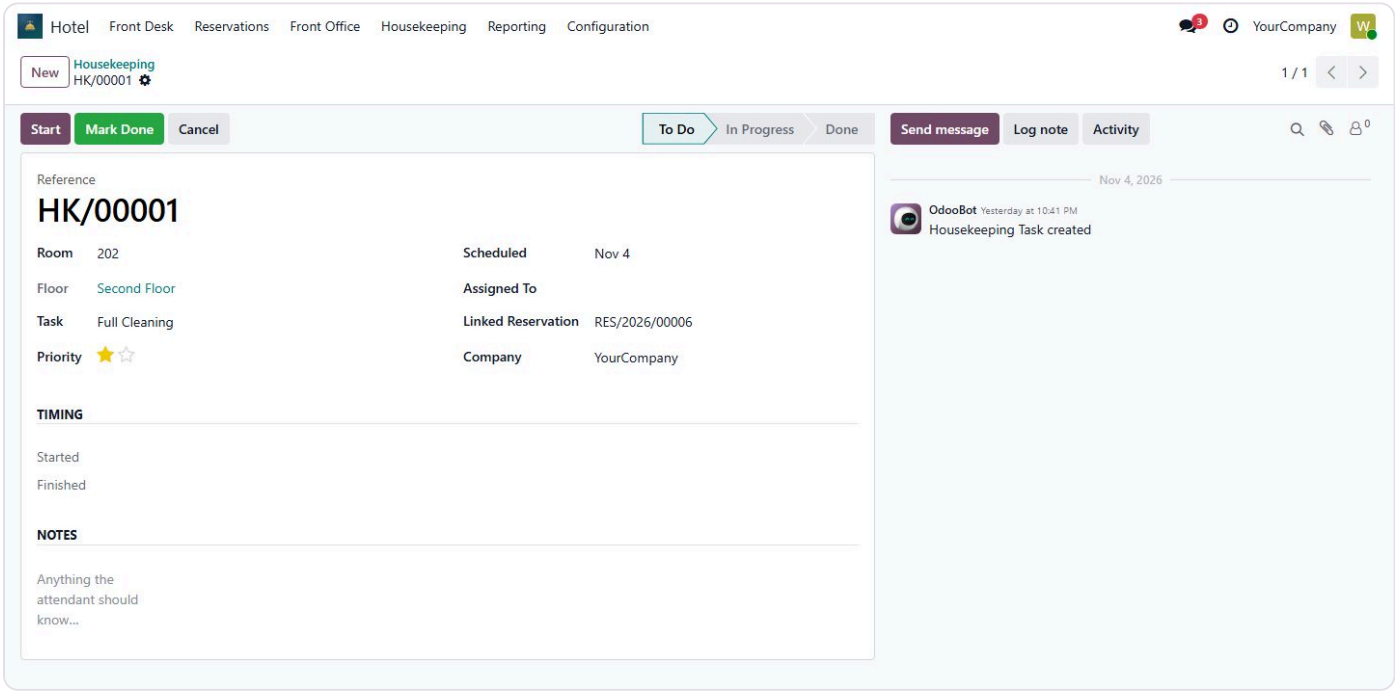

3 The calendar

Tasks by their scheduled date, for planning a deep clean or a maintenance round around the bookings.

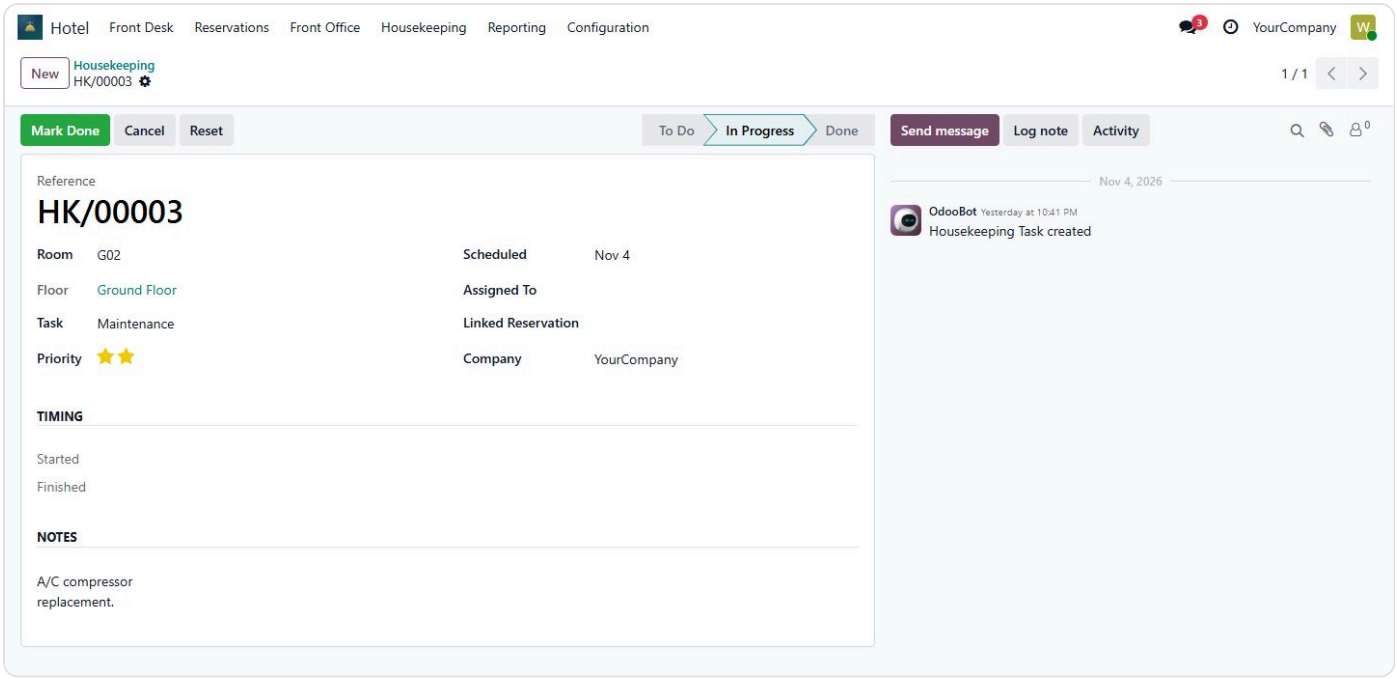

4 A task waiting to start

Each task has a room, a type, a priority, a scheduled date, the person it is assigned to and notes. The floor fills in from the room, and the linked reservation shows which departure raised it.

