Travel Agency Management for Odoo 19

The booking file with its PNR, passports, segments, margin, receipts and invoice; packages and fixed departures; visas; amendments and cancellations. For a retail travel shop and the tour operator behind it. Every screen and every step, shown on a live demo.

About this guide

A travel shop rarely loses money on the trip it sold. It loses it on the details around the trip: a passport that runs out, a hotel nobody confirmed, a refund paid in full when the supplier kept thirty per cent. This guide shows how the Travel Agency Management module puts every one of those details on one file in Odoo 19, one screen at a time. You do not need to have used Odoo before.

Who it is for

The owner or manager setting the agency up, the consultants selling, the ticketing and operations desk, and the tour operator running fixed departures.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks every field and button, step by step.

The live demo

Meridian Travel and Tours, an invented agency with files at every stage, travellers with passports, visas, receipts, invoices, packages and departures already on it.

HOW IT WORKS

The demo agency

Address	**travel-demo.way4tech.com**
Sign in	**w4demo** / **Demo2026**
Agency	Meridian Travel and Tours, one office, three consultants, six suppliers
Runs on	Odoo 19, Community edition, with Invoicing

The demo is shared, so anything you change may be seen by the next visitor. Treat it as an agency to walk around, not your own books.

PART 1 What the module is and what it does

Standard Odoo can sell a product and raise an invoice, but it has no idea what a PNR, a passport expiry or a fixed departure is. This module adds an app called Travel built around one record: the booking file.

IN THIS PART YOU WILL LEARN

- How a booking file moves from enquiry to travelled
- What hangs off the file: travellers, segments, receipts, visas, changes
- The words used: PNR, segment, net, sell, markup, commission, load factor
- What the module does not do

The life of a booking file

1. **Enquiry** — A draft: who, where, when
2. **Quoted** — Segments priced and sent to the customer
3. **Confirmed** — Passports checked, seats held, segments requested
4. **Ticketed** — Every supplier confirmed, deposit in
5. **Travelled** — Balance paid, the party has gone

A file can be cancelled at any point before it has travelled, and a cancelled file can go back to enquiry. The status only moves through the buttons in the header, never by dragging a card or editing the field, because the buttons are where the checks live.

What sits on a file

TAB	WHAT IT HOLDS
Itinerary	Segments: flight, hotel, transfer, activity, cruise, rail, insurance, each with supplier, net cost, sell price and confirmation number
Travellers	Everyone travelling, with passport number, expiry, issuing country, nationality and date of birth
Receipts	Money in: deposit, instalments, balance, and refunds out
Visas	One application per traveller per destination
Changes	Amendments and cancellations, priced off the fee schedule
Notes	Customer notes for the itinerary and internal notes for the team

The words used in this guide

Word	Meaning
Booking file	One sale: one customer, one trip, any number of travellers and segments.
PNR	The airline record locator, usually six characters.
IATA code	The agency code a ticket is sold under, and what BSP settles against.
Segment	One bookable part of the trip: a flight, a hotel stay, a transfer.
Net cost	What the supplier charges you.
Sell price	What you charge the customer.
Markup	Sell less net.

Commission	What a supplier pays you back on what you sold.
Gross margin	Markup plus commission.
Departure	One dated run of a package, with a fixed number of seats.
Load factor	Seats sold as a share of seats held.

What it does not do

It does not connect to Amadeus, Sabre, Galileo, an airline, a bed bank or a cruise line. Consultants book with the supplier the way they do now and type the PNR, the confirmation number and the net cost onto the file. There is no booking website and no customer portal: the customer gets the itinerary as a PDF. The margin scheme VAT figure is worked out and written on the invoice, but no journal entry or return is filed for you.

> **Needs:** Odoo 19 Community (or Enterprise) with Invoicing, Discuss and Products, which install with it.

PART 2 Signing in and who can see what

Everyone signs in with their own user. What they see in the Travel app depends on their role, and a consultant only sees their own files.

IN THIS PART YOU WILL LEARN

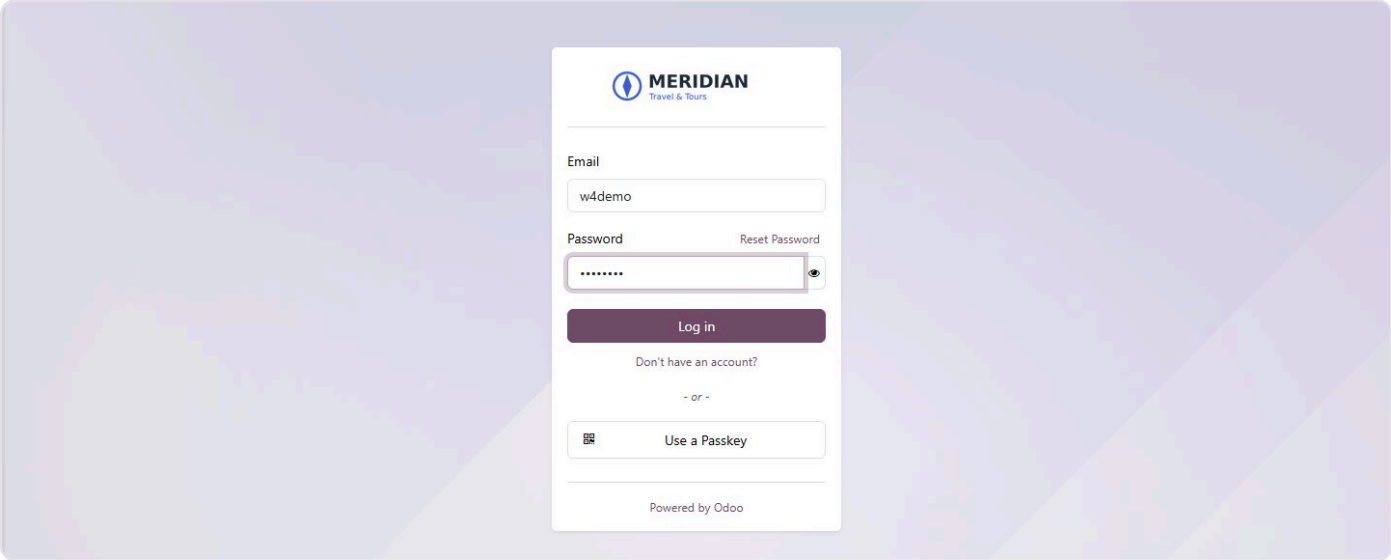

- Signing in to the demo
- The three roles
- Why a consultant sees only their own files

TRY IT YOURSELF ON THE DEMO

1. Open travel-demo.way4tech.com and sign in as w4demo
2. Open the Travel app and click each top menu once

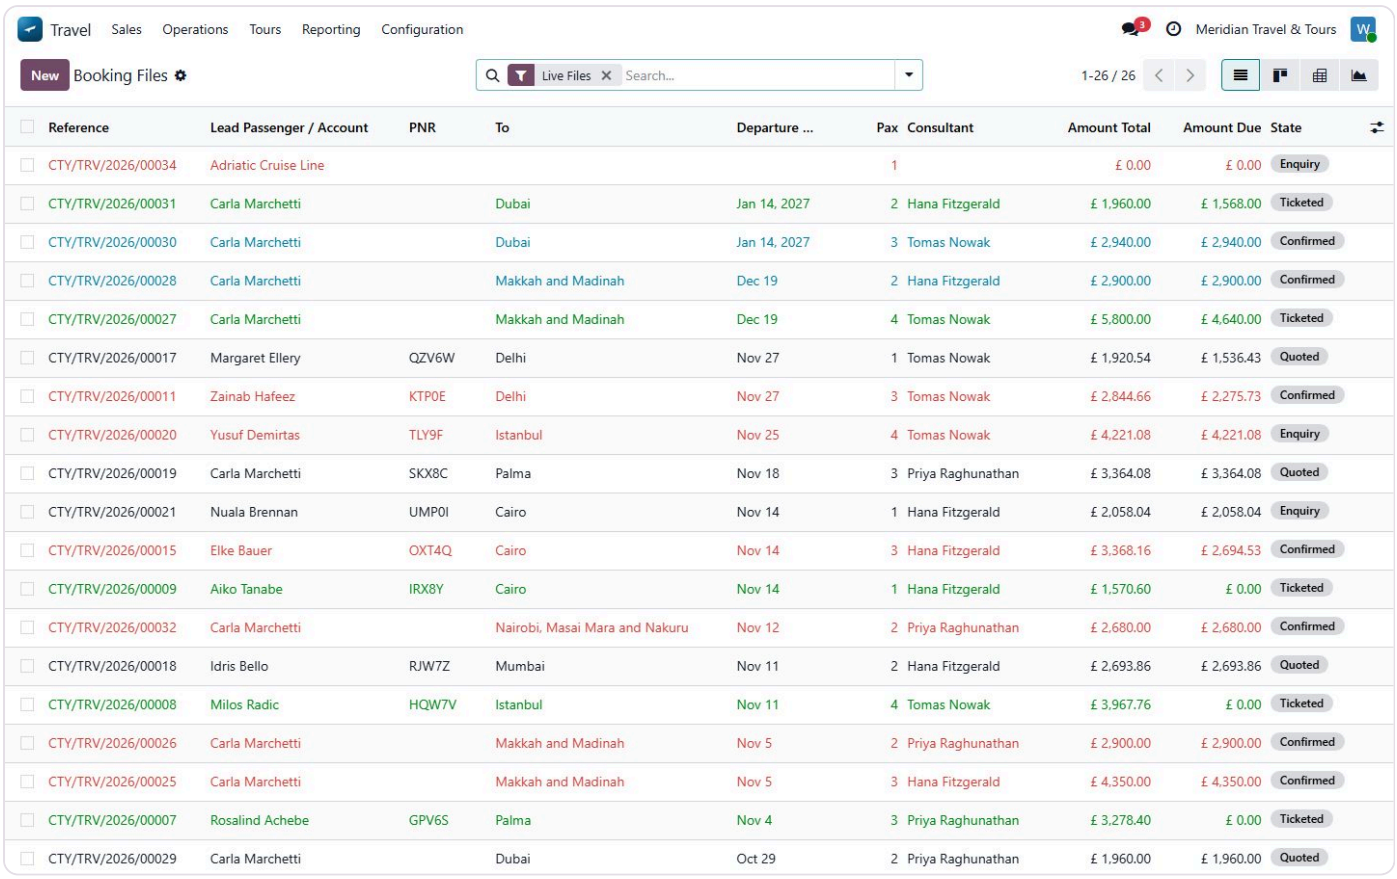

1 Sign in

Go to the address, type the login and password and press Log in.

2 Open the Travel app

It opens on Booking Files. The top bar holds Sales, Operations, Tours, Reporting and Configuration.

The three roles

CAN THEY...	TRAVEL CONSULTANT	OPERATIONS AND TICKETING	TRAVEL MANAGER
Open the Travel app, Sales and Tours	Yes	Yes	Yes
See booking files	Only files where they are the consultant	Every file	Every file
See travellers, segments, receipts, visas, changes	Only on their own files	All	All
Operations menu: board, visas, passport watch, settlement	No	Yes	Yes
Reporting menu	No	No	Yes
Configuration menu	No	No	Yes (Settings needs an administrator)

Operations includes the consultant role, and Manager includes Operations. The link between a consultant record and an Odoo user is what the own-files rule keys off, so give every consultant their user under Configuration, then Consultants.

> Every record carries a company. Two agencies in one database keep their offices, suppliers, files and money apart.

PART 3 Setting up the agency from zero

Set the agency up in this order before the first file: the settings, the offices, the consultants, the suppliers, the service types, the visa rules and the fee schedule.

IN THIS PART YOU WILL LEARN

- The eight agency settings and what each changes
- Offices, each with its own IATA code, licence and sales journal
- Consultants with a target and their own commission
- Suppliers: kind, settlement, credit limit, default commission
- Service types with a default markup and a revenue product
- Visa rules by destination and passport, with a document checklist
- The amendment and cancellation fee bands

TRY IT YOURSELF ON THE DEMO

1. Configuration, then Suppliers: open one and read its exposure
2. Configuration, then Fee Schedule: read the bands

Set up once, in this order

1. **Settings** — Defaults for the company
2. **Offices** — Where you sell from
3. **Consultants** — Who sells
4. **Suppliers** — Who you buy from
5. **Service types** — What you sell
6. **Visa rules** — What each passport needs
7. **Fee schedule** — What a change costs

Step 1: the settings

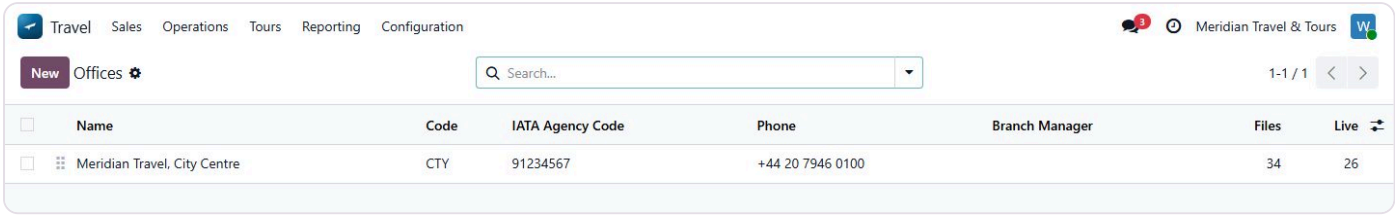

Open Configuration, then Settings, and find the Travel block. The settings are kept per company, and the page needs administrator rights.

SETTING	WHAT IT DOES
IATA Agency Code	The fallback code on every file when the office holds none of its own.
Default Markup	The percentage a new segment is marked up by, when the service type has no default markup of its own.
Passport Validity	How many months a passport must last past the departure date. A file will not confirm with a passport inside it. Six by default.
Chase Visas	How many days before departure the nightly visa chase starts on open applications. 30 if left empty.
Deposit	The deposit as a percentage of the file total.
Balance Due Before Departure	How many days before departure the balance falls due.
Block Unpaid Departures	When on, a file cannot be ticketed before its deposit is in, or marked travelled with a balance owing.
Tour Operators Margin Scheme	New files are created on the margin scheme, and the tax picked here is used to work out the VAT on the margin.

Step 2: offices

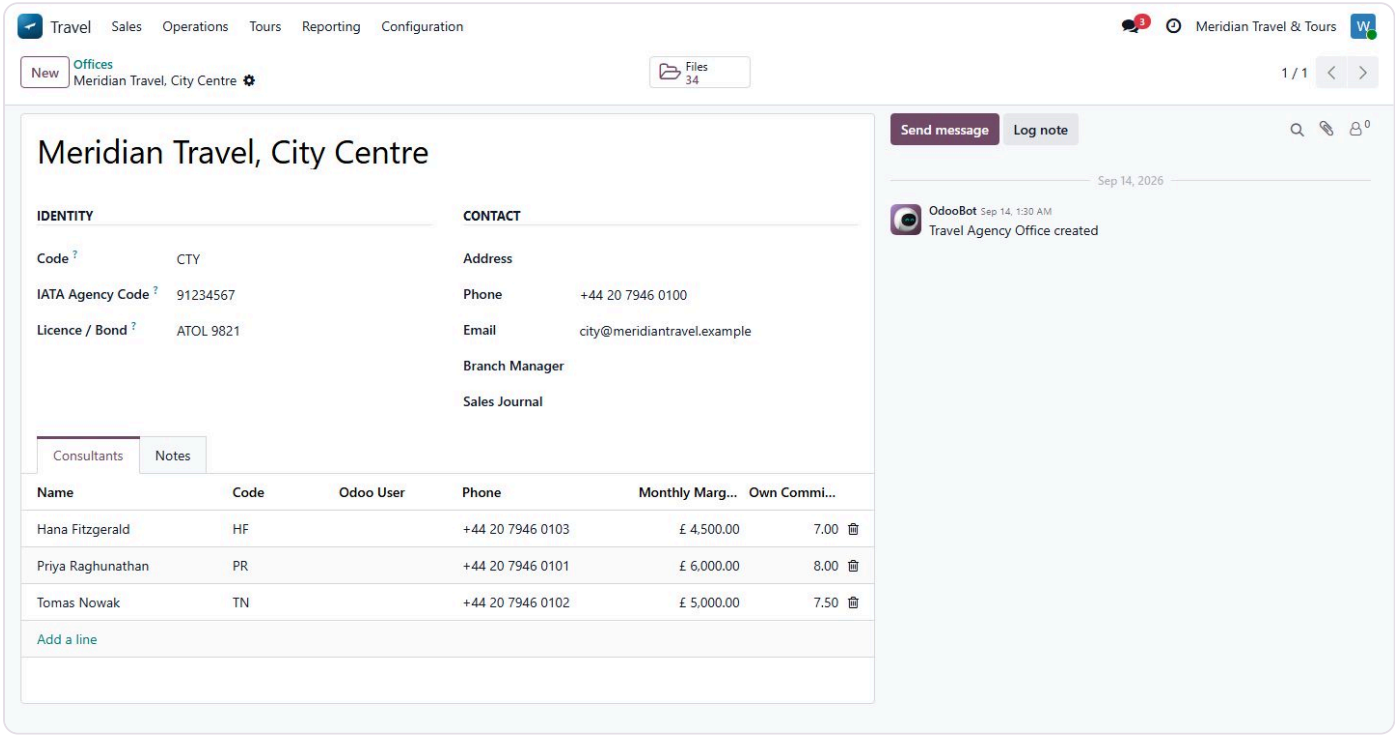

1 Configuration, then Offices

One line per branch, with its counts of files and open files.

2 Open an office

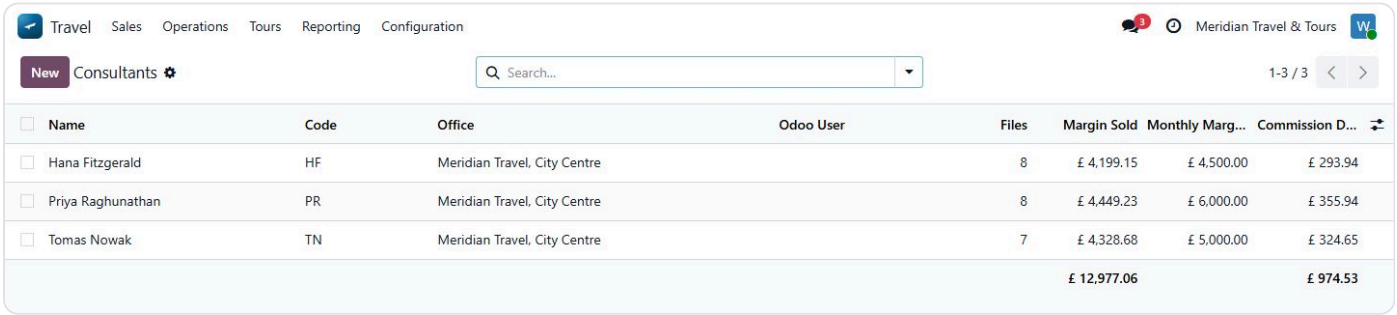

Name, code, address, phone, email, branch manager, the office's own IATA code, its licence or bond number and the sales journal its invoices go to. The Consultants tab lists who works there. An IATA code must be seven or eight digits.

Step 3: consultants

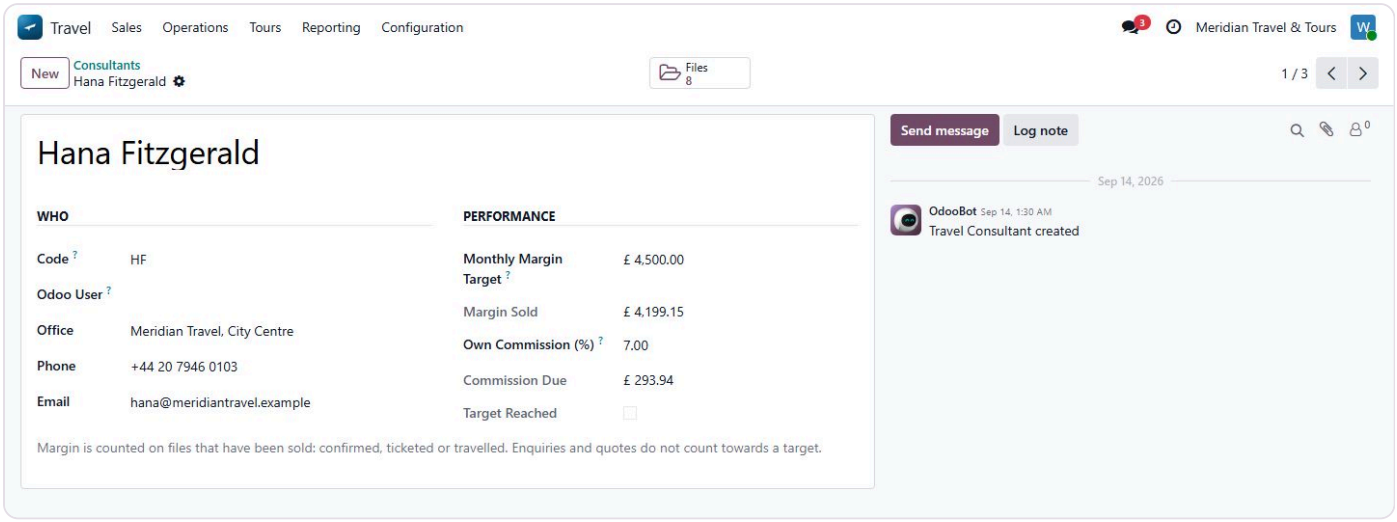

3 Configuration, then Consultants

Each consultant with their office, files, margin sold and whether the target is reached.

4 Open a consultant

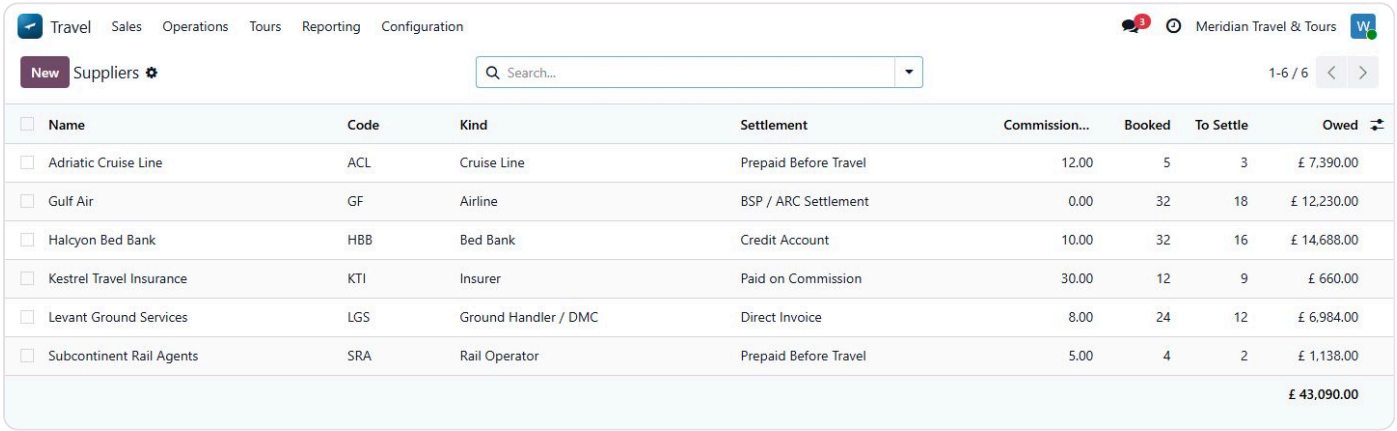

Link the Odoo user, set the office, the monthly margin target and the consultant's own commission percentage. Margin Sold adds up the margin on their confirmed, ticketed and travelled files, and Commission Due is that margin times their commission.

