COMPLETE GUIDE · SETUP, EVERY SCREEN AND EVERY STEP

School Management for Odoo 19

Admissions, students and enrollment, classes and timetables, assignments, exams and seating, fees and scholarships, attendance, transport, report cards and the Enterprise add-on. Shown step by step on a live demo school.

BASE | ACADEMIC REPORTS | ENTERPRISE

START About this guide

A school office runs on a handful of records: who applied, who is enrolled in which grade this year, what they owe, whether they came in today, and how they did. This guide builds those records from an empty database, one screen at a time, and then walks every screen the module adds. You do not need to have used Odoo before.

Who it is for

The principal or administrator setting the school up, the admissions and fees office, the class teacher entering marks, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks the screen step by step, one screenshot per step.

The live demo

Al Noor International Academy, a worked example school with six grades, 86 enrolled students, a full term of attendance, marks, fee slips, exams and bus trips already on it.

HOW IT WORKS

The demo school

Address	**education.way4tech.com**
Sign in	**w4demo** / **Demo2026**
School	Al Noor International Academy, Grades 1 to 6, two sections each, AED
Year on file	Academic Session 2026-2027, AY 2026-27, three terms
Runs on	Odoo 19, Community edition

Three editions, one guide

School Management is sold as a base module and two add-ons. Every heading and step in this guide carries a badge that says which one brings the feature, so you can see at a glance what you get for what you pay.

Badge	Module	What it adds
BASE	School Management (wt_school_management)	Admissions, students, enrollment, sessions, grades, subjects, classes, timetables, assignments, exams, seating, fees, scholarships, attendance, transport, lesson plans, service hours, discipline, notice board
ACADEMIC REPORTS	School Academic Reports (wt_school_academic_reports)	The printed report card, the class result sheet and the transcript, worked out from the marks and attendance at print time
ENTERPRISE	School Management Enterprise (wt_enterprise_school)	A second app, School Enterprise: library, hostel, health, canteen, sports, staff appraisal, parent meetings, finance, visitors, counseling, alumni, campuses, events, certificates, ID card and result card

The live demo runs the **base** module. The Academic Reports and Enterprise screens in this guide were taken on our own test school, so their names and figures differ from the demo.

The demo is shared and resets from time to time, so anything you change may be changed back or seen by the next person. Treat it as a school to walk around, not your own records.

What is in the guide

PART 1	How a school year runs in Odoo	PART 2	The school at a glance
PART 3	Signing in	PART 4	Setting up from zero
PART 5	The calendar: sessions, years and terms	PART 6	Grades, sections, scales and subjects
PART 7	Rooms, periods, types, holidays and teachers	PART 8	Admissions: the application form
PART 9	The student record	PART 10	Enrollment: a student in a year
PART 11	Classes and the timetable	PART 12	Assignments and marks
PART 13	Exams, submissions and seating	PART 14	Lesson plans
PART 15	Fees: structures and fee slips	PART 16	Scholarships
PART 17	Attendance	PART 18	Transport: routes, stops and trips
PART 19	Service hours, discipline and the notice board	PART 20	Report cards, result sheets and transcripts
PART 21	School Enterprise: the second app	PART 22	Library, hostel, health and canteen
PART 23	Sports, staff, communication and finance	PART 24	Operations, counseling, alumni, campus and events
PART 25	Certificates, ID card and result card	PART 26	A 15-minute walk through the demo
PART 27	Questions and honest limits	PART 28	The menu map

PART 1 How a school year runs in Odoo

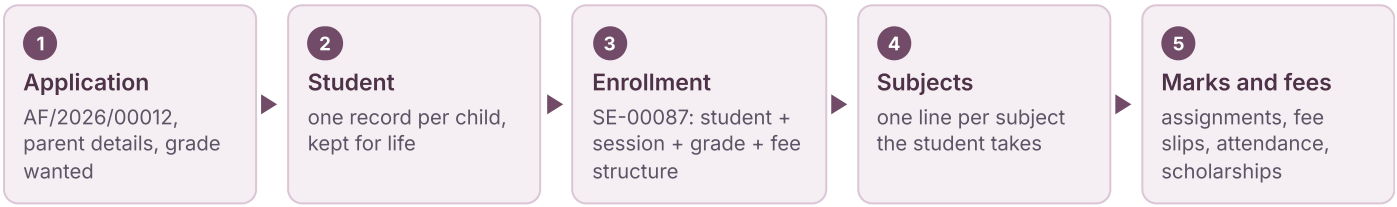

Before any screen, it helps to see the chain of records the module keeps. A student is a person. An enrollment is that person in one grade, for one session. Almost everything else, from marks to fees, hangs off the enrollment, not off the student.

IN THIS PART YOU WILL LEARN

- The difference between a student and an enrollment
- Session, academic year and term, and why there are three
- How a grade, its sections and its subjects fit together
- Where marks come from and how a grade letter is picked
- The yearly cycle from application to promotion

The record chain BASE

From enquiry to a year on file BASE

The **student** record holds who the child is: name, date of birth, parents, medical notes and the bus stop. It does not change from year to year. The **enrollment** is new every year: it says this student is in Grade 1, section G1-A, in the 2026-2027 session, paying the Grade 1 fee structure. Fee slips, scholarships, service hours, discipline notes and subject lines all point at the enrollment. When the year ends you complete or promote the enrollment and open a new one.

Session, academic year, term BASE

Record	Demo example	What it is for
Session	Academic Session 2026-2027, 31 Aug to 2 Jul 2027	The school year an enrollment belongs to. Has a status: New, In Progress, Completed.
Academic year	AY 2026-27	Belongs to a session and holds the terms. Report cards and result sheets are printed for an academic year.
Term	Term 1 (Autumn) 35%, Term 2 (Winter) 30%, Term 3 (Spring) 35%	A date range inside the year. Marks are tagged with a term, so a report card can be printed per term.

Grade, section, subject, scale BASE

A **grade** (Grade 1 to Grade 6 on the demo) has **sections** (G1-A, G1-B) and **subjects**. Each subject has a code that is unique in its grade (ENG1, MTH1), a credit value and its teachers. Every grade points at a **grade scale**, the bands that turn a percentage into a letter: on the demo A* is 90 to 100 and worth 4.0 points, F is 0 to 49.99.

Where marks come from BASE

Marks are entered on **student assignments**: one line per student per piece of work, with the total marks and the marks obtained. A teacher sets up a piece of work once for the grade (a grade assignment), hands it to a class (a class assignment), and each student gets a line. Exams are a separate engine with questions and submissions. The Academic Reports add-on reads the evaluated student assignments to build the report card.

The year in one picture BASE

A typical year

1. **Before term** — session, year, terms, grades, fees
2. **Admissions** — applications confirmed and enrolled
3. **Daily** — attendance, timetable, bus trips
4. **Through term** — assignments, exams, fee slips
5. **Term end** — report cards and result sheet
6. **Year end** — complete or promote, open next year

PART 2 The school at a glance

The base module adds one app, School Management, with ten menus across the top. This part is the map and the list of who can see what. Every later part is one of these menus in full.

Who sees what BASE

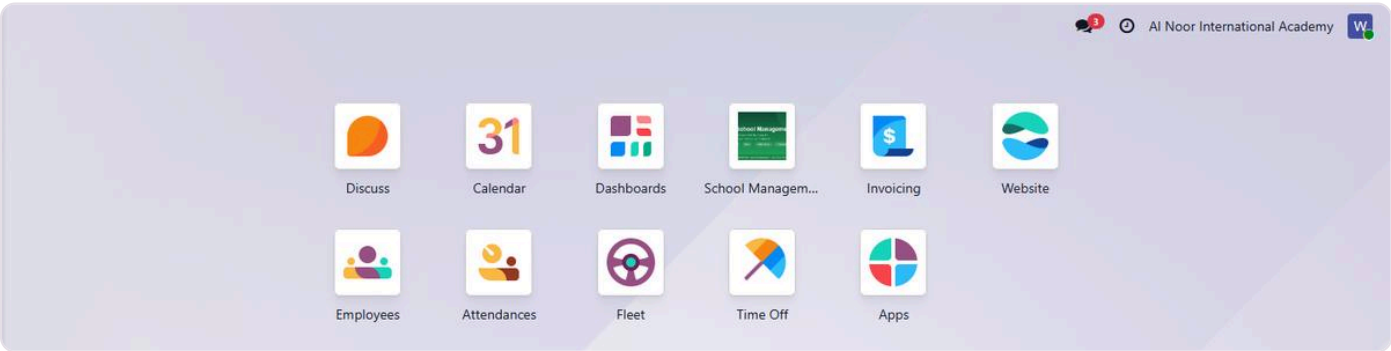

Access comes from three groups under **WT School Management** on the user form. Each one includes the one below it.

Group	Sees	Typical person
Staff	Students, Enrollments, Subjects, Classes, Timetables, Exams, Assignments, Fee Slips, Scholarships, Attendance, Transport and the Other menu	Teacher, transport coordinator
Officer	Everything Staff sees, plus Applications, Sessions, Academic Years, Grades, Grade Scales, Fee Structures, Assignment Types and Public Holidays	Admissions and fees office
Administrator	Everything, plus the Configuration menu: class locations, time slots, discipline types	Principal, school IT

Rights differ by group too. **Staff** can edit students, enrollments, attendance, classes, timetables and trips, and create assignments, lesson plans, service hours and discipline notes, but only read fee structures, fee slips and scholarships. **Officer** can create and edit everything but not delete. Only **Administrator** can delete.

> Installing the module does not put anyone in these groups, not even the person who installed it. Until a user has at least Staff, the School Management app does not appear for them. Open Settings, Users, pick the user and set the WT School Management field.

The menus BASE

BASE The Odoo home screen on the demo. School Management sits next to Employees, Attendances, Fleet, Time Off and Invoicing, which it installs for you.

Applications

Applications Base	Admission forms from New to Enrolled

Students

Students Base	One record per child: family, medical, transport

Enrollments

Enrollments Base	A student in a session and grade, with fees and subjects

Academics

Sessions Base	The school year and its status
Academic Years Base	The year inside the session, with its terms
Grades Base	Grades with their scale, sections and subjects
Subjects Base	Subject per grade: code, credits, teachers
Grade Scales Base	Letter bands with points
Classes Base	Subject taught to a section in a term
Timetables Base	Each lesson: day, period, room
Reports: Report Cards Academic Reports	Print cards for enrollments
Reports: Class Result Sheet Academic Reports	The class ranked on one page

Exams

Exams Base	Exams with questions and marks
Submissions Base	Each student's answers and score
Seating Plans Base	Hall rows and columns, a student per seat

Assignments

Grade Assignments Base	The work, written once per grade
Class Assignments Base	The work set for a class
Student Assignments Base	One line per student: the mark
Assignment Types Base	Homework, Quiz, Project...

Fees

Fee Structures Base	What a grade pays, by fee product
Fee Slips Base	A bill for one enrollment and period
Scholarships Base	Awards with approver and paid date

Attendance

Student Attendance Base	Present or absent per student per day
Public Holidays Base	The holiday list

Transport

Routes Base	Bus, manager, stops and riders
Trips Base	One run with pick-up and drop-off ticks
Locations Base	Pickup points

Other

Lesson Plans Base	Teacher outlines, approved
Service Hours Base	Community hours, approved
Discipline Base	Conduct notes
Notice Board Base	Dated notices

Configuration

Class Locations Base	Rooms
Time Slots Base	Periods of the day
Discipline Types Base	Headings for conduct notes

School Enterprise app

Library Enterprise	Books, Book Issues, Categories
Hostel Enterprise	Hostels, Rooms, Allocations
Health and Medical Enterprise	Medical Visits, Vaccinations
Canteen Enterprise	Orders, Wallets, Menu Items, Categories
Sports and Activities Enterprise	Clubs, Tournaments, Achievements
Staff Management Enterprise	Teacher Evaluations, Criteria, Trainings
Communication Enterprise	Parent Meetings, Bulk Messages
Finance Enterprise	Installment Plans, Budgets, Expenses
Operations Enterprise	Visitors, Lost and Found, Documents
Counseling, Alumni, Campus Enterprise	Sessions, Alumni Records, Campuses
Events Enterprise	School Events with RSVPs
Certificates Enterprise	Issue Certificates
Student Welfare Enterprise	Awards Wall, Holiday Calendar

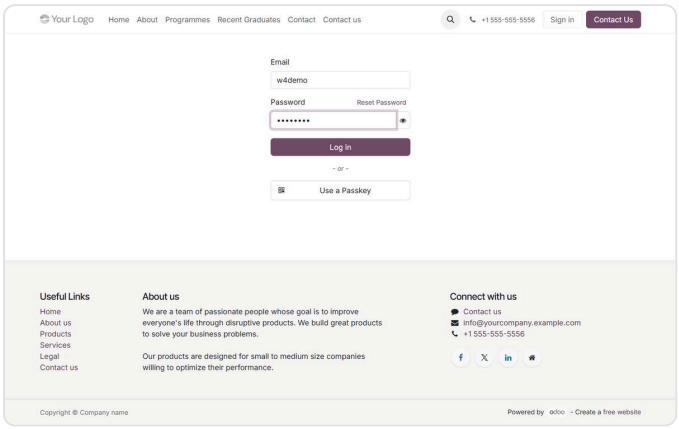

> The Enterprise add-on is its own app, School Enterprise, with fifteen menus of its own. Part 21 onward covers it. The Academic Reports add-on adds a Reports menu under Academics and buttons on the student and enrollment forms.

PART 3 Signing in

Open the demo in any modern browser. There is nothing to install on your computer.

TRY IT YOURSELF ON THE DEMO

1. Go to education.way4tech.com
2. Sign in as w4demo with the password Demo2026
3. Click School Management on the home screen

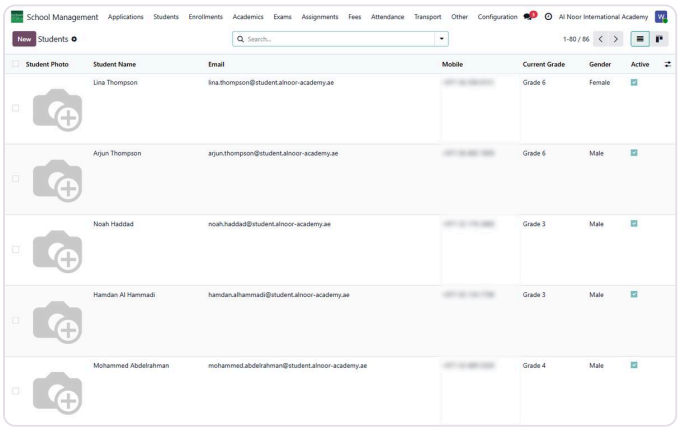

1 ODOO

Open the sign-in page

Go to **education.way4tech.com/web/login**. Type `w4demo` as the email and `Demo2026` as the password, then click **Log in**.

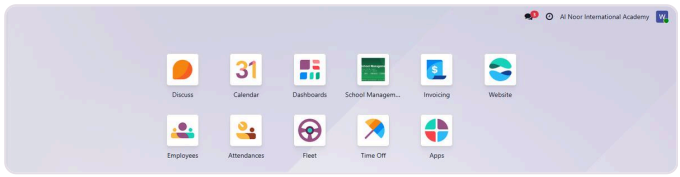

The page behind the form is the school's public website, which Odoo Website draws. It is not part of the School Management module.

3 ODOO

Find your way around a list

Every menu opens a list first. Type in the search box to filter, click a column head to sort, and click a row to open the record. The two buttons at the top right switch between list and cards where a screen has both.

2 BASE

Open School Management

The home screen lists every app you can use. Click **School Management**. The menus across the top are the map from Part 2.

The company name at the top right, Al Noor International Academy, is the school. Each school in one database is its own company.

PART 4 Setting up from zero

BASE

A new school is set up in a fixed order, because each record needs the one before it. A grade needs a grade scale, an enrollment needs a session, a year, a grade and a fee structure. Follow this table top to bottom and nothing will ask for a field you have not made yet.

The setup order BASE

#	WHERE	WHAT TO ENTER	NEEDS
1	Settings, Users	Put each user in Staff, Officer or Administrator under WT School Management	-
2	Employees	Your teachers and supervisors, then tick Is Teacher or Is Supervisor on the School Info tab	-
3	Academics, Grade Scales	The letter bands: symbol, min and max %, points, description, effort	-
4	Academics, Sessions	The school year with its start and end date	-
5	Academics, Academic Years	The year inside the session, and its terms with dates and weightage	Session
6	Academics, Grades	Each grade with its scale and sections	Grade scale
7	Academics, Subjects	Each subject per grade: code, credits, teachers, optional or not	Grade, teachers
8	Invoicing, Products	One product per fee head: tuition, registration, books, trips	-
9	Fees, Fee Structures	One per grade: the fee products with amounts and frequency, late fee	Grade, products
10	Configuration	Class locations (rooms), time slots (periods), discipline types	-
11	Assignments, Assignment Types	Homework, Classwork, Quiz, Project, Lab Report	-
12	Attendance, Public Holidays	The holiday list for the year	-
13	Transport, Locations and Routes	Pickup points, then routes with a vehicle from Fleet and stops	Fleet vehicle
14	Academics, Classes	A class per grade, section and subject, with its teacher and term	All of the above

There is no settings page for this module. Everything above is an ordinary list you fill in. The sequences (AF/ for applications, SE- for enrollments, FS- for fee slips, SCH- for scholarships, EXAM/ and TRIP-) are created on install and number records for you.

What the demo already has BASE

6
grades, Grade 1 to Grade 6, two sections each

48
subjects, eight per grade

86
students, each with one enrollment in progress

80
classes and 900 timetable slots

PART 5 The calendar: sessions, years and terms

BASE

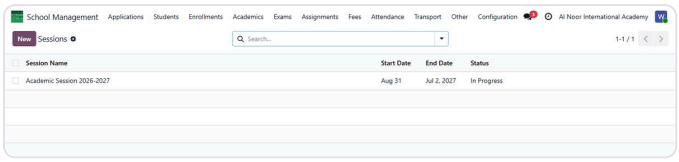

The session is the school year an enrollment belongs to. The academic year sits inside it and carries the terms. On the demo they cover the same dates, which is the normal case.

IN THIS PART YOU WILL LEARN

- Creating a session and moving it through its statuses
- Adding the academic year and its terms
- What the term weightage is and where it is used
- The date checks the module makes

TRY IT YOURSELF ON THE DEMO

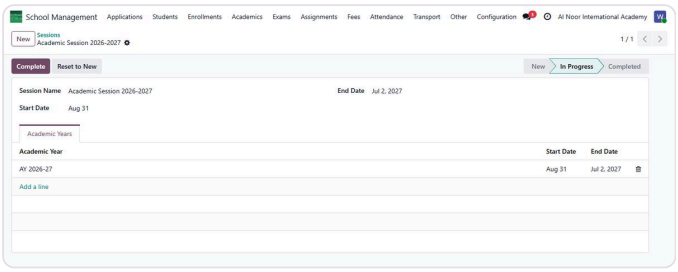

1. Academics, Sessions: open Academic Session 2026-2027
2. Academics, Academic Years: open AY 2026-27
3. Read the three terms and their weightage

1 BASE

Open the sessions

Go to **Academics, Sessions**. Each row is a school year with its dates and status. The demo has one: Academic Session 2026-2027, 31 Aug to 2 Jul 2027, In Progress.