5 Start, then Mark Done

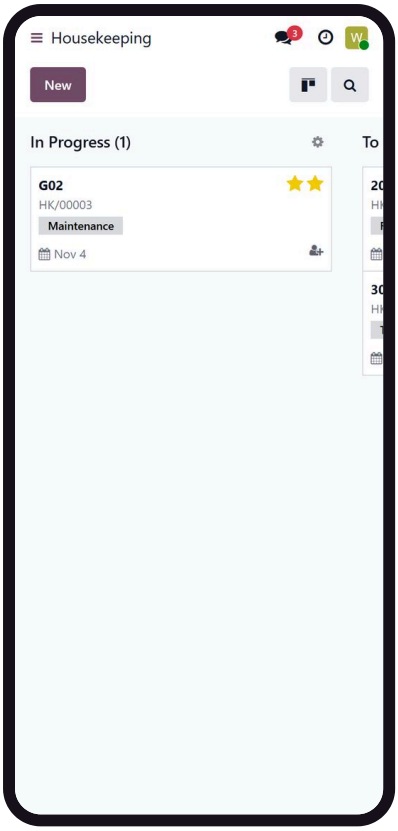

Start stamps the start time and sets the room to Cleaning in Progress. Mark Done stamps the finish time. A cleaning, turndown or linen change sets the room to Clean, an inspection sets it to Inspected. A maintenance task leaves the room's state alone. Cancel drops the task, Reset puts it back to To Do and clears the times.

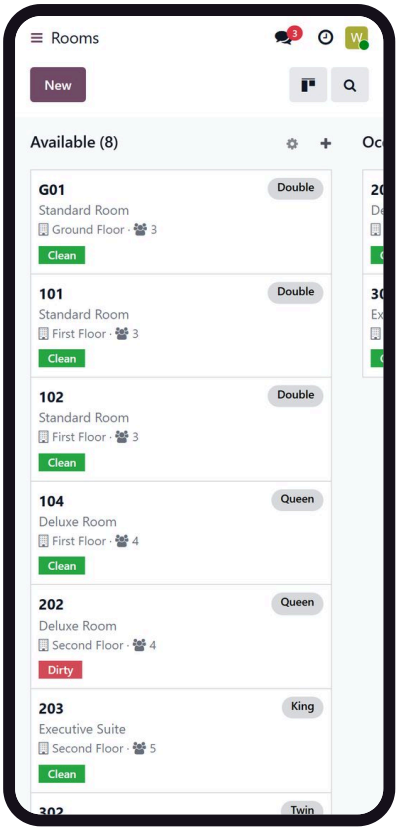

TASK	ROOM AFTERWARDS
Full Cleaning	Clean
Turndown Service	Clean
Linen Change	Clean
Inspection	Inspected
Maintenance	Unchanged. Use Back in Service on the room if it was out of order

On a phone

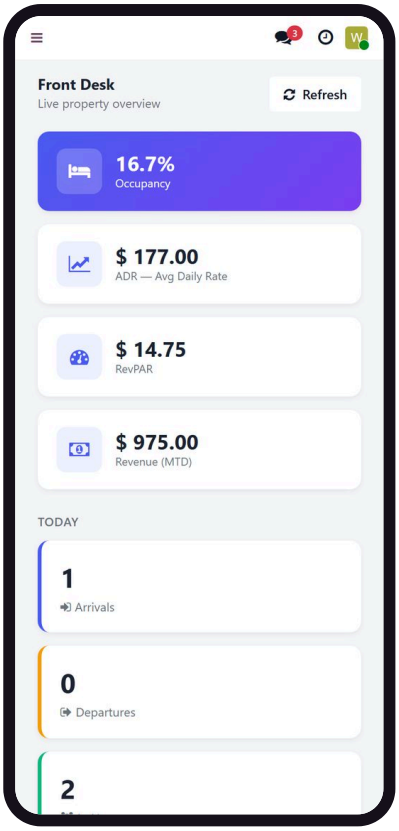

Housekeepers work on their feet. The same board opens in a phone browser, and the Start and Mark Done buttons are there on each task.

The housekeeping board on a phone.

The room board on a phone.

The Front Desk dashboard on a phone.

PART 12 From folio to invoice, and closing the folio

The folio is the hotel's record of the stay. The invoice is the accounting document. One button turns the first into the second, and the folio then tracks what has been paid.

