COMPLETE GUIDE · SETUP, EVERY SCREEN, EVERY STEP

Real Estate Management for Odoo 19

Listings for sale and rent, inquiries, deals, payment schedules, contracts and commission, then the managed portfolio: post-dated cheques, maintenance, owner statements, lease renewals and one dashboard. Shown on a live demo.

BASE · USD 35

ENTERPRISE ADD-ON · USD 69

START How to read this guide

This is one guide for one product: Real Estate Management for Odoo 19. It comes as a base module and an Enterprise add-on that installs on top of it. Everything the base does stays when you add the add-on.

BASE

In the Real Estate Management module (wt_real_estate, USD 35). Listings, inquiries, deals, payment schedules, contracts, commission rules, the website listing pages and the customer portal.

ENTERPRISE ADD-ON

Needs the Real Estate Management Enterprise add-on (wt_real_estate_enterprise, USD 69) on top of the base. Post-dated cheques, maintenance, owner statements, lease renewals and deposits, and the portfolio dashboard.

Every part, section and step carries one of these two badges, so you always know which module a screen belongs to. Both run on Odoo 19 Community. The add-on is called Enterprise because it is the larger edition; it does not need an Odoo Enterprise subscription.

Who it is for

The owner or office manager setting the agency up, the front desk taking calls, the agents showing property and closing deals, and the accounts person banking cheques and paying owners.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the demo, then walks every screen in numbered steps with a screenshot for each.

The live demo

Gulf Key Properties, a worked example letting and sales agency in Dubai, priced in AED, with 34 properties, 36 inquiries, 26 deals, 17 contracts and 96 cheques already on it.

HOW IT WORKS

The demo agency

Address	**realestate-pro.way4tech.com** (base and Enterprise add-on installed)
Sign in	**w4demo** / **Demo2026** (a Real Estate Manager)
Agency	Gulf Key Properties, Dubai · currency AED · management fee 5%
Runs on	Odoo 19, Community edition

The demo is shared and resets from time to time. Look around as much as you like, but treat it as a showroom, not your own books: anything you change may be seen by the next visitor or changed back. All names, properties and amounts on it are invented for the demo.

PART 22 Menu map

PART 1 How a property agency works

A property agency does two kinds of work that look alike from outside and are very different inside. Brokerage is finding a buyer or tenant and closing the deal. Management is looking after a let property for its owner for as long as the lease runs. The base module covers the first. The add-on covers the second.

IN THIS PART YOU WILL LEARN

- The difference between brokerage and property management
- The stages of a sale or letting deal, from listing to completion
- Why rent in the Gulf is paid by a book of post-dated cheques
- What an owner statement is and why it must reconcile to the bank
- The words the rest of the guide uses

Brokerage: from listing to a closed deal BASE

An owner gives the agency a property to sell or let. The agency lists it, people ask about it, an agent shows it, somebody makes an offer, the price is agreed, a token or booking deposit is paid, the agreement is signed, the balance is paid and the deal completes. The agency earns a commission on the agreed price.

The brokerage cycle BASE

1. **List** — A property for sale, rent or lease
2. **Inquire** — A caller, walk-in or web visitor asks
3. **Offer** — A price is put on the table
4. **Token** — A booking deposit secures it
5. **Agree** — A contract is printed and signed
6. **Complete** — Balance paid, property closed

Management: the lease after it is signed ENTERPRISE ADD-ON

Once a property is let, the work changes. In much of the Gulf and South Asia a year of rent is handed over on the day the lease is signed as a book of post-dated cheques, one for each period. The agency banks each cheque on its date, chases the ones that bounce, fixes what breaks in the property, takes its management fee and pays the owner what is left. Before the lease ends it is renewed, often with the rent stepped up.

The management cycle ENTERPRISE ADD-ON

1. **Lease** — Rent per period, deposit, escalation
2. **Cheque book** — One post-dated cheque per period
3. **Bank** — Deposit each cheque on its date
4. **Repair** — Maintenance billed to owner or tenant
5. **Statement** — Rent less fee less repairs
6. **Renew** — A new lease with the rent stepped up

Words used in this guide

WORD	WHAT IT MEANS HERE
Property	One unit the agency lists: a flat, villa, plot, office, shop or warehouse. It has a purpose: for sale, for rent or for lease.
Owner	The landlord or seller who gave the agency the property. Kept on the property as Property Owner.
Inquiry	A person asking about a property or about buying, renting or selling in general. The front of the pipeline.

Transaction	A deal on one property with one buyer or tenant: the agreed price, token, commission and payment schedule.
Token	The booking deposit that secures a property while the paperwork is done.
Contract	The sale, rent or lease agreement, with its terms, documents and a printed PDF.
Payment schedule	The list of amounts due on a deal: token, installments, rent, final payment, commission.
Post-dated cheque (PDC)	A cheque written for a future date. It can only be banked on or after that date.
Owner statement	What was collected for an owner in a period, less the management fee and repairs, and what is owed to him.
Escalation	The agreed percentage by which the rent goes up when the lease is renewed.
Marla, kanal	Land units used in Pakistan. 1 marla = 272.25 sq ft, 1 kanal = 5,445 sq ft.

PART 2 The app at a glance

The module adds one app, Real Estate, to the Odoo home screen. Inside it the menu is split into areas. This part is the map: what each area is for, who can see it, and what the add-on adds.

IN THIS PART YOU WILL LEARN

- The Real Estate menu and what each area is for
- The three roles and what each one can see and change
- Which features come with the base and which with the add-on
- What the modules leave to Odoo Invoicing

TRY IT YOURSELF ON THE DEMO

1. Sign in and open the Real Estate app
2. Open each top menu once and read its sub menus
3. Compare the menus with the table on this page

BASE The Odoo home screen with the Real Estate app. Everything in this guide is inside it.

The menu areas

MENU	WHAT IS IN IT	MODULE
Dashboard	The portfolio board: occupancy, rent roll, cheques due and bounced, leases running out, open maintenance, owed to owners	ENTERPRISE ADD-ON
Properties	All Properties, Available, Featured	BASE
CRM	All Inquiries and the Pipeline board	BASE
Transactions	All Transactions, Contracts, Payment Schedule, Overdue Payments	BASE
Finance	Commission Rules	BASE
Management	Cheques, Maintenance, Owner Statements	ENTERPRISE ADD-ON
Configuration	Property Types, Property Stages, Amenities, Tags, Settings	BASE
Configuration	Maintenance Categories	ENTERPRISE ADD-ON

Three roles BASE

Each user is given one of three Real Estate roles in their user settings. Each role includes the one below it, so a Manager can do everything an Agent can.

ROLE	SEES AND DOES	MENUS
Receptionist	Reads properties and deals. Creates and edits inquiries, so the front desk can log every call and walk-in.	Properties, CRM
Agent / Broker	Creates and edits properties, inquiries, transactions, contracts and payment lines. A record rule limits an agent to the properties, inquiries and transactions where he is the assigned agent (his employee is linked to his user). With the add-on: works cheques, maintenance and owner statements.	Adds Transactions, Payment Schedule, and with the add-on Management and Dashboard
Manager	Sees every record, can delete, and owns the setup: types, stages, amenities, tags, settings, commission rules, overdue payments and maintenance categories.	Adds Overdue Payments, Finance, Configuration

> The record rule for agents works through the employee record. Link each agent's Employee to his User (Employees app, the employee form, Related User), or the agent will see no properties at all.

What the Enterprise add-on adds ENTERPRISE ADD-ON

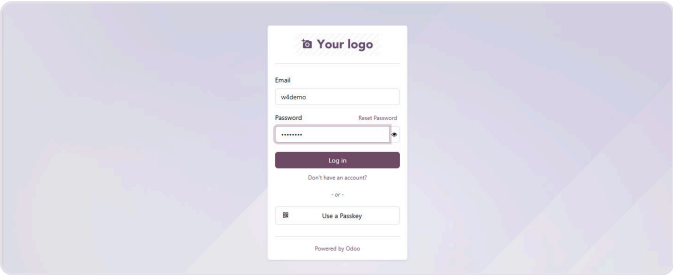

FEATURE	BASE	ENTERPRISE ADD-ON
Property listings, photos, area in marla, kanal, sq ft or sq m	✓	✓
Inquiry pipeline, offers, transactions, payment schedule	✓	✓
Contracts with printed agreement, commission rules	✓	✓
Website listing pages, inquiry form, customer portal	✓	✓
Rent per period, security deposit and refund on the lease	–	✓
Lease renewal with rent escalation	–	✓
Post-dated cheque book, banking, bounce and replace	–	✓
Maintenance requests billed to owner, tenant or agency	–	✓
Owner statements with management fee and payout	–	✓
Portfolio dashboard	–	✓

What it does not do

Cheques, payment lines, owner statements and payouts are tracked as their own records with a status. Nothing in either module creates invoices, payments or journal entries, so the bookkeeping is still done in Invoicing. The base module depends on Invoicing and Employees because it uses their currency, partner and employee records.

PART 3 Signing in

The demo runs in any browser. There is nothing to install. Sign in with the shared demo login, then open the Real Estate app from the home screen.

1 BASE

Open the sign in page

Go to **realestate-pro.way4tech.com**. Type the login `w4demo` and the password `Demo2026`, then press **Log in**.

On your own system each user signs in with his own login, and sees only what his Real Estate role allows.

2 BASE

Open Real Estate

The home screen shows every installed app. Click **Real Estate**. With the add-on installed, the app opens on the Dashboard; on the base alone it opens on Properties.

The top bar inside the app holds the menus from Part 2. The same menus work on a phone, folded into a menu button.

> The w4demo user is a Real Estate Manager, so every menu in this guide is visible to it.

PART 4 Setting up from zero

A new database needs very little before the first listing goes in. The module installs eight property types, six stages and seventeen amenities. This part goes through them in the order to check them, then the settings and the users.

IN THIS PART YOU WILL LEARN

- The order to set the agency up in
- Property types, stages and which stages count as closed
- Amenities and tags
- The four Real Estate settings and what each one holds
- Maintenance categories and the management fee

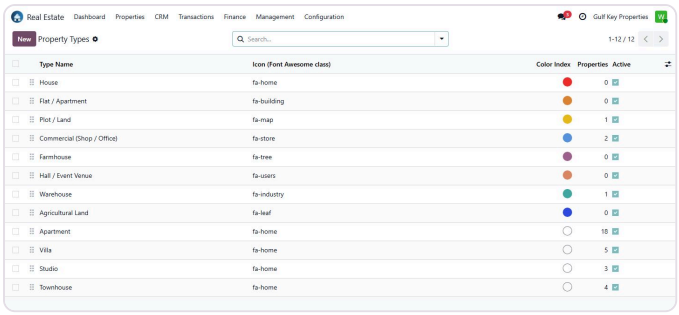

TRY IT YOURSELF ON THE DEMO

1. Open Configuration, Property Stages and find the three closed stages
2. Open Configuration, Settings and read the Real Estate block
3. Open Maintenance Categories

The order to set things up

STEP	WHERE	WHY	
1. Install	Apps, search Real Estate	Install Real Estate Management. Employees, Invoicing and Discuss come with it. Install the Enterprise add-on after it if you manage leases.	BASE
2. Agents as employees	Employees app	Every agent is an Employee, linked to his User. Deals and commission are assigned to employees.	BASE
3. Roles	Settings, Users, each user, Real Estate	Receptionist, Agent / Broker or Manager.	BASE
4. Types, stages, amenities, tags	Real Estate, Configuration	Rename or add to the defaults to match your market.	BASE
5. Settings	Real Estate, Configuration, Settings	Default area unit, default commission, auto assign, Google Maps key.	BASE
6. Commission rules	Real Estate, Finance	Your agency's commission table.	BASE
7. Maintenance categories	Real Estate, Configuration	Plumbing, electrical, air conditioning and so on.	ENTERPRISE ADD-ON
8. Management fee	Company record (see below)	The default fee taken on owner statements, 5% unless changed.	ENTERPRISE ADD-ON

Property types BASE

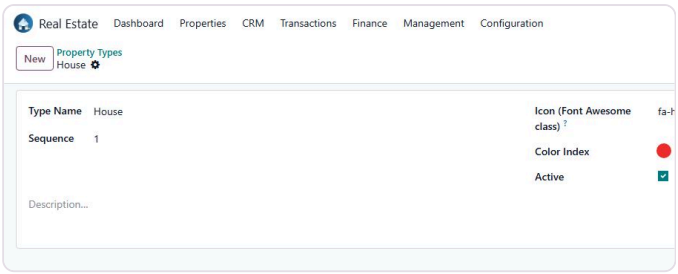

1 BASE

Open Property Types

Configuration, Property Types lists the types with how many properties use each. Eight come installed: House, Flat / Apartment, Plot / Land, Commercial (Shop / Office), Farmhouse, Hall / Event Venue, Warehouse and Agricultural Land.

Drag the handle to reorder. The order is the order in drop-down lists.

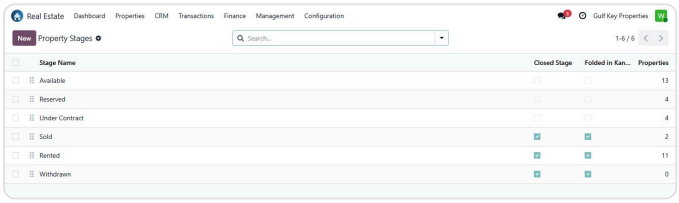

2 BASE

A type

Each type has a name, a sequence, a description, a Font Awesome icon class (for example **fa-home** or **fa-building**), a colour and an Active box. Untick Active to retire a type without losing history.

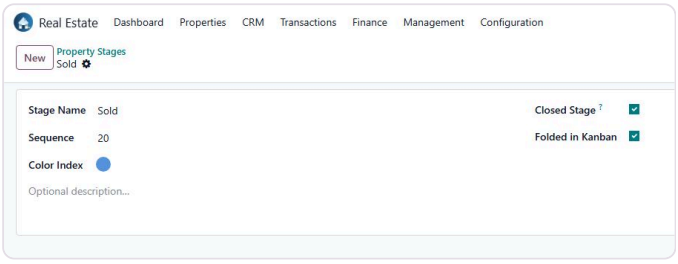

Property stages BASE

3 BASE

Open Property Stages

Stages are the columns of the property board: Available, Reserved, Under Contract, Sold, Rented and Withdrawn. Sold, Rented and Withdrawn are marked **Closed**.

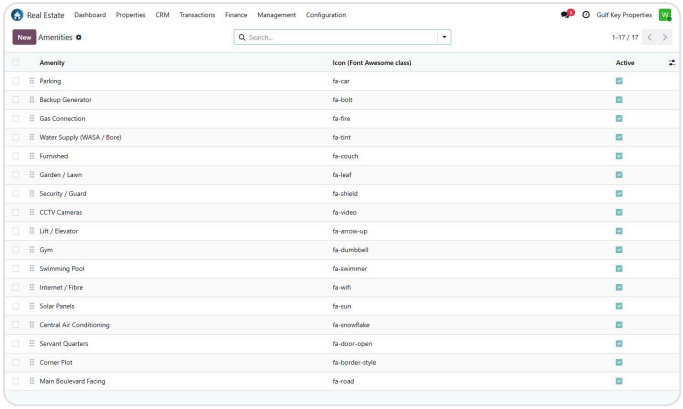

4 BASE

A stage

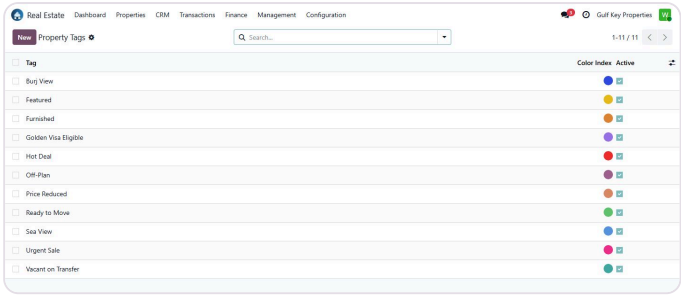

A stage has a name, sequence, description and colour, **Folded in Kanban** to collapse its column, and **Closed Stage**. A property in a closed stage drops out of the Available menu. When a deal is marked Completed, the property moves to the first closed stage by sequence.

Keep Sold as the first closed stage, or a completed rent deal will also move its property to Sold.

Amenities and tags BASE

BASE Amenities: seventeen installed, from Parking and Backup Generator to Corner Plot. Each has an icon class.

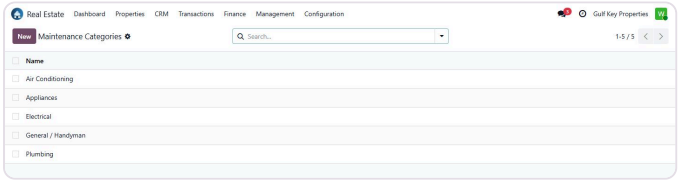

BASE Tags: free labels with a colour, such as Hot Deal or Urgent Sale, shown on the property.

Real Estate settings BASE

Configuration, Settings opens the Real Estate block of the Odoo settings page. Odoo only lets a user with the **Administration: Settings** right open that page, so give the person who sets the agency up both that right and the Real Estate Manager role. A Real Estate Manager without it sees an access error.

