COMPLETE GUIDE · SETUP, THE COUNTER, THE WEBSITE AND EVERY SCREEN

Rental Management and the Online Rental Shop for Odoo 19

Rate cards by the hour, day, week and month, availability that will not double book, pickup and return, late charges, deposits, and online booking with a date picker, cart holds and My Rentals. Every screen and every step. No Odoo background needed.

RENTAL MANAGEMENT | ONLINE RENTAL SHOP

START

About this guide

Hiring something out is not selling it. The price depends on how long it is out, the same unit goes out again and again, and nobody can hire what is already promised. This guide shows how two modules run that on Odoo 19 Community, one screen at a time.

Two modules

RENTAL MANAGEMENT is the back office: rental orders, pickup, return, late charges, deposits.
ONLINE RENTAL SHOP is the website: a date picker, live availability, cart holds and My Rentals. Each works alone. Badges in this guide show which one a feature needs.

How to read it

Front to back the first time. Each part opens with what you will learn, then walks every field and button step by step.

The live demo

An invented cargo bike hire shop with five bikes, rate cards, deposits, a servicing blackout and bookings over the next weeks, with a website and a customer portal.

HOW IT WORKS

The demo

Address	**rental-demo.way4tech.com**
Sign in	**w4demo / Demo2026**
Shop	Elster Lastenrad-Verleih, an invented cargo bike hire, EUR, 19% VAT included
Runs on	Odoo 19, Community edition, with eCommerce

The live demo runs the Online Rental Shop. The Rental Management screens in this guide were taken on a test copy of Odoo 19 running that module with its own sample data: a tool, event and camera hire yard. The demo is shared, so treat it as a shop to walk around.

PART 9 What the customer sees ONLINE RENTAL SHOP

PART 10 The cart, holds and checkout ONLINE RENTAL SHOP

PART 11 My Rentals and the booking sheet ONLINE RENTAL SHOP

PART 12 Running both modules together

PART 13 A fifteen minute walk-through

PART 14 The menu map

PART 1 How a hire is priced and held

Two ideas carry both modules: a rate card that prices any length of hire, and a pool of units that is never promised twice.

IN THIS PART YOU WILL LEARN

- Rate rows: so many hours, days, weeks or months for so much
- Why the cheapest single rate wins, and why rates are not mixed
- The pool: a fixed number of units, or the quantity on hand
- Back to back bookings and the half open window
- What the two modules do and do not do

The rate card

Each product carries rate rows, for example 4 hours for 25, 1 day for 39, 3 days for 99, 1 week for 179 and 1 month for 490. For a requested period, each row is tried on its own: the period is rounded up to whole blocks of that row and multiplied by its price. The cheapest wins. A row priced at zero is skipped, so a half typed card never hands a bike out for nothing.

HOW IT WORKS

Three days and nine hours on the demo bike

4 hours	21 blocks × 25 = 525
1 day	**4 blocks × 39 = 156, the cheapest**
3 days	2 blocks × 99 = 198
1 week	1 block × 179 = 179
1 month	1 block × 490 = 490

Rates are never mixed inside one hire. Eight days on a card with a day rate and a week rate is priced as two weeks or eight days, whichever is cheaper, never as one week plus one day.

The pool

Each product says how many units can be out at once: a fixed number typed on the product, or the quantity on hand in the warehouse. A window is half open, so a hire that ends at ten does not clash with one that starts at ten, which is what makes back to back bookings work.

The two modules

	RENTAL MANAGEMENT	ONLINE RENTAL SHOP
Where	The back office, on the sales order	The website shop and the portal
Needs	Sales and Inventory	eCommerce
Rates	Rental Rates on the product	Website Rate Cards, or the Rental Management rates
Stops double booking	On confirm	In the cart, with a hold, and again on confirm
Pickup, return, late fee	Yes	Shown on the booking sheet and portal
Deposits	Invoiced and refunded on their own	Carried as a line of their own
Customer self service	No	Book online, My Rentals

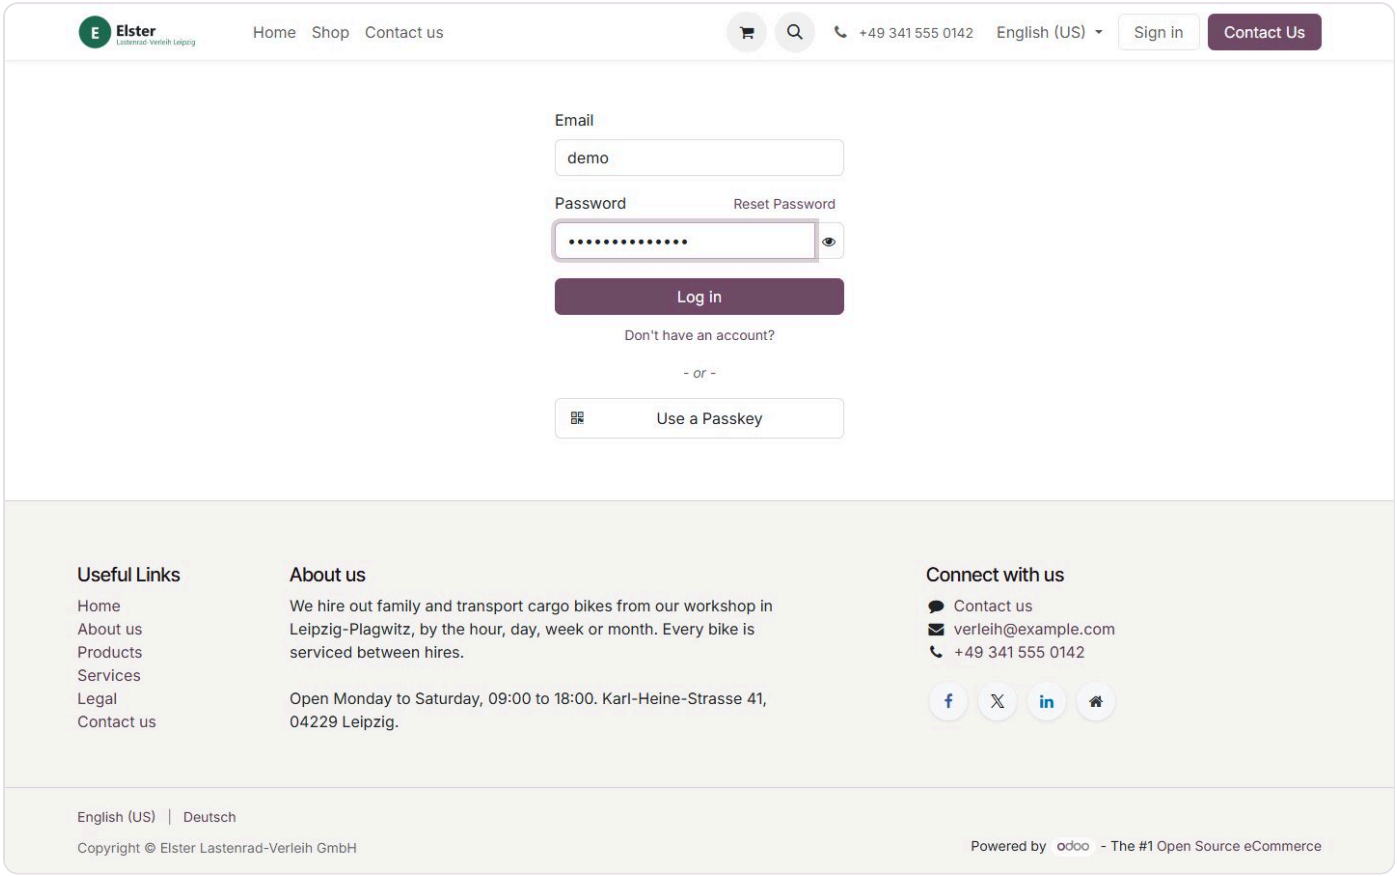

Neither module tracks a machine by serial number with its own meter, and pickup and return do not move stock in Inventory: they are recorded as rental movements. Each module installs alone, on Community or Enterprise.

PART 2 Signing in and who can see what

Staff sign in to the back office with their own user. Customers sign in to the website portal.

1 Sign in

Open the address, then Sign in at the top right, and type the login and password. On the demo, w4demo opens the back office.

ROLE	MODULE	WHAT IT GIVES
Manage Rentals	RENTAL MANAGEMENT	The Rental app: orders, schedule, movements, availability
Configure Rentals	RENTAL MANAGEMENT	Also the Configuration menu: rentable products and rates
Handle Online Rentals	ONLINE RENTAL SHOP	The Online Rentals app: diary, holds, orders, catalog
Configure Online Rentals	ONLINE RENTAL SHOP	Also Configuration: Rental Store settings and blackouts
Portal user	ONLINE RENTAL SHOP	My Rentals on the website, for their own company's hires

Rates, movements, holds, blackouts and store settings each carry a company, so two businesses in one database stay apart.

PART 3 Setting up products and rates RENTAL MANAGEMENT

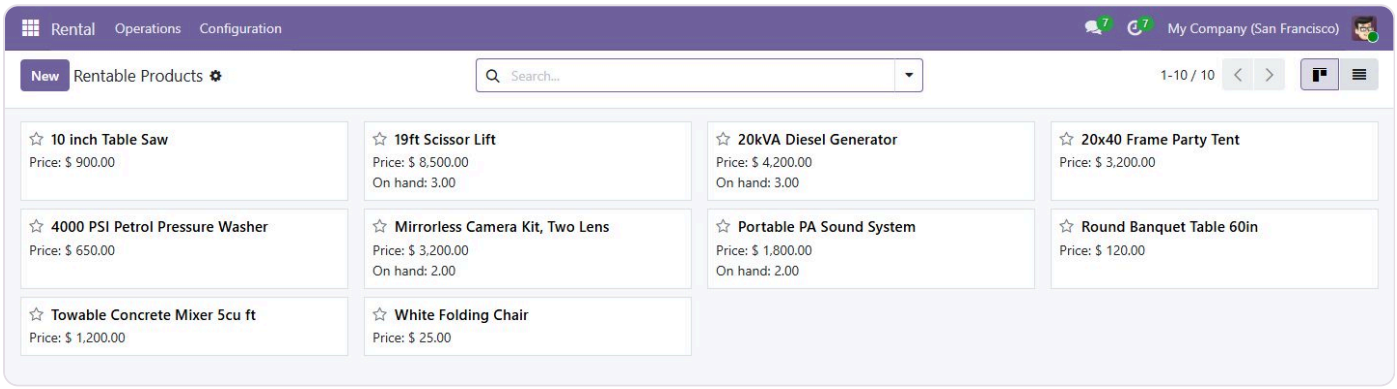

Any product becomes hireable with one tick. Then give it a deposit, a pool, a late penalty and its rates.

IN THIS PART YOU WILL LEARN

- The Rental tab on a product
- Fixed units or quantity on hand
- Rate rows and the per hour figure
- The Rental Rates list

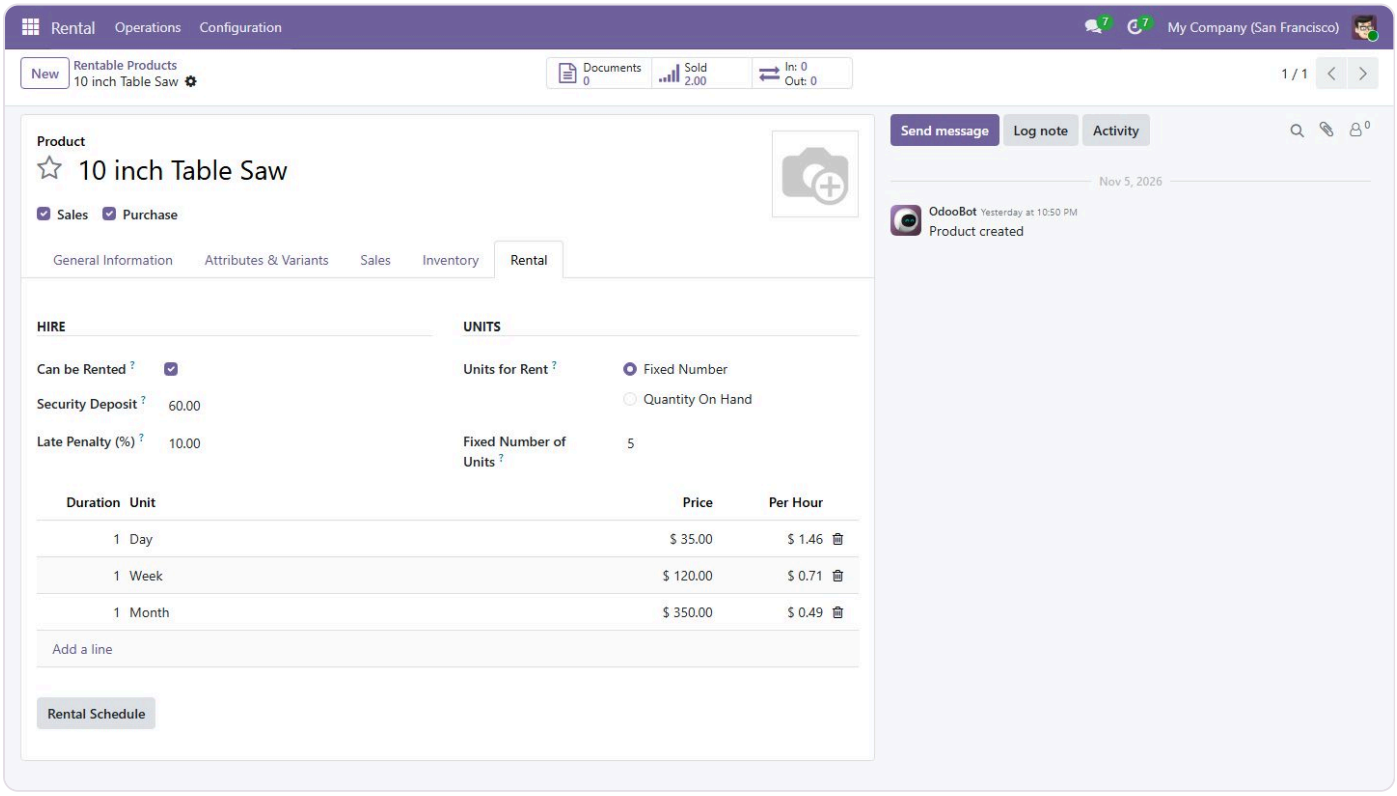

1 Rental, then Configuration, then Rentable Products

Every product ticked Can be Rented. A product created here is ticked for you.

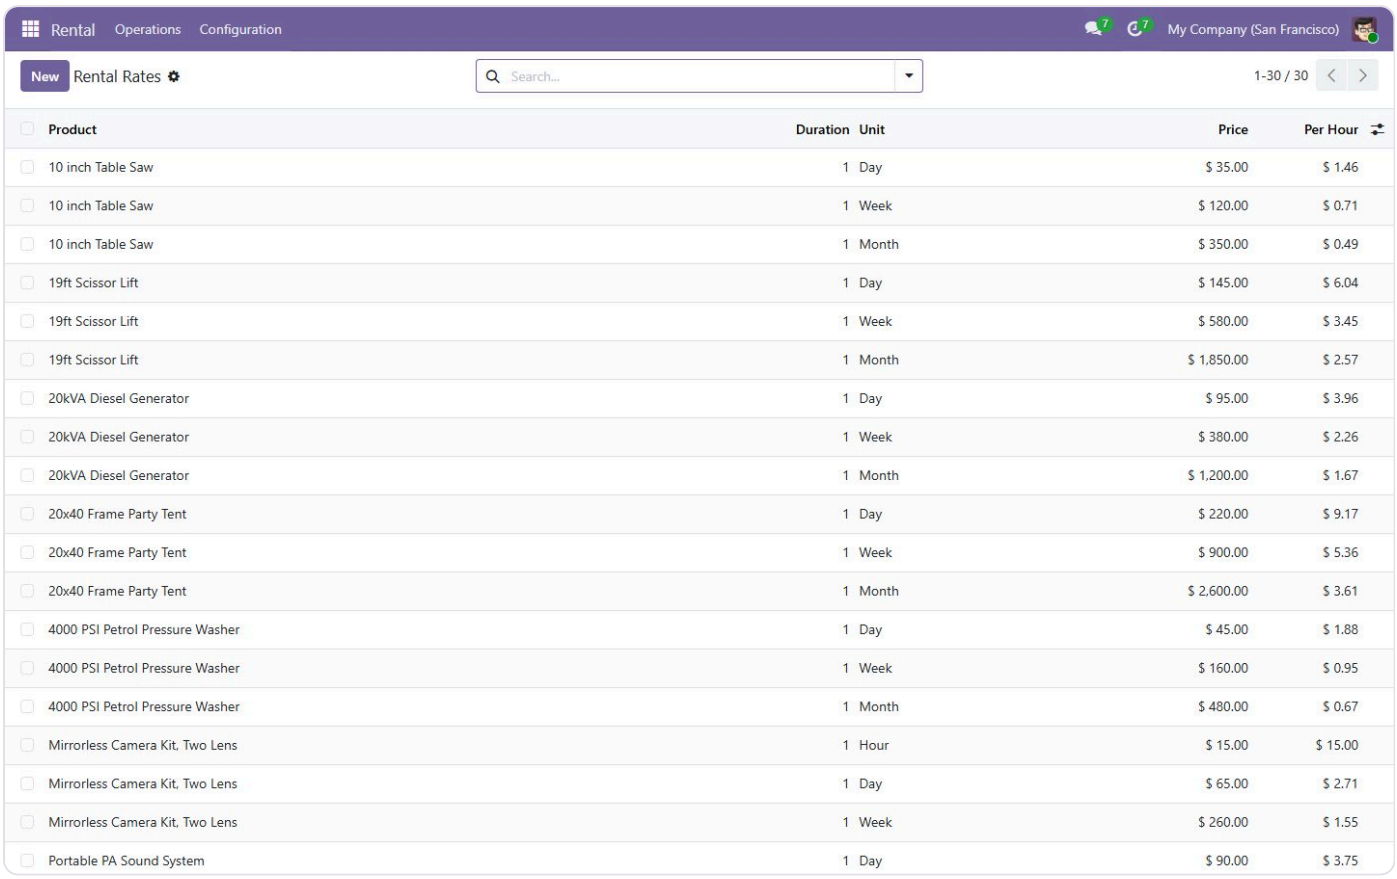

2 The Rental tab

Tick Can be Rented. Set the Security Deposit per unit, the Late Penalty percentage added on top of the late rate, and Units for Rent: a Fixed Number of Units, or Quantity On Hand from the warehouse. Add the rate rows: a duration, a unit (hour, day, week, month) and a price. Per Hour shows what each row works out to, for comparing them. Rental Schedule opens everything booked for this product.

3 Configuration, then Rental Rates

Every rate row across every product, for checking a price list in one place.

Product	Duration	Unit	Price	Per Hour
10 inch Table Saw	1	Day	$ 35.00	$ 1.46
10 inch Table Saw	1	Week	$ 120.00	$ 0.71
10 inch Table Saw	1	Month	$ 350.00	$ 0.49
19ft Scissor Lift	1	Day	$ 145.00	$ 6.04
19ft Scissor Lift	1	Week	$ 580.00	$ 3.45
19ft Scissor Lift	1	Month	$ 1,850.00	$ 2.57
20kVA Diesel Generator	1	Day	$ 95.00	$ 3.96
20kVA Diesel Generator	1	Week	$ 380.00	$ 2.26
20kVA Diesel Generator	1	Month	$ 1,200.00	$ 1.67
20x40 Frame Party Tent	1	Day	$ 220.00	$ 9.17
20x40 Frame Party Tent	1	Week	$ 900.00	$ 5.36
20x40 Frame Party Tent	1	Month	$ 2,600.00	$ 3.61
4000 PSI Petrol Pressure Washer	1	Day	$ 45.00	$ 1.88
4000 PSI Petrol Pressure Washer	1	Week	$ 160.00	$ 0.95
4000 PSI Petrol Pressure Washer	1	Month	$ 480.00	$ 0.67
Mirrorless Camera Kit, Two Lens	1	Hour	$ 15.00	$ 15.00
Mirrorless Camera Kit, Two Lens	1	Day	$ 65.00	$ 2.71
Mirrorless Camera Kit, Two Lens	1	Week	$ 260.00	$ 1.55
Portable PA Sound System	1	Day	$ 90.00	$ 3.75

A combo product cannot be hired, because it has nothing of its own to hand over. The pool and the late penalty cannot be negative. A rate needs a positive duration and a price of zero or more.

PART 4 The rental order RENTAL MANAGEMENT

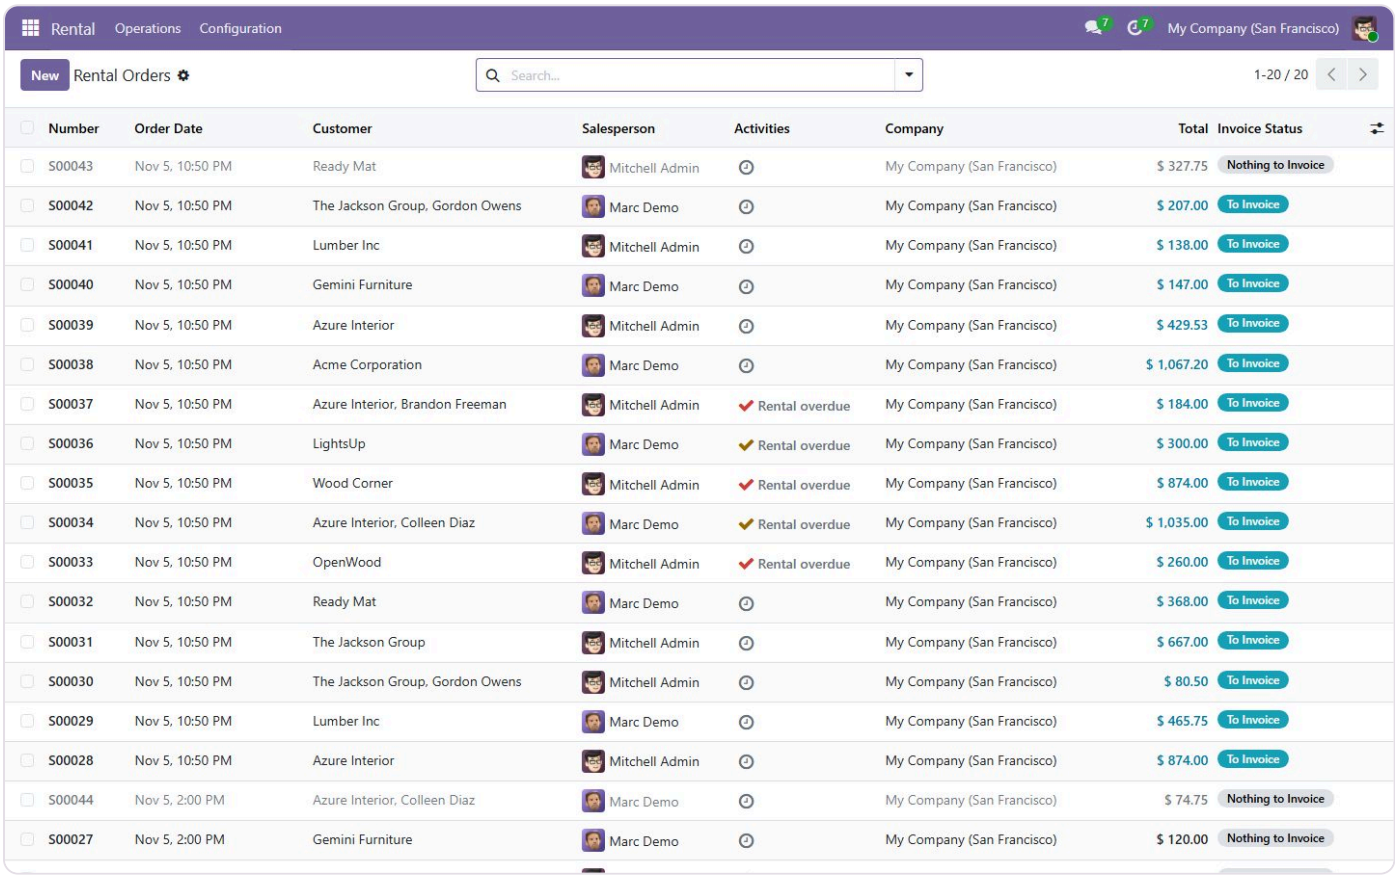

A rental is an ordinary sales order with Rental Order ticked, a pickup and an expected return. The lines are priced from the rate card and the order will not confirm if the units are already promised.