IN THIS PART YOU WILL LEARN

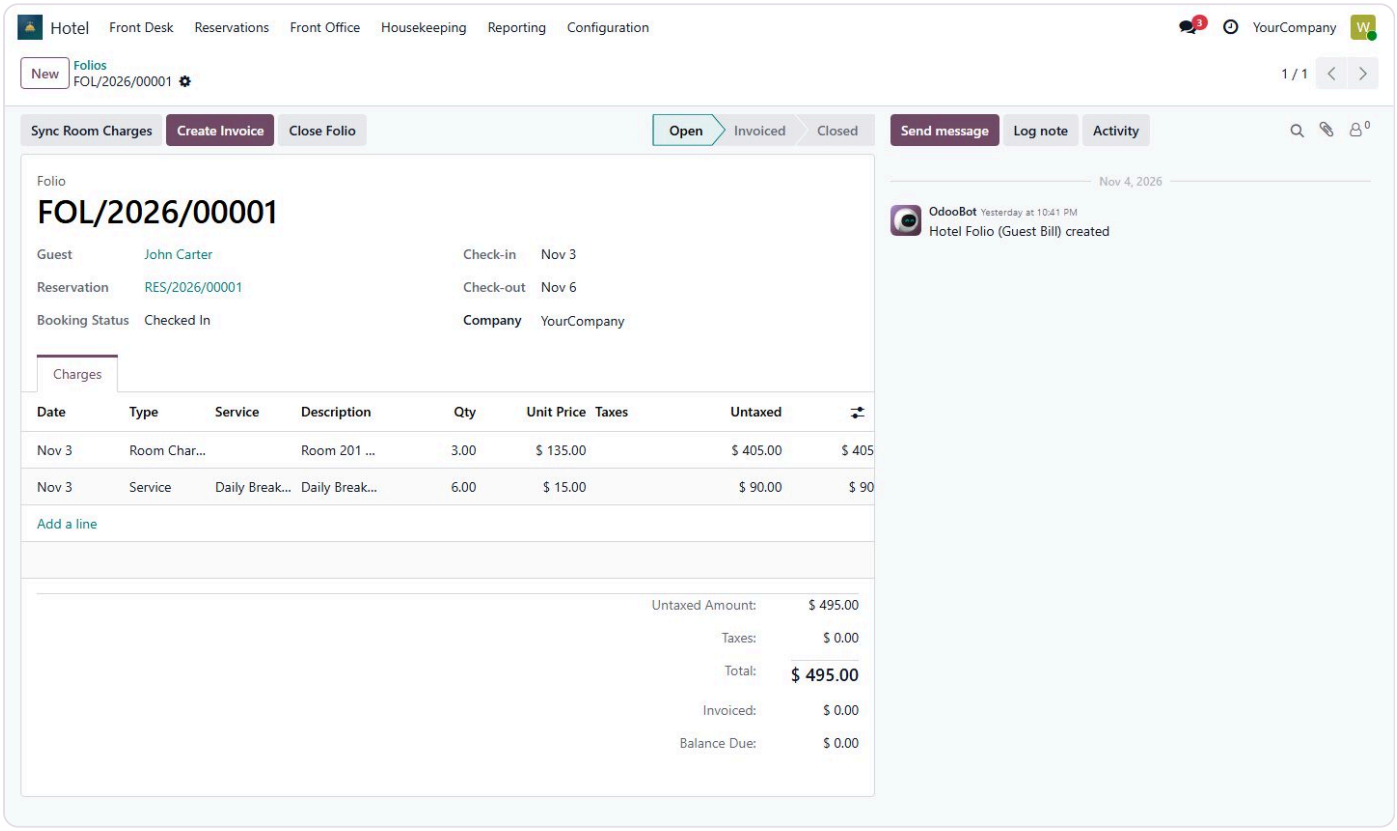

- Create Invoice, and what goes onto the invoice
- Invoiced, Balance Due and the Invoices button
- Close Folio and Reopen
- Printing the folio for the guest