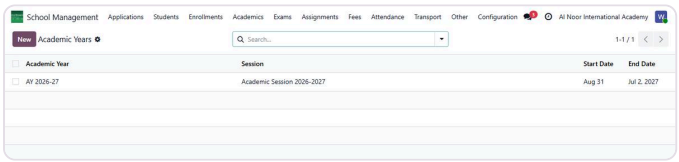

2 BASE

Create or open a session

A session needs a name, a start date and an end date. The header buttons move it on: **Set In Progress**, then **Complete**, and **Reset to New** to go back. The Academic Years tab lists the years that belong to it.

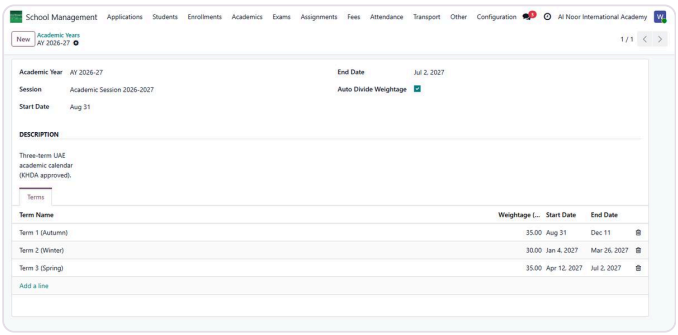

The start date must be before the end date, or the session will not save.

3 BASE

Open the academic years

Go to **Academics, Academic Years**. Each year shows its session and dates.

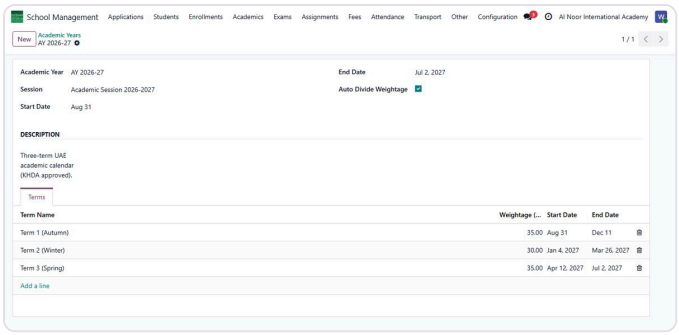

4 BASE

Fill in the academic year

Name, session, start and end date, and a description. Tick **Auto Divide Weightage** if you want to note that terms carry equal weight.

The tick box is stored for your reference only. Nothing in the module divides the weightage for you.

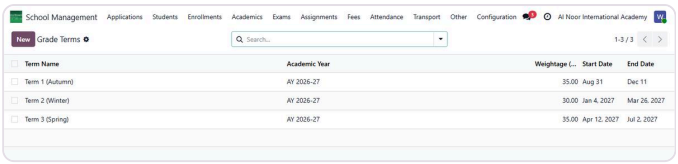

5 BASE

Add the terms

On the Terms tab add one line per term: name, weightage %, start and end date. The demo uses Term 1 (Autumn) 35%, 31 Aug to 11 Dec; Term 2 (Winter) 30%, 4 Jan to 26 Mar 2027; Term 3 (Spring) 35%, 12 Apr to 2 Jul 2027.

A term's start must be before its end.

6 BASE

See every term in one list

Grade Terms is a list of all terms across years. It has no menu of its own; you reach the terms from the academic year, as above.

> The term weightage is recorded but not applied by any calculation. A full-year report card adds the marks of every term as they are. If your school weights terms, tell us before go-live.

PART 6 Grades, sections, scales and subjects

BASE

This is the shape of the school: which grades you teach, how each grade is split into sections, which subjects each grade studies, and how a percentage becomes a letter.

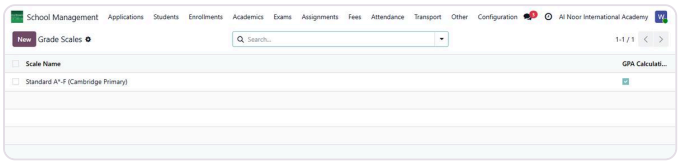

IN THIS PART YOU WILL LEARN

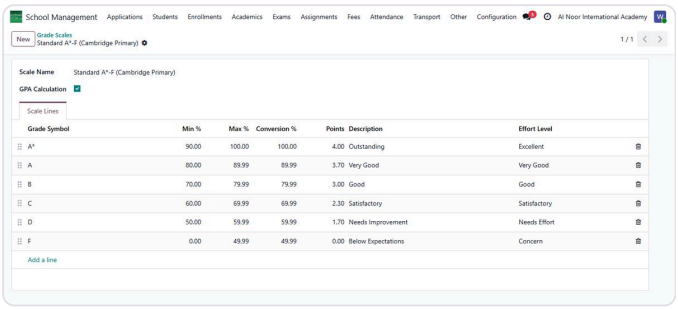

- Building a grade scale with points for GPA
- Creating a grade and its sections
- Adding subjects with codes, credits and teachers
- The uniqueness rules on grades and subjects

TRY IT YOURSELF ON THE DEMO

1. Academics, Grade Scales: open Standard A*-F
2. Academics, Grades: open Grade 5 and its Subjects tab
3. Academics, Subjects: open Mathematics for Grade 1

The grade scale BASE

1 BASE

Open the grade scales

Go to **Academics, Grade Scales**. The demo has one: Standard A*-F (Cambridge Primary), with GPA Calculation ticked.

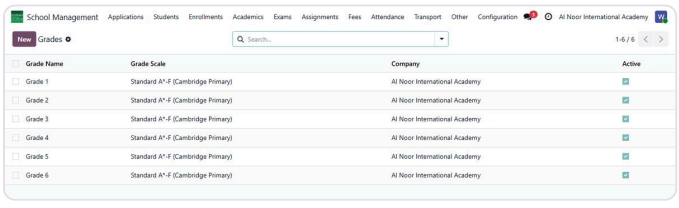

2 BASE

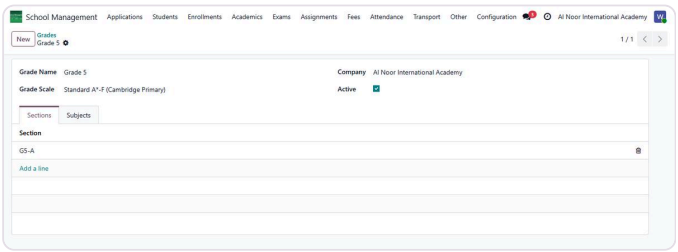

Read or build the bands

Each scale line has a **grade symbol**, a **min %** and **max %**, a conversion %, **points**, a description and an effort level. The demo bands run A* 90 to 100 (4.0, Outstanding), A 80 to 89.99 (3.7), B 70 to 79.99 (3.0), C 60 to 69.99 (2.3), D 50 to 59.99 (1.7), F 0 to 49.99 (0.0).

Min and max must sit between 0 and 100 and min must be below max. The report card uses the points for the GPA and the description as the remark.

Grades and sections BASE

3 BASE

Open the grades

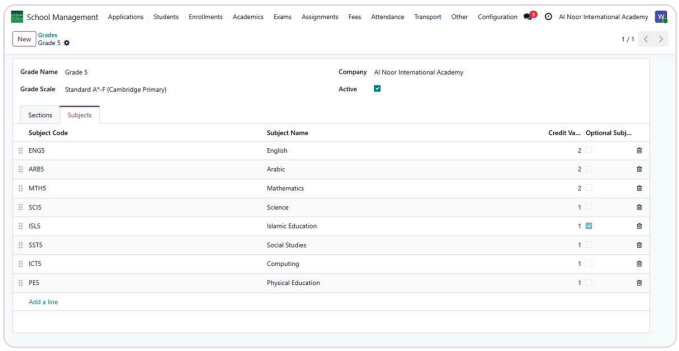

Go to **Academics, Grades**. Each grade names its scale and company. A grade can be archived with the Active box when you stop teaching it.

A grade name must be unique within the school.

4 BASE

Add the sections

Open a grade. On the **Sections** tab add a line per section: Grade 5 on the demo has G5-A.

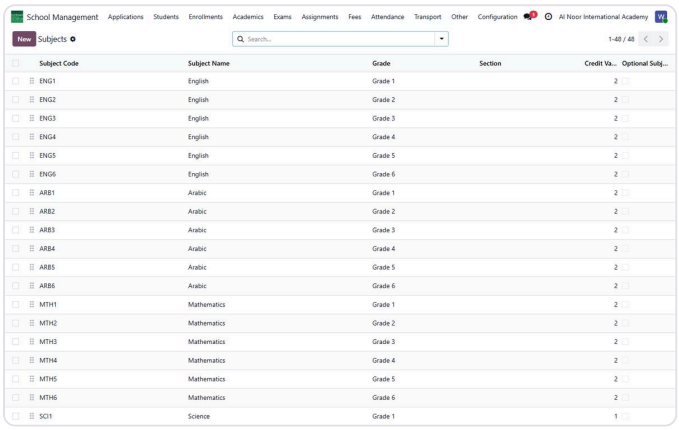

5 BASE

See the grade's subjects

The **Subjects** tab lists every subject of the grade with its code, credits and whether it is optional. Grade 5 on the demo has eight, from ENG5 English to PE5 Physical Education, with Islamic Education marked optional.

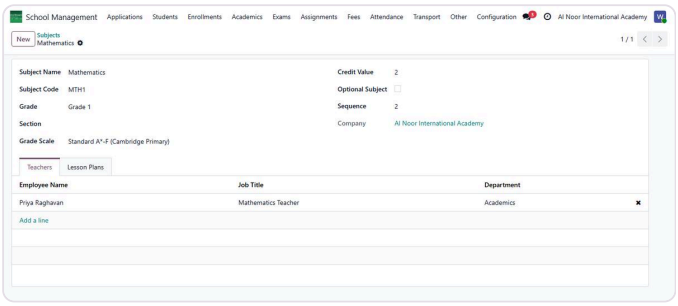

Subjects BASE

6 BASE

Open the subjects

Go to **Academics, Subjects**. All 48 demo subjects are here, by code, name, grade, section and credits.

7 BASE

Fill in a subject

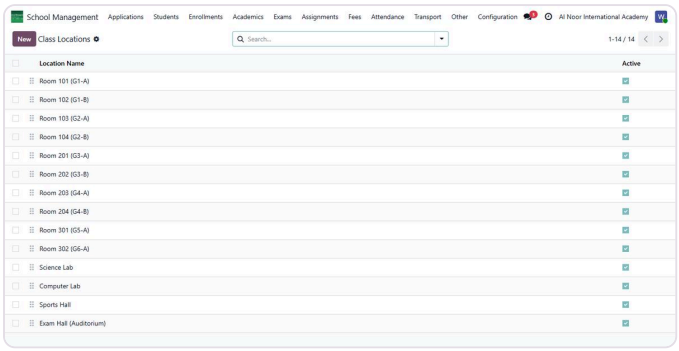

Name, **subject code**, grade, an optional section, **credit value**, sequence, an optional grade scale of its own, and Optional Subject. The **Teachers** tab picks the employees who teach it; the **Lesson Plans** tab lists the plans written for it.

Code and name are each unique within a grade. Credits must be 1 or more; they weight the GPA on the report card.

PART 7 Rooms, periods, types, holidays and teachers

BASE

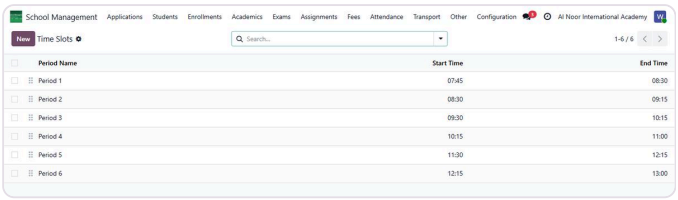

The small lists that the daily screens pick from. Each is set once and then left alone.

1 BASE

Class locations

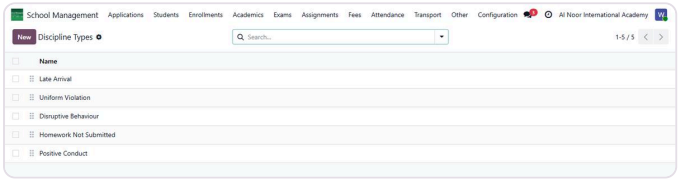

Configuration, Class Locations (Administrator only) lists the rooms a timetable slot can be in. The demo has 14, from Room 101 (G1-A) to the Exam Hall (Auditorium). Untick Active to retire a room.

2 BASE

Time slots

Configuration, Time Slots are the periods of the day with a start and end time. The demo runs Period 1 07:45 to 08:30 through Period 6 12:15 to 13:00.

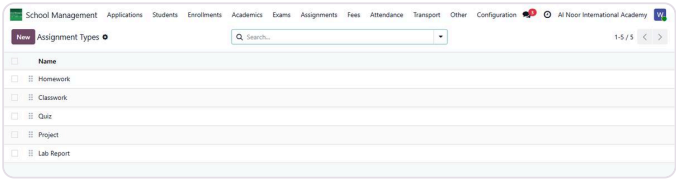

3 BASE

Discipline types

Configuration, Discipline Types are the headings for conduct notes: Late Arrival, Uniform Violation, Disruptive Behaviour, Homework Not Submitted and Positive Conduct. Drag the handle to reorder.

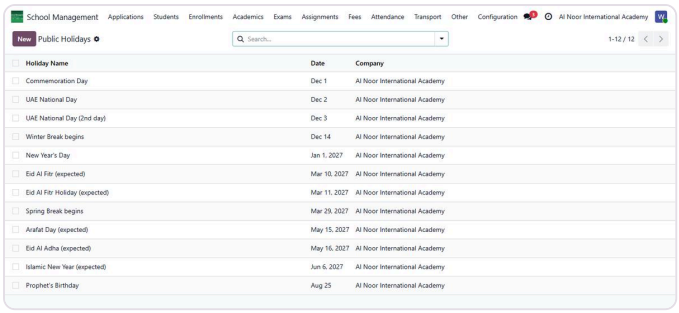

Positive notes go here too. The type is just a label.

4 BASE

Assignment types

Assignments, Assignment Types (Officer) name the kinds of work: Homework, Classwork, Quiz, Project, Lab Report.

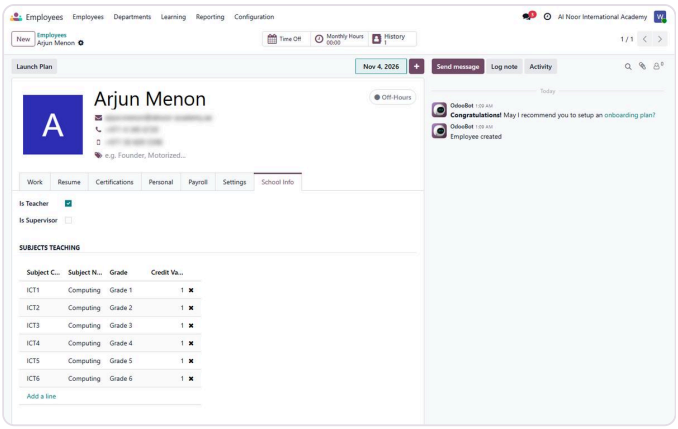

5 BASE

Public holidays

Attendance, Public Holidays (Officer) holds the holiday list: name and date. The demo lists twelve, from Commemoration Day on 1 Dec to Prophet's Birthday.

The list is for reference. Attendance does not skip holidays on its own.

6 BASE

Mark teachers on the employee

In **Employees**, open a teacher and go to the **School Info** tab the module adds. Tick **Is Teacher** or **Is Supervisor** and list the **Subjects Teaching**. The demo shows Arjun Menon teaching Computing in every grade.

Teachers are ordinary employees, so leave, attendance and payroll work for them as usual.

PART 8 Admissions: the application form

BASE

Every child starts as an application. The office takes the details, confirms the place, and one click turns the application into a student and opens the enrollment.

IN THIS PART YOU WILL LEARN

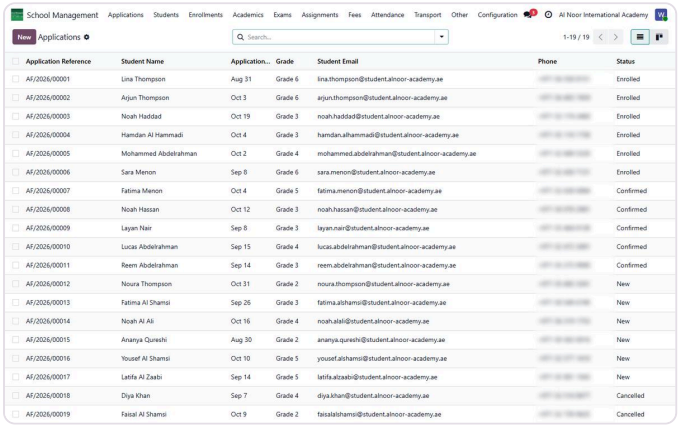

- The four application statuses
- Every field on the form and which ones are required
- What Enroll Student creates
- The email and date of birth checks

TRY IT YOURSELF ON THE DEMO

1. Applications: switch to the card view to see the columns by status
2. Open AF/2026/00012 (New), then AF/2026/00007 (Confirmed), then AF/2026/00001 (Enrolled)

The application path BASE

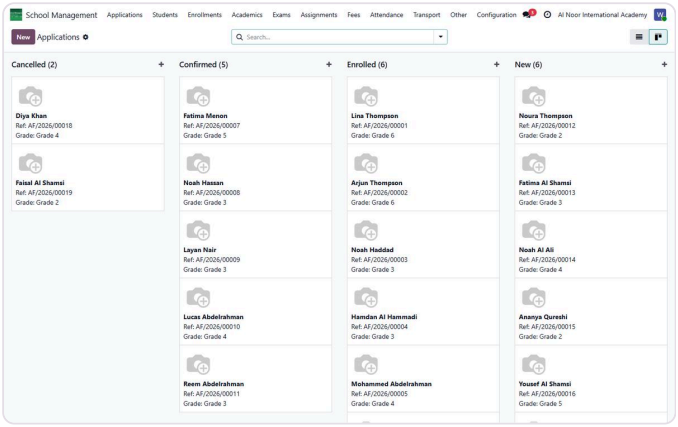

1. **New** — details taken
2. **Confirmed** — place offered
3. **Enrolled** — student created, enrollment opened
4. **Cancelled** — withdrawn, can be reset

1 BASE

Open the applications

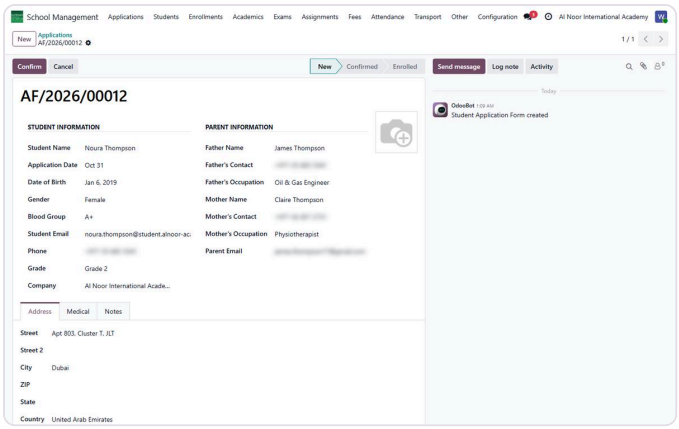

Go to **Applications** (Officer). The list shows the reference, student, date, grade wanted, student email, phone and status. The demo has 19.

2 BASE

See them by status

Switch to the card view. The columns are the statuses: Cancelled (2), Confirmed (5), Enrolled (6) and New (6). This is the admissions pipeline at a glance.

