COMPLETE GUIDE · THE TRADE, SETUP AND EVERY SCREEN

Labour Camp Management for Odoo 19

Worker accommodation run bed by bed: allocation, papers before they expire, permits, inspections, complaints, incidents, the gate, mess and buses, and the monthly bill to each contractor. Every screen and every step, shown on a live demo. No Odoo background needed.

START

About this guide

Everything a labour camp produces, the kitchen's headcount, the bus list, the contractor's bill and the inspector's count, comes out of one question: who sleeps in which bed, from which day. This guide starts there and builds the whole camp on top of it, one screen at a time. You do not need to have used Odoo before.

Who it is for

The accommodation manager setting camps up, the camp boss who runs one day to day, the staff on the gate and in the mess, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks every field and every button.

The live demo

Desert Star Accommodation LLC, an invented camp operator in Dubai with two camps, about a hundred men, four contractors and three months of history. Open it and follow along.

HOW IT WORKS

The demo camp

Address	**labourcamp-demo.way4tech.com**
Sign in	**w4demo** / **Demo2026**
Operator	Desert Star Accommodation LLC · Camp 1 in Al Quoz (leased), Camp 2 in Jebel Ali (managed for clients)
Runs on	Odoo 19, Community edition, with Employees and Invoicing

Every company, person and number on the demo is invented. The demo is shared and resets from time to time, so anything you change may be changed back or seen by the next person. Treat it as a camp to walk around, not your own records.

What is in the guide

PART 1	How a labour camp is run	PART 2	The camp at a glance
PART 3	Open the demo and sign in	PART 4	Set up from zero
PART 5	Camps, blocks, rooms and beds	PART 6	Registering the men
PART 7	Allocating beds	PART 8	Papers falling due
PART 9	Permits and certificates	PART 10	Inspections
PART 11	Complaints	PART 12	Incidents
PART 13	The gate register	PART 14	Mess and meal headcount
PART 15	Buses to site	PART 16	Utilities
PART 17	Billing the contractors	PART 18	The two dashboards
PART 19	The printed documents	PART 20	A fifteen minute walk-through
PART 21	The menu map		

PART 1 How a labour camp is run

A labour camp is a building full of beds, but the work of running one is mostly paperwork about people: who is in which bed, whose documents are about to stop him working, who pays for him, and whether the place would pass an inspection this afternoon. This part is the trade in five minutes, so the screens make sense.

IN THIS PART YOU WILL LEARN

- Why occupancy is counted at the bed, not the room
- The licence, the papers and the permits that keep a camp legal
- Who pays for a bed, and the three ways it gets billed
- Where the running cost goes: rent, food, buses and utilities
- The four registers an inspector asks to see

Beds, not rooms

Everyone in the trade allocates a bed, inspects a bed and bills a bed. A room of eight with six men in it is not a full room: it is six spaces taken and two you can still fill. A bunk with a cracked frame is a bed that exists but cannot be used, and counting it as free is how a camp boss promises ten beds and has eight. So the module counts everything at the bed: vacant, occupied or blocked.

HOW IT WORKS

The four levels

Camp	the licensed site, with its capacity, rent and camp boss
Block	a building: accommodation, mess, ablution, clinic, office, store, recreation
Room	a numbered room with a type, a capacity and a floor area
Bed	bed 1, bed 2: lower bunk, upper bunk or single, and who is on it

What keeps a camp legal

Three sets of papers. The **licence** sets how many men the camp may hold, and being over it is what closes a camp down. The **camp's certificates**, civil defence, municipality health, pest control, water tank cleaning, fire alarm maintenance, kitchen and waste, each run out on their own date. And the **men's papers**: a visa, an Emirates ID, a labour card and a medical fitness certificate on every man, each with its own expiry. A man whose medical has run out is not supposed to be on site at all.

Who pays for the bed

A camp is rarely a cost centre on its own. A main contractor holds a block for its subcontractors, or a group company houses men for several projects, or an operator runs the camp for a client. Somebody gets a bill each month, and it is worked out one of three ways.

BASIS	THE BILL IS	SUITS
Per bed held	beds reserved × monthly rate, slept in or not	a main contractor holding a block for a contract
Per man accommodated	men in the month × monthly rate	simple per head pricing
Per man night	nights actually slept × nightly rate	short or mixed stays, and bills that get disputed

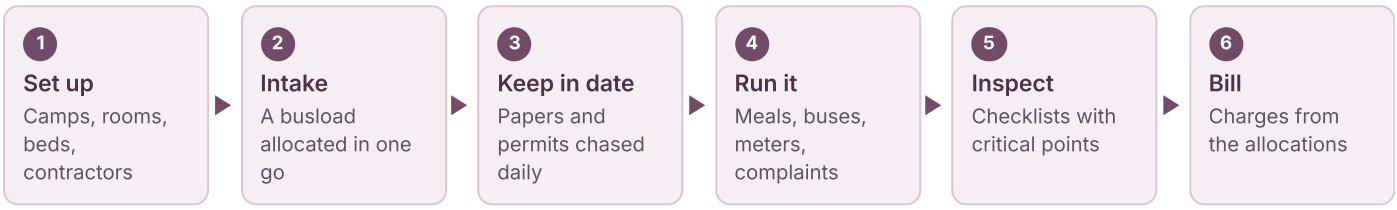

Where the money goes

After rent, three things: the mess, priced per head per meal; the buses to site, priced per day; and electricity, water, gas and diesel. Add them up for a month and divide by the men actually in camp and you have the cost per head, which is the number accommodation is quoted on and the one nobody can produce from a spreadsheet at month end.

The four registers

An inspector, or a client's auditor, asks for four books: the **inspection** sheets that show someone walks the blocks, the **complaints** and what was done about them, the **incident** book, and the **gate** book of who came in and whether they left. The module keeps all four.

A month in a camp

PART 2 The camp at a glance

The module adds one app, Labour Camp, with seven menus. This part is the map, and the three roles that decide who sees what.

The Labour Camp app on the Odoo home screen. Employees and Invoicing come with it.

The seven menus

MENU	WHAT IS UNDER IT
Dashboards	Camp Board for the camp boss, Compliance and Cost for the manager
People	Occupants, Papers Falling Due, Bed Allocations
Accommodation	Free Beds, Rooms, All Beds
Welfare	Complaints, Inspections, Permits and Certificates, Gate Register, Incidents
Services	Meal Headcount, Bus Runs, Utilities
Billing	Agreements, Monthly Charges
Configuration	Settings, Camps, Mess and Catering, Transport Routes, Inspection Checklists

Three roles

Under Settings, Users, each user gets one Labour Camp role. Each role includes the one below it.

Camp Staff

Reads the accommodation, takes the meal headcount, logs bus runs, keeps the gate register and raises complaints. No personal document numbers, no costs, no billing.

Camp Boss

Runs the camp day to day: allocates beds, checks men in and out, keeps the papers, does inspections, closes complaints and incidents, prepares the monthly charges. Sees passport and Emirates ID numbers.

Accommodation Manager

Everything: the camps themselves, licences and permits, checklists, the mess and bus contracts, utilities, the compliance and cost board. The administrator gets this role when the module is installed.

SCREEN	STAFF	CAMP BOSS	MANAGER
Camp Board, Occupants, Free Beds, Rooms, All Beds	read	yes	yes
Papers Falling Due, Bed Allocations, Inspections, Billing	-	yes	yes
Complaints, Gate Register	raise / log	yes	yes
Incidents	read	yes	yes
Meal Headcount, Bus Runs	record	yes	yes
Permits, Utilities, Compliance and Cost, Configuration	-	-	yes

The demo login w4demo has the Accommodation Manager role, so you can see every screen in this guide. It is not an administrator and cannot open Settings.

PART 3 Open the demo and sign in

Everything in this guide can be followed on the live demo, a real Odoo 19 database with two camps already running.

TRY IT YOURSELF ON THE DEMO

1. Open labourcamp-demo.way4tech.com in any browser
2. Sign in with w4demo and Demo2026
3. Click Labour Camp on the home screen
4. Open Dashboards, then Camp Board

1 Go to the camp

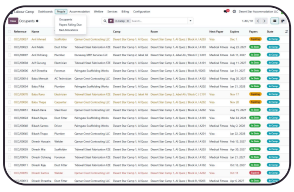

Open **labourcamp-demo.way4tech.com**. The sign-in screen is the standard Odoo one. There is nothing to install.

It works on a phone, a tablet or a computer. The screens are laid out for a desktop or a tablet in the camp office.

2 Sign in

User `w4demo`, password `Demo2026`.

The demo is shared, so treat it as a showroom: look at everything, and expect anything you change to be put back.

3 Find the menus

Open **Labour Camp**. The seven menus run across the top bar. Click one to drop it down; here it is People.

PART 4 Set up from zero

What a new operator does on day one, before the first man arrives. On the demo this is done, so read it to understand what each setting means and where it lives.

IN THIS PART YOU WILL LEARN

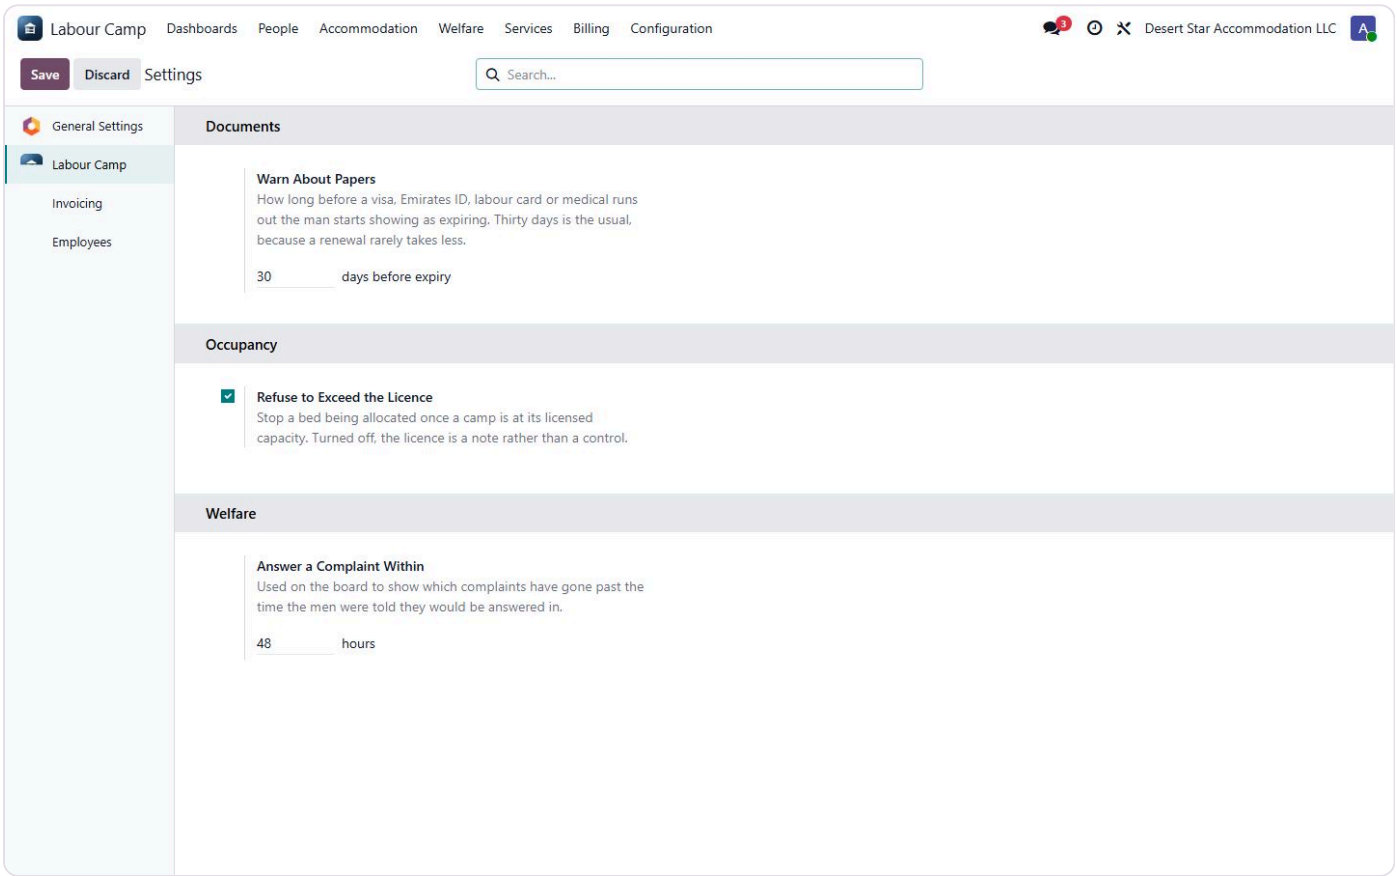

- Installing the app and what comes with it
- The settings and their defaults
- Giving people the right role
- The five scheduled jobs and which one ships switched off
- The order to set the rest up in

Install the app

The module is **Labour Camp Management** (technical name wt_labour_camp, USD 200 on the Odoo App Store, version 19.0.1.1.2). Open Apps, search for it and press Install. It brings in Employees and Invoicing, both part of Odoo Community, because a man can be linked to his employee record and a monthly charge becomes a customer invoice. Nothing from Odoo Enterprise is needed.

The settings

Settings, then the Labour Camp section (or Labour Camp, Configuration, Settings, for an administrator). Each setting is per company.

The Labour Camp section of Settings. Opened here with the administrator, because the demo login cannot reach Settings.

SETTING	WHAT IT DOES	DEFAULT
Warn About Papers (days)	How long before a visa, Emirates ID, labour card or medical runs out the man shows as Expiring, and the daily reminder starts.	30

Refuse to Exceed the Licence	Meant to switch the licence check on and off. In this version check in always enforces the licence, whatever the box says (see Part 7).	On
Answer a Complaint Within (h)	The promise to the men. The Camp Board counts open complaints older than this.	48
Accommodation Product	The product monthly charges are invoiced under; its taxes for the company go on every line. It is a company setting with no field on this page or any other screen in this version, so it is set at installation (on the demo: a service product, Worker Accommodation Charge, with 5% VAT). Without it invoice lines carry no tax until you add it on the draft invoice.	not on screen

Give people their role

Settings, Users. On each user, under Human Resources, pick the Labour Camp role: Camp Staff, Camp Boss or Accommodation Manager (see Part 2). A user with no role does not see the app.

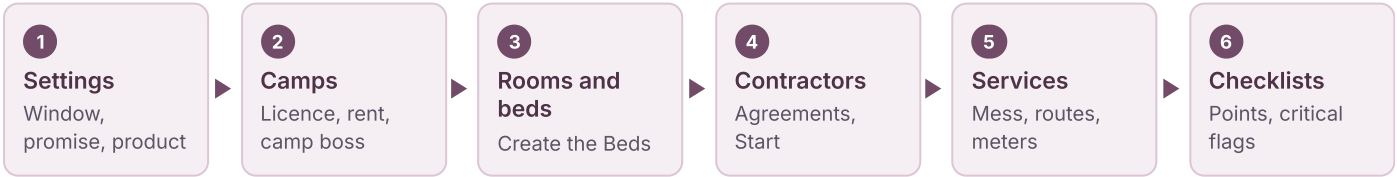

The scheduled jobs

Five jobs run in the background. Four are on from the start; the billing job is off, so a camp that bills nobody does not get charges on the first of the month. To change them, switch on developer mode and open Settings, Technical, Scheduled Actions.

JOB	RUNS	DOES	SHIPS
Labour camp: papers about to expire	daily	One reminder per man whose next paper is inside the window	on
Labour camp: permits due for renewal	daily	A reminder on each permit due or expired	on
Camp: draft last month's accommodation charges	monthly	Drafts a charge per running agreement	off
Camp: chase anybody still signed in at the gate	daily	A reminder per visitor still on site	on
Camp: chase serious incidents still open	daily	A reminder per open serious or major incident	on

The order to set up in

Day one

Then register the men and allocate them, which is Parts 6 and 7. Every record in the module carries a company, so one database can run the camps of several companies, each seeing only its own. Inspection checklists are the exception: one left without a company is shared by all of them.

PART 5 Camps, blocks, rooms and beds

The accommodation is set up once and then mostly left alone: a camp with its licence, the blocks on the plot, the rooms in each block and the beds in each room.

IN THIS PART YOU WILL LEARN

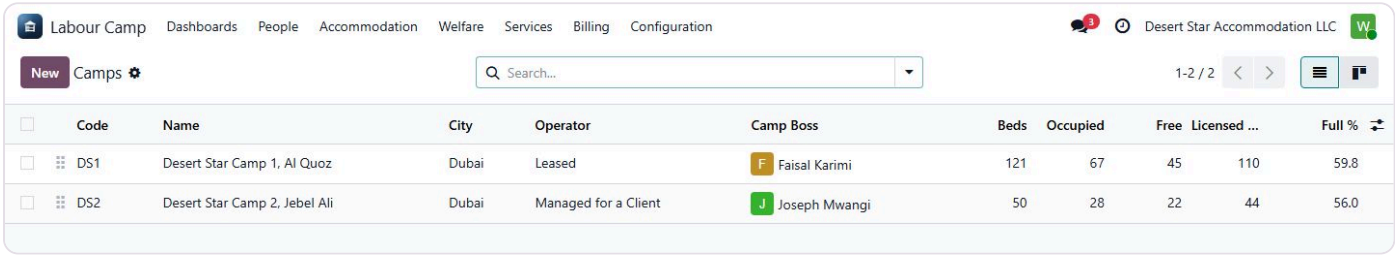

- Every field on the camp, and what the licensed capacity does
- Block kinds, and why the mess and the ablution block are blocks too
- Room types, capacity, area and the m2 per bed figure
- Making the beds in one click, and blocking a broken bunk
- Closing a room for repairs, and the free bed lists

TRY IT YOURSELF ON THE DEMO

1. Configuration, Camps, open Desert Star Camp 1
2. Read the Blocks tab: Block A has 80 beds
3. Accommodation, Rooms, open A101
4. Accommodation, Free Beds, open a camp's group

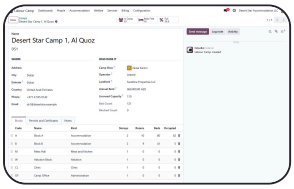

The camp

Configuration, Camps. The list shows each camp with its beds, occupancy and licence; the kanban is the same as cards.