SETTING	WHAT IT HOLDS	
Auto-Assign Inquiry to Property Agent	Stored as a switch, on by default. A web inquiry for a property is always given that property's agent, whatever this switch says.	BASE
Default Area Unit	Marla, kanal, sq ft or sq m. Stored; new properties start on Marla.	BASE
Default Commission %	Stored, 2% by default. Type the rate on each deal.	BASE
Google Maps API Key	Stored for a map integration. The property form uses the Google Maps Link field instead.	BASE

Maintenance categories and the management fee ENTERPRISE ADD-ON

5 ENTERPRISE ADD-ON

Maintenance categories

Configuration, Maintenance Categories holds Plumbing, Electrical, Air Conditioning, Appliances and General / Handyman. Each has a colour and an Active box. A name can only be used once.

6 ENTERPRISE ADD-ON

Default management fee

The add-on keeps a default management fee and a default bounce charge on the company. The fee is 5% unless changed, and every new owner statement starts with it. It can be overridden on each statement.

There is no settings screen for these two figures yet. Change them once with your implementer, or set the fee on each statement.

PART 5 Property listings

The property is the record everything else hangs off. It holds what the unit is, where it is, what it costs, who owns it, which agent has it, its photos, and every inquiry and deal on it.

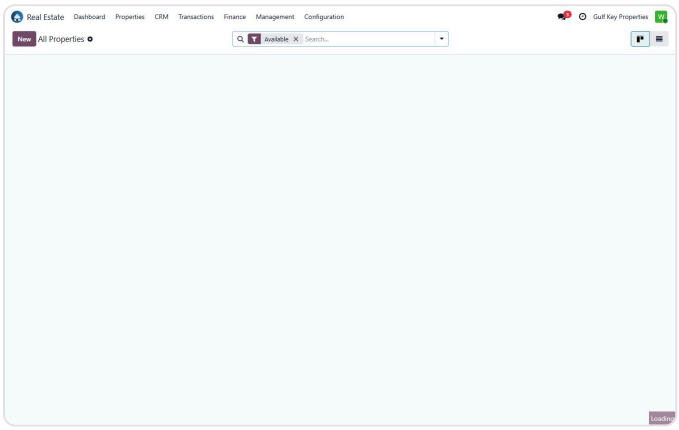

IN THIS PART YOU WILL LEARN

- Reading the property board and moving a property between stages
- Every tab of the property form
- How area in marla, kanal or square metres is turned into square feet
- Publishing a listing to the website
- Printing the property sheet

TRY IT YOURSELF ON THE DEMO

1. Open Properties, All Properties and remove the Available filter
2. Open Marina Gate 2 Tower 3315 and click through every tab
3. Open its Inquiries button
4. Print its Property Sheet

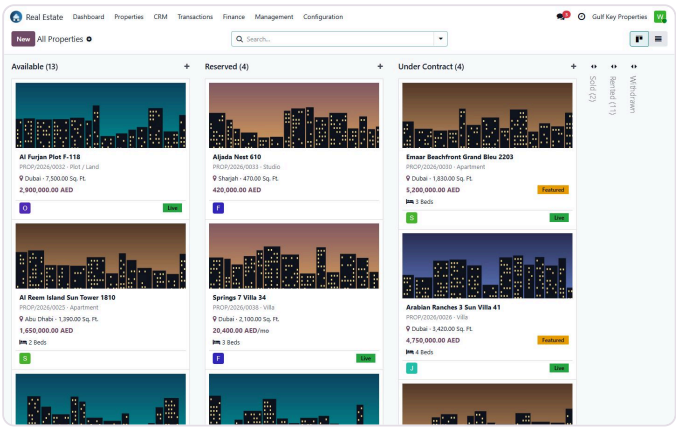

The property board BASE

1 BASE

Properties, All Properties

Opens the board grouped by stage. The **Available** filter is on when it opens, so closed properties are hidden. Each card shows the main photo, the title, reference, type, city, area, price (with /mo for monthly rent), bedrooms, the agent and a **Featured** or **Live** label.

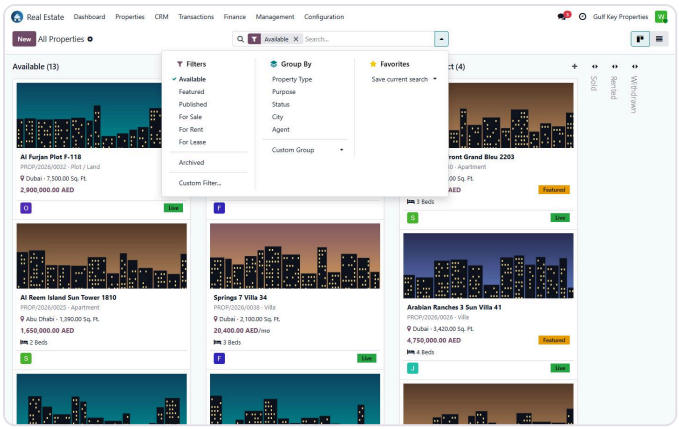

2 BASE

Remove the filter to see every stage

Click the x on the Available facet. Sold, Rented and Withdrawn appear as folded columns on the right. Drag a card to another column to change its stage.

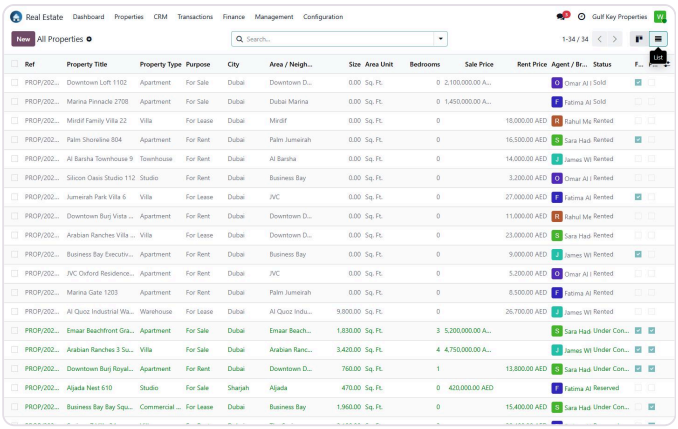

Moving a card is a real change; on the demo just look.

3 BASE

Filter and group

Filters: Available, Featured, Published, For Sale, For Rent, For Lease, Archived. Group by: Property Type, Purpose, Status, City, Agent. Search by title or reference, city, area, type, agent or owner.

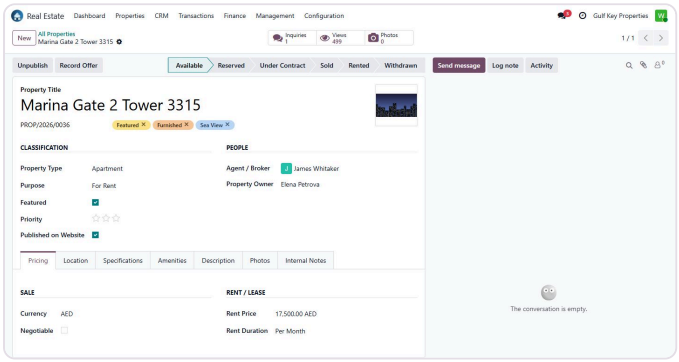

4 BASE

The list view

The list button top right shows the same properties as rows with price, area and stage. **Properties, Available** shows only open stages; **Featured** only featured listings.

The property form BASE

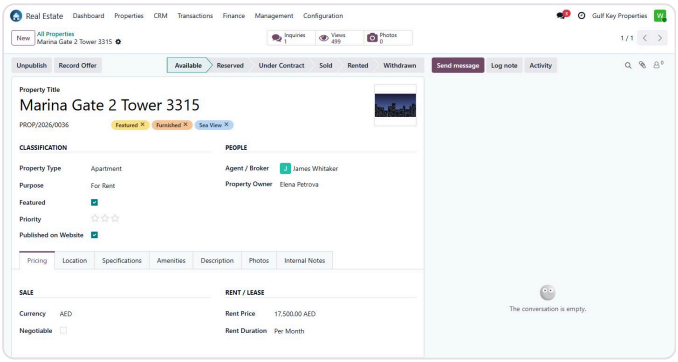

5 BASE

The top of the form

Title, reference (PROP/2026/0036, given on save), tags and main image. **Classification**: type, purpose (For Sale, For Rent, For Lease), Featured, a star priority and Published on Website. **People**: agent, owner and company. The stage bar runs across the top; click a stage to move the property.

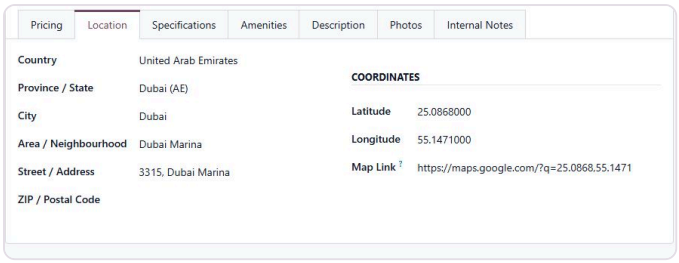

Smart buttons show the Inquiries, Deals, website Views and Photos on this property.

6 BASE

Pricing tab

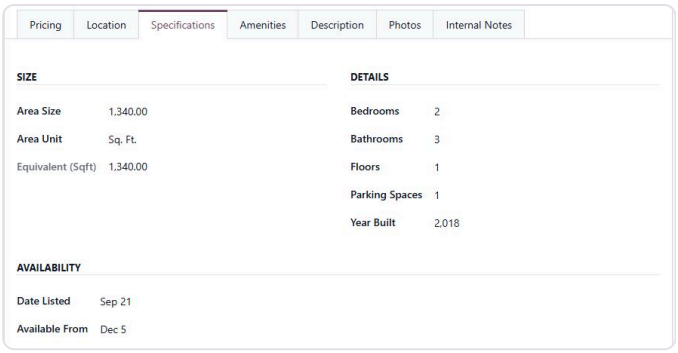

For a sale: currency, **Sale Price** and **Negotiable**. For rent or lease: **Rent Price** and **Rent Duration** (per day, month or year). The list shows the sale price for sale listings and the rent for the rest.

7 BASE

Location tab

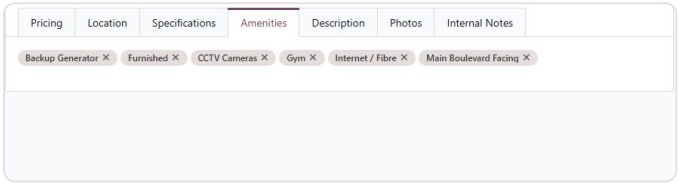

Country, province or state, city, area or neighbourhood, street and postal code, then latitude and longitude and a **Google Maps Link**. Latitude must be between -90 and 90 and longitude between -180 and 180, or the form will not save.

8 BASE

Specifications tab

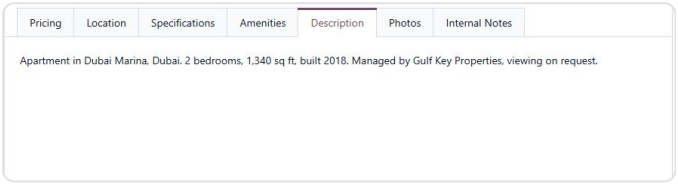

Size: area and unit (marla, kanal, sq ft, sq m), with **Equivalent (Sqft)** worked out for you (1 marla = 272.25, 1 kanal = 5,445, 1 sq m = 10.7639 sq ft). **Details**: bedrooms, bathrooms, floors, parking spaces, year built. **Availability**: date listed and available from.

9 BASE

Amenities tab

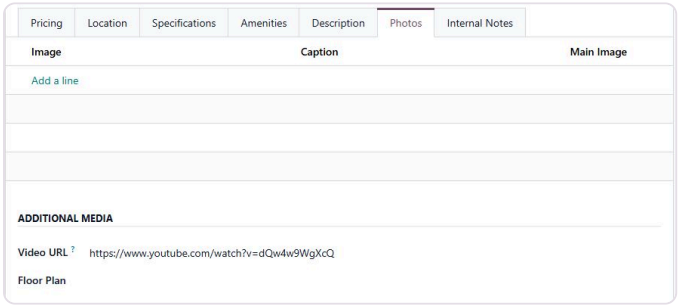

Tick the amenities the property has. They print on the property sheet and show on the website page.

10 BASE

Description tab

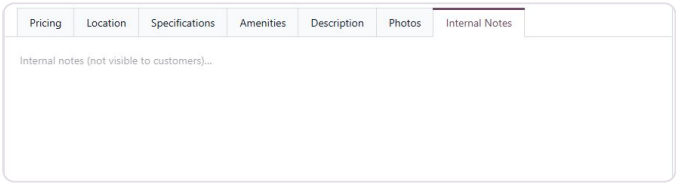

The public description, with formatting. It is what a visitor reads on the website detail page.

11 BASE

Photos tab

A gallery of photos, each with a caption, an order and a **Main Image** box, plus a **Video URL** (YouTube or Vimeo) and a **Floor Plan** image under Additional Media.

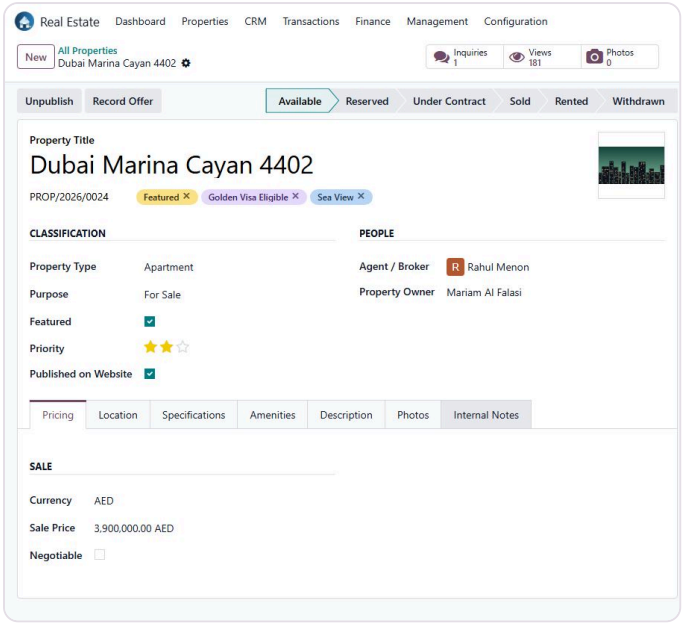

12 BASE

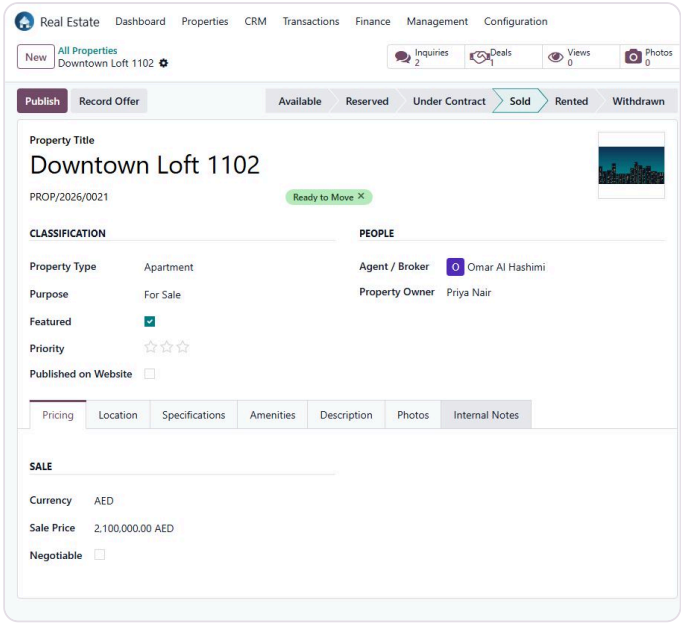

Internal Notes tab

Notes only staff see: keys, access, the owner's instructions. The chatter below the form logs every change to title, type, purpose, stage, price, agent, owner, city and area.

Sale, rent and closed listings BASE

BASE A property for sale: the price shows in the Sale group.

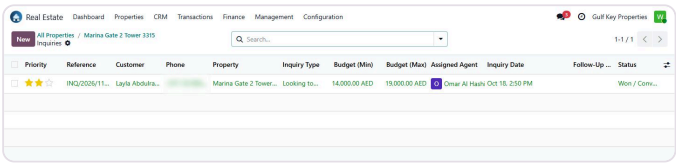

BASE A sold property: in a closed stage, with its deal behind the Deals button.

Publish, unpublish and the property sheet BASE

13 BASE

Publish

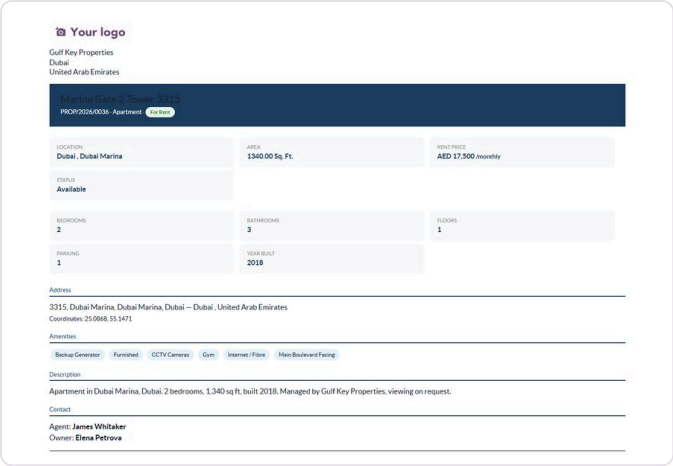

Publish in the header ticks Published on Website, which puts the property on the website listing at /real-estate (Part 13). **Unpublish** takes it off. Each visit to its website page adds one to **Views**.