Step 4: suppliers

5 Configuration, then Suppliers

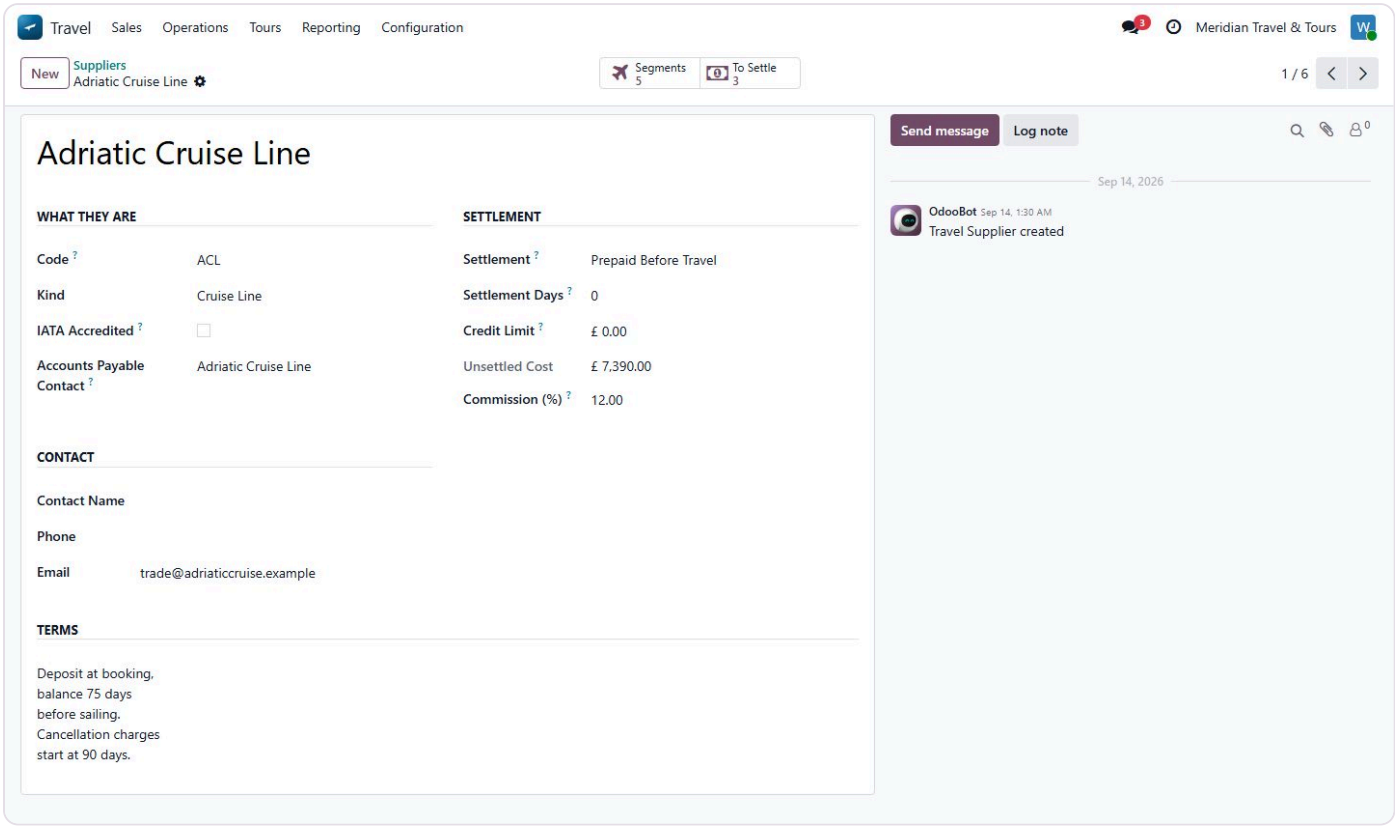

Every supplier with its kind, settlement method and unpaid exposure.

Name	Code	Kind	Settlement	Commission...	Booked	To Settle	Owed
Adriatic Cruise Line	ACL	Cruise Line	Prepaid Before Travel	12.00	5	3	£ 7,390.00
Gulf Air	GF	Airline	BSP / ARC Settlement	0.00	32	18	£ 12,230.00
Halcyon Bed Bank	HBB	Bed Bank	Credit Account	10.00	32	16	£ 14,688.00
Kestrel Travel Insurance	KTI	Insurer	Paid on Commission	30.00	12	9	£ 660.00
Levant Ground Services	LGS	Ground Handler / DMC	Direct Invoice	8.00	24	12	£ 6,984.00
Subcontinent Rail Agents	SRA	Rail Operator	Prepaid Before Travel	5.00	4	2	£ 1,138.00
							£ 43,090.00

6 Open a supplier

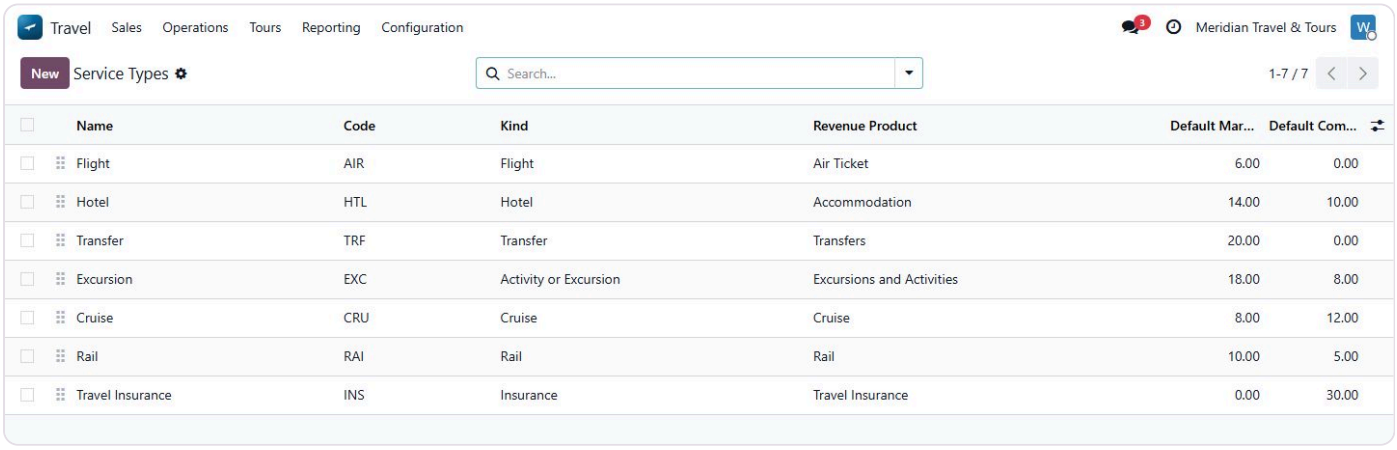

Kind (airline, consolidator, hotel, bed bank, DMC, cruise, rail, transfer, insurer, other), how you settle (BSP, direct, prepaid, on credit, commission only), settlement days, credit limit, default commission, IATA accredited, the contact and the booking terms. The buttons count the segments booked with it and the ones not yet paid, and Over Limit lights up when the unpaid cost passes the credit limit.

Step 5: service types

7 Configuration, then Service Types

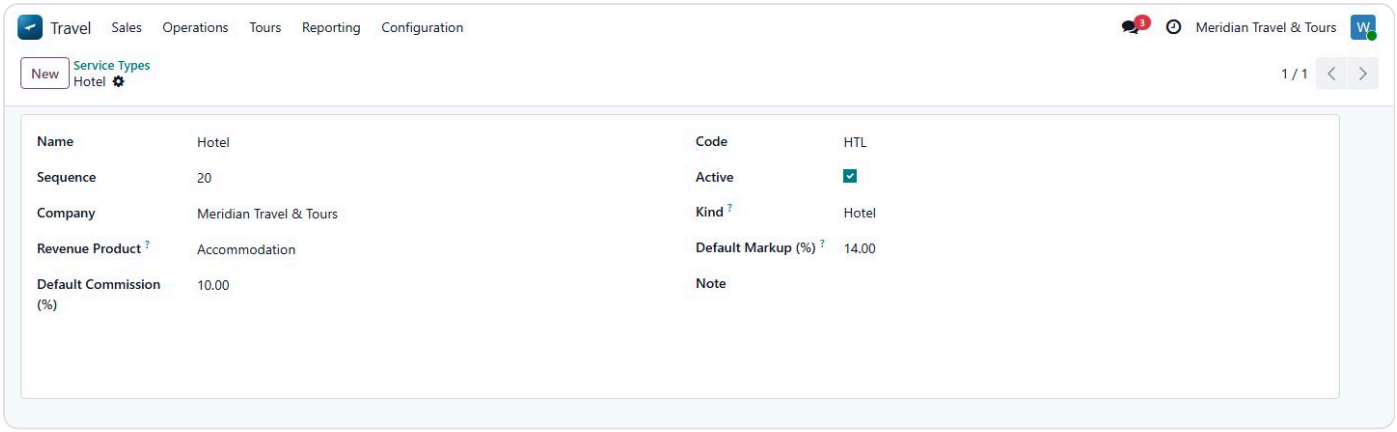

Flight, hotel, transfer, activity, cruise, rail, insurance and other.

Name	Code	Kind	Revenue Product	Default Mar...	Default Com...
Flight	AIR	Flight	Air Ticket	6.00	0.00
Hotel	HTL	Hotel	Accommodation	14.00	10.00
Transfer	TRF	Transfer	Transfers	20.00	0.00
Excursion	EXC	Activity or Excursion	Excursions and Activities	18.00	8.00
Cruise	CRU	Cruise	Cruise	8.00	12.00
Rail	RAI	Rail	Rail	10.00	5.00
Travel Insurance	INS	Insurance	Travel Insurance	0.00	30.00

8 Open a service type

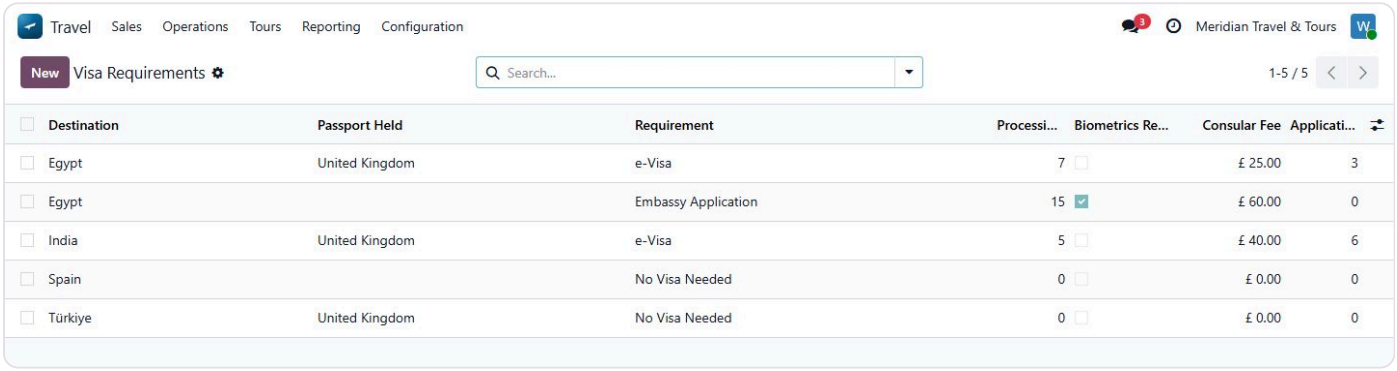

Each type has a kind, a revenue product that the invoice line is booked against, a default markup and a default commission. A segment picking this type takes the markup as a percentage, the commission, and the taxes of the revenue product. A supplier with its own default commission overrides the type's.

Step 6: visa requirements

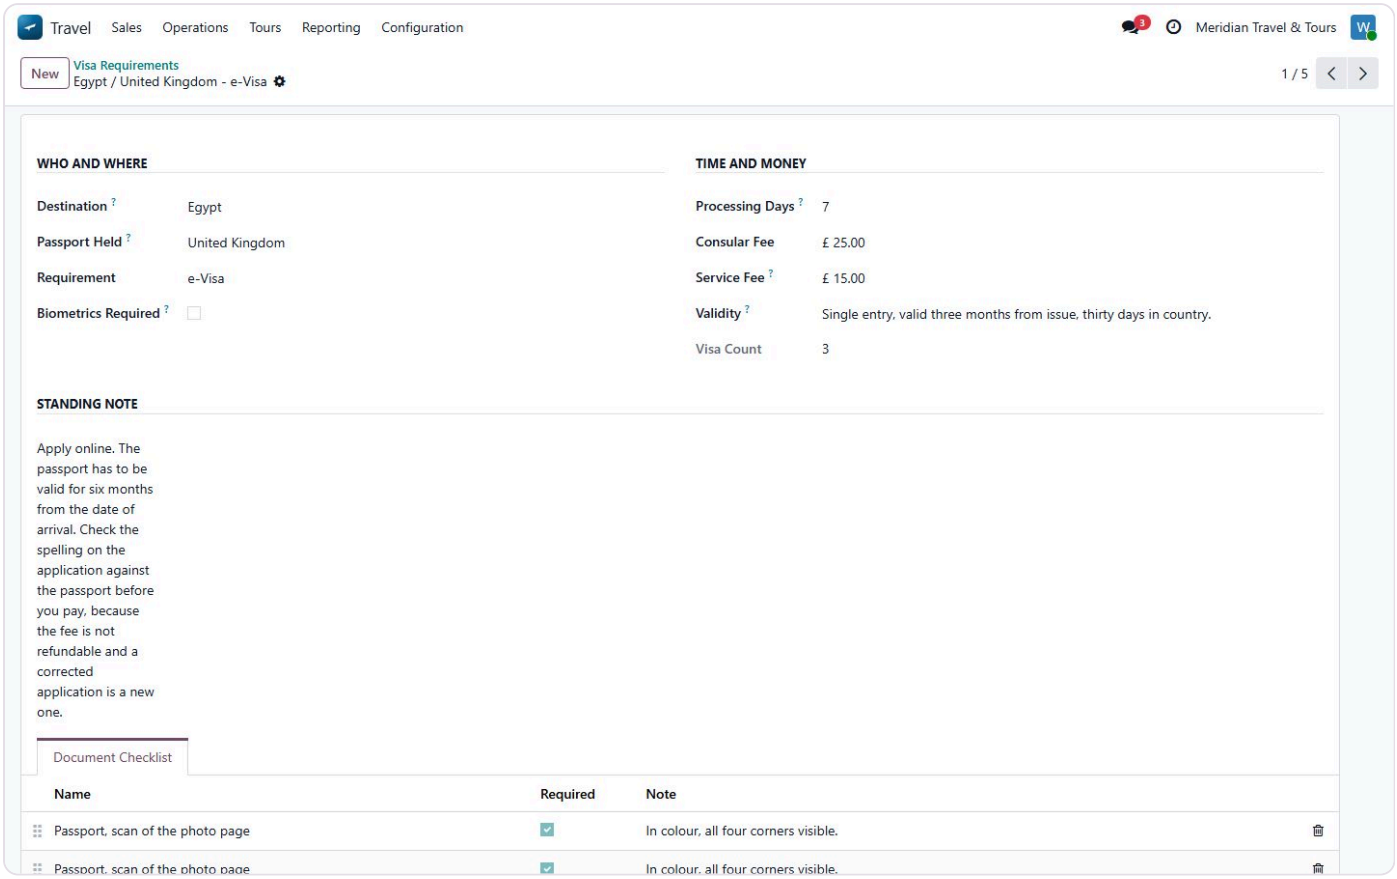

9 Configuration, then Visa Requirements

One rule per destination, either for all passports or for one nationality.

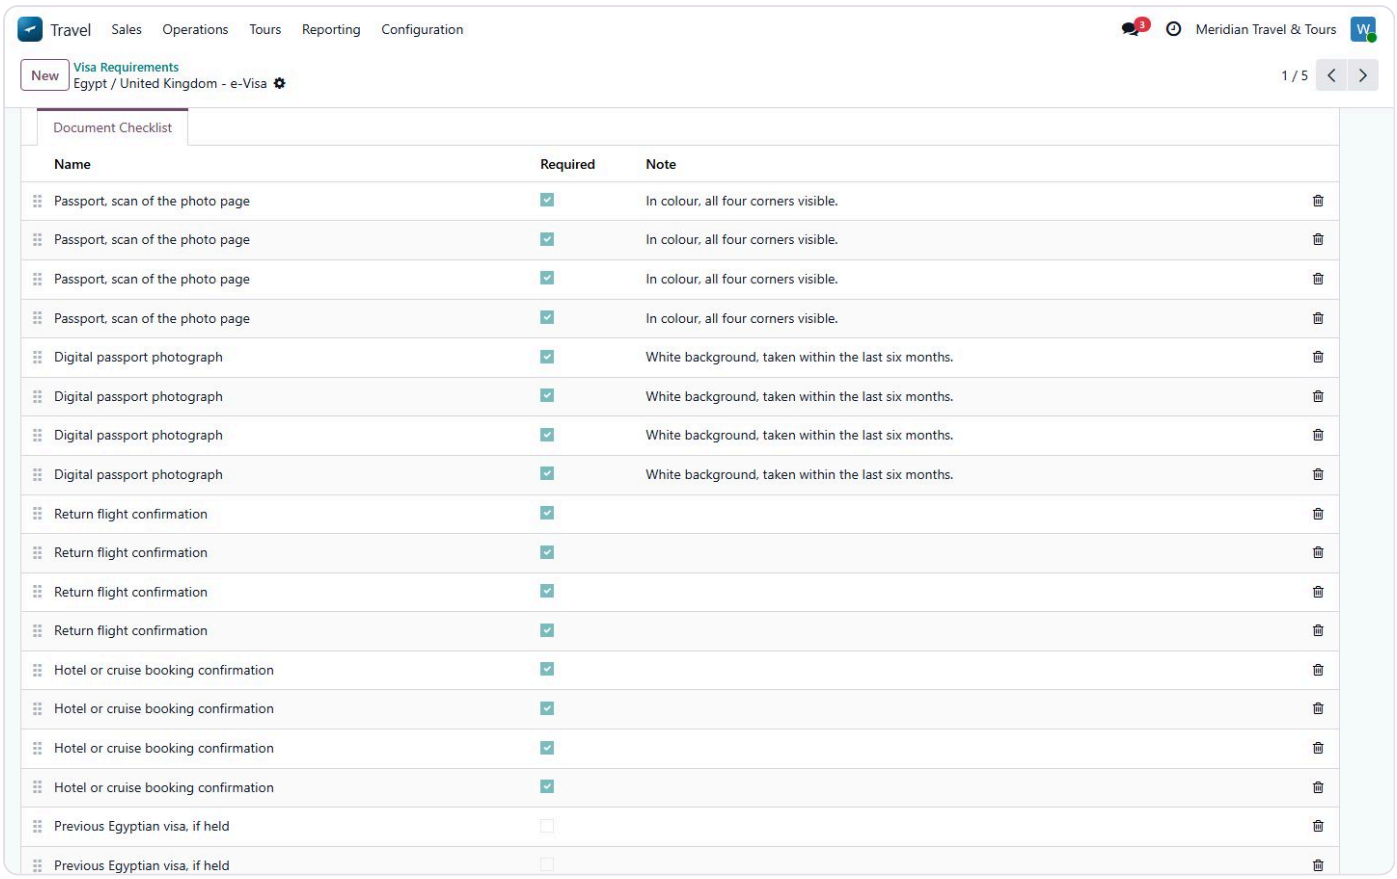

10 Open a rule

The requirement (visa free, ETA, e-visa, visa on arrival, embassy visa), processing days, consular fee, agency fee, whether biometrics are taken, the validity note and a standing note. The Document Checklist tab lists the papers the mission asks for; it is copied onto each application.

11 The Document Checklist tab

One line per document, marked required or optional, in the order the mission wants them.

A rule written for a nationality wins over the general rule for the same destination. A destination that is visa free or needs only an ETA cannot be marked as taking biometrics.

Step 7: the fee schedule

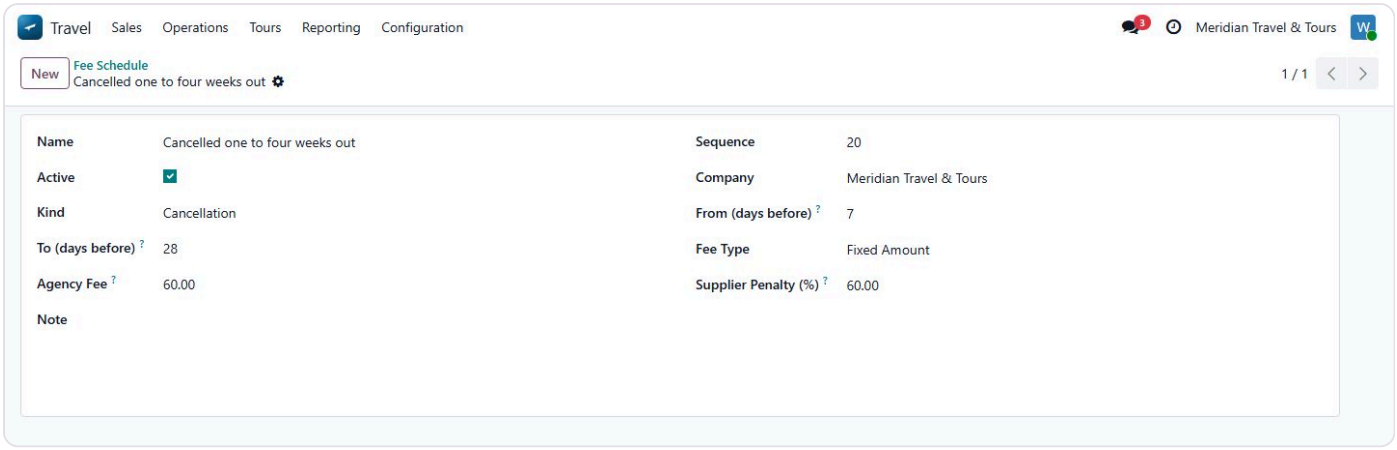

12 Configuration, then Fee Schedule

The bands for amendments and for cancellations, each covering a range of days before departure.

13 Open a band

From and to days before departure, the agency fee as a fixed amount or a percentage of the file, and the supplier penalty as a percentage of the supplier cost.

PART 4 Opening a booking file

Every sale starts as a file. It carries its own reference, the airline PNR, the agency code it was sold under, the consultant who sold it and the customer who pays.