IN THIS PART YOU WILL LEARN

- Creating a rental order and its dates
- How each line is priced and its duration shown
- Check Availability before you promise anything
- Confirming, and the double booking check
- The rental status of the order and its lines

1 Rental, then Operations, then Rental Orders

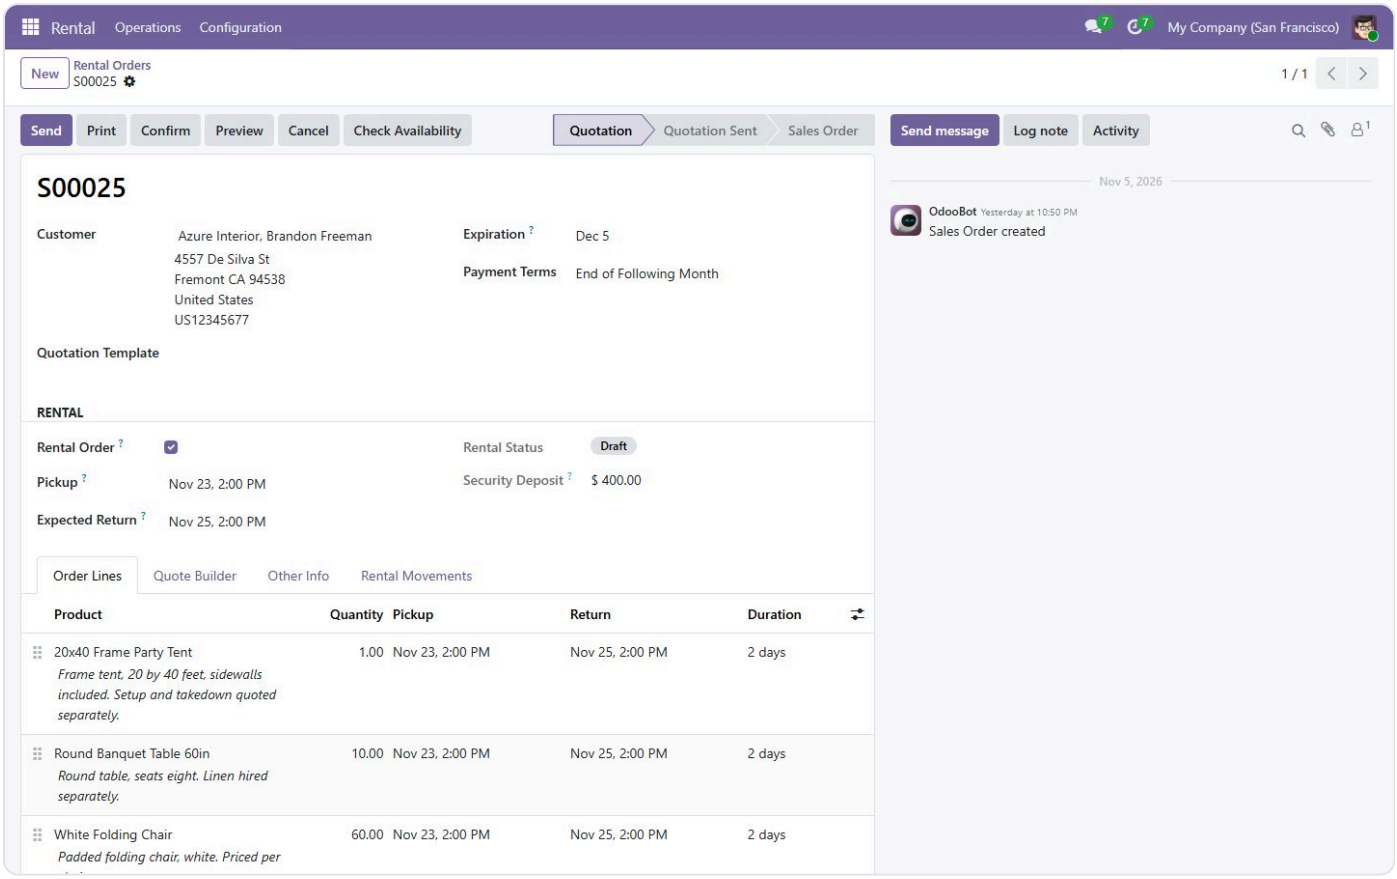

Every rental order. Overdue ones carry the Rental overdue activity.

Number	Order Date	Customer	Salesperson	Activities	Company	Total	Invoice Status
S00043	Nov 5, 10:50 PM	Ready Mat	Mitchell Admin		My Company (San Francisco)	$ 327.75	Nothing to Invoice
S00042	Nov 5, 10:50 PM	The Jackson Group, Gordon Owens	Marc Demo		My Company (San Francisco)	$ 207.00	To Invoice
S00041	Nov 5, 10:50 PM	Lumber Inc	Mitchell Admin		My Company (San Francisco)	$ 138.00	To Invoice
S00040	Nov 5, 10:50 PM	Gemini Furniture	Marc Demo		My Company (San Francisco)	$ 147.00	To Invoice
S00039	Nov 5, 10:50 PM	Azure Interior	Mitchell Admin		My Company (San Francisco)	$ 429.53	To Invoice
S00038	Nov 5, 10:50 PM	Acme Corporation	Marc Demo		My Company (San Francisco)	$ 1,067.20	To Invoice
S00037	Nov 5, 10:50 PM	Azure Interior, Brandon Freeman	Mitchell Admin	Rental overdue	My Company (San Francisco)	$ 184.00	To Invoice
S00036	Nov 5, 10:50 PM	LightsUp	Marc Demo	Rental overdue	My Company (San Francisco)	$ 300.00	To Invoice
S00035	Nov 5, 10:50 PM	Wood Corner	Mitchell Admin	Rental overdue	My Company (San Francisco)	$ 874.00	To Invoice
S00034	Nov 5, 10:50 PM	Azure Interior, Colleen Diaz	Marc Demo	Rental overdue	My Company (San Francisco)	$ 1,035.00	To Invoice
S00033	Nov 5, 10:50 PM	OpenWood	Mitchell Admin	Rental overdue	My Company (San Francisco)	$ 260.00	To Invoice
S00032	Nov 5, 10:50 PM	Ready Mat	Marc Demo		My Company (San Francisco)	$ 368.00	To Invoice
S00031	Nov 5, 10:50 PM	The Jackson Group	Mitchell Admin		My Company (San Francisco)	$ 667.00	To Invoice
S00030	Nov 5, 10:50 PM	The Jackson Group, Gordon Owens	Mitchell Admin		My Company (San Francisco)	$ 80.50	To Invoice
S00029	Nov 5, 10:50 PM	Lumber Inc	Marc Demo		My Company (San Francisco)	$ 465.75	To Invoice
S00028	Nov 5, 10:50 PM	Azure Interior	Mitchell Admin		My Company (San Francisco)	$ 874.00	To Invoice
S00044	Nov 5, 2:00 PM	Azure Interior, Colleen Diaz	Marc Demo		My Company (San Francisco)	$ 74.75	Nothing to Invoice
S00027	Nov 5, 2:00 PM	Gemini Furniture	Marc Demo		My Company (San Francisco)	$ 120.00	Nothing to Invoice

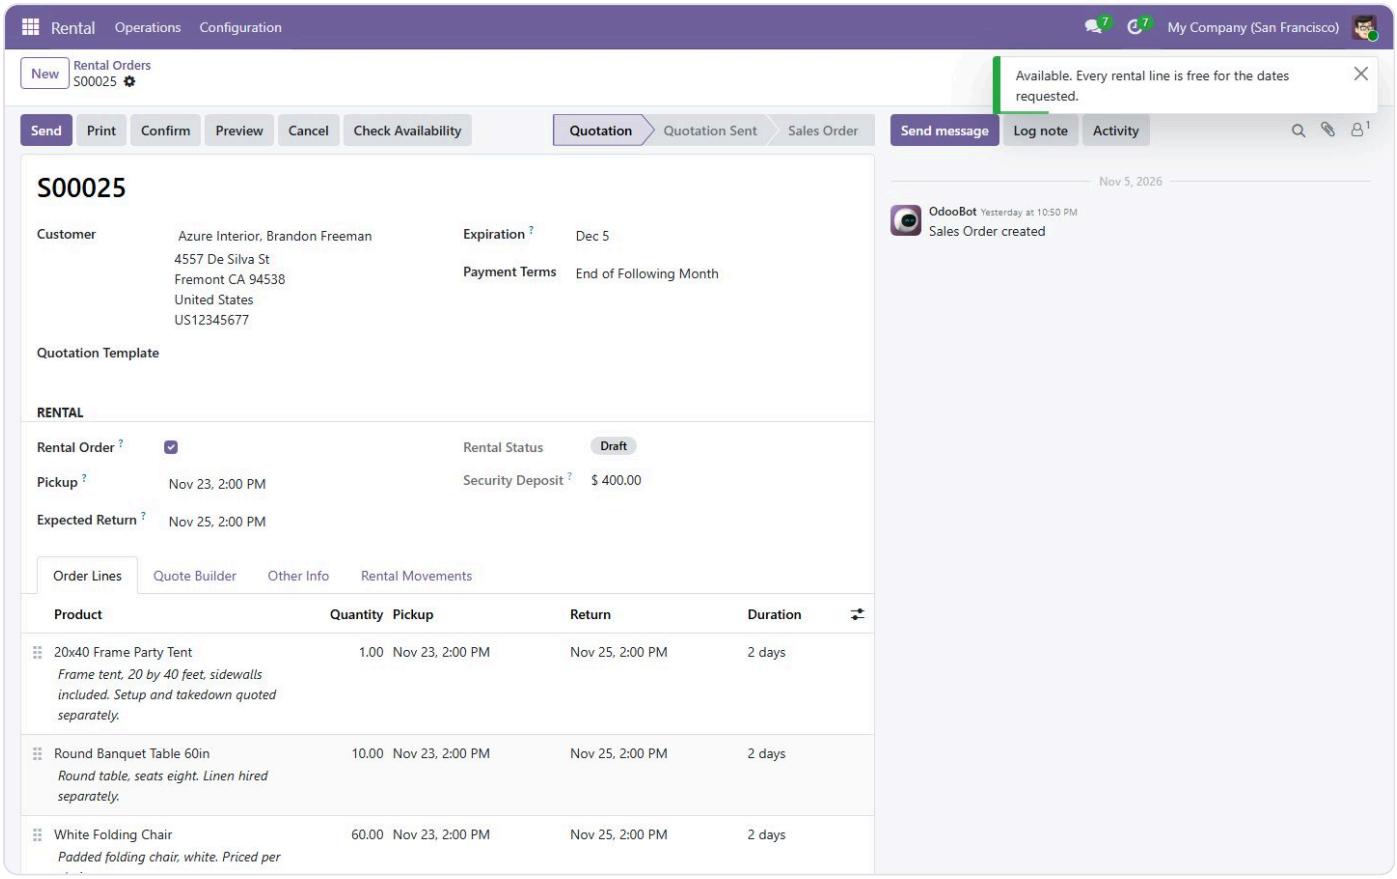

2 A new rental order

Pick the customer. In the Rental block set the Pickup and Expected Return. Each rental line takes those dates, and they can be changed per line afterwards. The line shows its pickup, return and duration in plain words, and the price comes from the cheapest rate for that period, not from the pricelist. Security Deposit adds up quantity times the product deposit on every line.

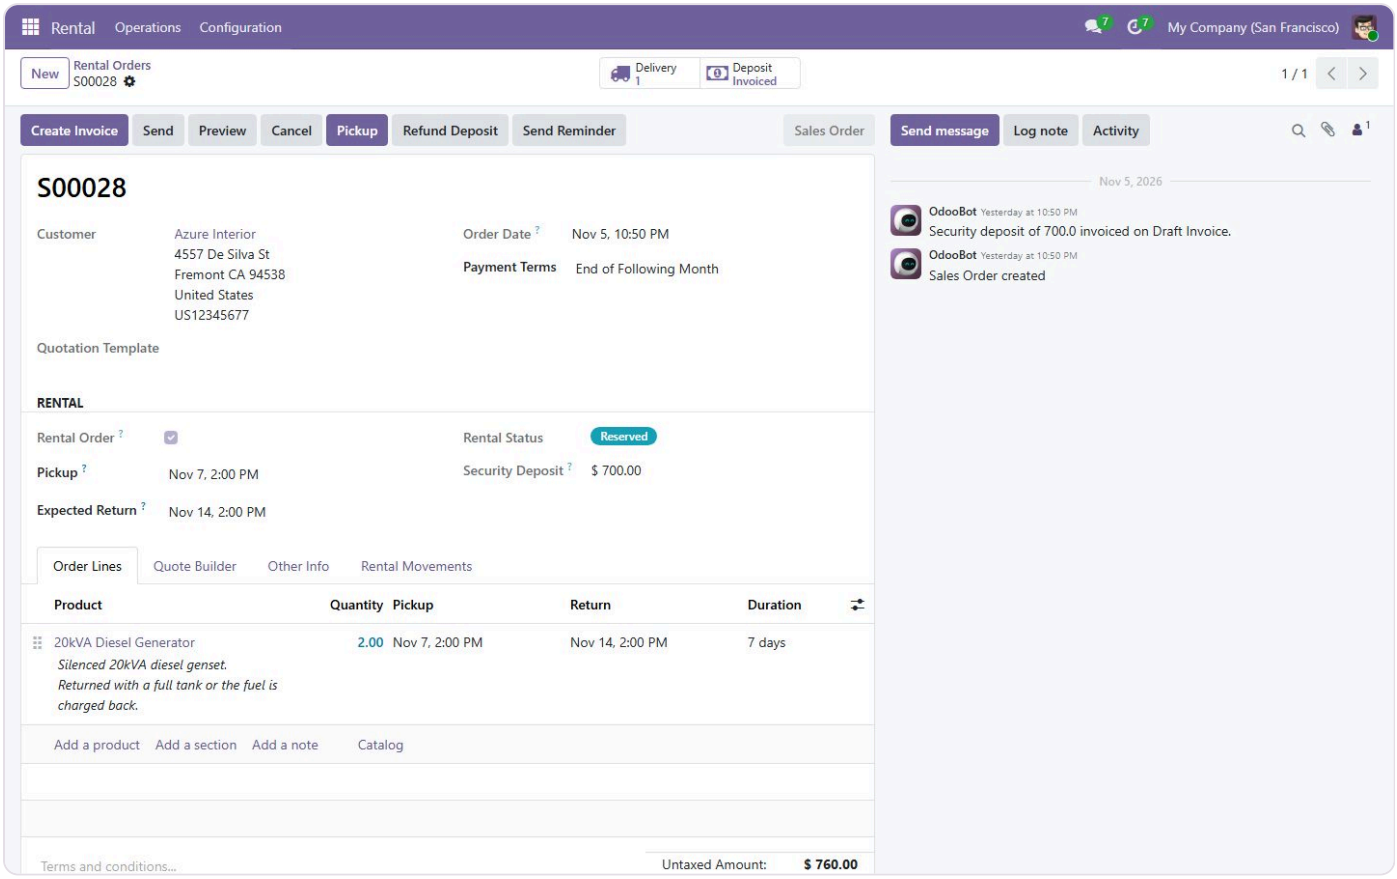

3 Check Availability

Reports on every line without confirming anything. When something clashes it names the product, how many were asked for, how many of the pool are free in that window, and the orders already holding them.

4 Confirm

The order needs a pickup and a return, and every rental line needs its dates. If any line would need more units than are free, confirm stops and lists every clash. Once confirmed the order is Reserved.

RENTAL STATUS	MEANING
Draft	Not confirmed yet
Reserved	Confirmed, nothing collected
Picked Up	Out on hire
Partially Returned	Some units back, some still out
Returned	Everything back

The order is only as far along as its least advanced line. Availability counts confirmed rental lines whose window overlaps, less anything already returned, against the pool.

PART 5 Pickup, return and late charges RENTAL MANAGEMENT

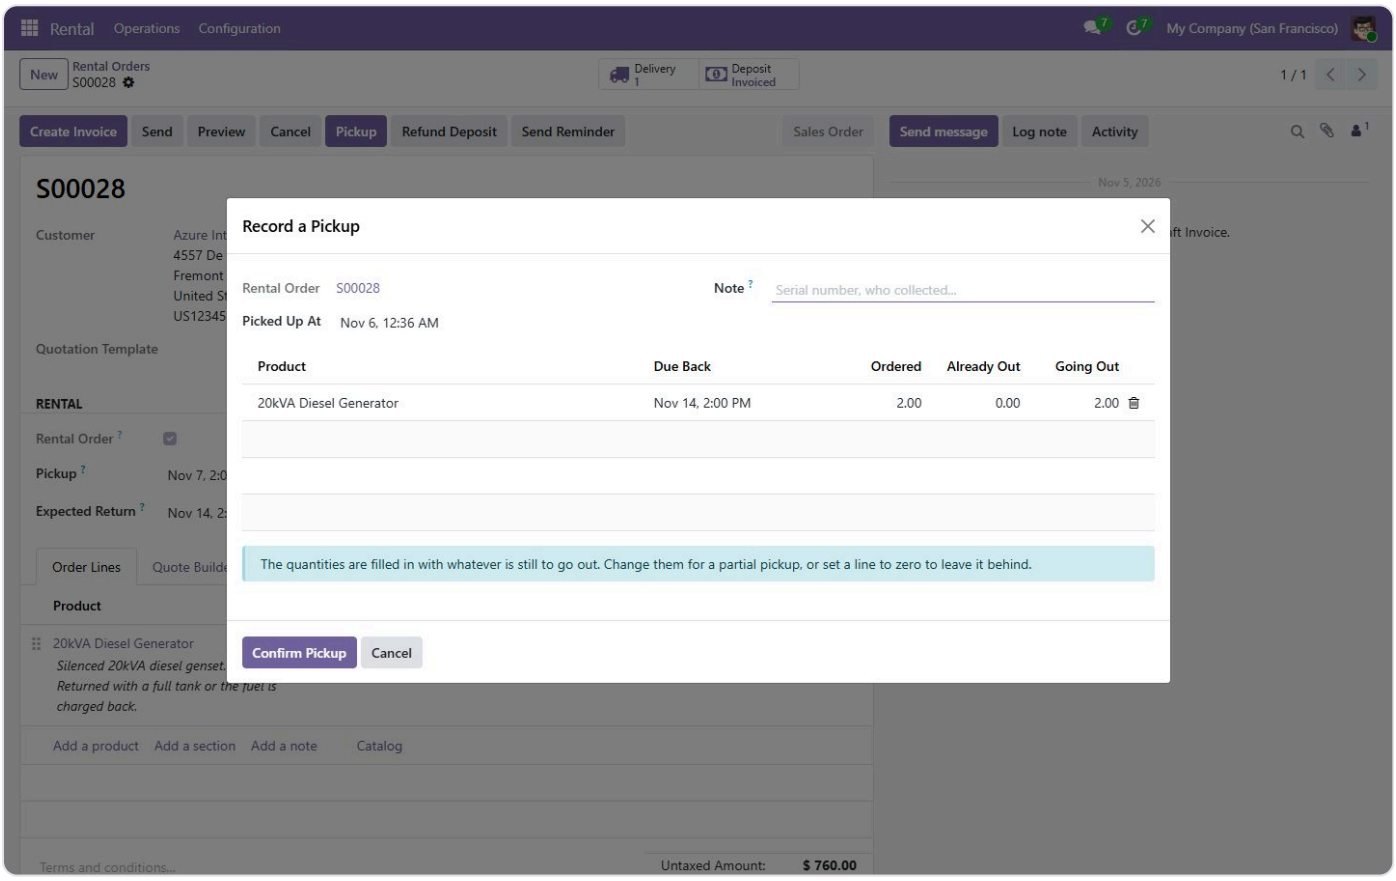

Pickup and return are recorded with a short form each. Both can be partial, both write a movement, and a late return can put the charge straight onto the order.

IN THIS PART YOU WILL LEARN

- Recording a pickup, in full or in part
- Recording a return, and the late charge preview
- How a late charge is worked out
- The movement log

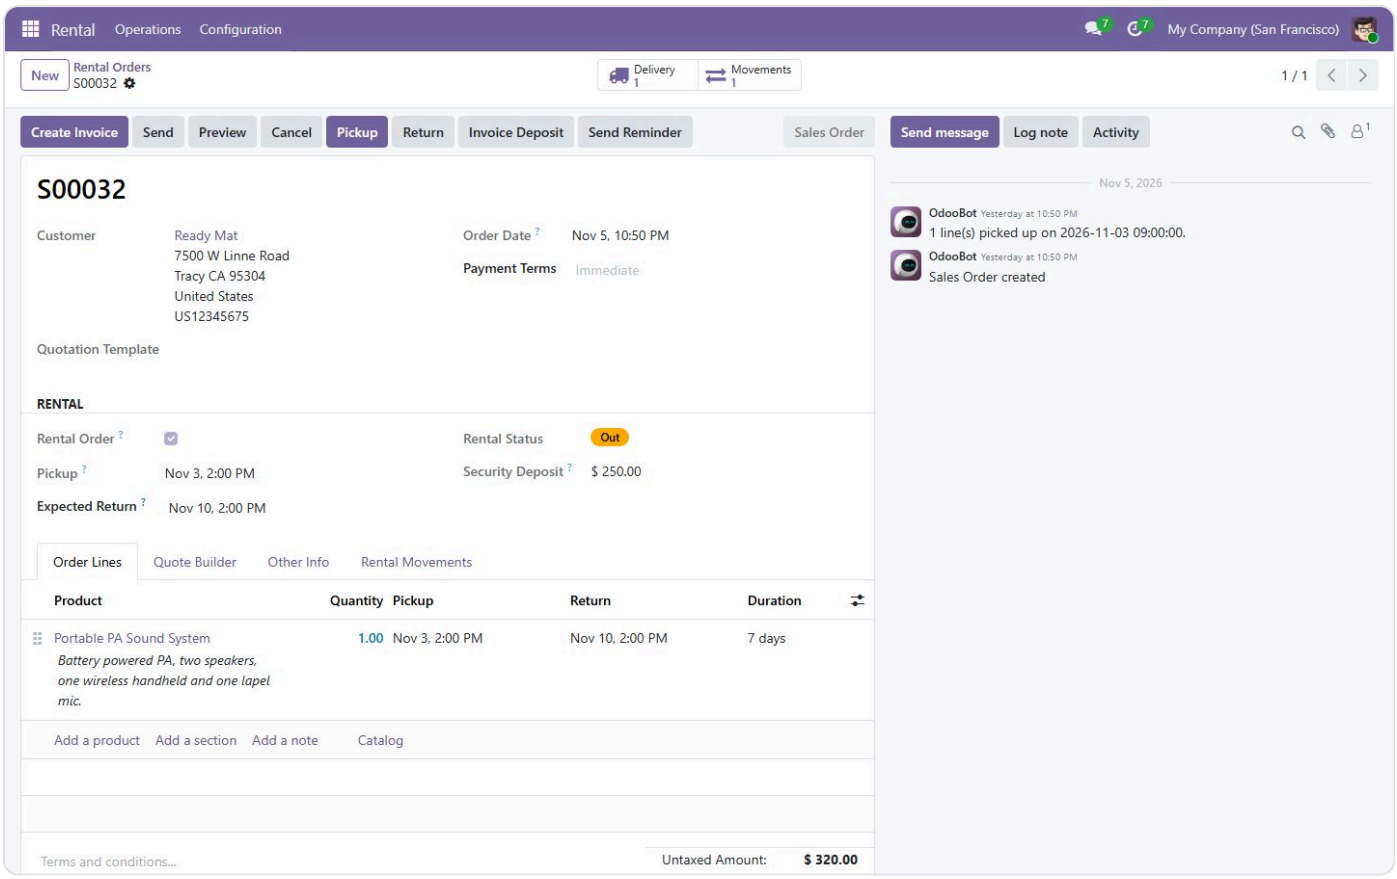

1 Press Pickup

Each line shows what was ordered, what is already out and when it is due back. Going Out is filled with everything still to collect: lower it for a partial pickup, or set a line to zero to leave it behind. Set the time it went and a note, such as who collected it. Confirm Pickup.