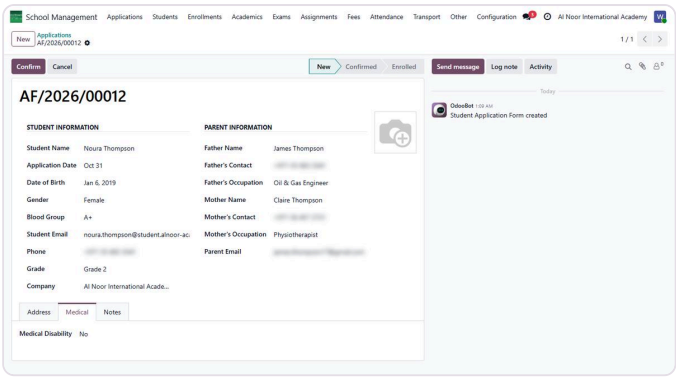

3 BASE

Take a new application

Click **New**. Under Student Information: name, application date, photo, date of birth, gender, blood group, student email, phone, the grade applied for and the company. Under Parent Information: father and mother name, contact and occupation, and the parent email. The reference AF/2026/00012 is given on save.

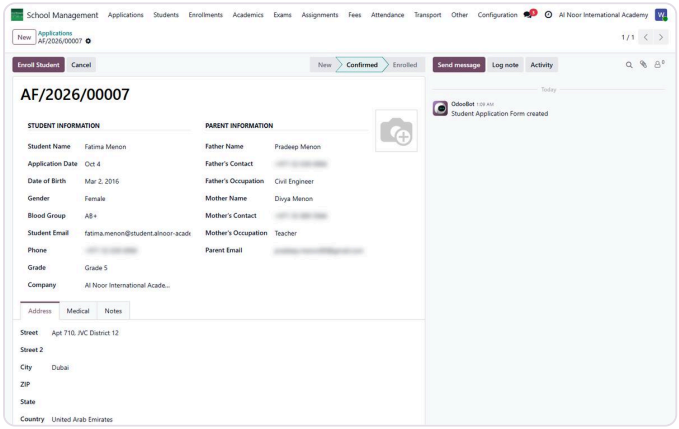

Required: student name, grade, both parents' names, contacts and occupations, parent email, student email and phone. The email must look like an email and the date of birth cannot be in the future.

4 BASE

Address, medical and notes

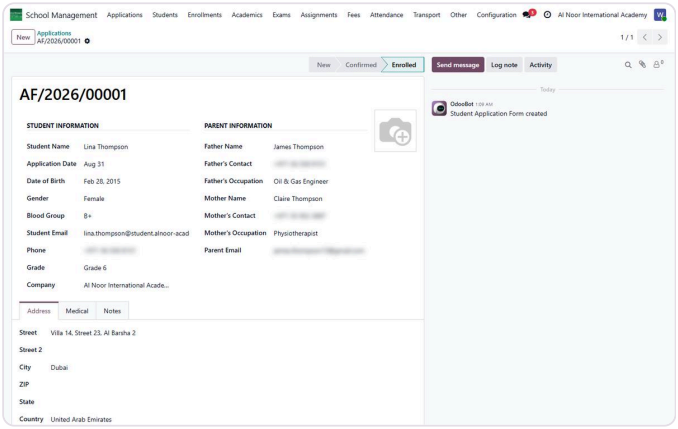

The **Address** tab holds street, city, state, ZIP and country. **Medical** asks Medical Disability yes or no and a free note. **Notes** holds any queries the family raised.

5 BASE

Confirm the place

Click **Confirm** on a New application. It moves to Confirmed and **Enroll Student** appears. **Cancel** withdraws it; **Reset to Draft** brings a cancelled one back to New.

6 BASE

Enroll the student

Click **Enroll Student**. The module creates the student record from the application, copying name, photo, birth date, gender, blood group, contacts, address and both parents, and opens a new enrollment already filled with the student, the grade and the application. Pick the session, year, section and fee structure and save.

The application stays linked to the student. If the student was already created, the button opens a fresh enrollment for the same student instead of a second student.

> Clicking Enroll Student opens the enrollment form; it does not change the application status by itself. Move the application to Enrolled once the enrollment is saved, so the pipeline stays true.

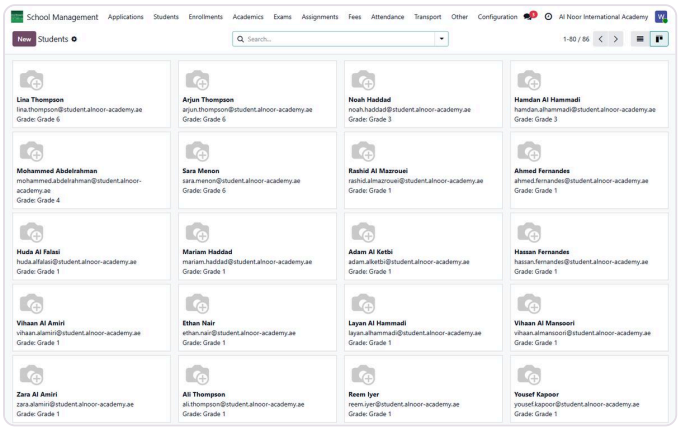

PART 9 The student record

BASE

One record per child, kept for as long as the child is with the school. It holds who they are and who to call. Grades, marks and fees live on the enrollment, so the student record does not change when the year does.

TRY IT YOURSELF ON THE DEMO

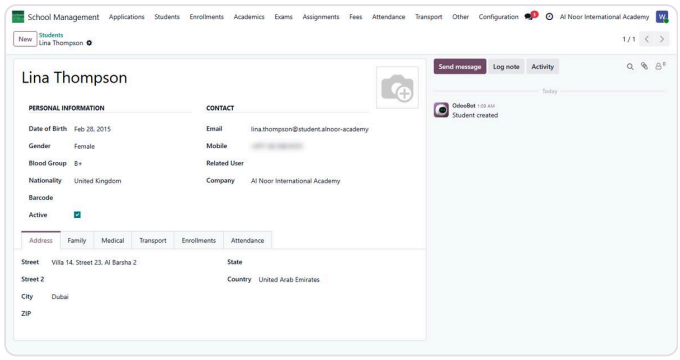

1. Students: open Lina Thompson
2. Click through the six tabs: Address, Family, Medical, Transport, Enrollments, Attendance

1 BASE

Browse the students

Go to **Students**. The card view shows photo, name, email and current grade; the list view adds mobile, gender and active. The demo has 86.

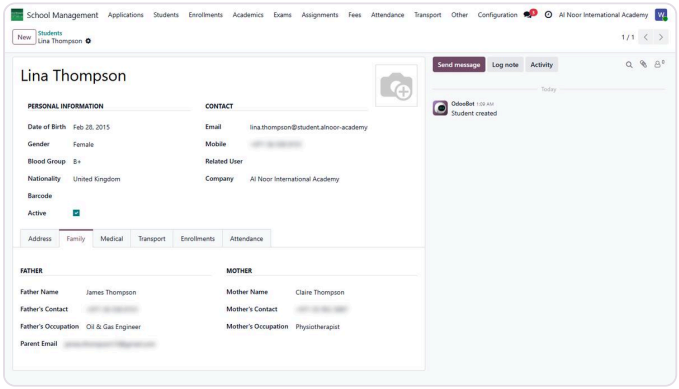

2 BASE

The top of the form

Personal information: date of birth, gender, blood group, nationality, barcode, active. Contact: email, mobile, a related Odoo user if the student has a login, and the company. The Address tab is open below.

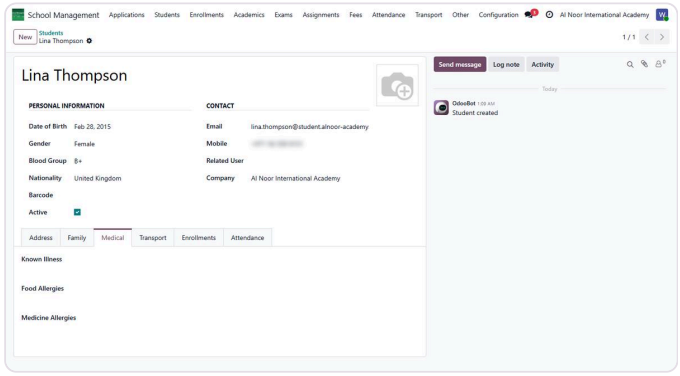

Email and mobile are required and the email must be unique across all students.

3 BASE

Family

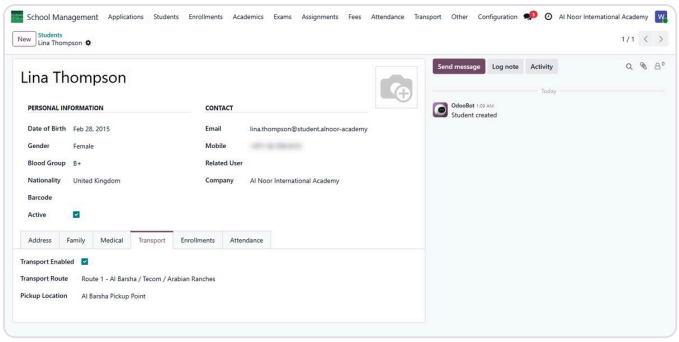

Father and mother: name, contact and occupation, and the parent email. Both names and the parent email are required.

4 BASE

Medical

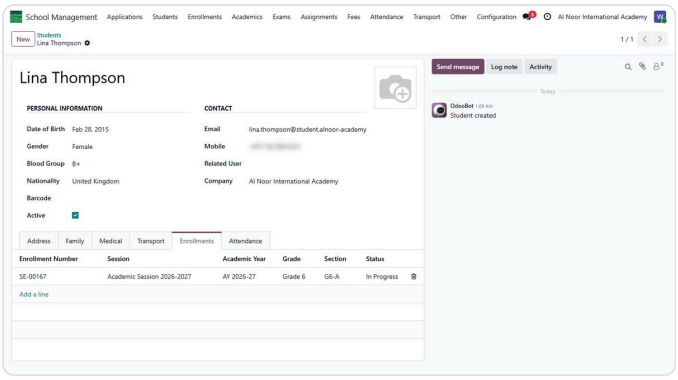

Known illness, food allergies and medicine allergies, as free text the nurse or class teacher can read.

5 BASE

Transport

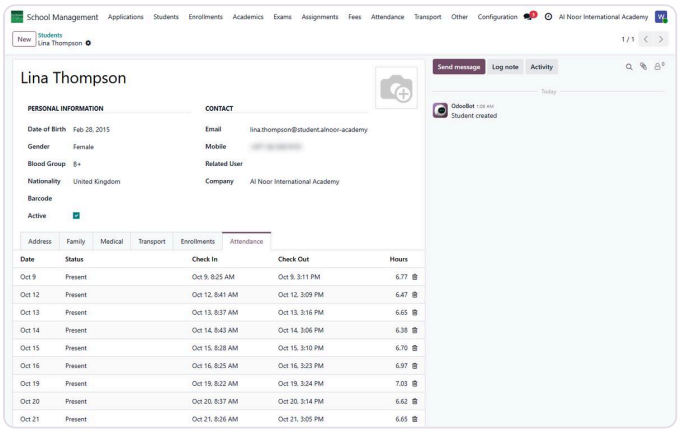

Tick **Transport Enabled**, pick the **route** and the **pickup location**. Lina rides Route 1 from the Al Barsha Pickup Point. This is what puts the student on the route's list.

6 BASE

Enrollments

Every enrollment the student has had, one per year: number, session, academic year, grade, section, status. The one In Progress is the current enrollment and sets the current grade on the cards.

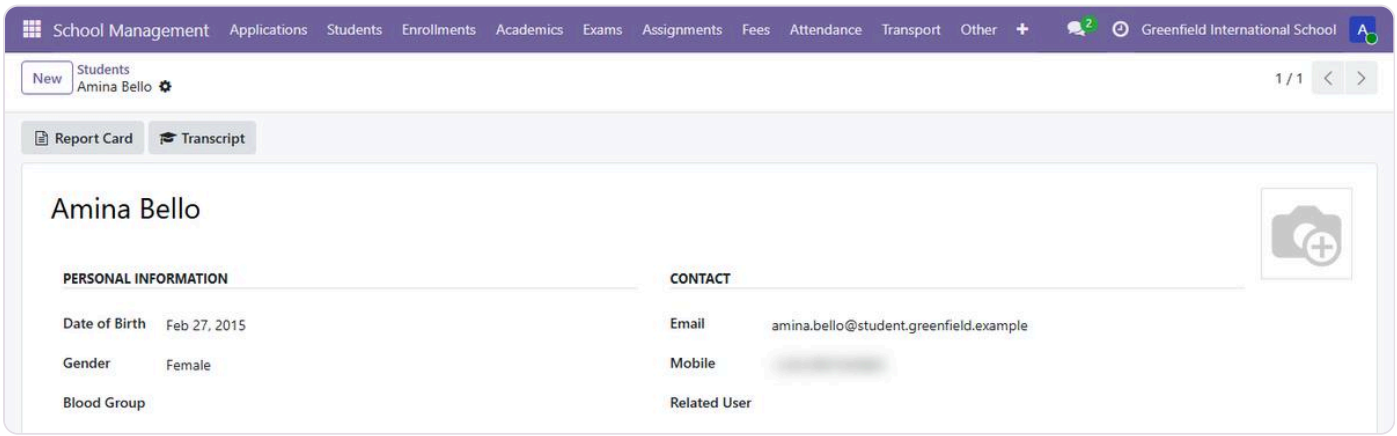

7 BASE

Attendance

Every attendance line for the student: date, present or absent, check in, check out and hours. Lina was in from 08:25 to 15:11 on 9 Oct, 6.77 hours.

Buttons the add-ons put on this form ACADEMIC REPORTS

ACADEMIC REPORTS With Academic Reports installed the student form gets **Report Card** and **Transcript** buttons at the top. Part 20 shows both.

PART 10 Enrollment: a student in a year

BASE

The enrollment is the record the office works from all year. It places the student in a session, an academic year, a grade and a section, sets the fee structure and the payment term, and collects subjects, fee slips, scholarships, service hours and discipline notes.

IN THIS PART YOU WILL LEARN

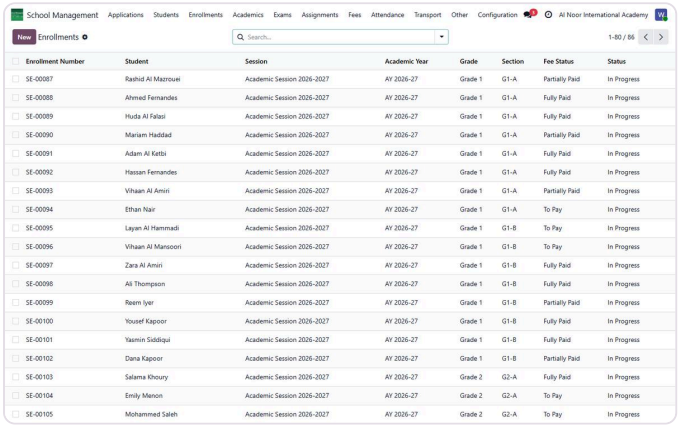

- The six enrollment statuses and the buttons that move them
- How the fee totals and fee status are worked out
- What each of the six tabs holds

TRY IT YOURSELF ON THE DEMO

1. Enrollments: open SE-00087, Rashid Al Mazrouei
2. Read the fee information on the right
3. Open the Fee Slips tab and compare it with the totals

Enrollment statuses BASE

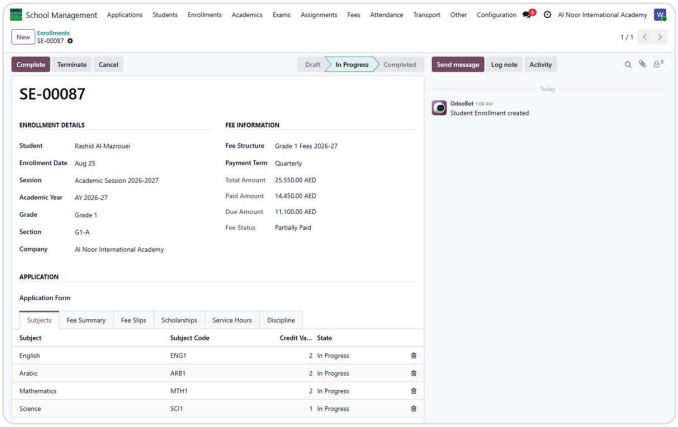

1. **Draft** — being filled in
2. **In Progress** — Confirm: the current year
3. **Completed** — year finished
4. **Promoted** — from Completed: moving up
5. **Terminated / Cancelled** — left or withdrawn

1 BASE

Open the enrollments

Go to **Enrollments**. Each row is a student in a year: number, student, session, year, grade, section, fee status and status. All 86 demo enrollments are In Progress.

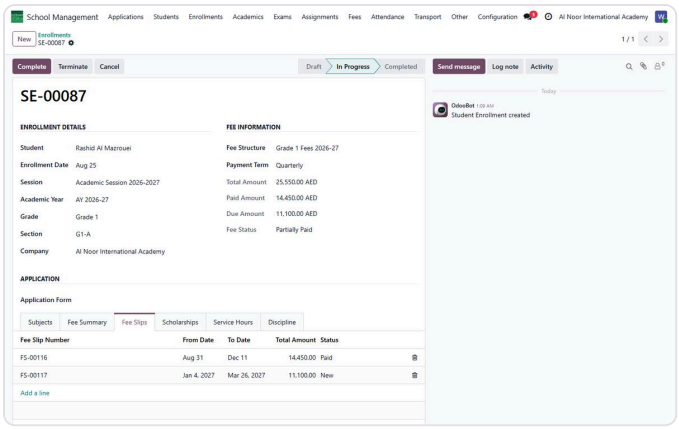

2 BASE

Read the enrollment

Enrollment details: student, enrollment date, session, academic year, grade, section, company, and the application it came from. Fee information: fee structure, payment term (monthly, quarterly, annual or custom), and the totals. SE-00087 is on Grade 1 Fees 2026-27, paid quarterly.

Session, year, grade and fee structure are required.

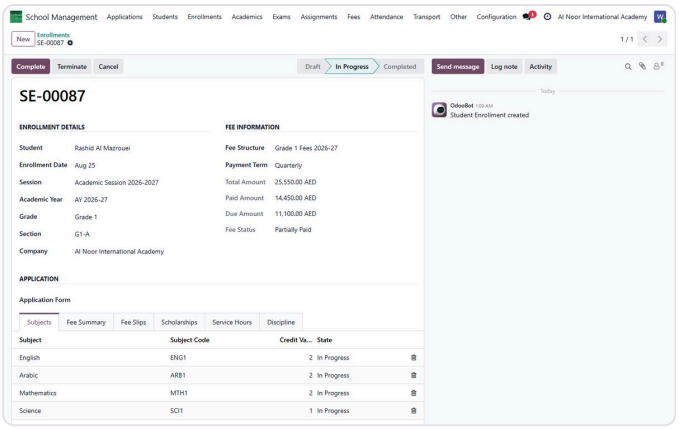

3 BASE

Fee slips and the totals

The **Fee Slips** tab lists the slips raised for this enrollment. **Total Amount** is the sum of all slips, **Paid Amount** the sum of slips marked Paid, **Due Amount** the difference. Rashid has 25,550.00 AED raised, 14,450.00 paid and 11,100.00 due, so the fee status reads Partially Paid.