IN THIS PART YOU WILL LEARN

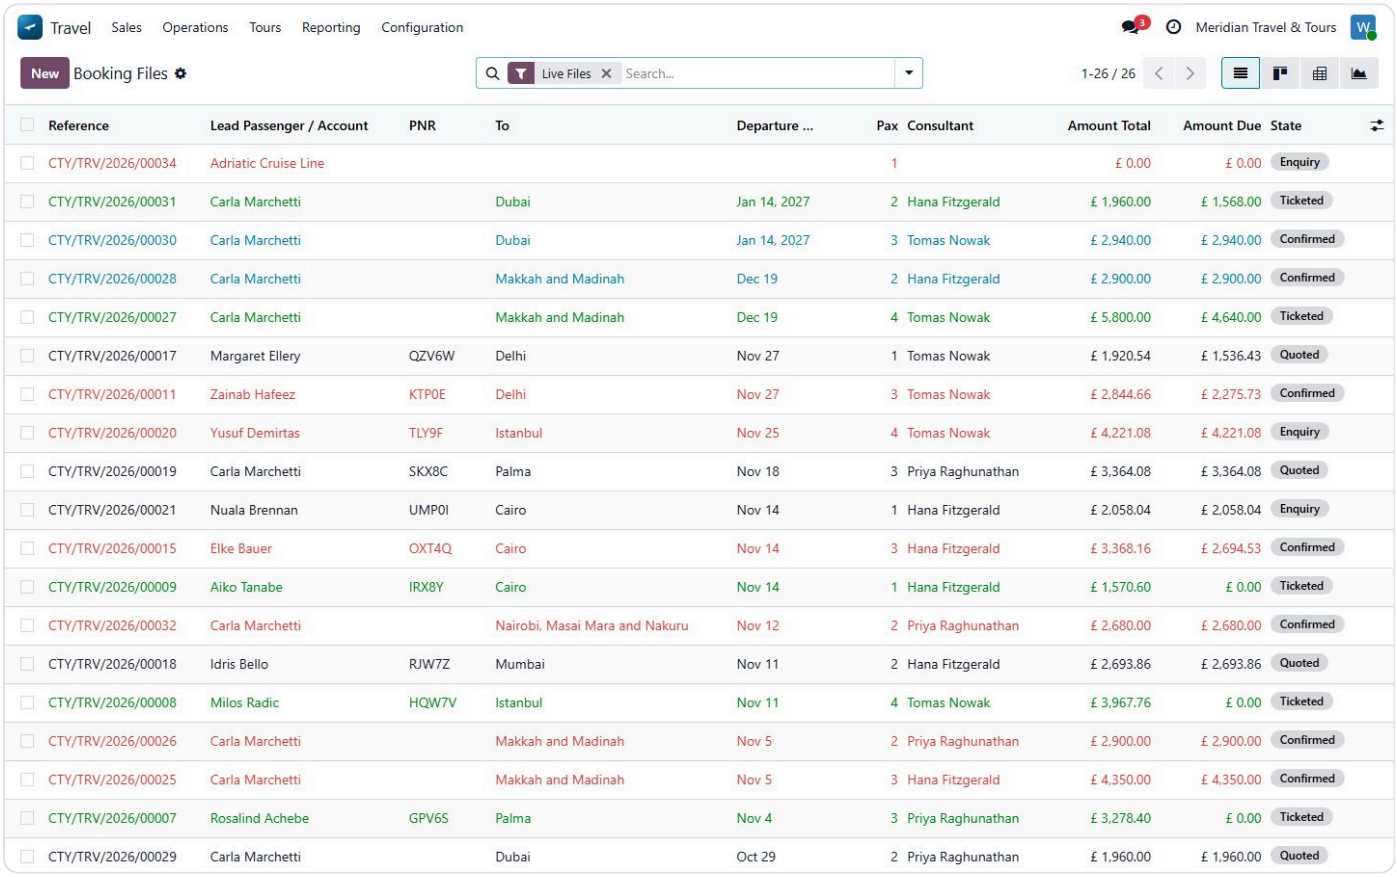

- The three ways to see the files: list, board and pivot
- Every field in the file header
- How the IATA code and the office are filled in
- Linking a file to a package and a fixed departure

TRY IT YOURSELF ON THE DEMO

1. Sales, then Booking Files: switch to the board
2. Open CTY/TRV/2026/00021, an enquiry sold onto the Classic Nile departure

2 The board

One column per status. Cards cannot be dragged from one column to another: the status only moves by the header buttons, which run the checks.

3 The pivot

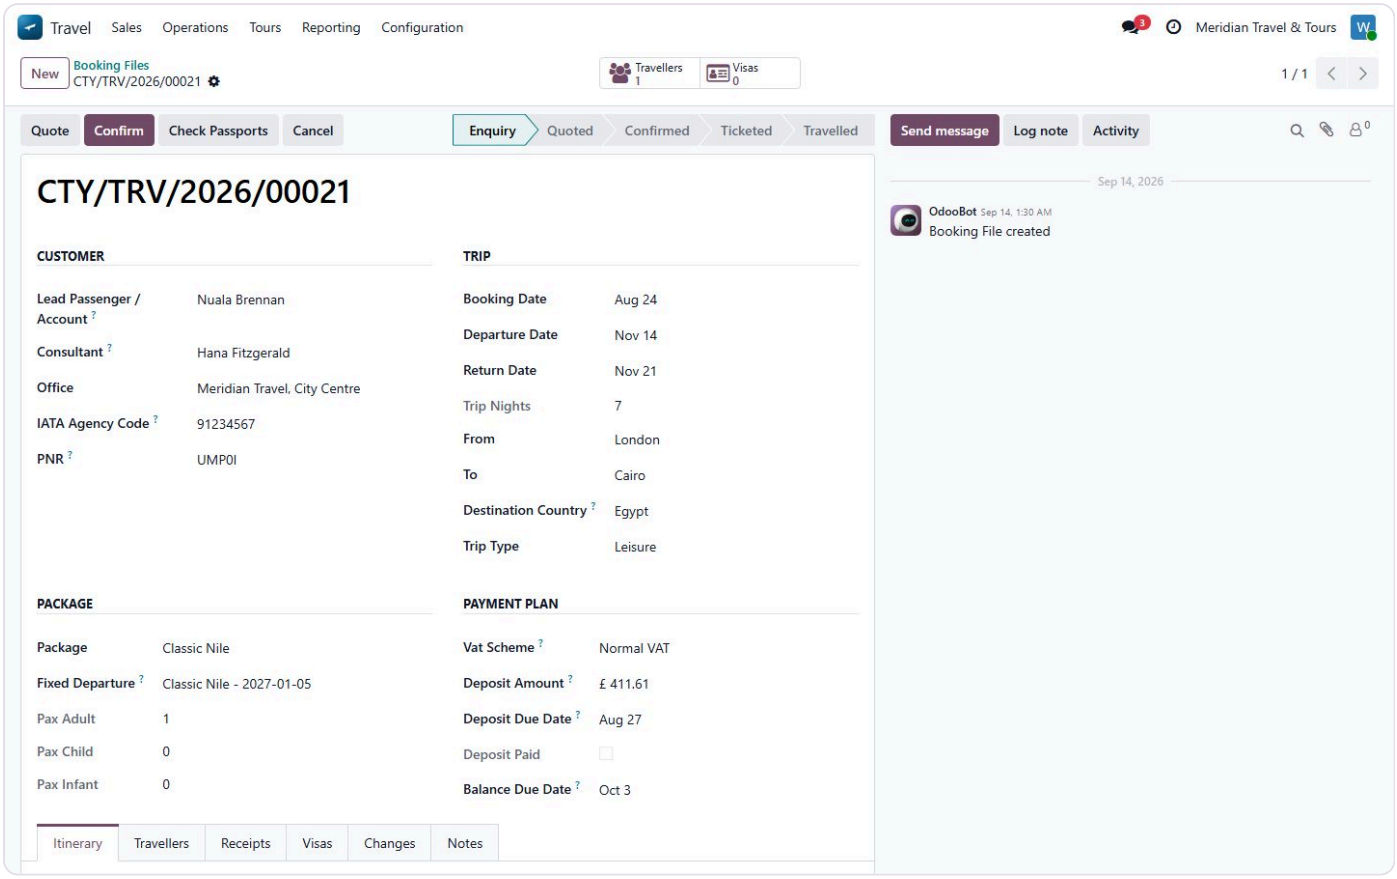

Files cut by consultant, office, destination, trip type or month, with sell, cost and margin.

4 Press New and fill in the header

The office defaults to the first office of your company, the consultant to you if you are one. Pick the lead passenger or account: on a corporate file that is the company being invoiced, not the person flying. Then the booking date, departure and return dates, from and to, the destination country, the trip type (leisure, business, group, pilgrimage, honeymoon, educational) and the PNR.

FIELD	WHAT IT DOES
Reference	Given on save from the office sequence, CTY/TRV/2026/00021 on the demo.
IATA Agency Code	Taken from the office, then the company setting. Type over it for a file sold under another plate.
Trip nights	Return date less departure date. The return cannot be before the departure, and the booking date cannot be after the departure.
Package, Fixed Departure	Pick a departure and the package, departure and return dates fill in from it. A departure must belong to the package on the file.
VAT scheme	Normal, or Margin scheme. New files take the company setting.
Customer Notes, Internal Notes	The first prints on the itinerary, the second stays inside the agency.

A file that has been sold cannot be deleted. Cancel it instead, so the seats are released and the change is on record. A file carrying an invoice cannot be deleted at all until the invoice is dealt with.

PART 5 Travellers and passports

The airline and the embassy ask the same questions about every passenger. The Travellers tab holds the answers, and the file will not confirm if a passport will not last the trip.

IN THIS PART YOU WILL LEARN

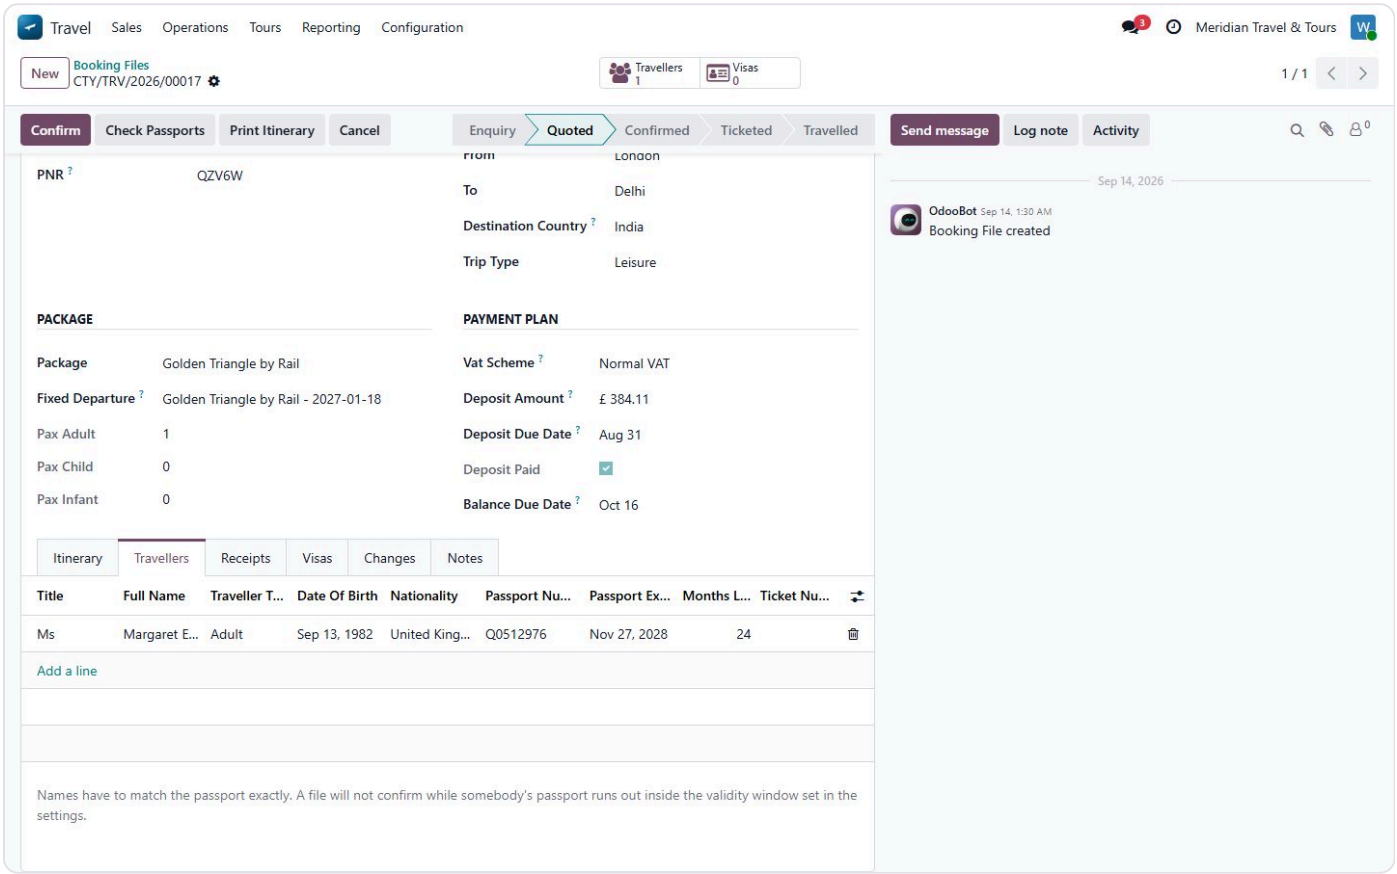

- Every field on a traveller
- Adult, child and infant, and the age checks
- The six month passport rule and Check Passports
- The Passport Watch screen and the nightly to-do

TRY IT YOURSELF ON THE DEMO

1. Open CTY/TRV/2026/00020: the passport warning in the header
2. Operations, then Passport Watch

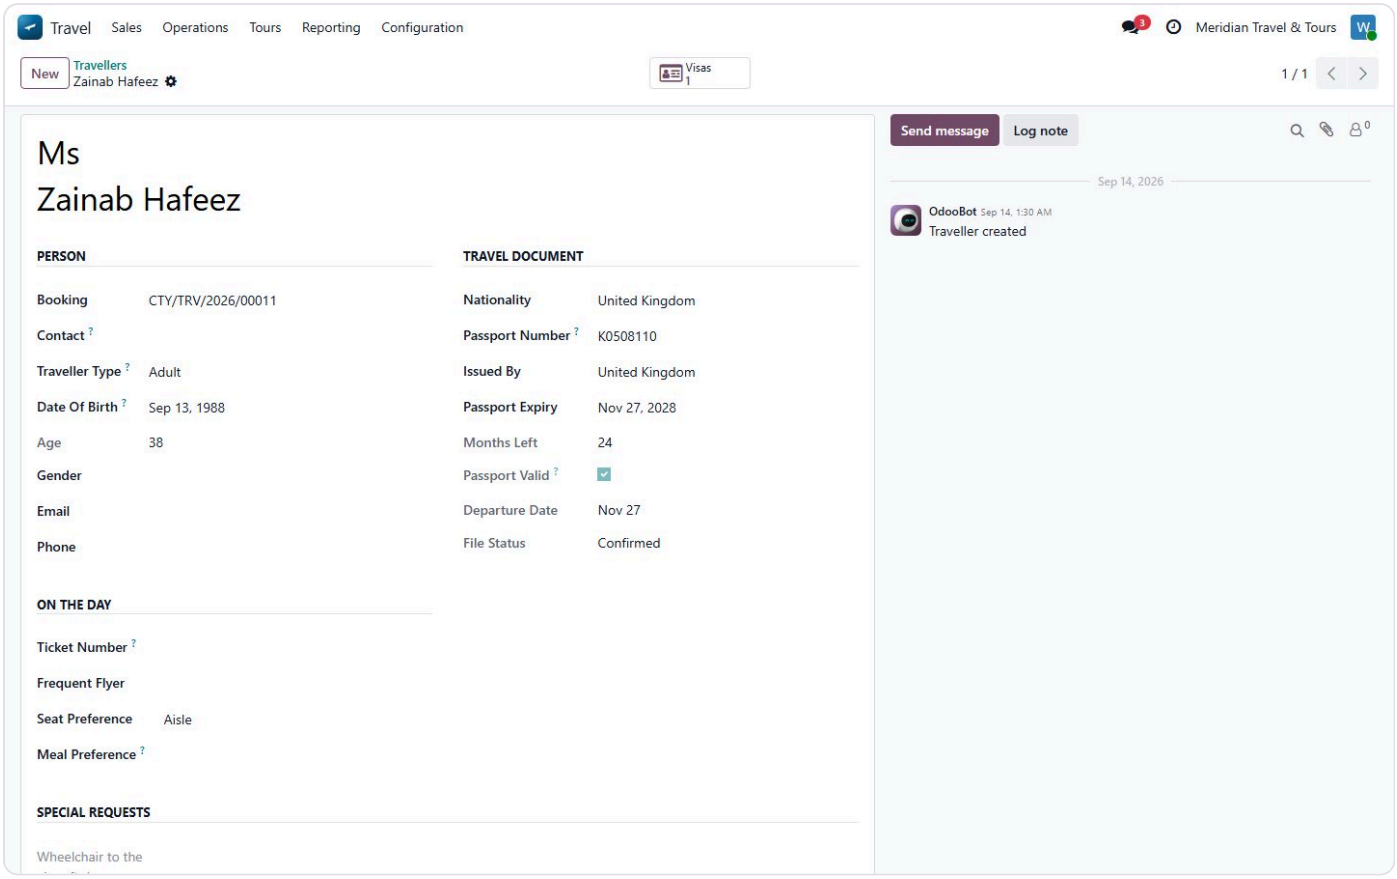

1 The Travellers tab

One line per person: title, name, type, date of birth, nationality, passport number, issuing country, expiry, months left and whether it is valid for this trip.

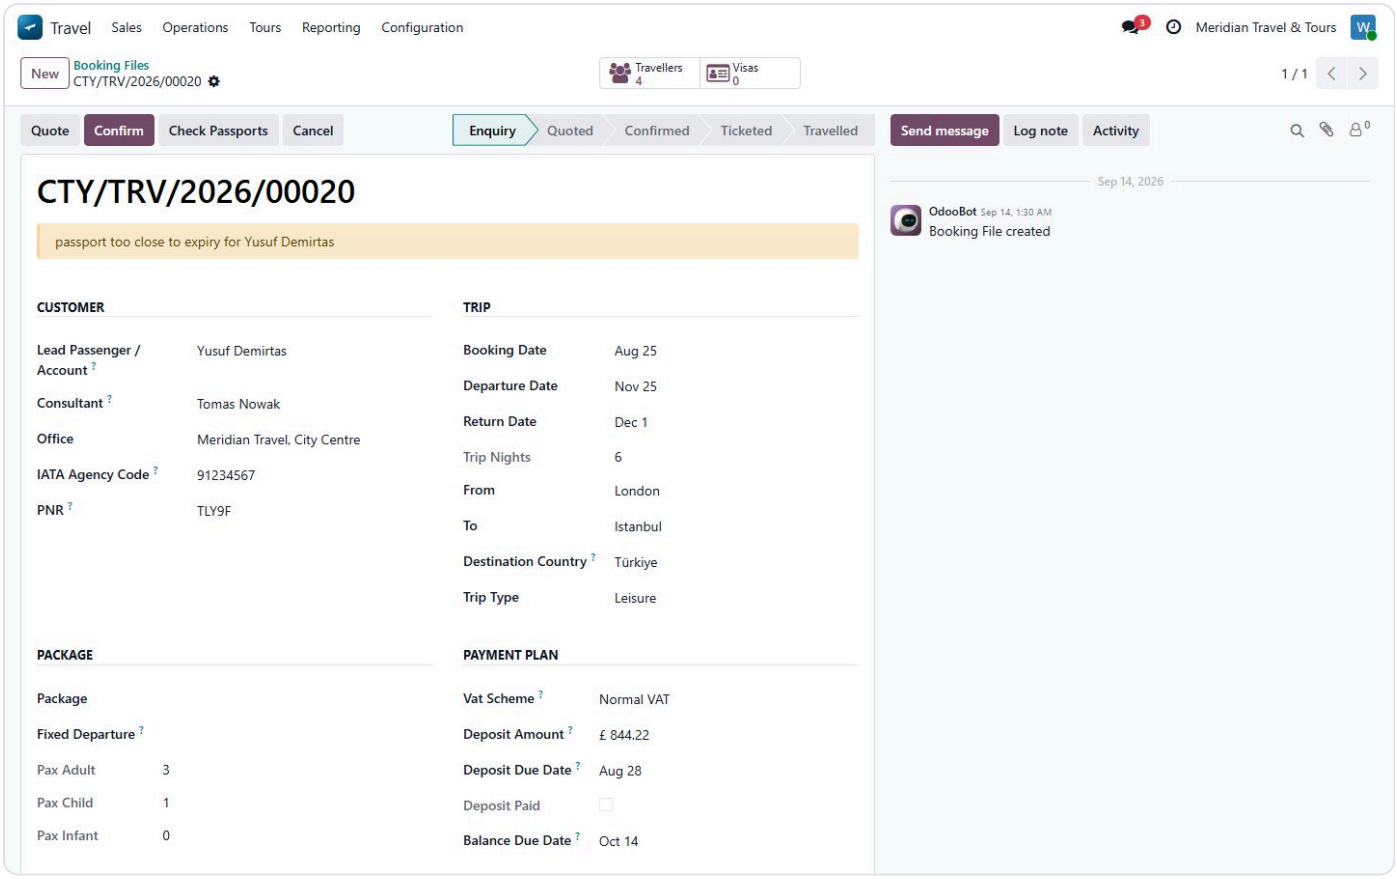

2 Open a traveller

As well as the passport, a traveller carries gender, email and phone, ticket number, frequent flyer number, seat preference (window, aisle), meal preference and any special request. The Visas button opens their applications.

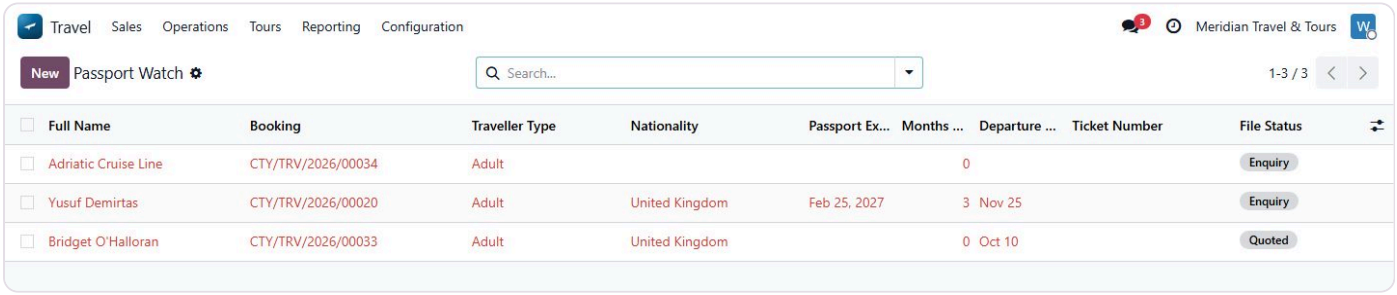

3 The passport warning

When a traveller has no passport expiry, or one that runs out inside the validity rule, a warning names them on the file. Check Passports in the header gives the same answer as a message without stopping anything.

4 Operations, then Passport Watch

Every traveller on a live file whose passport is not valid for the trip, so the ticketing desk can ring them before it is too late.

RULE	WHAT IT STOPS
Passport expired	A traveller cannot be saved with a passport that has already expired.
Validity months	Confirm refuses the file and names every traveller whose passport ends inside the months set in the settings, counted from the departure date.
No expiry	Confirm refuses a traveller with no passport expiry at all.
Infant	Must be under two on the return date.
Child	Must be two to eleven.
Adult	Must be twelve or over.
Date of birth	Cannot be in the future.

Every night the job **Travel: passports that will not last the trip** puts a to-do on each live file with a passport problem, for its consultant, once per file.

PART 6 Building the itinerary from segments

The trip is built from segments, one per thing booked with a supplier. Each segment carries the supplier's net cost and your sell price, and the margin rolls up to the file.