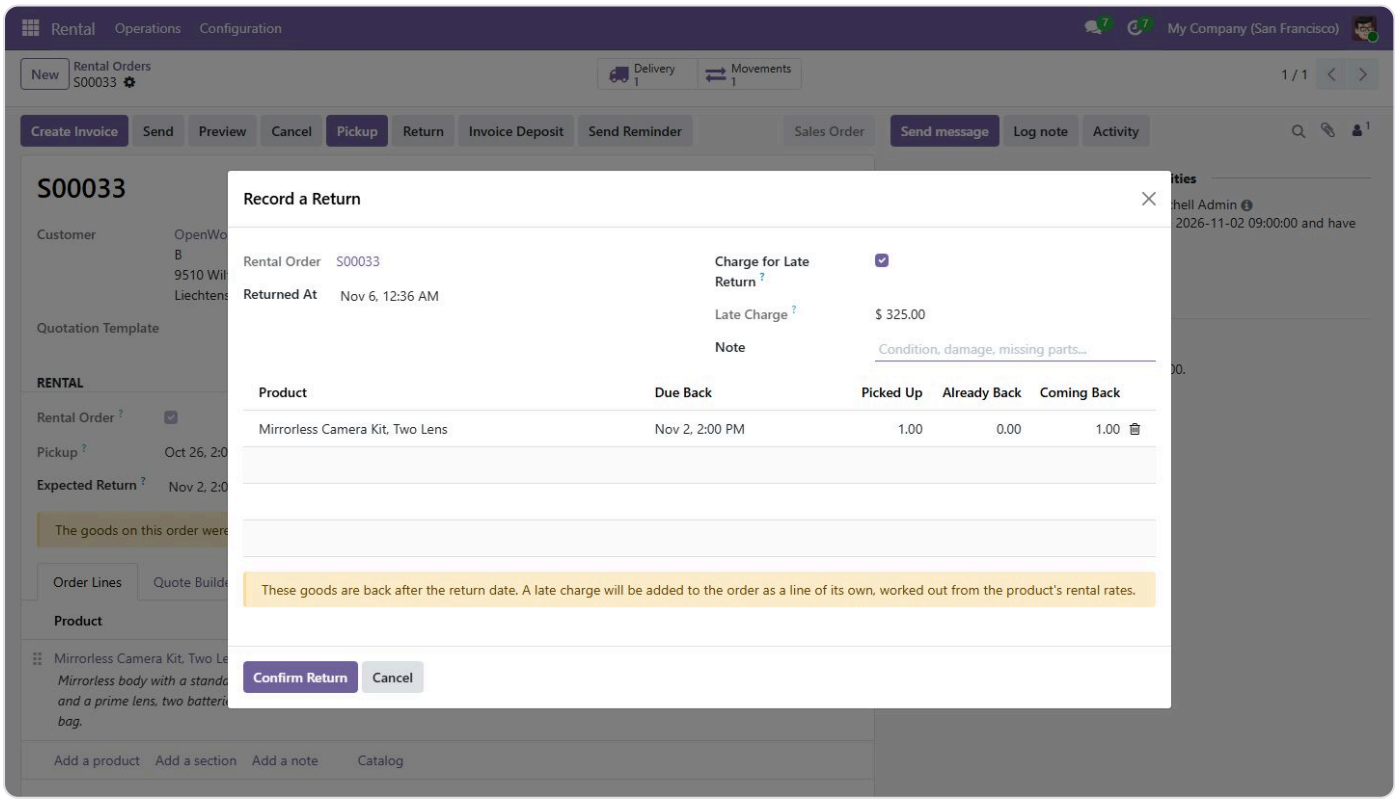

2 Out on hire

The status shows Out and the first Actual Pickup is stamped on the line.

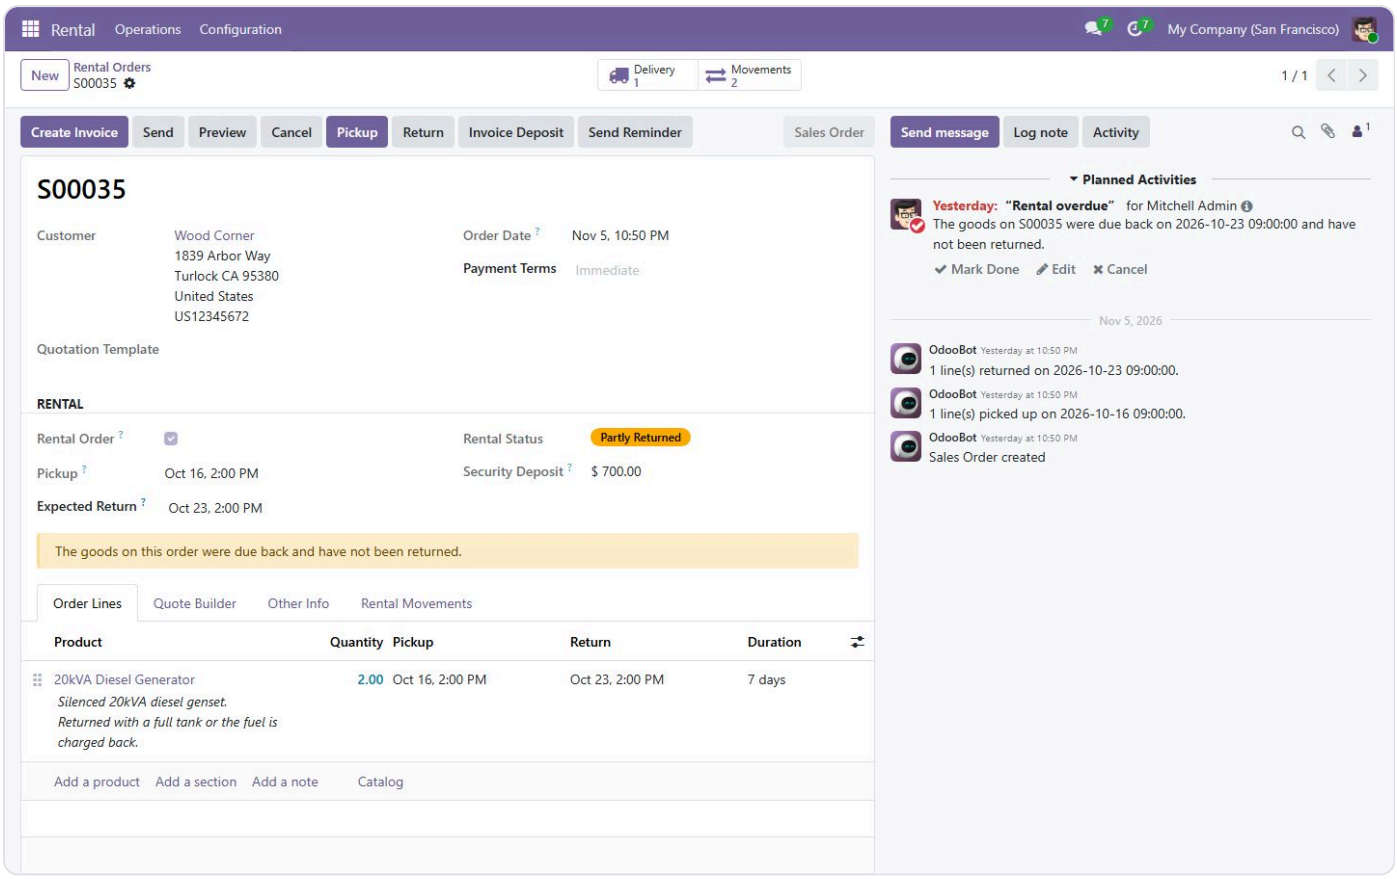

3 Press Return

Coming Back is filled with what is out. When the return time is after the due time, the form warns that the goods are late and shows the late charge before anything is written. Leave Charge for Late Return ticked to add it to the order.

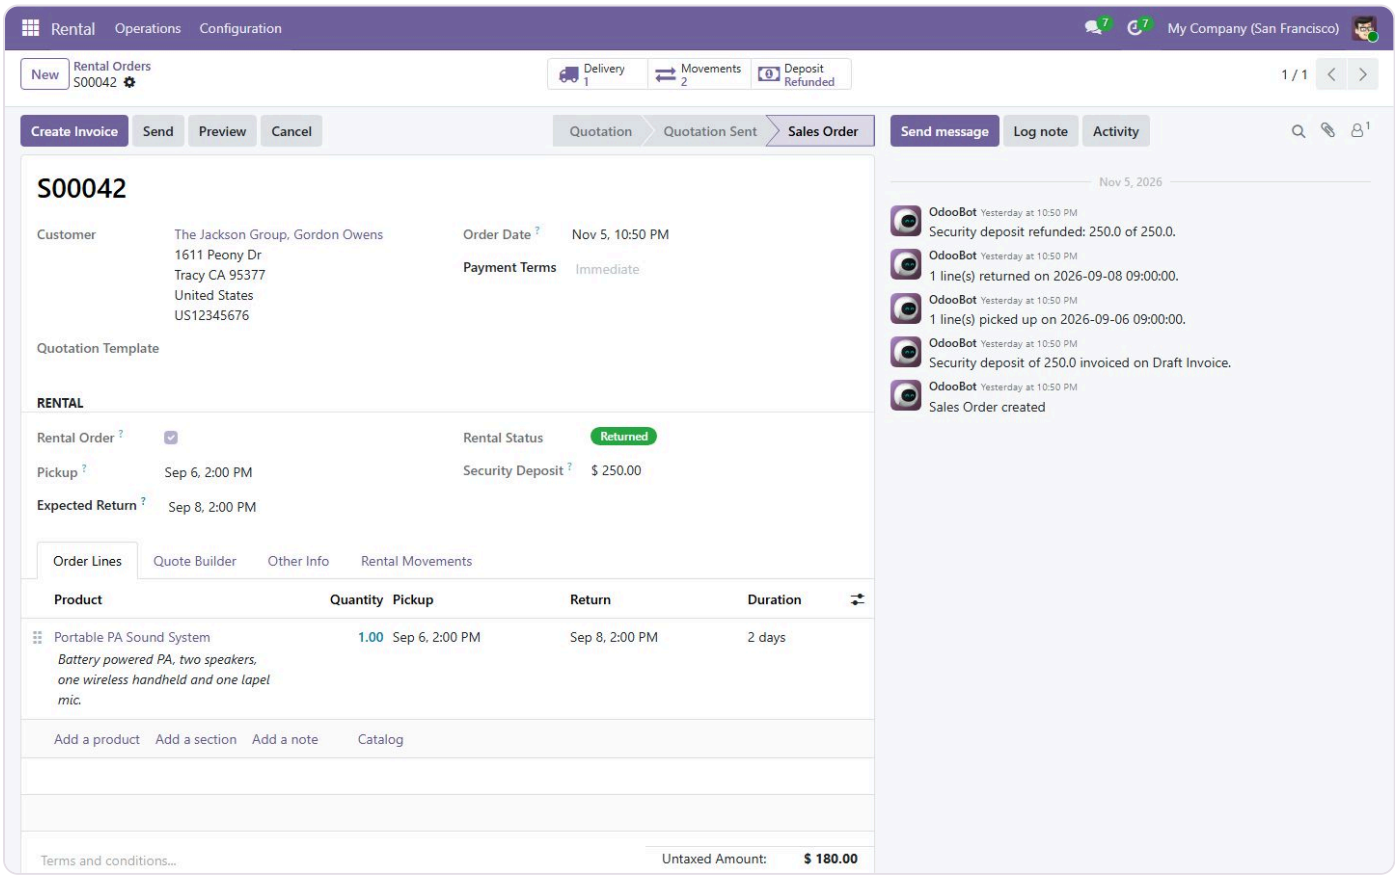

4 Partly returned

Some units back, some still out. The order stays overdue until everything is back.

5 Returned

Everything is back. A late charge is a line of its own on the order, and a second late return on the same line updates it rather than adding another.

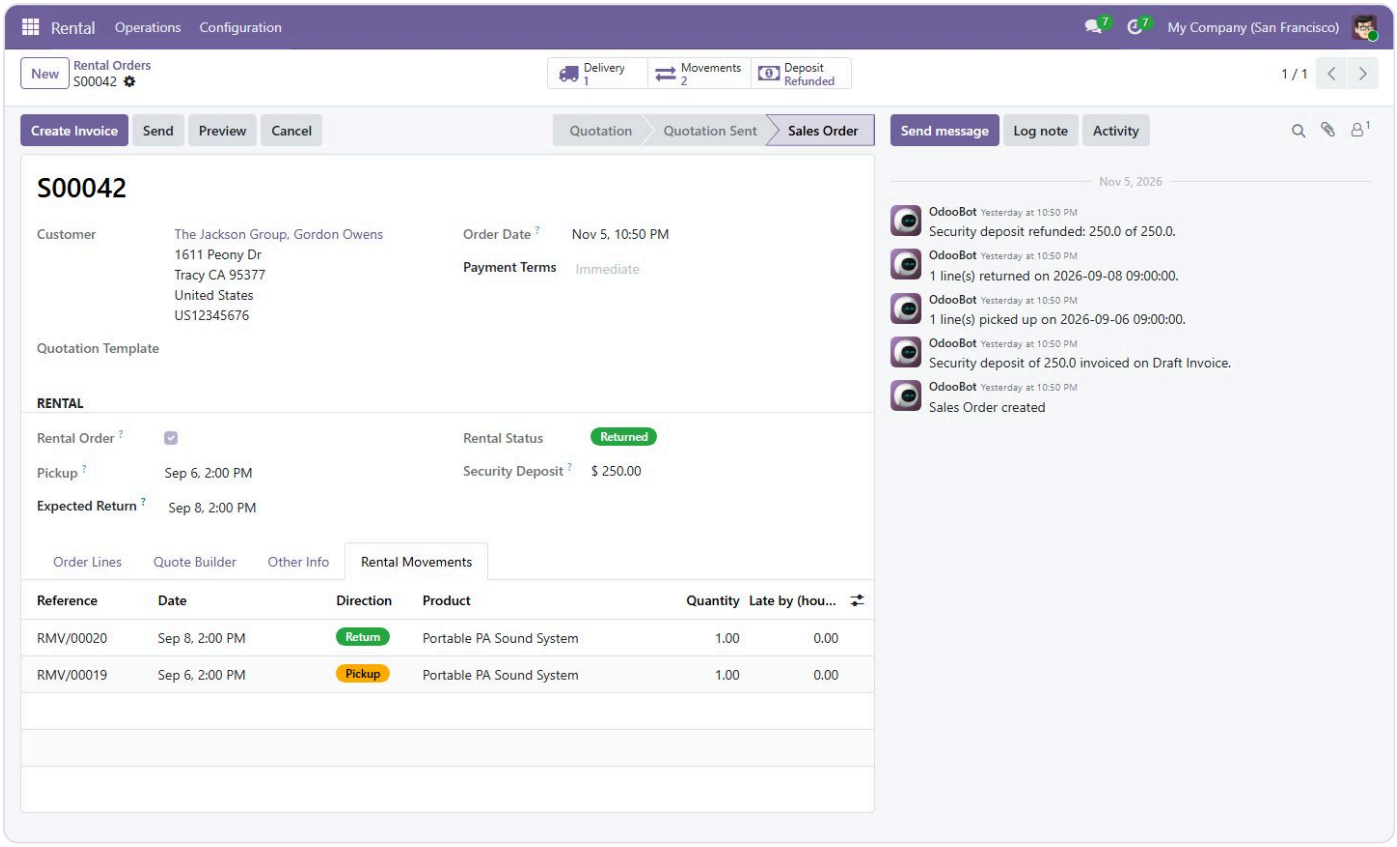

HOW IT WORKS

How a late charge is worked out

The hours late are priced on the product's own rate card, the cheapest single rate that covers them, times the units picked up, plus the product's Late Penalty percentage. Lateness is settled from the recorded return time, not from the clock.

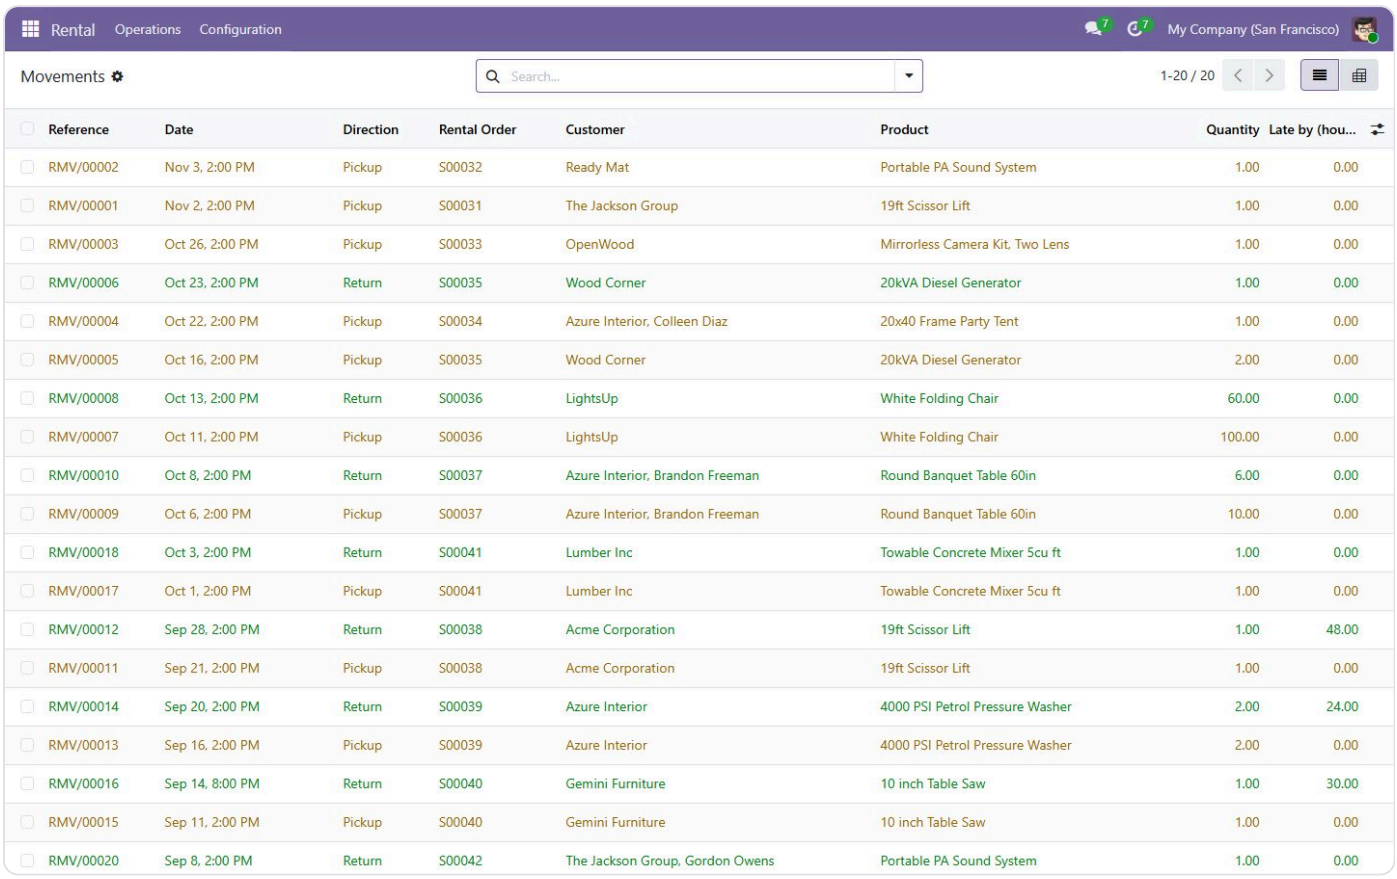

6 The Rental Movements tab

Every pickup and return on the order with its date, direction, product, quantity and hours late.

7 Operations, then Movements

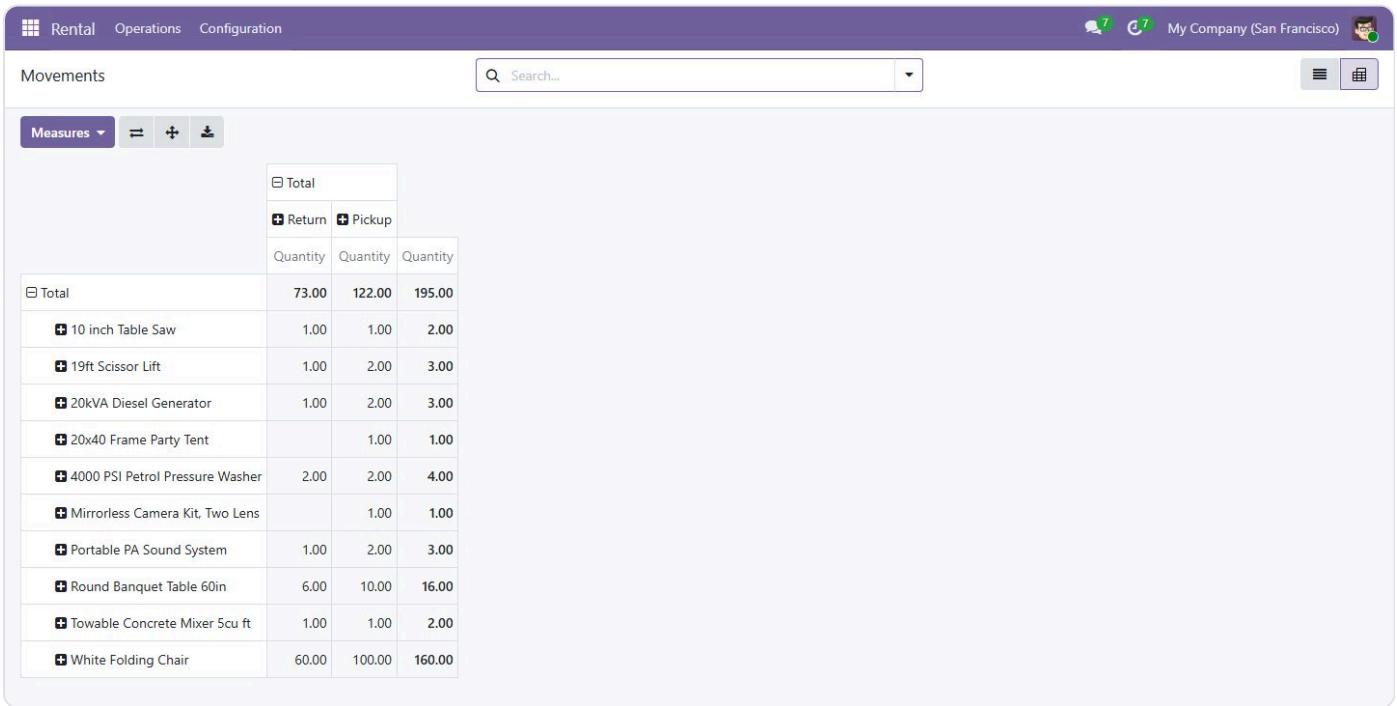

Every movement across the business, numbered RMV/00001 and up, with who handled it.

Reference	Date	Direction	Rental Order	Customer	Product	Quantity	Late by (hou...
RMV/00002	Nov 3, 2:00 PM	Pickup	S00032	Ready Mat	Portable PA Sound System	1.00	0.00

8 Movements as a pivot

Units out and back by product or customer.