Code	Name	City	Operator	Camp Boss	Beds	Occupied	Free	Licensed ...	Full %
DS1	Desert Star Camp 1, Al Quoz	Dubai	Leased	Faisal Karimi	121	67	45	110	59.8
DS2	Desert Star Camp 2, Jebel Ali	Dubai	Managed for a Client	Joseph Mwangi	50	28	22	44	56.0

The camps, with beds, occupied, free and occupancy at a glance.

1

Name, code and address

The **Name** and a short **Code** (DS1) that two camps in one company cannot share. Where: address contact, city, emirate or province, country, phone and email.

The emirate is kept apart from the address because it is what the municipality paperwork asks for.

2

Who runs it

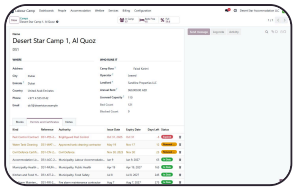

Camp Boss is the user the daily reminders about this camp's papers, permits, visitors and incidents go to. **Operator** is Company Owned, Leased or Managed for a Client. A leased camp has a **Landlord**. **Annual Rent** feeds the cost per head; leave it at zero for a camp you own outright.

3

The licence

Licensed Capacity is the number of men the accommodation licence permits. Check in is refused once the camp's occupied beds reach it. Zero means no limit.

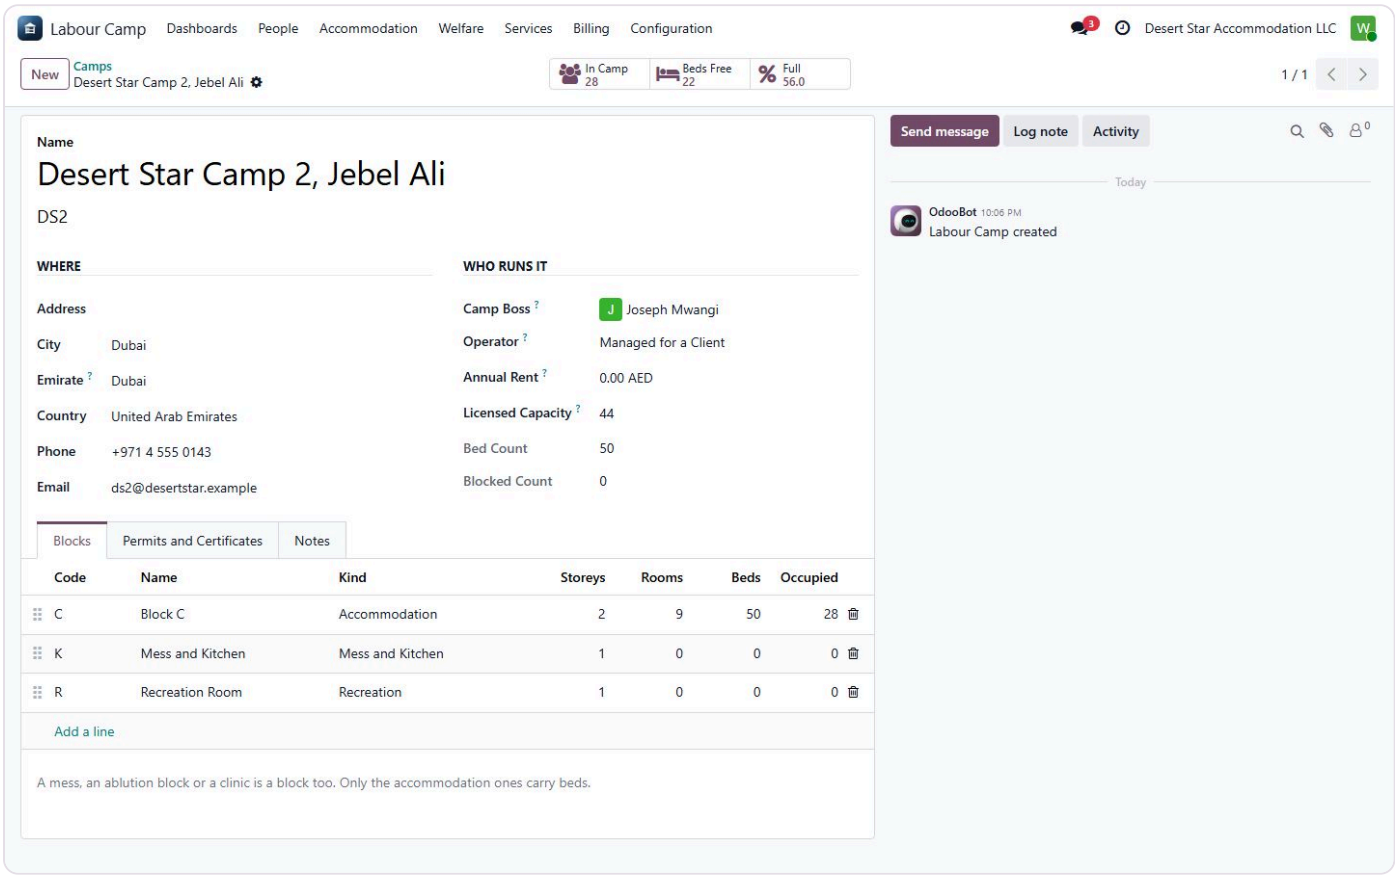

The camp works out its bed count, occupied, vacant and blocked beds, the occupancy over the beds that can be used, and whether it is over licence. The smart buttons In Camp, Beds Free and Full open them.

4

The tabs

Blocks lists the blocks with storeys, rooms, beds and occupied. **Permits and Certificates** lists the camp's papers (Part 9). **Notes** is free text.

Camp 2 is run for clients: Managed for a Client, no rent, a smaller licence and its own camp boss.

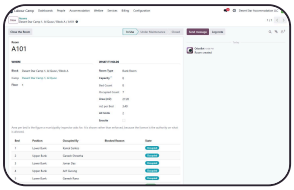

Blocks

A block is added on the camp's Blocks tab: code (unique in the camp), name, storeys and a **kind**: Accommodation, Mess and Kitchen, Ablution, Recreation, Clinic, Administration or Store. Only rooms carry beds, so a mess or an ablution block has no rooms. It is still worth adding, because inspections, incidents and utility meters can point at a block.

Rooms

Accommodation, Rooms: every room with its type, capacity, beds, occupied, vacant, area per bed and state.

5

Where and what

Room number (unique in its block), the **Block**, which sets the camp, and the **Floor**. **Room Type** is Bunk Room, Single, Double, Family, Supervisor or Isolation. **Capacity** is how many beds belong in it, between one and sixty.

6

Space and comfort

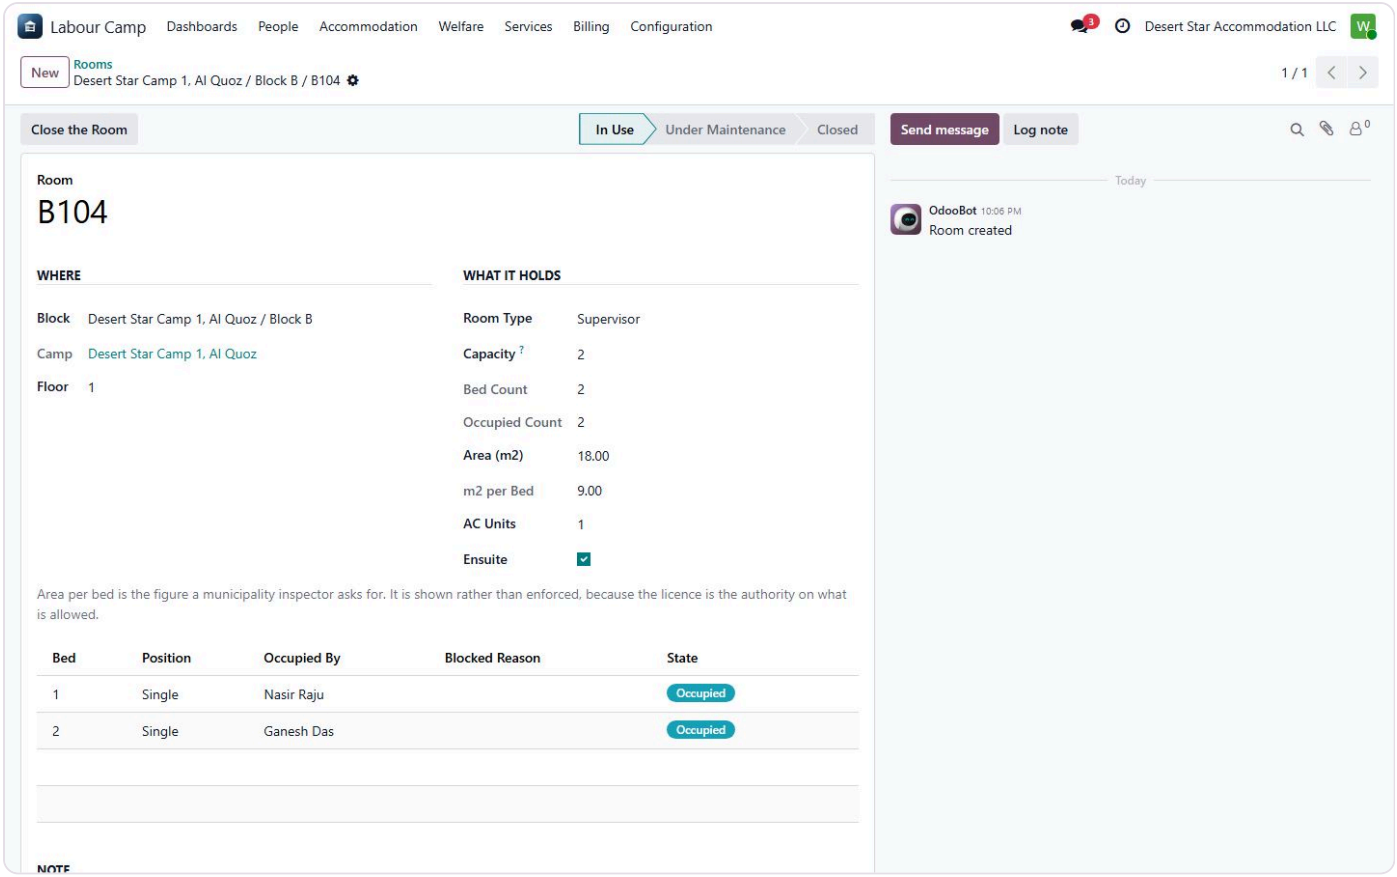

Area (m2), **AC Units** and **Ensuite**. The room works out **m2 per Bed** from its area and its beds.

The area per bed is shown, not enforced. It is the figure a municipality inspector asks for; the licence is the authority on what a room may hold.

7

Create the Beds

On a room with fewer beds than its capacity, press **Create the Beds** (on the list the button is Create Beds). The room is filled up to its capacity with beds numbered 1, 2, 3, so a bunk can be named out loud: A101, bed 3. Raise the capacity later and press it again: only the missing beds are added.

A supervisor room: two single beds, an ensuite, and a lower capacity.

Beds

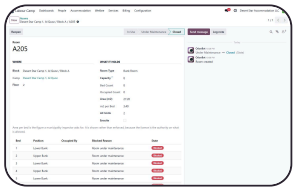

Each bed has a number, a **Position** (Lower Bunk, Upper Bunk or Single) and a **State**: Vacant, Occupied or Blocked. Who is on it and on which allocation is set by the allocation only, never typed. A bed marked occupied with nobody on it, or with somebody on it and not occupied, is refused.

8

Block a broken bunk

Open the bed, type a **Blocked Reason** (Upper bunk frame cracked) and press **Block**. Only a vacant bed can be blocked; move the man first. A blocked bed is not offered for allocation and not counted as free. **Free** sets it vacant again and clears the reason.

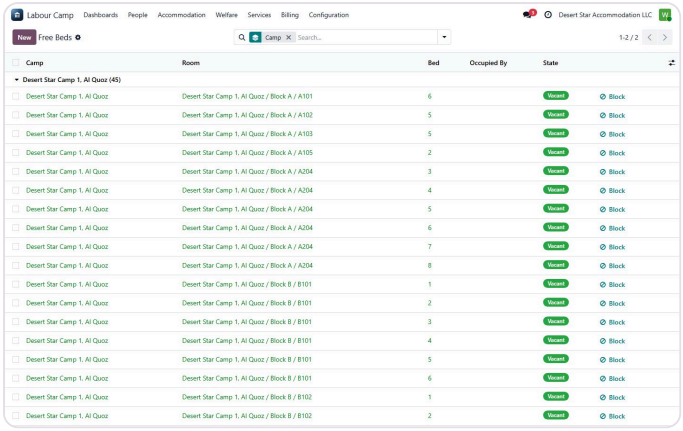

9

Take a room out of use

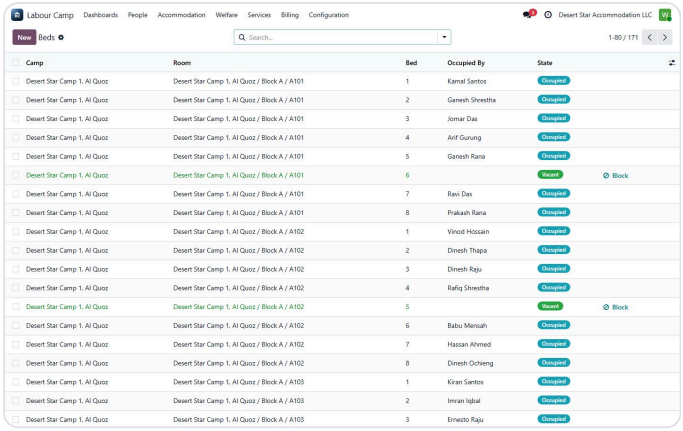

Close the Room sets the room Closed and blocks every bed in it. It is refused while anybody still sleeps there, with the number of men to move. **Reopen** sets it In Use and frees the blocked beds.

The room state also has Under Maintenance, which the allocation wizard skips like Closed. No button sets it, so in practice use Close the Room and write the reason on the room's note.

Finding a free bed

Accommodation, Free Beds: vacant beds grouped by camp. Open a group to see them.

Accommodation, All Beds: every bed with its position, occupant, blocked reason and state.

PART 6 Registering the men

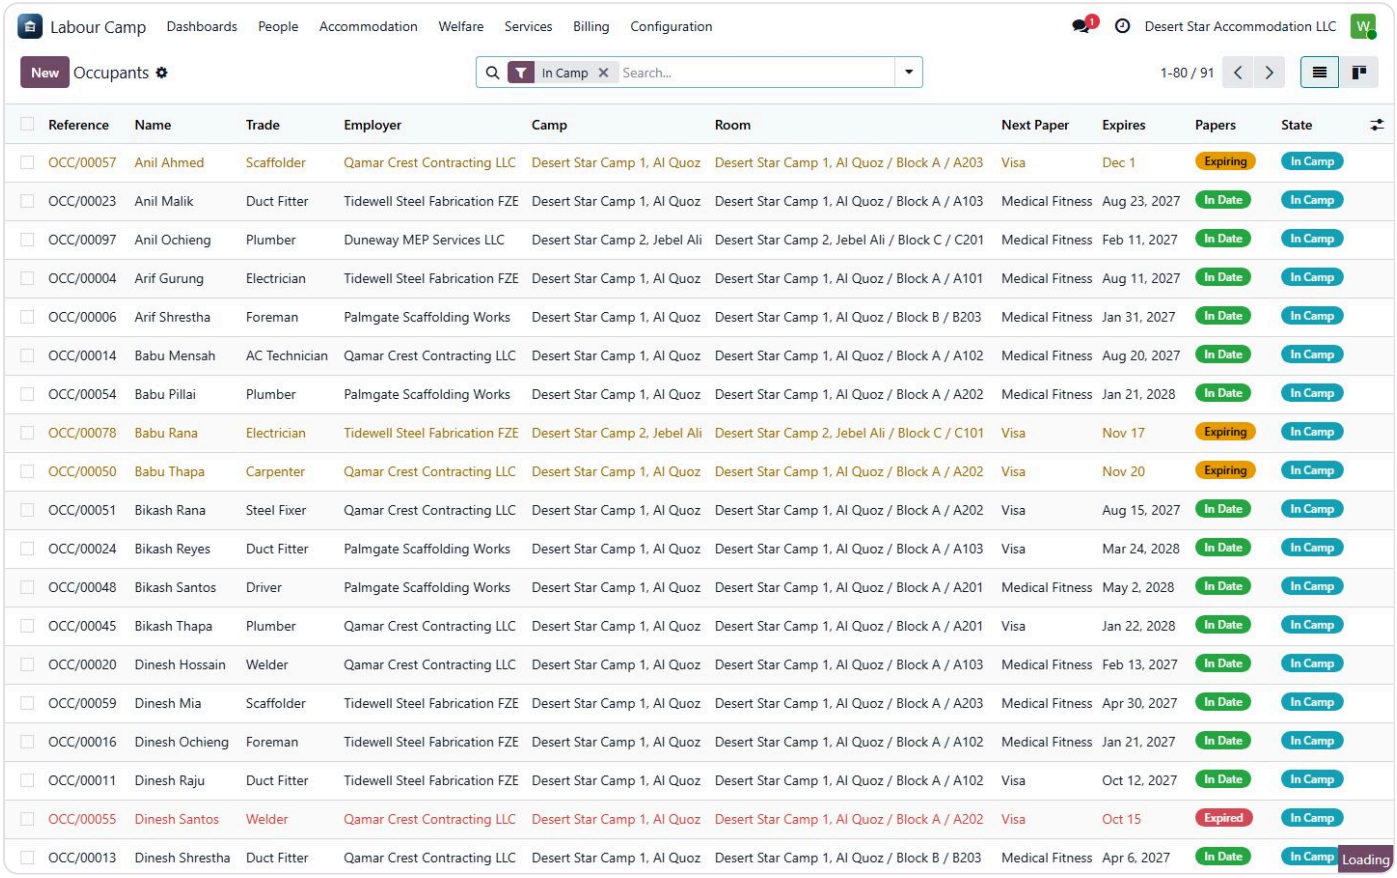

Every man in camp is an occupant: who he is, who employs him, where he sleeps and what his papers say. This part is the occupant record; the papers get Part 8 to themselves.