IN THIS PART YOU WILL LEARN

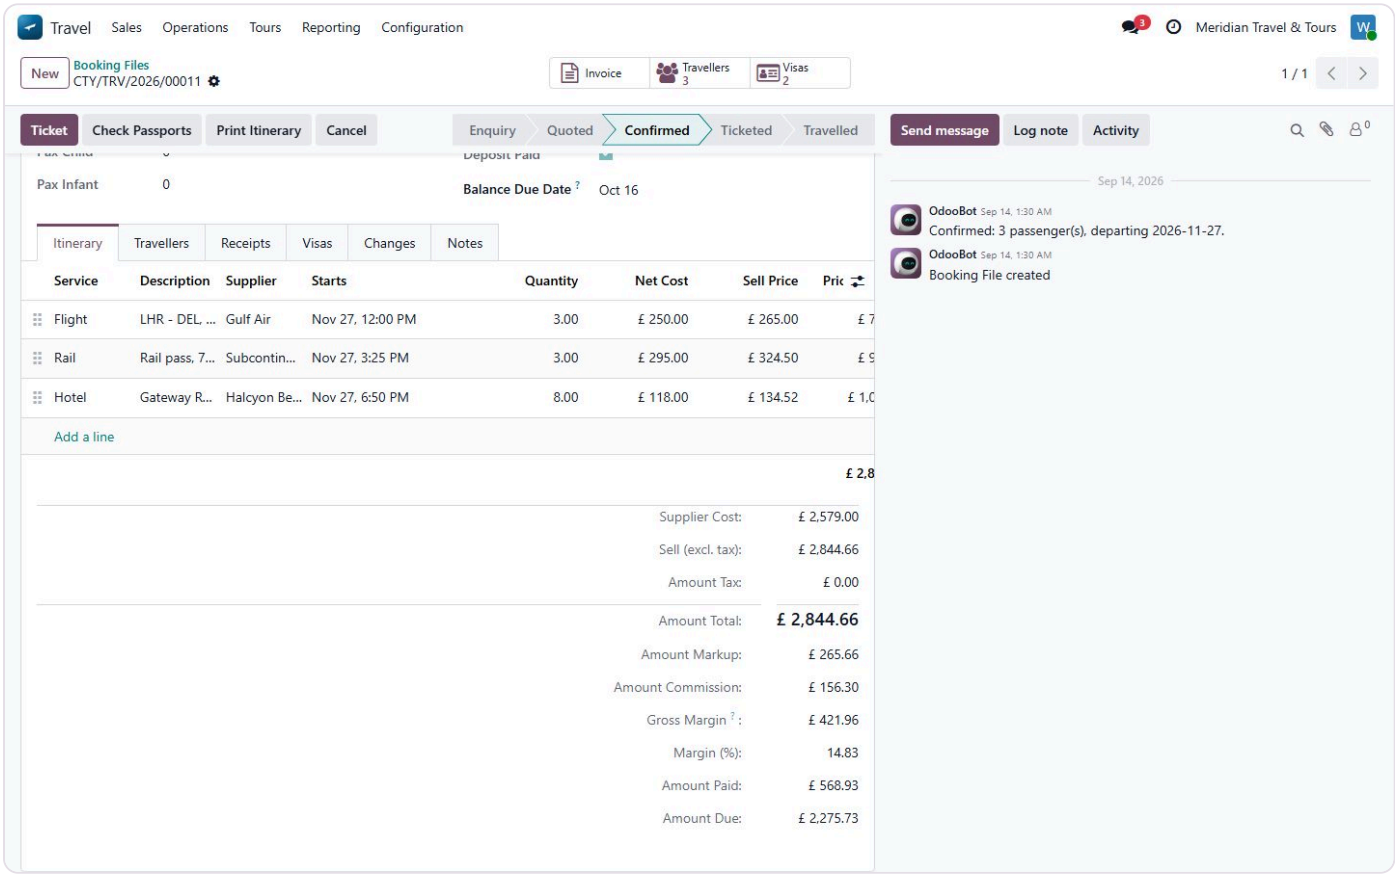

- Every field on a segment, by kind
- Markup as a percentage, a fixed amount or a typed price
- Commission, gross margin and the sold-below-net warning
- Segment statuses: draft, requested, confirmed, ticketed, cancelled
- The Operations Board and the nightly confirmation chase

TRY IT YOURSELF ON THE DEMO

1. Open CTY/TRV/2026/00011 and read the Itinerary tab
2. Operations, then Operations Board

1 The Itinerary tab

Each line is a segment: service, description, supplier, dates, confirmation number, quantity, net, markup, sell, margin and status, with the file totals underneath.

2 Open a segment

Pick the service type and the supplier. Flights carry carrier, flight number, class and baggage. Hotels carry the room type and board basis, and the nights are worked out from the dates. Every segment has an origin, a destination, passengers, a quantity, the confirmation number and the supplier's invoice reference.

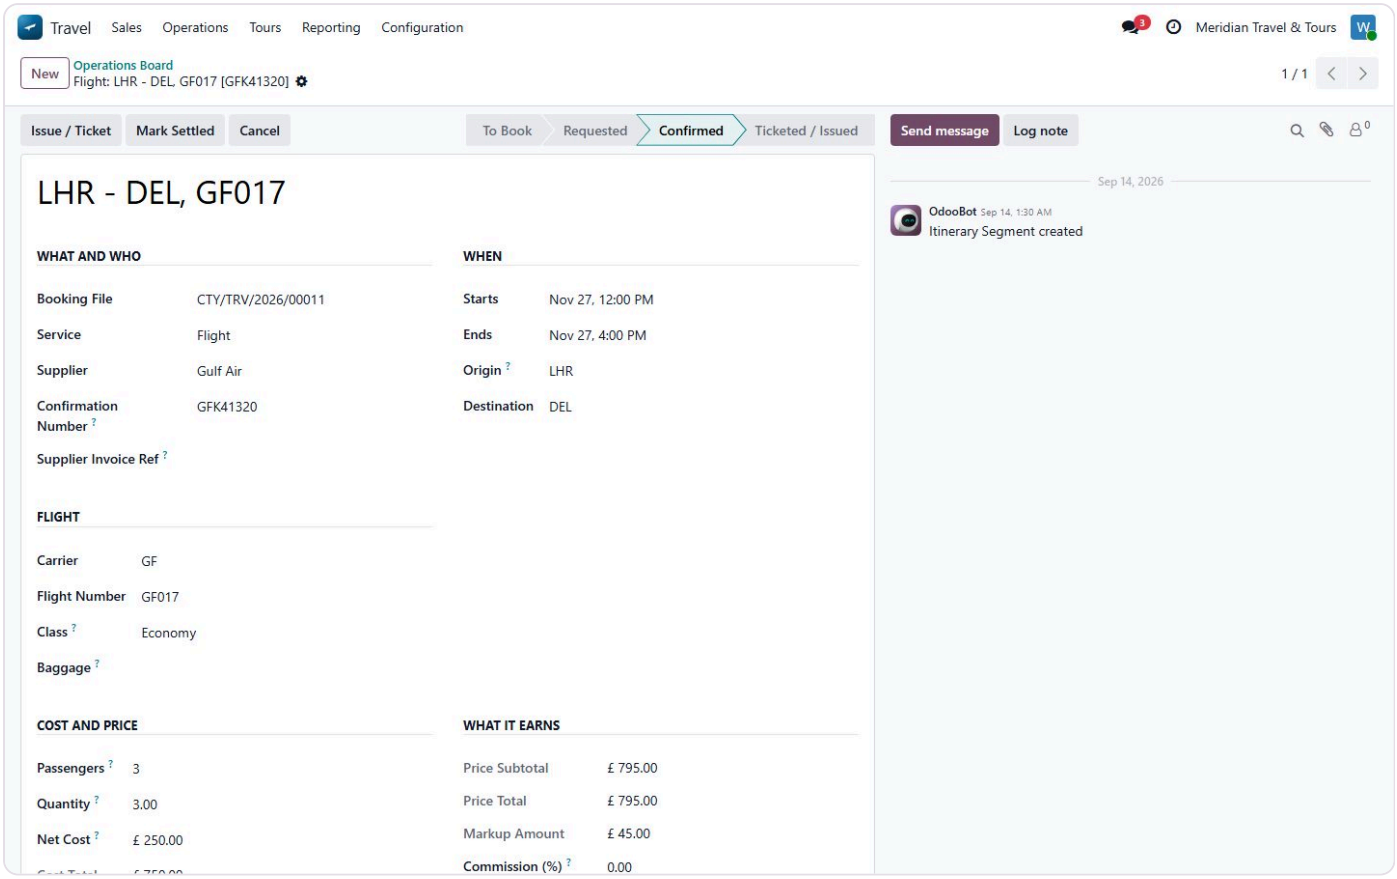

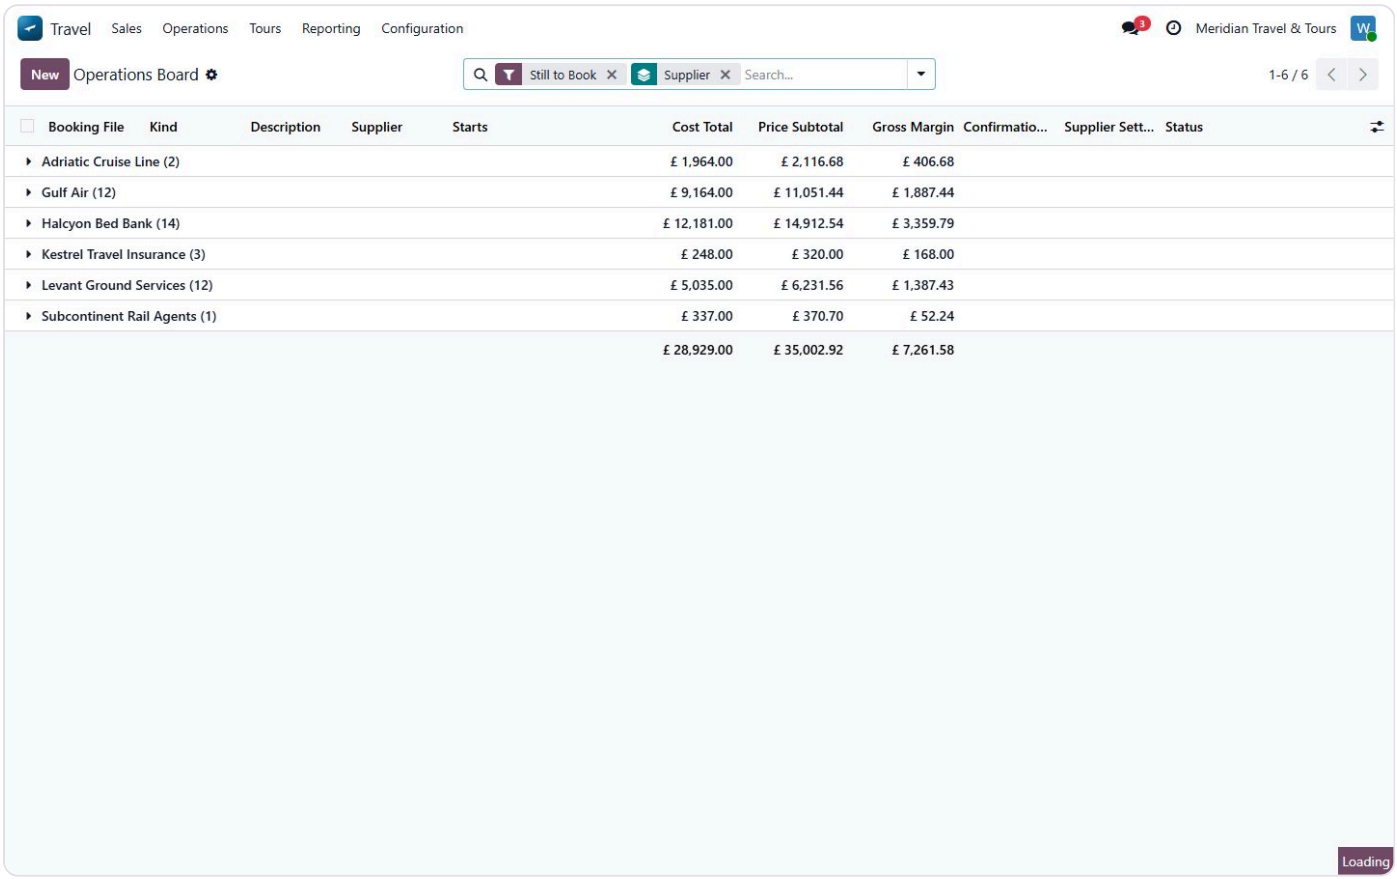

FIGURE	HOW IT IS WORKED OUT
Net Cost, cost total	What the supplier charges per unit, times the quantity.
Markup	Percent: net plus that percentage. Fixed: net plus that amount. None: type the sell price yourself.
Sell Price	Per unit, before tax. Taxes on the segment are worked out by Odoo's tax engine.
Commission	The commission percentage of the sell, untaxed.
Gross Margin	Sell less net, plus commission. Shown as an amount and a percentage.
Sold Below Net	Lit when the gross margin is negative.

Segment statuses

BUTTON	FROM	WHAT IT NEEDS
Request from Supplier	Draft	Nothing. Confirming the file does this for every draft segment.
Confirm	Draft, Requested	The supplier's confirmation number.
Issue / Ticket	Confirmed	Ticketing the file does this for every confirmed segment.
Mark Settled	Confirmed, Ticketed	Records that the supplier has been paid, with the date.
Cancel	Any	Not once settled with the supplier, and not on a posted invoice.
Reset	Cancelled	The file must still be an enquiry, quoted or confirmed.

3 Operations, then Operations Board

Every segment still to book or waiting on the supplier, grouped by supplier. This is the ticketing desk's working list.

Every night **Travel: chase supplier confirmations** writes a line on each confirmed or ticketed file for every segment still waiting on its supplier. A segment that has been answered is cancelled, not deleted, so the history stays.

PART 7 Moving the file forward

The header buttons move the file from enquiry to travelled. Each one checks something real before it lets the file move.

IN THIS PART YOU WILL LEARN

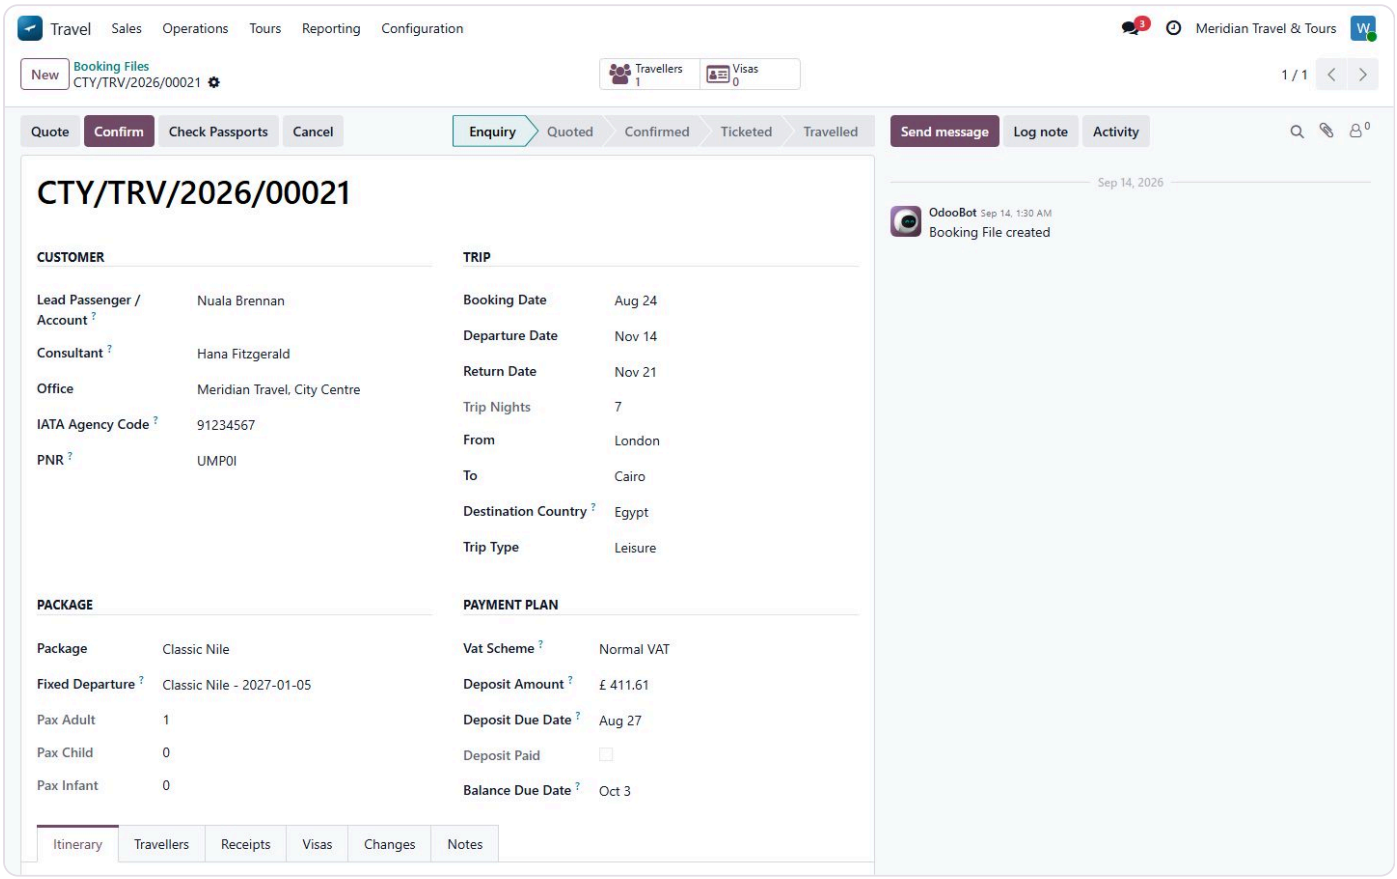

- Quote, Confirm, Ticket and Mark Travelled, and what each checks
- Cancel and Back to Enquiry
- Printing the itinerary

TRY IT YOURSELF ON THE DEMO

1. Open a quoted file, a confirmed file and a ticketed file in turn
2. Compare the header buttons on each

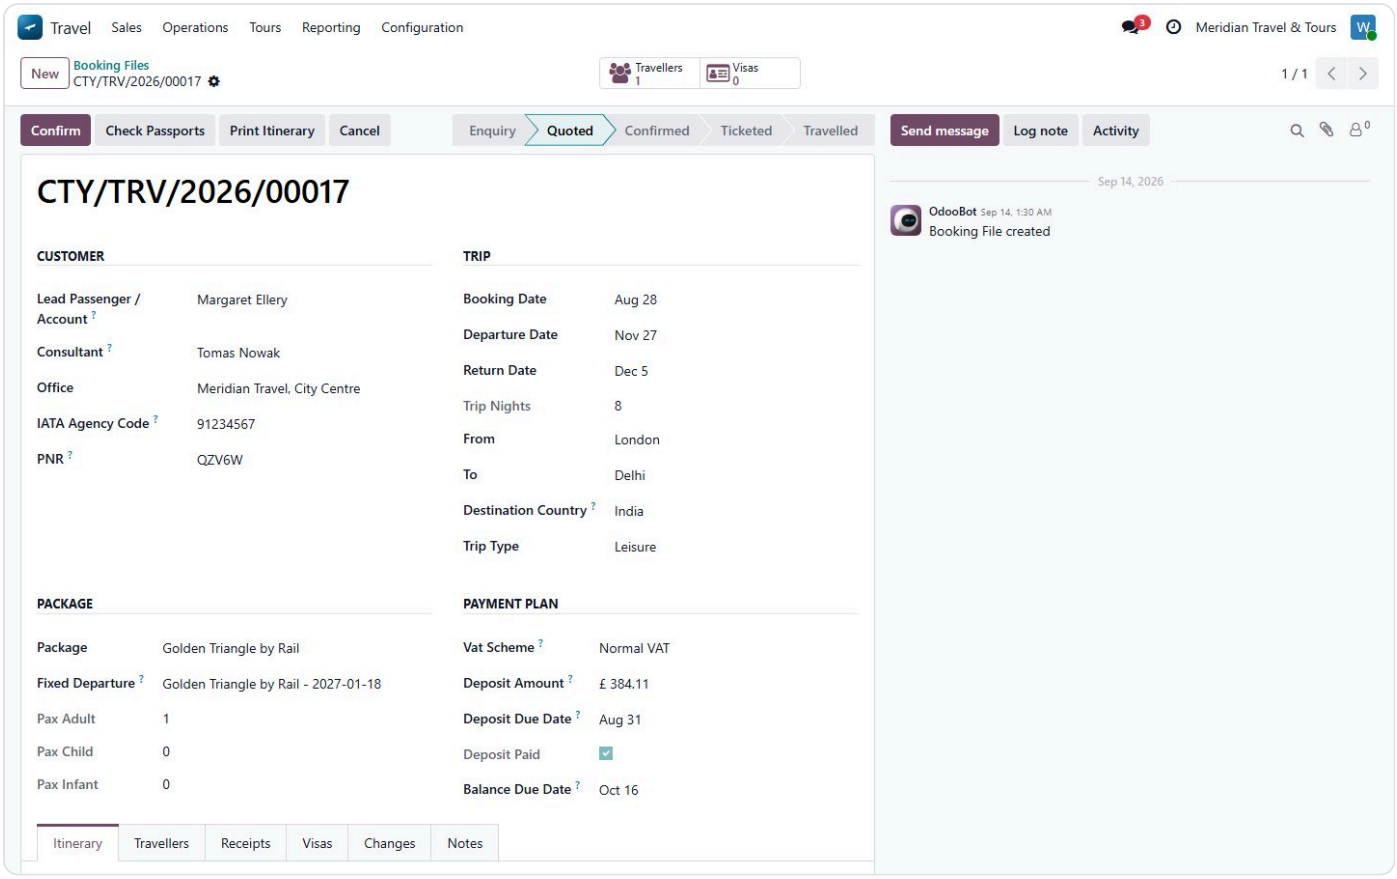

1 Quote

From an enquiry with at least one segment. The file moves to Quoted.

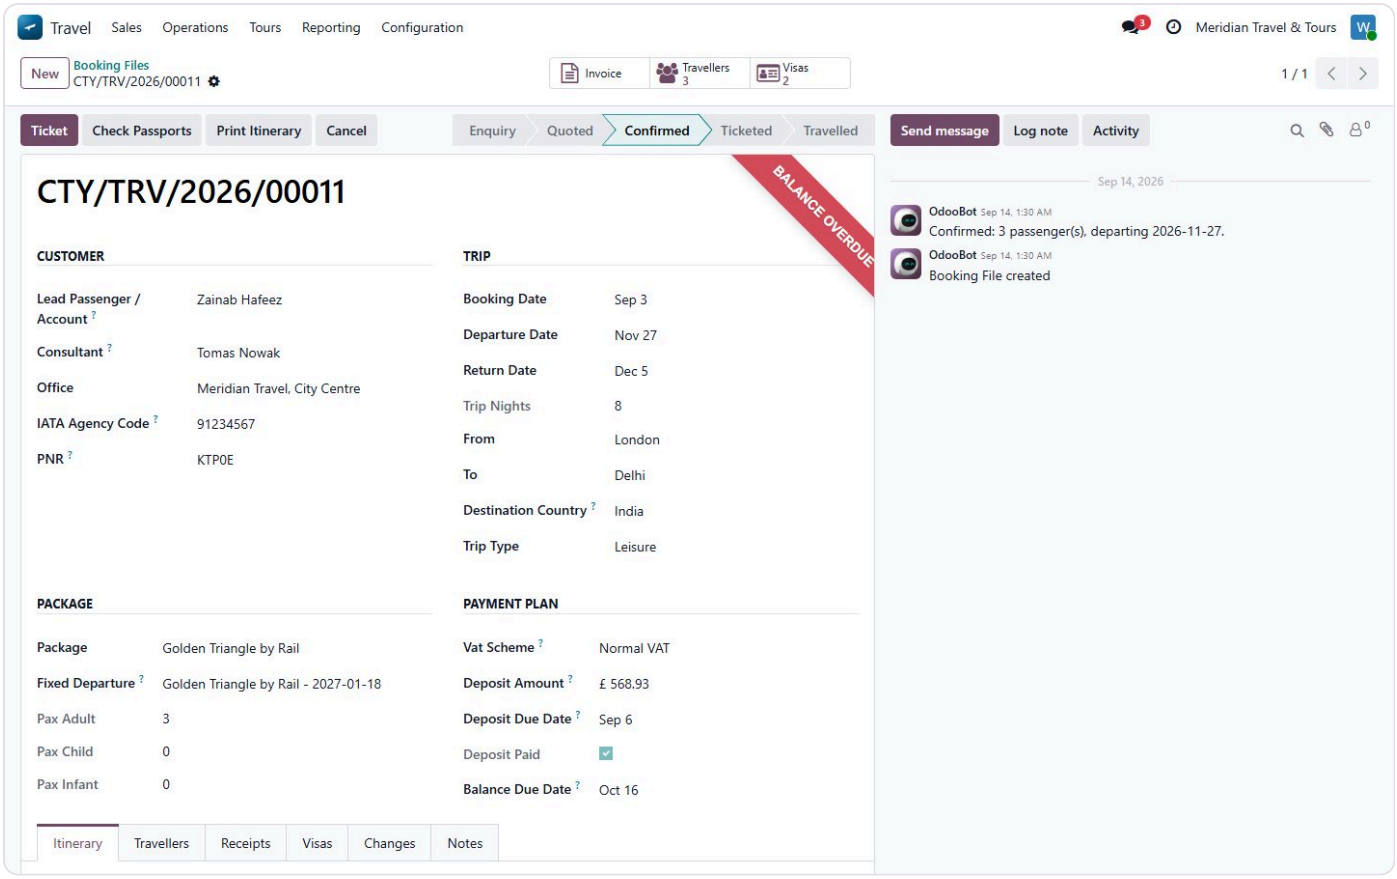

2 Confirm

Needs travellers, segments and a departure date. Every traveller needs a passport expiry and a passport that lasts the validity months. On a fixed departure there must be enough seats left for every passenger on the file. Draft segments go to Requested, and the confirmation is written in the history.