14 BASE

Follow the smart buttons

Inquiries lists every inquiry on this property, **Deals** every transaction. New records made from there are already linked to the property.

15 BASE

Print the property sheet

The **Print** menu on the form gives the **Property Sheet**: the main photo, price, type, purpose, area, rooms, address, amenities, description and the agent to contact. Hand it to a walk-in or attach it to an email.

PART 6 Owners, buyers and tenants

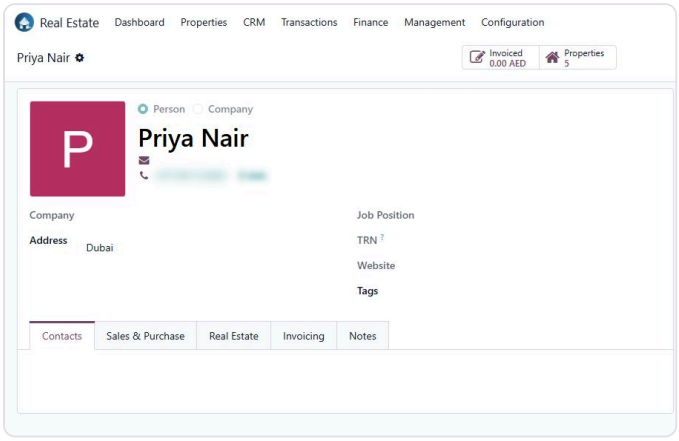

Everyone the agency deals with is an ordinary Odoo contact. The module adds a Real Estate tab and three smart buttons to the contact form.

IN THIS PART YOU WILL LEARN

- The Real Estate tab on a contact
- The three smart buttons and what they count

TRY IT YOURSELF ON THE DEMO

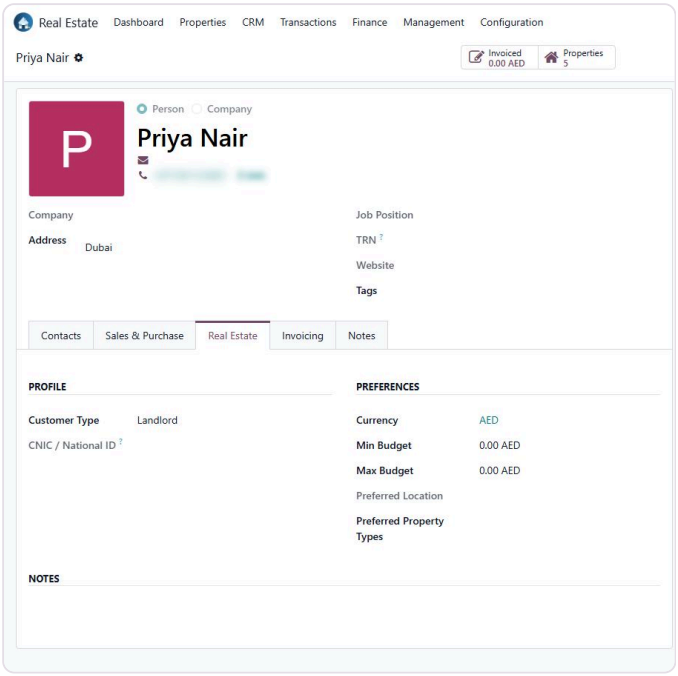

1. Open an owner from a property and look at My Properties

1 BASE

Open a contact

Open the owner or customer from any property, inquiry or deal. The smart buttons count his **Inquiries**, **My Properties** (properties where he is the owner) and **Transactions** (deals where he is the buyer or tenant).

2 BASE

The Real Estate tab

Profile: customer type (buyer, seller, tenant, landlord, investor, agent or broker) and a CNIC / national ID number. **Preferences**: currency, minimum and maximum budget, preferred location and preferred property types. **Notes** for anything else.

The CNIC field is plain text, so any national ID or Emirates ID number fits.

PART 7 Inquiries and the pipeline

An inquiry is a person asking. It may be about one property or about buying, renting, leasing or selling in general. The front desk logs it, an agent takes it, and it ends won or lost.

IN THIS PART YOU WILL LEARN

- The five inquiry stages
- Logging an inquiry with its source and budget
- The daily filters: My Inquiries, Urgent, Follow-Up Today
- The pipeline board

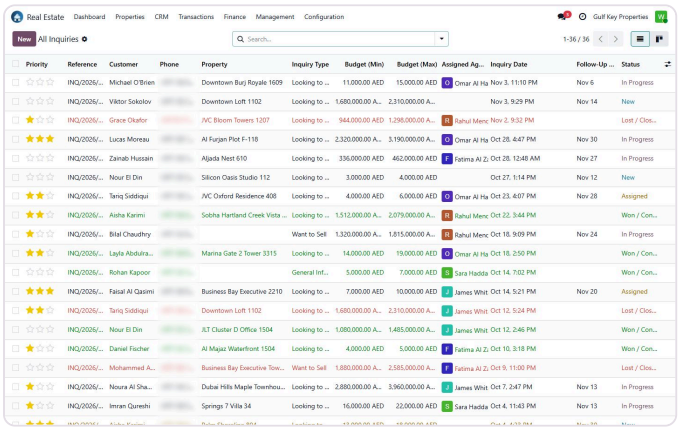

TRY IT YOURSELF ON THE DEMO

1. Open CRM, Pipeline
2. Open an In Progress inquiry and read its budget and message
3. Apply Follow-Up Today

The inquiry stages BASE

1. **New** — Logged by the desk or the website
2. **Assigned** — An agent has it
3. **In Progress** — Viewings and calls under way
4. **Won / Converted** — It became a deal
5. **Lost / Closed** — It went nowhere

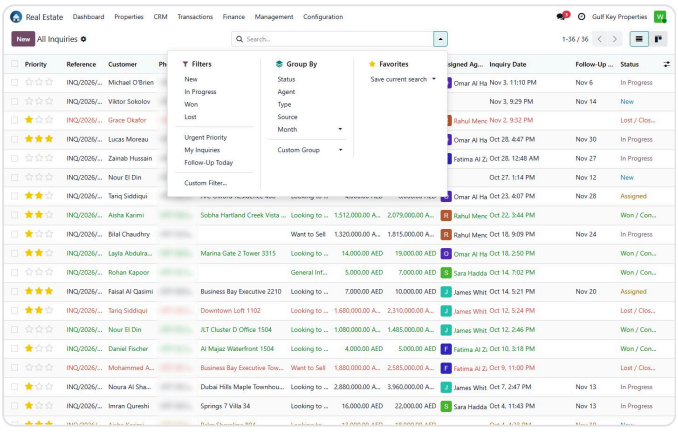

The module also installs an email template, **Real Estate: New Inquiry Received**, addressed to the agent's work email. It is not sent on its own; send it from the inquiry chatter with the template picker when you want the agent emailed.

1 BASE

CRM, All Inquiries

Every inquiry with reference (INQ/2026/11/0016), customer, phone, property, type, budget, agent, follow-up date, status and source.

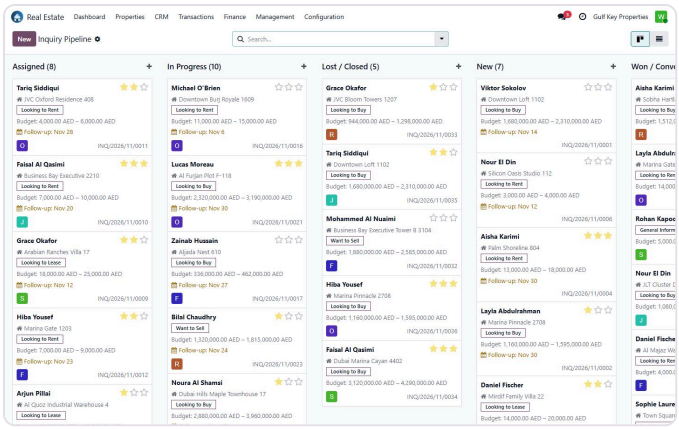

2 BASE

Filter the list

New, In Progress, Won, Lost, **Urgent Priority**, **My Inquiries** (where you are the agent) and **Follow-Up Today**. Group by status, agent, type, source or month.

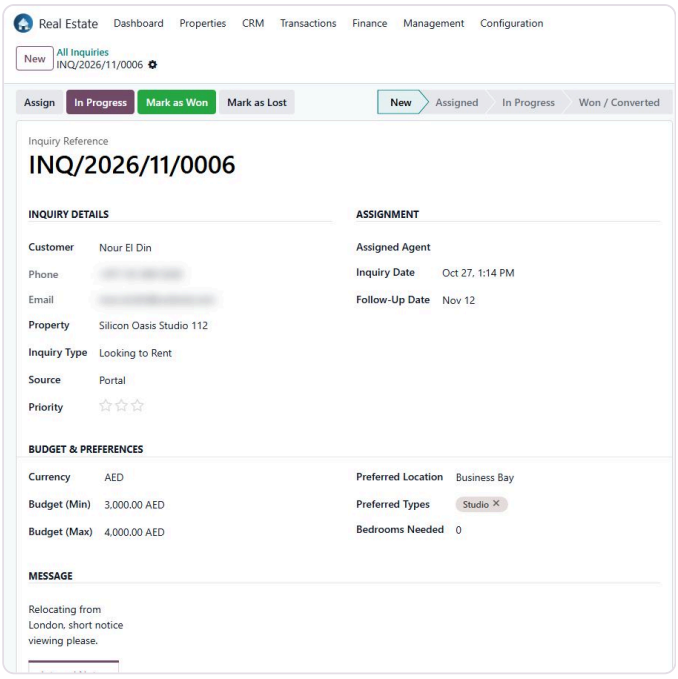

Follow-Up Today each morning is the agent's call list.

3 BASE

CRM, Pipeline

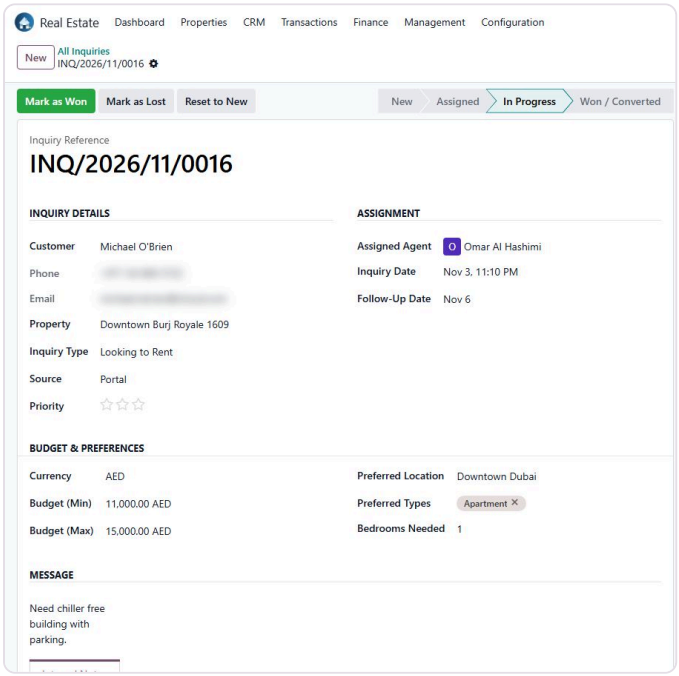

The same inquiries on a board by status, with priority stars, budget and agent on each card.

4 BASE

A new inquiry

Inquiry Details: customer (phone and email come from the contact), property, type (looking to buy, rent or lease, want to sell, general information), source (portal, walk-in, phone, referral, website, social media, other) and priority. **Assignment**: agent, inquiry date and follow-up date.

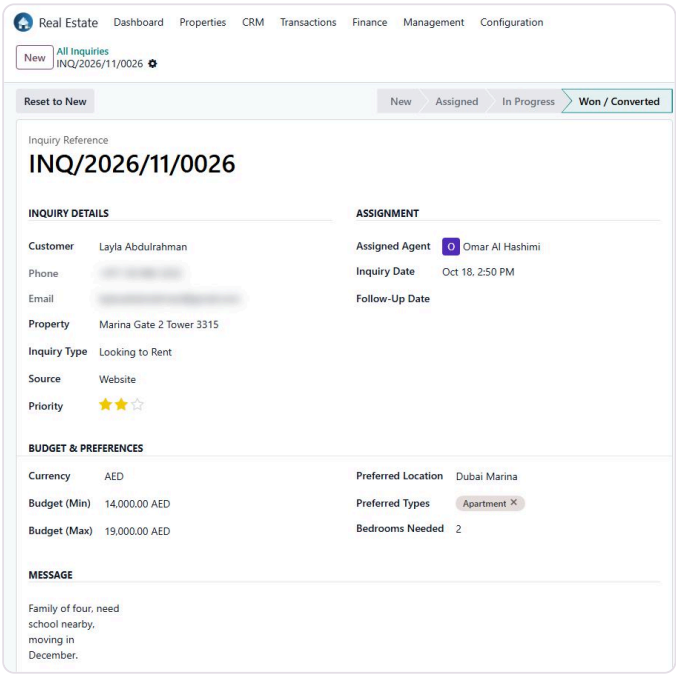

5 BASE

Work the inquiry

Budget & Preferences: budget range, preferred location, preferred types and bedrooms needed, and the customer's message. Move it with the header buttons: **Assign**, **In Progress**, **Mark as Won**, **Mark as Lost**, **Reset to New**.

Schedule the follow-up call as an activity in the chatter so it shows in your Odoo activities.

6 BASE

A won inquiry

Won and lost inquiries keep their history. Reset to New reopens one if the customer comes back.

PART 8 Recording an offer

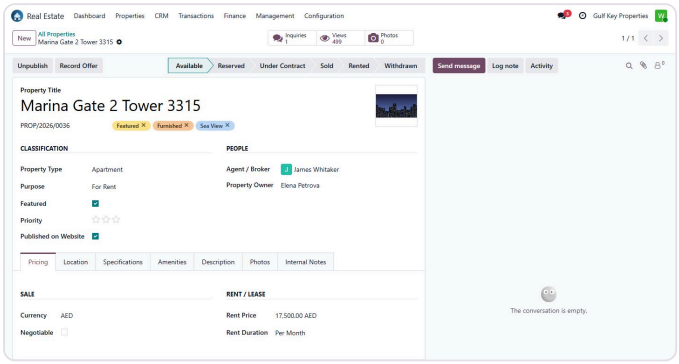

When a customer puts a price on a property, the agent records it from the property itself in one small window. It turns into either an inquiry or a deal.

IN THIS PART YOU WILL LEARN

- Opening the offer window from a property
- Choosing between an inquiry and a deal

TRY IT YOURSELF ON THE DEMO

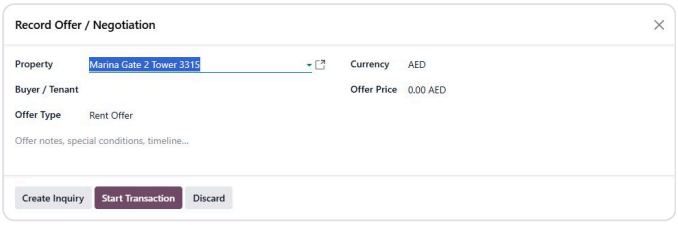

1. Open a property, click Record Offer, read the window, then Discard it

1 BASE

Open the property

Open the property the offer is for and click **Record Offer** in the header.

2 BASE

Fill in the offer

Pick the buyer or tenant, type the **Offer Price**, and check the offer type: Purchase Offer, Rent Offer or Lease Offer. It follows the property's purpose. Add any notes or terms.

3 BASE

Create Inquiry

Makes an inquiry for this property and customer, already In Progress, source Walk-In, with the offer price as both ends of the budget and the notes as the message.

Use it when the customer is still deciding.

4 BASE

Start Transaction

Makes a deal In Negotiation with the offer as the agreed price, the property's owner as seller and its agent as agent, and opens it.

Use it when the price is close to agreed. Part 9 takes the deal from there.

PART 9 Transactions: from offer to completed deal

A transaction is one deal on one property with one buyer or tenant. It carries the agreed price, the token, the commission, the payment schedule and the contract, and it moves through six stages.