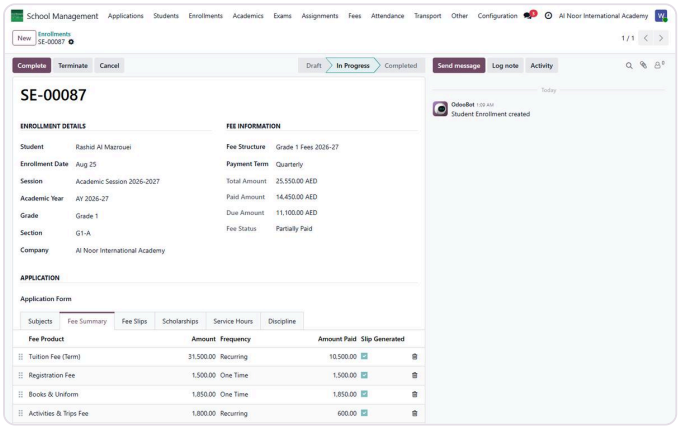

Fee status is To Pay, Partially Paid or Fully Paid, worked out from the slips. Part 15 covers the slips.

4 BASE

Subjects

The **Subjects** tab holds one line per subject the student takes, with code, credits and status. Student assignments hang off these lines, and the report card reads them.

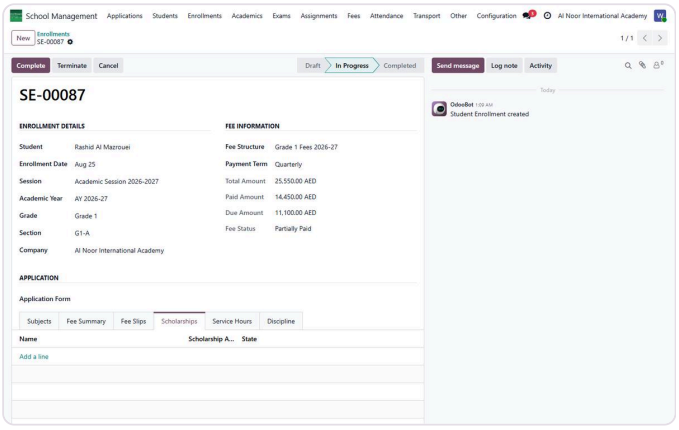

5 BASE

Fee summary

A plan of what the student should pay: fee product, amount, frequency, amount paid and a Slip Generated tick. Rashid's shows the term tuition, recurring.

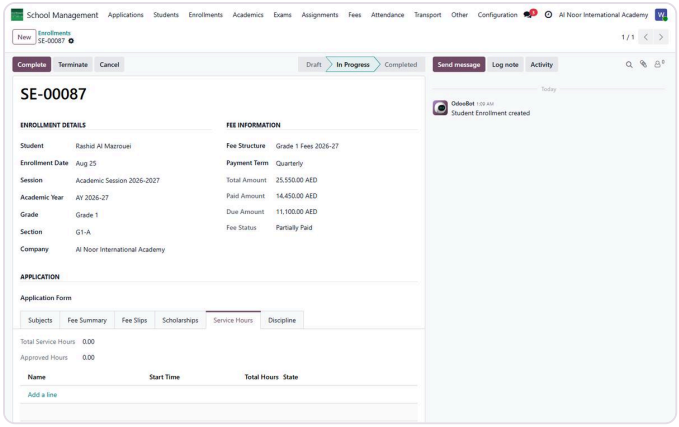

The summary is a planning list you keep by hand. Fee slips are raised separately.

6 BASE

Scholarships

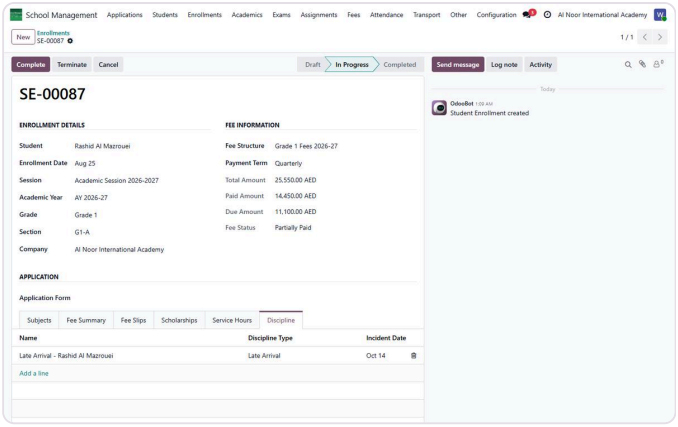

Scholarships granted on this enrollment, with amount and status. Part 16.

7 BASE

Service hours

Community service logged for the student, with Total Service Hours and Approved Hours added up at the top. Part 19.

8 BASE

Discipline

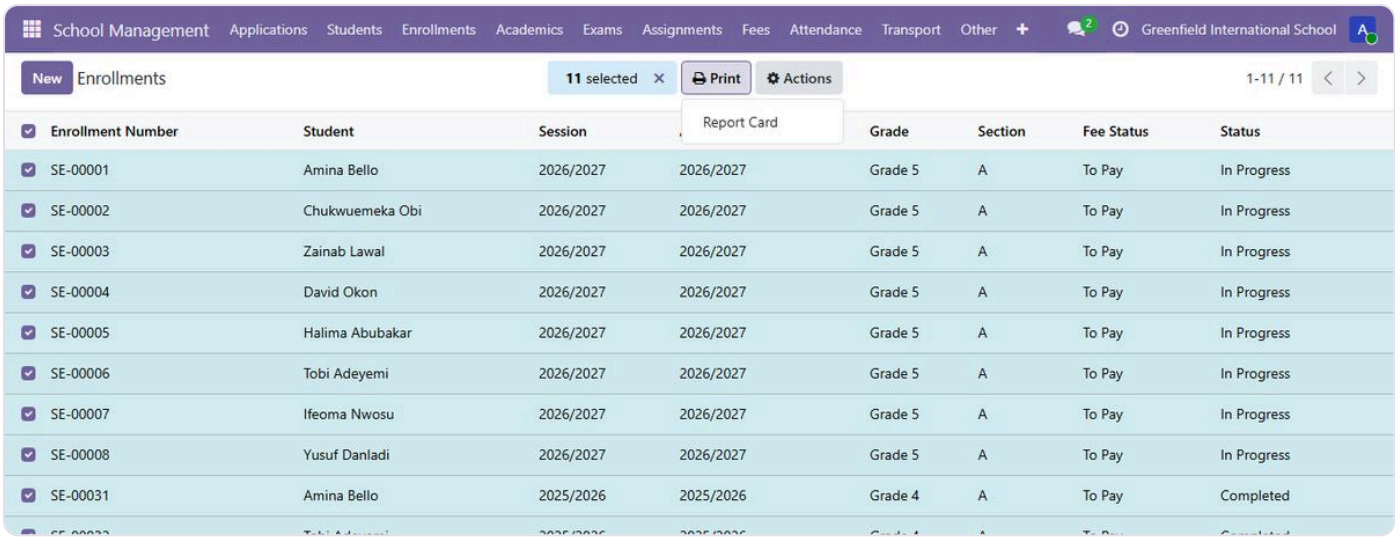

Conduct notes for the student this year: name, type, date. Rashid has one Late Arrival on 14 Oct.

The status buttons BASE

Button	From	Moves to
Confirm	Draft	In Progress (only an In Progress enrollment counts as the current one)
Complete	In Progress	Completed
Promote	Completed	Promoted
Terminate	In Progress or Completed	Terminated
Cancel	Draft, In Progress or Completed	Cancelled
Reset to Draft	Cancelled	Draft

Promote only changes the status. It does not open next year's enrollment; create that as a new enrollment for the student. The module also does not stop a second enrollment for the same student in the same session, so check the student's Enrollments tab first.

Printing from the enrollment ACADEMIC REPORTS

ACADEMIC REPORTS With Academic Reports installed, select enrollments in the list and use **Print, Report Card** to print a card for each. The Enterprise add-on adds Result Card and ID Card to the same menu.

PART 11 Classes and the timetable

BASE

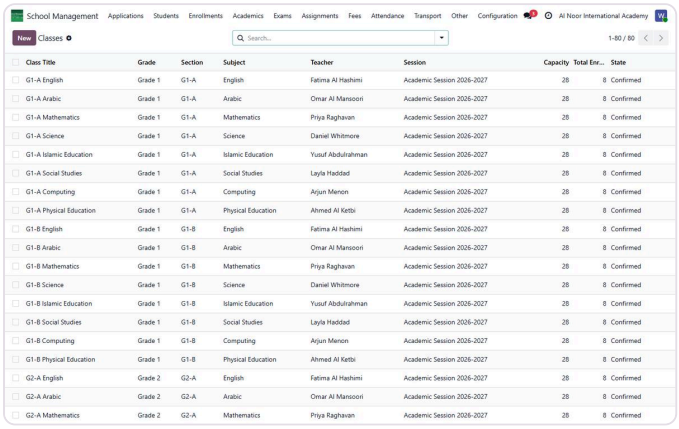

A class is one subject taught to one section in one term, by one teacher, to a list of students. The timetable is the individual lessons of that class, each in a period, a room and on a day.

IN THIS PART YOU WILL LEARN

- What a class record holds and its three statuses
- Putting students into a class
- Timetable slots and how they run from Draft to Completed

TRY IT YOURSELF ON THE DEMO

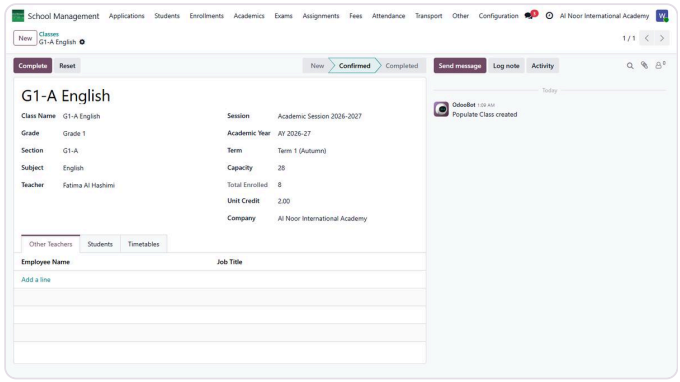

1. Academics, Classes: open G1-A English
2. Open its Students and Timetables tabs
3. Academics, Timetables: open a Running slot

1 BASE

Open the classes

Go to **Academics, Classes**. Each row is a class: title, grade, section, subject, teacher, session, capacity, total enrolled and state. The demo has 80, all Confirmed.

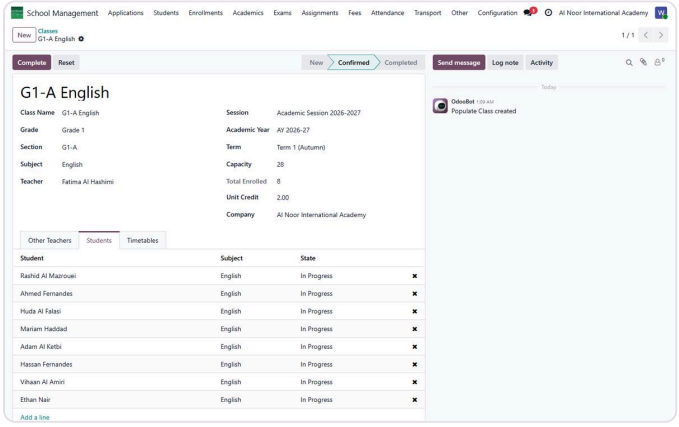

2 BASE

Read a class

G1-A English: Grade 1, section G1-A, subject English, teacher Fatima Al Hashimi, session 2026-2027, AY 2026-27, Term 1 (Autumn), capacity 28, 8 enrolled, unit credit 2.00. The **Other Teachers** tab lists co-teachers.

Grade, session, term, teacher, subject and capacity are required. Buttons: **Confirm** (New), **Complete** (Confirmed) and **Reset**.

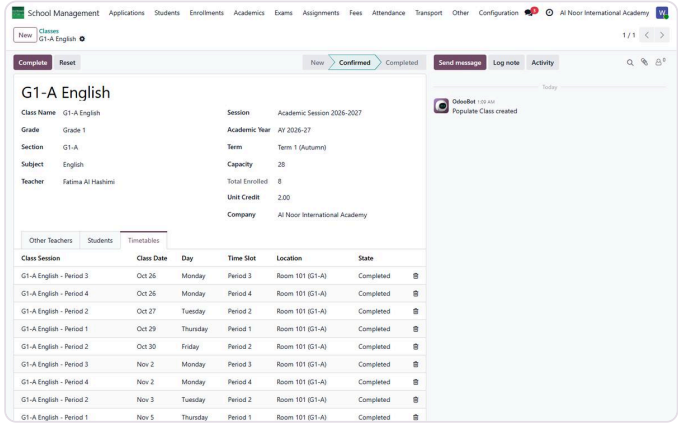

3 BASE

The students in the class

The **Students** tab picks student subject lines, so a student is added to the English class through their English subject line. Total Enrolled counts them.

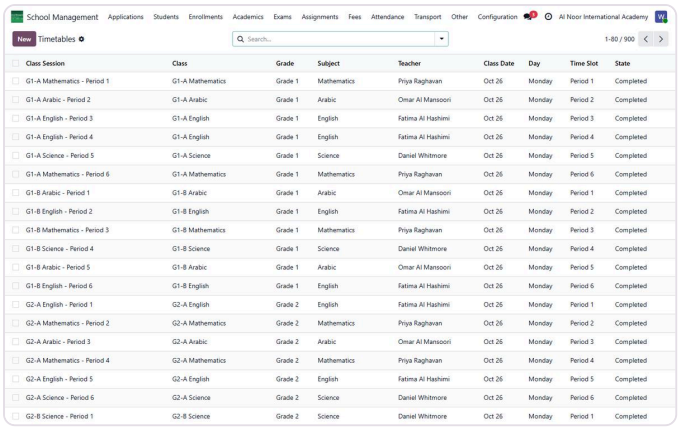

Capacity is shown, not enforced. Watch the count when you add students.

4 BASE

The class timetable

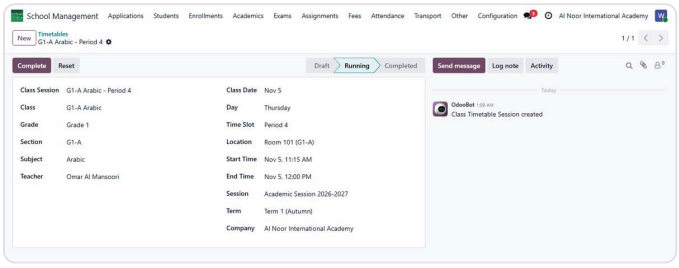

The **Timetables** tab lists the lessons of this class: session name, date, day, time slot, location and state.

5 BASE

All timetable slots

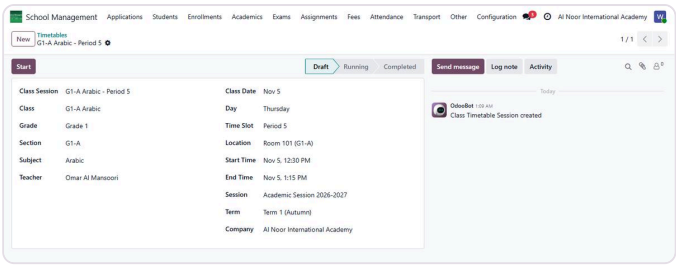

Academics, Timetables lists every lesson: 900 on the demo, filterable by class, teacher, day or state.

7 BASE

Run the lesson

Start moves a Draft lesson to Running; **Complete** closes it; **Reset** takes it back to Draft. G1-A Arabic Period 4 on 5 Nov is Running, 11:15 to 12:00 in Room 101.

6 BASE

One lesson

Each slot holds a class session name, the class, grade, section, subject, teacher, the class date and day, the time slot, location, start and end time, session and term.

> Timetable slots are entered one by one or imported; the module does not build a timetable for you and does not check for two lessons in the same room or with the same teacher at once.

PART 12 Assignments and marks

BASE

Marks enter the system through assignments, at three levels. The teacher writes the work once for the grade, sets it for a class with dates and total marks, and each student gets a line where the mark goes. Those evaluated lines are what the report card adds up.

IN THIS PART YOU WILL LEARN

- Grade assignments, class assignments and student assignments
- Submitting and evaluating a student's work
- How the percentage is worked out
- The term tag that report cards use

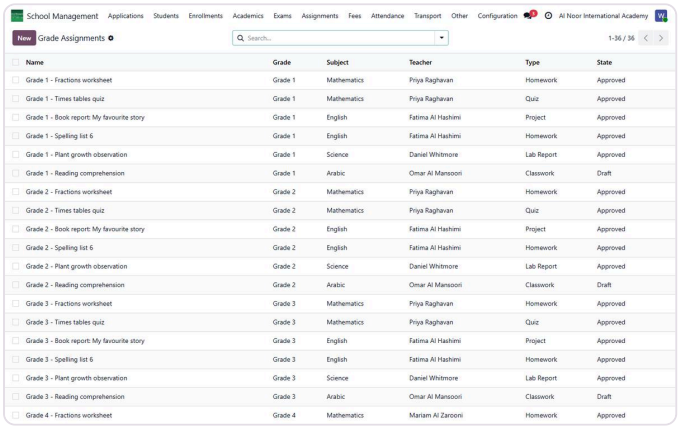

TRY IT YOURSELF ON THE DEMO

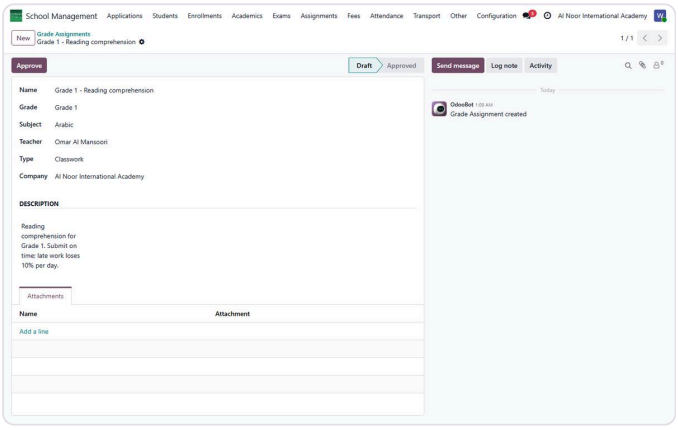

1. Assignments, Class Assignments: open G1-A Fractions worksheet (Completed)
2. Open Rashid Al Mazrouei's line from it
3. Assignments, Student Assignments: filter on Submitted

Three levels BASE

1. **Grade assignment**
   the work, written once per grade
2. **Class assignment**
   set for one class with dates and total marks
3. **Student assignment**
   one line per student, the mark

The grade assignment BASE

1 BASE

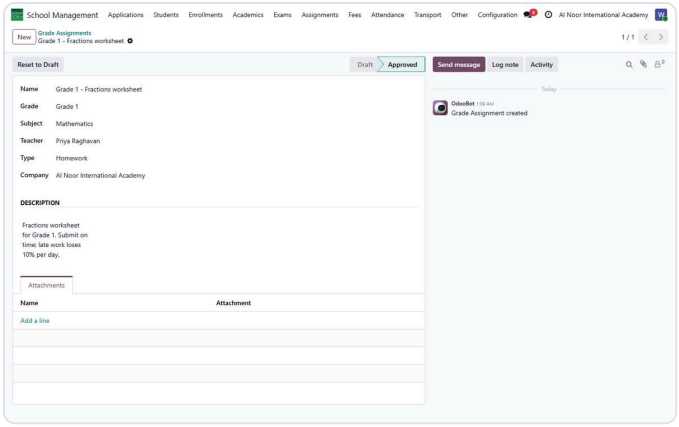

Open the grade assignments

Assignments, Grade Assignments lists the work: name, grade, subject, teacher, type and state. The demo has 36.