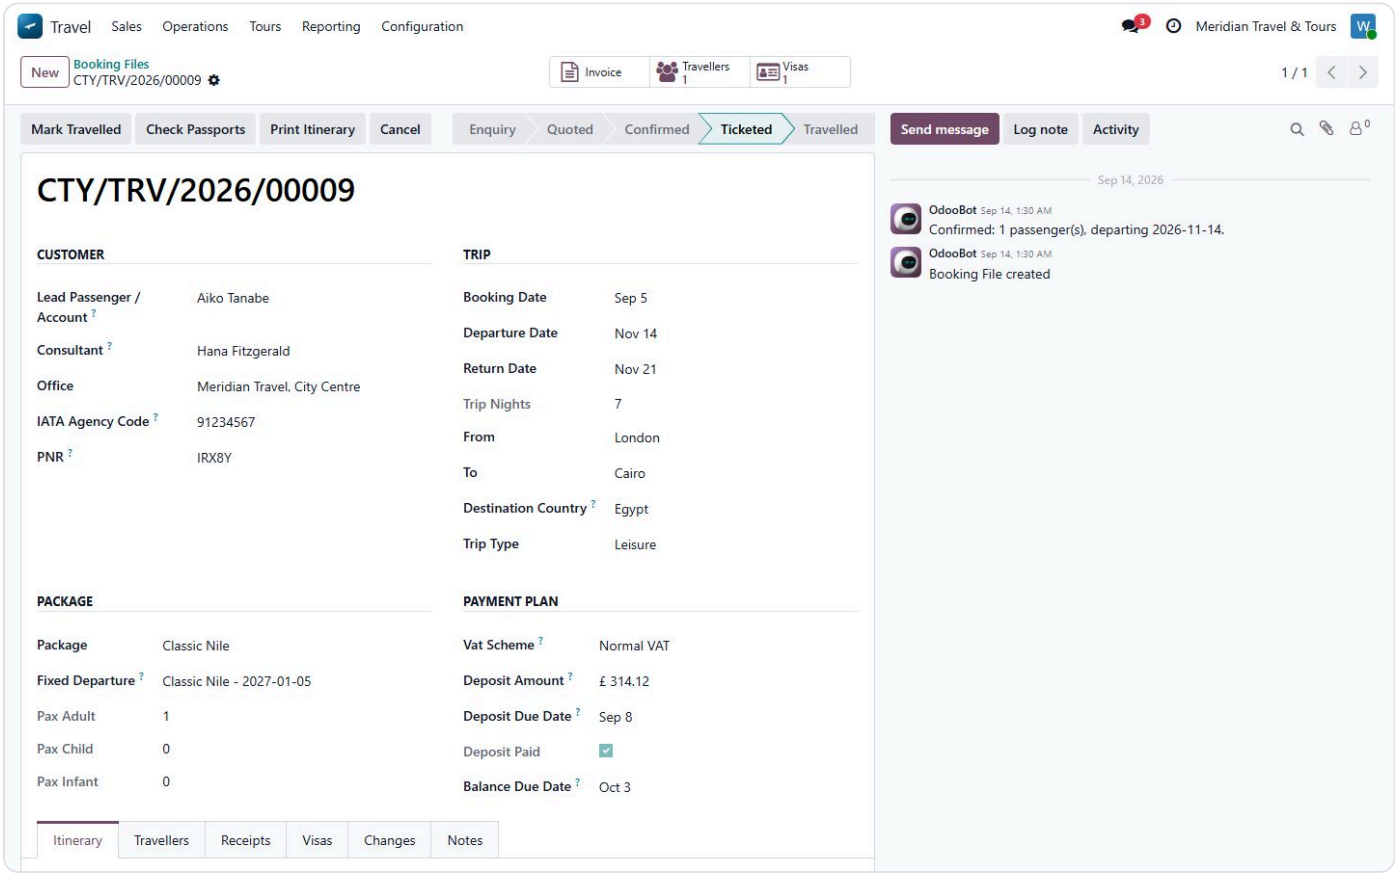

3 Ticket

From Confirmed. Every segment must be confirmed by its supplier, and with Block Unpaid Departures on, the deposit must be in. Confirmed segments go to Ticketed.

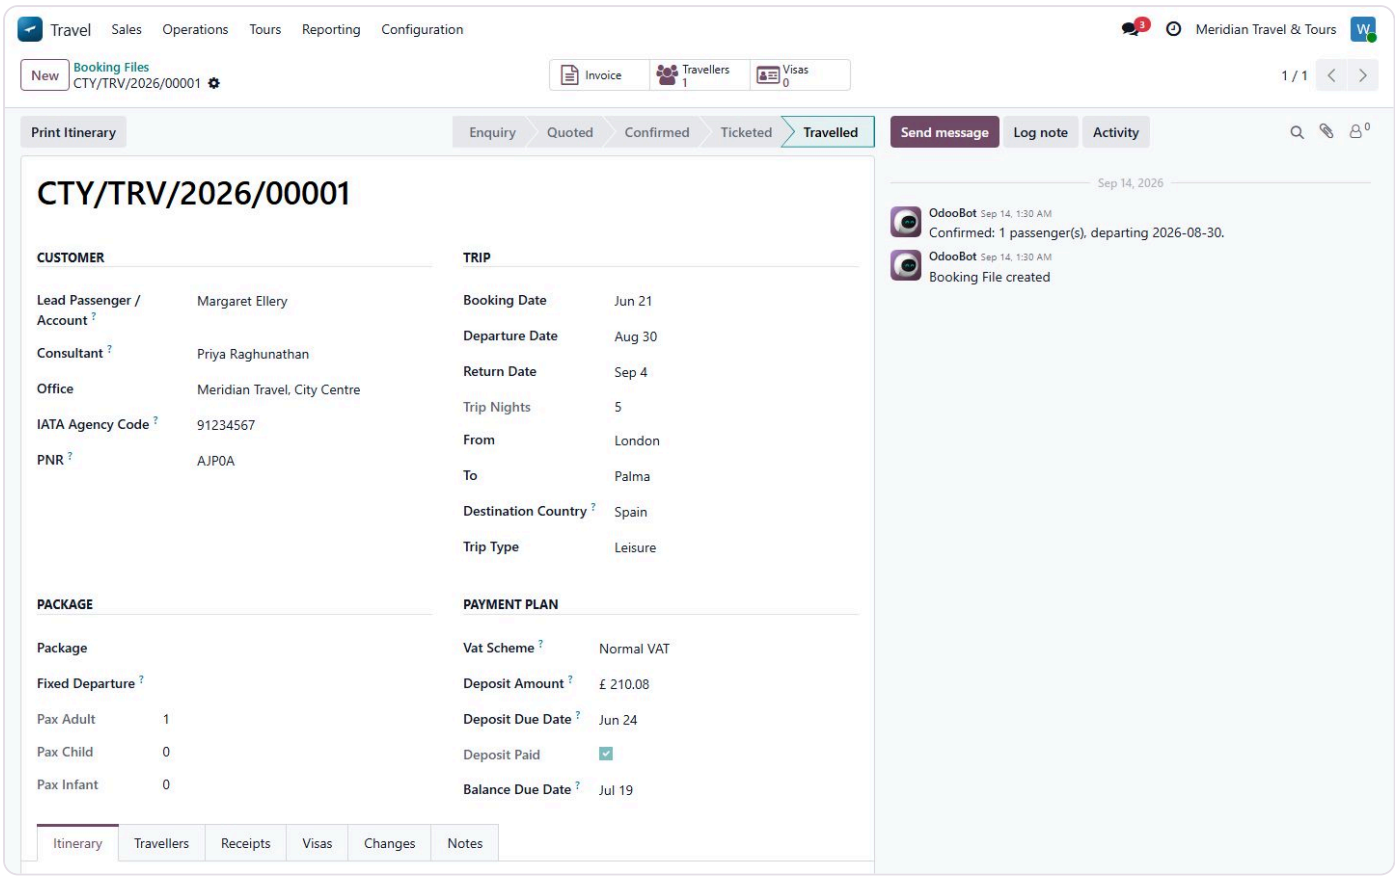

4 Mark Travelled

From Ticketed. With Block Unpaid Departures on, the balance must be fully paid.

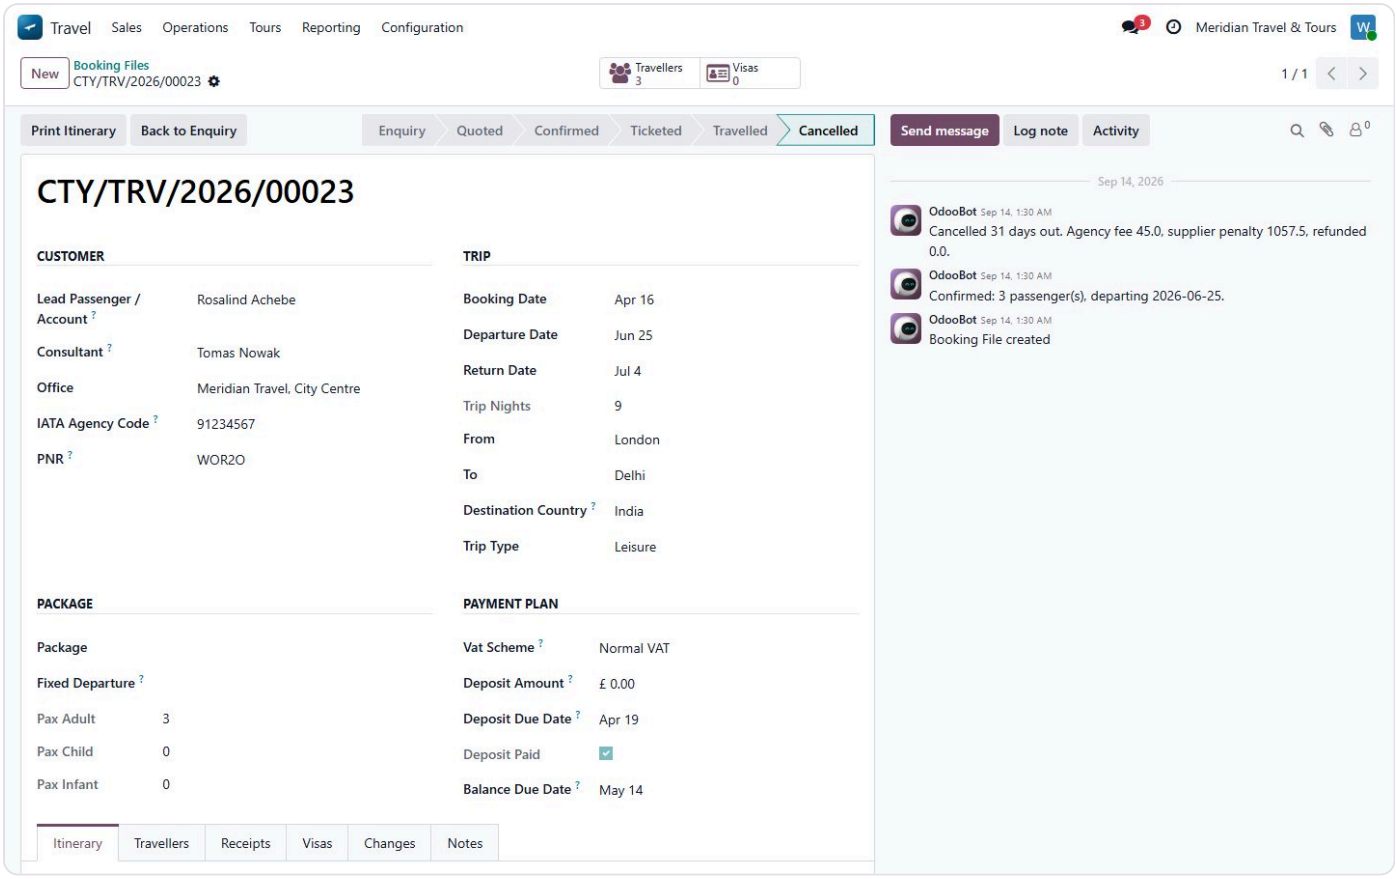

5 Travelled

The file is complete. It can no longer be cancelled or amended.

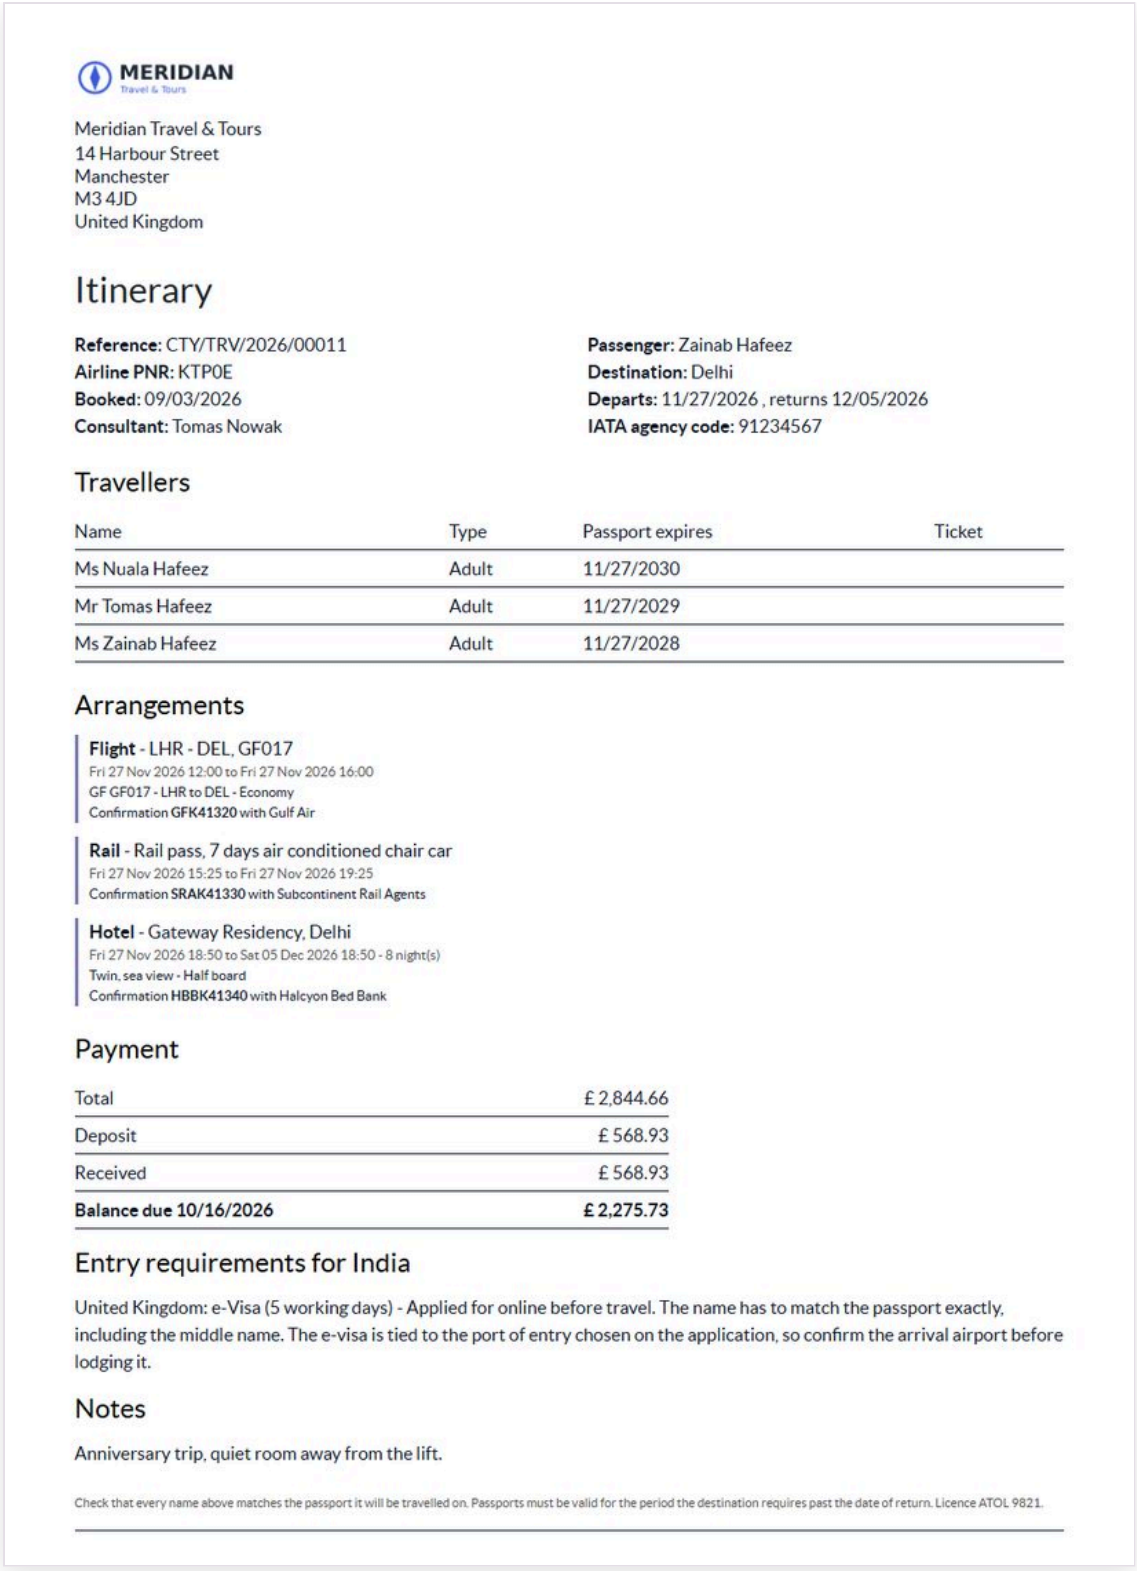

6 Cancel and Back to Enquiry

Cancel works until the file has travelled. It cancels every segment, cancels a draft invoice with a note, and gives the seats back on the departure. A posted invoice stops it: credit the invoice first. Back to Enquiry puts a cancelled file back to draft.

Print the itinerary

Print Itinerary appears once the file is past enquiry. It carries the agency, the IATA code, the PNR, every traveller, every live segment with its times and confirmation numbers, the entry requirements for the destination by passport, the payment plan and the customer notes.

PART 8 Deposits, receipts, balances and the invoice

Money comes in before the trip, usually in two parts. The file knows what the deposit is, when the balance is due and what has come in.

IN THIS PART YOU WILL LEARN

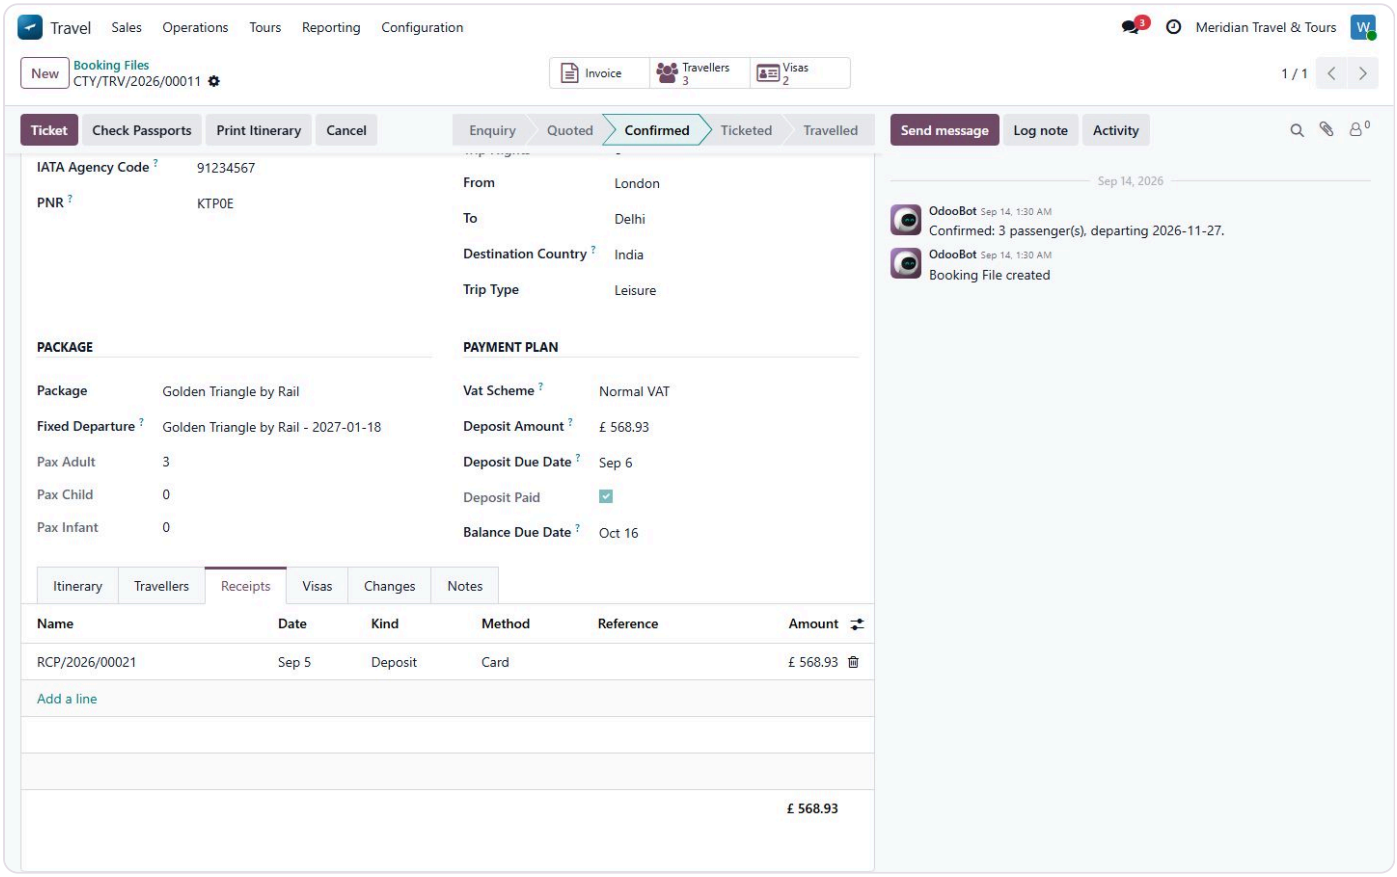

- The deposit and the balance date
- Take Deposit and recording receipts and refunds
- Balance Overdue and the nightly chase
- Raising the invoice, and the margin scheme

TRY IT YOURSELF ON THE DEMO

1. Open CTY/TRV/2026/00011 and read its Receipts tab
2. Reporting, then Balance Due

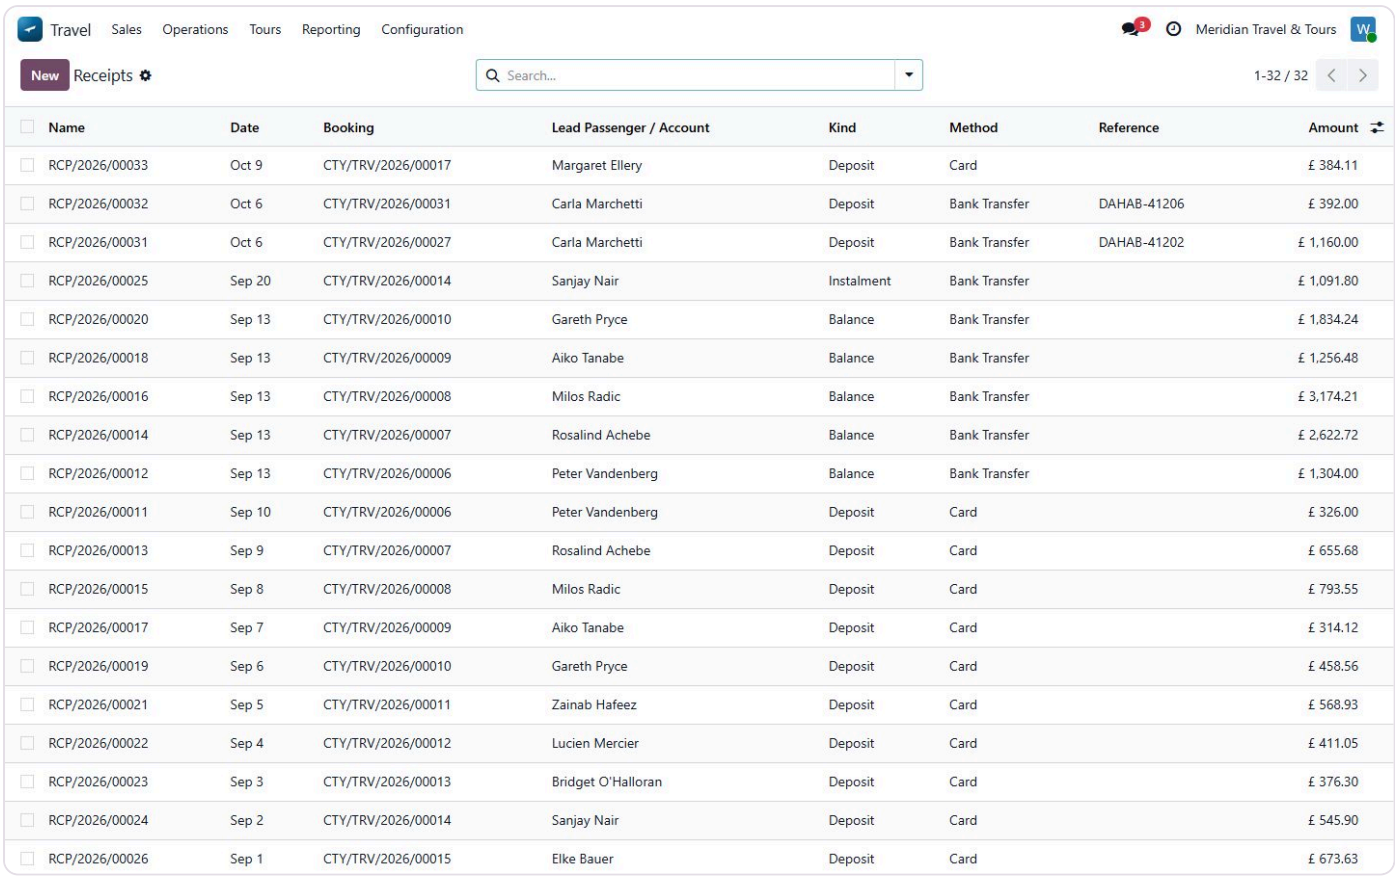

1 The Receipts tab

Each receipt has a date, amount, kind (deposit, instalment, balance, refund), method (cash, card, bank, cheque, online, credit note), reference and note. Amount Paid and Amount Due on the file follow them.