	Total		
	Return	Pickup	
	Quantity	Quantity	Quantity
Total	73.00	122.00	195.00
10 inch Table Saw	1.00	1.00	2.00
19ft Scissor Lift	1.00	2.00	3.00
20kVA Diesel Generator	1.00	2.00	3.00
20x40 Frame Party Tent		1.00	1.00
4000 PSI Petrol Pressure Washer	2.00	2.00	4.00
Mirrorless Camera Kit, Two Lens		1.00	1.00
Portable PA Sound System	1.00	2.00	3.00
Round Banquet Table 60in	6.00	10.00	16.00
Towable Concrete Mixer 5cu ft	1.00	1.00	2.00
White Folding Chair	60.00	100.00	160.00

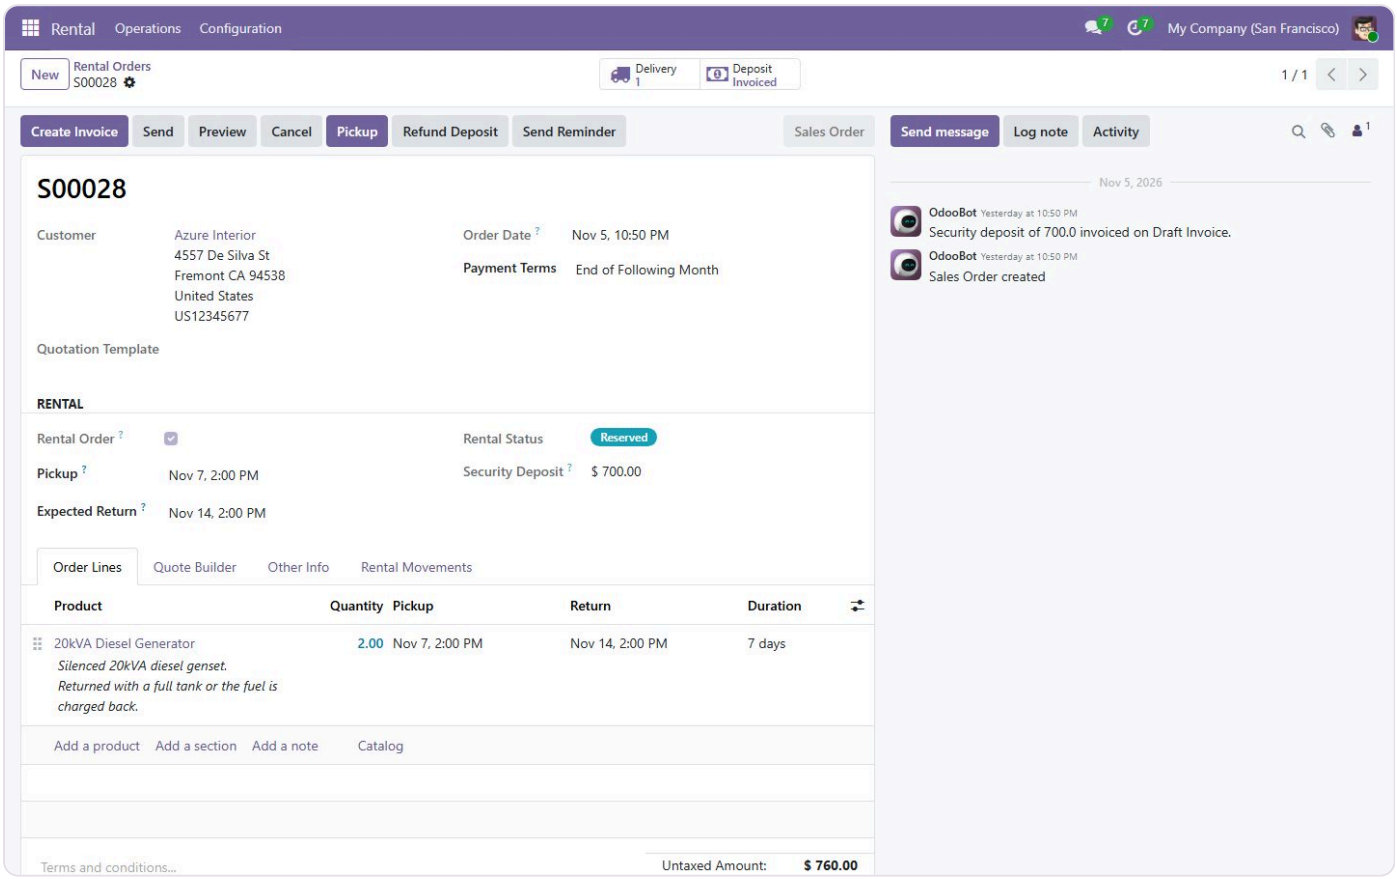

> You cannot pick up more than is left to collect or return more than is out. Pickup and return are recorded on the rental; they do not create stock moves in Inventory.

PART 6 Security deposits RENTAL MANAGEMENT

A deposit is not revenue, so it is invoiced on its own and refunded on its own, never mixed into the hire charge.

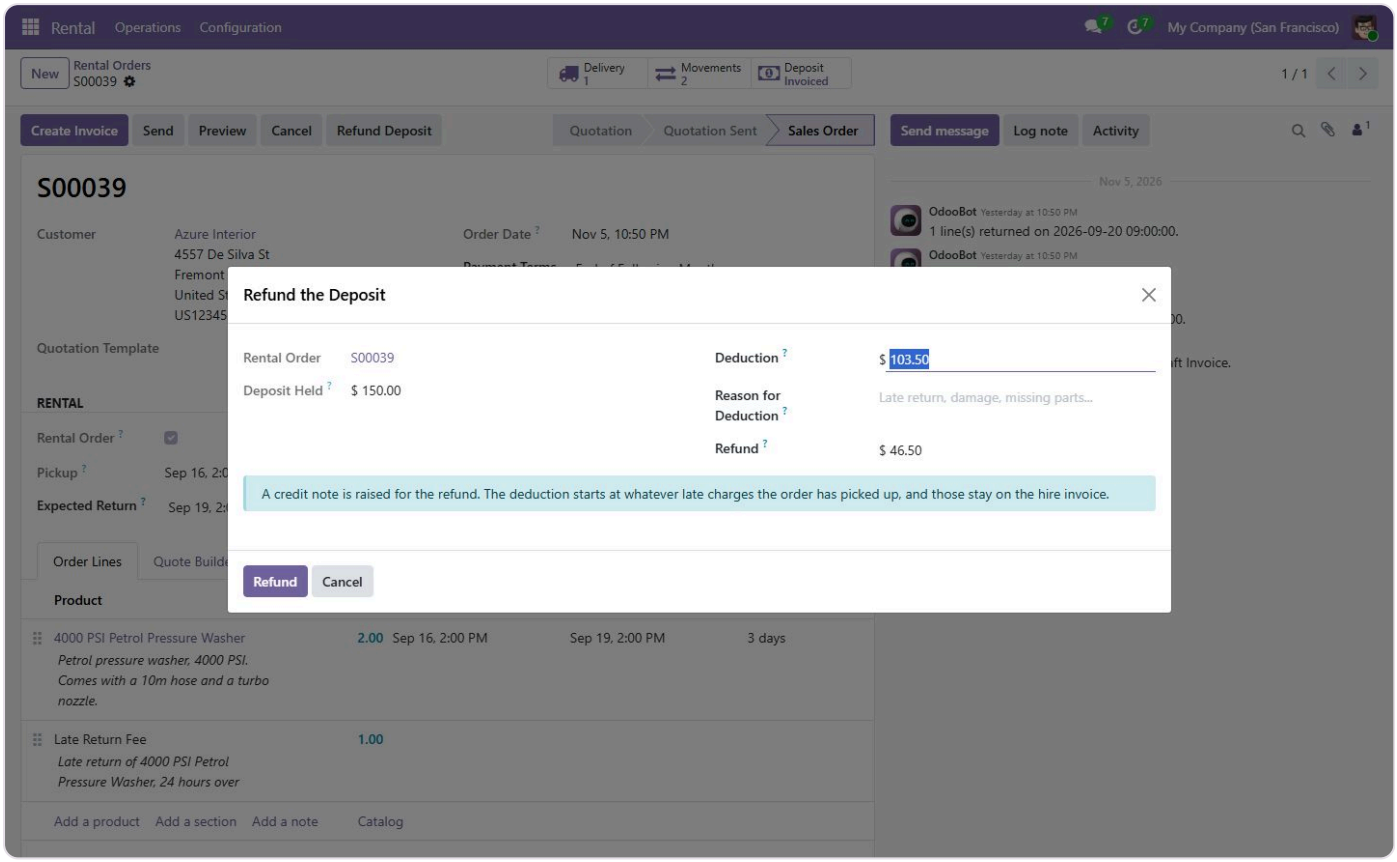

1 Invoice Deposit

On a confirmed order with a deposit, this raises a separate customer invoice for the deposit, without tax, on the Security Deposit product. The Deposit button opens it and the deposit shows as Invoiced.

2 Refund Deposit

Once the goods are back, the refund form shows the deposit held. The deduction starts at the late charges the order has picked up; change it and give a reason for damage or missing parts. Refund raises a credit note for the rest, and the deposit shows as Refunded.

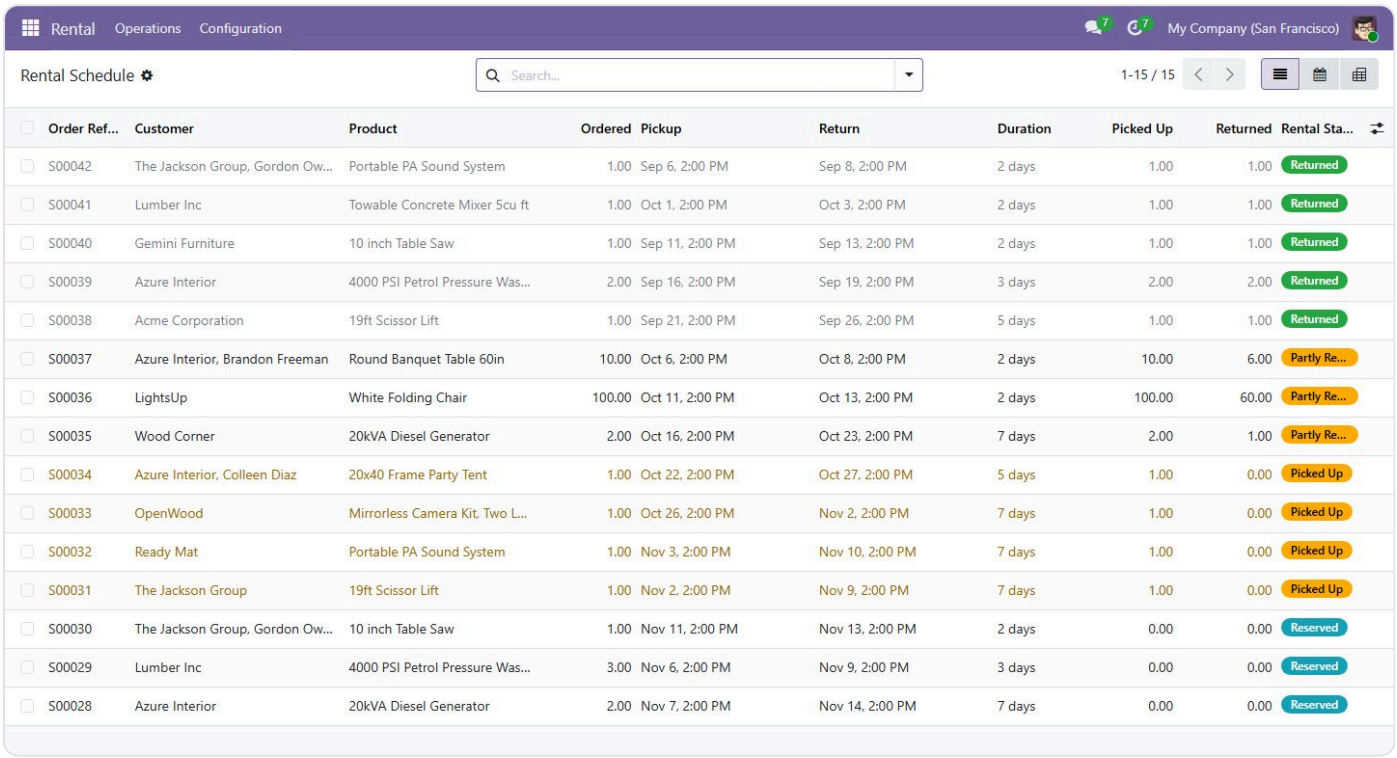

A deposit can be invoiced once and refunded once, only on a confirmed order, and the refund can never be more than was taken.

PART 7 The schedule, availability and reminders RENTAL MANAGEMENT

Three screens answer the question the counter is asked all day: is one free?

1 Operations, then Schedule

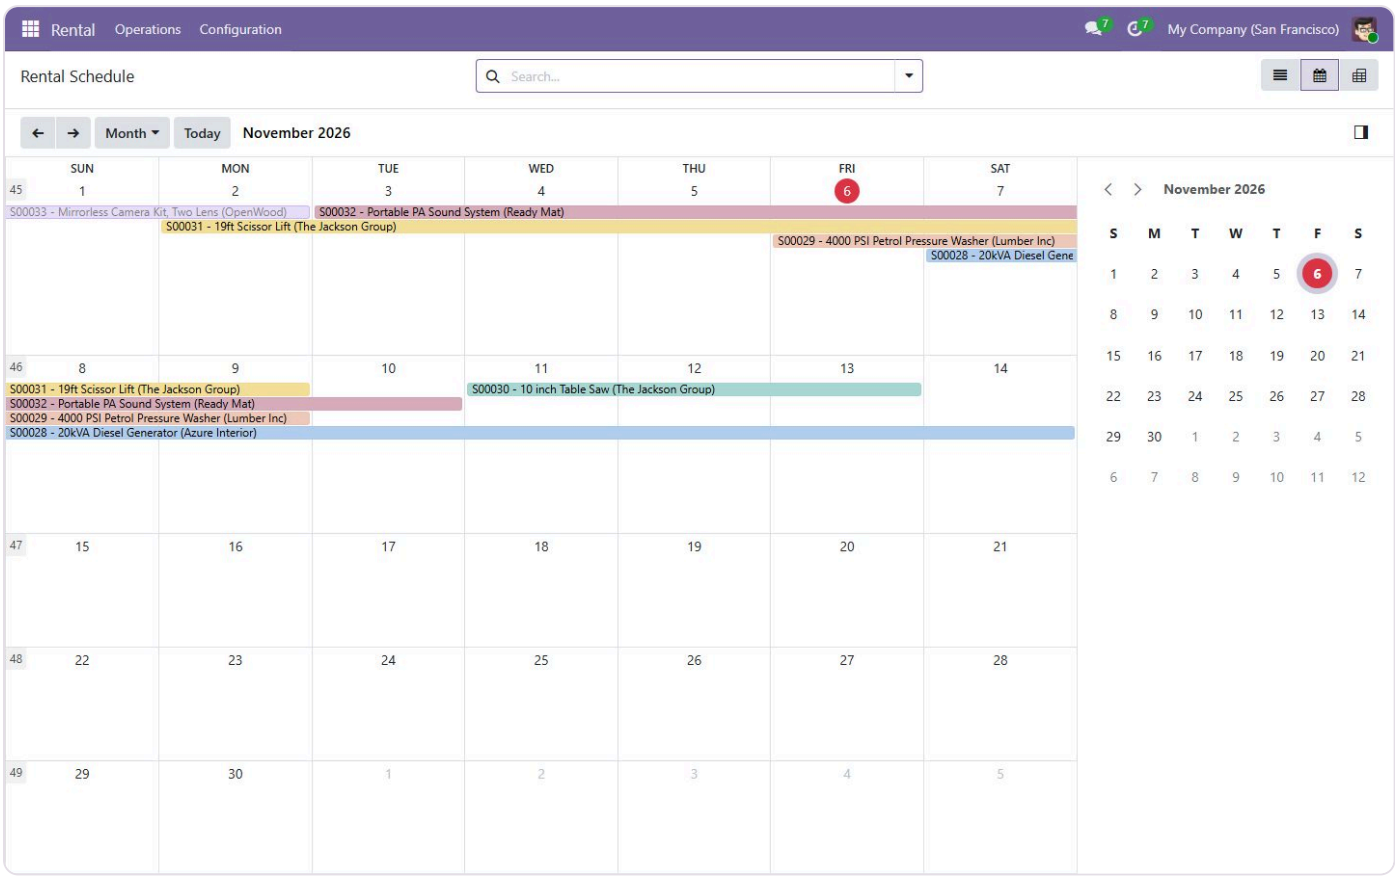

Every confirmed rental line: order, customer, product, quantity, pickup, return, duration, picked up, returned and status.

2 The calendar

Every hire drawn from pickup to return.

3 The pivot

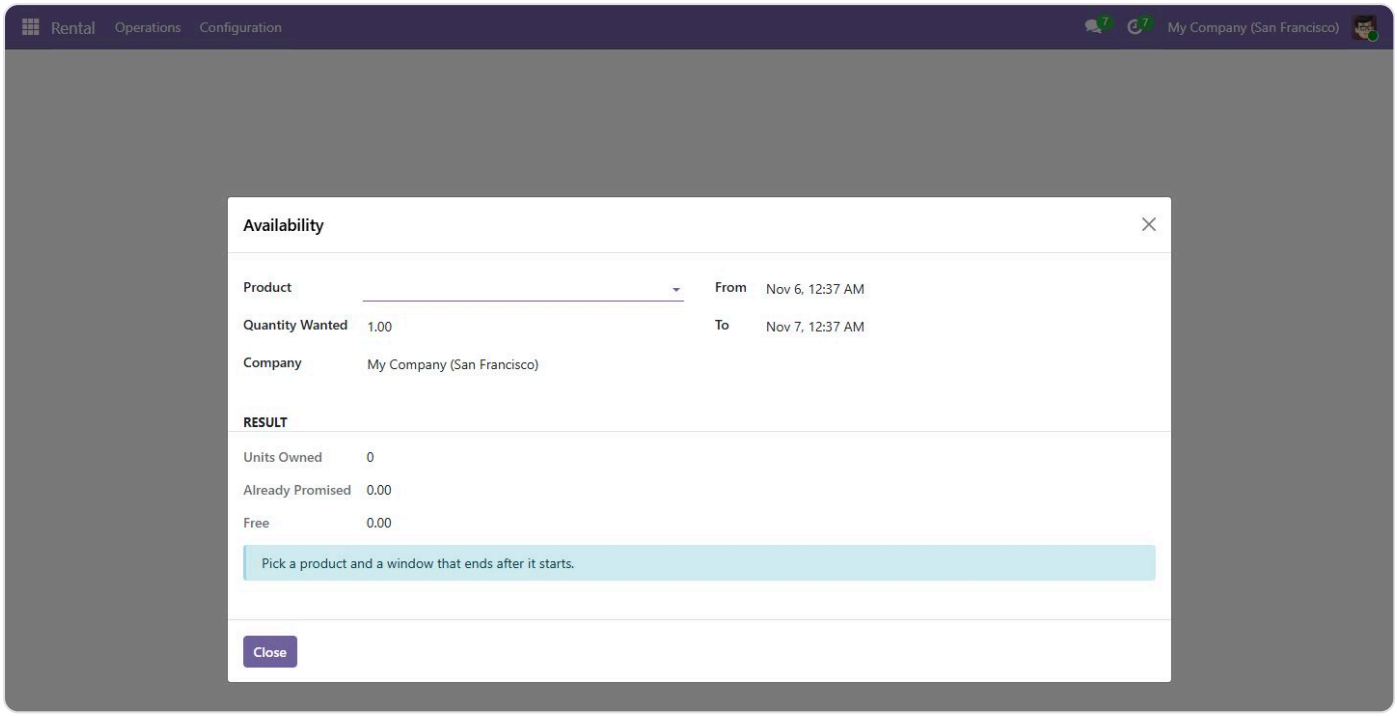

Units and amounts by product or month.

	Total		
	Quantity	Subtotal	Late Charge
Total	128.00	$ 5,735.00	$ 528.50
10 inch Table Saw	2.00	$ 140.00	$ 77.00
19ft Scissor Lift	2.00	$ 1,160.00	$ 348.00
20kVA Diesel Generator	4.00	$ 1,520.00	$ 0.00
20x40 Frame Party Tent	1.00	$ 900.00	$ 0.00
4000 PSI Petrol Pressure Washer	5.00	$ 675.00	$ 103.50
Mirrorless Camera Kit, Two Lens	1.00	$ 260.00	$ 0.00
Portable PA Sound System	2.00	$ 500.00	$ 0.00
Round Banquet Table 60in	10.00	$ 160.00	$ 0.00
Towable Concrete Mixer 5cu ft	1.00	$ 120.00	$ 0.00
White Folding Chair	100.00	$ 300.00	$ 0.00

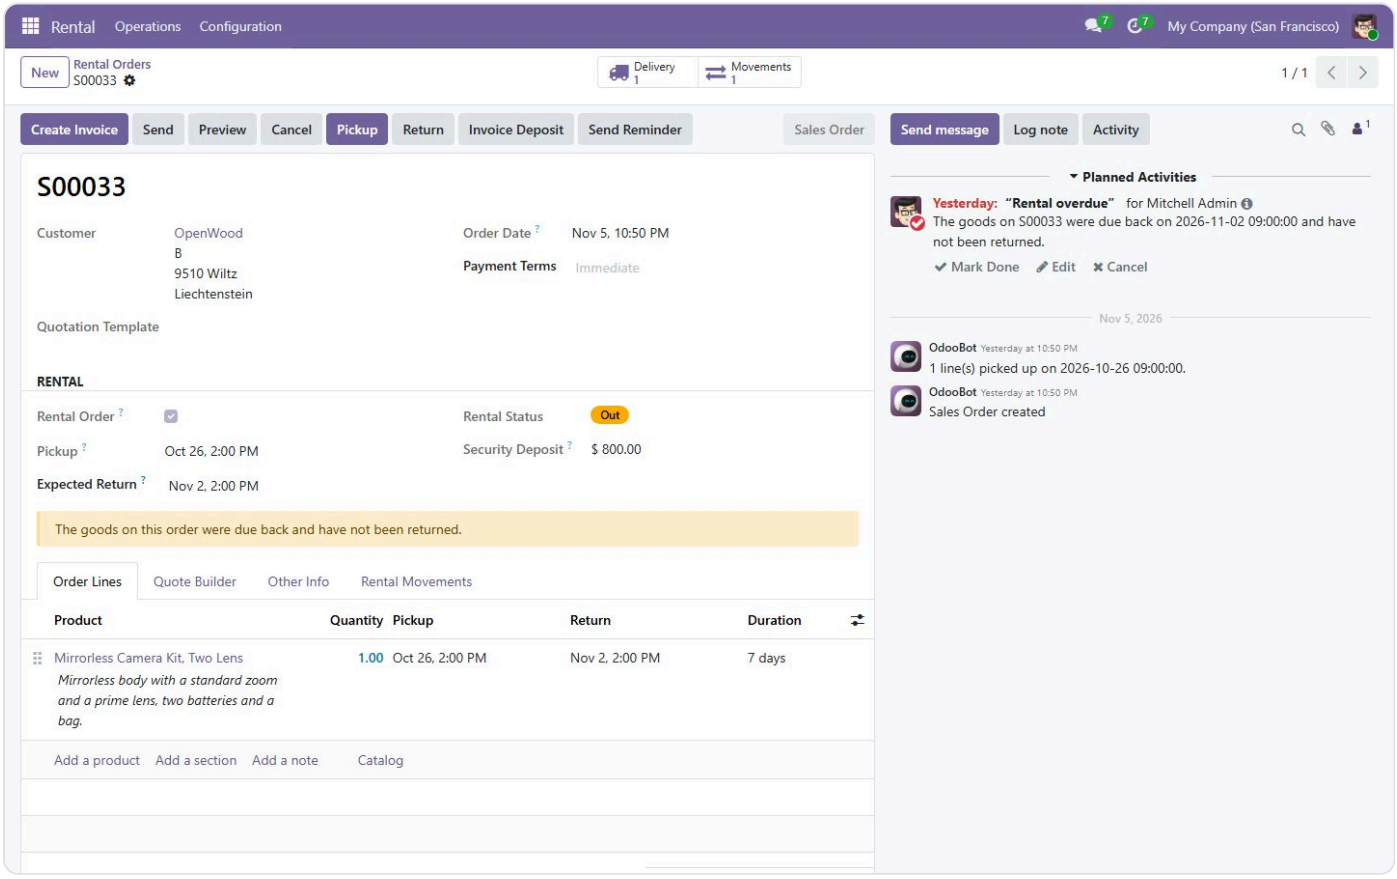

4 Operations, then Availability

Pick a product, a window and a quantity. The form shows the units owned, already promised and free, whether there are enough, and the orders holding them. Nothing is booked.