TRY IT YOURSELF ON THE DEMO

1. Open FOL/2026/00003, which is invoiced
2. Open FOL/2026/00001 and print it from the Print menu

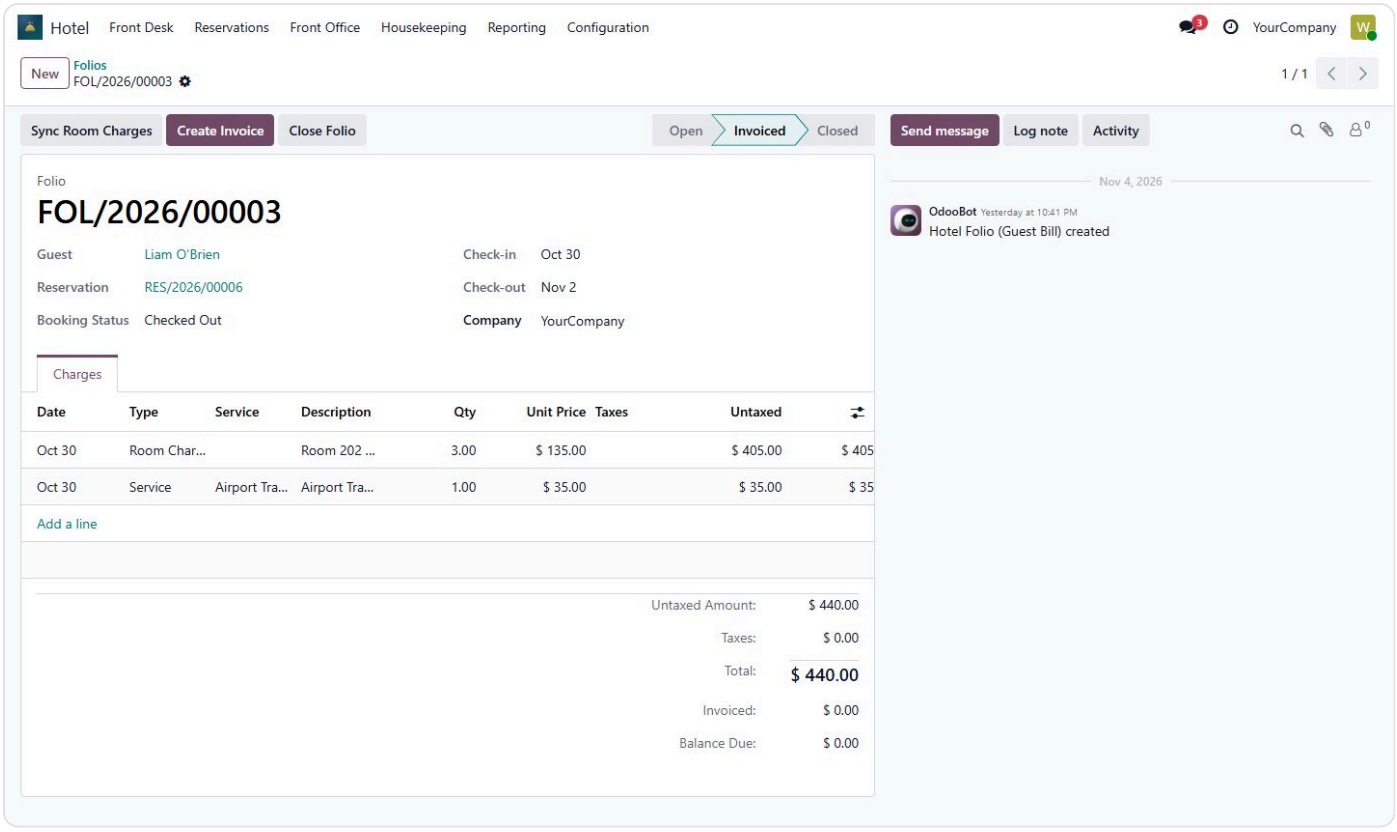

1 Press Create Invoice

A customer invoice is raised in Invoicing for the guest, with one line per folio line: the same description, quantity, price and taxes, booked to an income account. The folio's reference is written as the invoice origin and the invoice is linked back to the folio. The folio moves to Invoiced and the invoice opens.

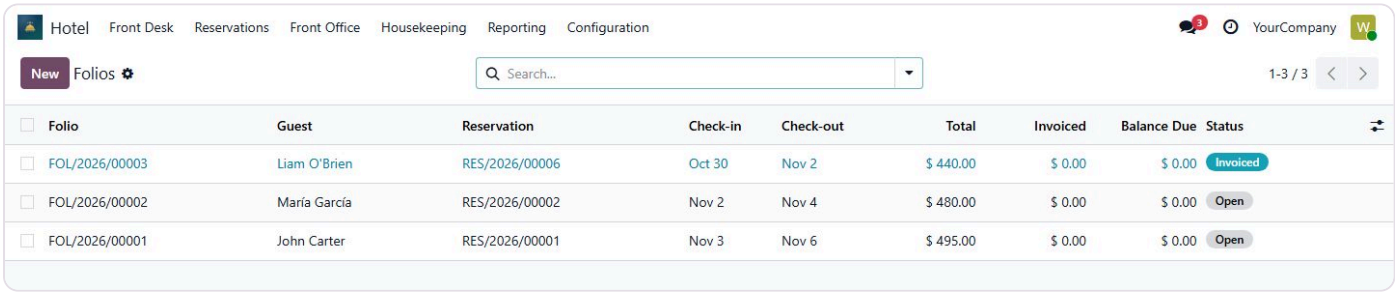

2 The invoiced folio

Post the invoice in Invoicing and register the payment there as usual. The folio's Invoiced and Balance Due figures follow the posted invoices, and the Invoices button opens them.

3 Close the folio

When the stay is billed and paid, press Close Folio. A closed folio hides Sync Room Charges and Create Invoice, and drops out of the balance due figure on the dashboard. Reopen brings it back to Open if something was missed.

One invoice per folio: Create Invoice bills every line on the folio each time it is pressed, and the button stays visible until the folio is closed. Invoice once, at the end of the stay, and close the folio straight after. For a charge found later, reopen, raise a separate invoice in Invoicing for just that line, and close again.

The printed folio

From the folio's Print menu choose **Folio / Guest Bill**. It lists the guest, the booking, the dates and every charge with its date, quantity, price and totals, for the guest to check before paying.

Guest Folio

Folio: FOL/2026/00001
Guest: John Carter
Reservation: RES/2026/00001

Check-in: 11/03/2026
Check-out: 11/06/2026

Date	Description	Qty	Unit Price	Total
11/03/2026	Room 201 — Deluxe Room	3.0	$ 135.00	$ 405.00
11/03/2026	Daily Breakfast	6.0	$ 15.00	$ 90.00

Untaxed	$ 495.00
Taxes	$ 0.00
Total	**$ 495.00**
Balance Due	$ 0.00

The guest folio for FOL/2026/00001.

PART 13 Guests

A guest is an ordinary Odoo contact with a hotel tab added. The same contact can be invoiced, emailed and found in every other app.

IN THIS PART YOU WILL LEARN

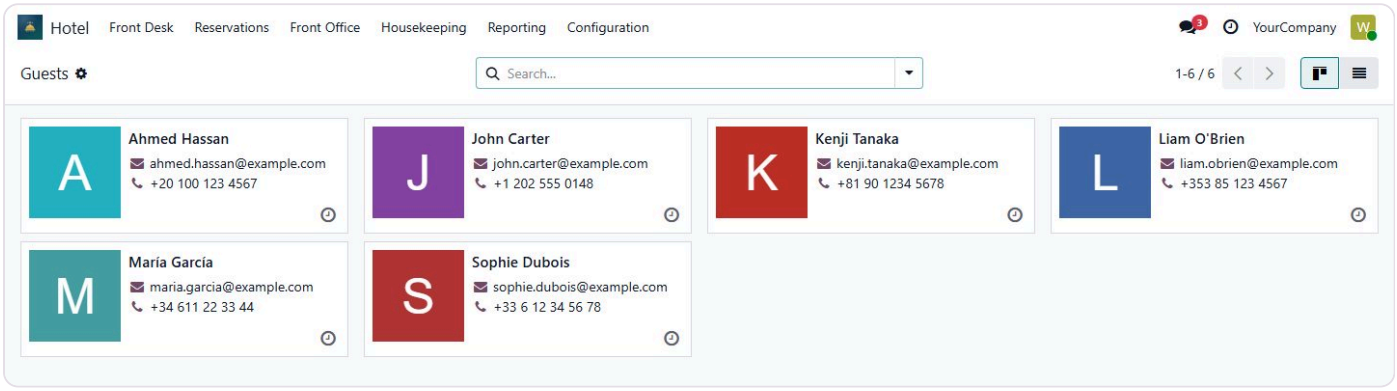

- The Guests list and who appears on it
- The guest's ID, nationality, date of birth and preferences
- VIP guests
- A guest's booking history