IN THIS PART YOU WILL LEARN

- Every field on the occupant form
- Why the employee link is optional
- The four states a man moves through
- The occupant list and kanban

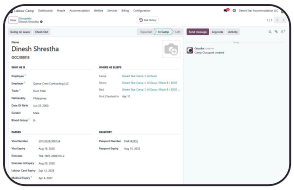

TRY IT YOURSELF ON THE DEMO

1. People, Occupants, then the kanban view
2. Clear the In Camp filter to see all four columns
3. Open a man and press Bed History

People, Occupants: reference, name, trade, employer, camp, room, bed, papers and state. Rows with expired papers are red, expiring ones amber.

1

Who he is

Name and a photo. The reference (OCC/00013) is given on save. **Employee** links him to an Odoo employee record, which is optional: a subcontractor's men are not on your payroll and still need a bed. **Employer** is who sponsors him. Then trade, nationality, date of birth (it has to be in the past), gender and **Blood Group**, which is the first thing asked after an accident.

Phone, emergency contact and emergency phone sit further down the form.

2

Where he sleeps

Camp, room, bed and **First Checked In** are filled by his allocation and cannot be typed. **Left On** is set when he checks out. **Bed History** at the top opens every allocation he has had.

3

Papers and passport

Visa, Emirates ID, labour card and medical expiry, and the passport and ID numbers. Covered in Part 8.

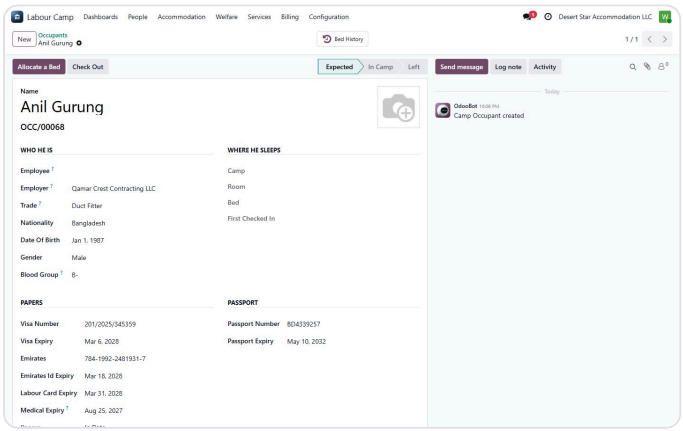

4

Billed Under

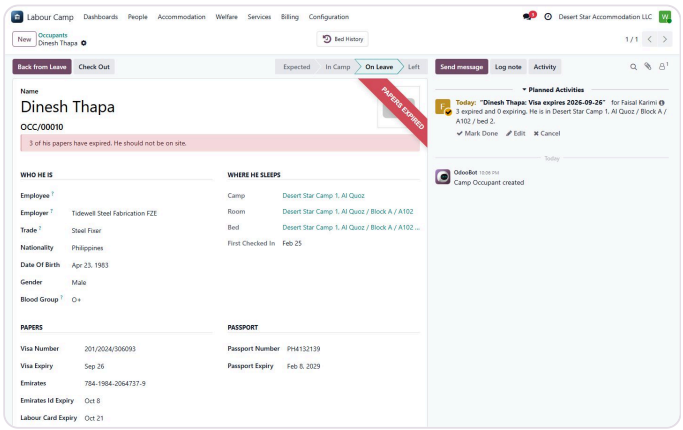

The agreement his bed is charged to. Leave it empty for a man the camp carries itself. Covered in Part 17.

Four states

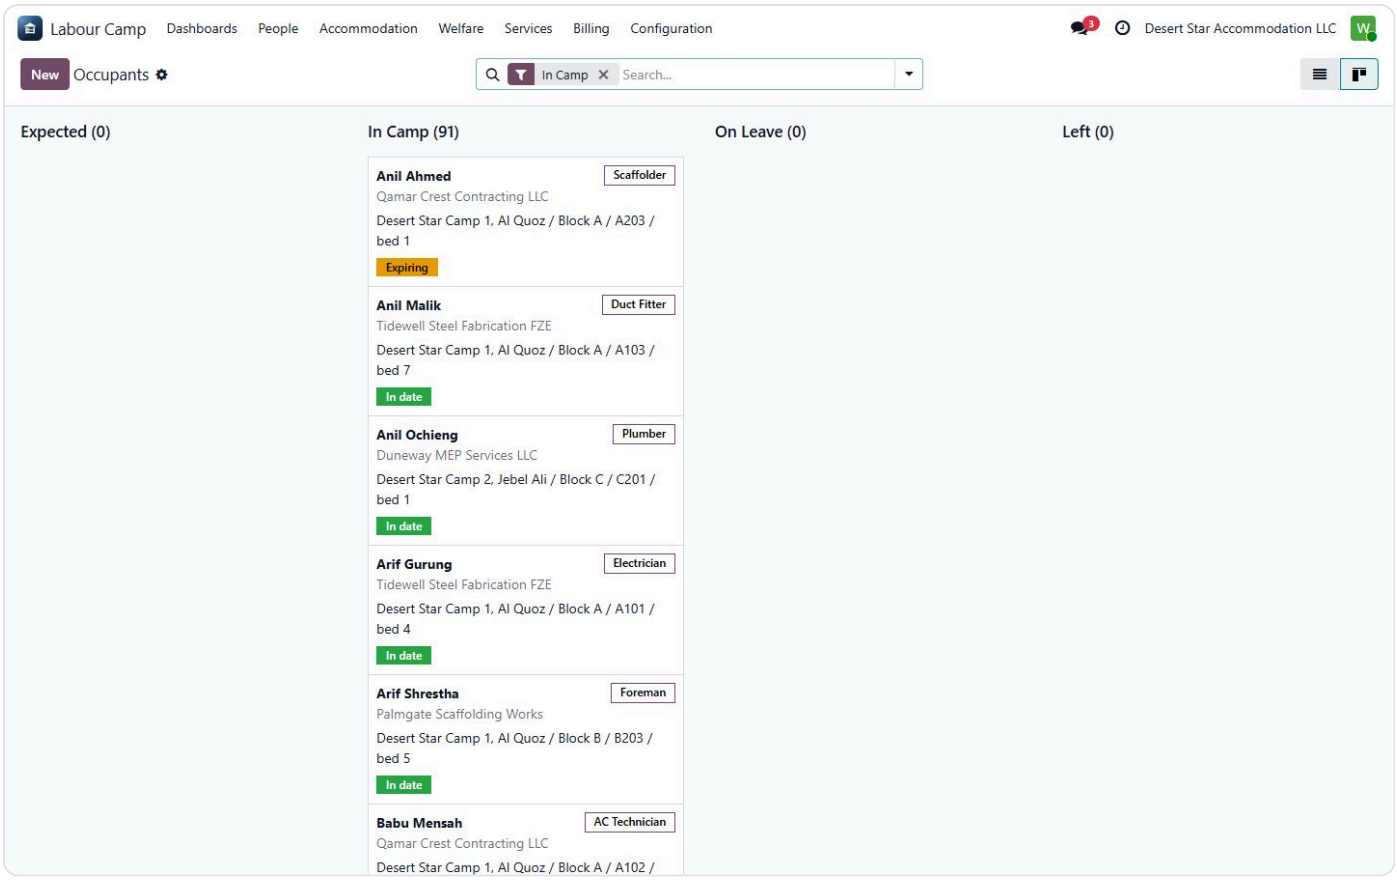

STATE	MEANS	HOW HE GETS THERE
Expected	Booked in, no bed yet or a bed reserved	Every new occupant starts here
In Camp	Checked into a bed	Check In on his allocation, or the wizard with Check Them In
On Leave	Away, keeps his bed	Going on Leave; Back from Leave returns him
Left	Gone for good, history kept	Check Out

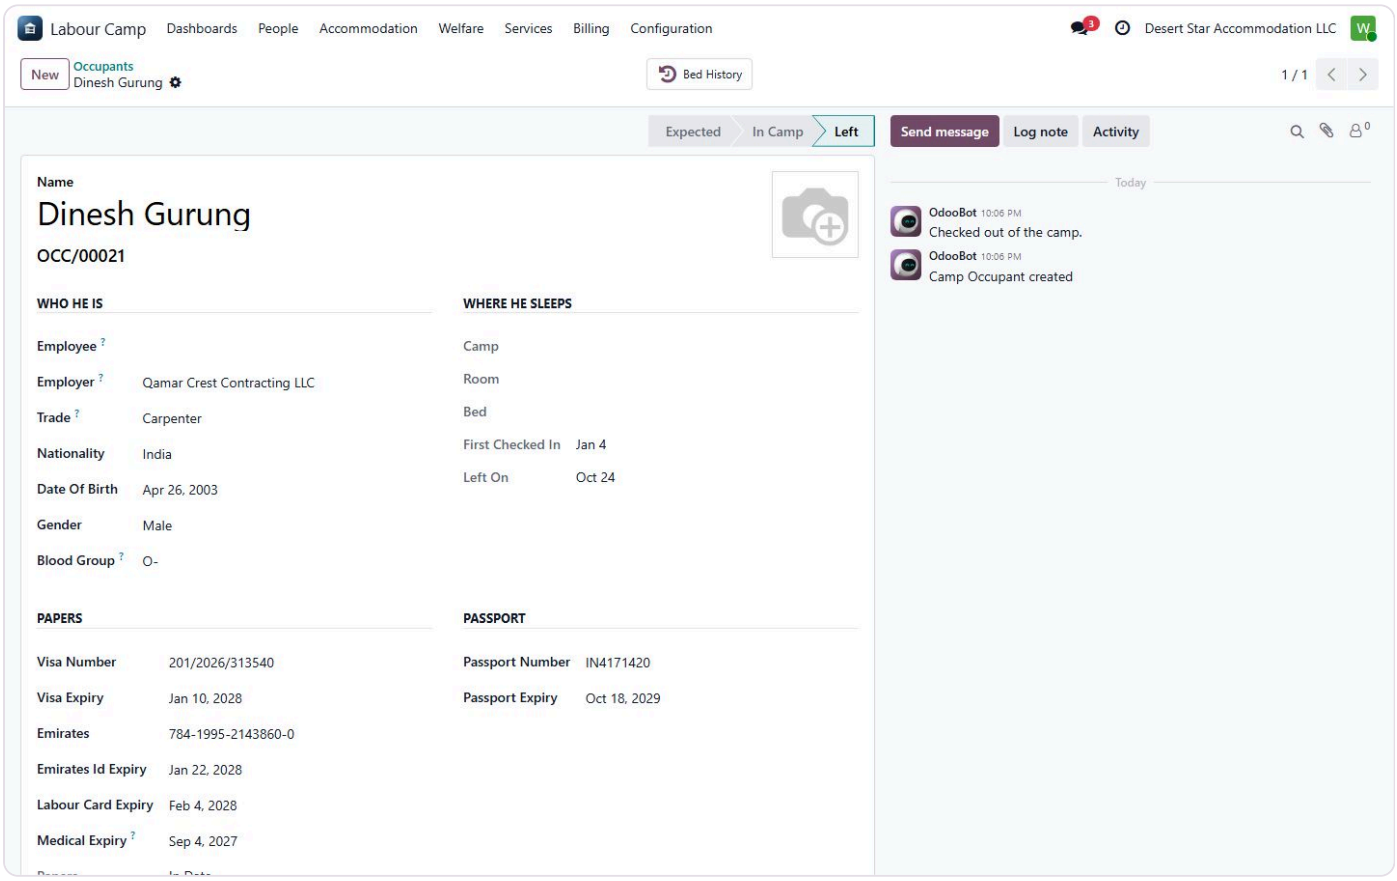

An expected man: Allocate a Bed is the only button.

A man on leave: Back from Leave, and his bed is still his.

The kanban has a column per state and a papers badge on each card. It opens filtered to In Camp.

A man who has left keeps his record and history, and always shows In Date so he drops out of the papers figures.

PART 7 Allocating beds

An allocation is the only thing allowed to put a man on a bed or take him off it. This part follows a busload in, a man moved between bunks, a man going on leave and a man leaving for good.

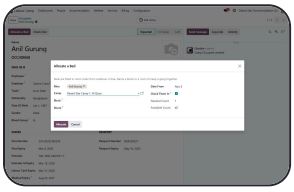

IN THIS PART YOU WILL LEARN

- The allocation wizard for a whole intake
- Reserving beds and checking in on arrival
- The rules: one bed each, one man per bed, the licence
- Moving a man, home leave and check out
- The bed history and the allocation list

TRY IT YOURSELF ON THE DEMO

1. People, Occupants, open an Expected man, press Allocate a Bed, look, then Cancel
2. People, Bed Allocations, open a Reserved one
3. Open an Occupied allocation and read its buttons

A busload at once

1

Open the wizard

On any man without a bed, press **Allocate a Bed**. The wizard opens with him in the **Men** field. Add the rest of the intake: one man or forty.

2

Say where

Pick the **Camp**. Name a **Block** to keep them in one building or a **Room** to keep a gang together. Leave both empty for any free bed in the camp.

The Room list in the wizard is not narrowed by the block you chose; pick the room by its number. The bed search itself respects both.

3

Say when, and whether they are here

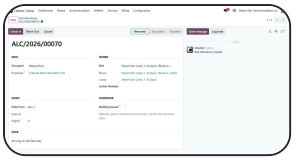

Date From is the day they arrive. **Check Them In** ticked puts them straight into the beds; unticked, the beds are only reserved until somebody checks them in.

4

Read the counts and allocate

Needed Count is the number of men; **Available Count** is the vacant beds in rooms In Use within the camp, block or room. The Allocate button only shows when there are enough. The beds are filled in room and bed order, so a gang lands in consecutive bunks, and the new allocations open in a list.

The allocation record

5

Reserved

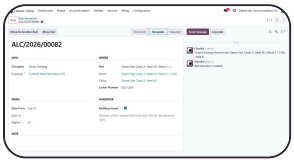

Reference (ALC/2026/00070), the man and his employer, the bed, room and camp, **Date From**, **Date To** and **Nights**, a **Locker Number**, **Bedding Issued** (mattress, pillow, blanket and locker key, the list the storeman signs) and a note.

A reservation holds the bed for him, but the bed itself stays vacant until he checks in.

6

Check In

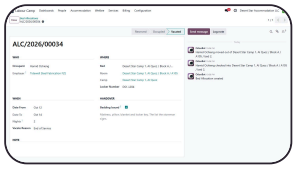

Moves the allocation to Occupied, puts him on the bed, sets him In Camp and records his first check in date. Refused if the bed has been blocked since, and refused if the camp is at its licensed capacity.

7

Occupied

While he is in the bed: **Move to Another Bed** and **Move Out**. Nights count up to today.

8

Vacated

Move Out stamps Date To (today if empty) and a **Vacate Reason**: Moved to Another Bed, Home Leave, End of Service, Absconded or Other. The bed goes back to vacant.

Cancel drops a reservation that will not be used. An occupied allocation cannot be cancelled, only moved out.

The rules it enforces

One bed each

A man can hold only one live allocation, reserved or occupied. A second is refused with the bed he already has.

One man per bed

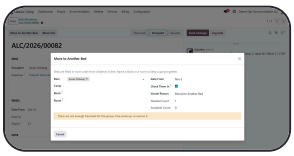

A bed can carry only one live allocation. A second booking is refused with the name of the man on it.

The licence

At check in, a camp whose occupied beds already equal its licensed capacity refuses the man, telling you to allocate elsewhere or have the licence raised.

The Refuse to Exceed the Licence setting is not read by the check in in this version, so the licence is enforced even with the box unticked. Leave the camp's licensed capacity at zero for a site with no limit.

Moving, leave and leaving

9

Move to Another Bed

On an occupied allocation, **Move to Another Bed** opens the same wizard with him in it and a **Vacate Reason**, Moved to Another Bed by default. Allocate closes the old allocation first, then opens the new one, so the one bed rule is never broken even for a moment.