2 BASE

Write the work

Name, grade, subject, teacher and type are required. The description is rich text, and the **Attachments** tab holds worksheets. **Approve** moves it from Draft to Approved.

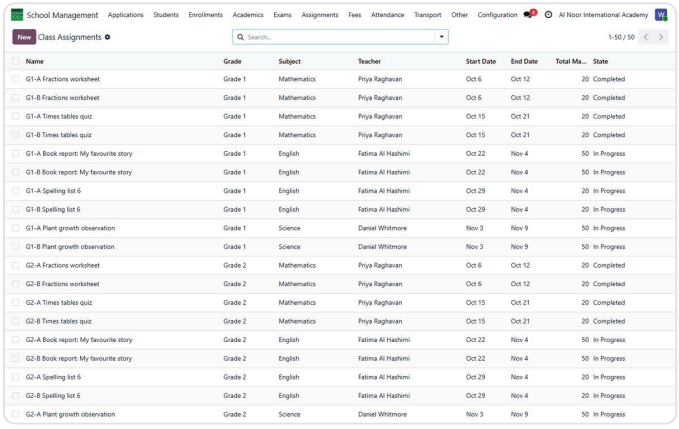

3 BASE

Approved

Grade 1 Fractions worksheet, Mathematics, Priya Raghavan, Homework, Approved. **Reset to Draft** reopens it for changes.

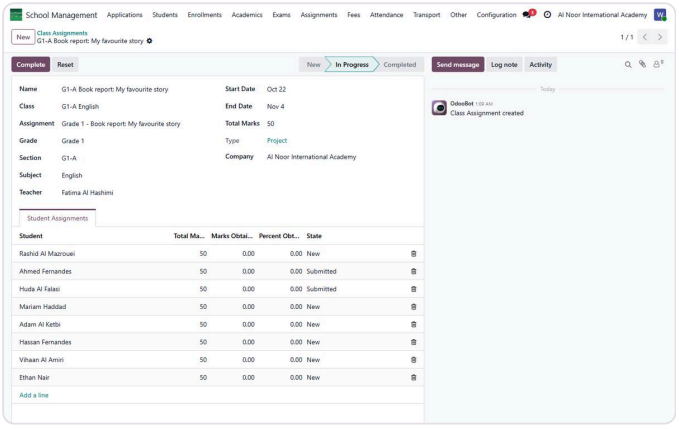

The class assignment BASE

4 BASE

Open the class assignments

Assignments, Class Assignments: one row per class the work is set for, with dates, total marks and state. The demo has 50.

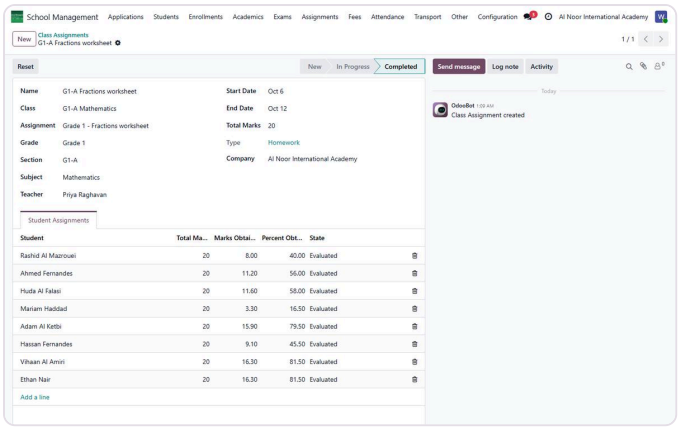

5 BASE

Set it for a class

Pick the grade assignment, the class, grade, section, subject and teacher, the start and end date and the **total marks**. Type and description come from the grade assignment. The Student Assignments tab lists each student's line. **Start** moves it to In Progress.

G1-A Book report, 50 marks, 22 Oct to 4 Nov, In Progress, with lines New and Submitted.

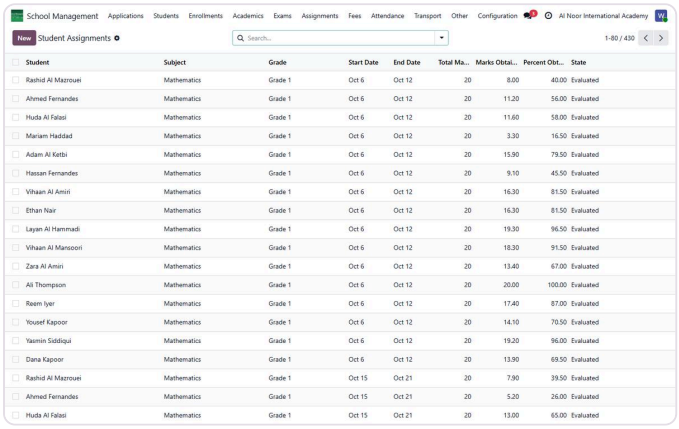

6 BASE

Close it

Complete when the marking is done. G1-A Fractions worksheet, 20 marks, shows every line Evaluated with marks and percentage.

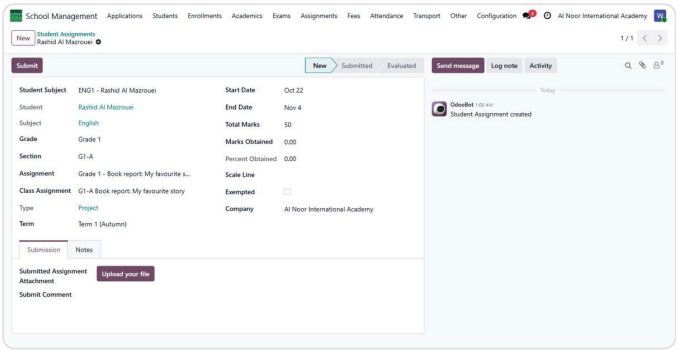

The student assignment BASE

7 BASE

Open the student lines

Assignments, Student Assignments lists every line: student, subject, grade, dates, total, marks obtained, percent and state. The demo has 430.

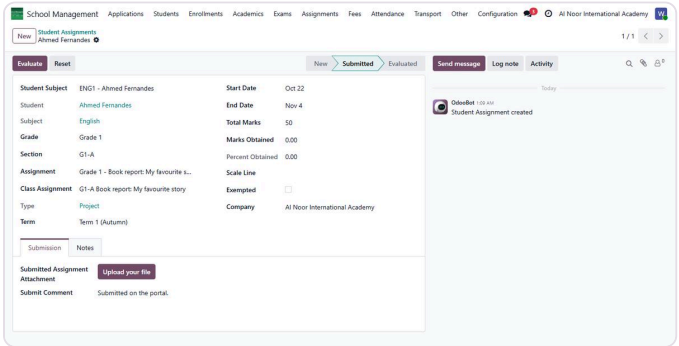

8 BASE

A new line

Each line points at the student subject line (MTH1 - Rashid Al Mazrouei), with grade, section, assignment, class assignment, total marks and the **term**. **Submit** records that the work is in.

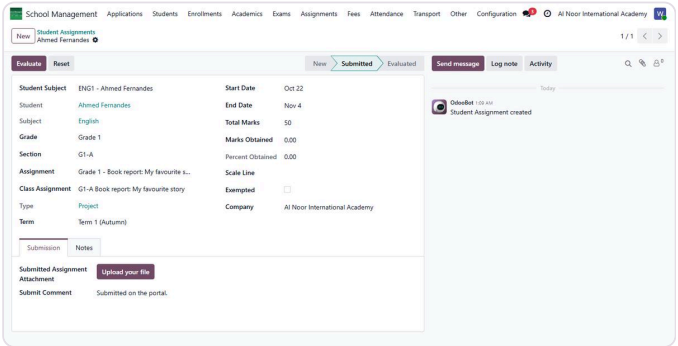

The term decides which report card the mark lands on. Always set it.

9 BASE

The submission

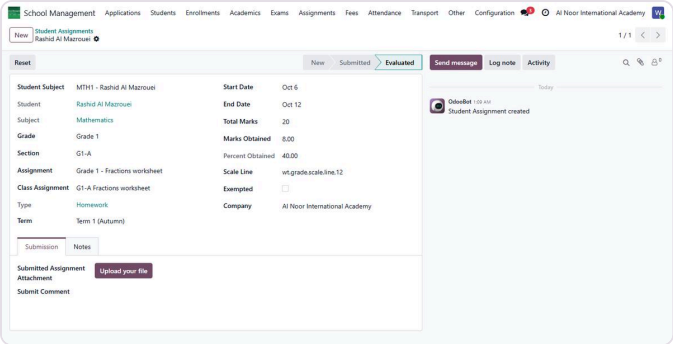

On the **Submission** tab the work can be uploaded as a file with a submit comment. The Notes tab is for the teacher.

10 BASE

Submitted

A submitted line shows **Evaluate**. Enter the marks obtained first.

11 BASE

Evaluated

Rashid scored 8.00 of 20 on the Fractions worksheet: Percent Obtained 40.00. **Exempted** takes a line out of the report card. **Reset** takes the line back to New.

Only Evaluated, non-exempted lines count on the report card. Percent is marks obtained over total marks times 100.

> The Scale Line field on a student line can be set by hand, but the report card does not read it; it picks the letter from the subject's grade scale using the percentage.

PART 13 Exams, submissions and seating

BASE

Exams are a separate engine from assignments: an exam has questions with marks, each student hands in a submission with an answer per question, and the score, percentage and pass or fail are worked out from the marks the teacher gives each answer. Seating plans lay out the hall.

IN THIS PART YOU WILL LEARN

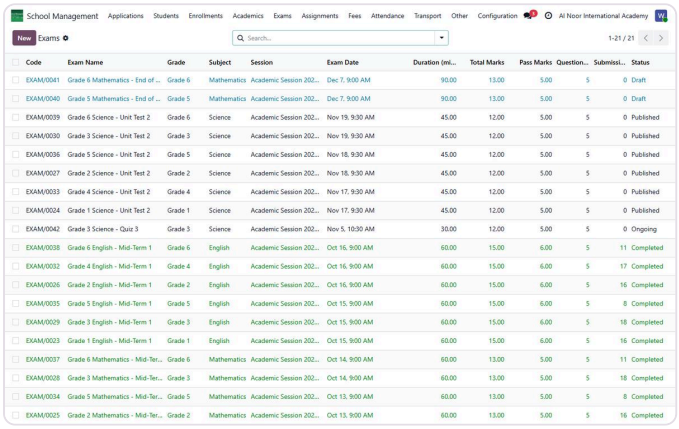

- Building an exam with four question types
- The exam statuses
- Marking a submission and how pass or fail is decided
- Generating and finalising a seating plan

TRY IT YOURSELF ON THE DEMO

1. Exams, Exams: open EXAM/0039 Grade 6 Science Unit Test 2 and its Questions tab
2. Open EXAM/0038 and its Submissions
3. Exams, Seating Plans: open a Finalized plan

Exam statuses BASE

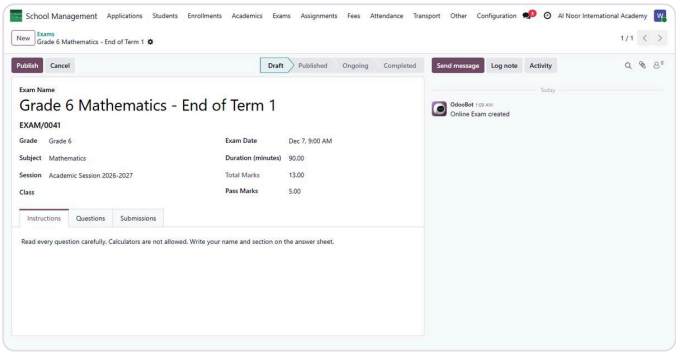

1. **Draft** — questions written
2. **Published** — Publish
3. **Ongoing** — Start Exam
4. **Completed** — Mark Completed
5. **Cancelled** — Cancel, then Reset to Draft

1 BASE

Open the exams

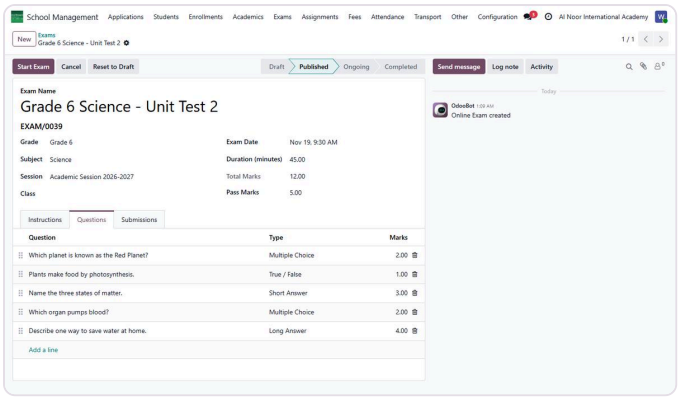

Exams, Exams lists code, name, grade, subject, session, date, duration, total and pass marks, question and submission counts and status. The demo has 21.

2 BASE

Set up an exam

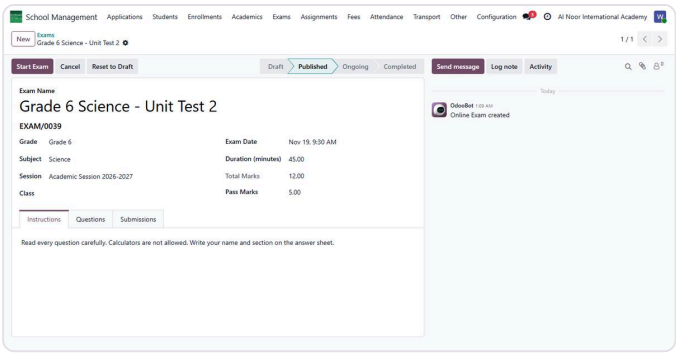

Exam name, grade (required), subject, session, class, **exam date**, duration in minutes and pass marks. The code EXAM/0041 is given on save. The **Instructions** tab is rich text.

3 BASE

Write the questions

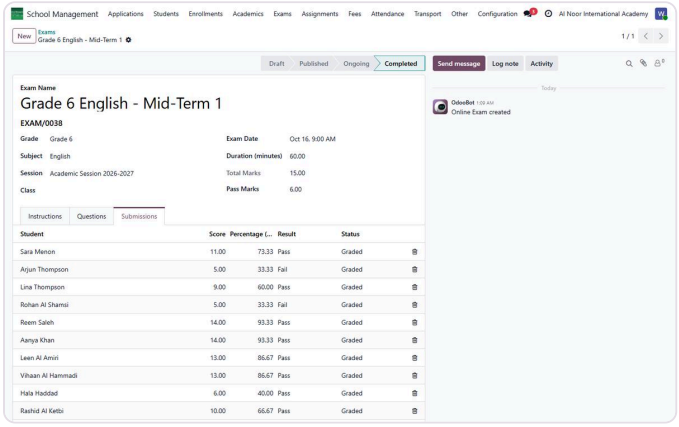

On the **Questions** tab add a line per question: text, type (Multiple Choice, True / False, Short Answer, Long Answer) and marks. A choice question carries its choices with the correct ones ticked; others take a correct answer note. Total Marks is the sum: 12 for EXAM/0039.

4 BASE

Publish and start

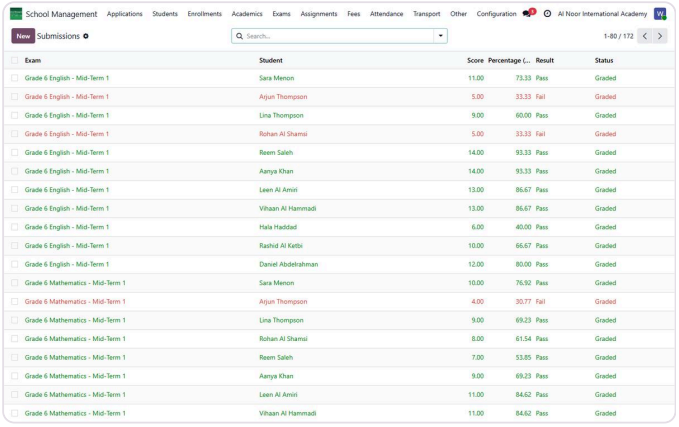

Publish moves the exam to Published; **Start Exam** to Ongoing; **Mark Completed** to Completed. **Reset to Draft** is offered from Published or Cancelled.

5 BASE

Read the results

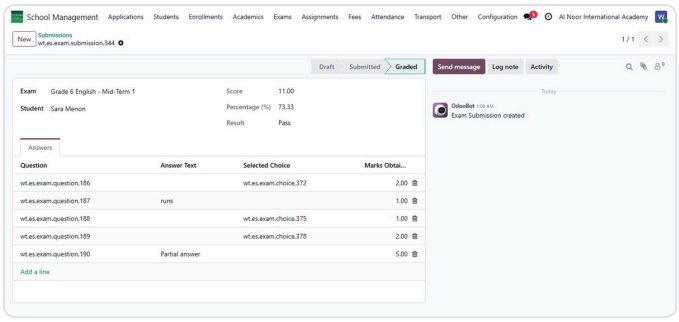

The **Submissions** tab of a completed exam lists every student with score, percentage, result and status. Grade 6 English Mid-Term 1, 15 marks, pass 6: Sara Menon 11.00, 73.33%, Pass.

6 BASE

All submissions

Exams, Submissions lists every submission across exams; fails show in red.

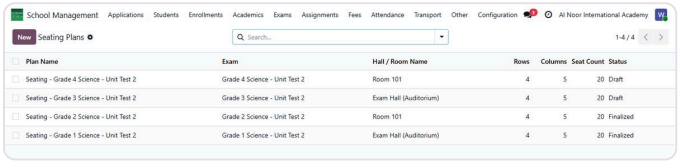

7 BASE

Mark a submission

Each answer line holds the question, the answer text or selected choice, and **marks obtained**. Score is the sum; percentage is score over total marks; result is Pass when the score reaches the pass marks. **Submit**, then **Grade**.

The teacher enters marks obtained on every answer, choice questions included. Nothing is marked automatically.

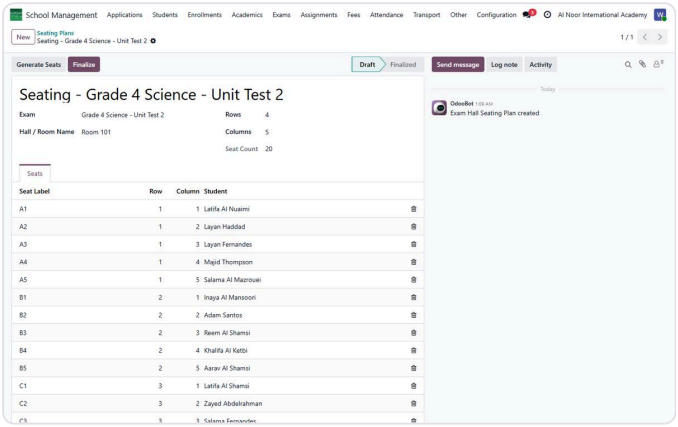

Seating plans BASE

8 BASE

Open the seating plans

Exams, Seating Plans: plan name, exam, hall, rows, columns, seat count and status.