IN THIS PART YOU WILL LEARN

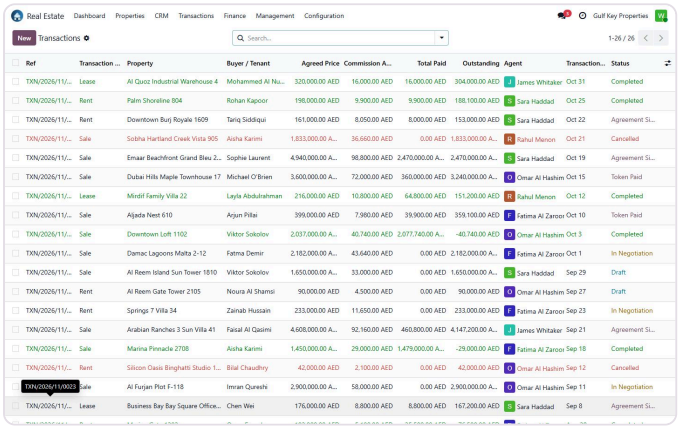

- The six deal stages and the button that moves each one
- How commission, total paid and outstanding are worked out
- What happens to the property when a deal completes

TRY IT YOURSELF ON THE DEMO

1. Open Transactions and group by Status
2. Open a Token Paid deal and read its Payment Schedule tab
3. Open a Completed deal and follow its contract

The deal stages BASE

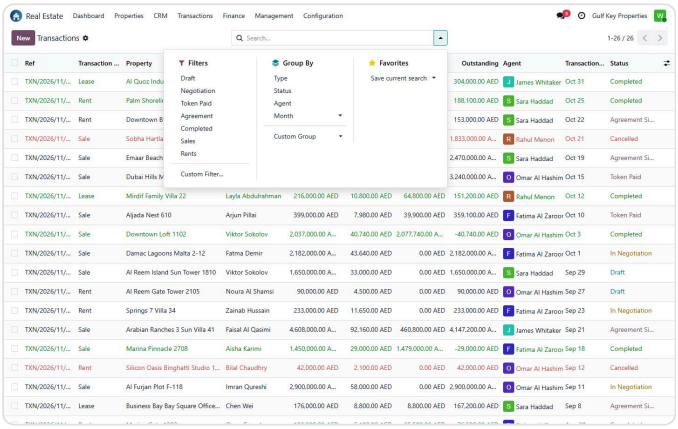

1. **Draft** — Being set up
2. **In Negotiation** — Price being agreed
3. **Token Paid** — Booking deposit received
4. **Agreement Signed** — Contract signed
5. **Completed** — Property closed

1 BASE

Transactions, All Transactions

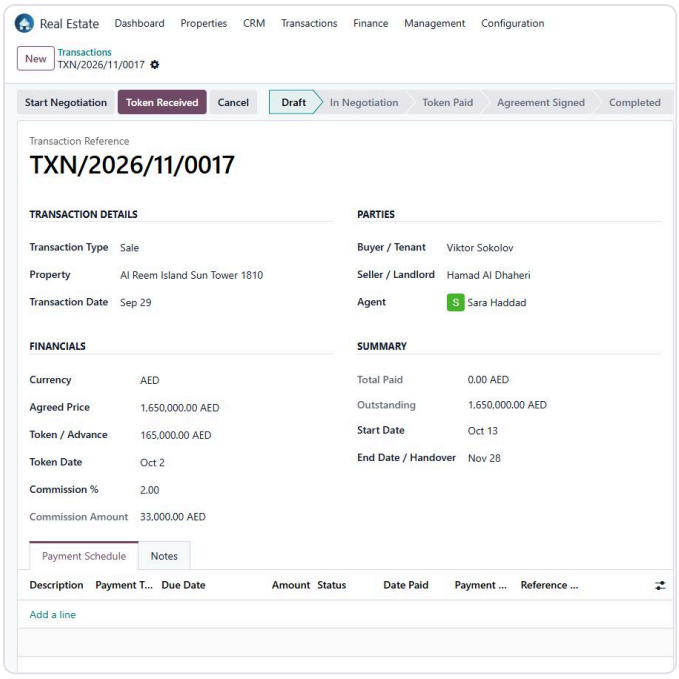

Each deal with reference (TXN/2026/11/0012), type, property, buyer or tenant, agreed price, commission, total paid, outstanding, agent, date and status. Cancelled deals show in red.

2 BASE

Filter the deals

Draft, Negotiation, Token Paid, Agreement, Completed, Sales and Rents. Group by type, status, agent or month.

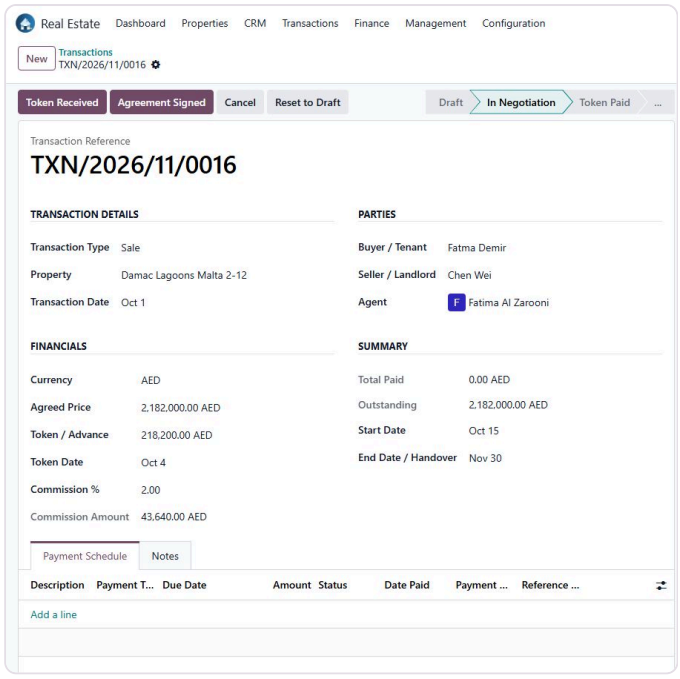

3 BASE

A draft deal

Transaction Details: type (sale, rent, lease), property, date, company. **Parties**: buyer or tenant, seller or landlord, agent. **Financials**: agreed price, token amount and token date, commission %. The commission amount is the agreed price times the rate.

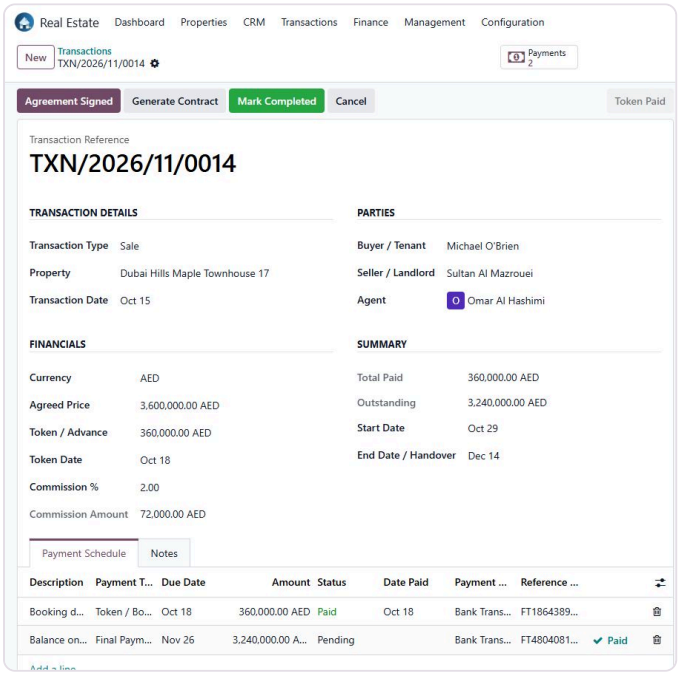

Property type and city are copied from the property for reporting.

4 BASE

Start Negotiation

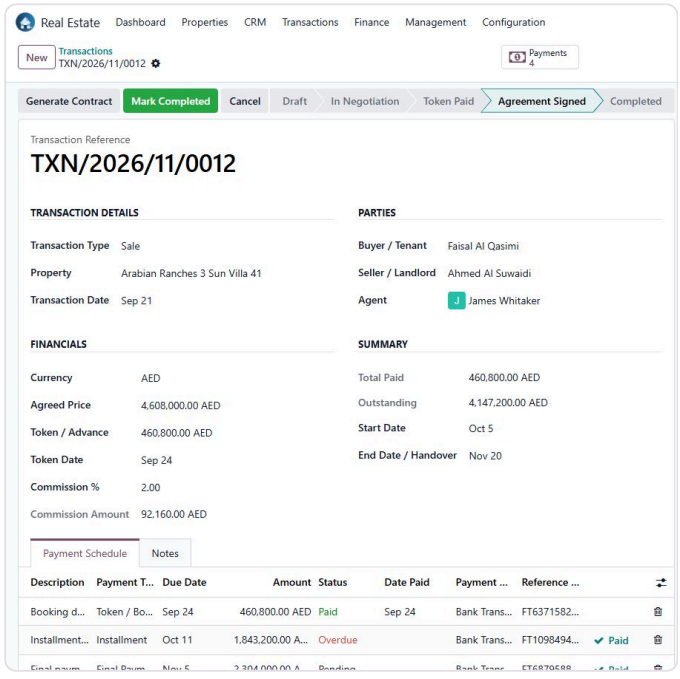

From Draft, **Start Negotiation**. From Draft or Negotiation, **Token Received** when the booking deposit is in. **Reset to Draft** is offered while in negotiation.

5 BASE

Token paid

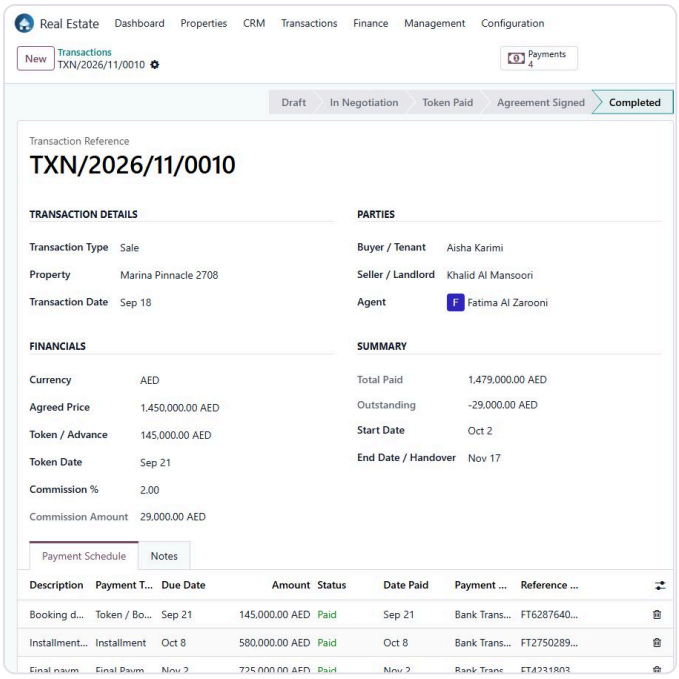

With the token in, two buttons appear: **Agreement Signed** and **Generate Contract**. **Mark Completed** is also offered from here for a simple deal that needs no separate agreement stage.

6 BASE

Agreement signed

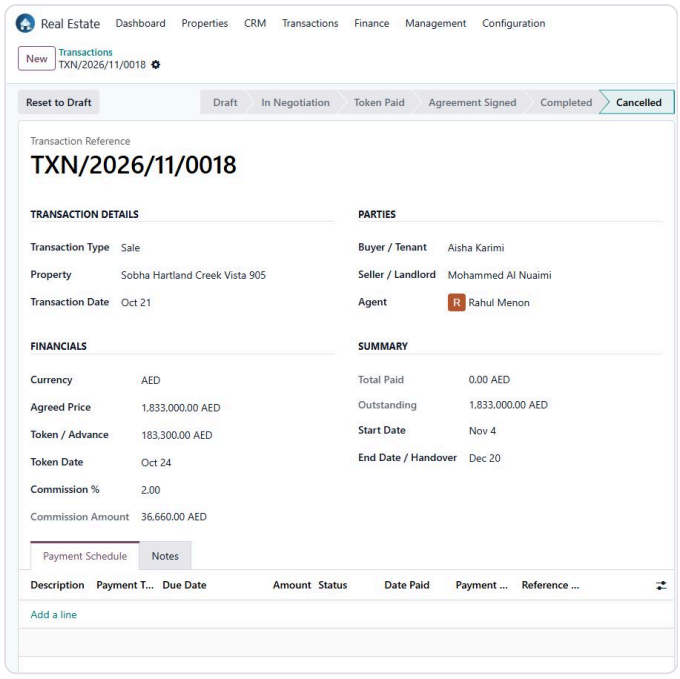

Generate Contract makes a contract from the deal (Part 11) and links it; pressed again, it opens the same contract. The **Summary** group shows total paid and outstanding from the payment schedule, and the start and end or handover dates.

7 BASE

Mark Completed

Sets the deal to Completed and moves the property to the first closed stage. The **Payments** smart button opens the schedule as its own list.

8 BASE

Cancelled deals

Cancel is offered until a deal completes. A cancelled deal can be reset to draft.

HOW IT WORKS

How the money adds up on a deal

Commission	agreed price × commission % ÷ 100
Total Paid	the sum of the payment lines marked Paid
Outstanding	agreed price − total paid

An email template, **Real Estate: Transaction Completed**, is installed for the buyer. Like the inquiry template it is not sent on its own; pick it in the chatter when you want to send it.

PART 10 The payment schedule

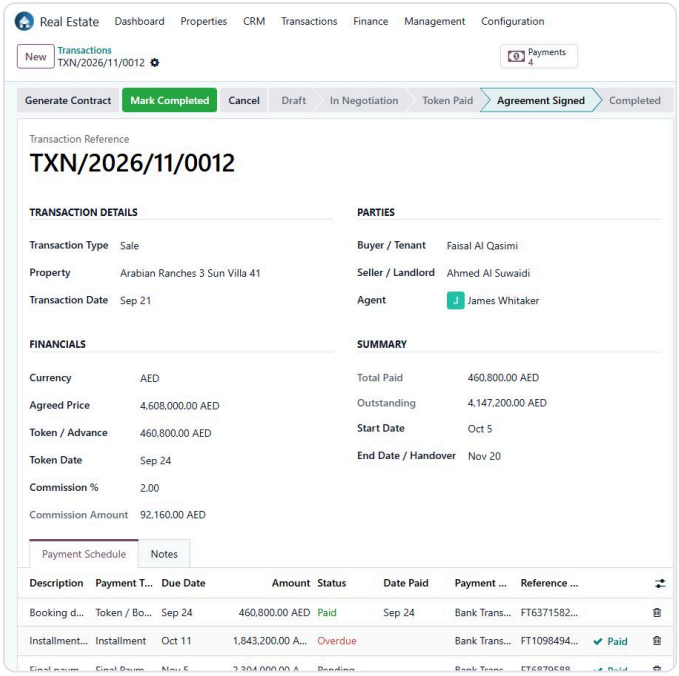

Every amount due on a deal is a payment line: the token, the installments, each rent payment, the final payment and the commission. Marking lines paid is what fills Total Paid and Outstanding on the deal.

IN THIS PART YOU WILL LEARN

- Adding the schedule to a deal
- Marking a payment paid or overdue
- The Overdue Payments list

TRY IT YOURSELF ON THE DEMO

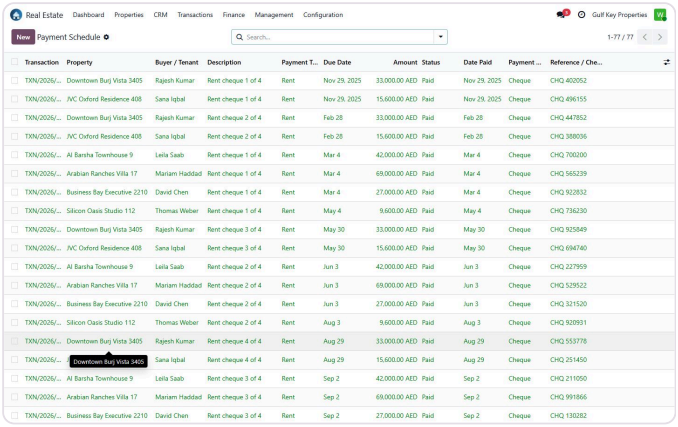

1. Open Payment Schedule and sort by Due Date
2. Open Overdue Payments

1 BASE

Add lines on the deal

On the deal, the **Payment Schedule** tab: a description, type (token or booking, installment, rent, final payment, commission, other), due date, amount, method (cash, bank transfer, cheque, online) and a reference or cheque number. The **Paid** button on a line marks it paid today.

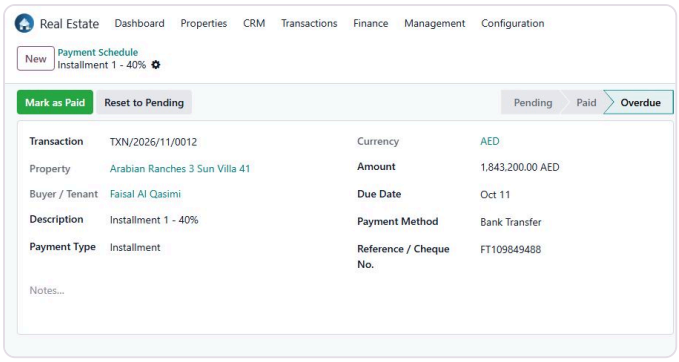

2 BASE

Transactions, Payment Schedule

All payment lines from all deals, sorted by due date, with the property, buyer or tenant, status and a **Mark Paid** button on each unpaid row.

Sort by due date to see what to collect this week.