10

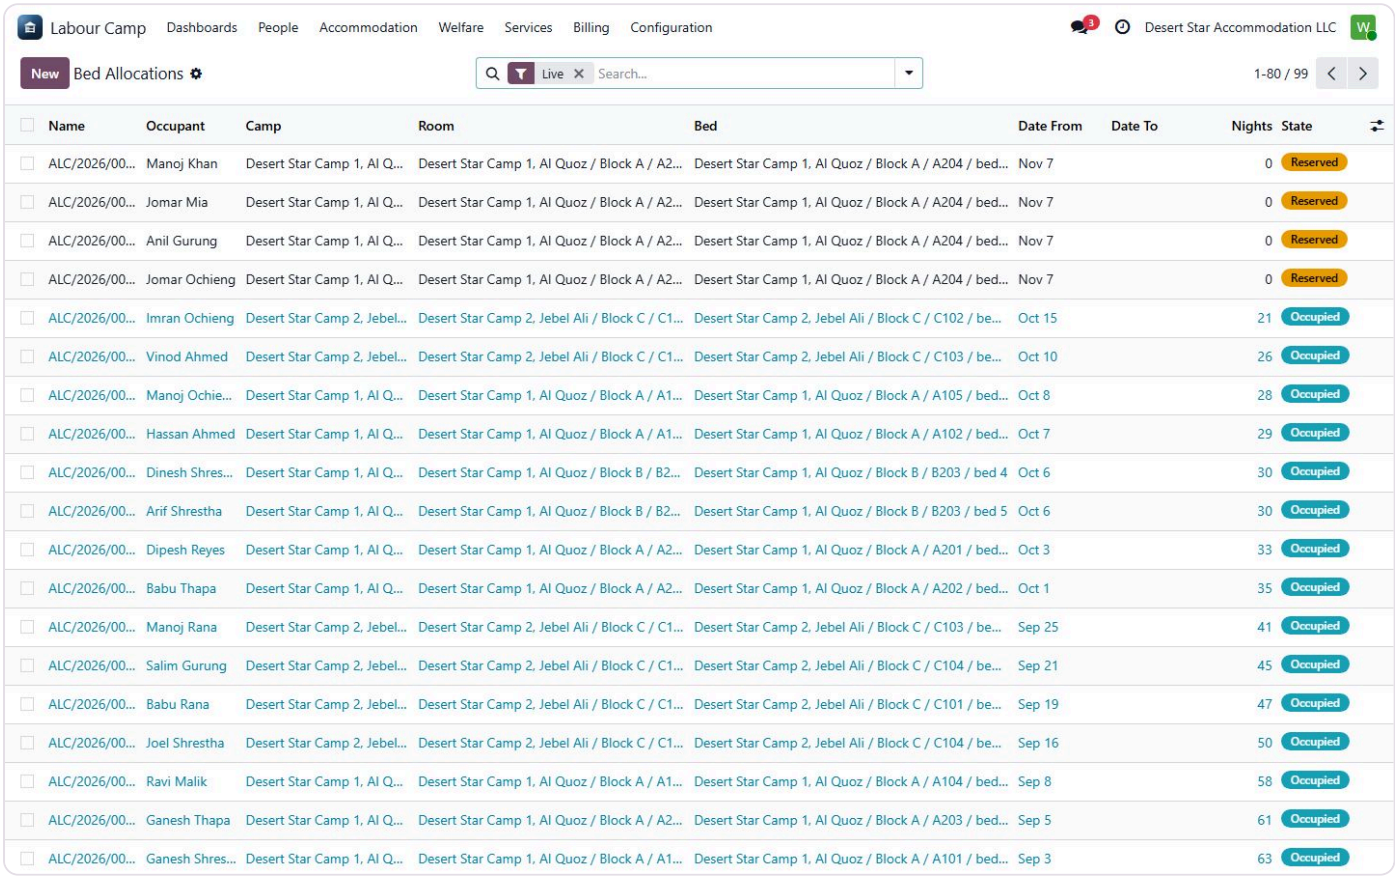

Going on Leave and Back from Leave

On the occupant. He keeps his bed, which still counts as occupied. To give the bed to somebody else while he is away, Move Out on his allocation and allocate him again when he returns.

11

Check Out

On the occupant. Closes his live allocation, sets him Left with today's date and posts a line in his chatter. Allocate a Bed is hidden on a man who has left, and the refusal message says to set him back to Expected, but no button or editable field does that. A man who comes back is registered again as a new occupant.

People, Bed Allocations: every allocation, live or closed, with dates and nights. The contractor bill is read from this table.

PART 8 Papers falling due

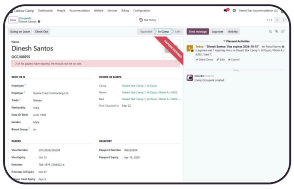

Four documents on every man run out on their own schedule. The module turns them into one status per man, one working list and one reminder a day for the camp boss.

IN THIS PART YOU WILL LEARN

- The four expiry dates and the passport fields
- How the single papers status is worked out
- The Papers Falling Due list
- The daily reminder and how it avoids repeating itself
- Who can read passport and ID numbers

TRY IT YOURSELF ON THE DEMO

1. People, Papers Falling Due
2. Open a man marked Expired: see the ribbon, the banner and the reminder
3. Open a man marked Expiring and find his next paper

1

The papers on the form

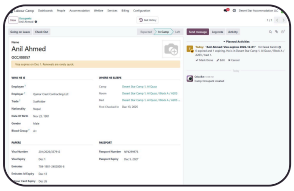

Under **Papers**: Visa Number, **Visa Expiry**, the Emirates ID number, **Emirates ID Expiry**, **Labour Card Expiry** and **Medical Expiry** (the medical fitness certificate). Under **Passport**: number and expiry. Changes to the four expiry dates are tracked in the chatter.

The Emirates ID number field is labelled just Emirates on the form, because the field has no label of its own.

2

The ribbon and the banner

With any of the four past its date the form shows a red **Papers Expired** ribbon and a banner, "2 of his papers have expired. He should not be on site." With papers inside the window the banner is amber.

3

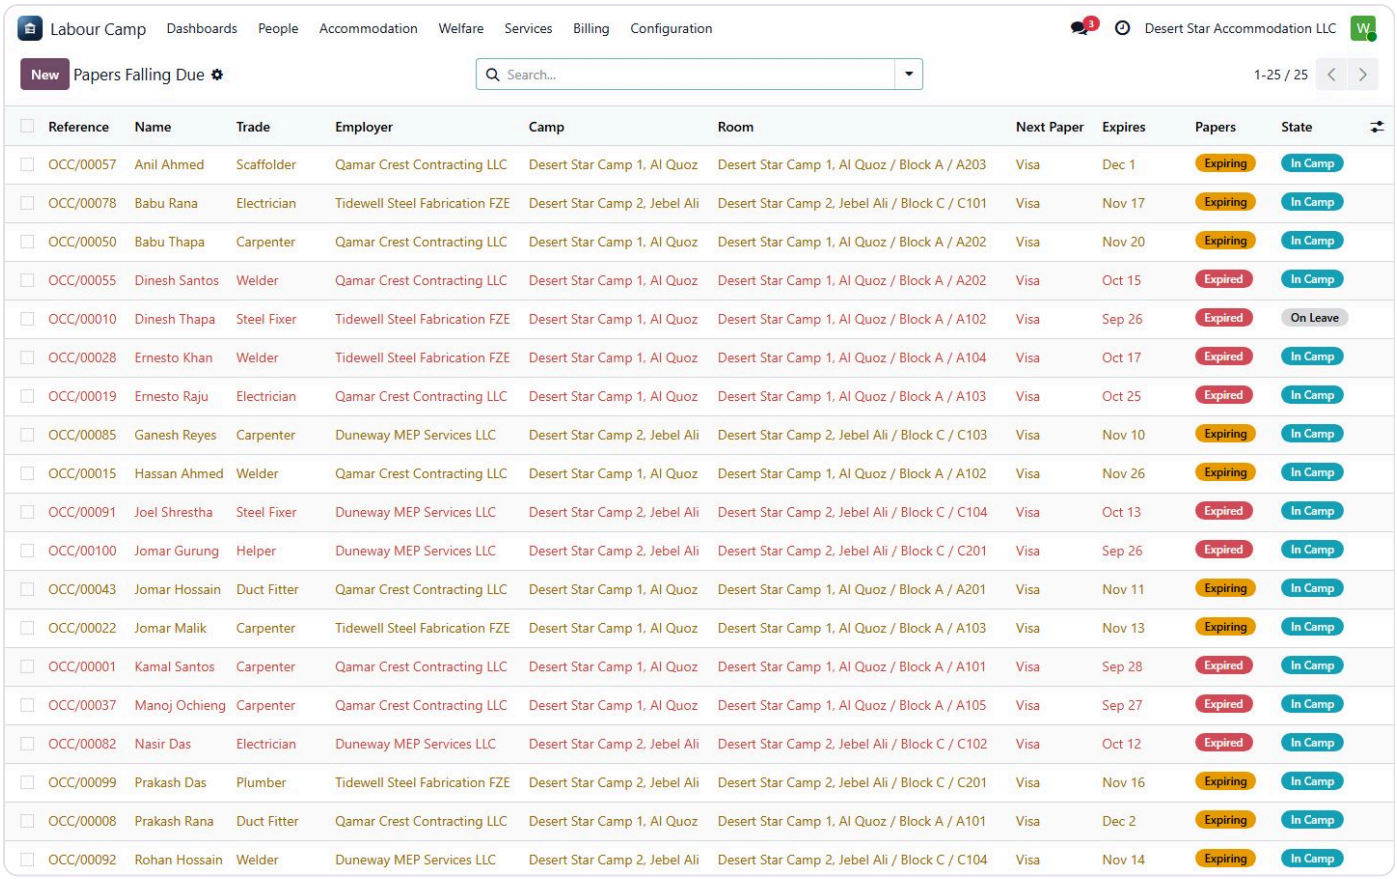

The figures

Papers is In Date, Expiring or Expired: any expired paper makes him Expired, otherwise any paper inside the window makes him Expiring. Next to it: how many are expired, how many expiring, the **Next Paper** to go and the date it goes.

The window is Warn About Papers in Settings, 30 days by default. A man who has Left always shows In Date.

FIELD	COUNTS TOWARDS THE STATUS	WHO CAN READ IT
Visa, Emirates ID, Labour Card, Medical expiry	yes	every camp role
Visa number, Emirates ID number	no	Camp Boss and Manager
Passport number and expiry	no	Camp Boss and Manager

People, Papers Falling Due: every man In Camp or On Leave whose papers are Expiring or Expired, with the next paper and its date. Camp Boss and Manager only.

The daily reminder

The job **Labour camp: papers about to expire** runs every day. For every man In Camp or On Leave whose next paper expires on or before today plus the window, expired ones included, it schedules one To Do activity on him: assigned to the Camp Boss of the camp he sleeps in (or the user the job runs as, if the camp has none), titled with his name, the paper and the date, with a note of how many papers are expired and expiring and which bed he is in.

One activity per man, not one per document. A man who already has any open activity is skipped, so marking the reminder done is what lets the next one through.

Renewing

When the new card comes back, type the new expiry over the old one and save. The status, counts and next paper follow, the chatter keeps the old date, and you mark the reminder done. There is no renewal record or upload field: attach a scan to the chatter if you keep one.

> The papers status, the expired and expiring counts and the permit status are stored on the record and recalculated when one of their dates, or the man's state, is edited. They are not recalculated as the calendar moves on, so a visa that passes its date overnight keeps the old badge until the record changes, and the boards count that stored value. The daily reminder for men searches on the date itself and is not affected. Treat the Expires date as the truth.

PART 9 Permits and certificates

The camp is licensed too, and stays licensed by keeping a stack of certificates in date. Each one is a record with its own reminder period.

IN THIS PART YOU WILL LEARN

- The nine kinds of permit
- Reminder days, days left and the status
- The daily renewal reminder

TRY IT YOURSELF ON THE DEMO

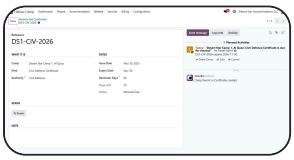

1. Welfare, Permits and Certificates
2. Open the expired pest control contract
3. Configuration, Camps, Camp 1, Permits and Certificates tab

Labour Camp | Dashboards | People | Accommodation | Welfare | Services | Billing | Configuration | Desert Star Accommodation LLC

New | Permits and Certificates | Search... | 1-16 / 16

Camp	Kind	Reference	Authority	Expiry Date	Days Left	Status

Desert Star Camp 2, Jebel Ali	Pest Control Contract	DS2-PES-2025	Brightguard Pest Control	Mar 5, 2027	120	In Date
Desert Star Camp 1, Al Quoz	Municipality Health Permit	DS1-MUN-2026	Municipality, Public Health	Apr 19, 2027	165	In Date
Desert Star Camp 2, Jebel Ali	Municipality Health Permit	DS2-MUN-2026	Municipality, Public Health	Apr 19, 2027	165	In Date
Desert Star Camp 1, Al Quoz	Kitchen and Food Handling	DS1-KIT-2026	Municipality, Food Safety	Jul 8, 2027	245	In Date
Desert Star Camp 2, Jebel Ali	Kitchen and Food Handling	DS2-KIT-2026	Municipality, Food Safety	Jul 8, 2027	245	In Date
Desert Star Camp 1, Al Quoz	Fire Alarm Maintenance	DS1-FIR-2026	Fire alarm maintenance contractor	Aug 7, 2027	275	In Date
Desert Star Camp 2, Jebel Ali	Fire Alarm Maintenance	DS2-FIR-2026	Fire alarm maintenance contractor	Aug 7, 2027	275	In Date
Desert Star Camp 1, Al Quoz	Waste Collection	DS1-WAS-2026	Waste collection contractor	Sep 6, 2027	305	In Date
Desert Star Camp 2, Jebel Ali	Waste Collection	DS2-WAS-2026	Waste collection contractor	Sep 6, 2027	305	In Date

Welfare, Permits and Certificates: soonest expiry first, with days left and status. Accommodation Manager only.

1

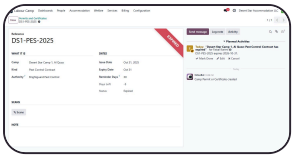

The permit

Reference as it reads on the paper, the **Camp**, the **Kind**, the **Authority** that issued it, the issue date and the **Expiry Date**. An expiry on or before the issue date is refused. Scans go in as attachments; there is a note box.

2

Reminder days

Reminder Days, 45 by default, is how long before expiry this permit starts asking to be renewed. Set it per permit: a pest control contract renews in a week, a municipality licence rarely does.

3

Days left and status

Days Left is worked out each time the record is shown. **Status** is In Date, then Renewal Due once the days left are inside the reminder period, then Expired.

KIND	KIND
Accommodation Licence	Fire Alarm Maintenance
Civil Defence Certificate	Kitchen and Food Handling
Municipality Health Permit	Waste Collection
Pest Control Contract	Other
Water Tank Cleaning	

The job **Labour camp: permits due for renewal** runs daily and puts a To Do activity for the camp boss on each permit that is Renewal Due or Expired, for example "Desert Star Camp 1, Al Quoz: Pest Control Contract has expired". A permit that already has an open activity is skipped.

> This job reads the stored status, so the note at the end of Part 8 applies here with more bite: a permit that drifts into its reminder period without being edited is not picked up until something on it changes. Check the Days Left column weekly.

The kitchen's own food licence date sits on the mess (Part 14). It is a date only, with no reminder; add it as a Kitchen and Food Handling permit too if you want the alert.

PART 10 Inspections

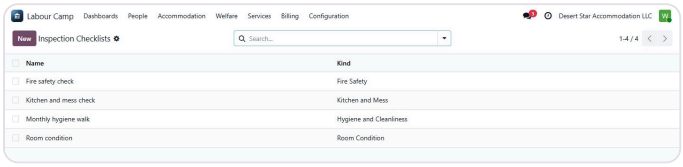

Somebody walks the blocks on a schedule and writes down what they find. Write each checklist once, mark the critical points, and the sheet scores itself.

IN THIS PART YOU WILL LEARN

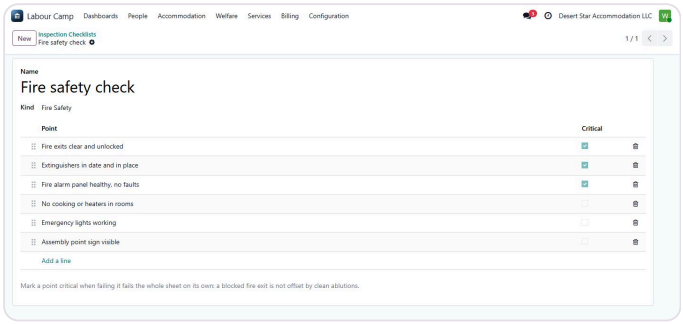

- Writing a checklist and flagging critical points
- Doing an inspection point by point
- How the score and pass are worked out
- Cancelling and resetting a sheet

TRY IT YOURSELF ON THE DEMO

1. Configuration, Inspection Checklists, open Fire safety check
2. Welfare, Inspections, open INS/2026/0009
3. Open the draft INS/2026/0012 and see the points still Not Checked

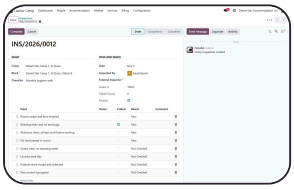

Configuration, Inspection Checklists: four on the demo.

A checklist: kind, points, and the Critical tick on the ones that fail the sheet alone.

A checklist has a name, a **kind** (Hygiene and Cleanliness, Health and Safety, Fire Safety, Kitchen and Mess, Room Condition or Welfare), the points in order and a note. Left without a company it is shared by every company in the database.

1

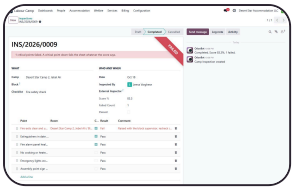

Start the sheet

Welfare, Inspections, New. Pick the **Camp**, the **Block** for one building (empty means the whole camp) and the **Checklist**: its points are copied onto the sheet with their critical flags. **Inspected By** defaults to you; **External Inspector** is for the name of a municipality or client auditor.

2

Mark every point

Each point is Not Checked until marked **Pass**, **Fail** or **Not Applicable**. Give a failure a comment and, where it is one room's fault, the **Room**. Points can be added to the sheet with Add a line. **Findings** is free text.