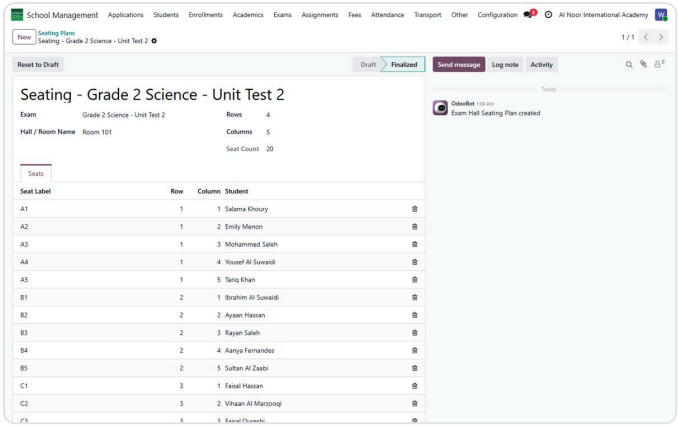

9 BASE

Generate the seats

Name the plan, pick the exam, type the hall, set rows and columns, then click **Generate Seats**. It makes rows times columns seats labelled A1, A2 and on: 4 by 5 gives 20 seats. Pick a student on each seat.

Generating again deletes the seats and starts over, so assign students after the last generate.

10 BASE

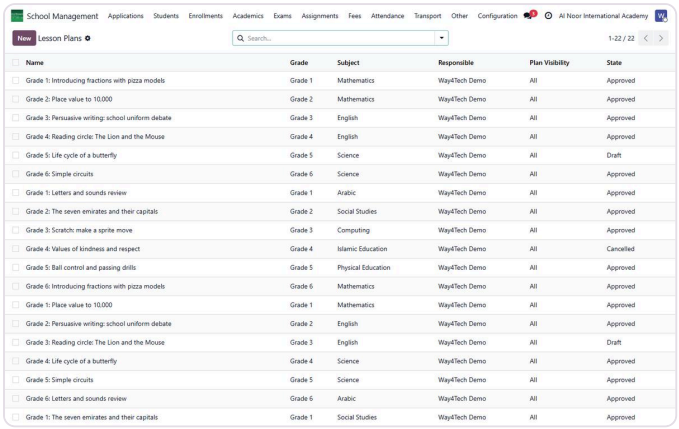

Finalize

Finalize locks the plan as Finalized; **Reset to Draft** opens it again.

PART 14 Lesson plans

BASE

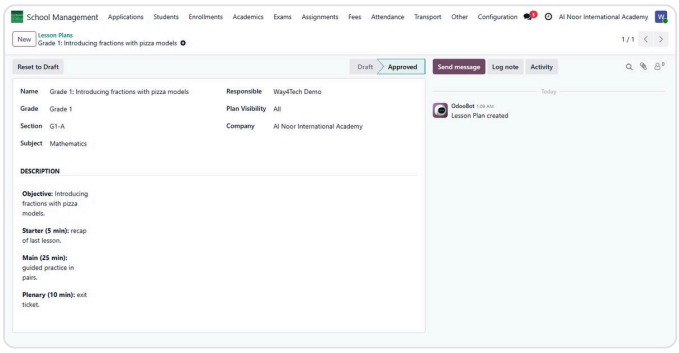

A lesson plan is the teacher's outline for a lesson, filed against a grade and subject and approved by the head of department.

1 BASE

Open the lesson plans

Other, Lesson Plans: name, grade, subject, responsible, visibility and state. The demo has 22.

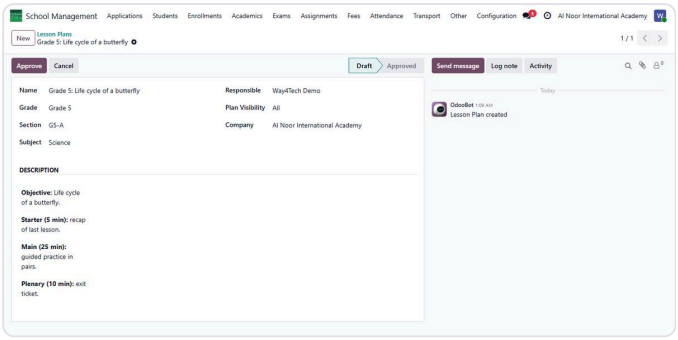

3 BASE

Approved

An approved plan shows **Reset to Draft**. Plans also appear on the subject's Lesson Plans tab.

Only Me is a label. Every school user can still open the plan.

2 BASE

Write a plan

Name, grade, section, subject, the responsible user (you by default), plan visibility (All or Only Me) and the description: objective, starter, main, plenary. **Approve** or **Cancel**.

PART 15 Fees: structures and fee slips

BASE

A fee structure says what a grade pays: tuition, registration, books, trips, each a product with an amount. A fee slip is a bill for one enrollment for a period, with the lines due. The enrollment adds the slips up into what has been raised, paid and is still due.

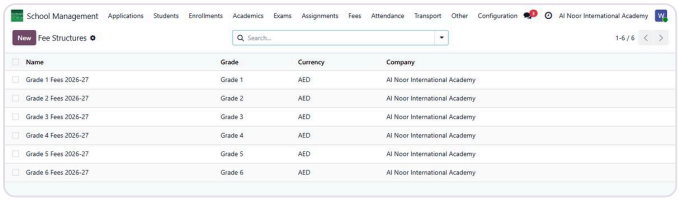

IN THIS PART YOU WILL LEARN

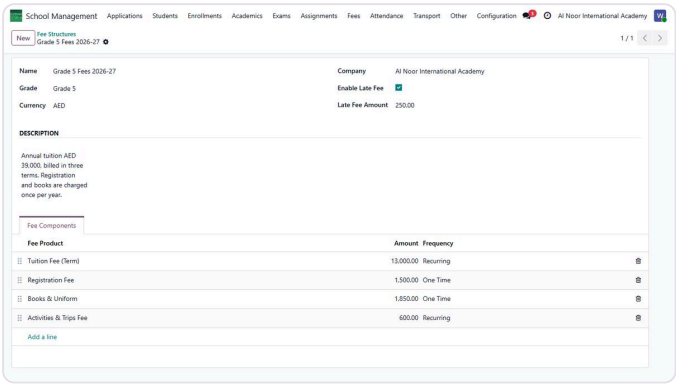

- Building a fee structure from fee products
- The fee slip statuses and buttons
- How a paid slip shows on the enrollment
- What the late fee fields do and do not do

TRY IT YOURSELF ON THE DEMO

1. Fees, Fee Structures: open Grade 5 Fees 2026-27
2. Fees, Fee Slips: open FS-00117 (New), FS-00126 (To Pay), FS-00116 (Paid) and FS-00128 (Overdue)

The fee structure BASE

1 BASE

Open the fee structures

Fees, Fee Structures (Officer): one per grade on the demo, Grade 1 Fees 2026-27 to Grade 6, all in AED.

2 BASE

Read a structure

Name, grade, currency and company, then the **Fee Components**: a fee product, an amount and a frequency, One Time or Recurring. Grade 5: Tuition Fee (Term) 13,000.00 recurring, Registration Fee 1,500.00 one time, Books and Uniform 1,850.00 one time, Activities and Trips 600.00 recurring. The description explains the plan to the office.

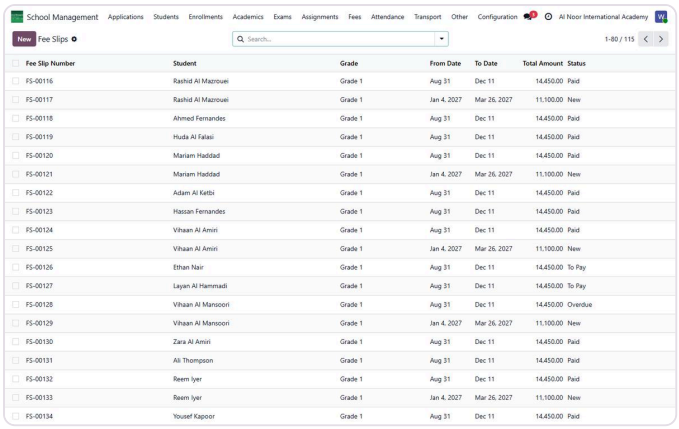

Fee products are ordinary Odoo products. Create them in Invoicing first.

Enable Late Fee and **Late Fee Amount** (250.00 on Grade 5) are stored on the structure but no slip or schedule adds them. Add a late fee line to the slip by hand.

The fee slip BASE

Fee slip statuses BASE

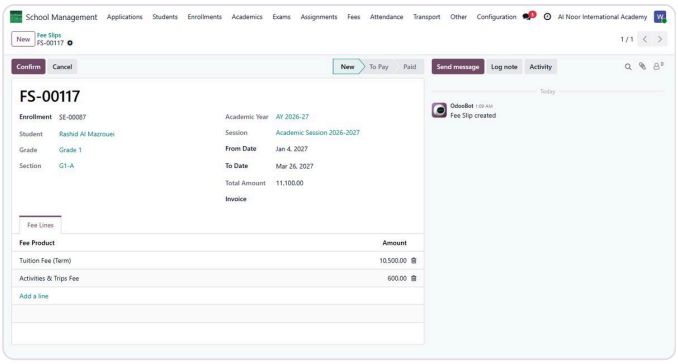

1	2	3	4	5
New	**To Pay**	**Paid**	**Overdue**	**Cancelled**
lines entered	Confirm	Mark as Paid	Mark Overdue	Cancel

3 BASE

Open the fee slips

Fees, Fee Slips: number, student, grade, from and to date, total and status. The demo has 115: 62 Paid, 16 To Pay, 8 Overdue, 29 New.

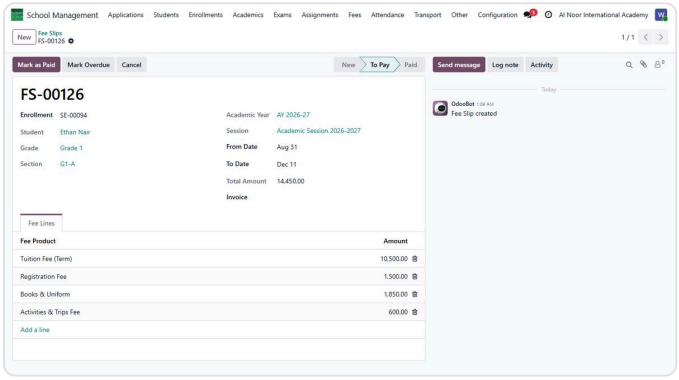

4 BASE

Raise a slip

Pick the **enrollment**; student, grade, section, year and session fill in from it. Set the **from** and **to** date and add the fee lines, each a product and an amount. FS-00117 for Rashid covers 4 Jan to 26 Mar 2027: Tuition 10,500.00 and Activities 600.00, total 11,100.00.

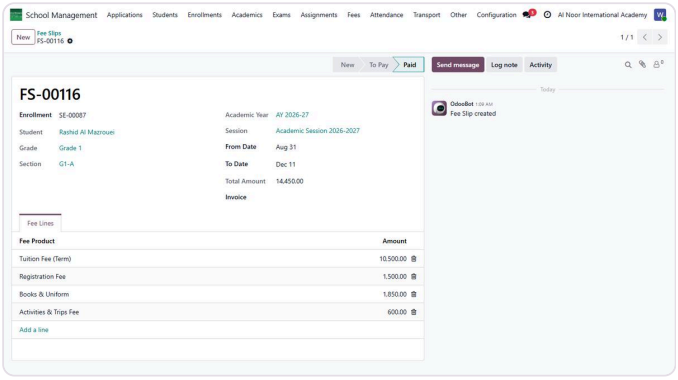

Lines are entered on the slip; they are not copied from the fee structure.

5 BASE

Confirm it

Confirm moves the slip to To Pay. From here the office uses **Mark as Paid** when the money is in, or **Mark Overdue** when the date has passed.

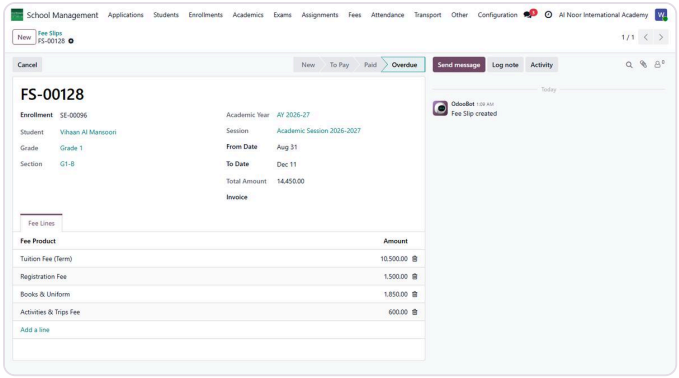

6 BASE

Paid

FS-00116, 31 Aug to 11 Dec, 14,450.00, Paid. The enrollment now counts it in Paid Amount.

Mark as Paid changes the status only. It does not create an invoice or record a payment in Invoicing; take the money there as you do today.

7 BASE

Overdue

FS-00128 is Overdue. Only **Cancel** is offered on an overdue slip.

> An Overdue slip has no Mark as Paid button, and the enrollment's fee status never reads Overdue on its own. If a family pays a slip you marked overdue, the slip cannot be moved to Paid from the form. Mark slips overdue only when you are sure.

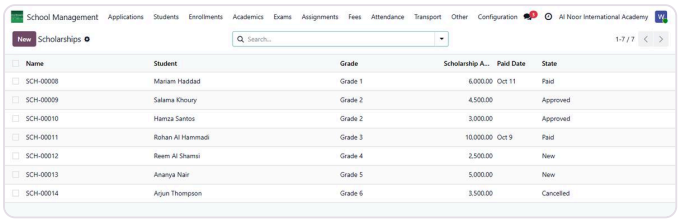

PART 16 Scholarships

BASE

A scholarship records an award to a student against their enrollment: how much, who approved it, and when it was paid.

Scholarship statuses BASE

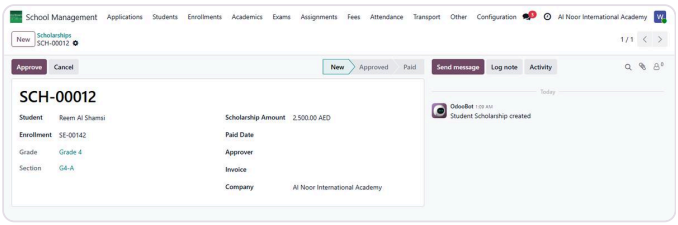

1. **New** — requested
2. **Approved** — Approve: approver set
3. **Paid** — Mark as Paid: date set
4. **Cancelled** — Cancel, then Reset to New

1 BASE

Open the scholarships

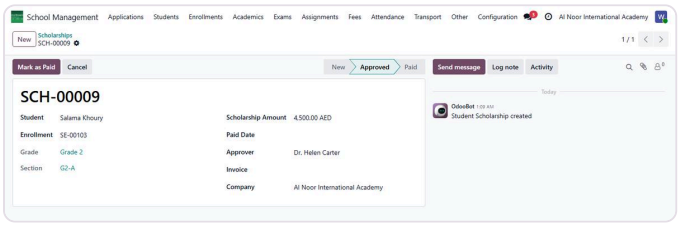

Fees, Scholarships: number, student, grade, amount, paid date and state. The demo has 7.

2 BASE

Record an award

Pick the student and the enrollment (grade and section follow) and the amount. SCH-00012, Reem Al Shamsi, 2,500.00 AED. **Approve** or **Cancel**.

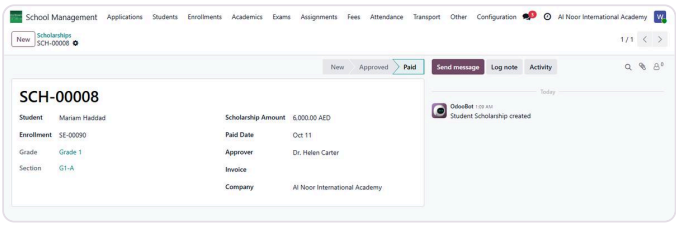

3 BASE

Approved

Approving puts the signed-in user's employee in **Approver**: SCH-00009, 4,500.00 AED, approved. **Mark as Paid** follows.

The approver comes from the user's linked employee; give each approver one.

4 BASE

Paid

Mark as Paid sets the paid date to today: SCH-00008, 6,000.00 AED, paid 11 Oct.

The scholarship does not reduce any fee slip and posts nothing in Invoicing. Lower the slip by hand if the award is a fee discount.

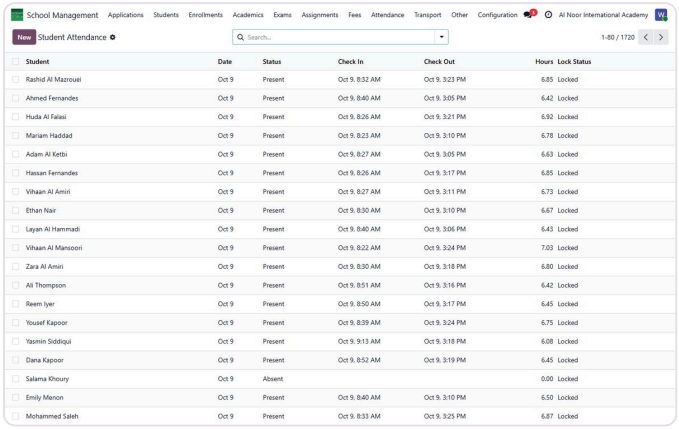

PART 17 Attendance

BASE

One line per student per day: present or absent, with an optional check in and check out. Lines are locked once the day is final, so nobody changes the register afterwards.

TRY IT YOURSELF ON THE DEMO

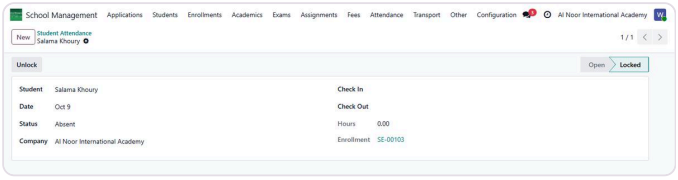

1. Attendance, Student Attendance: group by date
2. Open Salama Khoury on 9 Oct (Absent, Locked)

1 BASE

Open the register

Attendance, Student Attendance: student, date, status, check in, check out, hours and lock status. The demo holds 1,720 lines, 92 of them absent.

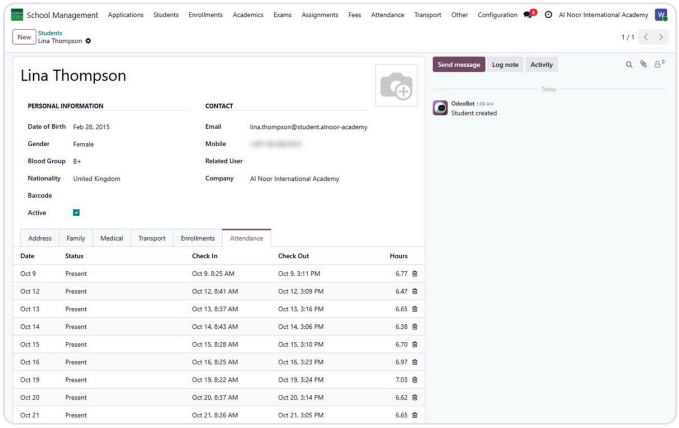

2 BASE

One line

Student, date (today by default), status Present or Absent, check in and check out. **Hours** is worked out from the two times, and the **enrollment** is filled with the student's enrollment that is In Progress. **Lock** freezes the line as Locked; the button beside it on a locked line opens it again.

Mark a whole class quickly by adding lines in the list view, one row per student.

3 BASE

On the student

The same lines show on the student's Attendance tab. The report card counts present and absent lines inside the term.

Student attendance is separate from Odoo Attendances, which the module installs for staff. Public holidays are a list for reference; no line is created or skipped for them.

