COMPLETE GUIDE · THE TRADE, SETUP AND EVERY SCREEN

Insurance Broker Management for Odoo 19

A broker's book run from the first enquiry to the commission in the bank: market quotes side by side, policies with premium tax and instalments, mid term endorsements, renewals, claims and the disclosure file. Every screen and every step, shown on a live demo. No Odoo background needed.

START

About this guide

A broker earns its living on a piece of paper it does not write: the carrier writes the policy, the broker finds it, explains it, collects for it and fights for the client when it pays out. Everything in this module follows that one piece of business from the first phone call to the commission landing in the bank. This guide walks it screen by screen. You do not need to have used Odoo before.

Who it is for

The principal setting the office up, the account executives placing business, the claims handler, the person reconciling the carrier statements, and anyone being shown the system for the first time.

How to read it

Front to back the first time. Each part opens with what you will learn and a short thing to try on the live demo, then walks every field and every button.

The live demo

Kestrel Brook Insurance Brokers Ltd, an invented commercial broker in Leeds with four carriers, 26 clients and just over a year of placements, renewals, claims and commission. Open it and follow along.

HOW IT WORKS

The demo office

Address	**insurance-demo.way4tech.com**
Sign in	**w4demo** / **Demo2026**
Broker	Kestrel Brook Insurance Brokers Ltd · Leeds · pounds sterling · 12% insurance premium tax
Carriers	Quillmere Underwriting, Larchway Insurance, Corviston Speciality (we hold a binder), Brantholme Mutual
Runs on	Odoo 19, Community edition, with Invoicing

Every company, carrier, person and number on the demo is invented. The carriers are not real insurers. The demo is shared and resets from time to time, so anything you change may be changed back or seen by the next person. Treat it as an office to walk around, not your own records.

What is in the guide

PART 1	How a broker makes its money	PART 2	The office at a glance
PART 3	Sign in, then set up from zero	PART 4	Clients and the compliance file
PART 5	New business: the enquiry and the market	PART 6	The policy
PART 7	Premium collection	PART 8	Mid term changes: endorsements
PART 9	Renewals	PART 10	Cancelling a policy
PART 11	Claims	PART 12	Commission: expected against received
PART 13	Reporting	PART 14	Printed documents and emails
PART 15	The nightly jobs	PART 16	Who sees what
PART 17	A fifteen minute walk-through	PART 18	The menu map

PART 1 How a broker makes its money

Five minutes on the trade, so the screens make sense. If you work in a brokerage already, skim the table at the end of this part and move on.

IN THIS PART YOU WILL LEARN

- The difference between the carrier, the broker and the client
- What a market quote is, and why there are several on one enquiry
- Premium, premium tax and commission, and why they are kept apart
- Endorsements, renewals and claims in one sentence each
- The paperwork a regulator expects to find on file

Three parties to every policy

The **carrier** (the insurer, or an underwriting agency acting for one) carries the risk and pays the claims. The **client** pays the premium. The **broker** sits between them: it takes the risk details once, approaches several carriers, puts the answers side by side, recommends one, and is paid a commission by the carrier for the business it places. A broker that holds a **binding authority** (a binder) can put cover in place on the carrier's paper itself, up to an agreed limit, rather than waiting for an underwriter to say yes.

One enquiry, several quotes

A client who wants cover for a joinery workshop describes the risk once: what it is, where it is, what it is worth, what claims it has had. The broker sends that to the market. One carrier quotes, one quotes dearer but with wider cover, one declines because joinery is outside its appetite. All three answers belong on the same file, and so does the reason the client took the one they took. If the client later asks why they paid more than the cheapest quote, the answer has to be written down.

Premium, tax and commission

The **premium** is what the cover costs. On most general business a government adds **insurance premium tax** (IPT) on top. The tax is not income for anyone in the chain, so it is held separately. The carrier pays the broker **commission**, usually a percentage of the premium before tax, sometimes of the premium with tax, sometimes a flat fee per policy. Renewed business often pays a lower rate than new business. And carriers do not always pay what they owe on time or in full, so commission is reconciled line by line against their statements.