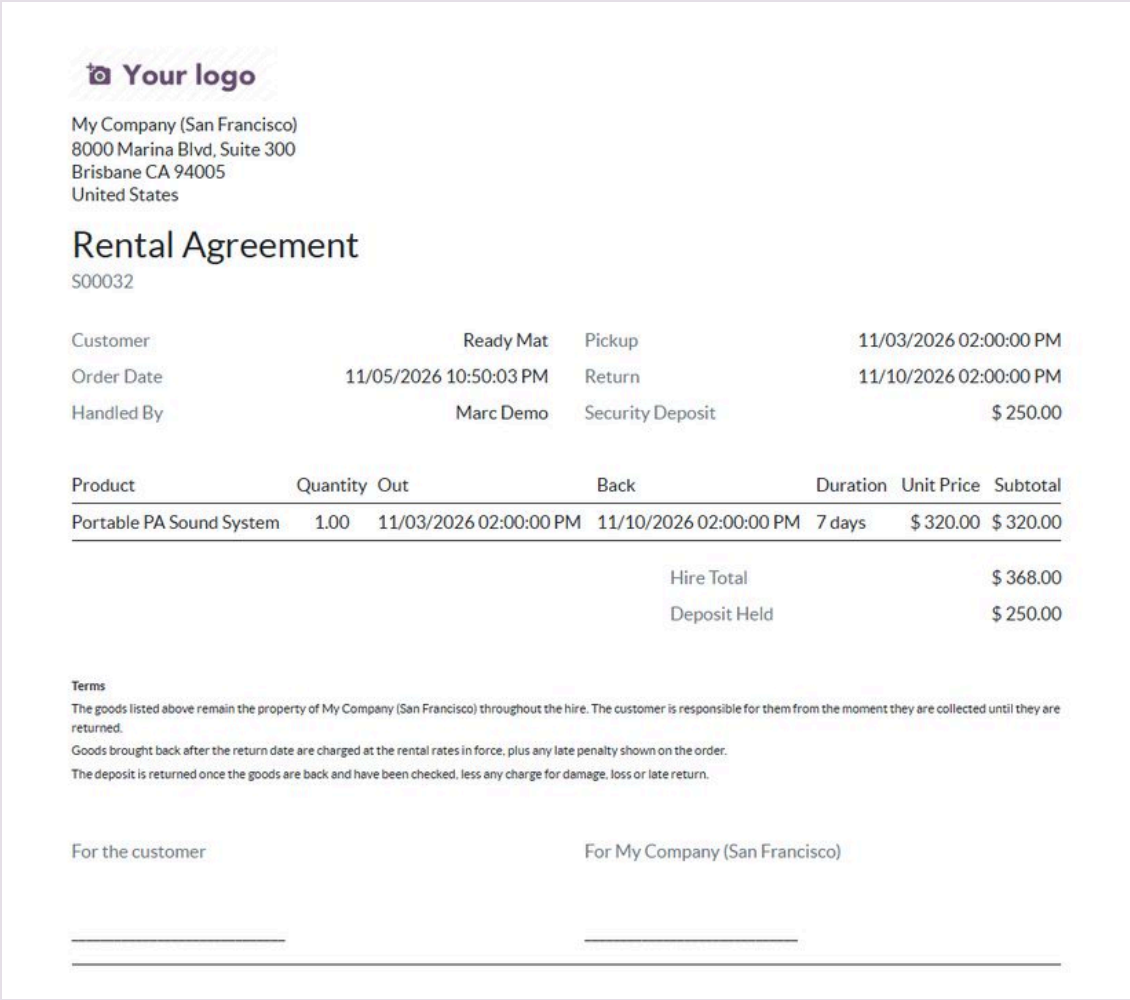

5 Overdue orders

Every night **Rental: flag overdue returns** marks orders whose return time has passed with goods still out, and raises one Rental overdue to-do for the salesperson. The flag clears when everything is back.

Send Reminder on a rental order emails the customer the **Rental: return reminder** template and notes it on the order. Print the **Rental Agreement** from the order's Print menu: customer, dates, each product with quantity, out, back,

duration, price and the terms.

Terms

The goods listed above remain the property of My Company (San Francisco) throughout the hire. The customer is responsible for them from the moment they are collected until they are returned.

Goods brought back after the return date are charged at the rental rates in force, plus any late penalty shown on the order.

The deposit is returned once the goods are back and have been checked, less any charge for damage, loss or late return.

For the customer

For My Company (San Francisco)

The rental agreement.

PART 8 Setting up the online shop ONLINE RENTAL SHOP

One settings record per website decides how the booking form behaves: default times, notice, the shortest and longest hire, how long a cart holds a unit, and how deposits and rates work.

IN THIS PART YOU WILL LEARN

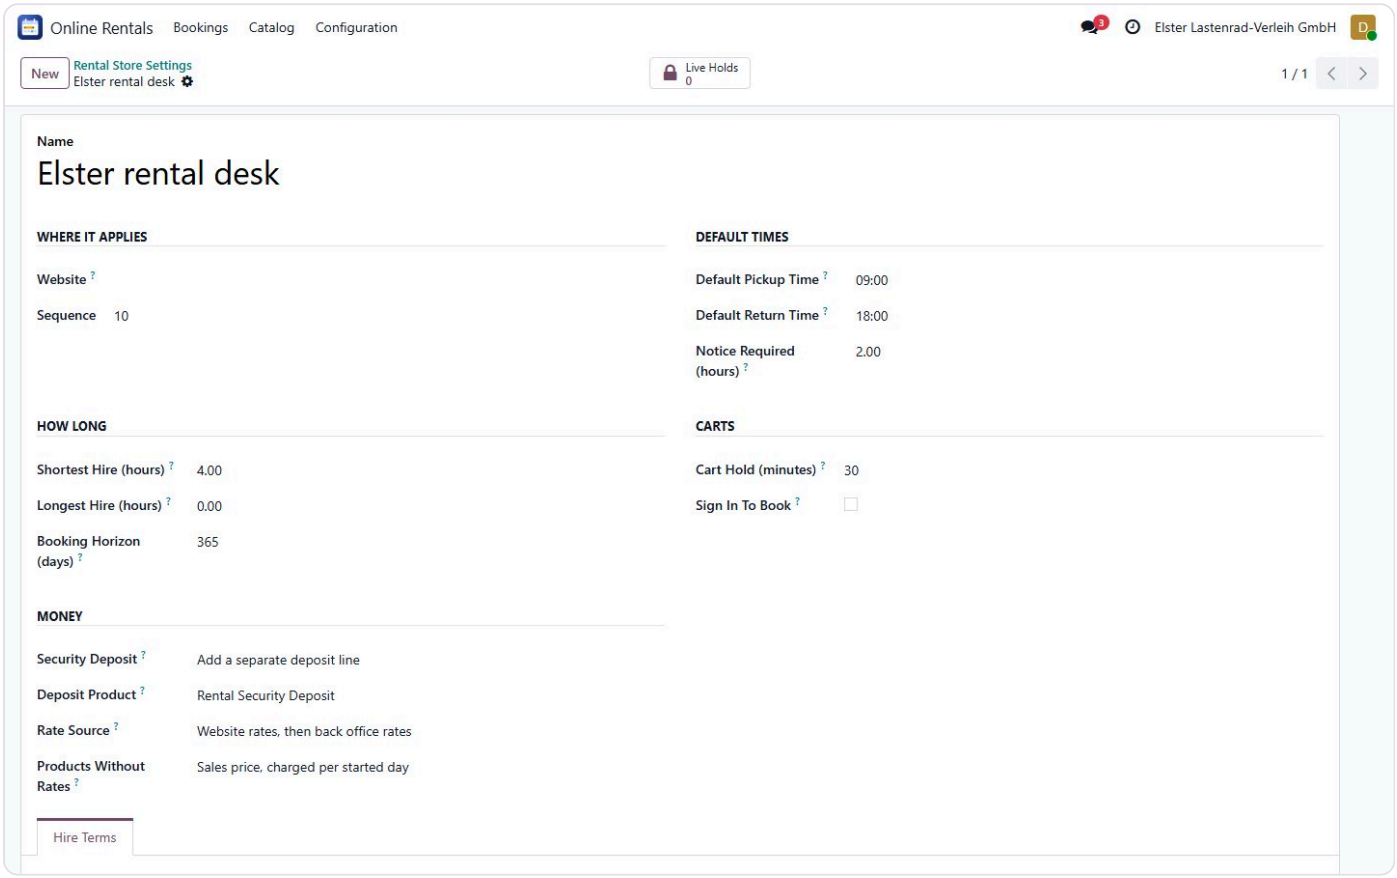

- Every Rental Store setting
- Products offered online and their rate cards
- Blackouts for servicing and events

TRY IT YOURSELF ON THE DEMO

1. Online Rentals, then Configuration, then Rental Store
2. Online Rentals, then Catalog, then Rentable Products: open the Long John bike

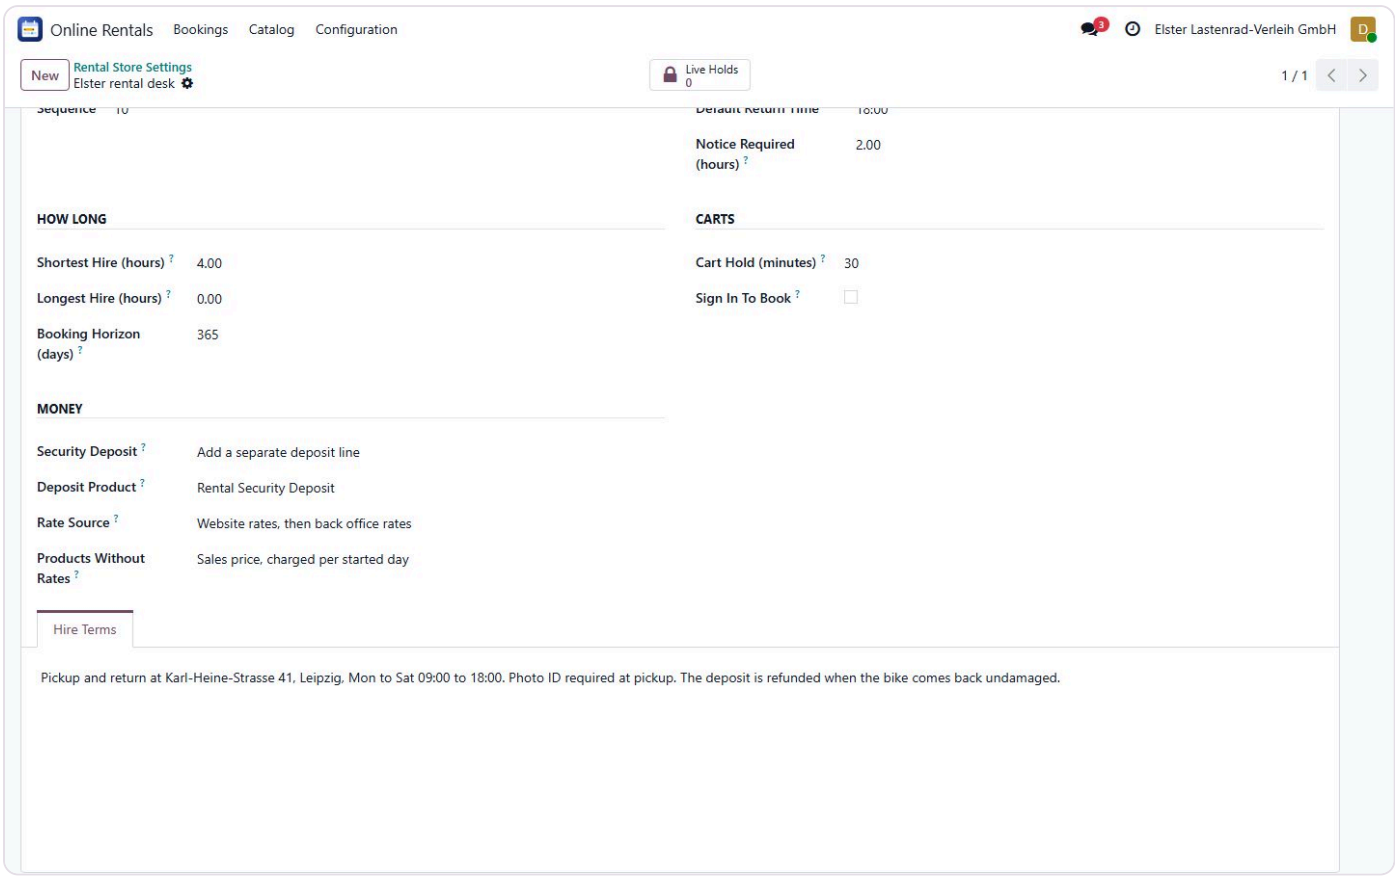

1 Configuration, then Rental Store

The settings for the website. A website with no record uses the shipped defaults shown below.

2 The Hire Terms tab

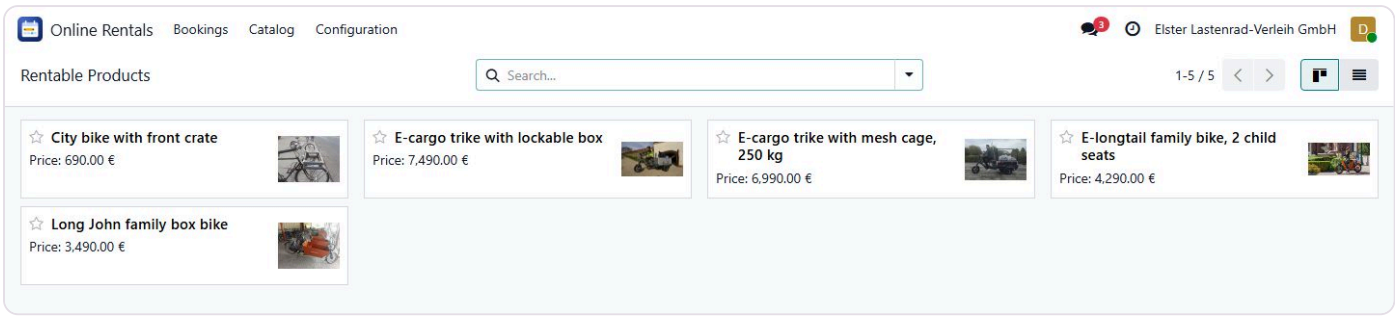

The terms printed under the booking form and on the booking sheet.

SETTING	WHAT IT DOES	DEFAULT
Default Pickup Time, Return Time	Used when a date is picked without a time	09:00, 17:00
Notice Required (hours)	How far ahead of now the earliest pickup can be	2
Shortest Hire, Longest Hire (hours)	A booking outside these is refused. 0 means no limit. A product can set its own	24, none
Booking Horizon (days)	How far ahead bookings are open	365
Cart Hold (minutes)	How long a unit in a cart stays held before it lapses	60
Security Deposit	None, or a separate deposit line on the order	Line
Deposit Product	The product deposit lines are written against	Rental Security Deposit
Rate Source	Website rates first, or Rental Management rates first, when both exist	Website first
Products Without Rates	Charge the sales price per started day, or offer no price	Sales price
Sign In To Book	Visitors must sign in before a hire goes in the cart	Off

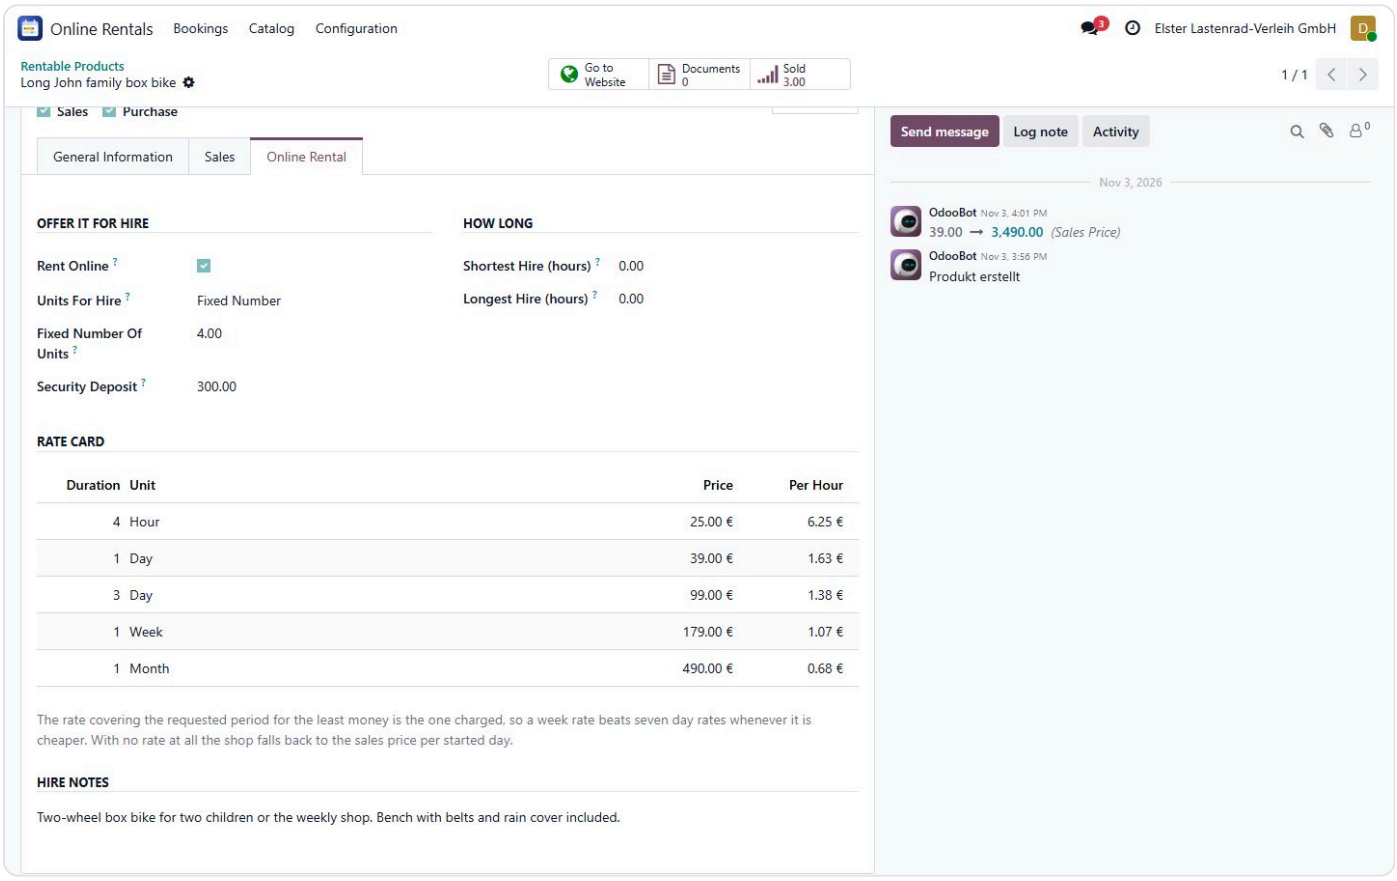

3 Catalog, then Rentable Products

Products ticked Rent Online.

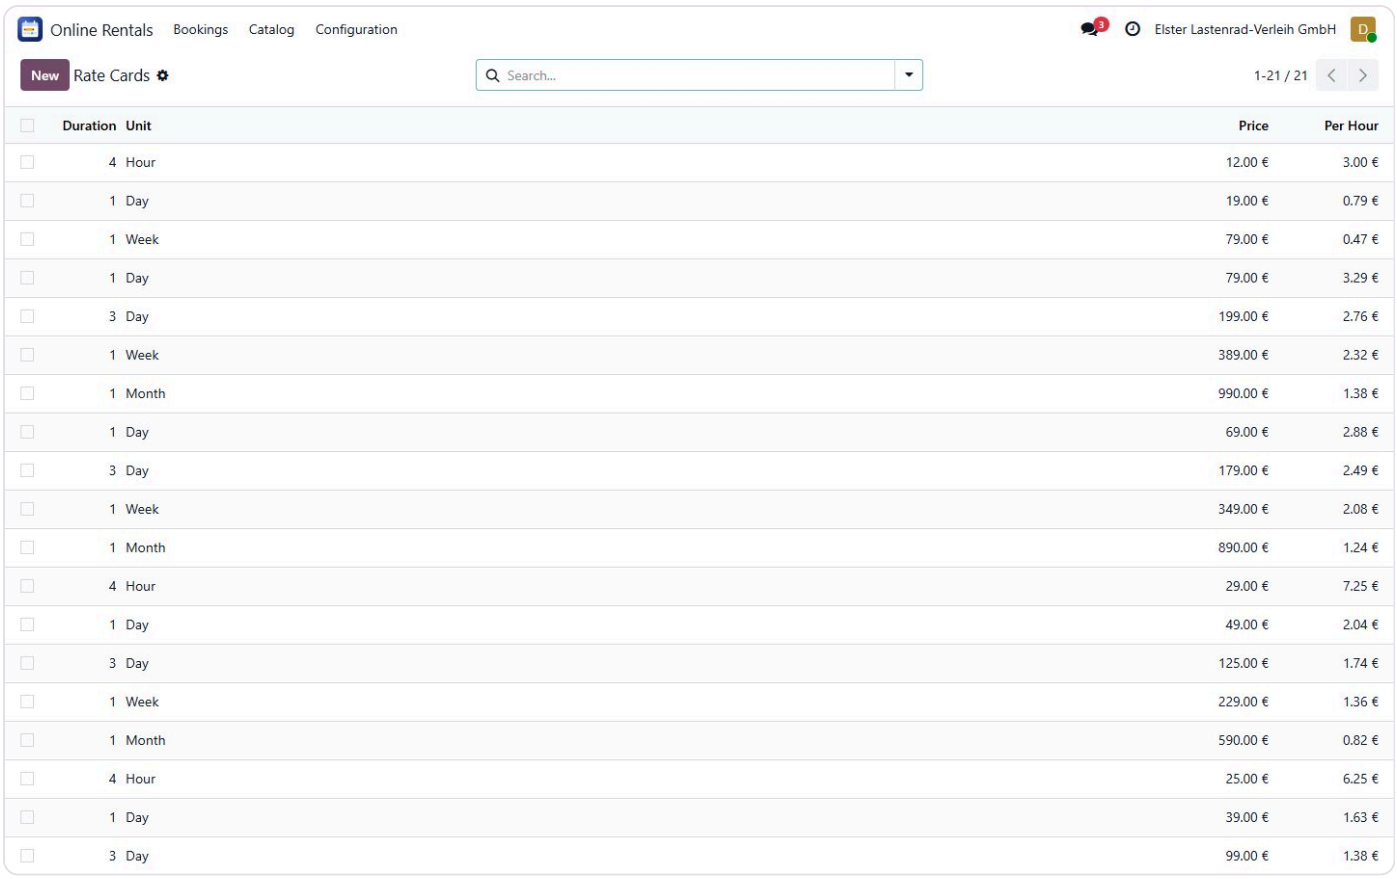

4 The Online Rental tab

Tick Rent Online. Units For Hire is a fixed number or the quantity on hand. Set the security deposit, the shortest and longest hire for this product, the hire notes shown on the booking page, and the rate rows. Live Holds counts what carts and bookings are holding right now.

5 Catalog, then Rate Cards

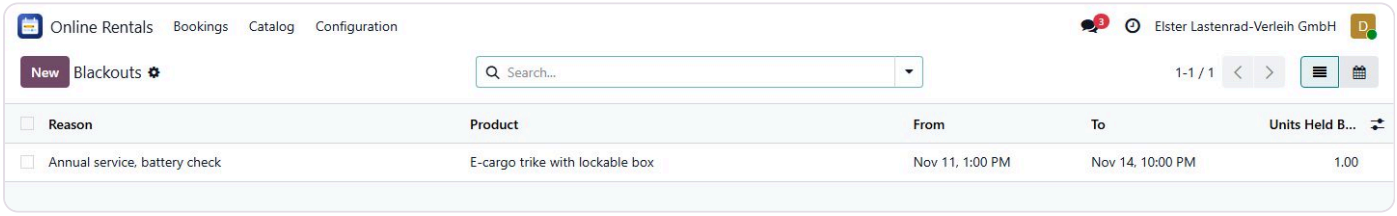

Every website rate row across the products.