2 Sales, then Receipts

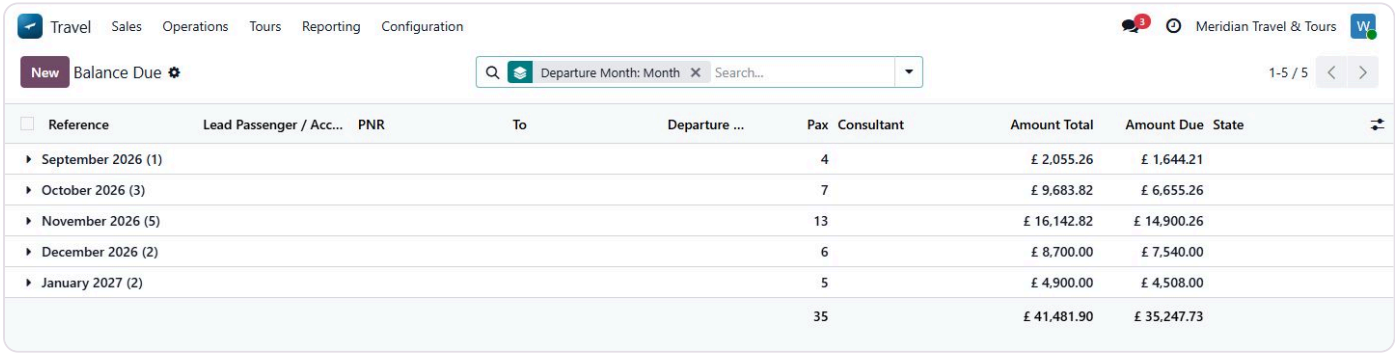

Every receipt across every file.

					35		£ 41,481.90	£ 35,247.73	

FIGURE	HOW IT IS WORKED OUT
Deposit	The file total times the deposit percentage in the settings. It can never be larger than the file.
Balance due date	The departure date less the balance days in the settings.
Deposit paid	Ticked when what has been received covers the deposit.
Balance Overdue	A confirmed or ticketed file past its balance date with more than a penny owed.
Refunds	A refund can never be more than has been taken on the file.

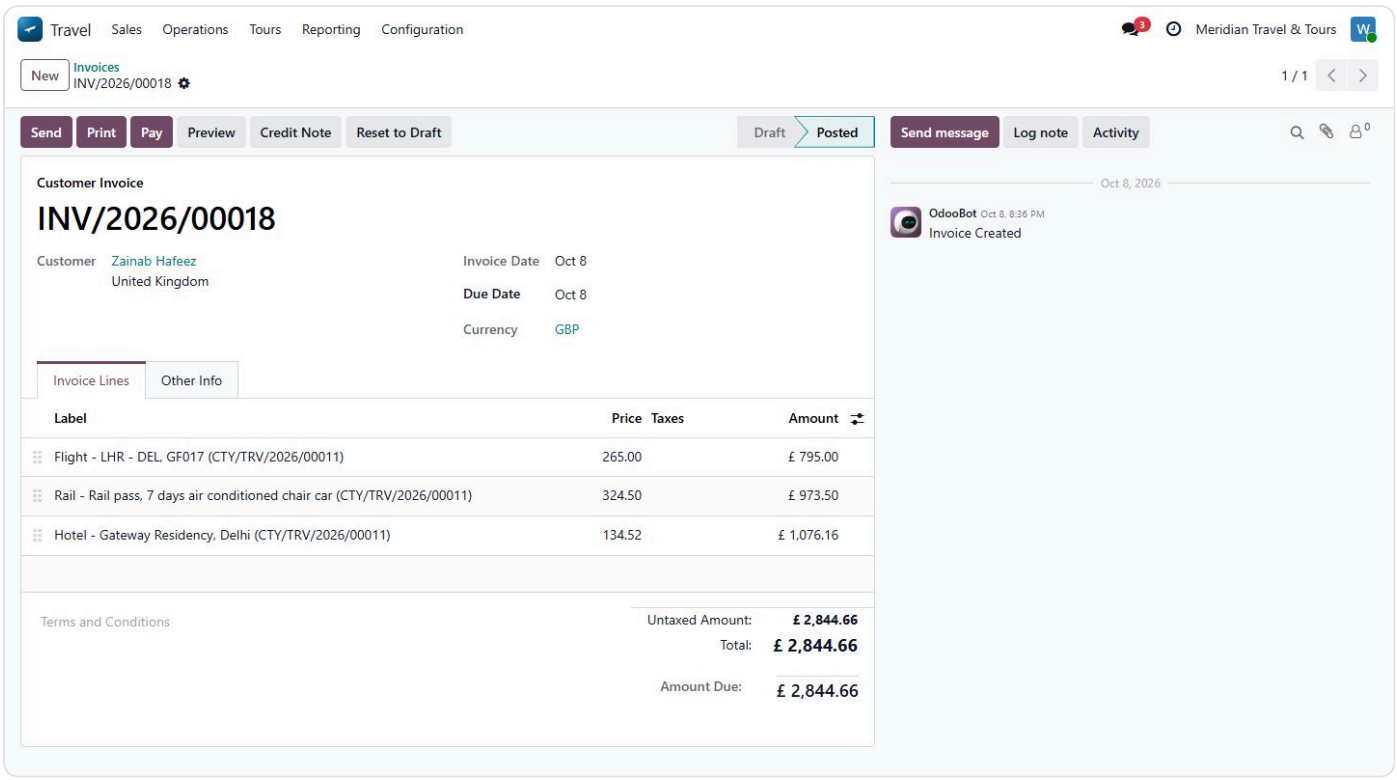

Take Deposit in the header books a card receipt for whatever is still missing from the deposit. It shows once the file is quoted, until the deposit is paid.

Every night **Travel: chase overdue balances** emails the customer the Balance Due template and writes the amount and date on the file, for every confirmed or ticketed file past its balance date.

The customer invoice

4 Press Invoice

From a confirmed file onwards, once. One invoice line per live segment, on the service type's revenue product, in the company currency and the office's sales journal if it has one.

Margin scheme VAT

On a margin scheme file the invoice carries no VAT lines and the segments go out at their net-of-tax sell. The VAT on the margin is worked out from the tax you nominated in the settings, on sell less supplier cost (commission is left out), and written in the invoice notes with the margin and the IATA code. Your accountant still books and files it.

Once the invoice is posted the file is locked: segments cannot be cancelled or put back and changes cannot be applied until the invoice is credited.

PART 9 Amendments and cancellations

When a customer changes or cancels, the cost depends on how close to departure they ask. The change record picks the fee band, works out the agency fee and the supplier penalty, and shows what is actually due back.

IN THIS PART YOU WILL LEARN

- Raising a change from the file
- How the fee band is picked and the figures snapshotted
- Quote, Apply, Customer Declined and Reopen
- What applying a cancellation does to the file

TRY IT YOURSELF ON THE DEMO

1. Sales, then Amendments and Cancellations
2. Open AMD/2026/0001, an applied cancellation, and its file

1 Sales, then Amendments and Cancellations

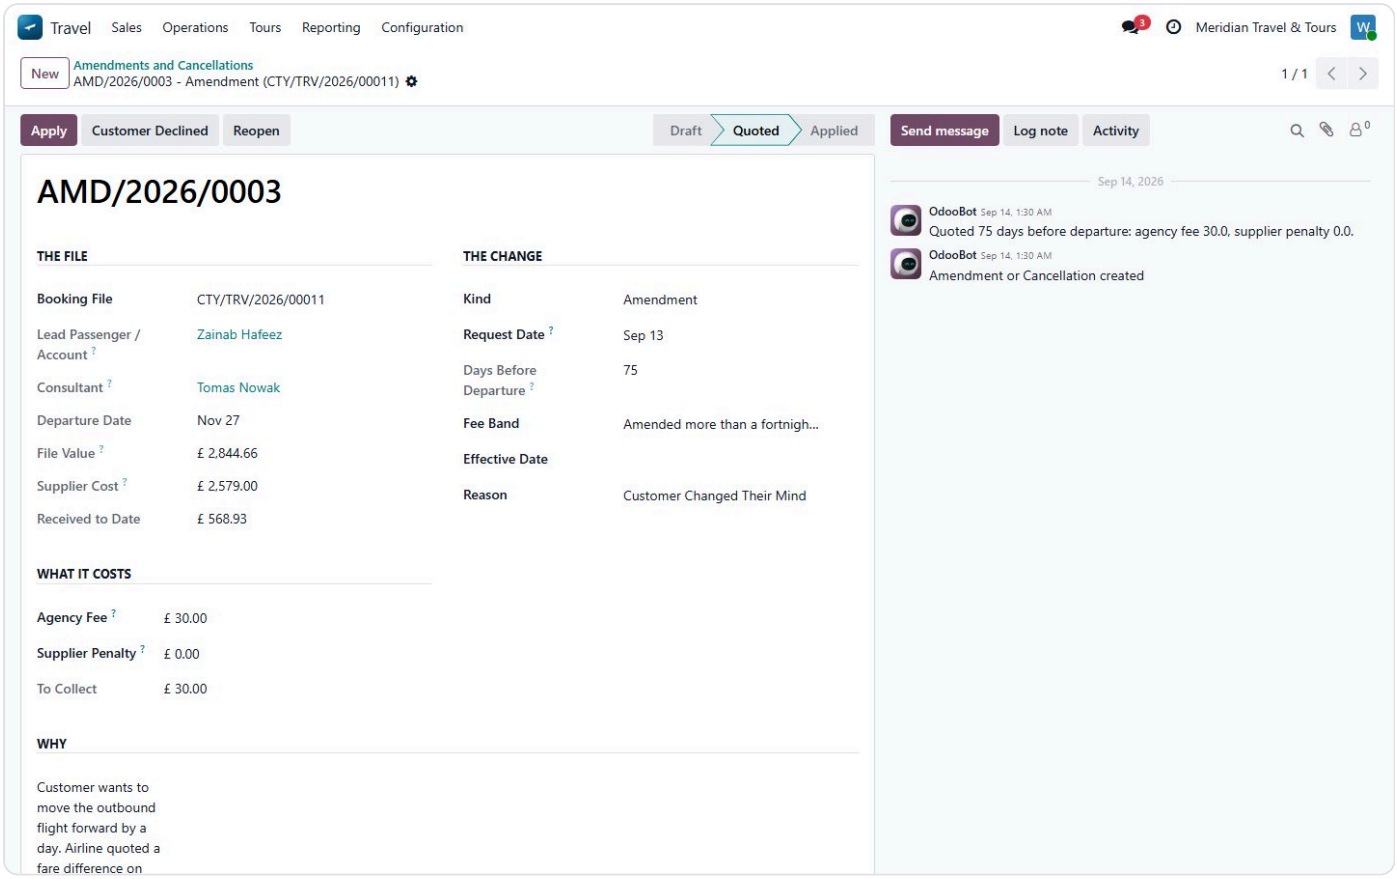

Every change with its file, kind, days before departure, fees, refund and status.

Name	Booking File	Lead Passenger /...	Kind	Request Date	Days Bef...	Fee Band	Reason	Agency Fee	Supplier Penalty	Amount Refund	State

								£ 120.00	£ 1,937.70	£ 0.00	

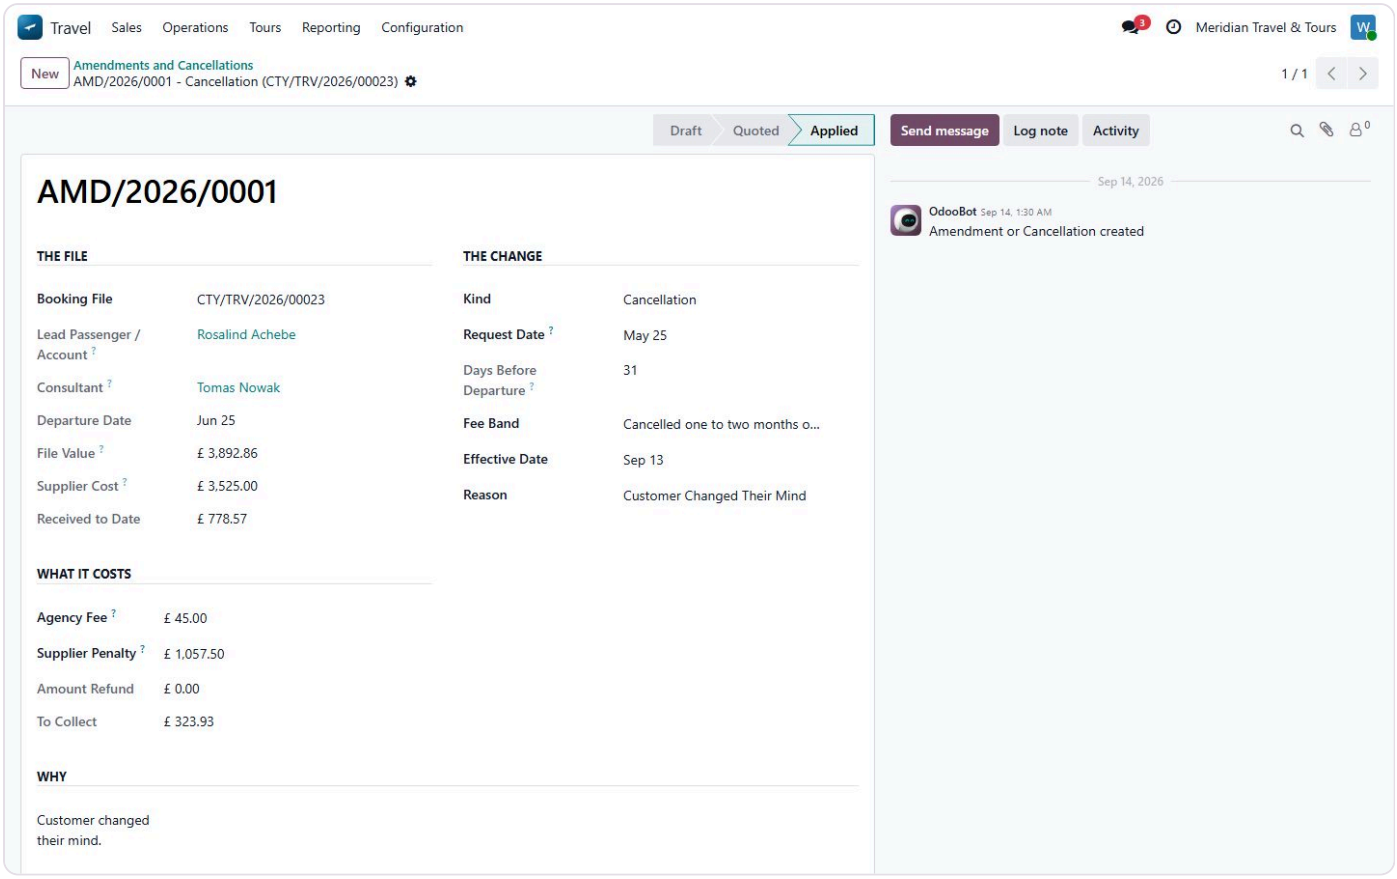

2 A quoted amendment

Pick the file, the kind (amendment or cancellation), the request date and the reason (customer, medical, visa refused, supplier, schedule change, weather, other). Quote works out the days before departure, snapshots the file's value, supplier cost and what has been received, picks the fee band and prices it. Both fees can be typed over.

3 An applied cancellation

Apply on a cancellation cancels the file the same way the Cancel button does, books the refund as a refund receipt on the file and writes the fee, penalty and refund in its history. Apply on an amendment writes the amount to collect.

4 The Changes tab on the file

Every change raised against the file, with its figures.

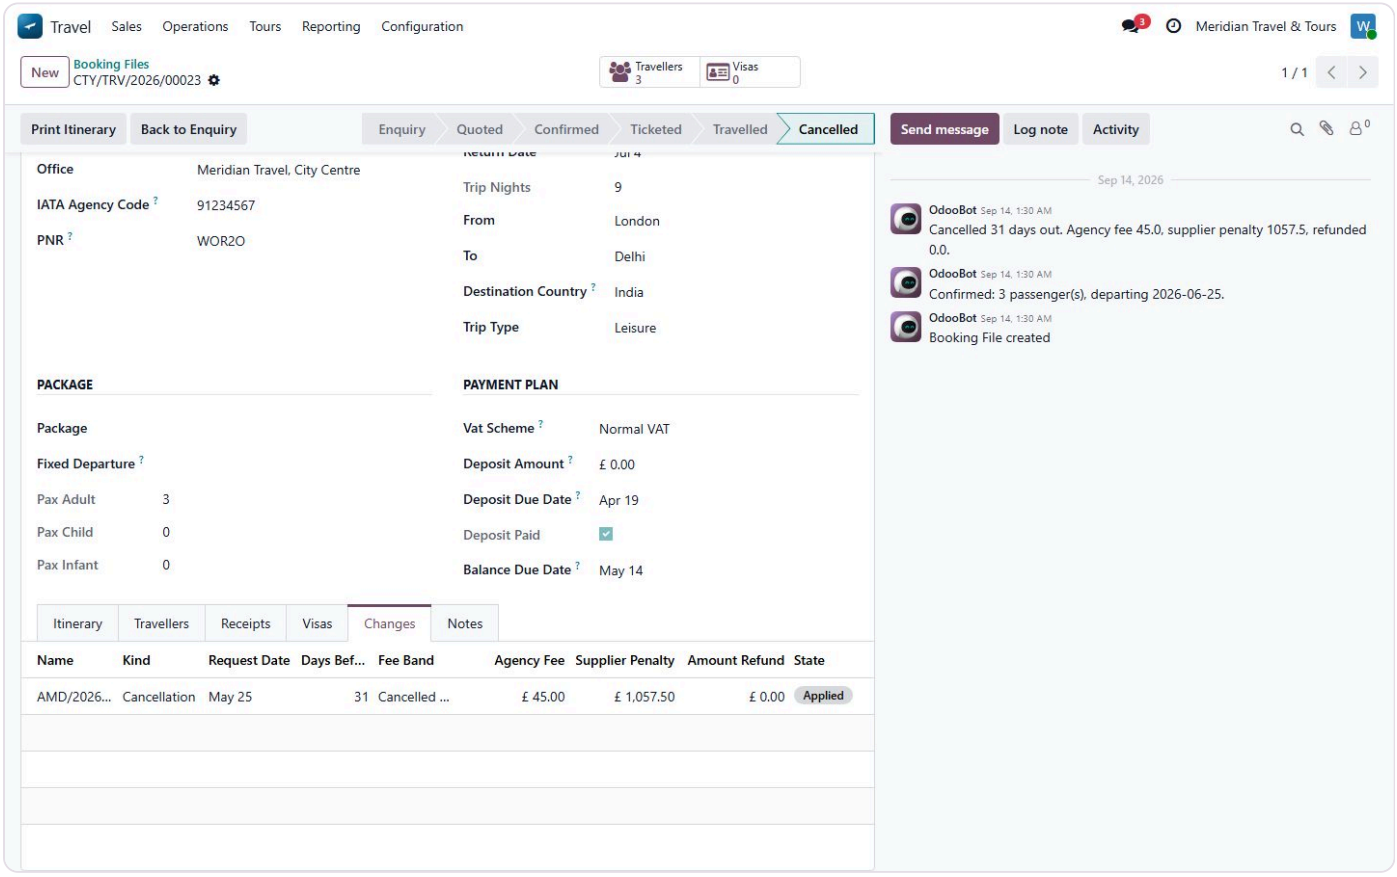

FIGURE	HOW IT IS WORKED OUT
Days Before Departure	Departure date less the request date.
Fee Band	The band of that kind whose from and to days cover it.
Agency fee	The band's fixed amount, or its percentage of the file value.
Supplier penalty	The band's penalty percentage of the supplier cost.
Refund (cancellation)	Received to date less fee and penalty, never below zero.
To Collect	On a cancellation, what the fees come to beyond what was received. On an amendment, fee plus penalty.

A change cannot be quoted on a file that has not been sold or is already cancelled, and cannot be applied once the file has travelled or its invoice is posted. Customer Declined closes a quoted change without touching the file, and Reopen puts a declined change back to draft.

PART 10 Packages and fixed departures

A tour operator sells the same trip many times. The package holds the product; each departure holds the seats on one date.