TRY IT YOURSELF ON THE DEMO

1. Front Office, then Guests: open John Carter
2. Read his hotel tab, then press the Reservations button

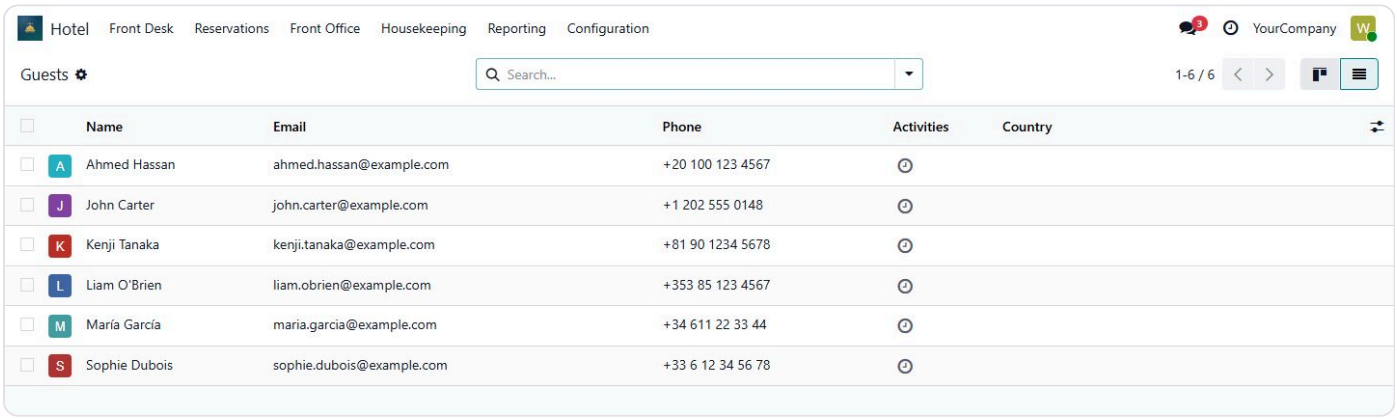

1 Front Office, then Guests

Contacts ticked as Hotel Guest. A contact created from here is ticked for you, and so is one created from a guest's Reservations button.

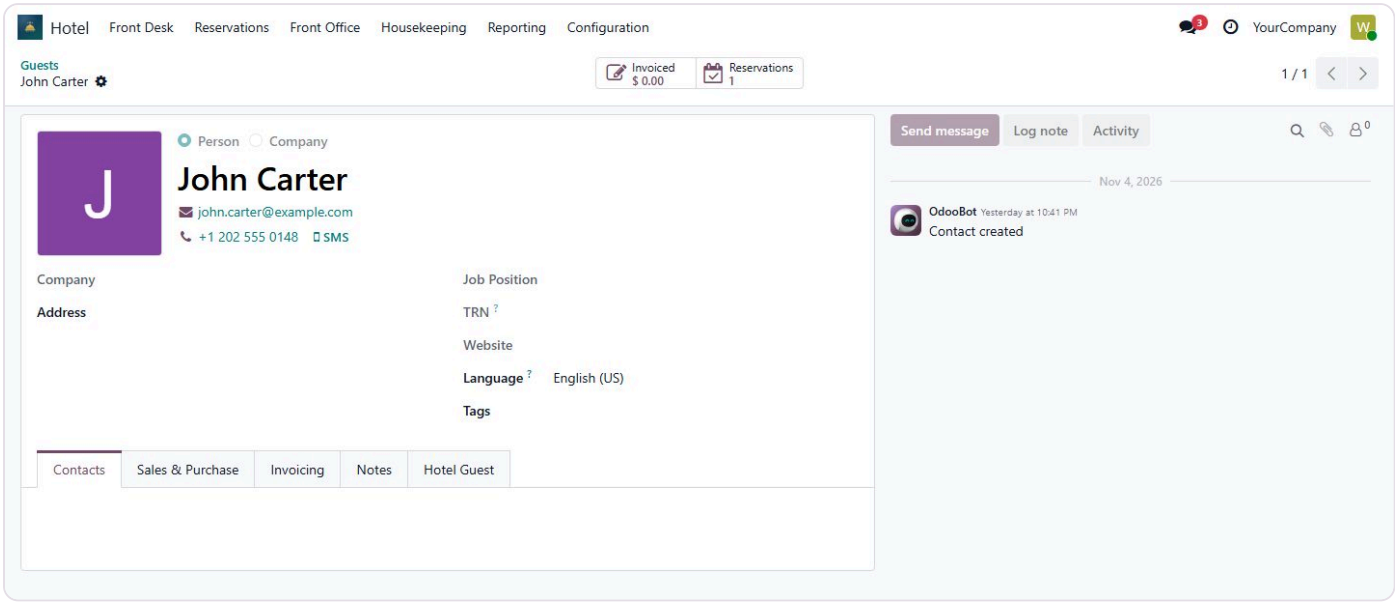

2 The list

The same guests in a table, with their phone and email, for a quick call-round.

3 Open a guest

The hotel section holds the Hotel Guest and VIP Guest ticks, the ID type (Passport, National ID, Driving License or Other) and number, nationality and date of birth, and a box for preferences: a quiet room, a feather-free pillow, an allergy. The Reservations button counts and opens every booking for this guest.

Fill in the ID and nationality before check-in. The registration card prints them from here.

PART 14 Reporting

Beyond the dashboard, the bookings can be cut any way you like in a pivot table or a chart. Reporting is a manager menu.