3 BASE

A payment line

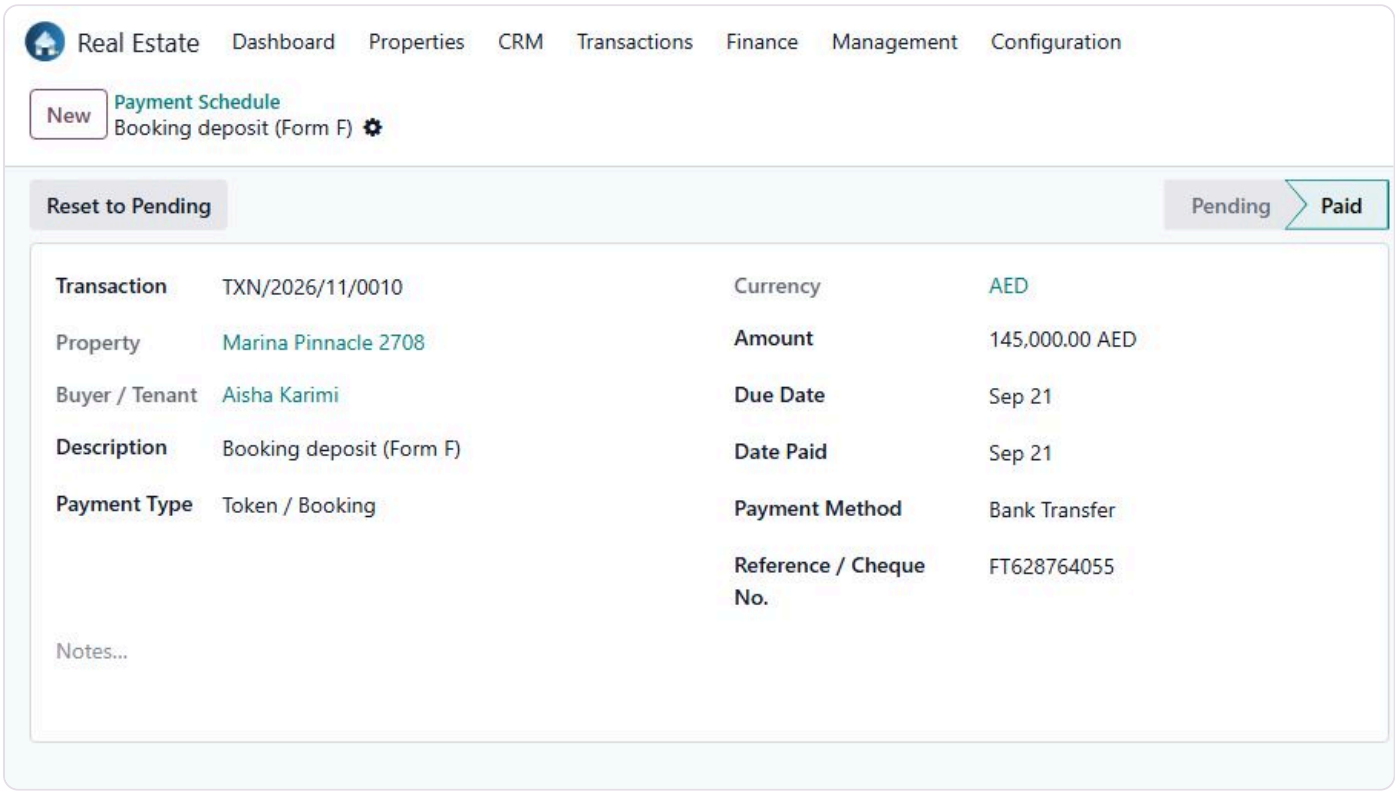

Pending, Paid, Overdue or Cancelled. Buttons: **Mark as Paid** (stamps the date paid), **Mark as Overdue**, **Reset to Pending**. Notes and the chatter keep the story of a late payment.

4 BASE

Overdue Payments (Manager)

Only the lines marked Overdue. A line becomes overdue when someone marks it; nothing changes it on its due date by itself, so a manager runs through Payment Schedule each week and marks what is late.

BASE A paid booking deposit: the date paid and the method are kept on the line.

> Every paid line counts toward Total Paid, whatever its type, including a Commission line. If the buyer's schedule also carries the agency's commission, Outstanding on the deal drops below zero once it is paid. Keep commission lines off the buyer's schedule, or read Outstanding with that in mind.

PART 11 Contracts and agreements

The contract is the signed agreement: sale, rent or lease. It is usually made from the deal in one click, then the terms are written, the documents attached and the PDF printed for signature.

IN THIS PART YOU WILL LEARN

- Generating a contract from a deal
- The contract stages
- Terms, documents and the printed agreement

TRY IT YOURSELF ON THE DEMO

1. Open Contracts and open a signed sale agreement
2. Print it

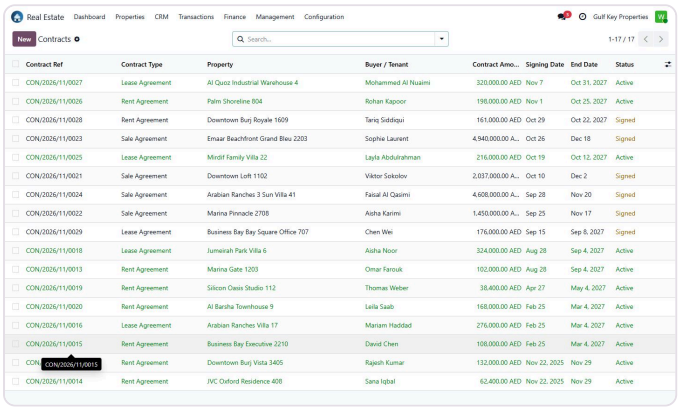

The contract stages BASE

1 Draft
Terms being written

2 Signed
Signed by both parties

3 Active
In force

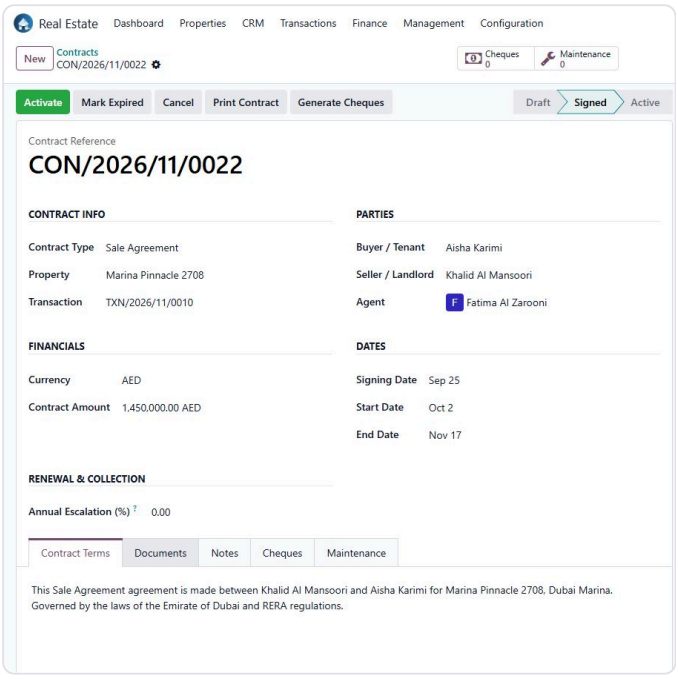

4 Expired
Ended

1 BASE

Transactions, Contracts

Every contract with reference (CON/2026/11/0022), type, property, buyer or tenant, amount, signing date, end date and status.

2 BASE

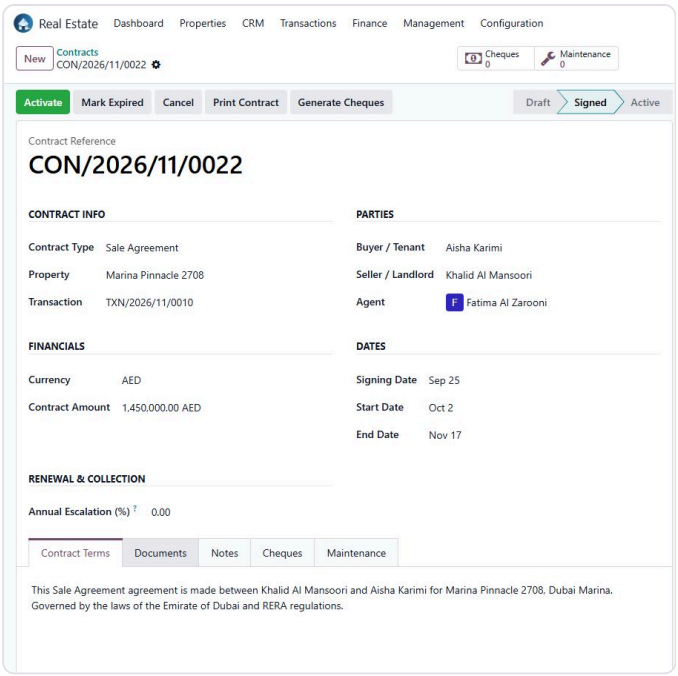

A contract

Type, deal, property, buyer or tenant, seller or landlord, agent, contract amount, signing, start and end dates. Generate Contract on a deal fills all of these in from the deal.

3 BASE

Move it through its stages

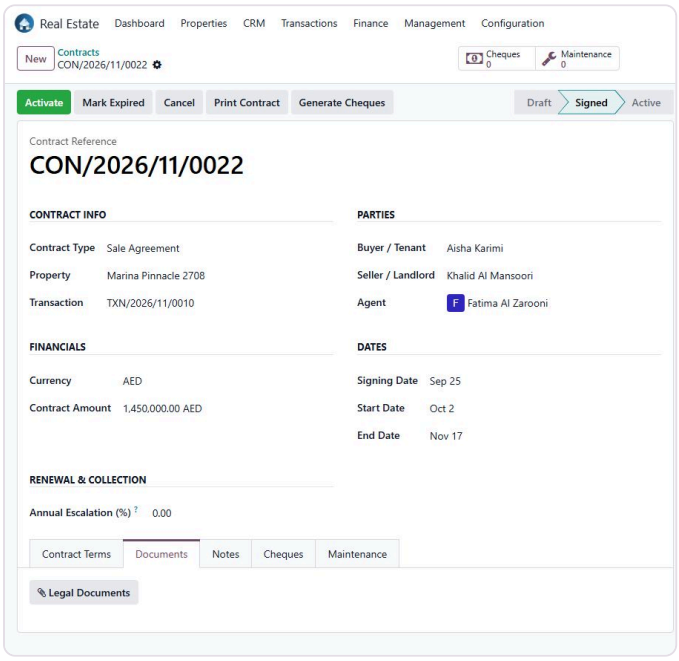

Mark as Signed from Draft, **Activate** from Signed, **Mark Expired** from Signed or Active, **Cancel** until it expires, **Reset to Draft** from Cancelled.

4 BASE

Contract Terms tab

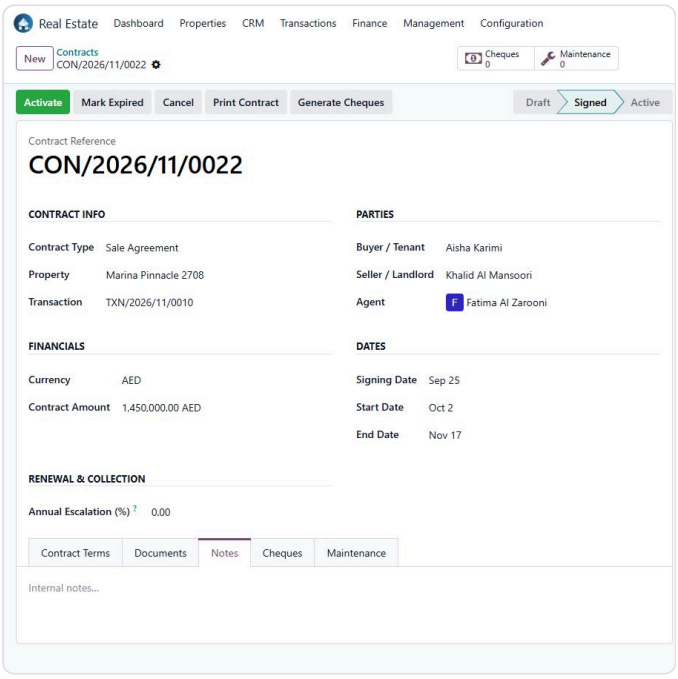

Write or paste the full terms and conditions, with formatting. They print in full on the agreement.

5 BASE

Documents tab

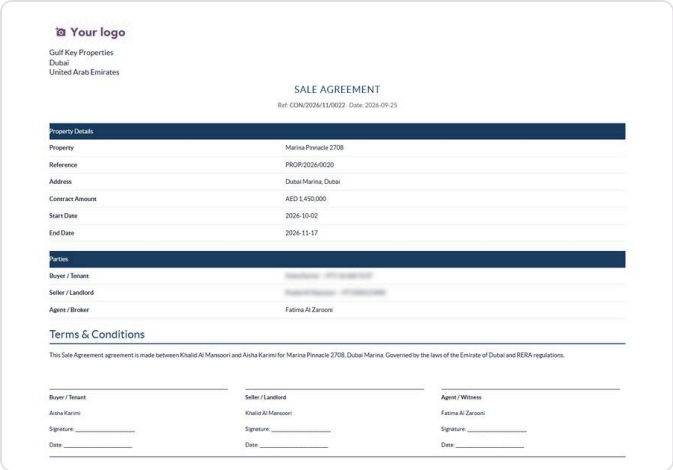

Attach title deeds, NOCs, ID copies and signed scans as **Legal Documents**.

6 BASE

Notes tab

Internal notes that do not print.

7 BASE

Print Contract

Print Contract gives the agreement PDF: title by type, the reference and dates, a parties table, the property details, the amount, the full terms and signature boxes for both parties and the agent.

PART 12 Commission rules

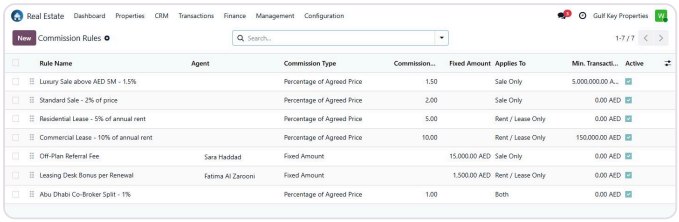

Finance, Commission Rules holds the agency's commission table: who earns what on which kind of deal.

IN THIS PART YOU WILL LEARN

- Percentage and fixed rules
- Rules for one agent or for everyone, and a minimum deal size

TRY IT YOURSELF ON THE DEMO

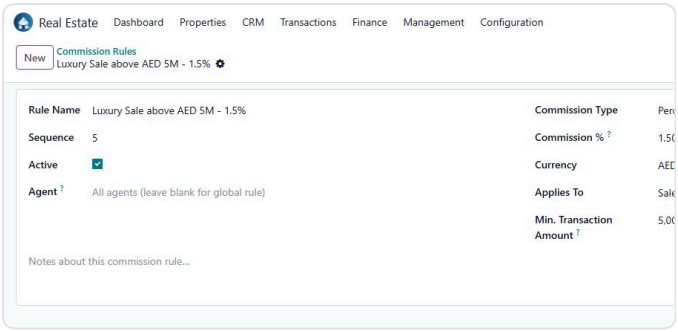

1. Open Finance, Commission Rules and compare a percentage and a fixed rule

1 BASE

Finance, Commission Rules (Manager)

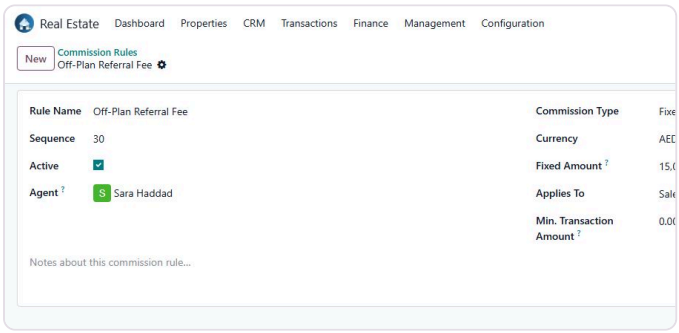

The rules in order, with agent, type, rate or fixed amount, what they apply to and the minimum deal size.

2 BASE

A percentage rule

Name, sequence, agent (blank for everyone), type **Percentage of Agreed Price** with the rate, applies to Sale Only, Rent / Lease Only or Both, and **Min. Transaction Amount**.

3 BASE

A fixed rule

Type **Fixed Amount** with the amount, for a flat referral fee or a renewal bonus.

The rules are a reference table for the office. A deal does not pick its rate from them: the agent types the commission % on each deal, and the commission amount is worked out from it.

PART 13 The website and the customer portal

The base module carries a public property listing with search, a detail page with an inquiry form, and two customer portal pages. This part explains what each one is built to do and what you need to switch them on.

IN THIS PART YOU WILL LEARN

- What the public listing and detail page are built to show
- What a website inquiry becomes
- The customer portal pages
- What has to be in place before the pages go live

Before you rely on these pages. In release 19.0.1.0.1 the page code ships in the module but is not loaded when Odoo starts, so /real-estate and the /my pages answer Page not found, as they do on the demo. Ask Way4Tech for the update that loads them. The Publish button, the Published on Website box and the Views counter on the property already work and are ready for it.

The public listing at /real-estate BASE

1. Every property with **Published on Website** ticked, nine to a page, newest first.
2. A search bar for purpose, property type, city, minimum and maximum price and minimum bedrooms.
3. Sort by date listed, price low to high, price high to low, or most viewed.
4. The price filters compare against the sale price, so they suit for-sale searches.

The detail page at /real-estate/<id> BASE

1. The photos, price, key facts, amenities, description and the agent.
2. Up to three similar published properties of the same type and purpose.
3. A **Send Inquiry** form: name, email, phone, what the visitor wants (general, buy or rent) and a message.
4. Each visit adds one to **Views** on the property. An unpublished property sends the visitor back to the listing.

What a website inquiry becomes BASE

1. The contact is found by email, or a new contact is made. A missing phone number is filled in.
2. An inquiry is made with source Portal, linked to the property and given the property's agent.
3. The visitor sees a thank you page with the inquiry reference.