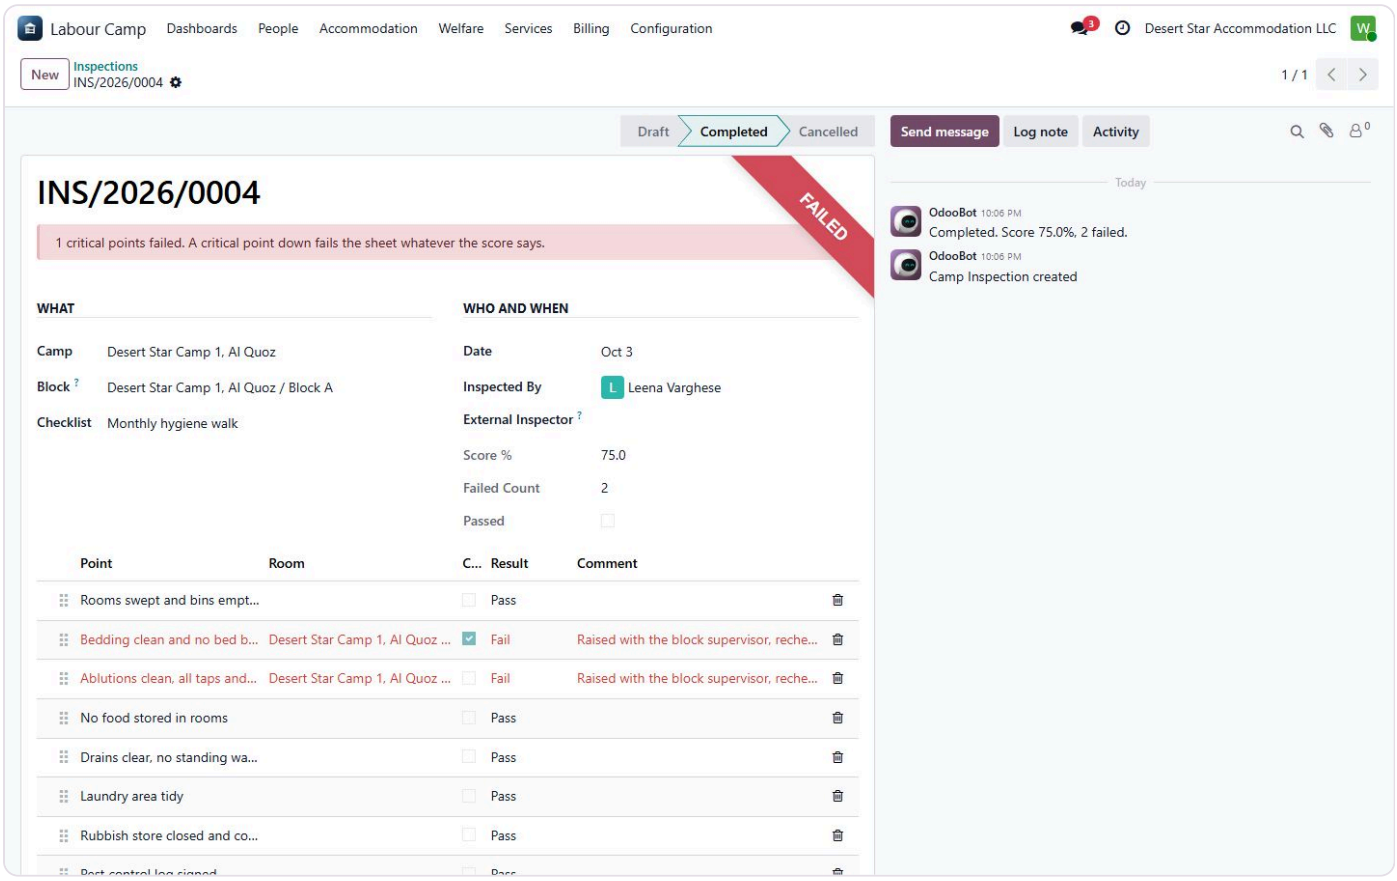

3

Complete

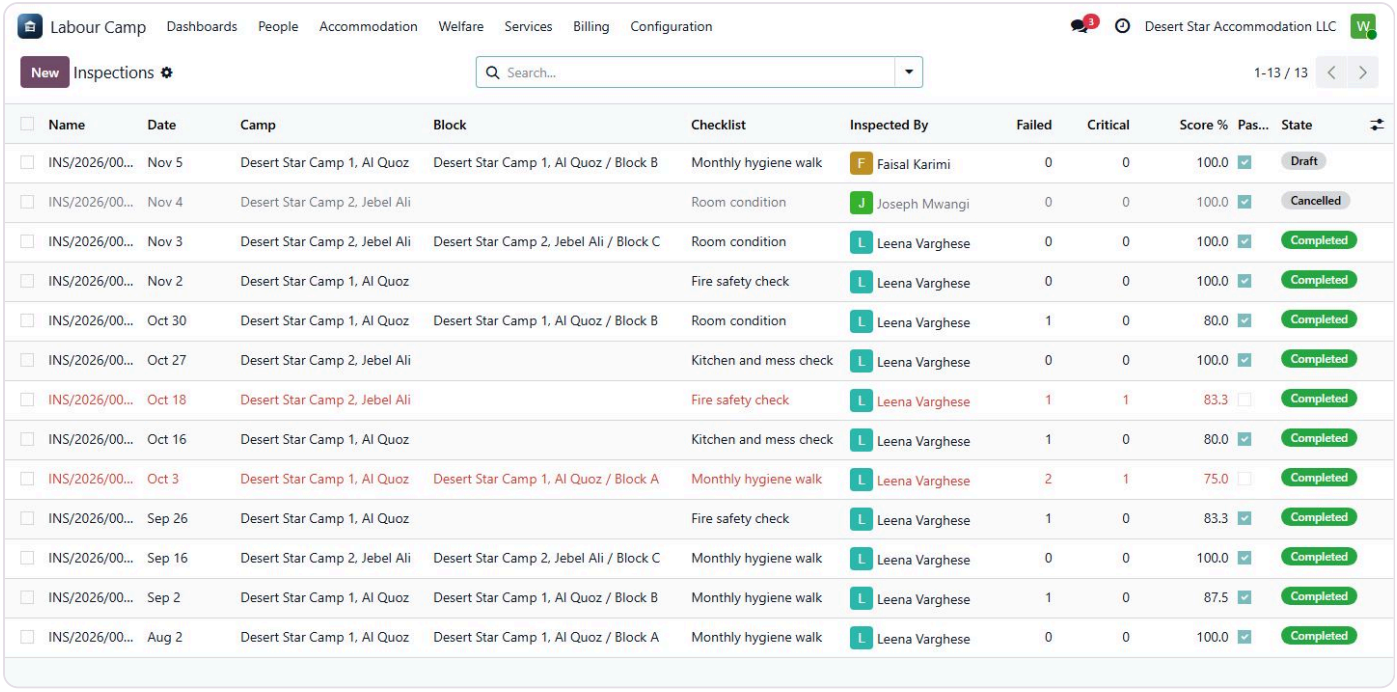

Refused while any point is still Not Checked. The chatter records the score and the number failed.

Score = points passed over points marked Pass or Fail; Not Applicable is left out. Passed needs a score of 80% or more and no failed critical point. Here a chained fire exit fails a sheet that scored 83%.

A hygiene walk with a critical failure (bed bugs) and a 75% score.

Cancel is on a draft only; **Reset to Draft** brings a cancelled sheet back. A completed sheet cannot be reopened, so check it before pressing Complete.

Name	Date	Camp	Block	Checklist	Inspected By	Failed	Critical	Score %	Pas...	State
INS/2026/00...	Nov 5	Desert Star Camp 1, Al Quoz	Desert Star Camp 1, Al Quoz / Block B	Monthly hygiene walk	Faisal Karimi	0	0	100.0	☑	Draft

Welfare, Inspections: score, failed, critical failed and passed per sheet. Camp Boss and Manager.

PART 11 Complaints

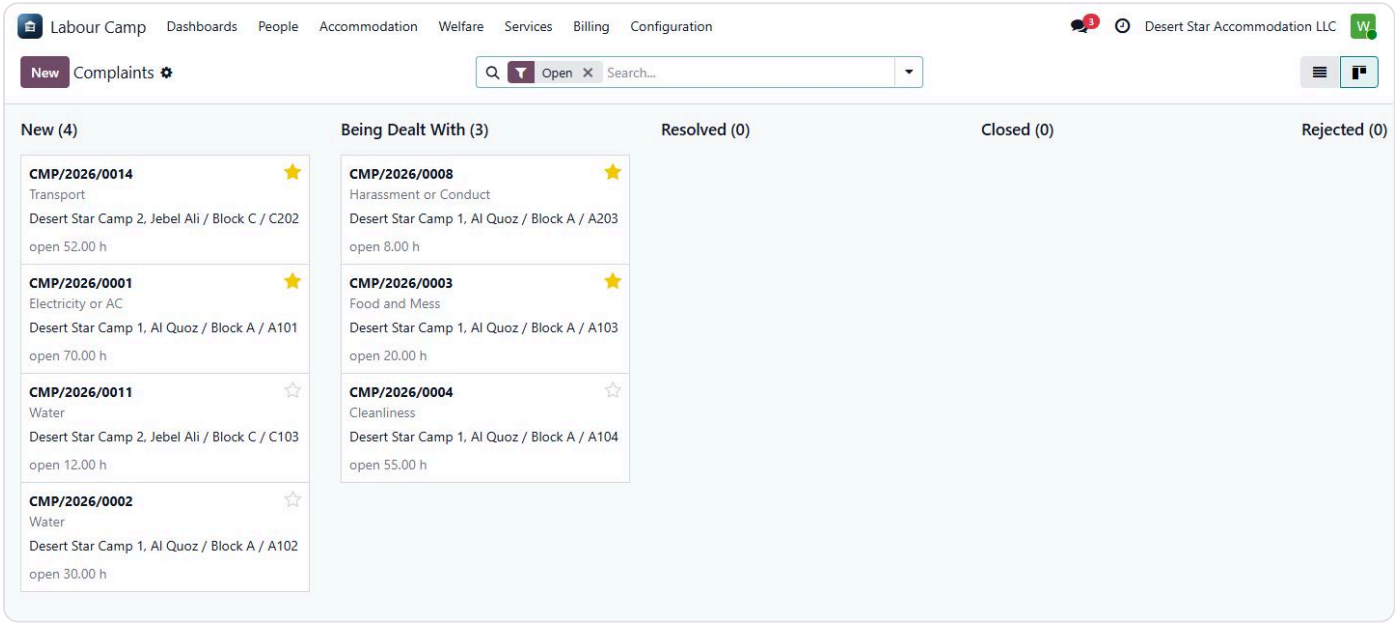

When a man says the AC has stopped, it is written down, given to somebody and closed with what was done. The board counts the ones past the time the men were promised.

IN THIS PART YOU WILL LEARN

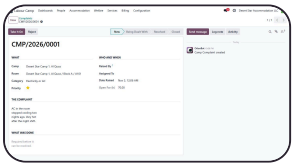

- Raising a complaint, named or anonymous
- Categories and priority
- The four buttons that move it along
- The promise time and the overdue count

TRY IT YOURSELF ON THE DEMO

1. Welfare, Complaints, switch to the kanban
2. Open CMP/2026/0001, an urgent AC complaint still New
3. Open a Resolved one and read the resolution

The complaints board: New, Being Dealt With, Resolved, Closed, Rejected.

1

Raise it

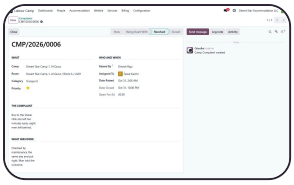

Camp, optionally the **Room**, the **Category**, **Priority** (Normal or Urgent), the **Description** and **Raised By**. Leave Raised By empty for an anonymous complaint: a complaint box that demands a name stays empty. Every camp role can raise one.

Categories: Maintenance, Cleanliness, Food and Mess, Water, Electricity or AC, Transport, Safety, Harassment or Conduct, Other.

2

Take It On

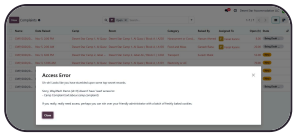

Moves New to Being Dealt With. Set **Assigned To**.

3

Resolved

Needs the **Resolution** box filled first, or it refuses. Stamps the closing time. **Close** then files it.

4

Reject

For something that will not be done, at any point before it is resolved. Also stamps the closing time. Write why in the resolution.

The promise is **Answer a Complaint Within** in Settings, 48 hours by default. The Camp Board's **Complaints past the promise** tile counts New and Being Dealt With complaints raised longer ago than that.

> Open For (h) is worked out when the complaint is saved or closed, not as time passes, so on an open complaint it shows the hours at the last save. And the rule meant to hide who raised a complaint from Camp Staff only hides rejected complaints, so the name is visible to staff on the rest. Leave Raised By empty when a man asks not to be named. There is no link to a maintenance system: raise any work order separately and note its number in the resolution.

The list view, urgent first, with hours open.

PART 12 Incidents

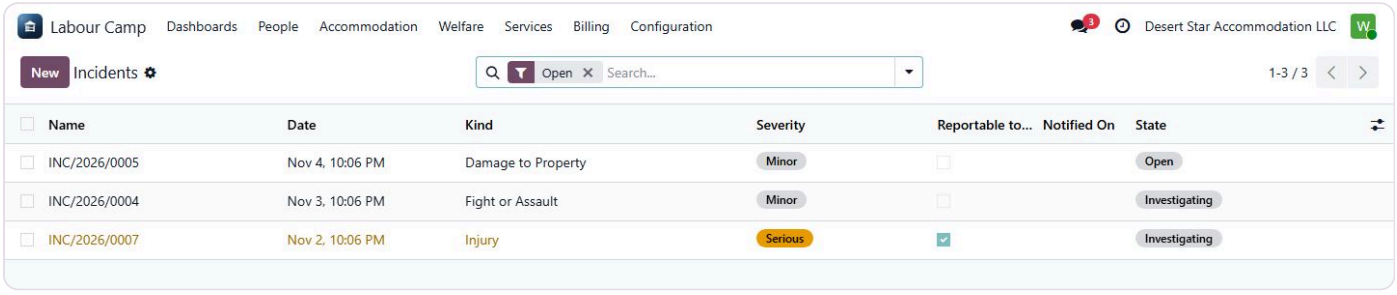

The incident book: what happened, to whom, what was done, and whether the authority had to be told. Two rules stop an incident being closed before it is finished.

IN THIS PART YOU WILL LEARN

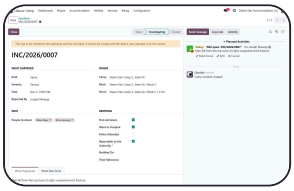

- The nine kinds and three severities
- Reportable incidents and the notified date
- Why an incident cannot close with an empty action box
- The daily chase on serious incidents

TRY IT YOURSELF ON THE DEMO

1. Welfare, Incidents
2. Open INC/2026/0007, a serious injury still under investigation
3. Open INC/2026/0002, the closed outbreak, and its What Was Done tab

Welfare, Incidents: kind, severity, state and reportable at a glance.

1

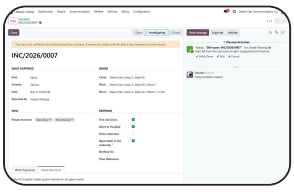

Record it

Kind: Injury, Illness or Outbreak, Fire or Alarm, Fight or Assault, Theft, Damage to Property, Absconded, Death, Other. **Severity**: Minor, Serious or Major. Date and time, camp, block, room, **Reported By**, **People Involved** and the description on the What Happened tab. Tick First Aid Given, Went to Hospital and Police Attended as they apply.

2

Reportable

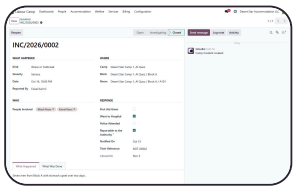

Reportable to the Authority ticks itself for any fire, any death, and anything Serious or Major, and can be changed by hand. A reportable incident shows a banner until **Notified On** is filled; **Their Reference** holds the authority's number.

3

What Was Done

Investigating moves an Open incident on. **Close** is refused while the What Was Done box is empty, and refused on a reportable incident with no notified date. **Reopen** puts a closed one back to Open.

4

Closed

The outbreak: reportable, notified the next day, closed with the kitchen inspection and the water tank flush written down.

The job **Camp: chase serious incidents still open** runs daily and puts a To Do activity for the camp boss on every Serious or Major incident that is not closed.

Unlike the papers and permit jobs, this one does not check for an existing activity, so an open serious incident gains a new reminder every day until it is closed.

PART 13 The gate register

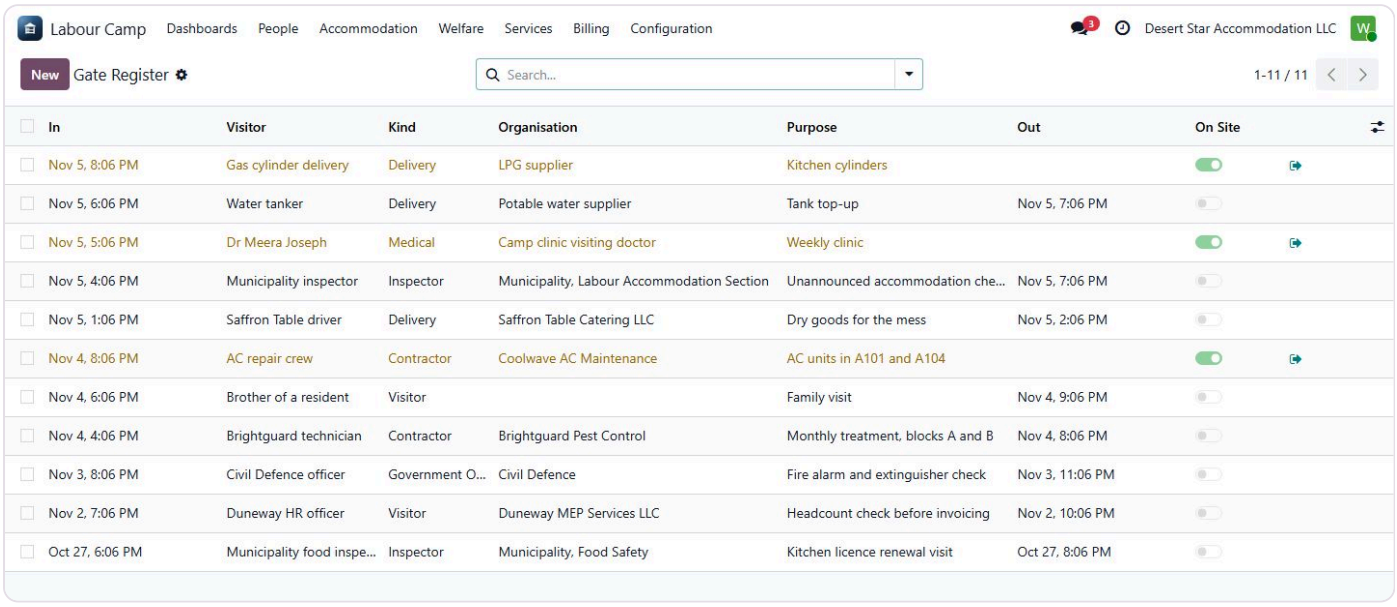

Who came in, why, who they came to see, and whether they left. The entry anybody comes back to is the inspector's.