IN THIS PART YOU WILL LEARN

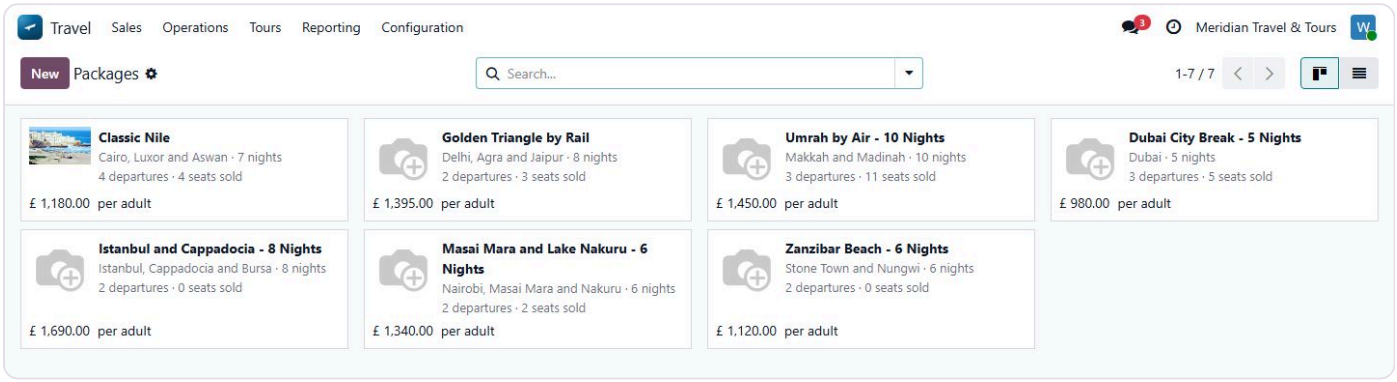

- Packages: itinerary, inclusions, price per adult and child, margin
- Departures: seats, guarantee point, load factor, states
- Selling a file onto a departure without overselling
- The nightly departure job and the passenger manifest

6 Open a departure

The package, departure date (return follows from the package's nights), tour manager, seats and the number needed to guarantee it. Prices come from the package, and the expected margin is margin per person times seats booked.

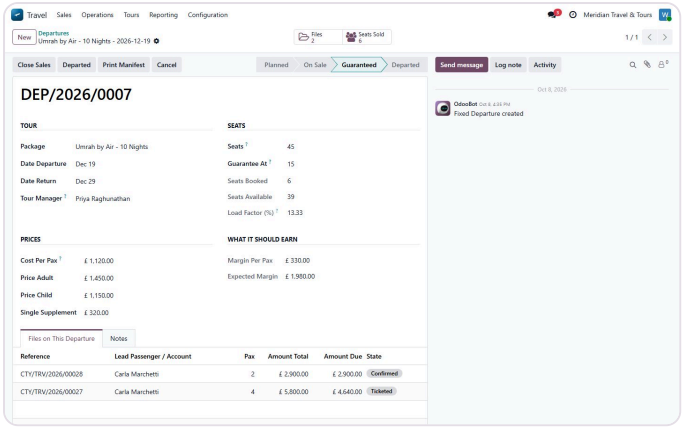

7 Files on This Departure

Every file sold onto it. Seats booked count the passengers on confirmed, ticketed and travelled files, so a cancelled file gives its seats back by itself.

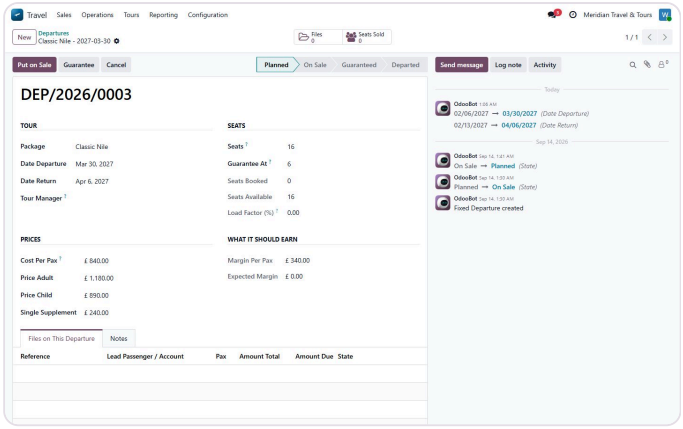

BUTTON	FROM	WHAT HAPPENS
Put on Sale	Planned, Closed	Open for selling
Guarantee	Planned, Open	Needs seats booked at or above the guarantee point
Close Sales	Any but Departed, Cancelled	Stop selling, the departure still runs
Departed	Open, Guaranteed, Closed	Writes the final seats and load factor in the history
Cancel	Any	Only when no sold file is left on it
Print Manifest	Any	The passenger list for the tour manager

Confirming a file on a departure checks there are enough seats left for all its passengers, and refuses a departure that is cancelled or has gone. The nightly job **Travel: move departures on** opens planned departures that have seats, guarantees open ones that reached the minimum, closes ones that are full and marks past ones as departed.

A guaranteed departure.

A planned departure, not yet on sale.

2 The board

One column per state.

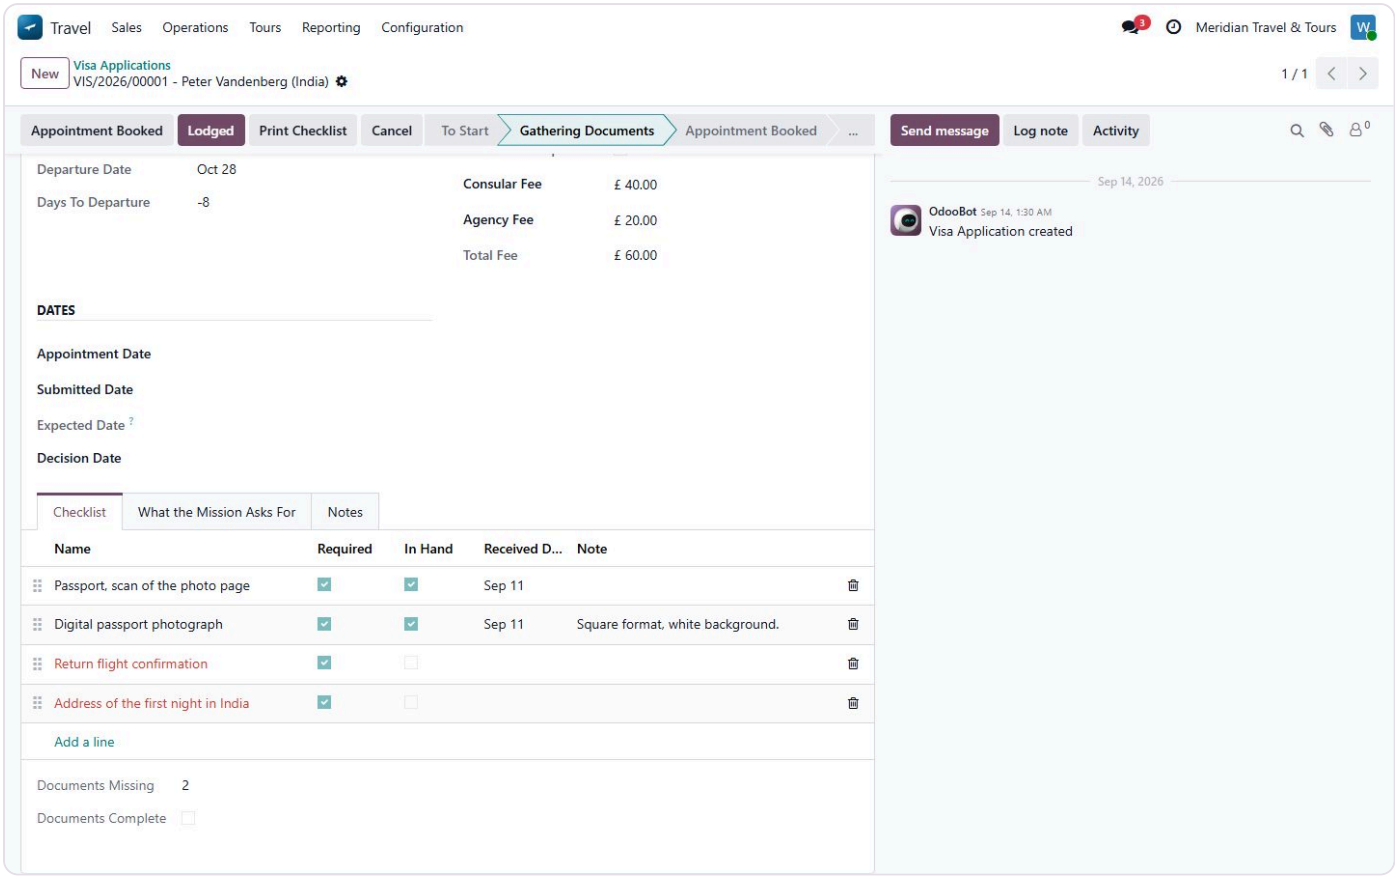

3 Start Documents

Pick the file and traveller and the destination. The country rule is found for the traveller's passport and its type, processing days, biometrics and note show. Start Documents copies the rule's checklist onto the application and the consular and agency fees. Tick each document as it comes in; the date is filled in.

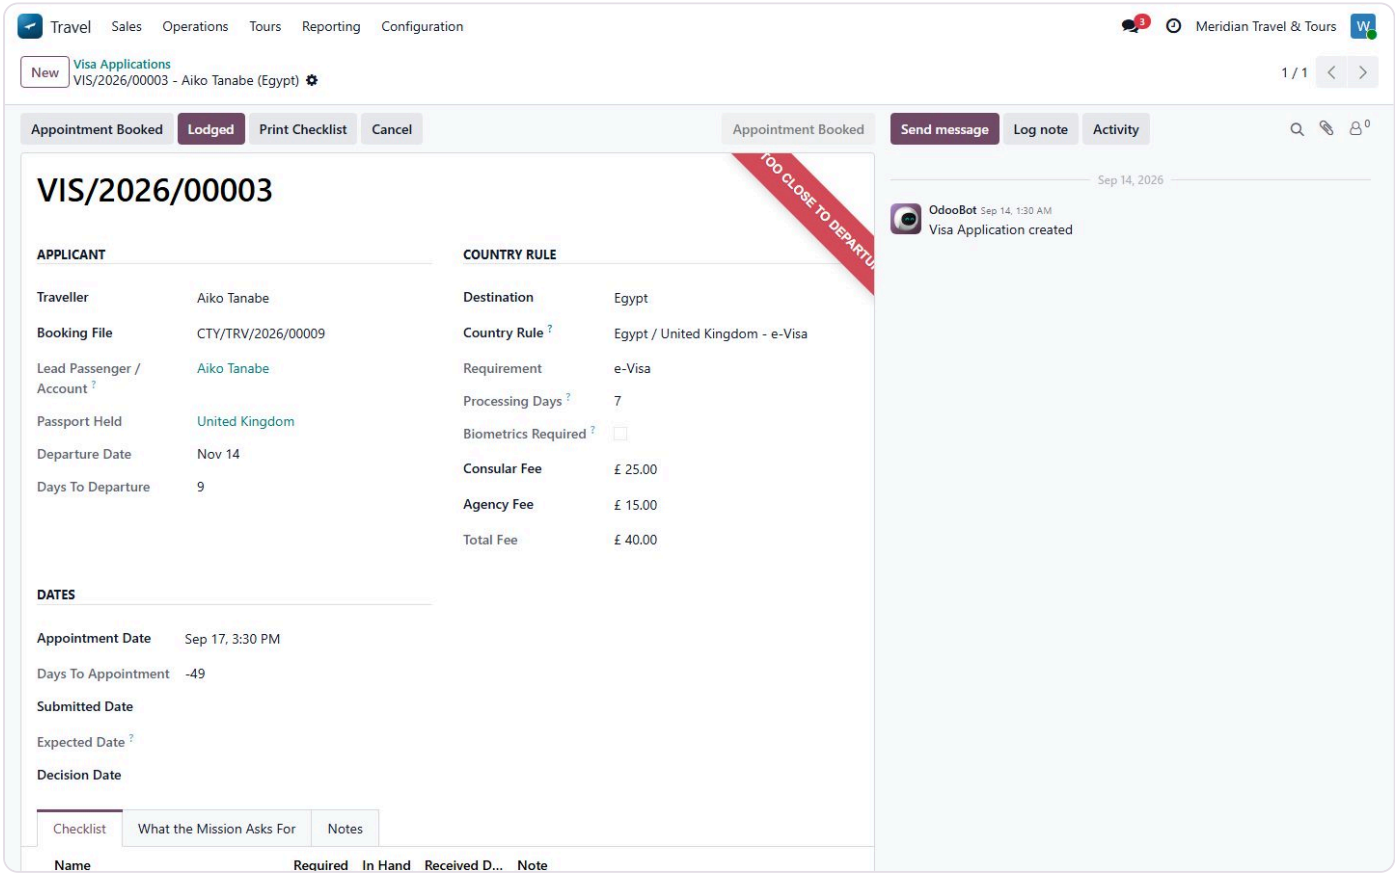

4 The checklist

Each document with whether it is required, whether it is in hand, the date it came in and a note. The application counts what is still missing.

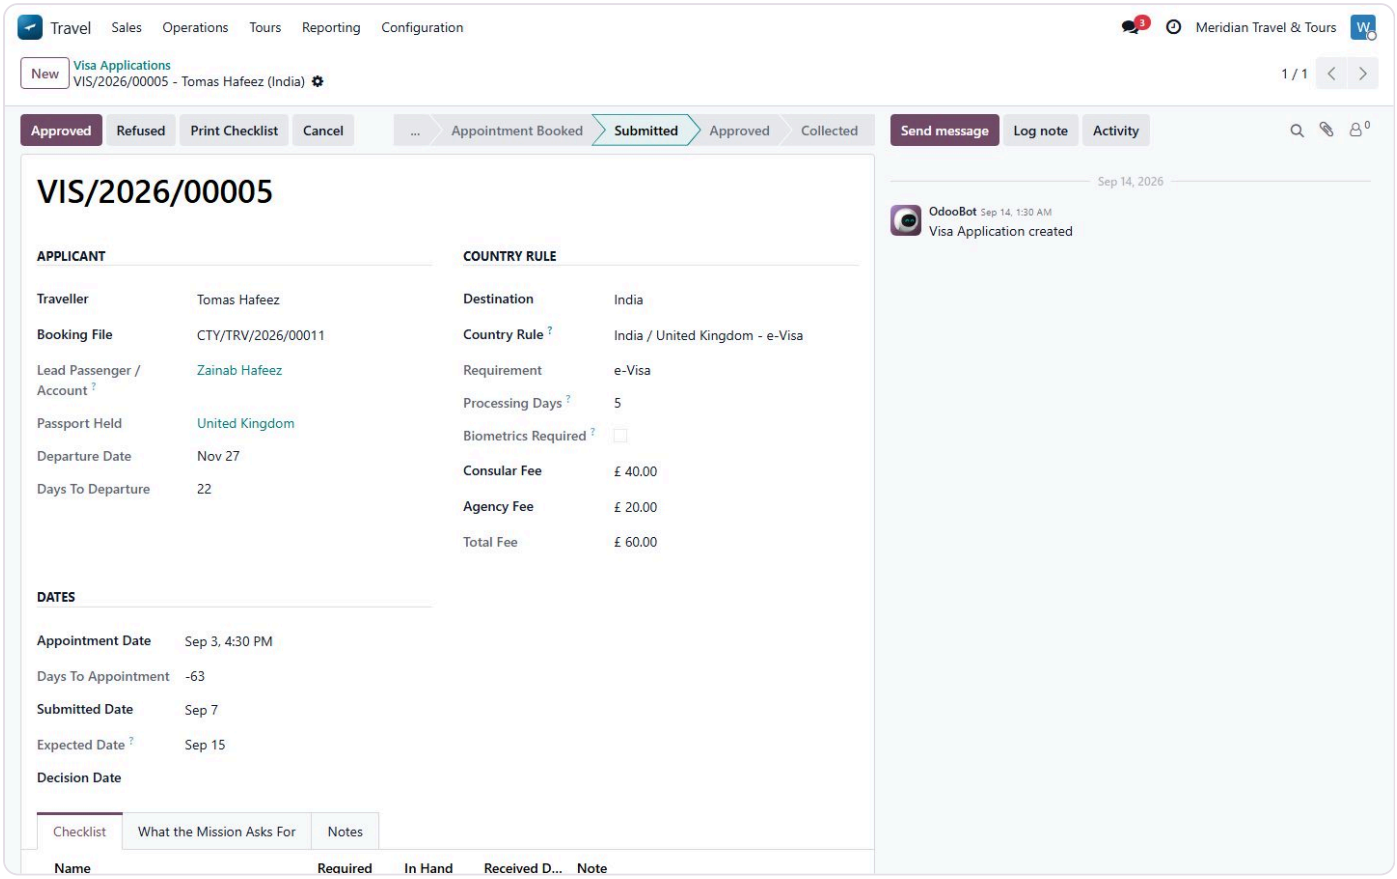

5 Appointment Booked

Needs the appointment date and a complete checklist.

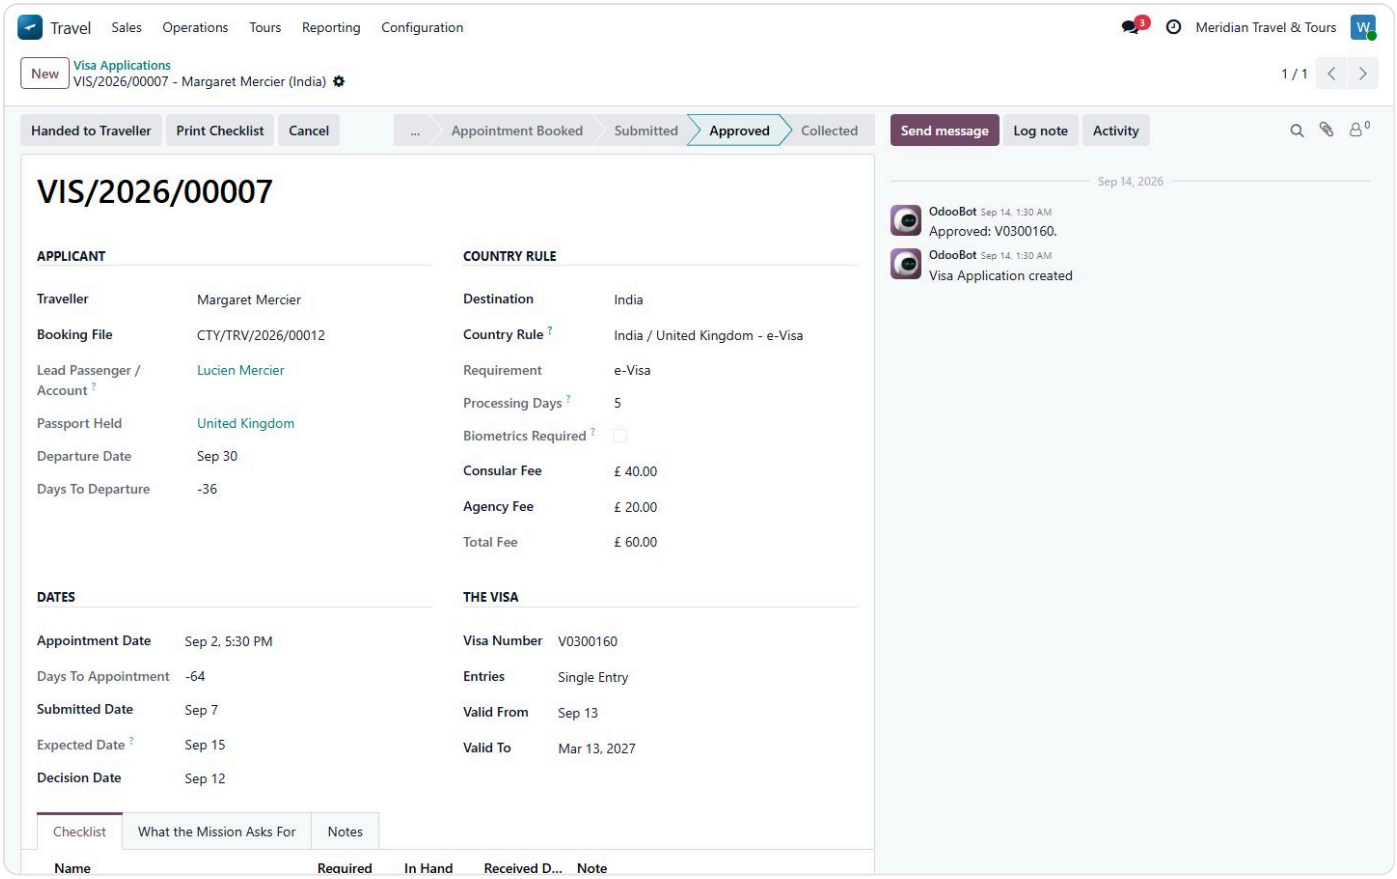

6 Lodged

Needs a complete checklist, and an appointment when biometrics are taken. The submitted date is set and the expected decision date is worked out from the processing days in working days.

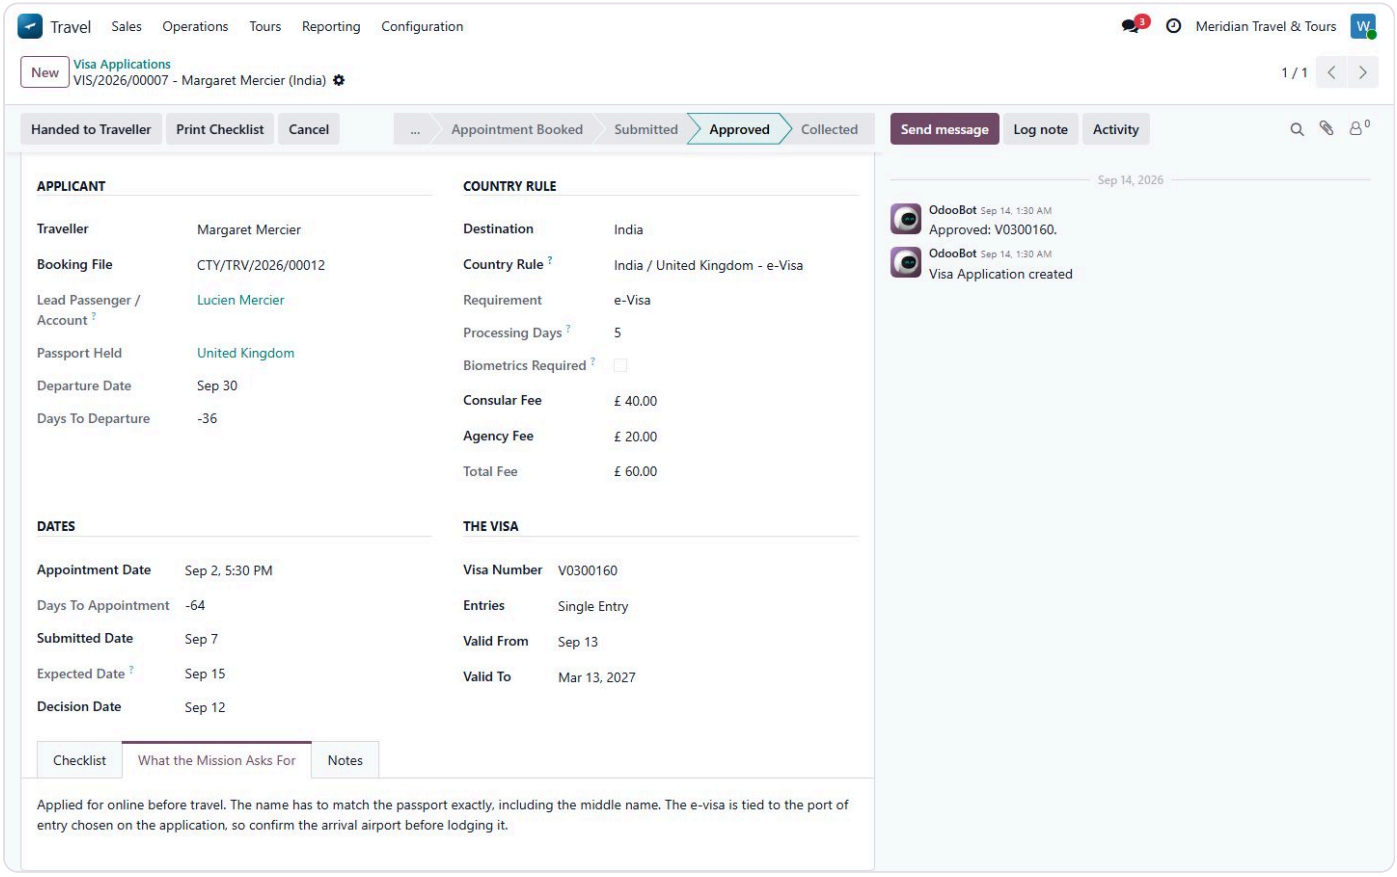

7 Approved, Refused, Handed to Traveller

Approved needs the visa number, and records valid from, valid to and entries. Refused needs the reason and writes it on the file. Handed to Traveller records the collection date. Cancel and Reopen are there for the rest.