The customer portal BASE

A customer with a portal login gets **My Inquiries** and **My Transactions** cards on his /my page as soon as he has at least one, leading to /my/re-inquiries and /my/re-transactions. Record rules stop a portal user from seeing anyone else's inquiries or deals.

The listing pages use the Odoo website layout, so the Website app must be installed as well. It does not come with the module.

PART 14 Lease terms, deposits and renewals

ENTERPRISE ADD-ON

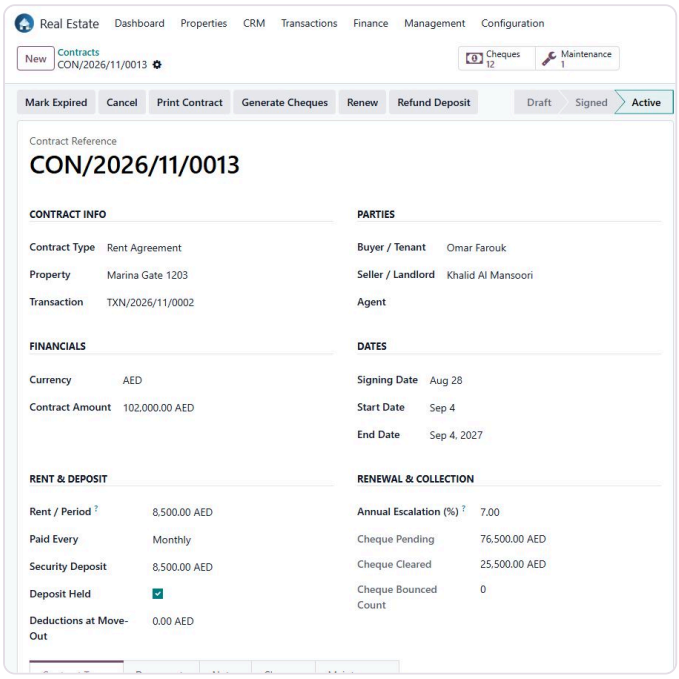

The add-on gives every rent or lease contract what a managed lease needs: the rent per period, the security deposit and its refund, the agreed escalation, and a one-click renewal that carries all of it forward.

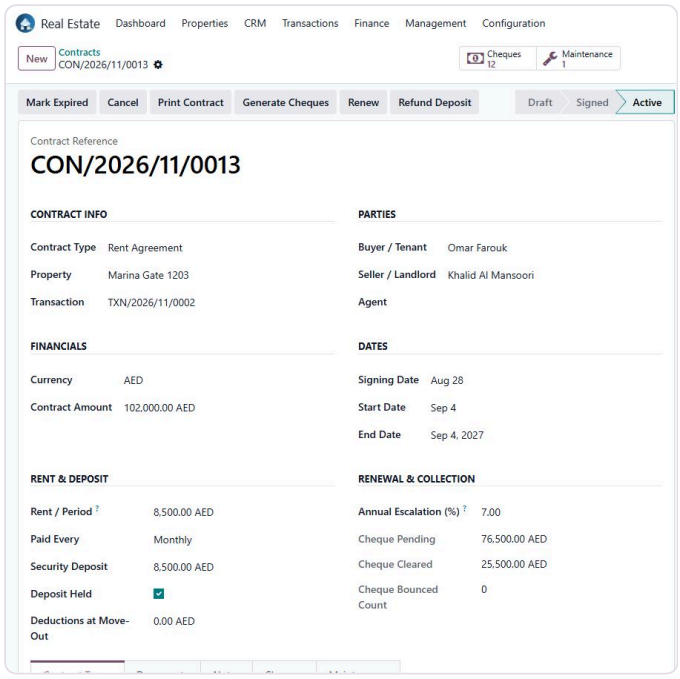

IN THIS PART YOU WILL LEARN

- Rent per period, the deposit and the escalation on a lease
- The cheque figures and tabs on a lease
- How Renew builds the next lease
- Refunding a deposit at move-out

TRY IT YOURSELF ON THE DEMO

1. Open Contracts and open an active rent agreement
2. Read its Rent & Deposit section and its Cheques tab

1 ENTERPRISE ADD-ON

Open a rent or lease contract

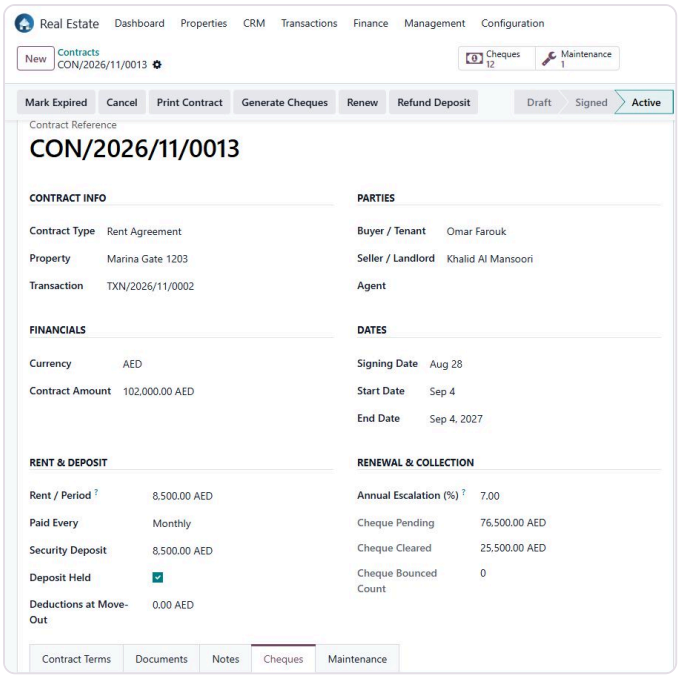

The **Rent & Deposit** section appears on rent and lease contracts (not on sales): **Rent / Period**, **Paid Every** (monthly, quarterly, half-yearly, yearly), **Security Deposit**, **Deposit Held**, **Deductions at Move-Out** and **Annual Escalation (%)**.

Smart buttons count the cheques and the maintenance requests on the lease.

2 ENTERPRISE ADD-ON

The cheque figures

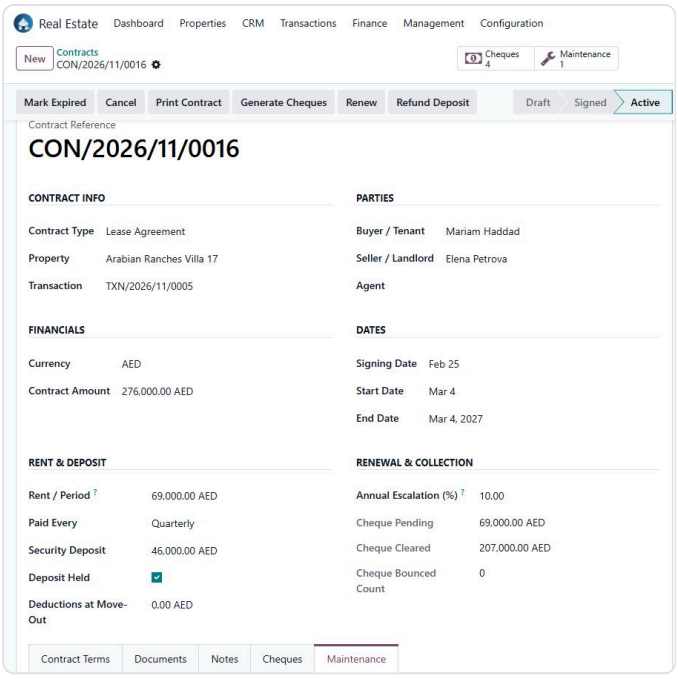

Once the lease has cheques, three figures show: **Pending** (registered or deposited), **Cleared**, and the number **Bounced**.

3 ENTERPRISE ADD-ON

Cheques tab

Every cheque on the lease with date, number, bank, purpose, amount and status, totalled.

4 ENTERPRISE ADD-ON

Maintenance tab

Every maintenance request on the lease with date, category, priority, cost and status.

Renew a lease ENTERPRISE ADD-ON

5 ENTERPRISE ADD-ON

Press Renew

Renew shows on a rent or lease contract that has not been renewed. It needs an end date.

6 ENTERPRISE ADD-ON

What the renewal holds

A new draft contract, linked back by **Renewal Of**. It starts the day after the old one ends and runs for the same length. Rent / Period and the contract amount are stepped up by the escalation %. The deposit is carried as the agreed amount but not marked held, and deductions and refund start at zero.

Example: 8,500 a month with 7% escalation renews at 9,095.

7 ENTERPRISE ADD-ON

The old lease

Gets a note in its chatter naming the renewal and the step-up. Renew disappears from it, so a lease is renewed once.

Refund the deposit ENTERPRISE ADD-ON

8 ENTERPRISE ADD-ON

Record deductions, then Refund Deposit

At move-out, type the **Deductions at Move-Out**. **Refund Deposit** (shown while a deposit is held) works out **Deposit Refunded** = deposit less deductions and logs it in the chatter.

This records the figure. Pay the tenant from Invoicing or the bank as usual.

PART 15 Post-dated cheques

ENTERPRISE ADD-ON

Each post-dated cheque is a record with its date, number, bank and amount, linked to its lease. The register tells you what is due to bank, what cleared and what bounced, and keeps a bounced cheque tied to its replacement.

IN THIS PART YOU WILL LEARN

- Generating a year of cheques from a lease
- The Due to Bank filter and the banking calendar
- Depositing, clearing and bouncing a cheque
- Replacing a bounced cheque

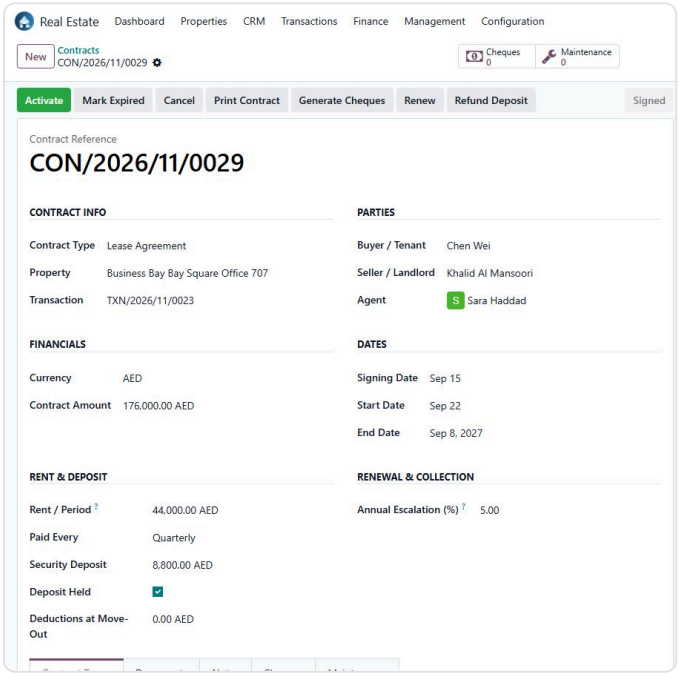

TRY IT YOURSELF ON THE DEMO

1. Open Management, Cheques
2. Switch to the calendar
3. Open a bounced cheque and follow Replaced By

A cheque's life ENTERPRISE ADD-ON

1. **Registered** — Received, waiting for its date
2. **Deposited** — Banked
3. **Cleared** — Money in the account
4. **Bounced** — Returned unpaid, with reason and charge
5. **Replaced** — A fresh cheque, linked to the bounced one

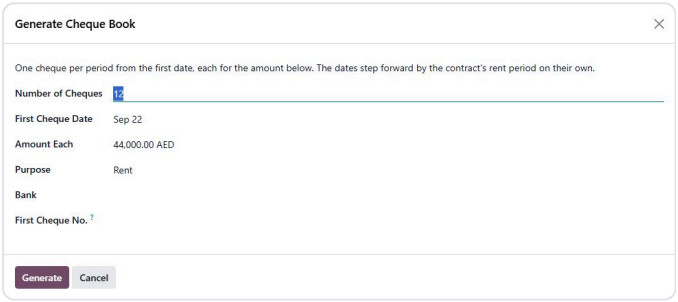

Build the cheque book from the lease ENTERPRISE ADD-ON

1 ENTERPRISE ADD-ON

Open the lease and press Generate Cheques

The lease needs a Rent / Period first, or the button says so.

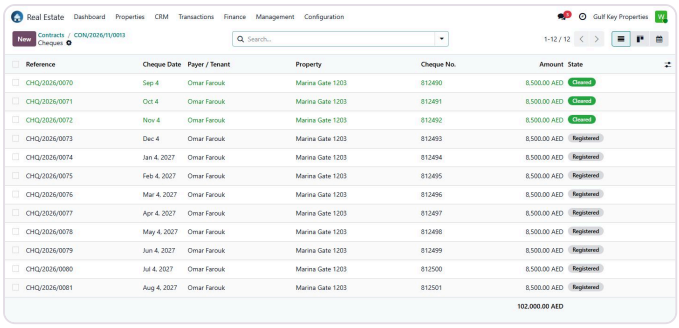

2 ENTERPRISE ADD-ON

Fill in the cheque book

Number of Cheques (12 by default), **First Cheque Date** (the lease start), **Amount Each** (the rent per period), purpose (rent or sale installment), bank and **First Cheque No.** Press **Generate**.

Set the count to match the period: 4 for a year paid quarterly, 12 for monthly.

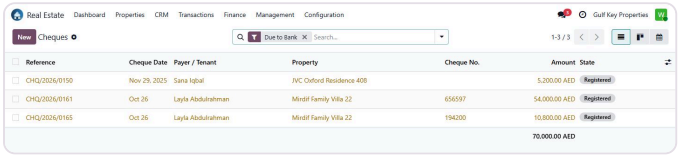

3 ENTERPRISE ADD-ON

The cheques are made

One cheque per period: the dates step forward by the lease's Paid Every, and if the first number is all digits the rest are numbered up from it. Payer, property and owner come from the lease. A note is logged on the lease.

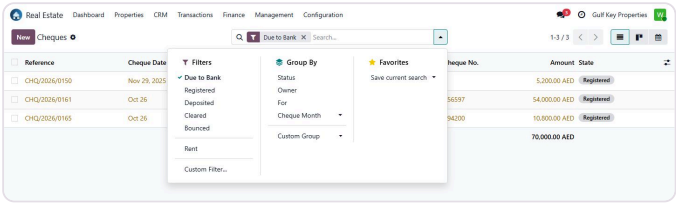

Work the register ENTERPRISE ADD-ON

4 ENTERPRISE ADD-ON

Management, Cheques

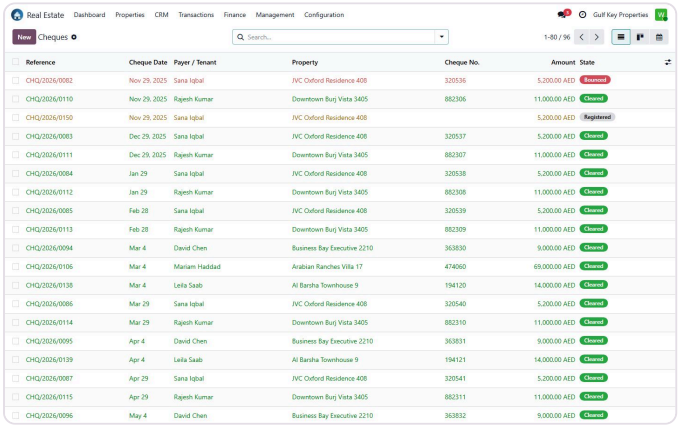

Opens on **Due to Bank**: registered cheques whose date has come. This is what to take to the bank today.

5 ENTERPRISE ADD-ON

Filters

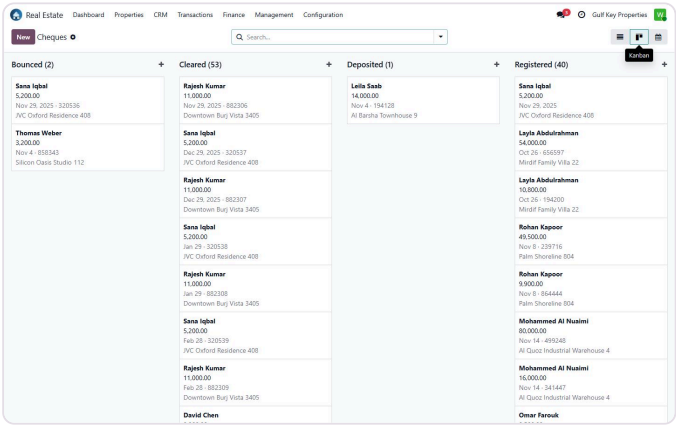

Due to Bank, Registered, Deposited, Cleared, Bounced, Rent. Group by status, owner, purpose or cheque month. Search by reference, payer, owner, property or cheque number.

6 ENTERPRISE ADD-ON

All cheques

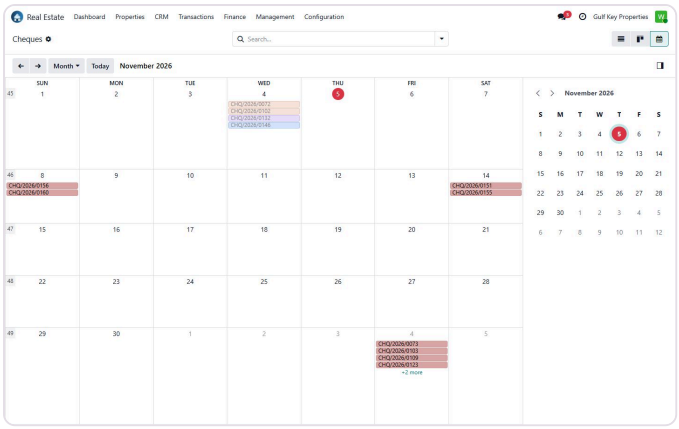

Remove the filter to see the whole register in date order.