What happens after the sale

Instalments

The client pays the premium in one go, or half yearly, quarterly or monthly. Miss enough and the cover lapses.

Endorsements

A mid term change: a new van, a bigger sum insured, a second site. It costs a share of a year's premium for the days left to run, or gives money back.

Renewals

Every policy ends. Whether the client stays, lets it lapse or moves to another broker is the retention rate, the number a brokerage is valued on.

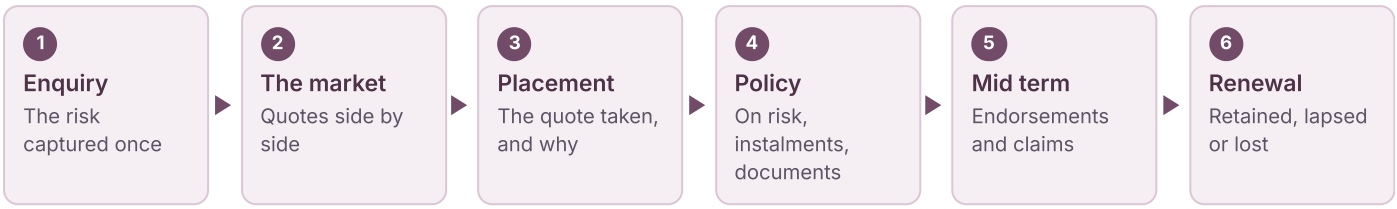

Claims

When something goes wrong the broker notifies the carrier, pushes the claim through to settlement and keeps the client told. Every claim paid feeds the loss ratio the market sees at renewal.

The paper trail

Regulators expect a broker to prove what it told the client and when: its terms of business, a statement of the client's demands and needs, the product information document, how the firm is paid, the cancellation rights, the renewal notice. The module calls each of these a **disclosure** and writes most of them for you as the work happens.

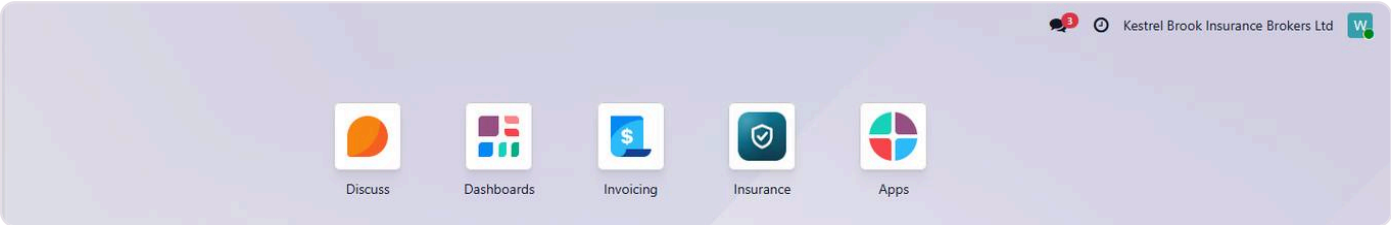

One piece of business

WORD	MEANING IN THIS MODULE
Carrier	The insurer or agency that carries the risk (Configuration, Carriers)
Class of business	Motor fleet, commercial property, liability, marine cargo and so on. Decides tax, term, survey and claims rules
Enquiry	A quotation record: the risk plus every carrier's answer
Market quote	One carrier's answer on an enquiry: premium, tax, commission, cover level, or a decline
On Risk	The policy is live. The carrier is carrying the risk
Endorsement	A mid term change to a live policy
Disclosure	A dated record that a document or a piece of information went to the client
Commission entry	Commission the office expects from a carrier, reconciled when the money arrives

PART 2 The office at a glance

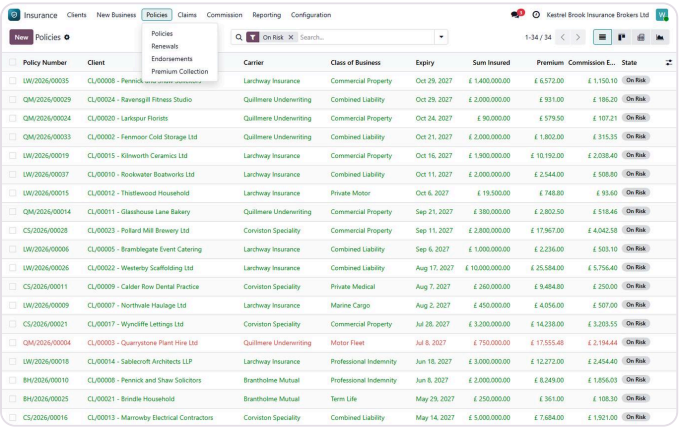

The module adds one app, Insurance, with seven menus. This part is the map, and the four roles that decide who sees what.