IN THIS PART YOU WILL LEARN

- Logging a visitor and signing them out
- Visitor kinds, and the ID behind an access right
- The daily chase for anybody still signed in

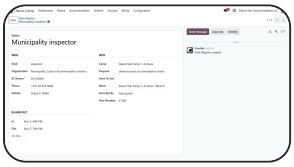

TRY IT YOURSELF ON THE DEMO

1. Welfare, Gate Register
2. Find the rows still On Site
3. Open the municipality inspector's visit

In	Visitor	Kind	Organisation	Purpose	Out	On Site
Nov 5, 8:06 PM	Gas cylinder delivery	Delivery	LPG supplier	Kitchen cylinders		
Nov 5, 6:06 PM	Water tanker	Delivery	Potable water supplier	Tank top-up	Nov 5, 7:06 PM

Nov 4, 6:06 PM	Brother of a resident	Visitor		Family visit	Nov 4, 9:06 PM	
Nov 4, 4:06 PM	Brightguard technician	Contractor	Brightguard Pest Control	Monthly treatment, blocks A and B	Nov 4, 8:06 PM	
Nov 3, 8:06 PM	Civil Defence officer	Government O...	Civil Defence	Fire alarm and extinguisher check	Nov 3, 11:06 PM	
Nov 2, 7:06 PM	Duneway HR officer	Visitor	Duneway MEP Services LLC	Headcount check before invoicing	Nov 2, 10:06 PM	
Oct 27, 6:06 PM	Municipality food inspe...	Inspector	Municipality, Food Safety	Kitchen licence renewal visit	Oct 27, 8:06 PM	

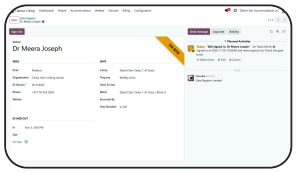

Welfare, Gate Register: kind, organisation, purpose, in, out, and a Sign Out button on those still on site.

1 Sign them in

Visitor name, the camp (the first camp by default), the **Kind** (Visitor, Inspector, Contractor, Delivery, Medical or Government Official), organisation, phone, vehicle, **Here To See** (an occupant), the block, the **Purpose**, the pass number and who escorted them. **In** defaults to now.

ID Shown is behind the Camp Boss right: the guard records it but cannot read anybody else's.

2 Sign Out

Sign Out on the row or the form stamps the time out and clears **On Site**. A time out before the time in is refused.

The job **Camp: chase anybody still signed in at the gate** runs daily and gives the camp boss an activity for every entry still on site, because a gate book full of people who never signed out is worth nothing in a fire.

> This job chases anybody on site at the moment it runs, however recently they came in, and like the incident job it adds a new activity every day rather than checking for one.

PART 14 Mess and meal headcount

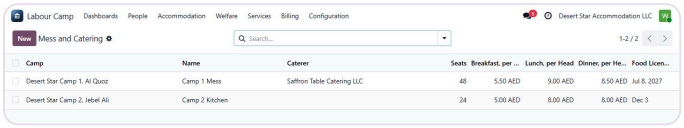

Food is the biggest running cost after rent, and it is charged per head per meal. The kitchen gets a number before the men arrive, and what was actually eaten is written down after.

IN THIS PART YOU WILL LEARN

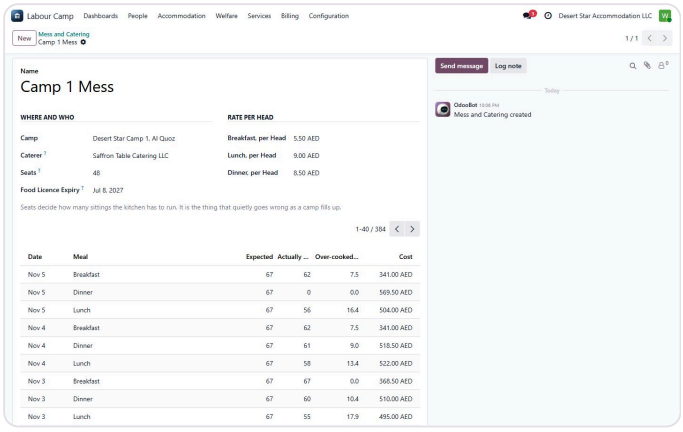

- Setting up a mess and its meal rates
- The daily headcount: expected, served, over-cooked
- How the cost of a meal is worked out

TRY IT YOURSELF ON THE DEMO

1. Configuration, Mess and Catering, open Camp 1 Mess
2. Services, Meal Headcount, then the pivot view

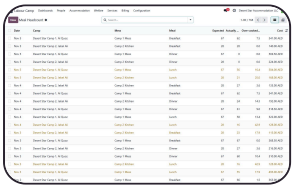

Configuration, Mess and Catering.

A mess: caterer, three rates per head, seats and the food licence date.

A mess belongs to a camp. **Caterer** is the catering company, left empty where the camp cooks for itself. **Breakfast, Lunch and Dinner, per Head** are the rates. **Seats** is how many can sit at once, which decides how many sittings the kitchen runs as the camp fills. **Food Licence Expiry** is the kitchen's own permit date (no reminder; see Part 9).

1

Count the meal

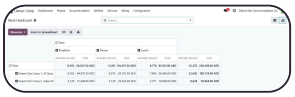

Services, Meal Headcount, New: the mess, the date and the meal. **Expected** fills itself from the camp's occupied beds when the line is saved, so the kitchen has a number to cook for. After the meal, type **Actually Served**.

Each meal can be counted once per mess per day; a second line for the same dinner is refused.

2

Read the waste and the cost

Over-cooked % is expected minus served, over expected. **Cost** is the heads served (or expected, if nothing is served yet) times the rate for that meal.

3

Total it

The pivot view adds up served and cost by camp and meal, or by week and month with the date grouping.

Camp Staff can record meal counts; the mess setup is the Accommodation Manager's.

PART 15 Buses to site

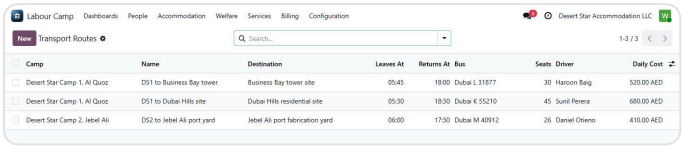

Men go to site by bus, and more men than seats is the most common finding against a labour transport contractor. Each route is set up once and each run is logged with the number on board.

IN THIS PART YOU WILL LEARN

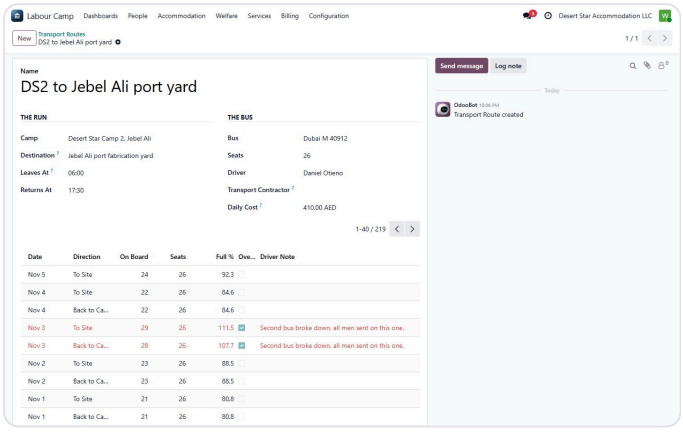

- Setting up a route, its bus and its daily cost
- Logging a run each way
- The overloaded flag

TRY IT YOURSELF ON THE DEMO

1. Configuration, Transport Routes, open DS2 to Jebel Ali port yard
2. Services, Bus Runs, filter Overloaded

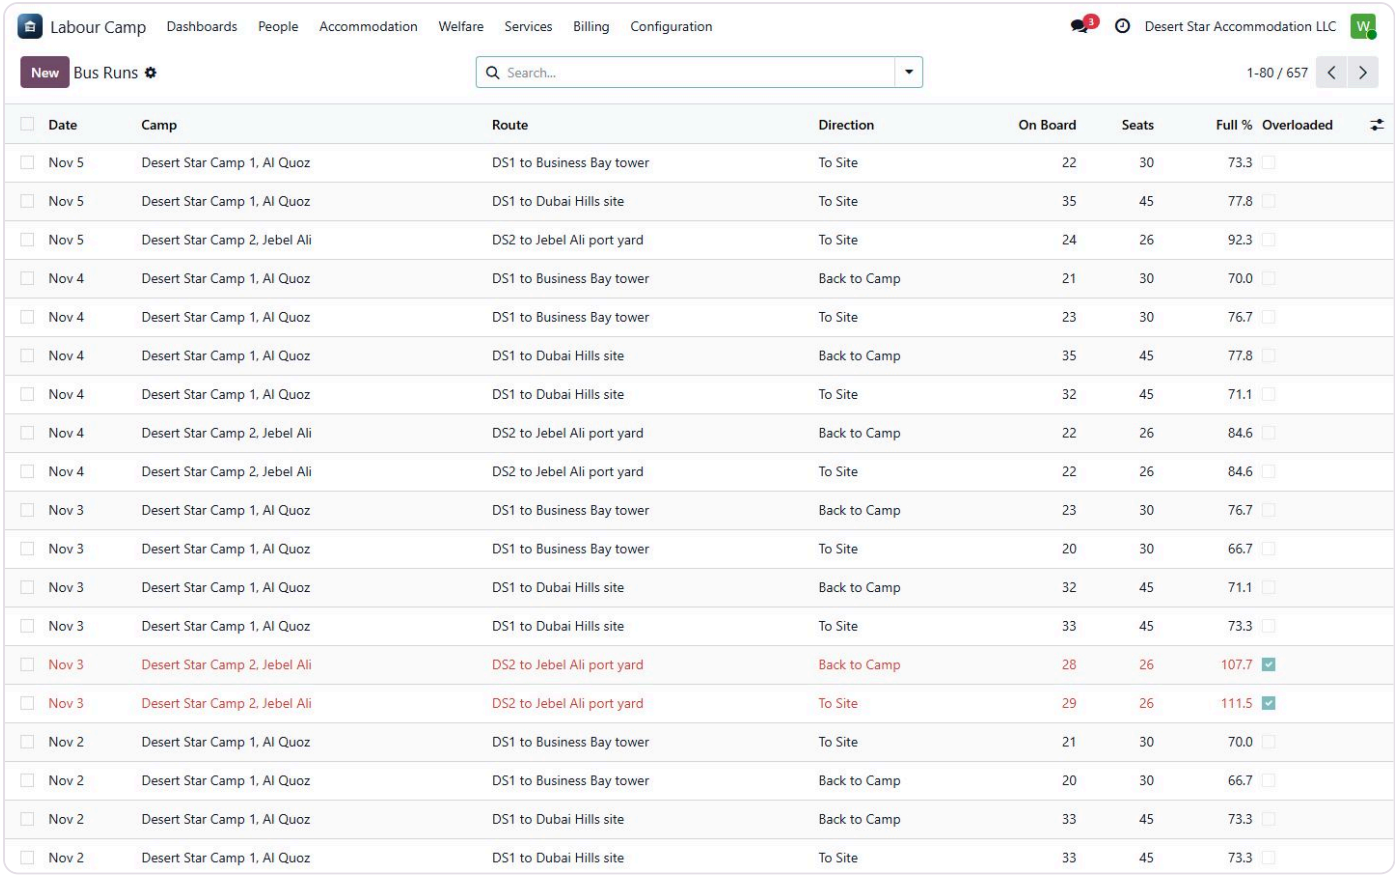

Configuration, Transport Routes.

A route: destination, times, seats, bus, driver and daily cost.

A route has a name, the camp, the **Destination** site, **Leaves At** and **Returns At** as decimal hours (5.5 is half past five), **Seats**, the **Bus** plate, the **Driver**, the **Transport Contractor** where the bus is hired, and the **Daily Cost**, which is what a contractor billed transport on top pays a share of (Part 17). Times outside 0 to 24 are refused.

Date	Camp	Route	Direction	On Board	Seats	Full %	Overloaded
Nov 5	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	To Site	22	30	73.3	
Nov 5	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	To Site	35	45	77.8	
Nov 5	Desert Star Camp 2, Jebel Ali	DS2 to Jebel Ali port yard	To Site	24	26	92.3	
Nov 4	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	Back to Camp	21	30	70.0	
Nov 4	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	To Site	23	30	76.7	
Nov 4	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	Back to Camp	35	45	77.8	
Nov 4	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	To Site	32	45	71.1	
Nov 4	Desert Star Camp 2, Jebel Ali	DS2 to Jebel Ali port yard	Back to Camp	22	26	84.6	
Nov 4	Desert Star Camp 2, Jebel Ali	DS2 to Jebel Ali port yard	To Site	22	26	84.6	
Nov 3	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	Back to Camp	23	30	76.7

Nov 3	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	Back to Camp	32	45	71.1	
Nov 3	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	To Site	33	45	73.3	
Nov 3	Desert Star Camp 2, Jebel Ali	DS2 to Jebel Ali port yard	Back to Camp	28	26	107.7	☑
Nov 3	Desert Star Camp 2, Jebel Ali	DS2 to Jebel Ali port yard	To Site	29	26	111.5	☑
Nov 2	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	To Site	21	30	70.0	
Nov 2	Desert Star Camp 1, Al Quoz	DS1 to Business Bay tower	Back to Camp	20	30	66.7	
Nov 2	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	Back to Camp	33	45	73.3	
Nov 2	Desert Star Camp 1, Al Quoz	DS1 to Dubai Hills site	To Site	33	45	73.3	

Services, Bus Runs: one row per route, day and direction, with on board, seats, Full % and the overloaded flag.

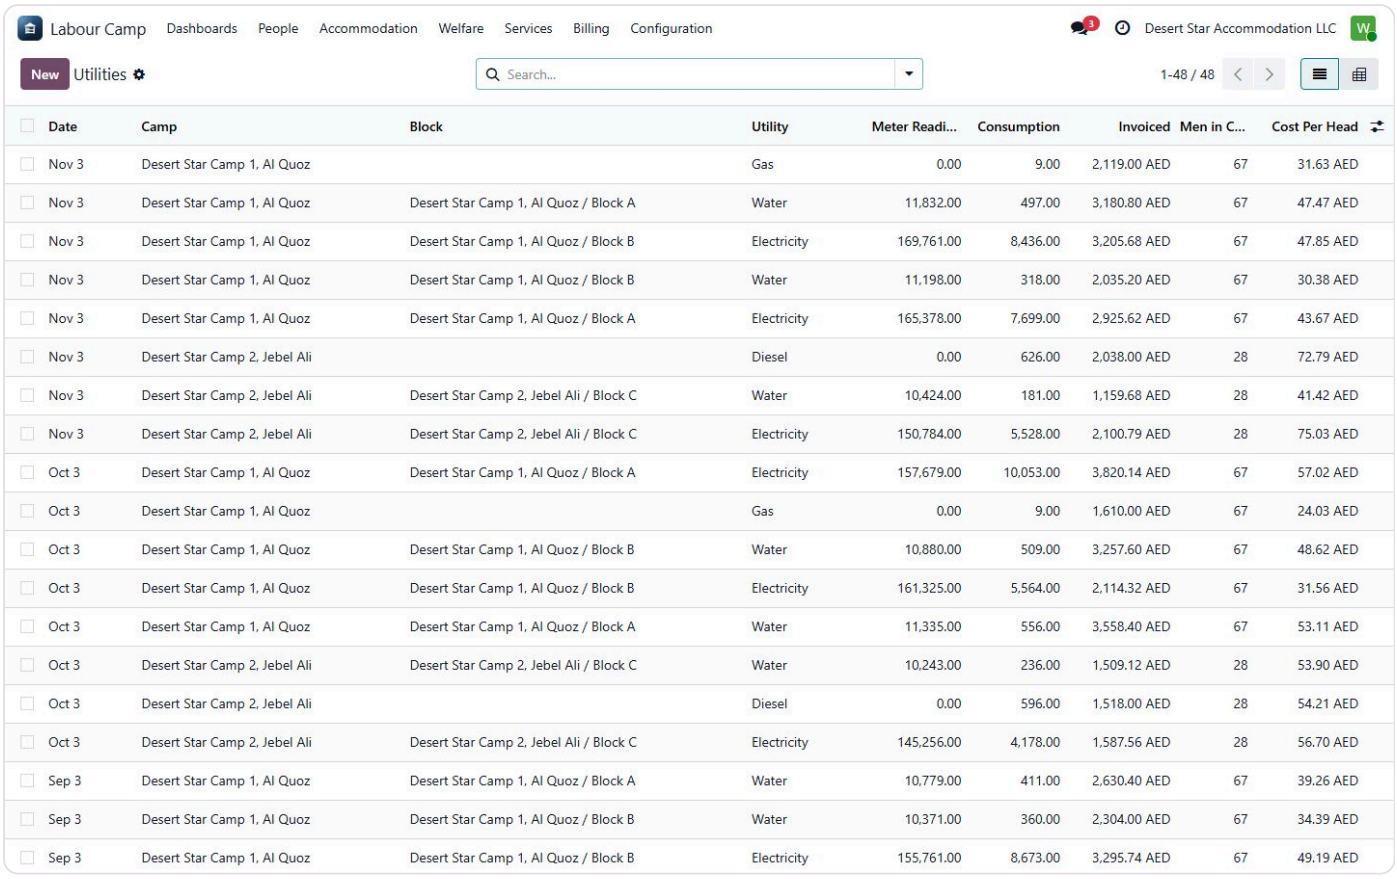

Each run is a route, a date, a **Direction** (To Site or Back to Camp), the number **On Board** and a driver note. **Full %** is on board over seats, and a run with more men than seats is flagged **Overloaded**. One run per direction per day. The Camp Board counts overloaded runs for the period and opens them.