PART 18 Transport: routes, stops and trips

BASE

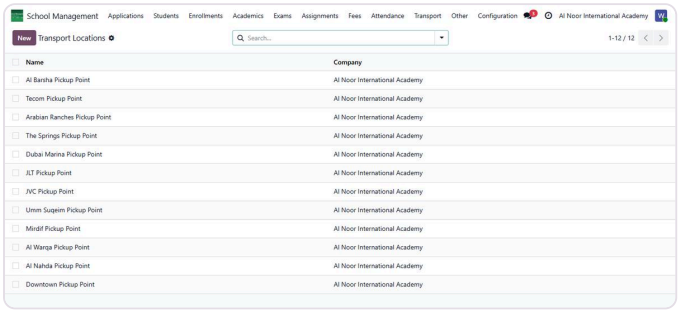

A route is a bus with a manager, a list of stops with times and the students who ride it. A trip is one run of the route on a day, with a tick for each student picked up and dropped off.

IN THIS PART YOU WILL LEARN

- Pickup locations and route stops
- Route capacity and who is on the route
- Running a trip and reading its totals

TRY IT YOURSELF ON THE DEMO

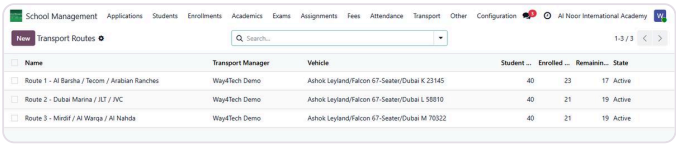

1. Transport, Routes: open Route 1 and its Stops and Students tabs
2. Transport, Trips: open TRIP-00067 (Completed) and TRIP-00122 (In Progress)

1 BASE

Pickup locations

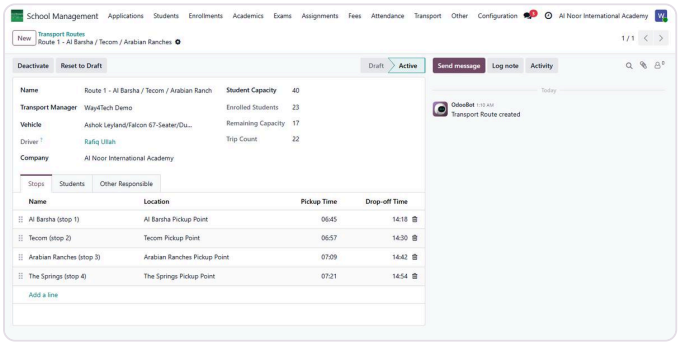

Transport, Locations lists the pickup points: 12 on the demo, from Al Barsha to Downtown.

2 BASE

Open the routes

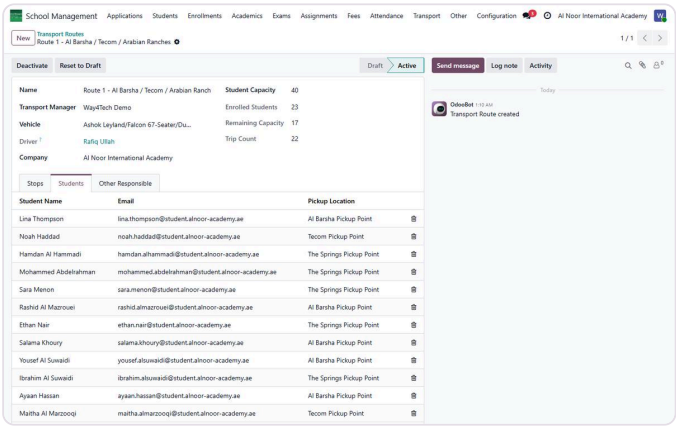

Transport, Routes: name, manager, vehicle, capacity, enrolled, remaining and state. Three routes on the demo, all Active.

3 BASE

Read a route

Name, **transport manager** (required), vehicle from Fleet (the driver follows from the vehicle), student capacity 40, enrolled 23, remaining 17, 22 trips. The **Stops** tab lists each stop with location, pickup and drop-off time: Al Barsha 06:45 and 14:18. **Activate**, **Deactivate**, **Reset to Draft**.

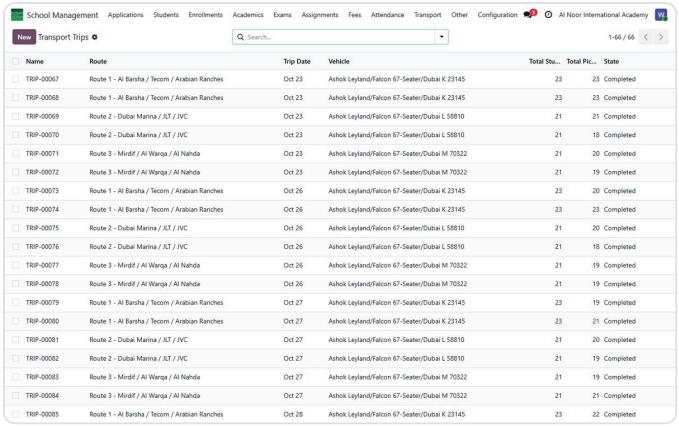

4 BASE

Who rides it

The **Students** tab lists every student whose Transport tab names this route, with email and pickup location. The Other Responsible tab adds more users.

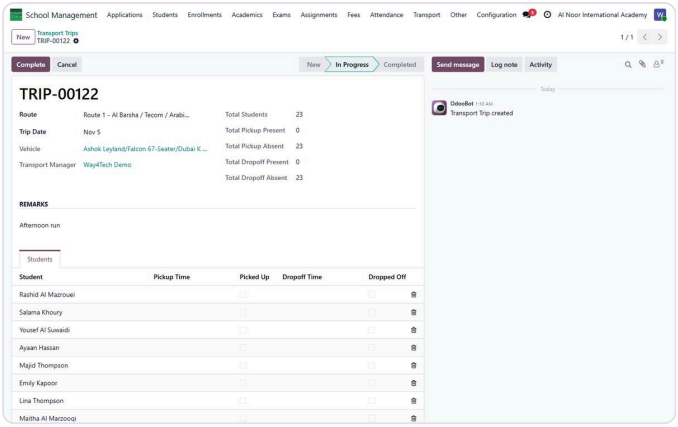

Remaining capacity can go below zero; the module does not stop a 41st student.

5 BASE

Open the trips

Transport, Trips: number, route, date, vehicle, totals and state. 66 on the demo.

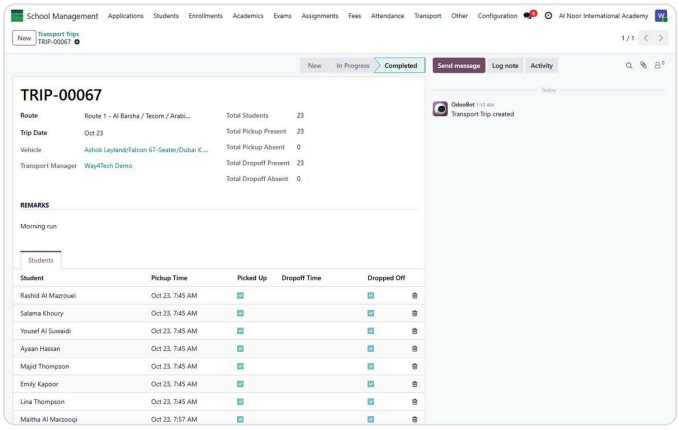

6 BASE

Run a trip

Create a trip for the route and date (TRIP- number on save) and add a line per student. **Start Trip**, tick **Picked Up** and **Dropped Off** with the times as the bus runs, then **Complete**. TRIP-00122, an afternoon run, has 23 students, none ticked yet.

Student lines are added to the trip by hand; they are not copied from the route.

7 BASE

A completed trip

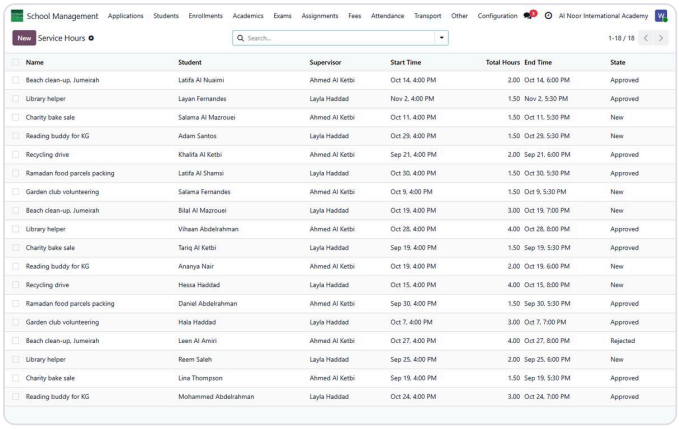

TRIP-00067, morning run on 23 Oct: 23 students, 23 picked up, 23 dropped off, 0 absent. **Cancel** and **Reset** are there for a run that did not happen.

PART 19 Service hours, discipline and the notice board

BASE

The Other menu holds the records a pastoral team keeps alongside the timetable.

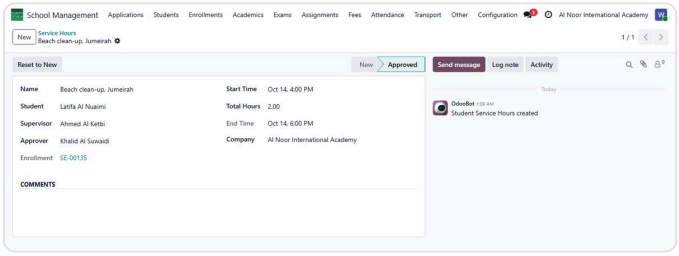

Service hours BASE

1 BASE

Open the service hours

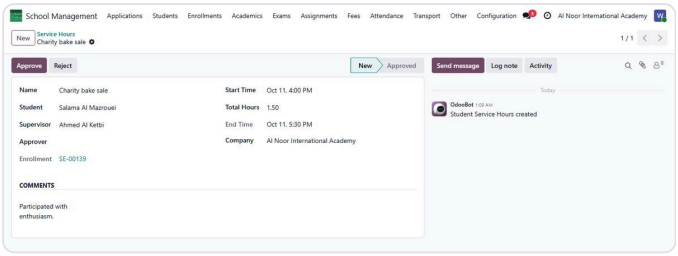

Other, Service Hours: activity, student, supervisor, start, hours, end and state.

3 BASE

Approved

Approving sets the approver to the signed-in user's employee. Approved hours add up on the enrollment's Service Hours tab. **Reset to New** reopens it.

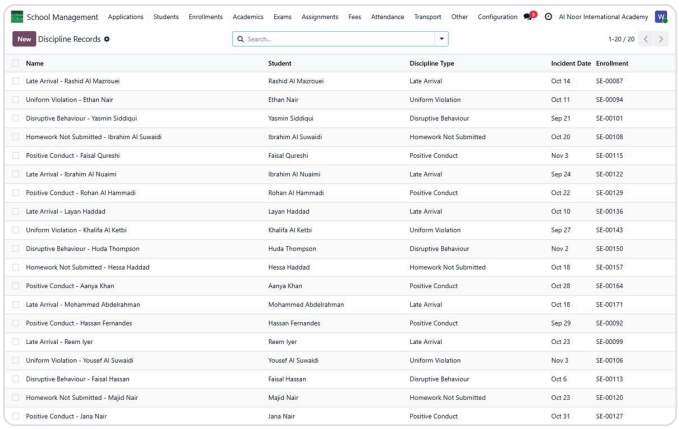

2 BASE

Log hours

Name, student, **supervisor** (an employee), start time and total hours; the end time is worked out. A comment says how it went. **Approve** or **Reject**.

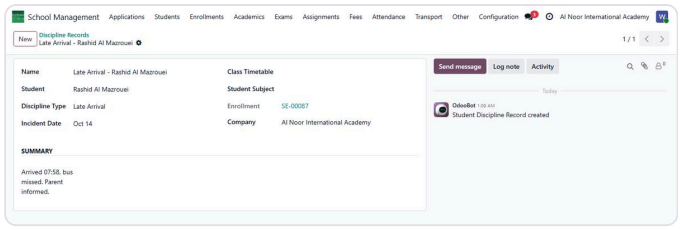

Discipline BASE

4 BASE

Open the discipline records

Other, Discipline: name, student, type, date and enrollment. The demo has 20.

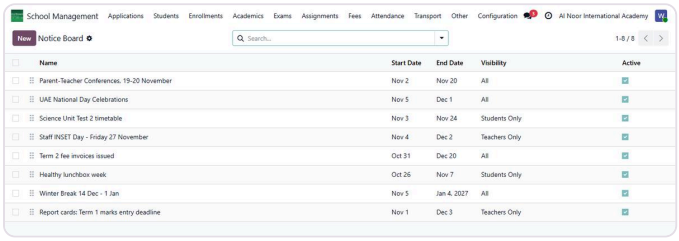

5 BASE

A record

Name, student, discipline type, incident date, an optional timetable lesson and student subject, and a summary. The enrollment fills from the student. These notes print in the Conduct section of the report card.

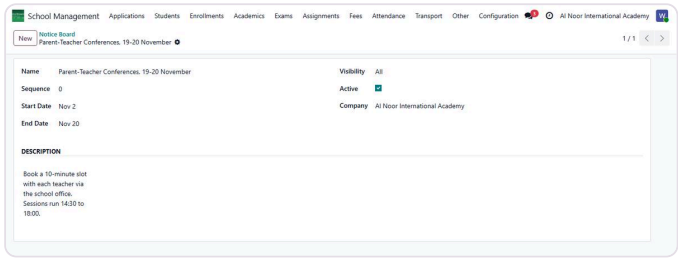

Notice board BASE

6 BASE

Open the notices

Other, Notice Board: name, start, end, visibility and active. Drag to reorder.

7 BASE

Post a notice

Name, start and end date, visibility (All, Students Only, Teachers Only), sequence and the message.

The start must be before the end. Visibility is a label; the board is read inside Odoo by staff, and no record rule hides a notice from anyone.

PART 20 Report cards, result sheets and transcripts

ACADEMIC REPORTS

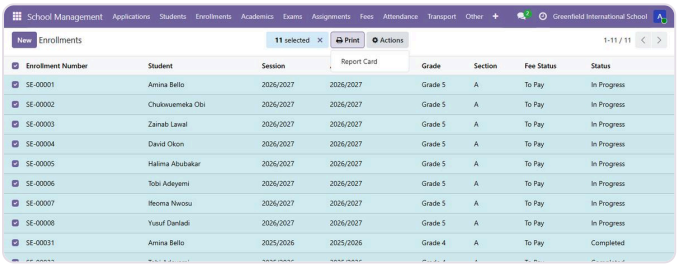

The Academic Reports add-on prints three documents. Nothing is stored: every figure is worked out from the evaluated assignments, the grade scales and the attendance at the moment you print, so a corrected mark shows on the next print.

IN THIS PART YOU WILL LEARN

- Printing one report card, or a whole class in one PDF
- How marks, grade, GPA and position are worked out
- The class result sheet with averages and ranks
- The transcript across years

> These screens come from our own test school, Greenfield International School, because the live demo runs the base module only.

Print a report card ACADEMIC REPORTS

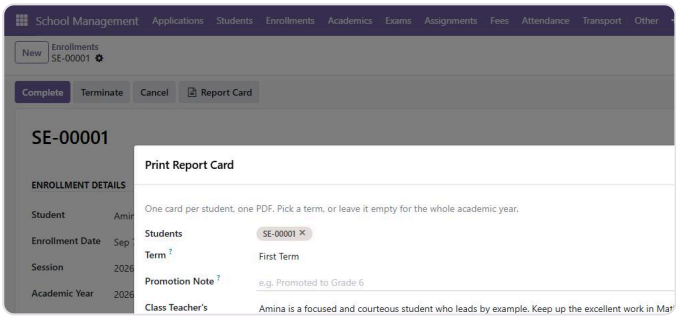

1 ACADEMIC REPORTS

From the enrollment list

Select one or more enrollments, open **Print** and choose **Report Card**. You can also use the **Report Card** button on an enrollment or a student form, or **Academics, Reports, Report Cards**.

From a student, the card is printed for the student's latest enrollment.

2 ACADEMIC REPORTS

Choose the term and add remarks

The Print Report Card window lists the students, the academic year and a **term**; leave the term empty for the whole year. Type the **class teacher's remarks** and a **promotion note** such as Promoted to Grade 6, then **Print**.

One card per student, one PDF. The remarks typed here print on every card in the batch.

CLASS TEACHER'S REMARKS

Amina is a focused and courteous student who leads by example. Keep up the excellent work in Mathematics and Science; a little more care with handwriting in English will make her work shine.

Grading scale (Standard A-F): **A** 80-100% Excellent **B** 70-79.99% Very good **C** 60-69.99% Good **D** 50-59.99% Pass **F** 0-49.99% Below pass mark

Class Teacher | Principal | Parent / Guardian

Printed 09/18/2026 · Greenfield International School · SE-00001

ACADEMIC REPORTS The Student Academic Report Card for one term: school header, student details, a row per subject with teacher, code, credits, number of assessments, marks, out of, %, grade, points and remark, then the total, overall %, grade, credit-weighted GPA, position in class, attendance for the period, the teacher's remarks, the grading legend and three signature lines.

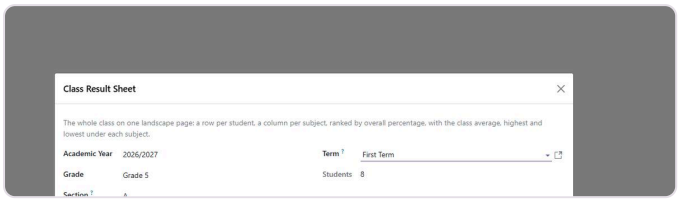

HOW IT WORKS

How the card is worked out

- **Marks**: for each subject the student takes, the sum of marks obtained over the sum of total marks on the student assignments that are Evaluated, not Exempted, and tagged with the term (any term for a full-year card).
- **Grade and points**: the band of the subject's grade scale that holds the percentage; bands are inclusive at both ends. The overall letter uses the grade's own scale.
- **GPA**: the points of each assessed subject weighted by its credits.
- **Position**: rank by overall % among the enrollments of the same session, grade and section that are not cancelled or terminated. Equal percentages share a rank.
- **Attendance**: present and absent lines between the term's start and end date.
- **Conduct**: discipline records of the enrollment dated inside the period.

A full-year card adds every term's marks as they are. The term weightage on the academic year is not applied.

Print the class result sheet ACADEMIC REPORTS

3 ACADEMIC REPORTS

Pick the class

Academics, Reports, Class Result Sheet, or Print from selected enrollments. Choose the academic year, the grade, a section (or none for every section on one sheet) and a term (or none for the year). The window shows how many students it found. **Print**.

Cancelled and terminated enrollments are left out. With no students the window tells you so.

Printed 09/18/2026 · Greenfield International School · Official transcript of Amina Bello

ACADEMIC REPORTS The Academic Transcript: a block per academic year with the full-year marks, position and attendance, then the cumulative GPA, overall average, credits and the span of years.

PART 21 School Enterprise: the second app ENTERPRISE

The Enterprise add-on installs a separate app, School Enterprise, with fifteen menus. Each menu is a small register of its own that points back at the students, grades, sessions and employees of the base module. The parts that follow take them in menu order.

> The live demo does not run the Enterprise add-on. The screens in Parts 21 to 25 are empty forms from our test build, shown so you can see every field.

ENTERPRISE School Enterprise and its menus: Library, Hostel, Health and Medical, Canteen, Sports and Activities, Staff Management, Communication, Finance, Operations, Counseling, Alumni, Campus, Events, then Certificates and Student Welfare under the plus.