Duration	Unit	Price	Per Hour
4	Hour	12.00 €	3.00 €
1	Day	19.00 €	0.79 €
1	Week	79.00 €	0.47 €
1	Day	79.00 €	3.29 €
3	Day	199.00 €	2.76 €
1	Week	389.00 €	2.32 €
1	Month	990.00 €	1.38 €
1	Day	69.00 €	2.88 €

1	Day	39.00 €	1.63 €
3	Day	99.00 €	1.38 €

6 Configuration, then Blackouts

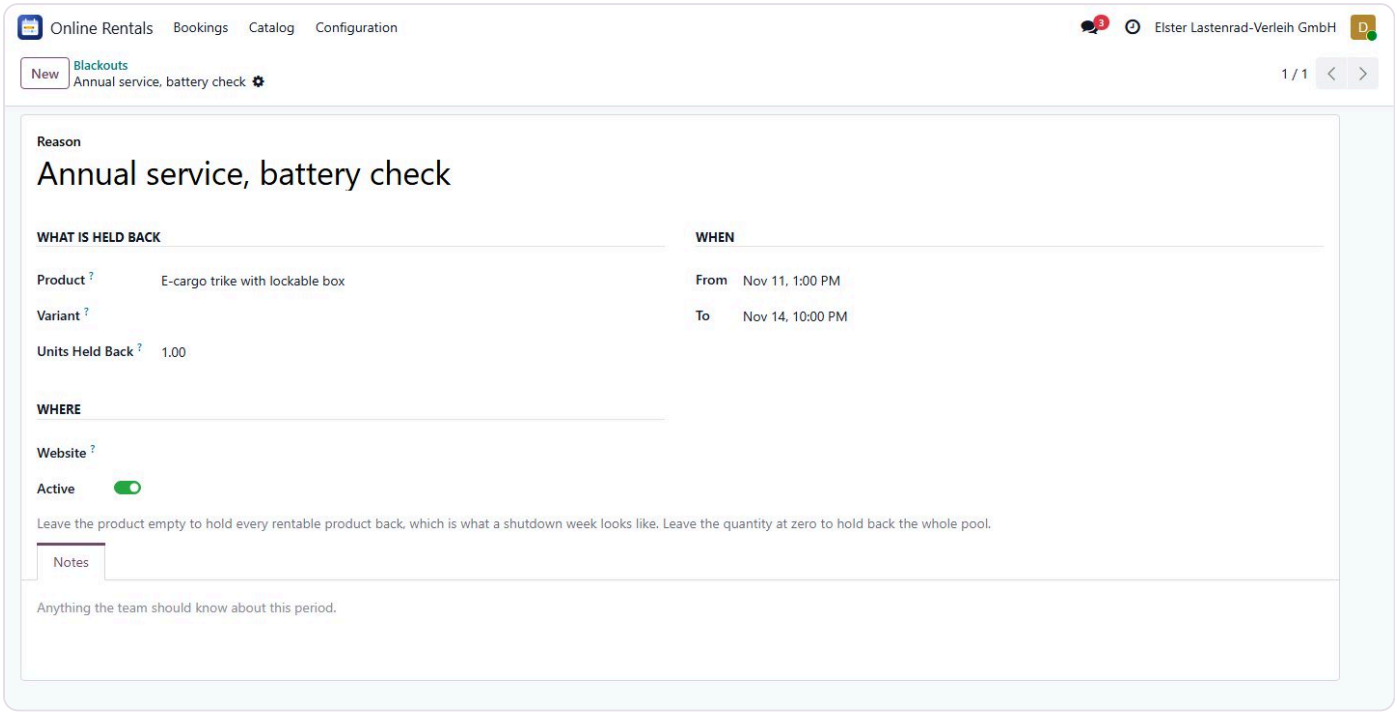

Units held back from sale for a window: a service day, an event, a repair.

Reason	Product	From	To	Units Held B...
Annual service, battery check	E-cargo trike with lockable box	Nov 11, 1:00 PM	Nov 14, 10:00 PM	1.00

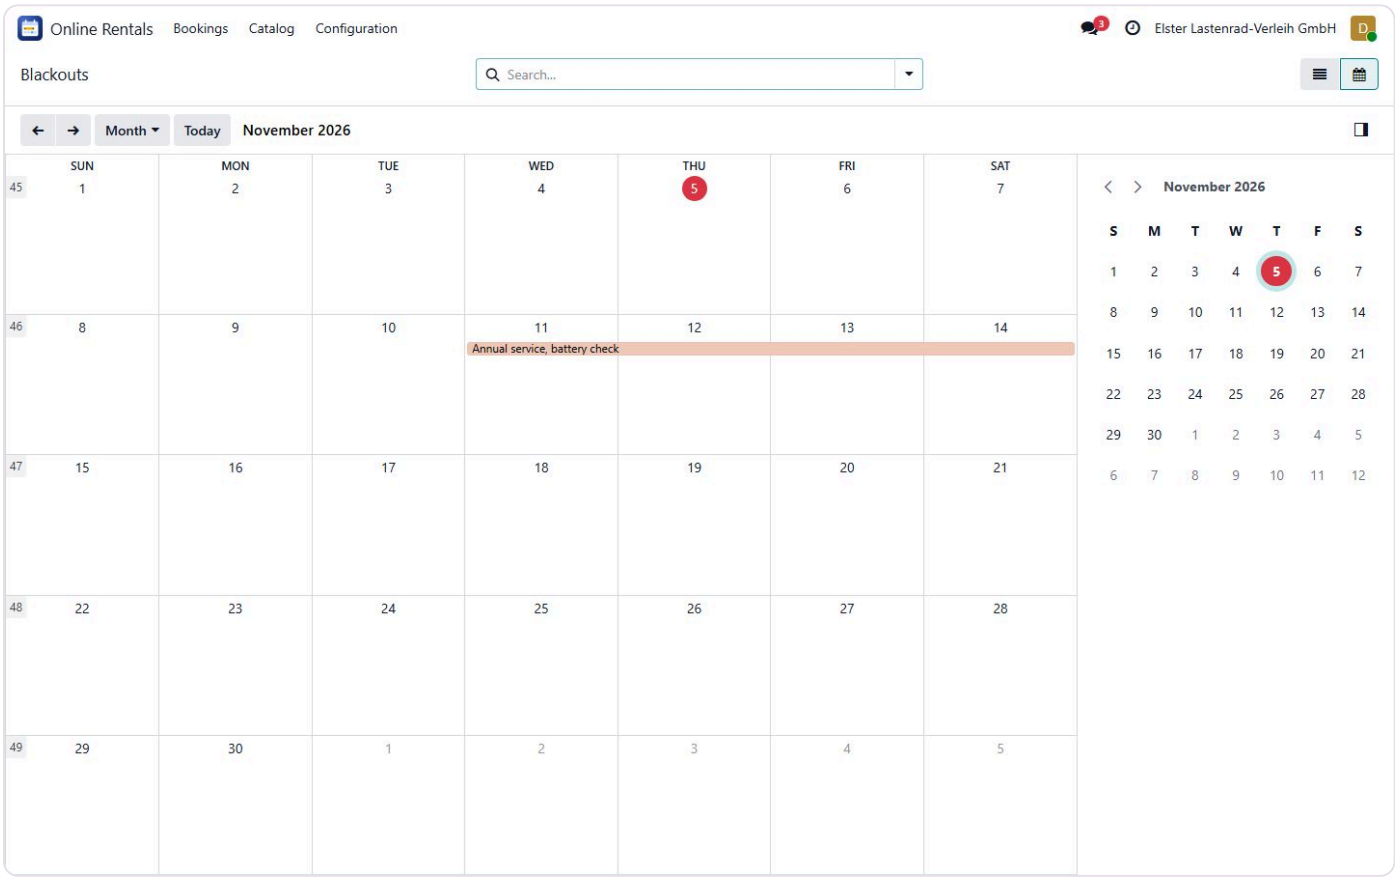

7 Open a blackout

A reason, the product or one variant, the window, the number of units held back, optionally one website, and notes. Those units are taken off availability for that window.

8 The blackout calendar

Blackouts across the month, for planning a service round around the bookings.

PART 9 What the customer sees ONLINE RENTAL SHOP

A hire product shows a Hire this item panel on its shop page. The booking page takes the dates, shows the rate card and the price, and says how many are free before anything goes in the cart.

IN THIS PART YOU WILL LEARN

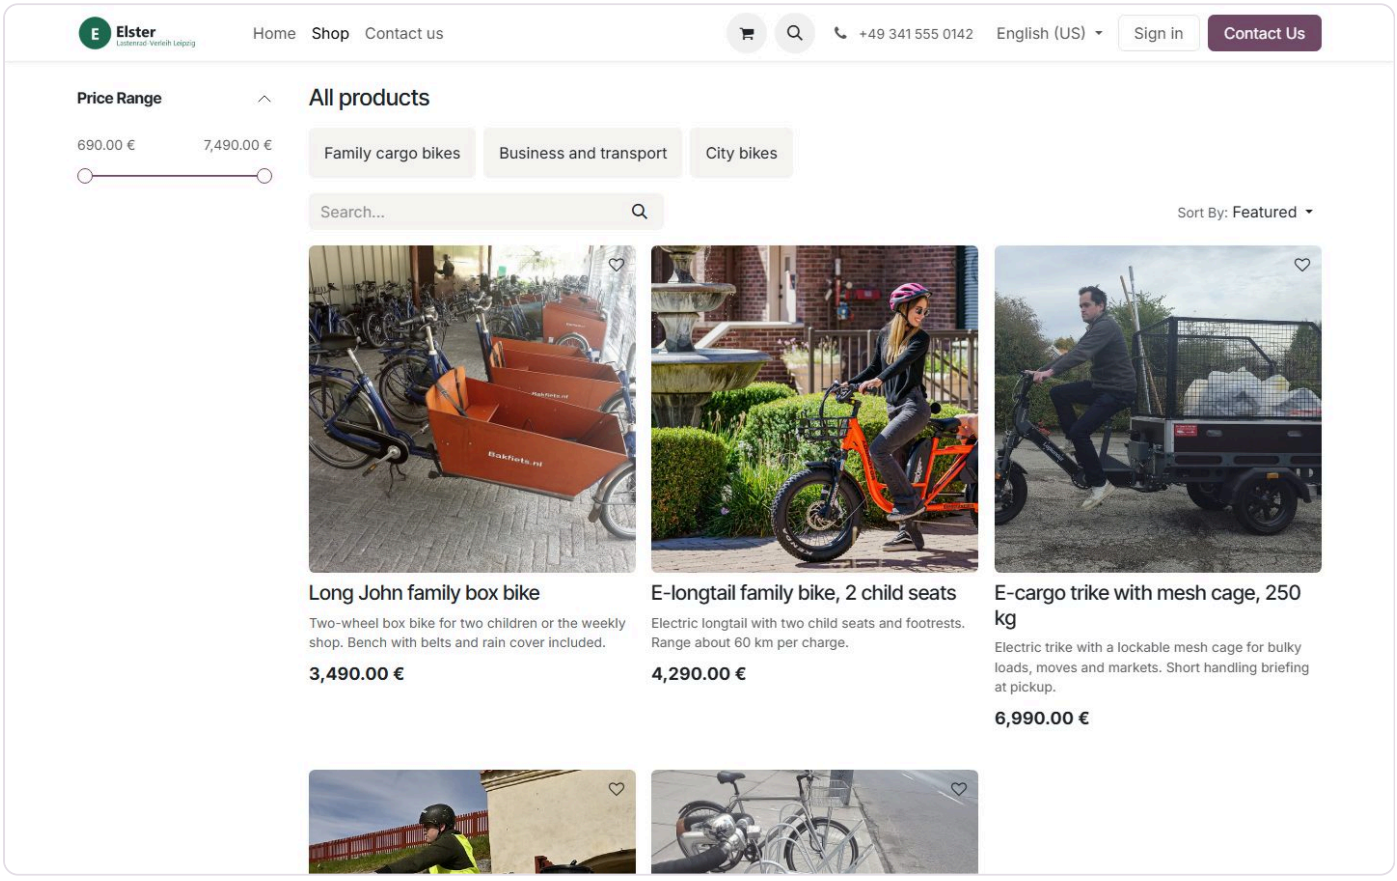

- The shop and the product page
- The booking page and the price breakdown
- The checks on the dates
- The same pages on a phone

TRY IT YOURSELF ON THE DEMO

1. Open rental-demo.way4tech.com/shop as a visitor
2. Open the Long John family box bike and press Check dates and price

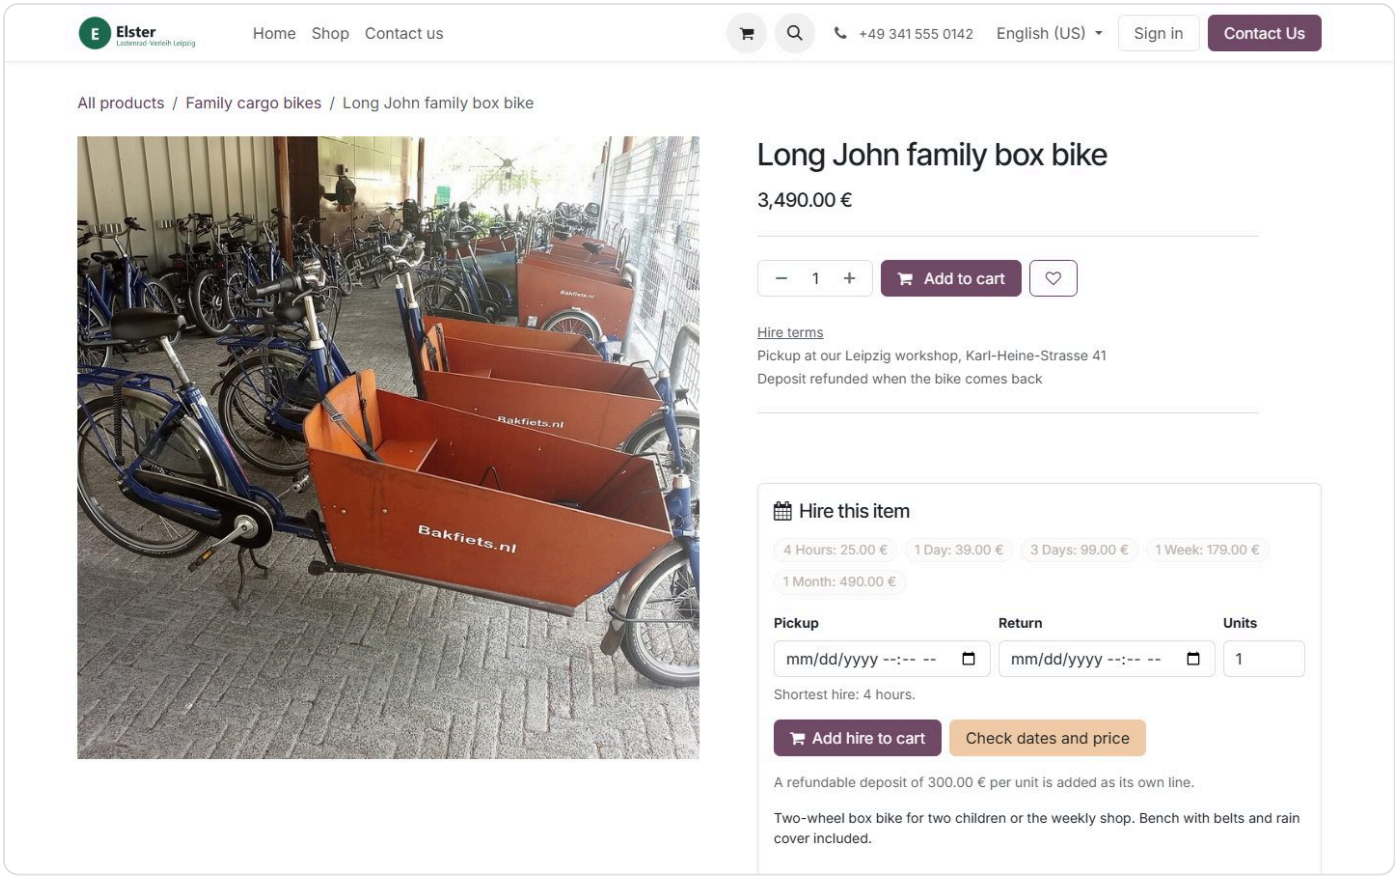

1 The shop

Hire products sit in the shop like any other, with their photo and sales price.

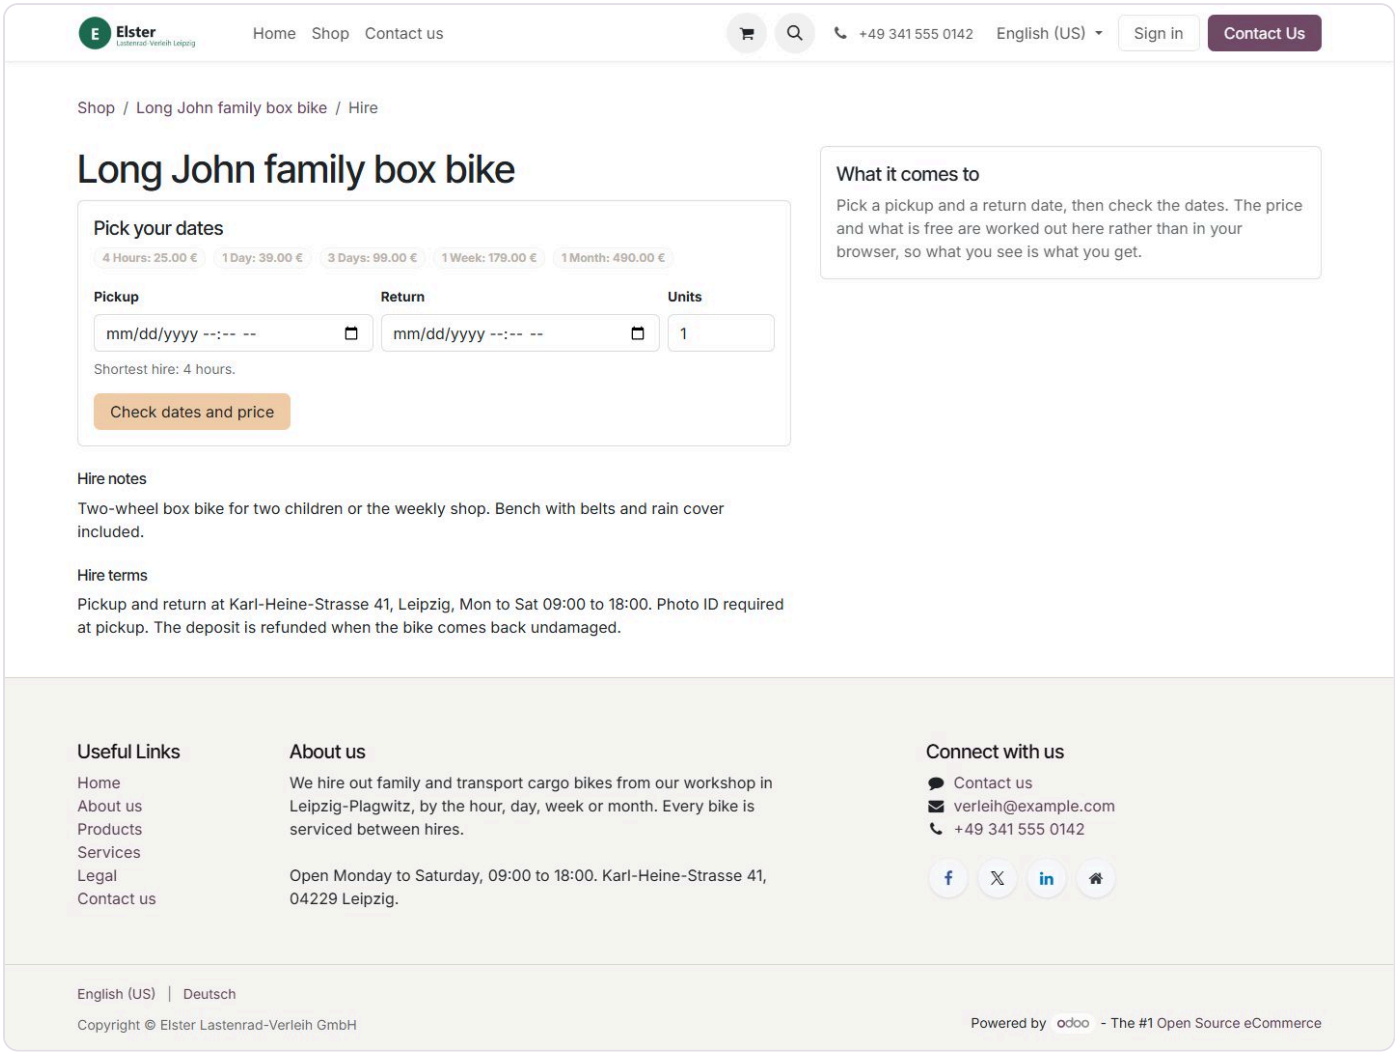

2 The product page

Under the normal Add to cart, the Hire this item panel shows the rate card as badges, a pickup and a return picker and the number of units. A product that is also sold can be bought or hired from the same page.

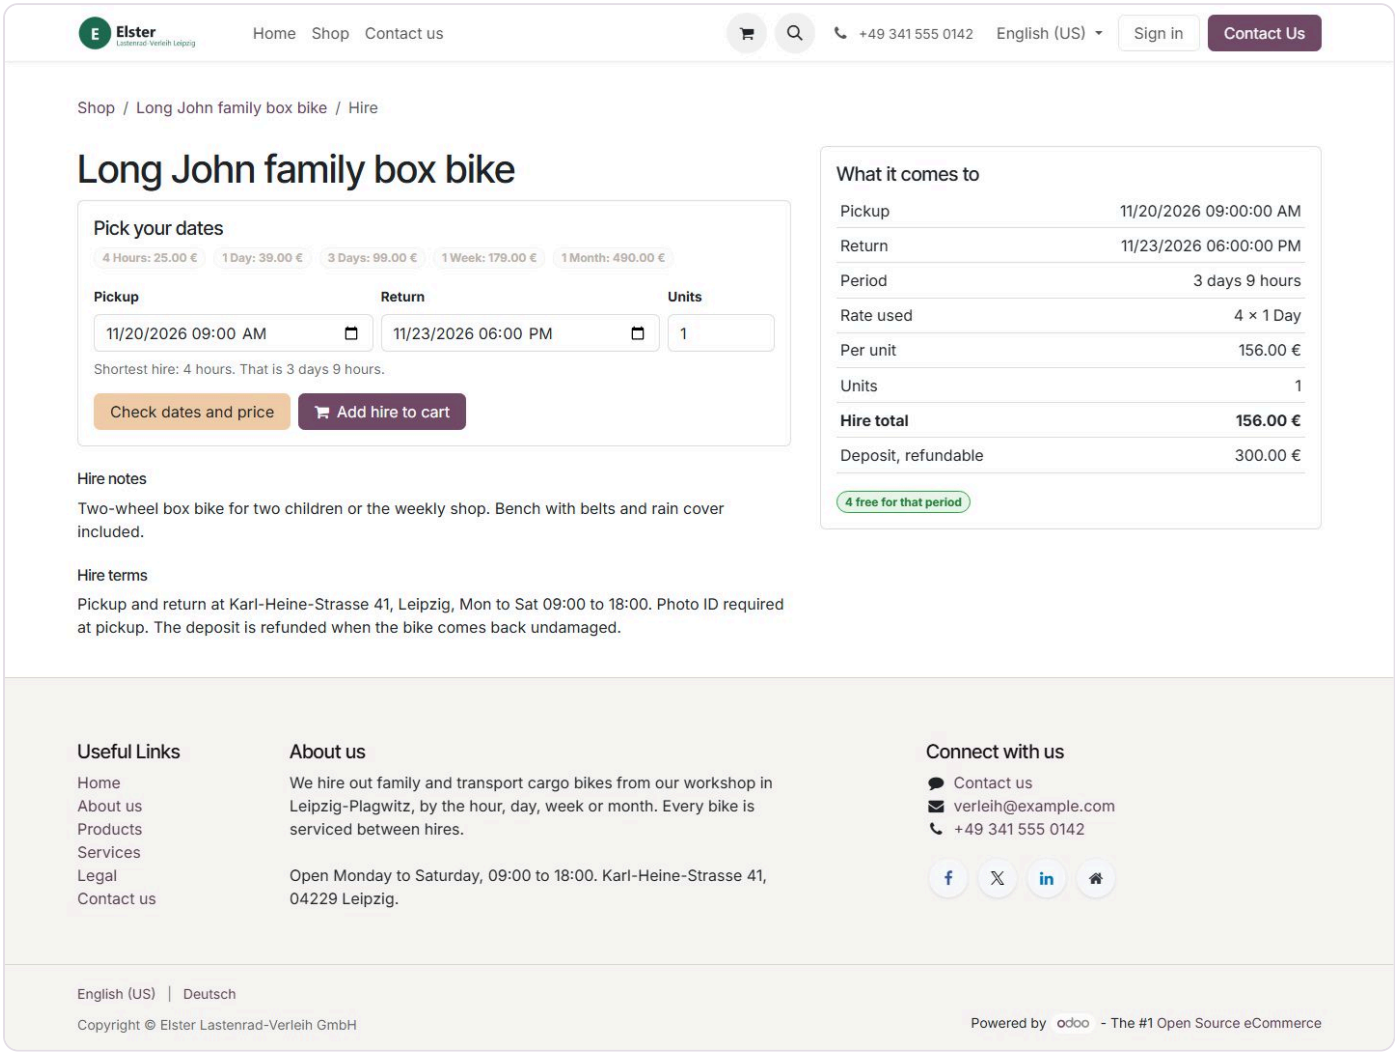

3 The booking page

Pick your dates: the rate card, pickup, return and units, the shortest hire for this product, the hire notes and the hire terms.