PART 16 Utilities

Electricity, water, gas and diesel, read per meter and turned into a cost per head.

TRY IT YOURSELF ON THE DEMO

1. Services, Utilities, then the pivot view

Date	Camp	Block	Utility	Meter Readi...	Consumption	Invoiced	Men in C...	Cost Per Head
Nov 3	Desert Star Camp 1, Al Quoz		Gas	0.00	9.00	2,119.00 AED	67	31.63 AED
Nov 3	Desert Star Camp 1, Al Quoz	Desert Star Camp 1, Al Quoz / Block A	Water	11,832.00	497.00	3,180.80 AED	67	47.47 AED

Sep 3	Desert Star Camp 1, Al Quoz	Desert Star Camp 1, Al Quoz / Block B	Water	10,371.00	360.00	2,304.00 AED	67	34.39 AED
Sep 3	Desert Star Camp 1, Al Quoz	Desert Star Camp 1, Al Quoz / Block B	Electricity	155,761.00	8,673.00	3,295.74 AED	67	49.19 AED

Services, Utilities: one row per reading. Accommodation Manager only.

1

Take a reading

Camp, and the **Block** where a block has its own meter (empty for a camp on one meter). **Utility**: Electricity, Water, Gas or Diesel. The date, the **Meter Reading**, the **Invoiced** amount and the invoice reference.

Leave **Consumption** empty and it is worked out from the last reading on the same meter. **Men in Camp** fills from the camp's occupied beds on the day.

2

Cost per head

Cost Per Head is the invoiced amount over the men in camp. The pivot totals the amounts by camp and utility; **Period** (year and month) groups readings by the month they belong to.

PART 17 Billing the contractors

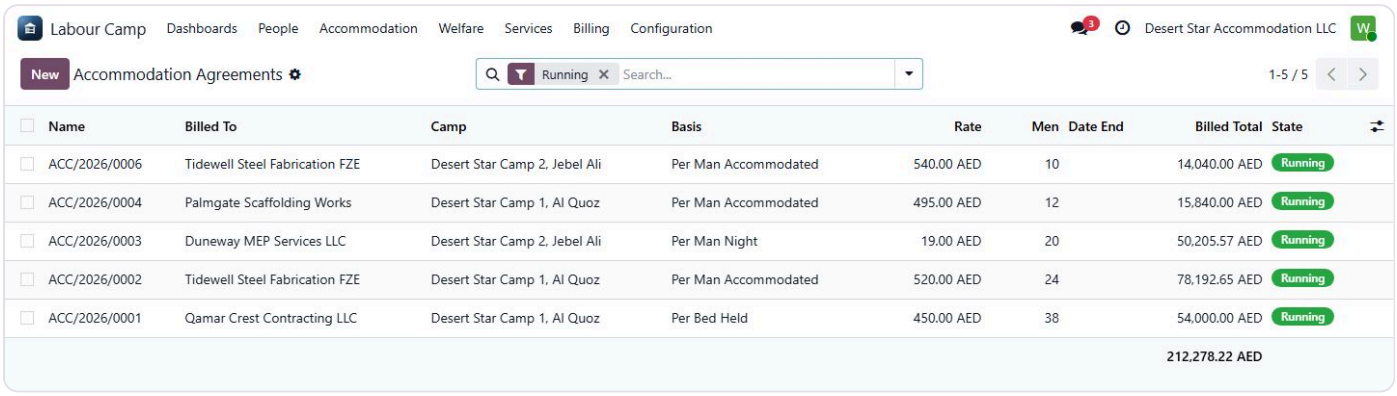

Whoever pays for the beds gets one agreement per camp and one charge a month, worked out from the bed allocations and raised as an Odoo invoice.

IN THIS PART YOU WILL LEARN

- The agreement and its three bases
- Putting men under an agreement
- How a monthly charge is worked out
- Approve, raise the invoice, confirm
- What to check before approving

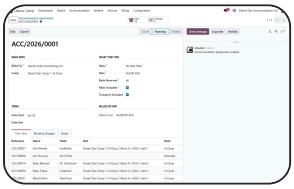

TRY IT YOURSELF ON THE DEMO

1. Billing, Agreements, open ACC/2026/0001 and ACC/2026/0003
2. Billing, Monthly Charges, open the approved October charge
3. Open an invoiced charge and press Open the Invoice

Name	Billed To	Camp	Basis	Rate	Men	Date End	Billed Total	State
ACC/2026/0006	Tidewell Steel Fabrication FZE	Desert Star Camp 2, Jebel Ali	Per Man Accommodated	540.00 AED	10		14,040.00 AED	Running
ACC/2026/0004	Palmgate Scaffolding Works	Desert Star Camp 1, Al Quoz	Per Man Accommodated	495.00 AED	12		15,840.00 AED	Running
ACC/2026/0003	Duneway MEP Services LLC	Desert Star Camp 2, Jebel Ali	Per Man Night	19.00 AED	20		50,205.57 AED	Running
ACC/2026/0002	Tidewell Steel Fabrication FZE	Desert Star Camp 1, Al Quoz	Per Man Accommodated	520.00 AED	24		78,192.65 AED	Running
ACC/2026/0001	Qamar Crest Contracting LLC	Desert Star Camp 1, Al Quoz	Per Bed Held	450.00 AED	38		54,000.00 AED	Running
							212,278.22 AED	

Billing, Agreements: contractor, camp, basis, rate, dates and state. Camp Boss and Manager.

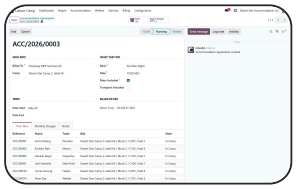

1

The agreement

Billed To (the contractor, subcontractor or group company), the **Camp**, the **Basis**, the **Rate** (per month, or per night on a nightly basis), **Beds Reserved** for Per Bed Held, **Mess Included** and **Transport Included** (both ticked by default), and the start and end dates. Billed Total adds up its charges that are not cancelled.

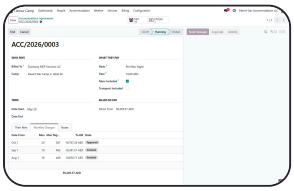

Per Bed Held with no beds reserved is refused, because it would bill nothing. An end date before the start is refused.

2

Per man night, with the bus on top

Duneway's agreement at Camp 2: 19 AED a night, Transport Included unticked so each charge adds its share of the route costs.

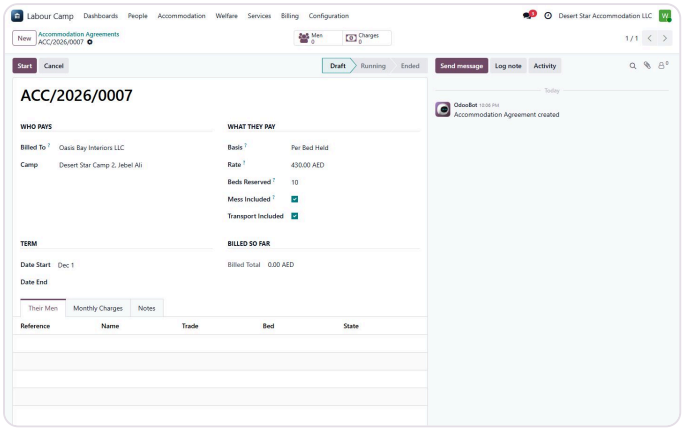

3

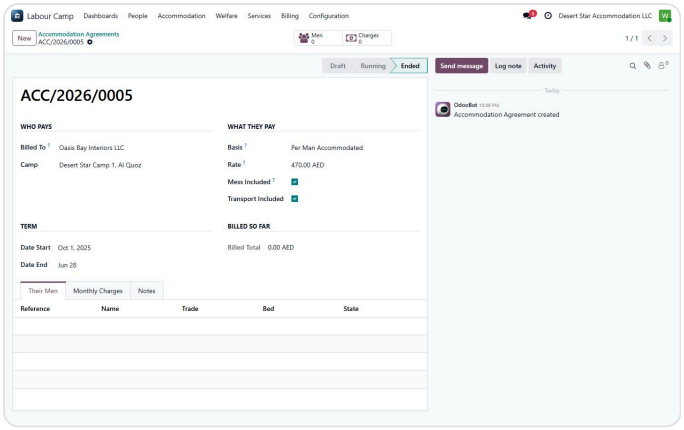

Their Men and Monthly Charges

The tabs and smart buttons list the men billed under it and its charges. Notes holds anything agreed outside the figures.

BASIS	ACCOMMODATION ON THE CHARGE	SUITS
Per Bed Held	Beds Reserved × Rate	a main contractor holding a block
Per Man Accommodated	Men × Rate	simple monthly pricing
Per Man Night	Man Nights × Rate	mixed stays and disputed bills

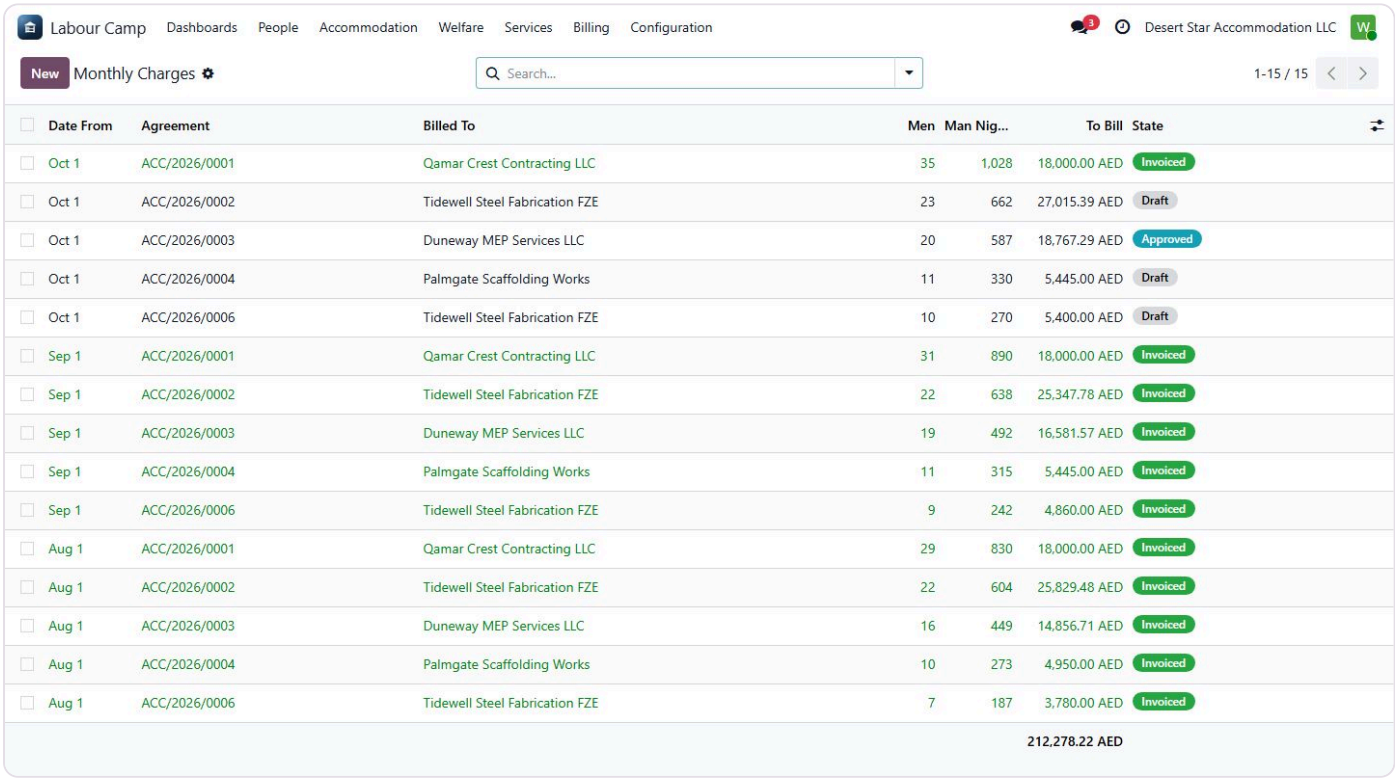

A Draft agreement: Start sets it Running. Only running agreements are charged.

An Ended agreement: End fills today as the end date if none was set.

Cancel on an agreement is refused once any of its charges has been invoiced: end it instead. Each man's **Billed Under** field (on the occupant) is what ties him to an agreement, not his employer, so a man can be billed to a different company from his sponsor, or left empty for one the camp carries. Nothing checks the two match.

The monthly charge

Date From	Agreement	Billed To	Men	Man Nig...	To Bill	State
Oct 1	ACC/2026/0001	Qamar Crest Contracting LLC	35	1,028	18,000.00 AED	Invoiced
Oct 1	ACC/2026/0002	Tidewell Steel Fabrication FZE	23	662	27,015.39 AED	Draft
Oct 1	ACC/2026/0003	Duneway MEP Services LLC	20	587	18,767.29 AED	Approved
Oct 1	ACC/2026/0004	Palmgate Scaffolding Works	11	330	5,445.00 AED	Draft
Oct 1	ACC/2026/0006	Tidewell Steel Fabrication FZE	10	270	5,400.00 AED	Draft
Sep 1	ACC/2026/0001	Qamar Crest Contracting LLC	31	890	18,000.00 AED	Invoiced
Sep 1	ACC/2026/0002	Tidewell Steel Fabrication FZE	22	638	25,347.78 AED	Invoiced
Sep 1	ACC/2026/0003	Duneway MEP Services LLC	19	492	16,581.57 AED	Invoiced
Sep 1	ACC/2026/0004	Palmgate Scaffolding Works	11	315	5,445.00 AED	Invoiced
Sep 1	ACC/2026/0006	Tidewell Steel Fabrication FZE	9	242	4,860.00 AED	Invoiced
Aug 1	ACC/2026/0001	Qamar Crest Contracting LLC	29	830	18,000.00 AED	Invoiced
Aug 1	ACC/2026/0002	Tidewell Steel Fabrication FZE	22	604	25,829.48 AED	Invoiced
Aug 1	ACC/2026/0003	Duneway MEP Services LLC	16	449	14,856.71 AED	Invoiced
Aug 1	ACC/2026/0004	Palmgate Scaffolding Works	10	273	4,950.00 AED	Invoiced
Aug 1	ACC/2026/0006	Tidewell Steel Fabrication FZE	7	187	3,780.00 AED	Invoiced
					212,278.22 AED	

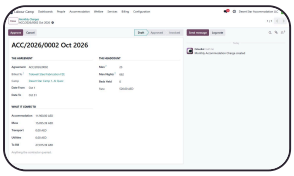

Billing, Monthly Charges: three months on the demo, at every stage.

Charges are drafted by the job **Camp: draft last month's accommodation charges**, which ships switched off (Part 4). Switched on, it runs on the first of the month and drafts one charge for each running agreement that covered the month before. Run again for the same month, it refreshes charges still in Draft and leaves the rest alone. There is no button to draft a chosen month by hand; a charge can also be created with New and the figures typed in.

HOW IT WORKS

How the figures are worked out

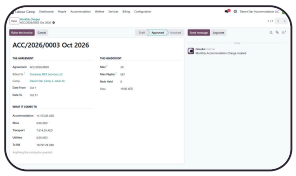

Men	different men billed under the agreement with an allocation overlapping the month
Man Nights	per allocation: from the later of its start and the 1st, to the earlier of its end and the last day
Accommodation	by basis, as in the table above
Mess	if not included: the camp's meal costs for the month × his men ÷ the men in camp now
Transport	if not included: each route's daily cost for each day it ran, shared the same way
To Bill	**accommodation + mess + transport**

4

Check the draft

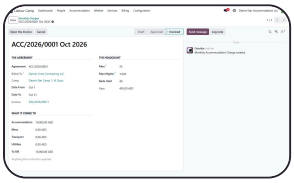

Agreement, Billed To, camp, the period, Men, Man Nights, Beds Held and Rate, then Accommodation, Mess, Transport, Utilities and To Bill. Any of them can be corrected while it is a draft.

5

Approve

The headcount is worth a second look before it goes to a contractor, so a draft has to be approved before it can be invoiced.