IN THIS PART YOU WILL LEARN

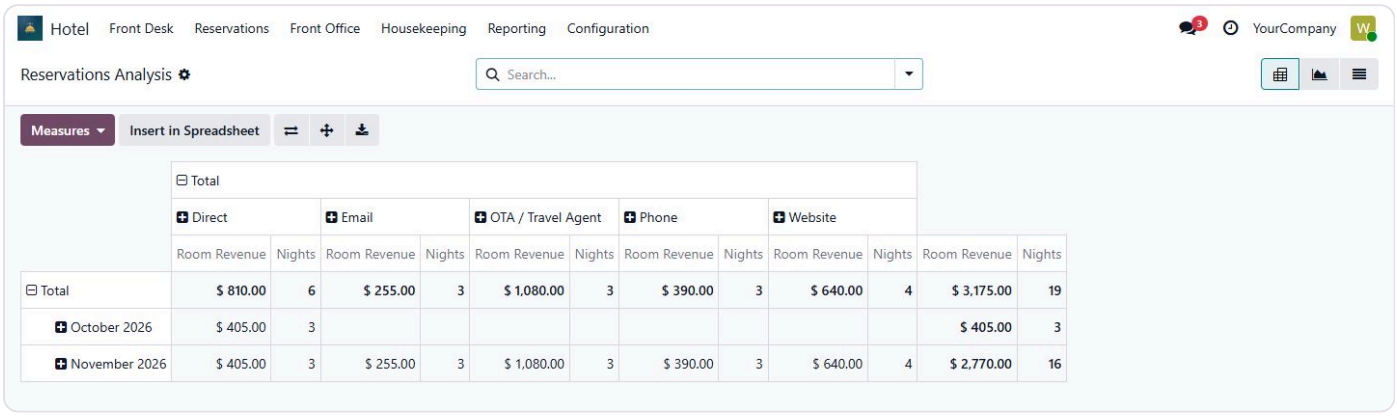

- Reservations Analysis as a pivot
- The same data as a graph
- The graph and pivot views on the Reservations screen

TRY IT YOURSELF ON THE DEMO

1. Reporting, then Reservations Analysis
2. Change the rows to Source, then to Room Type

1 Reporting, then Reservations Analysis

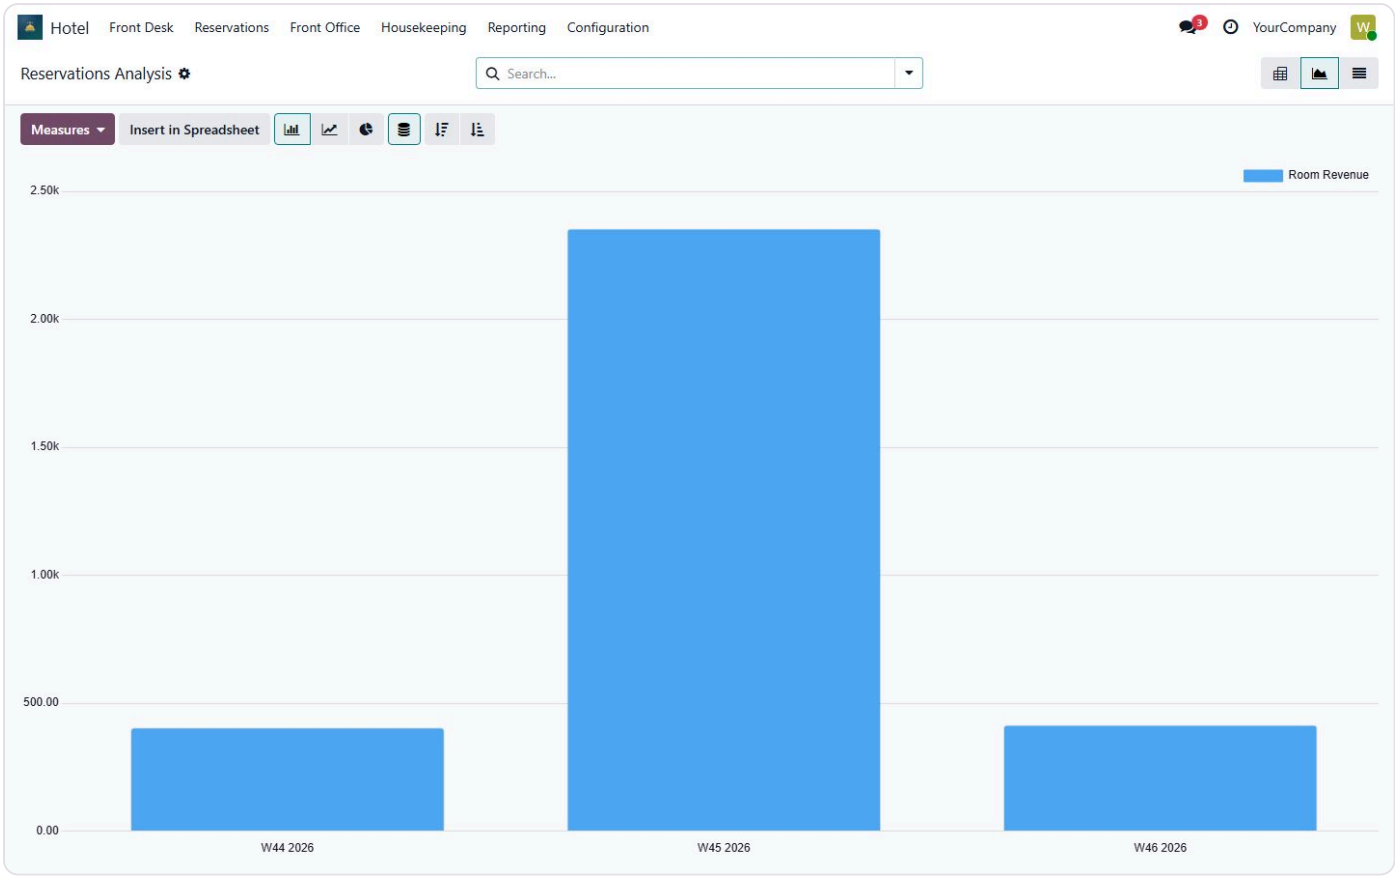

A pivot of the bookings with room revenue, nights and rooms. Put status, source, agent or check-in month on the rows or the columns, expand a cell to drill in, and download it to a spreadsheet.