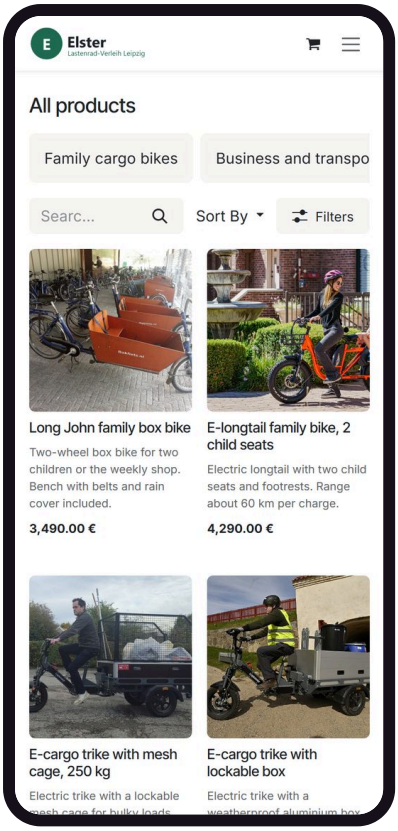

4 Check dates and price

The price is always worked out by the server. What it comes to shows the pickup and return, the period, which rate won (here 4 × 1 Day), the price per unit, the hire total, the refundable deposit, and how many are free for that period. Checking the price never puts anything in the cart.

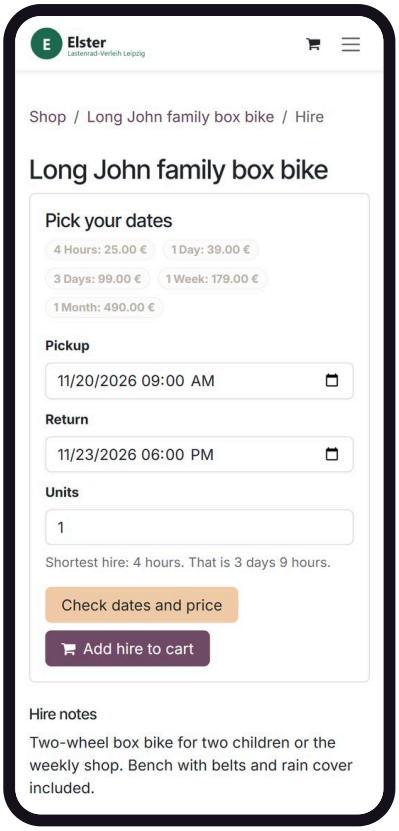

THE BOOKING FORM REFUSES	MESSAGE
No dates	Pick a pickup date and a return date
Return before pickup	The return has to come after the pickup
Too soon	Bookings need the notice set in the store settings
Too far ahead	Bookings are open only as far as the booking horizon
Too short or too long	The shortest or longest hire for the product
Not enough free	Fewer units free than asked for in that window

The shop on a phone.

The product page.

Dates and price on a phone.

PART 10 The cart, holds and checkout ONLINE RENTAL SHOP

The moment a hire goes into a cart a hold is written, and every other visitor's availability counts it. Two people cannot both book the last bike.

IN THIS PART YOU WILL LEARN

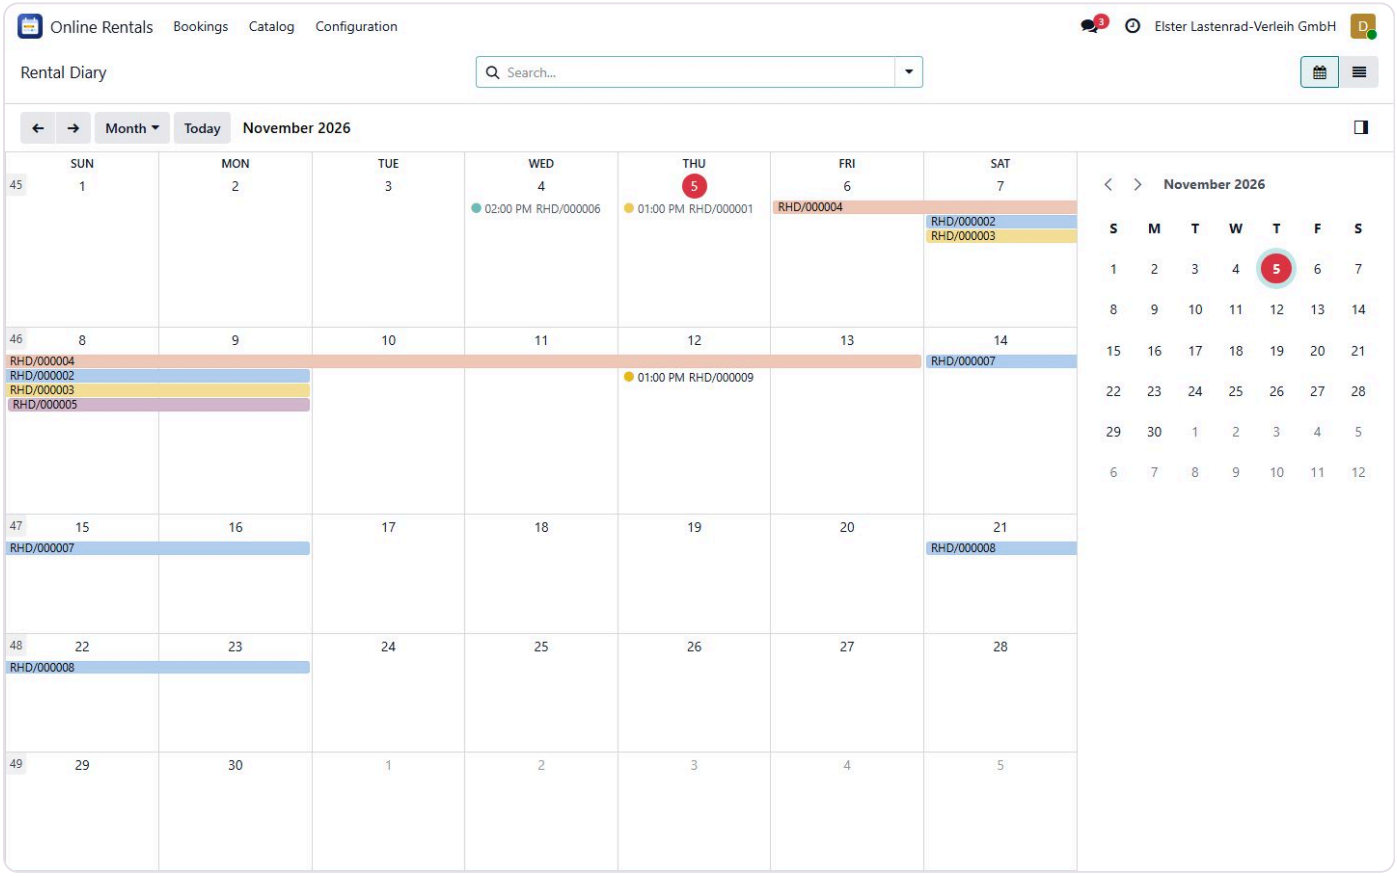

- Add hire to cart: the line, the deposit and the hold
- Hold states and expiry
- The Rental Diary and the Holds list
- Releasing, extending or confirming holds by hand
- Confirming the order and cancelling it

Add hire to cart checks the product can be hired, the length against the shortest and longest hire, and availability, then writes the hire line priced from the rate card with its pickup, return and rate in the description, a separate deposit line, and a hold that lapses after the Cart Hold minutes. The cart shows the hire period and the deposit. Removing the line from the cart gives the hold back at once.

HOLD STATUS	COUNTS AGAINST STOCK	HOW IT GETS THERE
In a Cart (held)	Yes, until it expires	Added to a cart
Booked (confirmed)	Yes, never expires	The order is confirmed
Released	No	Cart line removed, order cancelled, or released by hand
Expired	No	The cart hold ran out of time

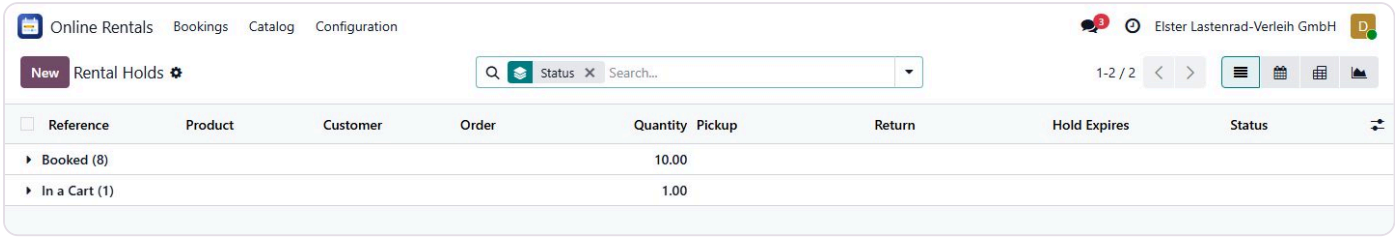

1 Bookings, then Rental Diary

Every held and booked hire on a calendar from pickup to return.

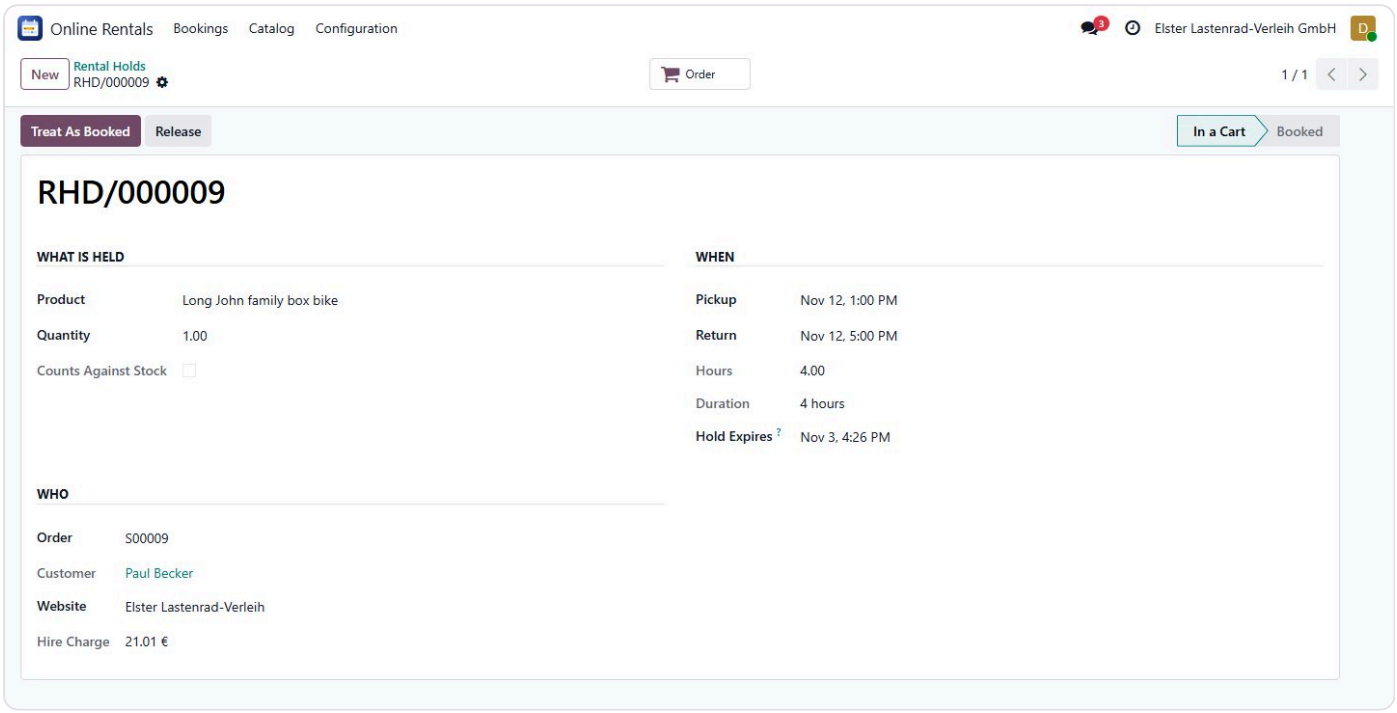

2 Bookings, then Holds

Every hold grouped by status, with product, customer, order, quantity, pickup, return and expiry.

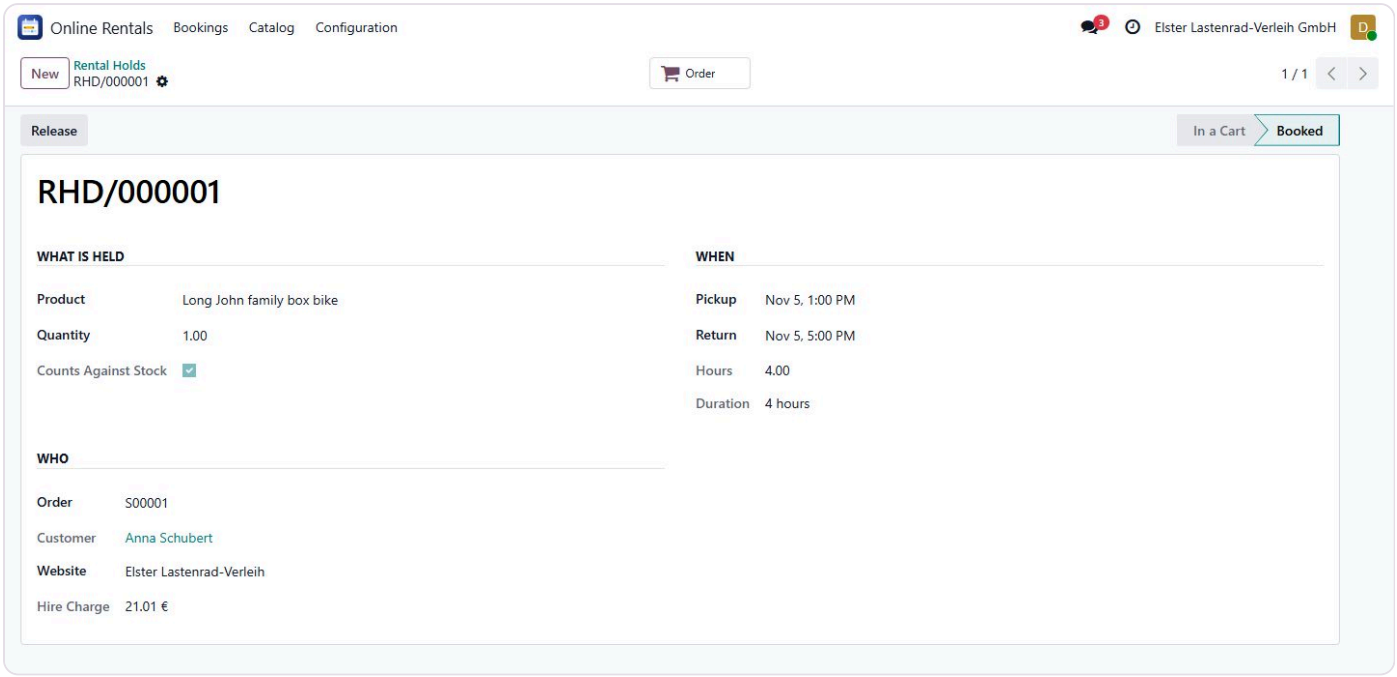

3 A hold in a cart

What is held, when, for which order and customer, the hire charge and when the hold expires. Treat As Booked confirms it, Release gives the units back.

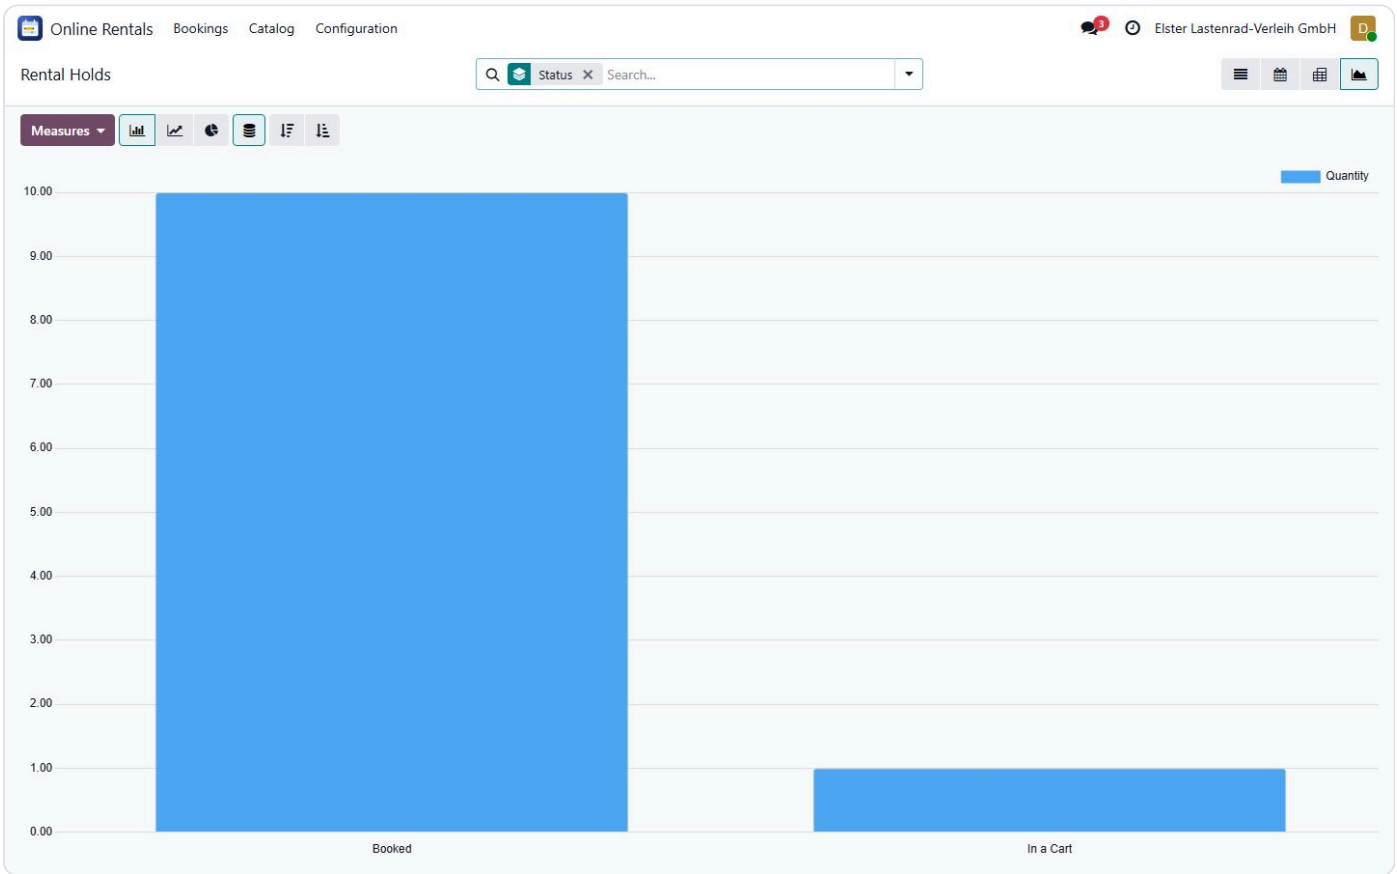

4 A booked hold

Booked holds have no expiry. Put Back In Cart turns a released or expired hold back into a cart hold, for a mistake made in the back office.

5 Holds as a graph

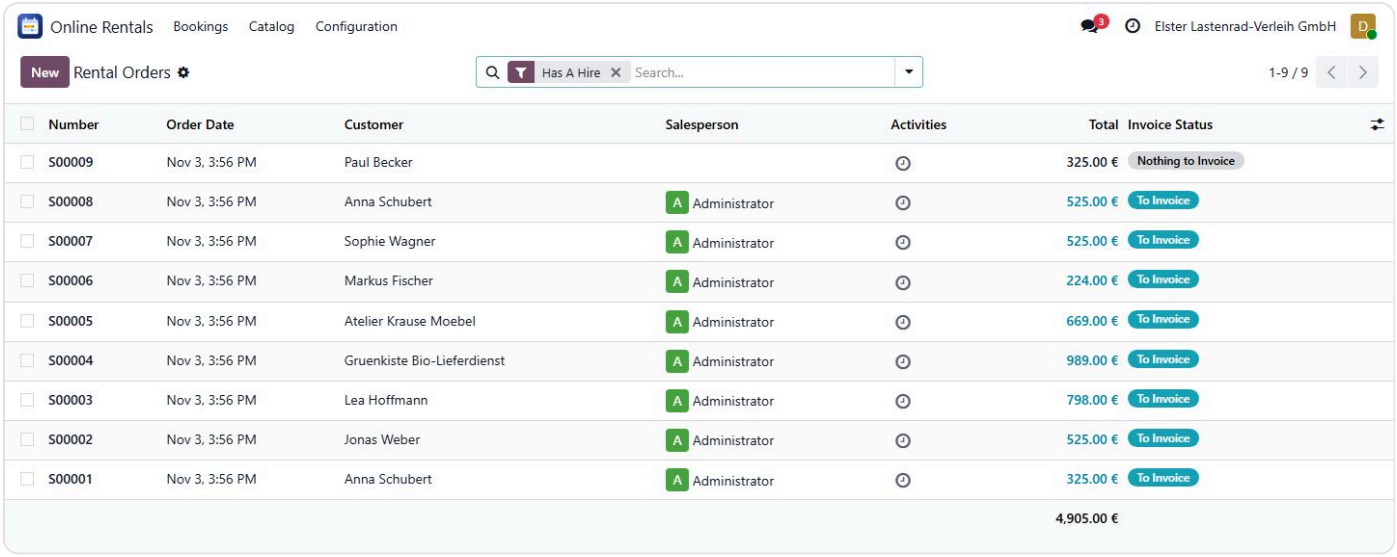

Held and booked units by product or status. A pivot view is there too.

To act on many holds at once, select them in the Holds list and open **Release Rental Holds** from the Action menu. Choose Release, Extend by some extra minutes, or Treat As Booked, give a reason, and Apply. A note is left on each order behind the holds.

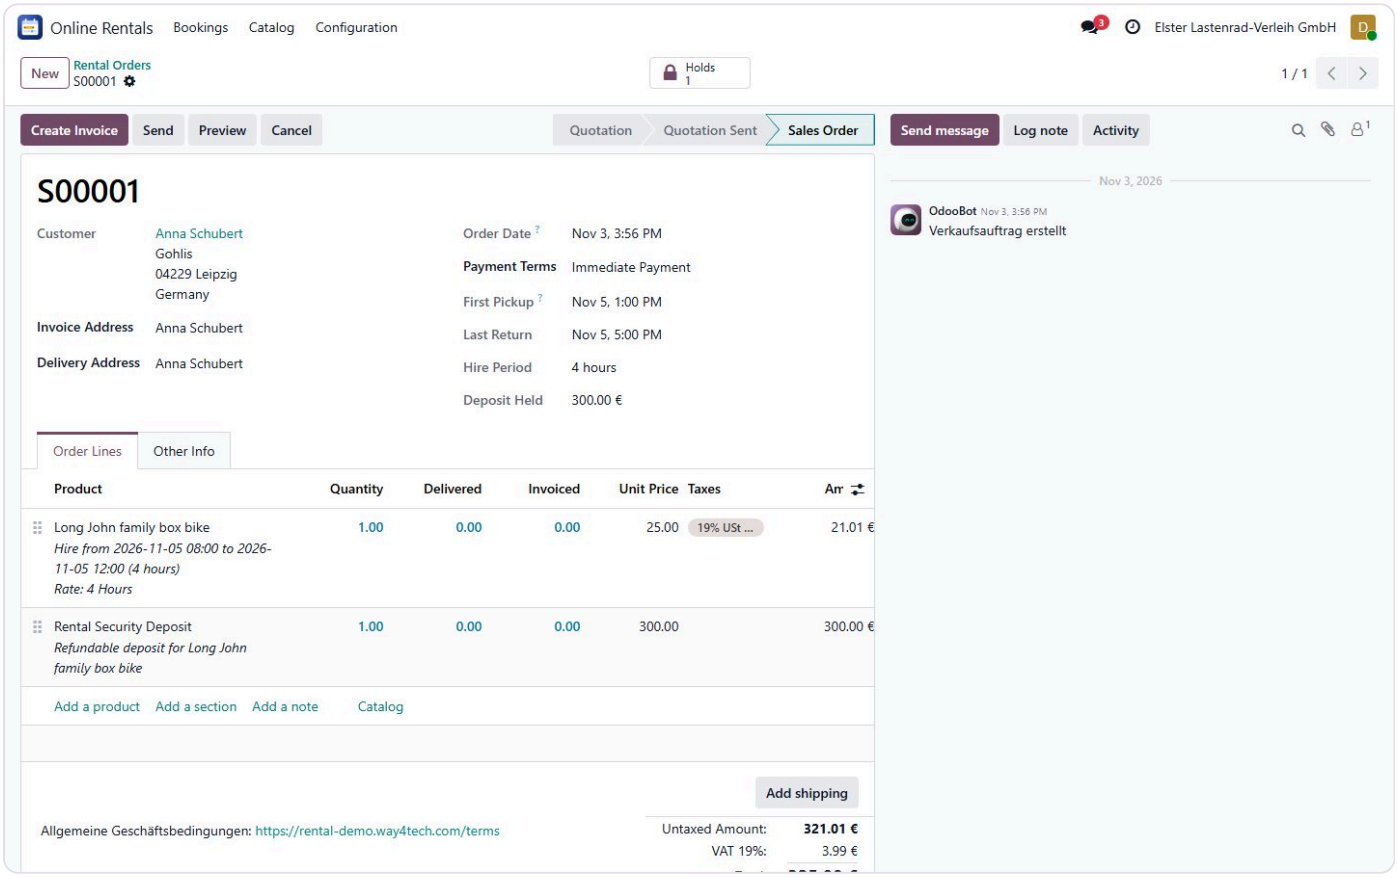

6 Bookings, then Rental Orders

Every order carrying a hire, with first pickup, last return, hire period and deposit held.