7 ENTERPRISE ADD-ON

The board

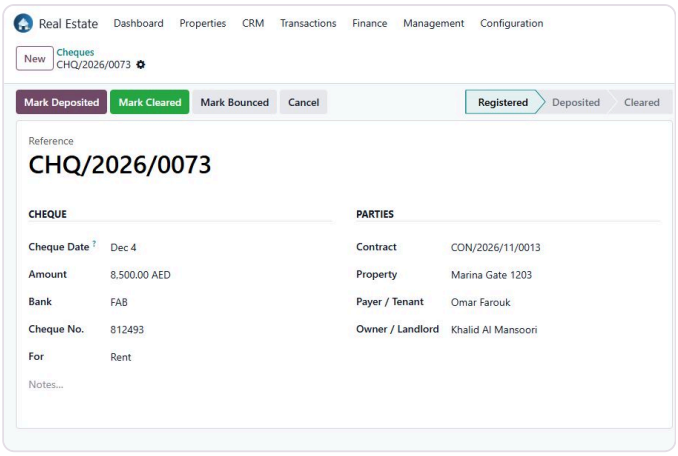

Cheques by status, with payer, amount, date, number and property.

8 ENTERPRISE ADD-ON

The calendar

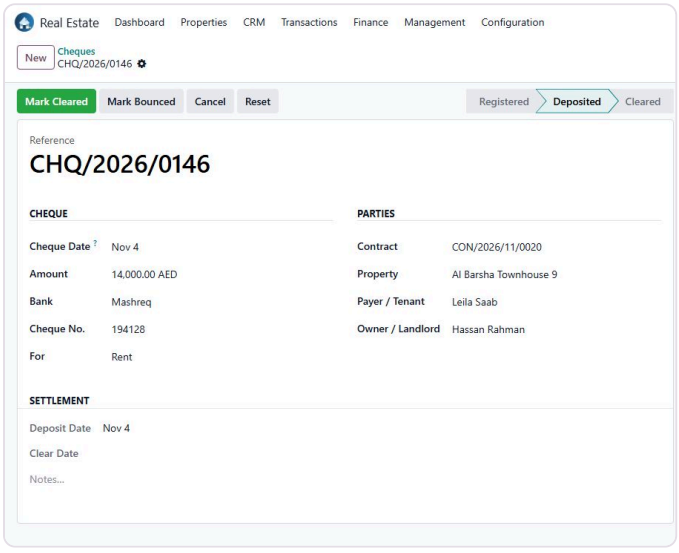

Cheques on their dates, coloured by status: the banking diary.

9 ENTERPRISE ADD-ON

A registered cheque

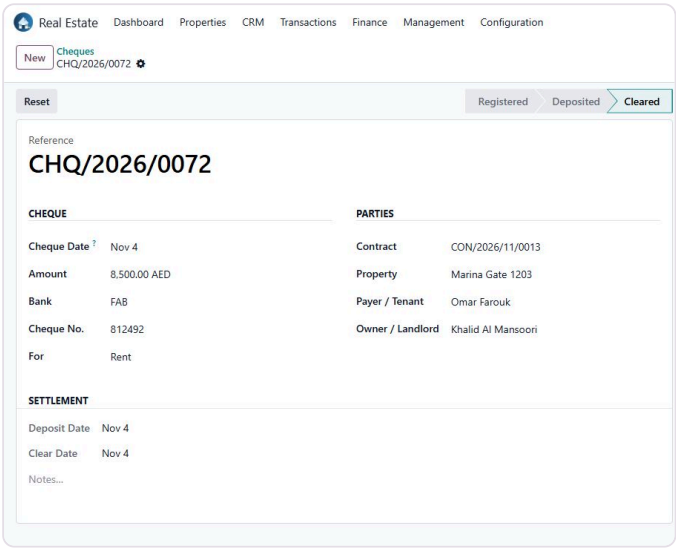

Cheque: date, amount, bank, number, purpose (rent, security deposit, sale installment, commission, other). **Parties**: contract, property, payer, owner. **Mark Deposited** when banked; **Mark Cleared** works from registered too.

10 ENTERPRISE ADD-ON

Deposited

The deposit date is stamped. Next is **Mark Cleared** or **Mark Bounced**.

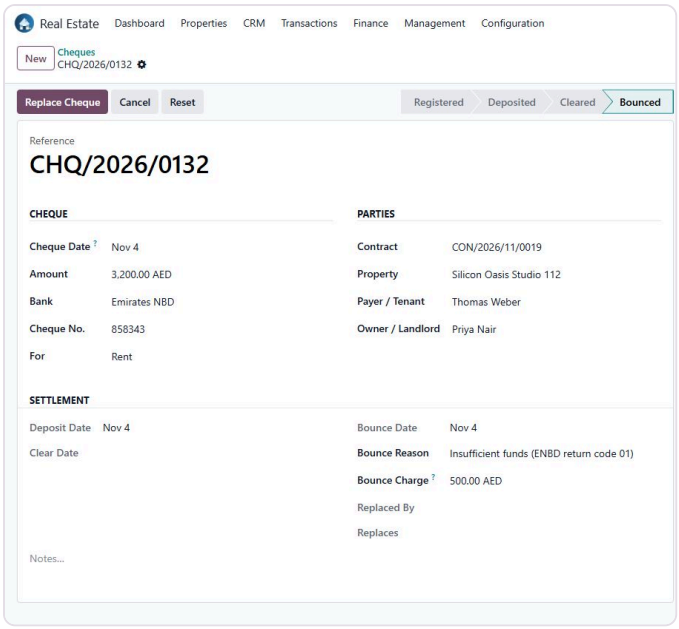

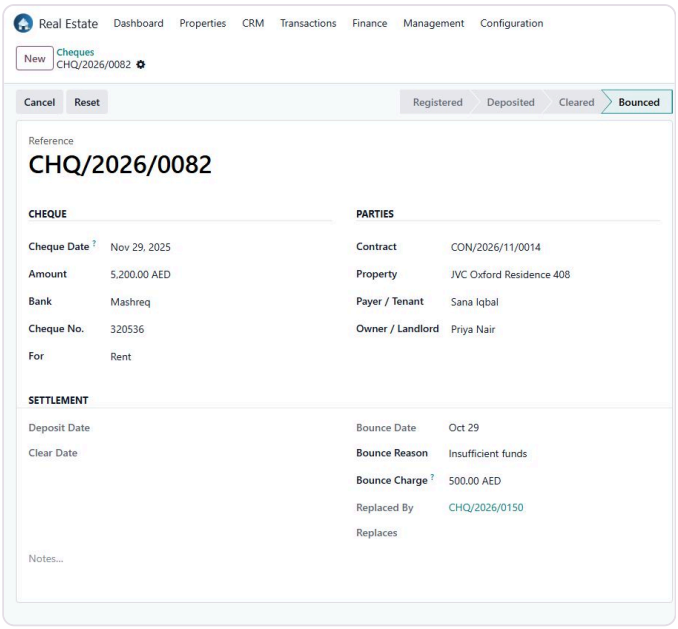

11 ENTERPRISE ADD-ON

Cleared

The clear date is stamped and logged. The clear date is what owner statements use.

A bounced cheque ENTERPRISE ADD-ON

12 ENTERPRISE ADD-ON

Mark Bounced

Type the **Bounce Reason** and **Bounce Charge** to the tenant, then **Mark Bounced**. The bounce date is stamped and the reason is logged.

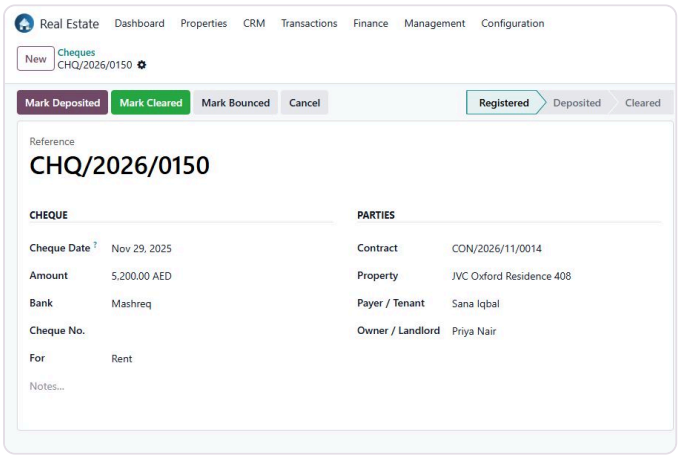

Only a registered or deposited cheque can bounce.

13 ENTERPRISE ADD-ON

Replace Cheque

Replace Cheque makes a new registered cheque for the same amount and date, with no number, and opens it. The bounced one shows **Replaced By**; the new one shows **Replaces**.

A cheque can be replaced once.

14 ENTERPRISE ADD-ON

The replacement

Type the new cheque number and date, and it joins the register like any other.

15 ENTERPRISE ADD-ON

Cancel and Reset

Cancel is offered until a cheque clears. **Reset** takes any cheque back to registered and clears its dates.

A cheque is a record, not an accounting entry. Record the receipt in Invoicing as you normally do. The company has a default bounce charge field, but it is not copied onto cheques; type the charge on each bounce.

PART 16 Maintenance requests

ENTERPRISE ADD-ON

A tenant reports a fault. The office logs it against the property, gives it to a member of staff or a contractor, records the cost and says who pays. Owner costs land on the owner's next statement.

IN THIS PART YOU WILL LEARN

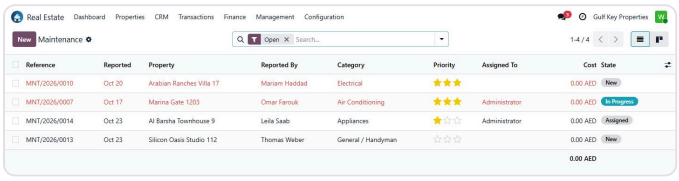

- Logging a fault against a property
- Assigning to staff or a contractor
- Cost and who it is billed to

TRY IT YOURSELF ON THE DEMO

1. Open Management, Maintenance and switch to the board
2. Open a done request and read Bill To and Cost

A request's life ENTERPRISE ADD-ON

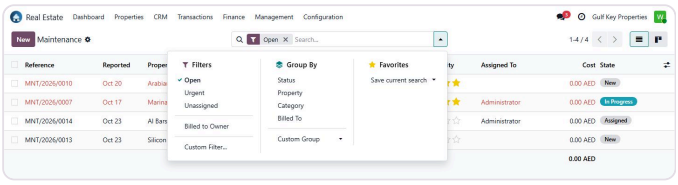

1. **New** — Fault reported
2. **Assigned** — Staff or contractor named
3. **In Progress** — Work started
4. **Done** — Completed, cost recorded

1 ENTERPRISE ADD-ON

Management, Maintenance

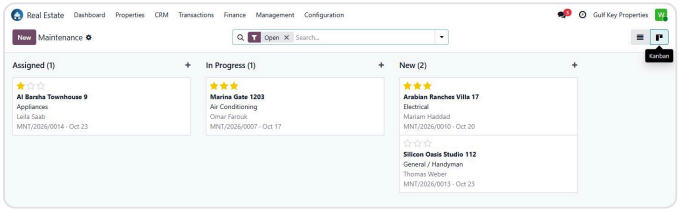

Opens on the **Open** filter: new, assigned and in progress. Urgent first.

2 ENTERPRISE ADD-ON

Filters

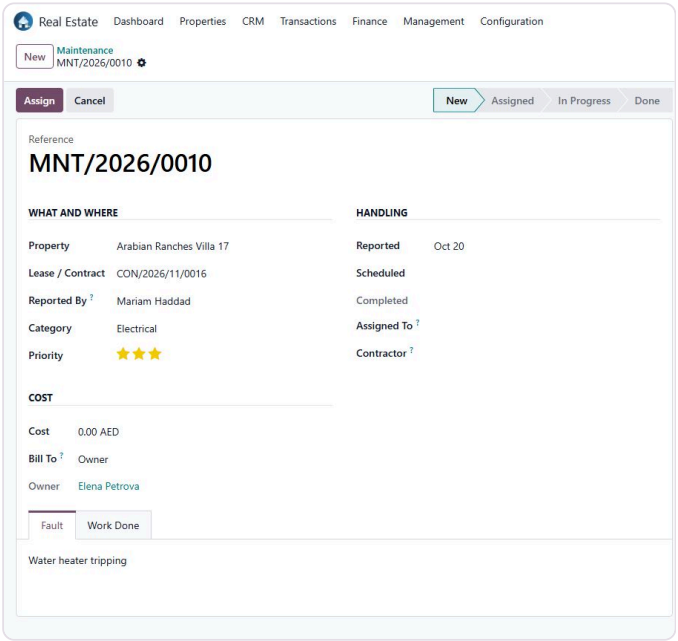

Open, Urgent, Unassigned, Billed to Owner. Group by status, property, category or who it is billed to.

3 ENTERPRISE ADD-ON

The board

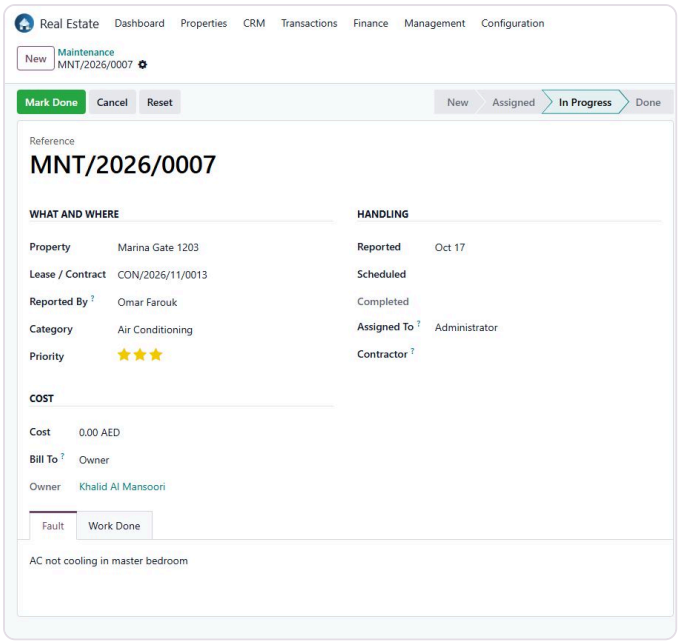

Requests by status, the board the office works from.

4 ENTERPRISE ADD-ON

Log a request

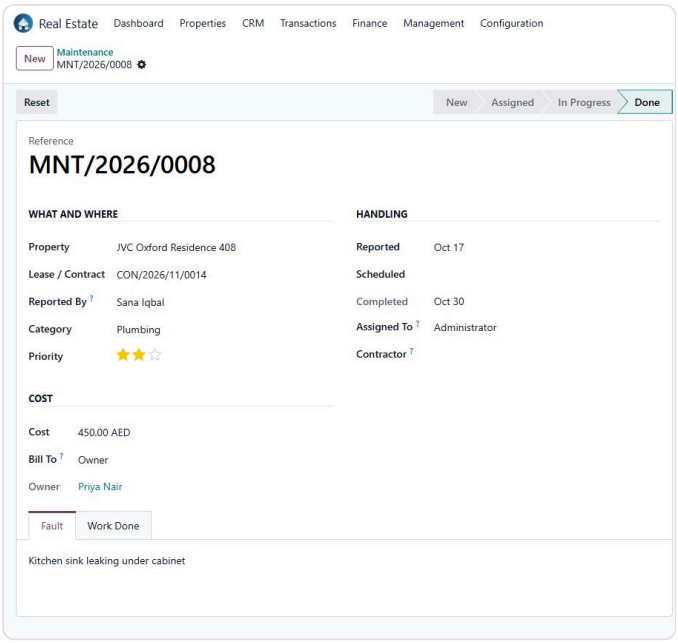

Property, then the lease and the tenant fill in from the active rent or lease contract on it. Category, priority (low, normal, high, urgent), reported date, scheduled date, and on the **Fault** tab what was reported.

5 ENTERPRISE ADD-ON

Assign and start

Name an **Assigned To** user or a **Contractor**, then **Assign**; it refuses if neither is set. **Start Work** moves it to In Progress.

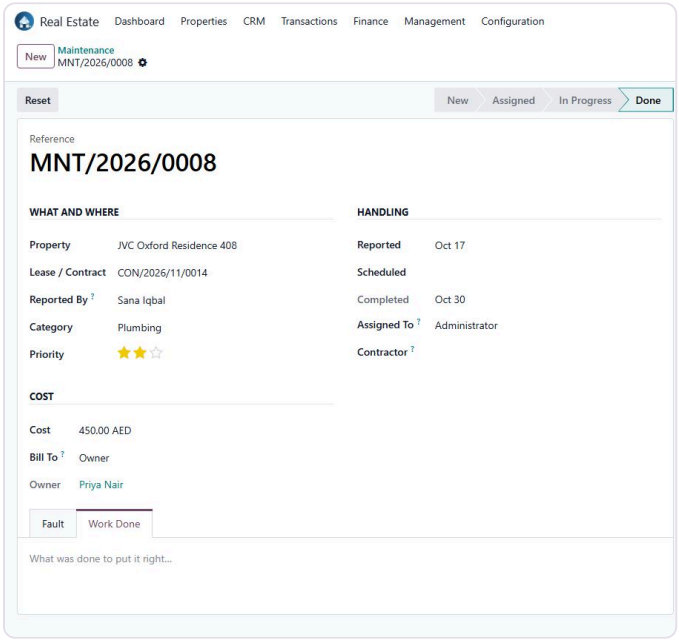

6 ENTERPRISE ADD-ON

Cost and who pays

Type the **Cost** and **Bill To**: Owner, Tenant or Agency (absorbed). **Mark Done** stamps the completion date.