8 What the Mission Asks For

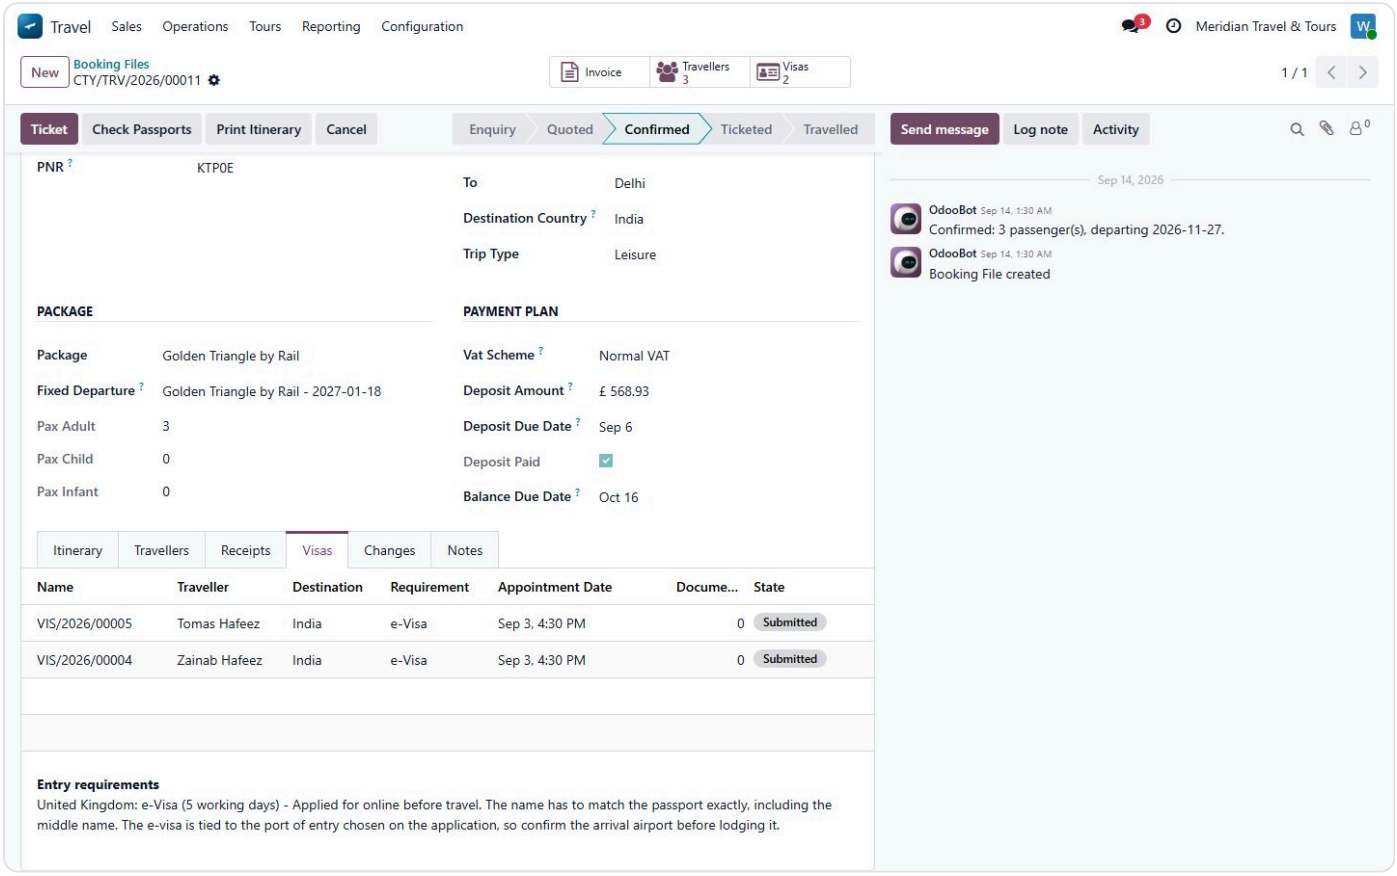

The country rule's note and requirement, kept on the application for reference.

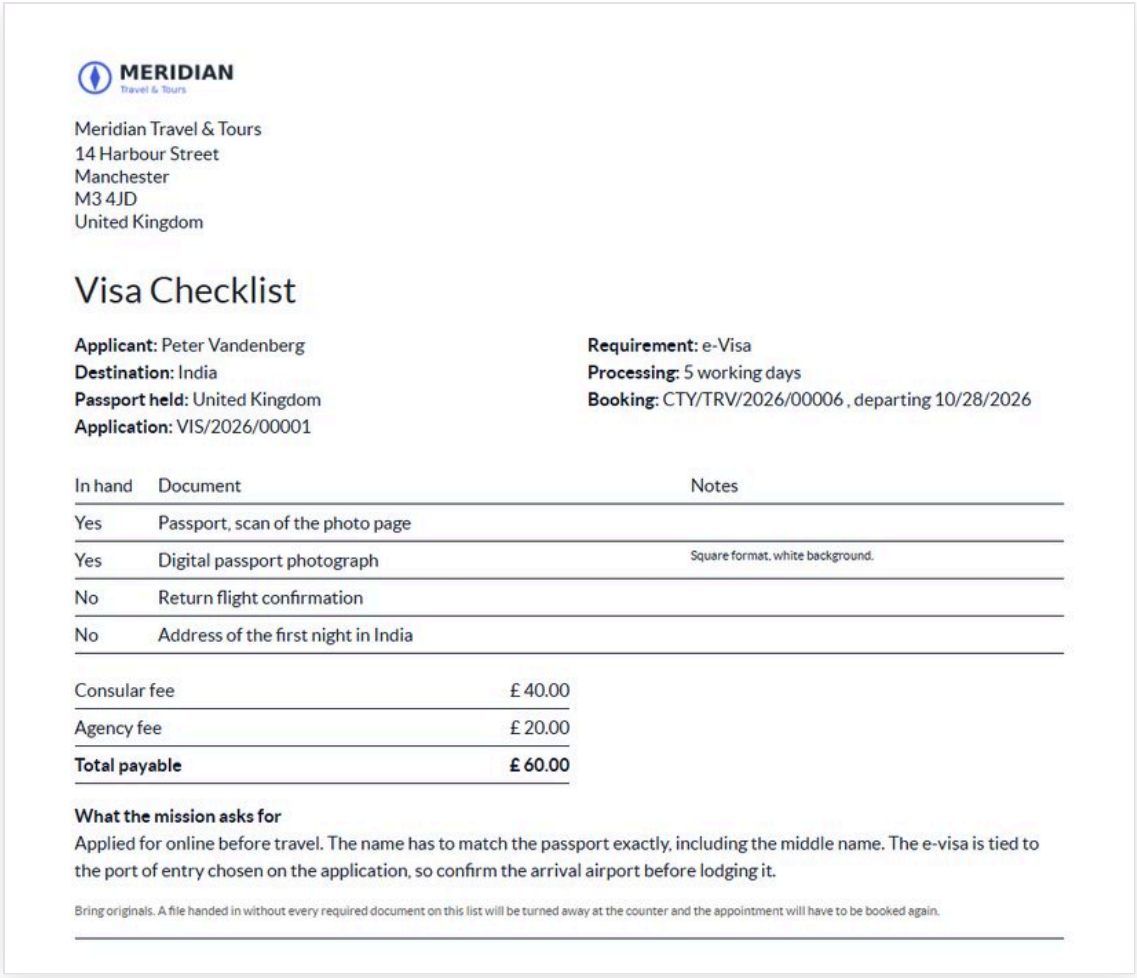

At risk is lit on an open application when the days to departure are no more than the processing time in calendar days. Every night **Travel: chase visa applications** looks at applications not yet lodged within the Chase Visas window, writes a line on the file, and emails the traveller the Visa Appointment template when an appointment is booked.

9 The Visas tab on the file

Every application for the file's travellers, and the entry requirements note worked out from the destination and each passport.

Visa Checklist

Applicant: Peter Vandenberg
Destination: India
Passport held: United Kingdom
Application: VIS/2026/00001

Requirement: e-Visa
Processing: 5 working days
Booking: CTY/TRV/2026/00006 , departing 10/28/2026

In hand	Document	Notes
Yes	Passport, scan of the photo page	
Yes	Digital passport photograph	Square format, white background.
No	Return flight confirmation	
No	Address of the first night in India	

Consular fee	£ 40.00
Agency fee	£ 20.00

What the mission asks for
Applied for online before travel. The name has to match the passport exactly, including the middle name. The e-visa is tied to the port of entry chosen on the application, so confirm the arrival airport before lodging it.

Bring originals. A file handed in without every required document on this list will be turned away at the counter and the appointment will have to be booked again.

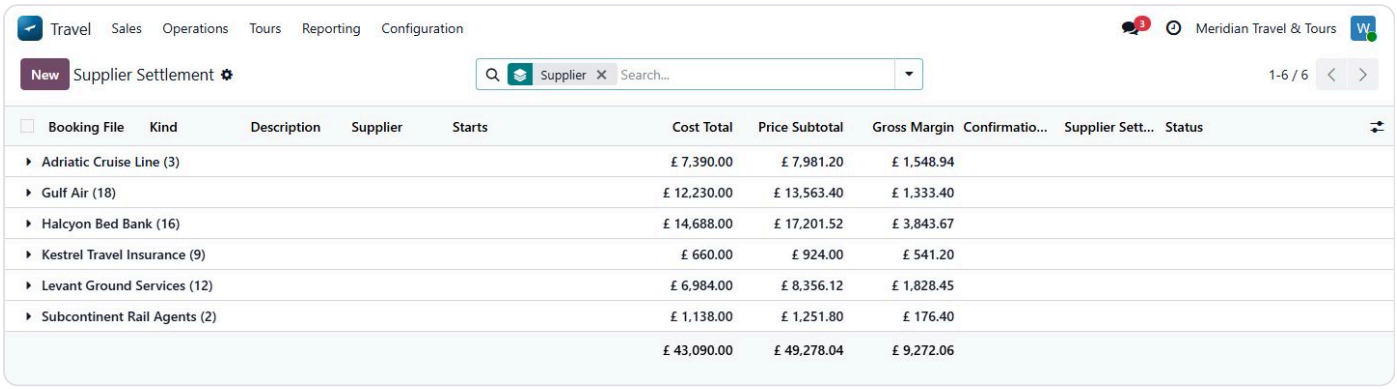

The visa checklist for VIS/2026/00001.

PART 12 Paying suppliers

What you owe the suppliers is the other half of every file. The settlement screen lists what is confirmed and not yet paid.

1 Operations, then Supplier Settlement

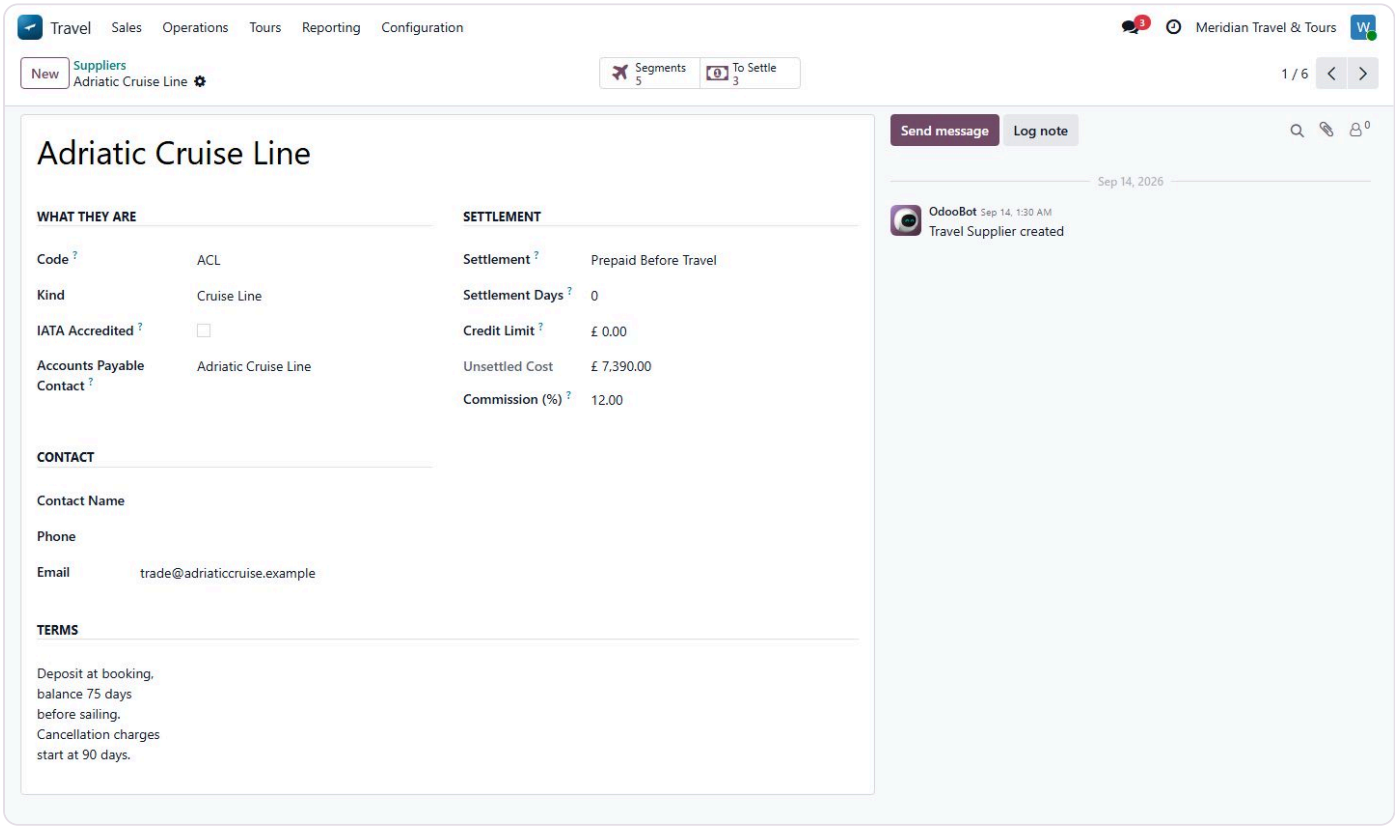

Confirmed and ticketed segments not yet settled, grouped by supplier, with net cost and supplier invoice reference. Select them and Mark Settled when the supplier is paid or BSP has cleared.

Booking File	Kind	Description	Supplier	Starts	Cost Total	Price Subtotal	Gross Margin	Confirmatio...	Supplier Sett...	Status

					£ 43,090.00	£ 49,278.04	£ 9,272.06			

2 Exposure on the supplier

The supplier's form shows how many segments are unpaid and their cost, and flags it when that passes the credit limit.

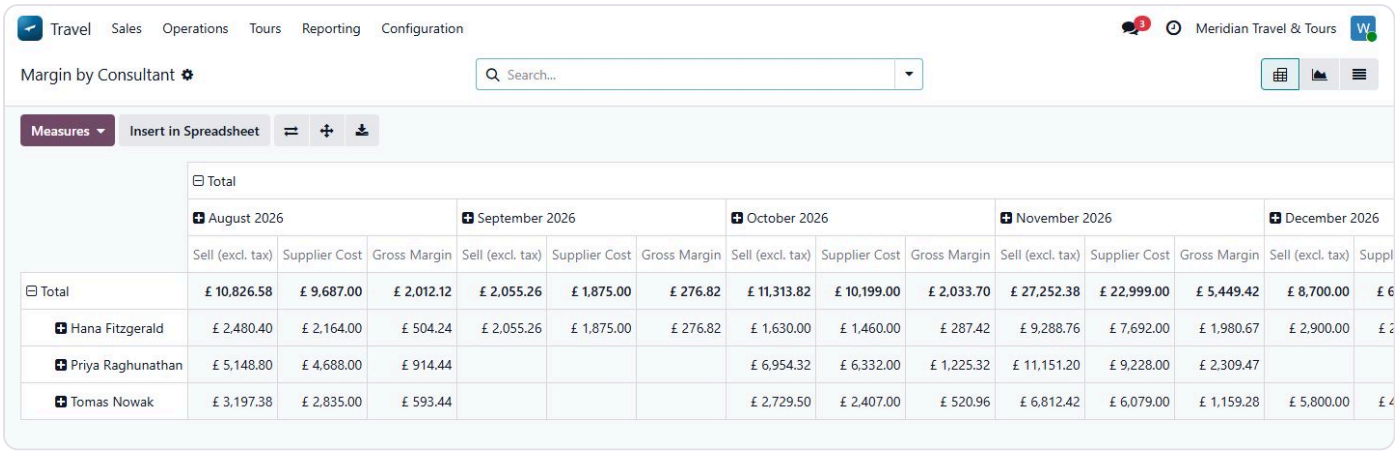

A segment cannot be settled before the supplier has confirmed it, and a settled segment cannot simply be cancelled: raise a cancellation on the file so the penalty and refund are worked out.

PART 13 Reporting

Three manager reports, plus the pivot on the files.

1 Margin by Consultant

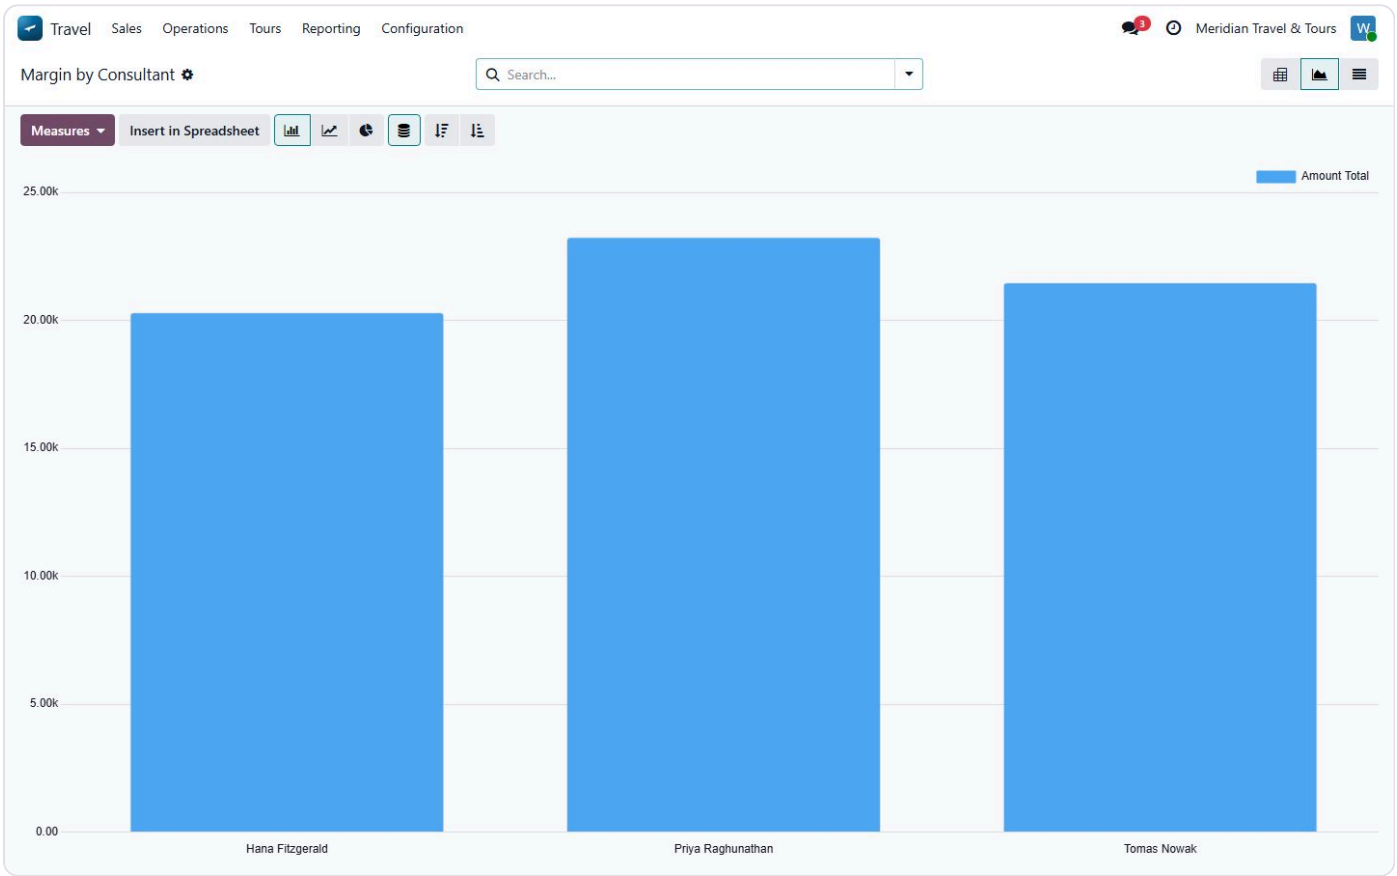

Confirmed, ticketed and travelled files as a pivot of margin by consultant.

2 The same as a graph

Who sold the margin, at a glance.

3 Load Factor

Seats sold against seats held per departure, the tour operator's main number.

Margin Sold on a consultant adds up every confirmed, ticketed and travelled file they own, not one month, so compare it with the monthly target with that in mind.

PART 14

Printed documents, emails and what runs by itself

Three documents print on an A4 format with room for your letterhead, three email templates are installed, and five jobs run every night.

DOCUMENT	PRINTED FROM	WHAT IT SHOWS
Itinerary	A booking file	Agency, PNR, IATA code, travellers with passport expiry and ticket, arrangements, payment, entry requirements, notes
Passenger Manifest	A departure	Tour, dates, tour manager, seats, every passenger with type, passport expiry, file and special request
Visa Checklist	A visa application	Applicant, destination, passport, requirement, processing, appointment, each document in hand or not, and the mission note

EMAIL TEMPLATE	SENT
Travel: Booking Confirmation	By hand from the file's Send message composer
Travel: Balance Due	By the nightly balance chase
Travel: Visa Appointment	By the nightly visa chase, when an appointment is booked

SCHEDULED ACTION	WHAT IT DOES EACH NIGHT
Travel: chase overdue balances	Emails and notes every sold file past its balance date
Travel: passports that will not last the trip	A to-do on each live file with a passport problem
Travel: move departures on	Opens, guarantees, closes and departs departures
Travel: chase visa applications	Notes and emails open applications close to departure
Travel: chase supplier confirmations	Notes every segment still waiting on its supplier

PART 15 A fifteen minute walk-through

The path that shows the whole agency, in the order to show a new consultant.

Questions people ask

QUESTION	ANSWER
Does it book flights or hotels?	No. Book with the supplier as now and type the PNR, confirmation and net cost onto the file.
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community with Invoicing.
Can customers book online?	No. There is no booking website or portal in the module.
Can a tour operator and a retail shop both use it?	Yes. Files for retail, packages and departures for the operator, and a file can be sold onto a departure.
What stops a passenger being turned away?	Confirm refuses passports that do not last the validity months, and the nightly watch raises a to-do.
Can we oversell a departure?	No. Confirm refuses a file that needs more seats than are left.
Do consultants see each other's files?	No. A consultant sees only files where they are the consultant. Operations and managers see all.
Does it handle margin scheme VAT?	It works out the VAT on the margin and writes it on the invoice, which goes out with no VAT lines. Your accountant books it.

Want this for your agency?

We set it up with your offices, IATA codes, consultants, suppliers and fee schedule, load your visa rules and packages, connect it to your chart of accounts and taxes, and train the consultants and the ticketing desk. The same module runs one shop or a group of branches.