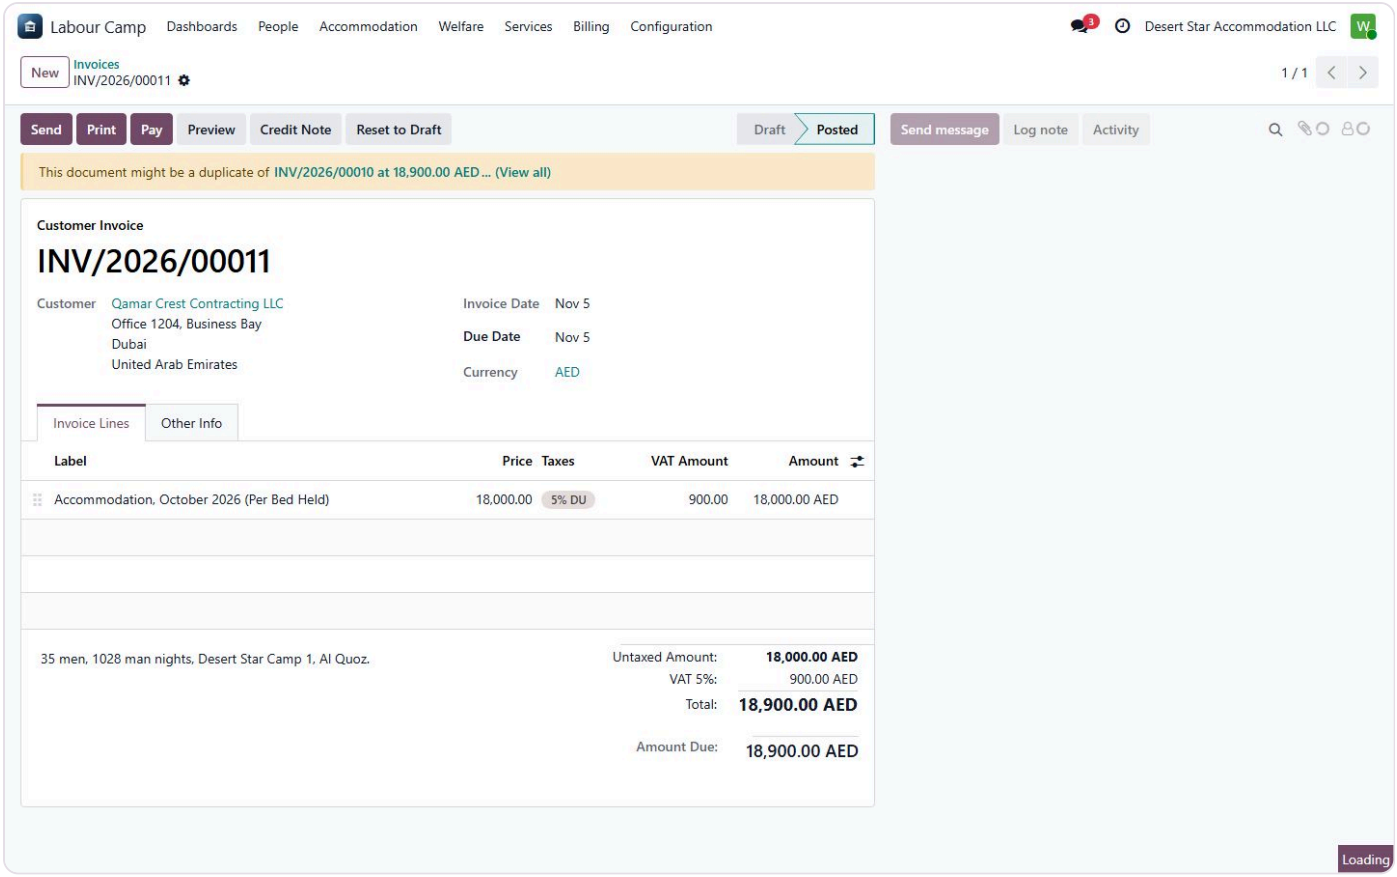

6

Raise the Invoice

Creates one customer invoice for the contractor, dated today, with the charge as its source and a narration of men, man nights and camp. One line for accommodation (with the month and basis), and one each for mess, transport and utilities when they have an amount. **Open the Invoice** takes you to it.

The invoice is a draft. Confirm it in Invoicing. A charge on a live invoice cannot be cancelled until the invoice is cancelled.

The invoice the charge raised, in Invoicing, with 5% VAT from the accommodation product.

> Check before approving. The allocation search ignores the allocation's state, so a cancelled reservation overlapping the month is counted as a man and, on a nightly agreement, its nights run to the end of the month. Man nights stop at the last day rather than after it, so a man in camp all of October counts 30 nights, not 31. The Utilities amount is never filled by the job. And the mess and transport share divides by the men in camp on the day the job runs. Read Men and Man Nights against the Bed Allocations list.

PART 18 The two dashboards

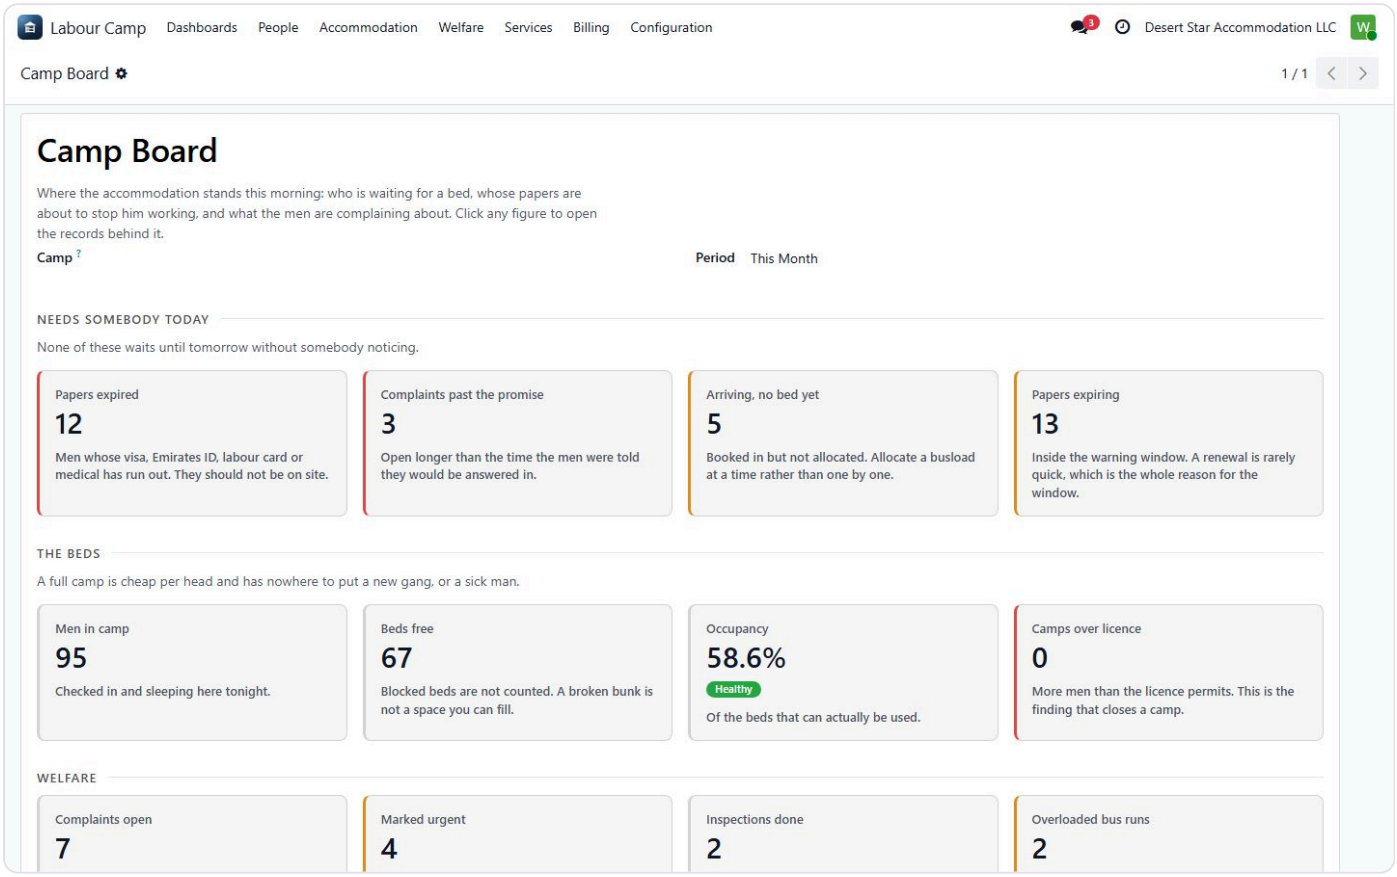

Two boards: the camp boss's morning, and the manager's month. Every figure opens the records behind it.

IN THIS PART YOU WILL LEARN

- What each tile on the Camp Board counts
- The compliance row and the cost row
- The camp and period filters

TRY IT YOURSELF ON THE DEMO

1. Dashboards, Camp Board: click Papers expired
2. Dashboards, Compliance and Cost: set Camp to Camp 2

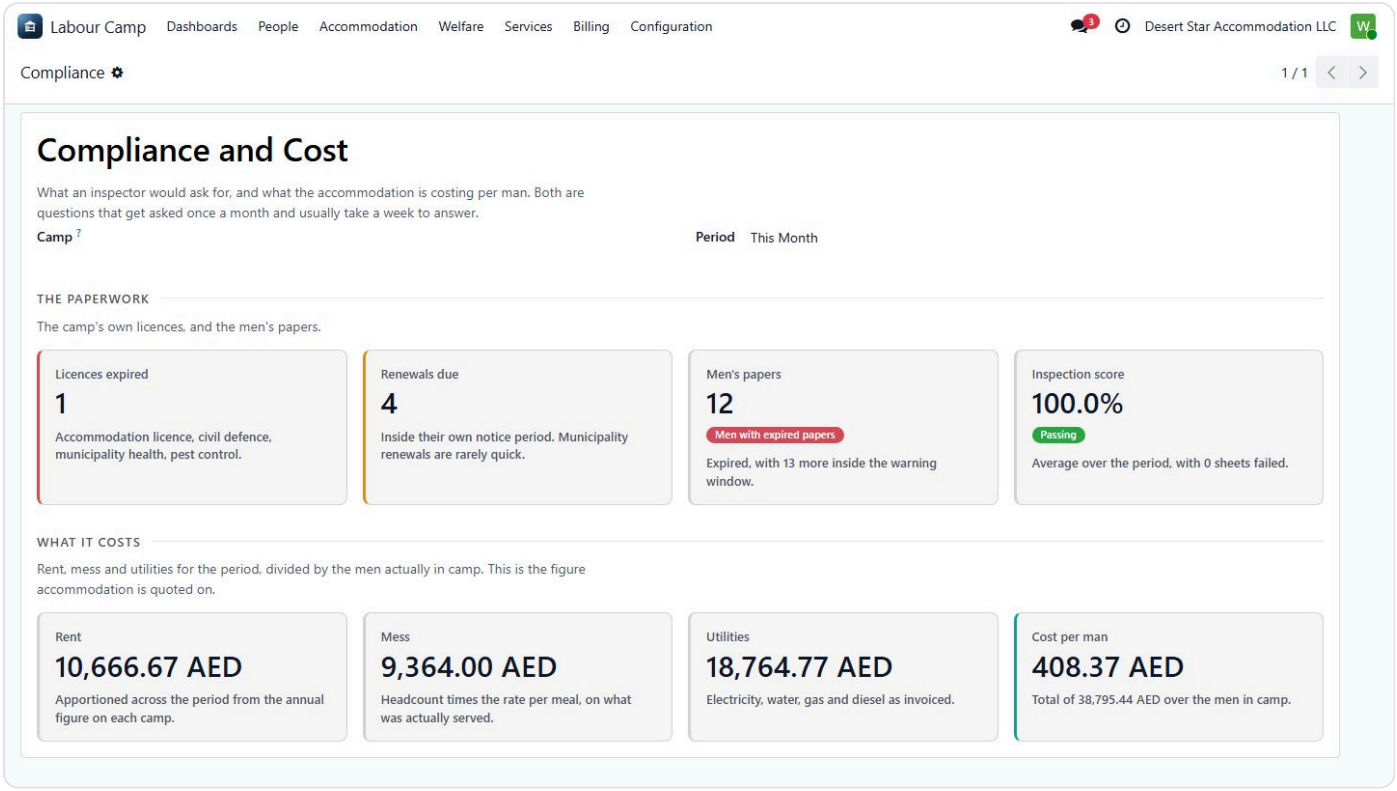

Dashboards, Camp Board.

TILE	COUNTS	OPENS
Papers expired	Men In Camp or On Leave with an expired paper	those men
Complaints past the promise	New or Being Dealt With, older than the promise hours	those complaints
Arriving, no bed yet	Men in state Expected	expected men
Papers expiring	Men inside the warning window	those men
Men in camp	Occupied beds (men on leave keep theirs)	men In Camp
Beds free	Vacant beds, blocked ones left out	vacant beds
Occupancy	Occupied over usable beds: Healthy to 90%, Filling up to 97%, then Effectively full	all beds
Camps over licence	Camps with more men than the licence	camps

Complaints open, Marked urgent	Live complaints, and the urgent ones	complaints
Inspections done	Completed in the period, with the failed count	inspections
Overloaded bus runs	Runs over their seats in the period	those runs

> Arriving, no bed yet counts every Expected man, including those who already have a reserved bed, so on the demo it shows 5 although 4 of them are reserved.

Dashboards, Compliance and Cost. Accommodation Manager only.

The paperwork row: **Licences expired**, **Renewals due**, **Men's papers** (expired, with how many more are inside the window) and the **Inspection score**: the average of completed sheets in the period, Passing from 90%, Marginal from 80%, Failing below.

The cost row: **Rent** (annual rent over twelve, times the part of the period gone), **Mess** (meal costs since the period started), **Utilities** (amounts dated in the period) and **Cost per man**, the three added up over the men in camp today.

> Transport is not in the cost per man, although the module description lists it, and early in a month the figure leans on whichever utility bills are already dated in it. Compare full months.

Both boards have **Camp** (empty for all camps) and **Period** (This Month, This Quarter, This Year) at the top.

PART 19 The printed documents

The module has no printed reports of its own. What leaves the camp on paper is the contractor's invoice.

Desert Star

Desert Star Accommodation LLC
Plot 14, Al Quoz Industrial Area 3
Dubai
United Arab Emirates

Qamar Crest Contracting LLC
Office 1204, Business Bay
Dubai
United Arab Emirates

Tax Invoice INV/2026/00011

Invoice Date	Due Date	Source
11/05/2026	11/05/2026	ACC/2026/0001 Oct 2026

Description	Quantity	Unit Price	Taxes	VAT Amount	Amount
Accommodation, October 2026 (Per Bed Held)	1.00	18,000.00	5%	900.00	18,000.00 AED
		Untaxed Amount			18,000.00 AED
Payment Communication: **INV/2026/00011**		VAT 5%			900.00 AED
35 men, 1028 man nights, Desert Star Camp 1, Al Quoz.		**Total**			**18,900.00 AED**

The tax invoice raised from an October charge, printed with Odoo's standard invoice layout and the company letterhead. The narration line under the totals carries the men and man nights.

Everything else, the papers list, the gate book, an inspection sheet, prints or exports the way any Odoo list does: select rows, then Export to a spreadsheet, or use the browser's print. There is no inspection certificate, gate pass or bed card template.

PART 20 A fifteen minute walk-through

If you have the demo open and fifteen minutes, this path shows the whole camp. It is also the order to show it to somebody else in.

#	DO THIS	AND NOTICE
1	Dashboards, Camp Board	*12 men with expired papers, 3 complaints past the promise, 67 beds free once blocked bunks are left out.*
2	Click Papers expired, open a man	*The red ribbon, the banner and the reminder already waiting for the camp boss.*
3	Configuration, Camps, Camp 1	*Licence 110, rent 960,000 AED, the blocks with their beds and the permits tab.*
4	Accommodation, Rooms, A101	*Eight bunks, who is on each, and 3.4 m2 per bed.*
5	People, Occupants, an Expected man, Allocate a Bed (then Cancel)	*Beds needed against beds free, and the gang kept together by room.*
6	People, Bed Allocations, a Reserved one	*The bed held for Saturday's arrival, checked in when the bus lands.*
7	Welfare, Permits and Certificates	*An expired pest control contract and two civil defence renewals due.*
8	Welfare, Inspections, INS/2026/0009	*83% and still a fail: a critical point is down.*
9	Welfare, Incidents, INC/2026/0007	*A serious injury that cannot close until the notified date is in.*
10	Billing, Agreements, then Monthly Charges	*Per bed, per man and per man night, worked out from the allocations and invoiced.*
11	Dashboards, Compliance and Cost	*What a man costs a month in rent, food and utilities.*

Questions people ask

QUESTION	ANSWER
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community and installs Employees and Invoicing, which are part of Community.
Do the men have to be our employees?	No. Linking an occupant to an employee record is optional, so subcontractors' men get beds and bills like anyone else.
Can two men end up on one bed?	No. One live allocation per bed and one per man, checked on every save.
What stops a camp going over its licence?	Check in is refused once occupied beds reach the licensed capacity.
Does it file anything with MoHRE or the municipality?	No. It keeps the dates, permits and certificates an inspector asks to see; filings stay with you.
Can workers raise complaints from a phone?	No. There is no worker app or portal; staff record complaints in the back office.
Is the contractor invoice automatic?	The monthly job drafts the charge; a person approves it and raises the invoice, which is a draft until confirmed.

Can one database run several companies' camps?	Yes. Every record carries its company and each company sees only its own; checklists without a company are shared.

PART 21 The menu map

Every screen in the module, on one page.

Dashboards

Camp Board	Papers, complaints, arrivals, beds, welfare
Compliance and Cost	Licences, papers, inspections, cost per man

People

Occupants	Every man: employer, papers, bed, state
Papers Falling Due	Expired and expiring papers, in camp or on leave
Bed Allocations	Who slept where, from when, for how many nights

Accommodation

Free Beds	Vacant beds by camp
Rooms	Type, capacity, area per bed, state
All Beds	Every bed, occupied, vacant or blocked

Welfare

Complaints	Raised, taken on, resolved, closed or rejected
Inspections	Checklists marked point by point, scored
Permits and Certificates	The camp licences and their renewals
Gate Register	Who came in, and whether they left
Incidents	What happened, what was done, who was told

Services

Meal Headcount	Expected, served, over-cooked, cost
Bus Runs	On board against seats, overloaded runs
Utilities	Readings, invoiced amounts, cost per head

Billing

Agreements	Per bed, per man or per man night
Monthly Charges	Worked out, approved, invoiced

Configuration

Settings	Paper warning, licence, complaint promise
Camps	Licence, rent, camp boss, blocks, permits
Mess and Catering	Caterer, rates per head, seats
Transport Routes	Destination, seats, bus, daily cost
Inspection Checklists	Points, and the critical ones

Want this for your camps?

We set it up from your licence and your room list, load your men and their papers, set the agreements with your contractors, connect the invoices to your accounts and VAT, and train the camp boss and the gate. The same module runs one camp or several companies' camps in one database.