Access ENTERPRISE

Group	Rights
School Enterprise / Staff	Read every Enterprise register
School Enterprise / Officer	Read, create and edit, no delete
School Enterprise / Administrator	Everything, including delete. The main admin user gets it on install

Numbering ENTERPRISE

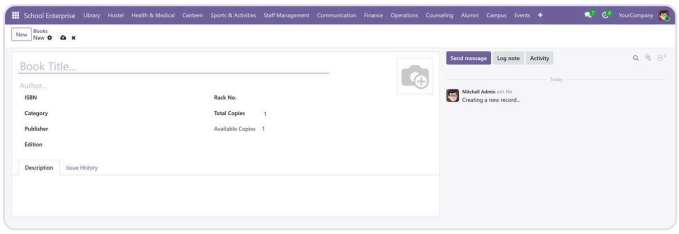

Records are numbered on save: LIB/ book issues, HALL/ hostel allocations, MED/ medical visits, CAN/ canteen orders, EVAL/ teacher evaluations, PM/ parent meetings, MSG/ bulk messages, INST/ instalment plans, EXP/ expenses, VIS/ visitors, LF/ lost and found, CNS/ counseling, ALM/ alumni, CERT/ certificates.

PART 22 Library, hostel, health and canteen

ENTERPRISE

Four registers a boarding or full-day school keeps: who has which book, who sleeps in which room, who came to the sick bay, and what was bought at the canteen.

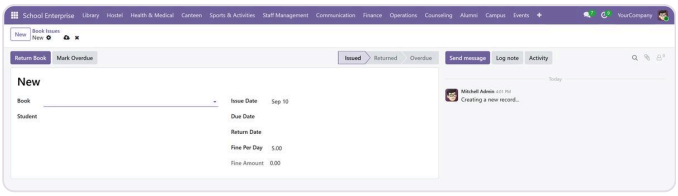

Library ENTERPRISE

1 ENTERPRISE

Books

Library, Books: title, author, ISBN, category, publisher, edition, rack, total copies and a cover. **Available Copies** is total copies less the issues still Issued. The Issue History tab lists every issue. **Library, Categories** groups the books and counts them.

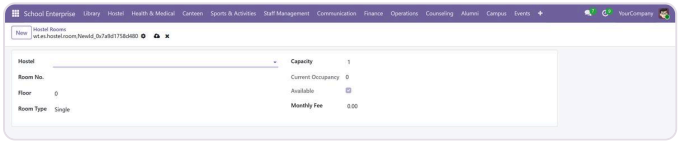

2 ENTERPRISE

Issue and return

Library, Book Issues: pick the book and student, the issue date and **due date**, and the fine per day (5.00 by default). **Return Book** sets the return date to today; **Mark Overdue** flags a late one. The fine is days late times the fine per day.

Nothing stops an issue when no copies are left, and the fine is not billed. A fine on a book still out is worked out when the issue is saved, not every day.

Hostel ENTERPRISE

3 ENTERPRISE

Hostels and rooms

Hostel, Hostels: name, Boys, Girls or Mixed, warden, capacity, address and a Rooms tab. **Hostel, Rooms**: hostel, room number, floor, Single, Double or Dormitory, capacity and monthly fee. Current Occupancy counts the active allocations and Available clears when the room is full.

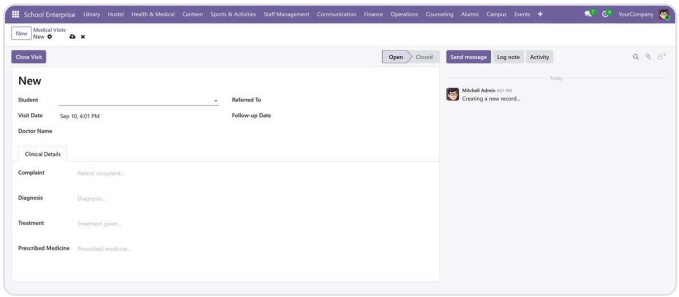

4 ENTERPRISE

Allocate a student

Hostel, Allocations: student, room (the hostel and monthly fee follow), check-in date. **Vacate** sets the check-out date to today and frees the bed.

A full room can still be allocated; watch the Available tick.

Health and medical ENTERPRISE

5 ENTERPRISE

A sick bay visit

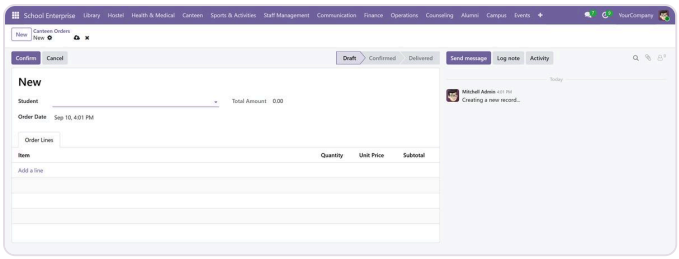

Health and Medical, Medical Visits: student, visit time, doctor, referred to, follow-up date, and on Clinical Details the complaint (required), diagnosis, treatment and medicine. **Close Visit** and **Re-open**.

6 ENTERPRISE

Vaccinations

Vaccinations: student, vaccine, dose, date, next due date, given by and notes.

Canteen ENTERPRISE

7 ENTERPRISE

An order

Canteen, Orders: student, order time and lines of menu items with quantity; unit price comes from the item and the total adds up. **Confirm**, **Deliver**, **Cancel**, **Reset**. **Menu Items** and **Categories** hold the menu with prices and availability.

8 ENTERPRISE

Wallets

Canteen, Wallets: one per student. The Transactions tab takes credit and debit lines; the balance is credits less debits.

An order does not take money off the wallet. Add the debit line yourself.

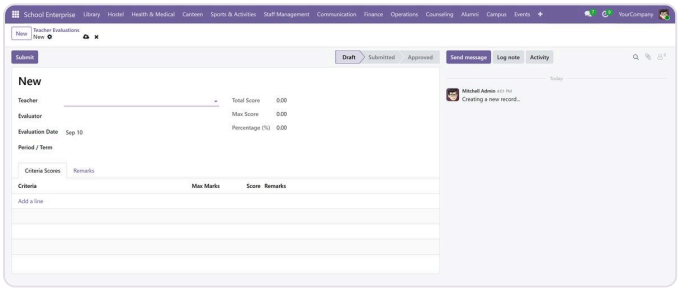

PART 23 Sports, staff, communication and finance ENTERPRISE

Clubs and tournaments, teacher appraisal and training, parent meetings and messages, and the school's own budgets and expenses.

Sports and activities ENTERPRISE

Screen	What it holds	Buttons
Clubs	Name, Sports, Arts, Academic or Other, coach, schedule, members with join date, role (member, captain, vice captain) and status. A student joins a club once.	-
Tournaments	Name, club, dates, venue, participants and the result	Start, Complete
Achievements	Title, student, type (academic, sports, arts, leadership, other), date, awarded by, certificate number	-

Staff management ENTERPRISE

1 ENTERPRISE

Appraise a teacher

Staff Management, Teacher Evaluations: teacher, evaluator, date, period, and on Criteria Scores one line per criterion with a score. Total, max and percentage add up. **Submit**, **Approve**, **Reset to Draft**. **Evaluation Criteria** holds the criteria and their max marks.

2 ENTERPRISE

Staff trainings

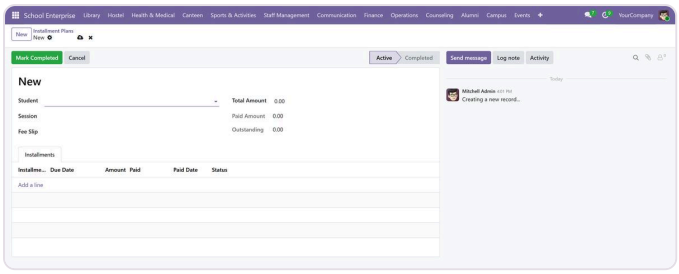

Staff Trainings: name, internal or external, trainer, dates, venue, cost, topics, and attendees with Attended and Certificate Issued ticks. **Start**, **Complete**, **Cancel**.

Communication ENTERPRISE

Screen	What it holds	Buttons
Parent Meetings	Student, teacher, parent name and contact, date, time, duration, agenda and minutes	Mark Completed, Cancel, Reschedule
Bulk Messages	Title, Email or SMS, subject, body, audience (all students, a grade or a section), session	Send Now

Send Now marks the message Sent and records how many students matched the audience. No email or SMS leaves the server.

Finance ENTERPRISE

3 ENTERPRISE

Instalment plans

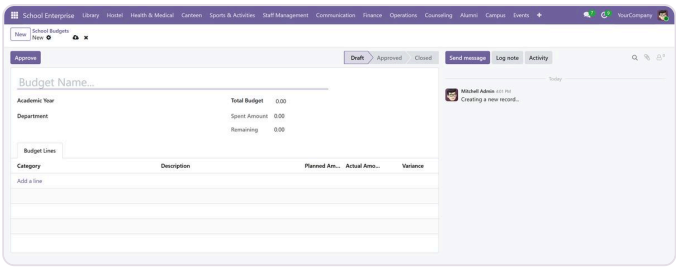

Finance, Installment Plans: student, session, the fee slip, total amount and a line per instalment with due date and amount. **Pay** on a line marks it paid today; a line past its due date shows Overdue. Paid and outstanding add up. **Mark Completed**, **Cancel**.

5 ENTERPRISE

Expenses

Expenses: department, category, amount, date, approved by, receipt and description. **Approve**, **Mark Paid**, **Reset to Draft**.

None of the finance screens posts a journal entry or touches the fee slip.

4 ENTERPRISE

School budgets

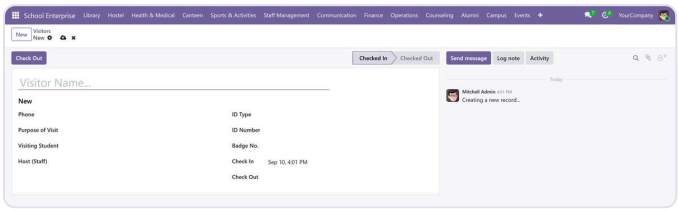

School Budgets: name, academic year, department, total budget and lines with category, planned and actual amount and variance. Spent and remaining add up. **Approve**, **Close**.

PART 24

Operations, counseling, alumni, campus and events

ENTERPRISE

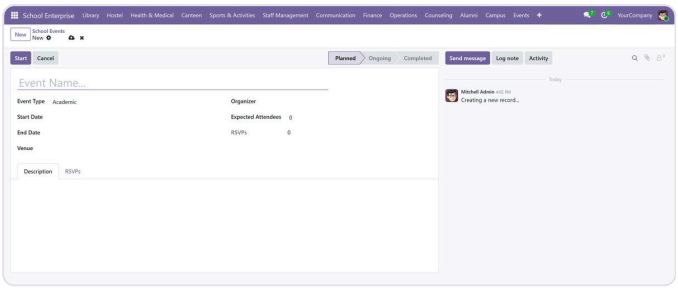

The front desk and the pastoral and community registers.

1 ENTERPRISE

Visitors

Operations, Visitor Management: visitor name, phone, purpose, the student visited, the staff host, ID type and number, badge, check in (now by default). **Check Out** stamps the time.

2 ENTERPRISE

School events

Events, School Events: name, type (academic, sports, cultural, ceremony, meeting, other), start and end, venue, organizer, expected attendees, description, and RSVPs with name, contact, student, parent, staff or guest, confirmed or cancelled. **Start**, **Complete**, **Cancel**.

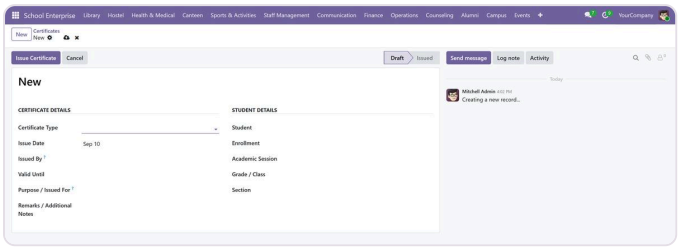

Screen	What it holds	Buttons
Lost and Found	Item, found date, place, found by, the student who claimed it	Mark Claimed, Dispose
Student Documents	Student, type (birth certificate, ID card, report card, character certificate, medical, other), file, issue and expiry date, authority	-
Counseling Sessions	Student, counselor, time, academic, behavioral, career or personal, concerns, recommendations, follow-up date, Confidential	Mark Completed, Needs Follow-up, Reschedule
Alumni Records	Student, graduation year, grade, employer, job title, city, contacts, LinkedIn, achievements	-
Campuses	Name, unique code, address, contacts, principal, established date, capacity	-
Awards Wall	Student, award type (merit, sports, arts, discipline, attendance), title, date, awarded by, session, grade	-
Holiday Calendar	Name, type, start and end date (duration worked out), session or all sessions	-

Confidential on a counseling session is a flag for your staff; no access rule hides the record. Campuses are a list; the base records are not split by campus.

PART 25 Certificates, ID card and result card

ENTERPRISE

Three printed documents the office hands over.

1 ENTERPRISE

Issue a certificate

Certificates, Issue Certificates: pick the type (Character, Bonafide, School Leaving, Transfer, Promotion, Fee Clearance), the student; enrollment, session, grade and section fill from the current enrollment. Add issue date, issued by, valid until, purpose, conduct, and for a leaving or transfer certificate the leaving date, reason and destination school, fee clearance and the grade promoted to. **Issue Certificate**, then **Print Certificate**.

The printed wording changes with the type.

Document	Printed from	What is on it
Certificate	The certificate form, or Print on the list	School name, certificate number, the wording for its type, student and class details, signature and seal
Student ID Card	Print on enrollments	Wallet size: school, student name, enrollment number, grade, section, session, date of birth, father and mobile
Result Card	Print on enrollments	A4, one block per term of the academic year with the assessed subjects, using the same marks as the Academic Reports card, and the year total

PART 26 A 15-minute walk through the demo

Sign in to education.way4tech.com as w4demo and follow these ten stops in order. Each one shows one idea from this guide on real records.

STOP	WHERE	WHAT YOU SEE
1	Applications, card view	*The admissions pipeline: New, Confirmed, Enrolled, Cancelled.*
2	Open AF/2026/00001	*An enrolled application and the student it created.*
3	Students, Lina Thompson	*Family, medical, the bus route and the attendance lines.*
4	Enrollments, SE-00087	*The year record: 25,550.00 raised, 14,450.00 paid, Partially Paid.*
5	Its Fee Slips tab, then FS-00117	*How a term slip is built line by line.*
6	Academics, Grade Scales	*The bands and points that make the grade letter and GPA.*
7	Assignments, Class Assignments, G1-A Fractions worksheet	*Every student evaluated, mark and percentage.*
8	Exams, EXAM/0038	*Submissions with score, percentage, pass or fail.*
9	Transport, Routes, Route 1	*Stops with times, 23 riders, 17 seats left.*
10	Academics, Classes, G1-A English	*The class, its students and its timetable.*

PART 27 Questions and honest limits

What people ask most, and the things the module does not do, so nobody finds out after go-live.

Questions people ask

QUESTION	ANSWER
Does it need Odoo Enterprise?	No. All three modules run on Odoo 19 Community. "Enterprise" is the name of our add-on, not of Odoo's paid edition.
Why does a new user see nothing?	Install does not put anyone in a school group. Set WT School Management (and School Enterprise if installed) on the user.
Can teachers enter marks without seeing fees?	Staff can read fee slips but not change them; give teachers Staff and the office Officer.
Can we run two campuses?	Each school can be its own Odoo company; every school record carries a company. The Enterprise Campuses list is a register only.
Do parents get a portal?	No. Everything is worked in the back office by staff.
Can we print report cards?	Yes, with the Academic Reports add-on: per term or per year, one student or a whole class in one PDF.
Can we bring in last year's students?	Yes, with Odoo's import on any list: students, enrollments, attendance and marks.

What the module does not do

AREA	WHAT TO KNOW
BASE	Marking a fee slip Paid changes its status only. No invoice or payment is created, and a slip marked Overdue cannot be marked Paid afterwards.
BASE	The late fee on a fee structure is stored but never added to a slip.
BASE	Fee slip lines are typed in; they are not copied from the fee structure or the fee summary.
BASE	Scholarships do not lower a fee slip.
BASE	Nothing stops two enrollments for the same student in the same session.
BASE	Exams are marked by hand, choice questions too. Nothing is graded automatically.
BASE	Timetables are not generated and there is no clash check for rooms or teachers. Class and route capacity are shown, not enforced.
BASE	Notice visibility and lesson plan Only Me are labels; no rule hides the records.
ACADEMIC REPORTS	Term weightage is not applied to full-year figures.
ENTERPRISE	Bulk messages send nothing; canteen orders do not debit the wallet; library fines are not billed; finance screens post nothing.

PART 28 The menu map

Every screen in the three modules, on one page.

Applications

Applications Base	Admission forms from New to Enrolled

Students

Students Base	One record per child: family, medical, transport

Enrollments

Enrollments Base	A student in a session and grade, with fees and subjects

Academics

Sessions Base	The school year and its status
Academic Years Base	The year inside the session, with its terms
Grades Base	Grades with their scale, sections and subjects
Subjects Base	Subject per grade: code, credits, teachers
Grade Scales Base	Letter bands with points
Classes Base	Subject taught to a section in a term
Timetables Base	Each lesson: day, period, room
Reports: Report Cards Academic Reports	Print cards for enrollments
Reports: Class Result Sheet Academic Reports	The class ranked on one page

Exams

Exams Base	Exams with questions and marks
Submissions Base	Each student's answers and score
Seating Plans Base	Hall rows and columns, a student per seat

Assignments

Grade Assignments Base	The work, written once per grade
Class Assignments Base	The work set for a class
Student Assignments Base	One line per student: the mark
Assignment Types Base	Homework, Quiz, Project...

Fees

Fee Structures Base	What a grade pays, by fee product
Fee Slips Base	A bill for one enrollment and period
Scholarships Base	Awards with approver and paid date

Attendance

Student Attendance Base	Present or absent per student per day
Public Holidays Base	The holiday list

Transport

Routes Base	Bus, manager, stops and riders
Trips Base	One run with pick-up and drop-off ticks
Locations Base	Pickup points

Other

Lesson Plans Base	Teacher outlines, approved
Service Hours Base	Community hours, approved
Discipline Base	Conduct notes
Notice Board Base	Dated notices

Configuration

Class Locations Base	Rooms
Time Slots Base	Periods of the day
Discipline Types Base	Headings for conduct notes

School Enterprise app

Library Enterprise	Books, Book Issues, Categories
Hostel Enterprise	Hostels, Rooms, Allocations
Health and Medical Enterprise	Medical Visits, Vaccinations
Canteen Enterprise	Orders, Wallets, Menu Items, Categories
Sports and Activities Enterprise	Clubs, Tournaments, Achievements
Staff Management Enterprise	Teacher Evaluations, Criteria, Trainings
Communication Enterprise	Parent Meetings, Bulk Messages
Finance Enterprise	Installment Plans, Budgets, Expenses
Operations Enterprise	Visitors, Lost and Found, Documents
Counseling, Alumni, Campus Enterprise	Sessions, Alumni Records, Campuses
Events Enterprise	School Events with RSVPs
Certificates Enterprise	Issue Certificates
Student Welfare Enterprise	Awards Wall, Holiday Calendar

Want this for your school?

We set it up with your grades, sections, subjects, grading scale and fee structures, load your students and staff, build the timetable, and train the office and the teachers. One campus or several, primary to secondary.