	Total											
	Direct		Email		OTA / Travel Agent		Phone		Website			
	Room Revenue	Nights	Room Revenue	Nights	Room Revenue	Nights	Room Revenue	Nights	Room Revenue	Nights	Room Revenue	Nights
Total	$ 810.00	6	$ 255.00	3	$ 1,080.00	3	$ 390.00	3	$ 640.00	4	$ 3,175.00	19
October 2026	$ 405.00	3									$ 405.00	3
November 2026	$ 405.00	3	$ 255.00	3	$ 1,080.00	3	$ 390.00	3	$ 640.00	4	$ 2,770.00	16

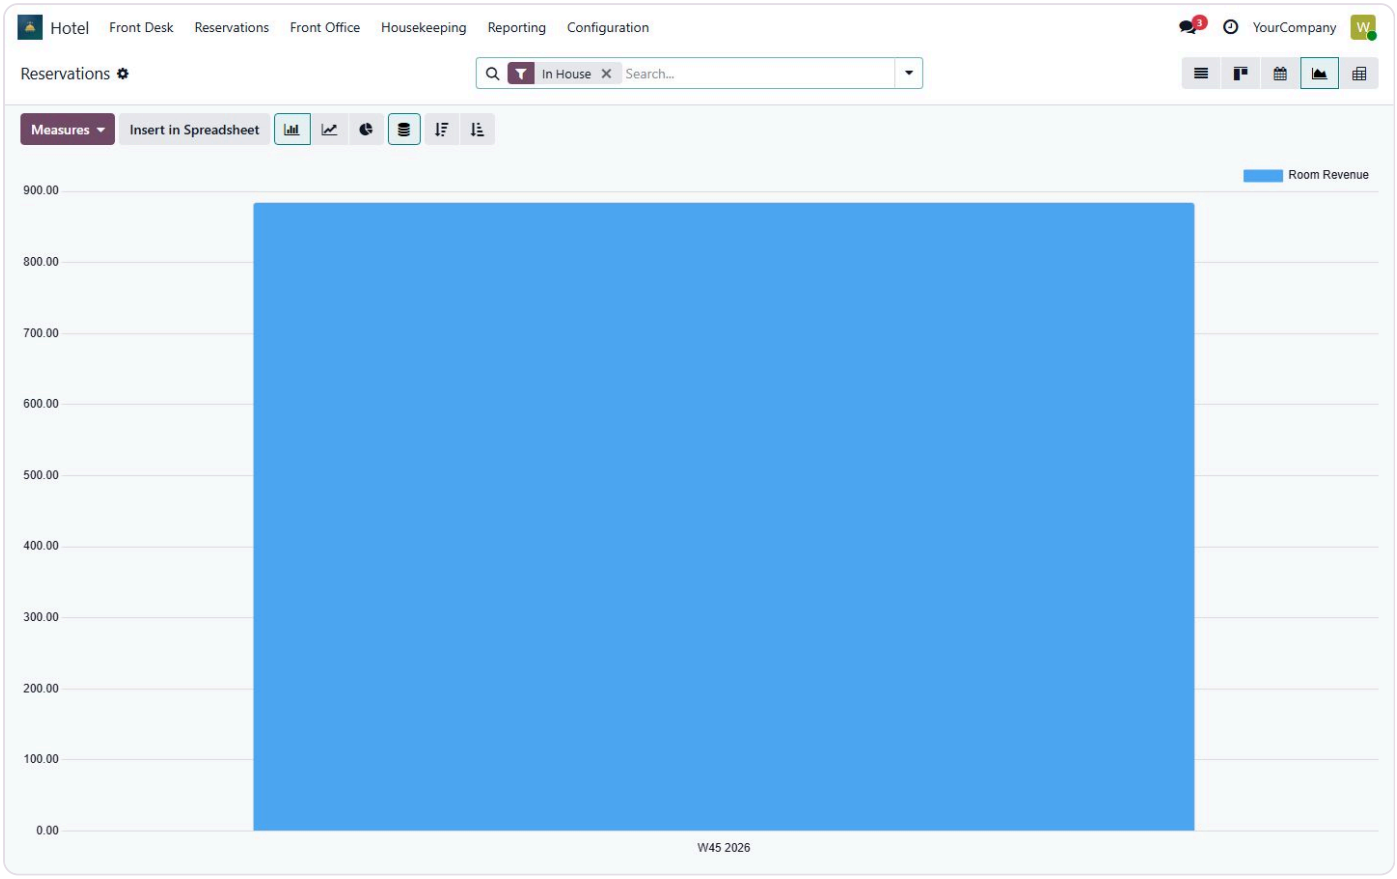

2 Switch to the graph

The same figures as a bar, line or pie chart. A bar chart of room revenue by source shows at once how much the online agencies bring in against direct bookings.

3 Graph on the Reservations screen

The Reservations screen has its own graph and pivot views, so a receptionist can count next week's arrivals without the Reporting menu.

QUESTION	HOW TO ANSWER IT
Where do our guests book?	Pivot, rows by Source, measure Room Revenue
Which room type earns most?	Pivot, rows by room type on the room lines, or Room Types, Rooms button
How many nights did we sell last month?	Pivot, filter Check-in Month, measure Nights
Who on the desk takes the most bookings?	Pivot, rows by Agent
What is still owed?	Folios, filter Balance Due

PART 15

The printed documents and the confirmation email

Three documents print from the app, each on the company's own letterhead: the reservation confirmation, the registration card and the folio.