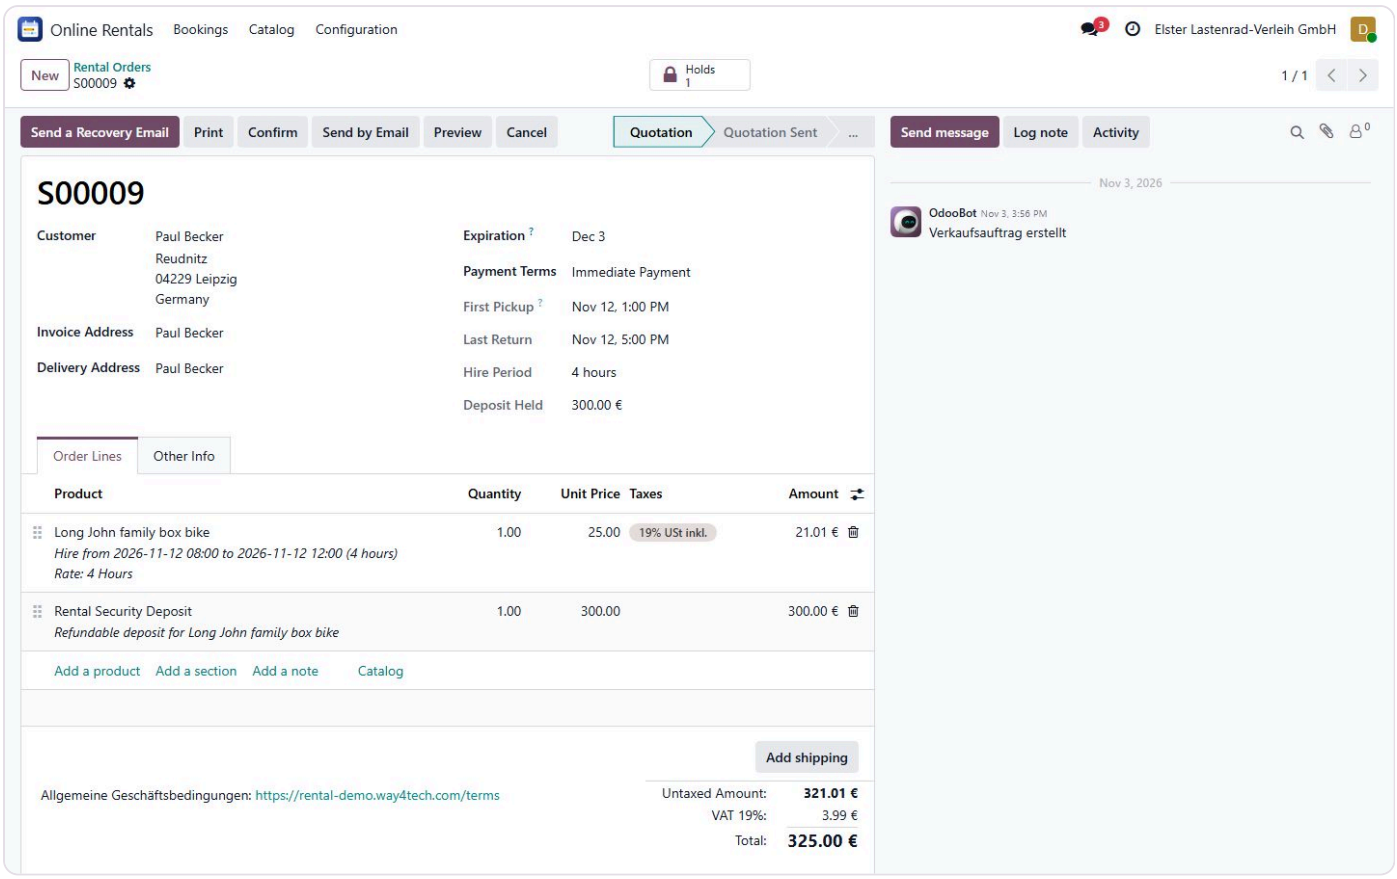

7 A confirmed online booking

The hire line with its period and rate, the deposit line, and the Holds button. Confirming rechecks every hire against everything else before it goes through, then turns the holds into bookings. Cancelling releases them.

8 A quotation from the shop

A cart that reached checkout. Its hold is still a cart hold until the order is confirmed.

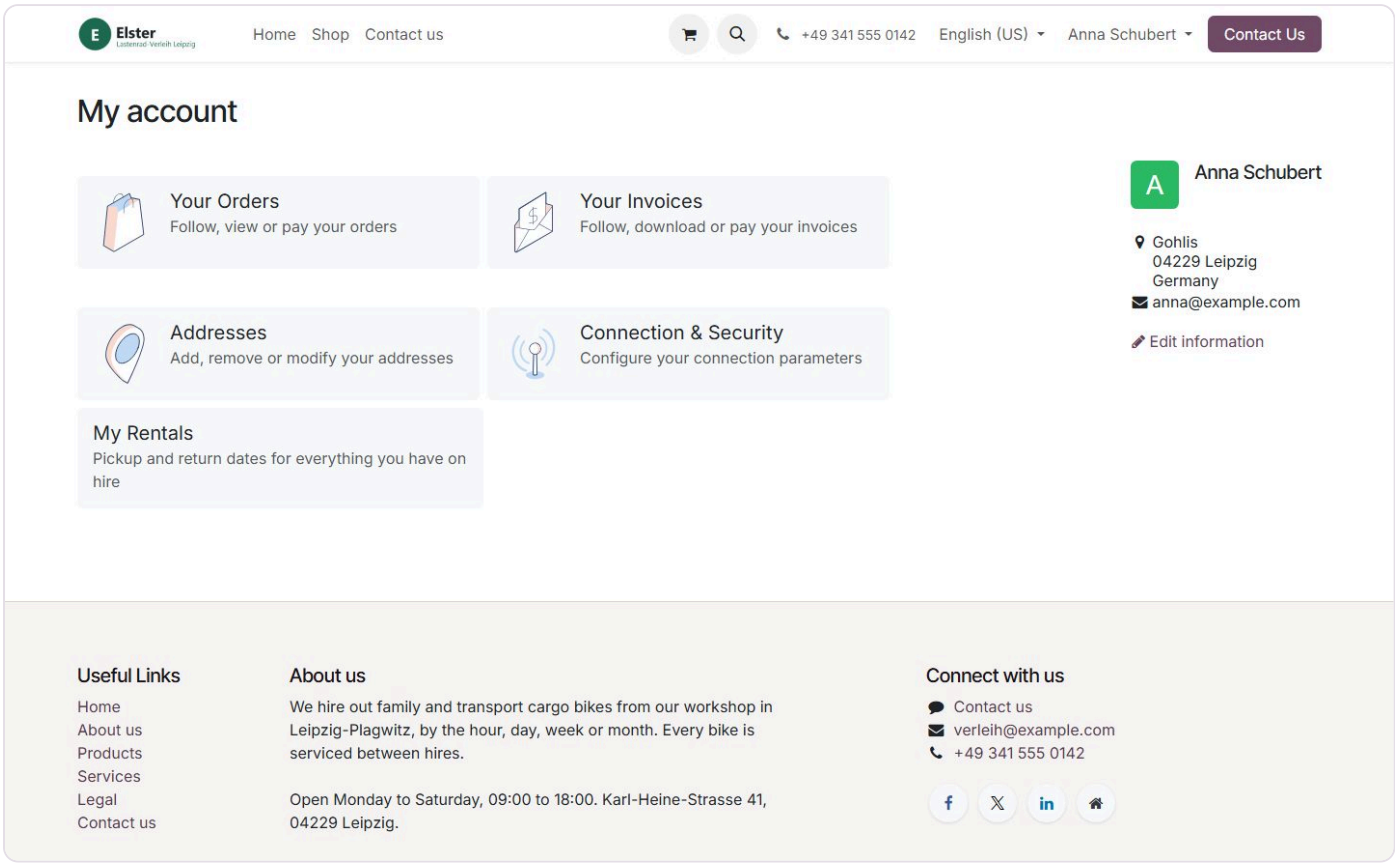

Every fifteen minutes **Online Rentals: expire cart holds** marks lapsed cart holds as Expired. Availability already ignores a lapsed hold, so this keeps the list tidy and shows what visitors tried to book.

PART 11 My Rentals and the booking sheet ONLINE RENTAL SHOP

Customers see their hires in the website portal, and the shop prints a booking sheet for the counter.

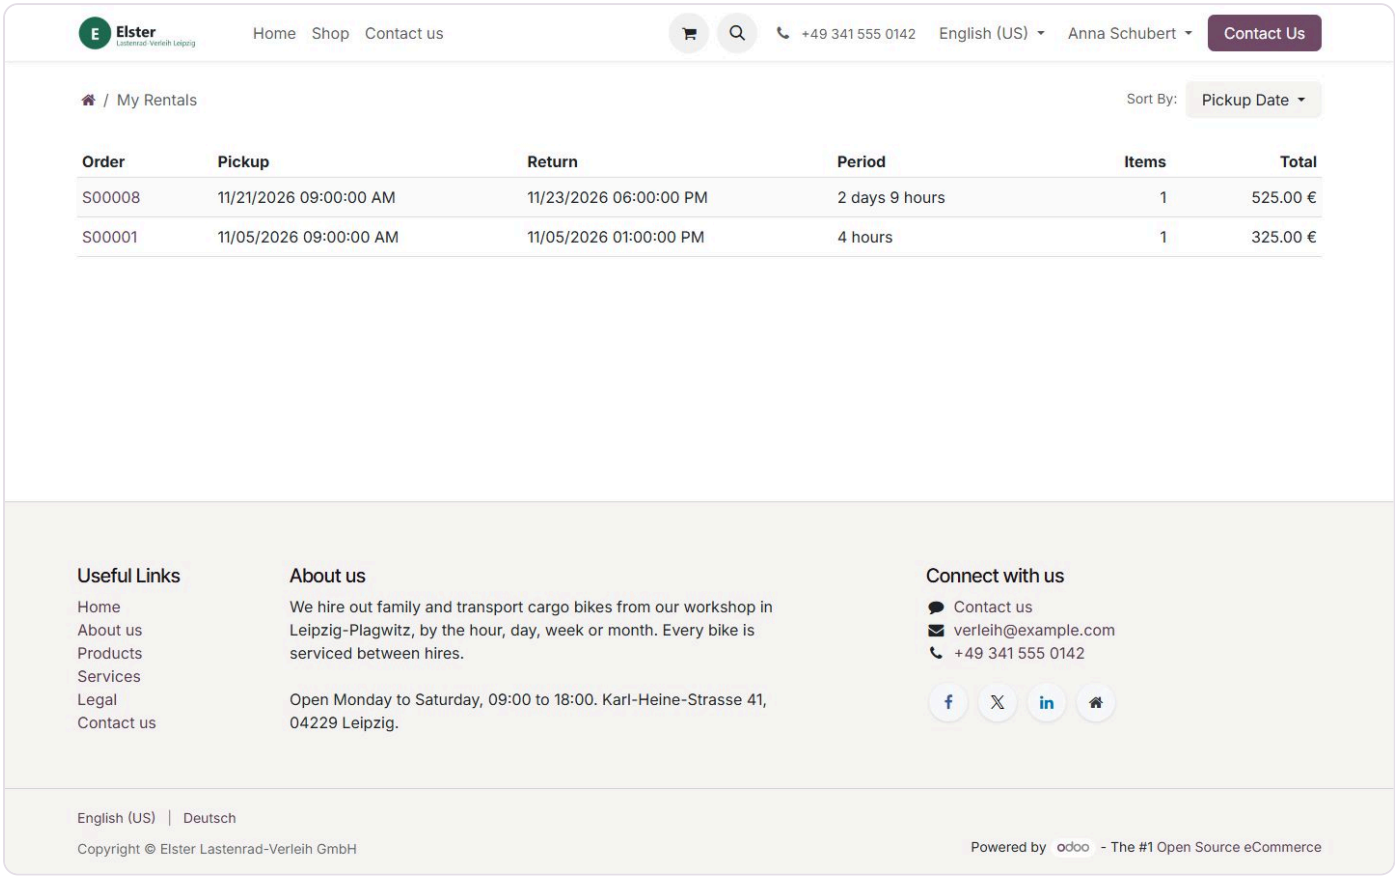

1 My account

A signed in customer sees a My Rentals tile among Orders and Invoices.

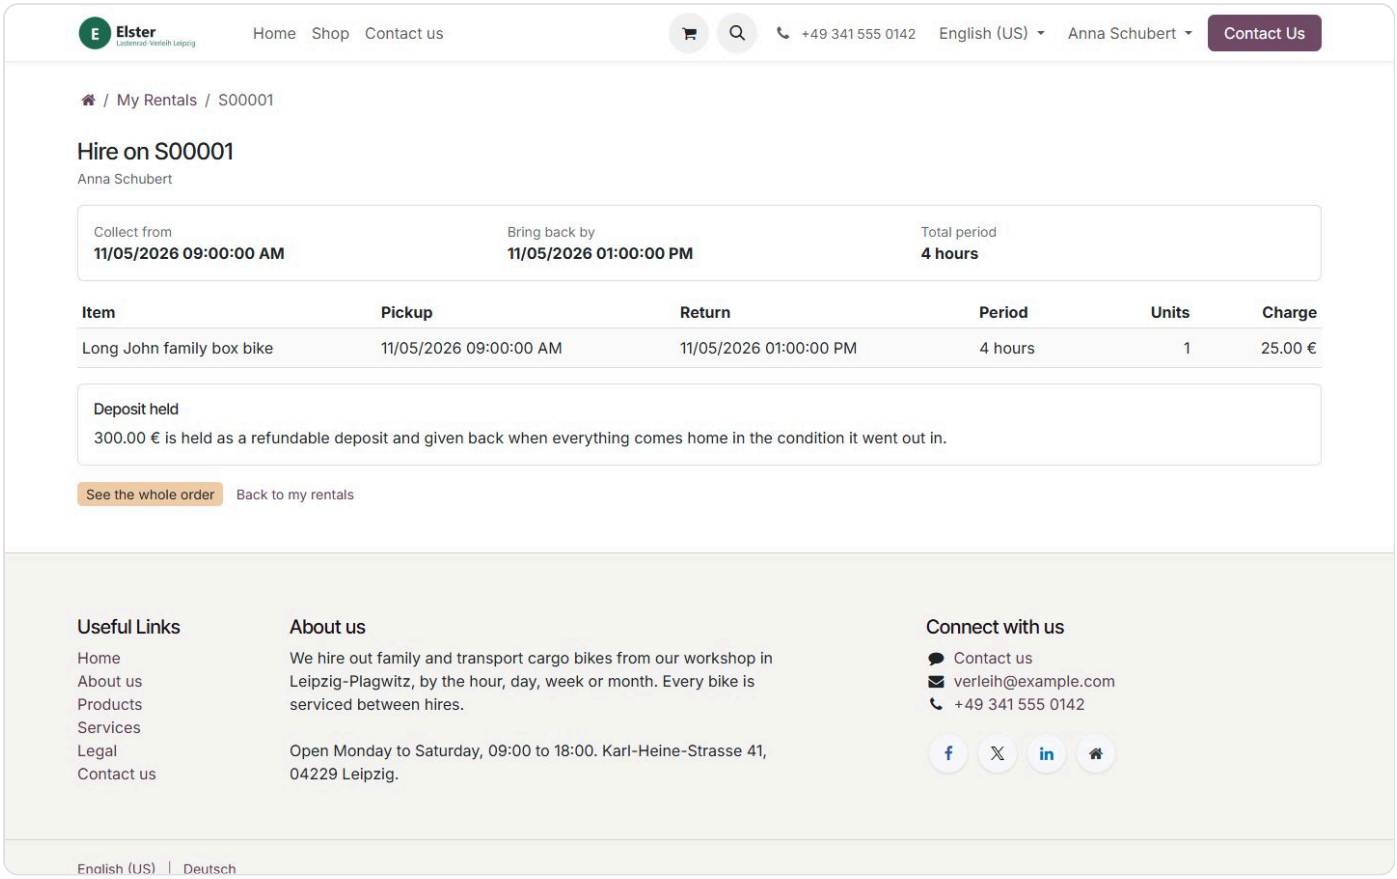

2 My Rentals

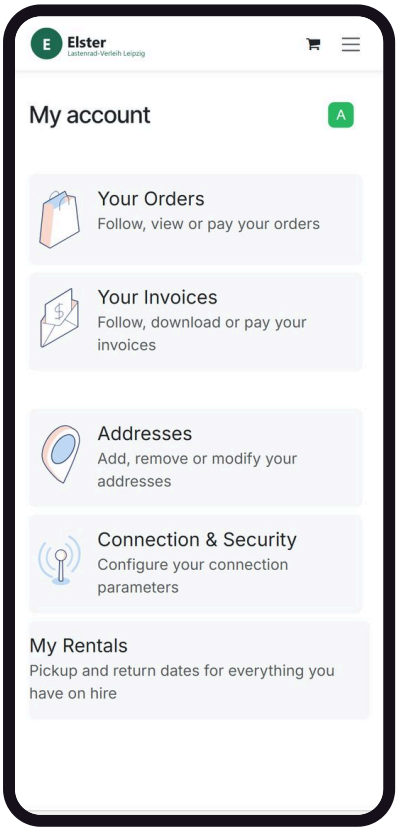

Every confirmed order of the customer's company that carries a hire, with pickup, return, period, items and total. Quotations are left out, because a quotation is not a booking.

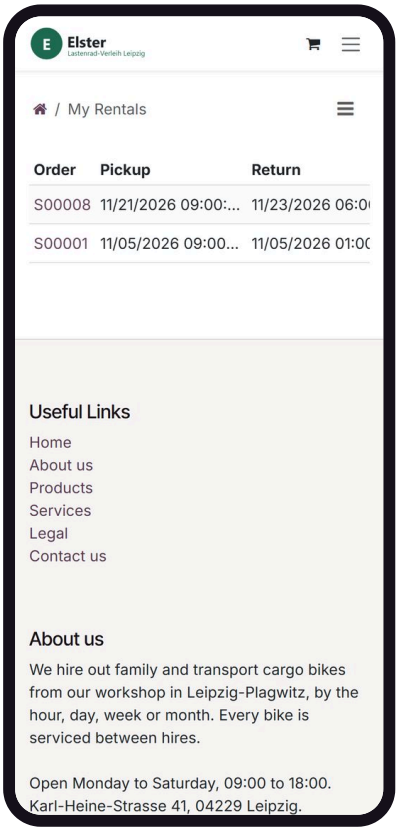

3 One rental

Collect from, bring back by, each item with pickup, return, period, units and charge, the deposit held, and a link to the whole order.

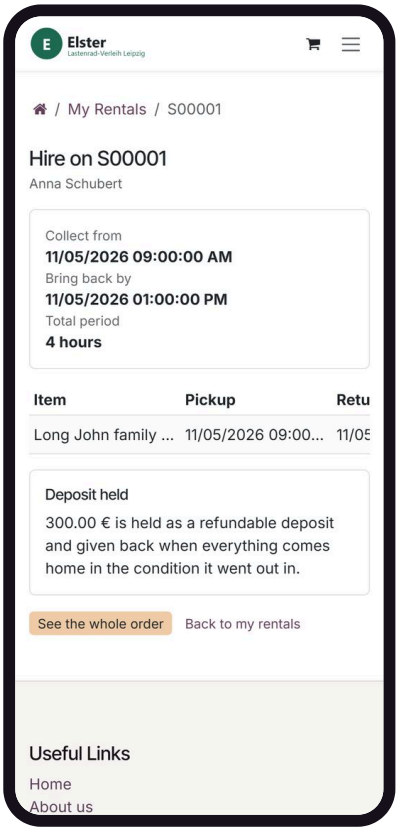

My account on a phone.

My Rentals.

One rental.

The booking sheet

Print **Rental Booking Sheet** from a rental order: customer, collect from and bring back by, each item with pickup, return, period, units and charge, boxes for out and back, the refundable deposit held and the order total.

The booking sheet for S00001.

PART 12 Running both modules together

Both modules install on their own. With both installed the website can price from the back office rates and counts back office hires against availability.

WHAT	WITH BOTH INSTALLED
Rates	Rate Source decides whether website rate cards or Rental Management rates price the website
Deposit	If the website deposit is left at zero, the Rental Management deposit is used
Availability on the website	Counts holds, website bookings, Rental Management hires and blackouts
Availability in the back office	Counts Rental Management rental orders

> Plan which side takes which bookings. The back office check on a rental order counts rental orders only, so a booking made on the website is not seen by it.

PART 13 A fifteen minute walk-through

The path that shows a hire business end to end.

#	DO THIS	AND NOTICE
1	Open /shop, then the Long John bike	*The Hire this item panel and the rate badges.*
2	Check dates and price for 3 days	*The cheapest single rate wins, and how many are free.*
3	Online Rentals, Rental Diary	*Every booked and held bike on the calendar.*
4	Holds	*Cart holds and bookings, and when a cart hold lapses.*
5	Rental Store settings	*Notice, shortest hire, cart hold, deposit line.*
6	Blackouts	*A bike held back for its annual service.*
7	Sign in as a customer, My Rentals	*Hires with dates and the deposit held.*
8	Rental Management: a rental order	*Pickup, return and the late charge preview.*
9	Refund Deposit	*Late charges deducted before the credit note.*
10	Schedule calendar	*Every unit out and coming back.*

Questions people ask

QUESTION	ANSWER
Is Odoo Rental in Community?	No, it is an Enterprise app. These modules bring rental to Community and also install on Enterprise.
Do I need both modules?	No. Rental Management is the counter and back office, the Online Rental Shop is the website. Each works alone.
How is a hire priced?	The single cheapest rate that covers the period, rounded up to whole blocks. Rates are not mixed.
Can two customers book the last unit?	No. A cart writes a hold that every other visitor counts, and the order is checked again on confirm.
Does it track each machine by serial number?	No, availability is a pool. A pickup note can carry a serial number.
Can I charge for late returns?	Yes. The late hours are priced off the rate card plus a penalty, and added as a line.
Is the deposit revenue?	No. It is invoiced and refunded on its own, or carried as its own line on a website order.

PART 14

The menu map

Every screen in both modules, on one page.

Rental RENTAL MANAGEMENT

Rental Orders	Every hire on the sales order, by status
Schedule	Every confirmed hire line: list, calendar and pivot
Movements	The log of every pickup and return
Availability	How many units are free for a window
Rentable Products	Products that can be hired, with deposit and pool
Rental Rates	Every rate row across the products

Online Rentals ONLINE RENTAL SHOP

Rental Diary	Booked and held hires on a calendar
Holds	Every unit held by a cart or a booking
Rental Orders	Website orders carrying a hire
Rentable Products	Products offered for hire online
Rate Cards	The website rate rows
Rental Store	Times, notice, durations, holds, deposit, rates
Blackouts	Units held back for servicing or events

Website ONLINE RENTAL SHOP

/shop	The shop, with hire products
Product page	The Hire this item panel
/rental/book	Dates, rate card, price and availability
/my/rentals	The customer's hires in the portal

Want this for your hire business?

We set it up with your fleet, rate cards, deposits and opening hours, connect it to your shop, taxes and accounts, and train the counter. It runs a bike hire, a tool and plant yard, an event and party hire or a camera rental shop.