Only done requests billed to the owner, with a cost, go on owner statements.

7 ENTERPRISE ADD-ON

Work Done tab

What was done, for the record and for the owner.

Cancel and **Reset** are also on the form; a cancelled request can be assigned again.

PART 17 Owner statements

ENTERPRISE ADD-ON

The owner statement is what an agency managing other people's property sends every month or quarter: rent collected, the management fee, repairs paid on his behalf, and what is owed to him.

IN THIS PART YOU WILL LEARN

- What goes onto a statement and why it reconciles to the bank
- Building, confirming and paying a statement
- The printed statement

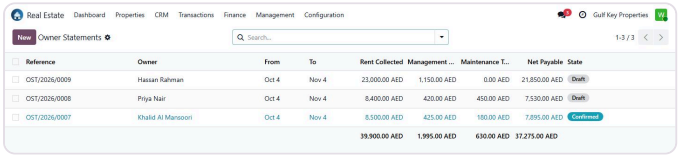

TRY IT YOURSELF ON THE DEMO

1. Open a draft statement and read its lines
2. Open the confirmed one and print it

HOW IT WORKS

How a statement is worked out

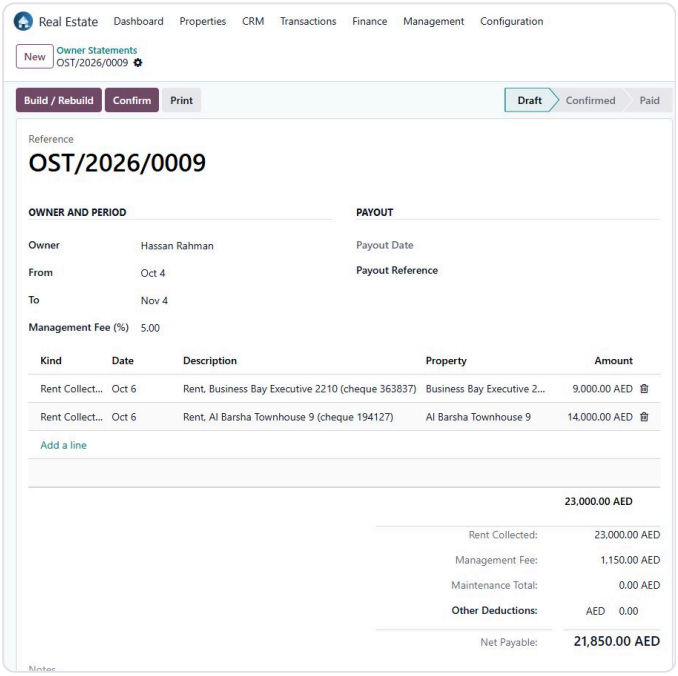

Rent collected	rent cheques for this owner **cleared** between From and To
– Management fee	rent collected × Management Fee (%)
– Maintenance	done requests billed to the owner, completed between From and To
– Other deductions	typed by hand
= Net payable	**what you pay the owner**

1 ENTERPRISE ADD-ON

Management, Owner Statements

Each statement with reference (OST/2026/0009), owner, period, rent, fee, maintenance, net payable and status.

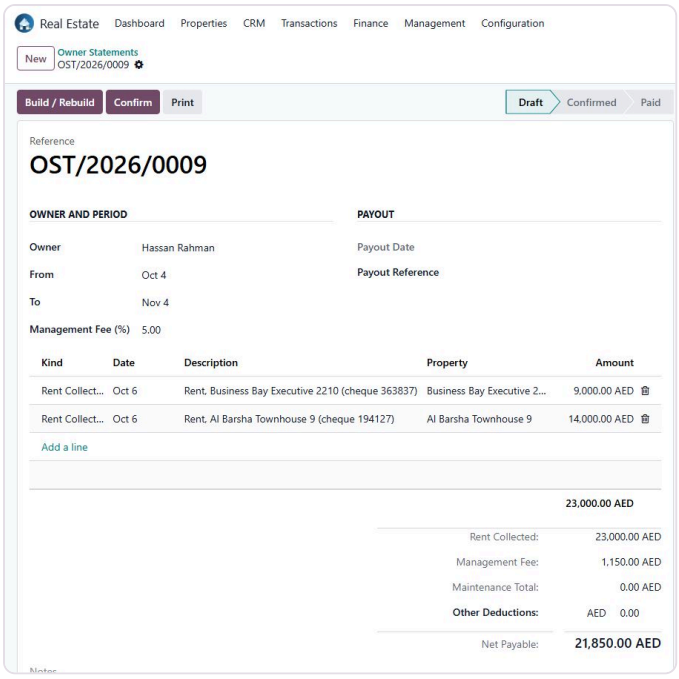

2 ENTERPRISE ADD-ON

A draft statement

Owner, From (the first of this month by default) and To, Management Fee (%) from the company default. **Build / Rebuild** clears the lines and rebuilds them from what cleared and what was billed.

Rebuild after a late cheque clears. Only a draft can be rebuilt.

3 ENTERPRISE ADD-ON

The lines

One line per cleared rent cheque and per maintenance job, with date, description, property and amount. Type **Other Deductions** for anything else agreed with the owner.

4 ENTERPRISE ADD-ON

Confirm, then Mark Paid

Confirm locks the figures as owed. Pay the owner, type the **Payout Reference**, and **Mark Paid** stamps the payout date. **Reset to Draft** reopens it.

5 ENTERPRISE ADD-ON

Print

Print gives the statement PDF to send to the owner: period, each line, and the totals down to net payable.

PART 18 The portfolio dashboard

ENTERPRISE ADD-ON

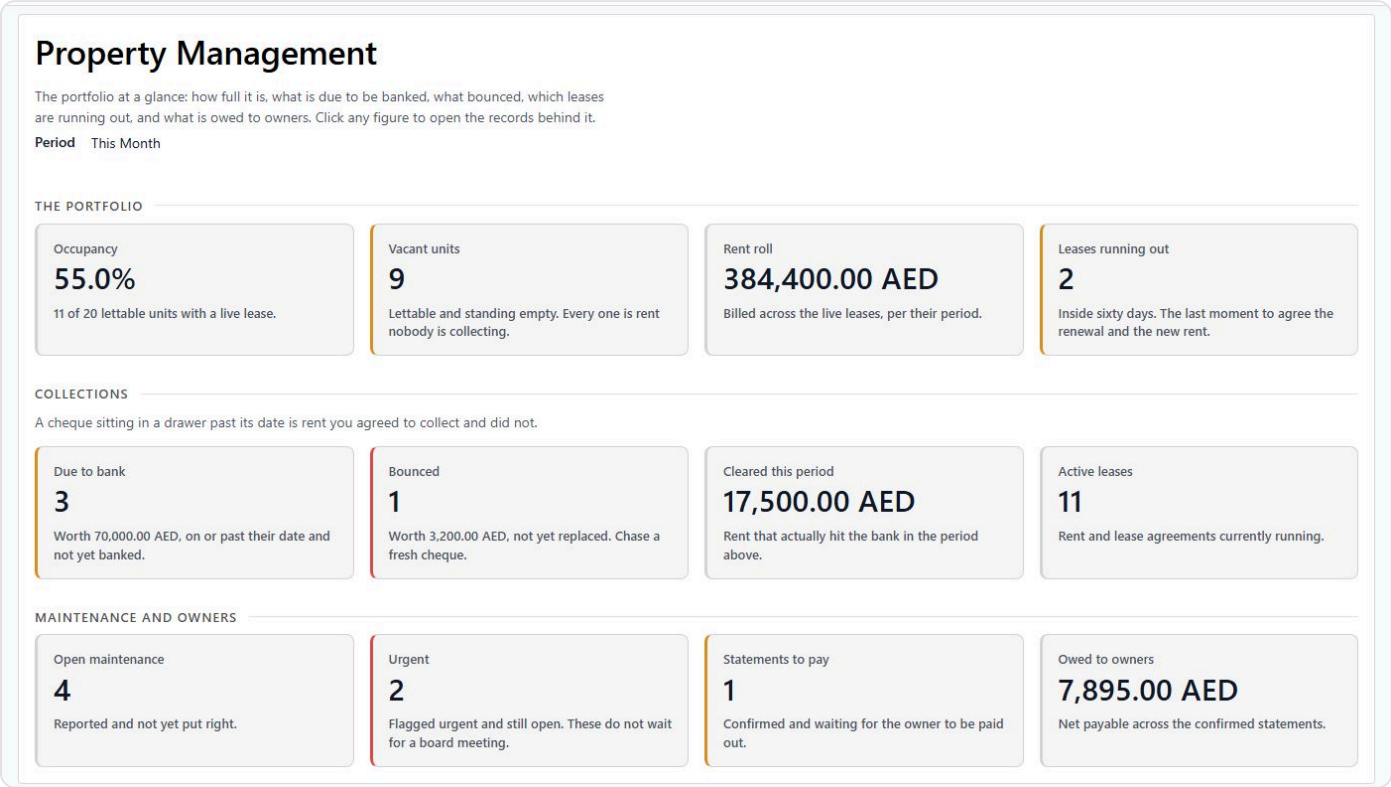

One screen for whoever runs the portfolio: how full it is, what to bank, what bounced, which leases run out soon, what is open in maintenance and what is owed to owners. Every figure opens the records behind it.

IN THIS PART YOU WILL LEARN

- Each dashboard figure and what it counts
- Opening the records behind a figure

TRY IT YOURSELF ON THE DEMO

1. Open Dashboard
2. Click Due to bank, then go back and click Vacant units

ENTERPRISE ADD-ON Real Estate, Dashboard. Pick This Month, This Quarter or This Year for the cleared figure.

CARD	WHAT IT COUNTS	OPENS
Occupancy	Rental properties with an active rent or lease contract, as a share of all rental properties	Active leases
Vacant units	Rental properties with no active lease	Those properties
Rent roll	Sum of Rent / Period on active leases	Active leases
Leases running out	Active leases ending within 60 days	Those leases
Due to bank	Registered cheques on or past their date, count and value	Those cheques
Bounced	Bounced cheques not yet replaced	Those cheques
Cleared this period	Cheques cleared since the start of the month, quarter or year	Those cheques
Active leases	Rent and lease contracts in the Active stage	Those leases

Open maintenance	New, assigned and in progress requests	The board
Urgent	Open requests with urgent priority	The board
Statements to pay, Owed to owners	Confirmed statements and their net payable	Those statements

The figures are counted for the whole company, even for an agent who can only open his own records, so the board means the same thing to everyone. Rent roll adds rent per period as typed, so a mix of monthly and quarterly leases is added as entered.

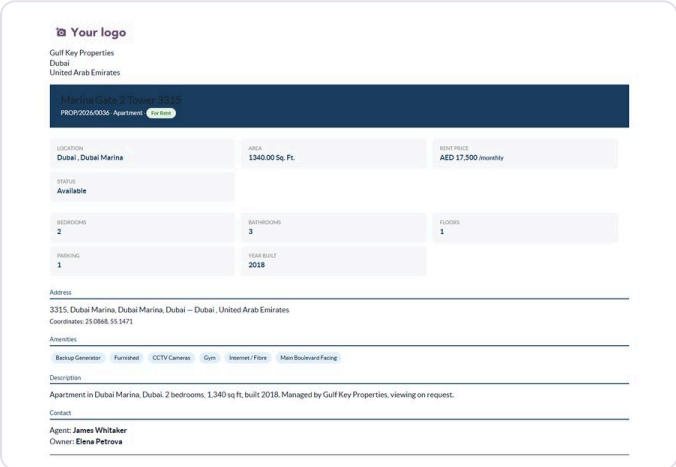

PART 19 Printed documents and emails

Three documents print from the forms, and two email templates are ready to send from the chatter.

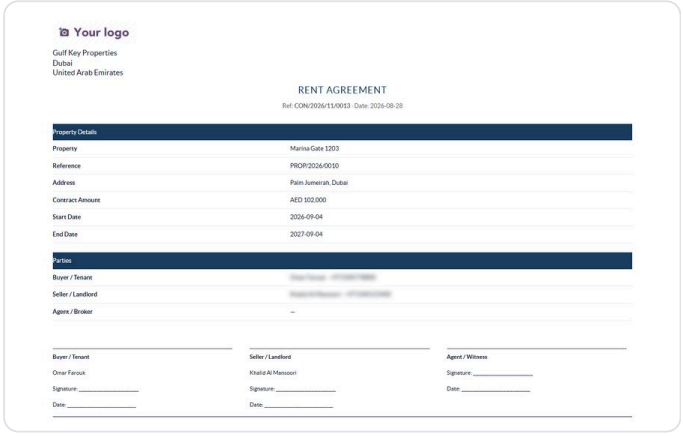

IN THIS PART YOU WILL LEARN

- The three printed documents
- The two email templates and how to send them

DOCUMENT	PRINTED FROM	WHAT IS ON IT	
Property Sheet	A property, Print menu	Photo, price, type, purpose, area, rooms, address, amenities, description, agent	BASE
Contract / Agreement	A contract, Print Contract or Print menu	Parties, property, amount, dates, full terms, signature boxes	BASE
Owner Statement	A statement, Print or Print menu	Owner, period, rent and maintenance lines, fee, deductions, net payable	ENTERPRISE ADD-ON

Date	Description	Property	Amount
10/06/2026	Rent, Marina Gate 1203 (cheque 812491)	Marina Gate 1203	8,500.00 AED

Maintenance charged to the owner

Date	Description	Property	Amount
11/03/2026	Maintenance, Jumeirah Park Villa 6 (MNT/2026/0012)	Jumeirah Park Villa 6	180.00 AED

Rent collected	8,500.00 AED
Management fee (5.0%)	- 425.00 AED
Maintenance	- 180.00 AED
Net payable to owner	**7,895.00 AED**

This statement is built from the cheques that cleared and the maintenance billed to the owner within the period shown.

ENTERPRISE ADD-ON The owner statement.

Email templates BASE

TEMPLATE	FOR	GOES TO
Real Estate: New Inquiry Received	An inquiry: customer, phone, email, property, type, budget, source, message, and a link to open it	The assigned agent's work email
Real Estate: Transaction Completed	A deal: reference, property, type, agreed price, agent, date	The buyer or tenant

Neither is sent by itself. Open the inquiry or deal, click **Send message** in the chatter, pick the template and send. Change their wording in Settings, Technical, Email Templates (developer mode).

PART 20 A 15-minute demo

A route through the demo for showing the product to someone: brokerage first, then the managed portfolio.

MIN	SHOW	SAY	
0-1	Sign in, the Dashboard	*One board for the whole portfolio. Every figure opens its records.*	ENTERPRISE ADD-ON
1-3	Properties board, remove the filter, open Marina Gate 2 Tower 3315	*Purpose, price, area in any unit, photos, amenities, publish to the website.*	BASE
3-4	Print the Property Sheet; show Published on Website and the Views counter	*The listing on paper, and ready for the website listing.*	BASE
4-6	CRM, Pipeline; open an in progress inquiry	*Every call and web lead with budget, source and follow-up.*	BASE

12-13	Maintenance board, a done request billed to the owner	*Repairs costed and billed to the right person.*	ENTERPRISE ADD-ON
13-15	Owner Statements: a confirmed one, Print	*Rent cleared, less fee, less repairs, owed to the owner.*	ENTERPRISE ADD-ON

PART 21 Questions people ask

QUESTION	ANSWER
Does it run on Odoo Community?	Yes. Both modules are built for Odoo 19 Community. The add-on does not need Odoo Enterprise.
Can I use the base without the add-on?	Yes. The base is a complete brokerage system. Add the add-on when you manage leases.
Does it handle marla and kanal?	Yes. Enter the area in marla, kanal, sq ft or sq m; the size in sq ft is worked out (272.25 per marla, 5,445 per kanal).
Does it post to the accounts?	No. Cheques, payment lines and statements are tracked records. Invoices and payments are made in Invoicing.
Is commission worked out from the rules?	The deal uses the commission % typed on it. The rules are the reference table the office reads from.
Are payments marked overdue automatically?	No. Mark them overdue from the payment line; then they show under Overdue Payments.
Can a tenant see his cheques online?	No. The portal shows a customer's own inquiries and deals. Owner statements are printed to send.
Can each agent see only his own work?	Yes. Agents see the properties, inquiries and deals where they are the agent. Managers see everything.
What currency does it use?	The company currency by default, and each property, deal and contract can carry its own.
How do I show my listings on my website?	Install the Website app and the module update that loads the listing pages (Part 13), tick Published on Website on each property, and link /real-estate from your menu.
Can several companies share one database?	Yes. Records carry a company, and cheques, maintenance and statements are kept apart by company.

PART 22 Menu map

Every menu and page in both modules, on one page.

Dashboard

Dashboard	Occupancy, rent roll, cheques, leases, maintenance, owners

Properties

All Properties	The board by stage, Available filter on