IN THIS PART YOU WILL LEARN

- Where each document is printed from
- The confirmation email template

DOCUMENT	PRINTED FROM	WHAT IT SHOWS
Reservation Confirmation	A reservation, Print menu	Reference, status, guest, dates, nights, guests, each room line with its type, room, nights, rate and subtotal, the estimated room revenue and the notes
Guest Registration Card	A reservation, Print menu	Reservation, guest name, nationality, ID type and number, contact details, rooms and dates, with a signature space
Folio / Guest Bill	A folio, Print menu	Folio and reservation, guest, dates, every charge with date, quantity, unit price and totals

Your logo

YourCompany
8000 Marina Blvd, Suite 300
Brisbane CA 94005
United Arab Emirates

Reservation Confirmation

Reference: RES/2026/00004
Guest: Ahmed Hassan
Status: Confirmed

Check-in: 11/05/2026
Check-out: 11/08/2026
Nights: 3 · **Guests:** 4A / 2C

Room Type	Room	Check-in	Check-out	Nights	Rate	Subtotal
Family Room	302	11/05/2026	11/08/2026	3	$ 180.00	$ 540.00
Family Room	303	11/05/2026	11/08/2026	3	$ 180.00	$ 540.00

Estimated Room Revenue: $ 1,080.00

This confirmation is subject to the hotel's terms and conditions.

The reservation confirmation for the two room family booking RES/2026/00004.

The confirmation email

The module installs an email template called **Hotel: Reservation Confirmation**, addressed to the guest, from the company email, in the guest's language. To send it, open the reservation, press Send message, open the full composer with the expand icon and pick the template. Attach the printed confirmation if you want the guest to have the PDF too.

PART 16 What runs by itself

Three scheduled actions run once a day so the desk does not have to remember. They are listed under Settings, Technical, Scheduled Actions in developer mode.

SCHEDULED ACTION	WHAT IT DOES EACH DAY
Hotel: Detect No-shows	Every booking still Confirmed with a check-in date before today becomes a No Show, with a note in its history.
Hotel: Departure Reminders	Every checked in booking whose check-out date is today or earlier gets a Departure due to-do for its front desk agent.
Hotel: Reconcile Room Charges	For every checked in booking with a folio, the room charge lines are rewritten to the current nights and rate, the same as Sync Room Charges.

Running more than one property

Every room type, room, floor, service, booking, folio and housekeeping task belongs to a company, and a record rule keeps each user inside the companies they are allowed into. Set each property up as its own company with its own settings, rooms and services, and switch between them with the company selector at the top right.

The trail on every record

Reservations, folios, rooms and housekeeping tasks keep a history on the right of the form: who changed the status, the guest, the dates, the rate or the assignee, and when. Use Log note for internal remarks and Activity to schedule a call or a follow-up.

PART 17 A fifteen minute walk-through

If you have the demo open and fifteen minutes, this is the path that shows the whole property. It is also a good order to show a new member of staff.

#	DO THIS	AND NOTICE
1	Front Desk	*Occupancy, ADR and RevPAR, counted live from rooms and folios.*
2	Click In House	*The two guests in the building, straight from the tile.*
3	Reservations, board view	*A column per status: one draft, two confirmed, two in house.*
4	Open RES/2026/00004	*A family on two rooms, each line with its own rate and nights.*
5	Booking Calendar	*Every stay drawn across its nights.*
6	Open RES/2026/00001, then its Folio	*Check-in wrote the room nights and the daily breakfast.*
7	Print the registration card	*Guest, ID and rooms on one signed page.*
8	Front Office, then Rooms	*Available, Occupied, Reserved, Out of Order, and the Dirty badge.*
9	Housekeeping	*Tasks by status. Done puts the room back to Clean.*
10	Reporting, then Reservations Analysis	*Room revenue by source in one click.*

Questions people ask

QUESTION	ANSWER
Does it connect to Booking.com or Expedia?	No. There is no channel manager. Online agency bookings are typed in with the source OTA / Travel Agent, so they still show in the reports.
Can guests book on our website?	Not with this module. Website is one of the sources you can record, but the booking is entered at the desk.
Can it stop a room being sold twice?	Yes. Confirm and check-in both refuse a room that already has an overlapping live booking, or that is out of order.
Can one booking hold several rooms?	Yes. Add a room line per room, each with its own type, dates, guests and rate.
Does breakfast go on the bill by itself?	Yes, if the breakfast service is marked Recurring (Daily). It is added at check-in for every night.
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community with Invoicing and Discuss.
Do housekeepers see the bills?	They can read bookings and folios but cannot change them, and they do not get Reporting or Configuration.
Can we run two hotels?	Yes, as two companies, each with its own rooms, rates, services and settings.

PART 18

The menu map

Every screen in the app, on one page.

Front Desk

Front Desk	The live dashboard: occupancy, ADR, RevPAR, today, rooms and the pipeline

Reservations

Reservations	Every booking, as a list, board, calendar, graph or pivot
Booking Calendar	The same bookings laid out by check-in date

Front Office

Rooms	The room board grouped by status, with the housekeeping state on each card
Folios	Every guest bill: open, invoiced or closed
Guests	Contacts marked as hotel guests, with ID, nationality and preferences

Housekeeping

Housekeeping	Cleaning, turndown, inspection, maintenance and linen tasks

Reporting

Reservations Analysis	Pivot and graph of bookings by month, room type, source or status

Configuration

Settings	Check-in and check-out times, auto housekeeping, no-show detection
Room Types	Rate, occupancy, bed type, size, photo and standard amenities
Floors	Floors and wings, each with its rooms
Amenities	What a room has: Wi-Fi, minibar, sea view, step-free access
Services	The extras a guest can be charged for, with price and tax

Want this for your property?

We set it up with your floors, room types, rooms and rates, load your services and taxes, connect it to your chart of accounts, and train the front desk and the housekeeping team. The same module runs a twelve room guest house or a resort with several wings.