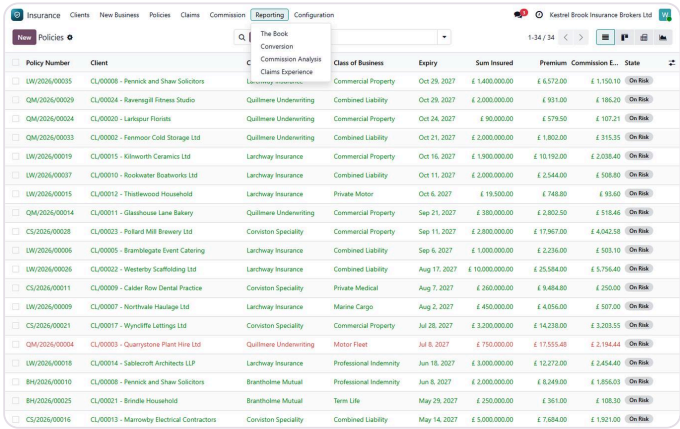

The Insurance app on the Odoo home screen. Invoicing comes with it.

The seven menus

MENU	WHAT IS UNDER IT
Clients	Clients, Disclosures
New Business	Enquiries
Policies	Policies, Renewals, Endorsements, Premium Collection
Claims	Claims
Commission	Commission Receivable (accounts and managers)
Reporting	The Book, Conversion, Commission Analysis, Claims Experience (managers)
Configuration	Settings, Carriers, Classes of Business, Commission Terms (managers)

The Policies menu dropped down.

Reporting, for managers.

Four roles

Under Settings, Users, each user gets an Insurance Brokerage role. The three office roles include Broker, and Insurance Manager includes all of them.

Broker

An account executive. Creates clients, enquiries, policies, endorsements and claims, and sees **only their own**: the clients they are named on, and everything hanging off those.

Claims Handler

A Broker who also sees every claim in the office and can work them, whoever placed the policy.

Commission Accounts

A Broker who sees every commission entry, reconciles the carrier statements and raises commission invoices.

Insurance Manager

Everything: configuration, reporting, deleting records, and signing off endorsements. The administrator gets this role when the module is installed.

SCREEN	BROKER	CLAIMS	ACCOUNTS	MANAGER
Clients, Enquiries, Policies, Endorsements	own	all	all	all
Claims	own	all, work	all, read	all
Commission Receivable	-	-	all, work	all
Agree an endorsement	-	-	-	yes
Reporting, Configuration	-	-	-	yes

> The demo login w4demo has the Insurance Manager role, so you can see every screen in this guide. It is not an administrator and cannot open Settings.

PART 3 Sign in, then set up from zero

Everything in this guide can be followed on the live demo. This part signs you in, then shows what a new office does on day one, before the first enquiry. On the demo the setup is done, so read it to understand what each setting means and where it lives.

TRY IT YOURSELF ON THE DEMO

1. Open insurance-demo.way4tech.com and sign in with w4demo and Demo2026
2. Click Insurance on the home screen
3. Open Configuration, Carriers, then Corviston Speciality
4. Open Configuration, Commission Terms and find the two Quillmere property terms

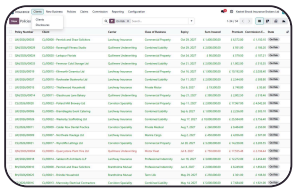

1

Go to the demo

Open **insurance-demo.way4tech.com** and sign in as `w4demo` with password `Demo2026`. There is nothing to install.

It works in any browser. The screens are laid out for a desktop or a tablet.

2

Find the menus

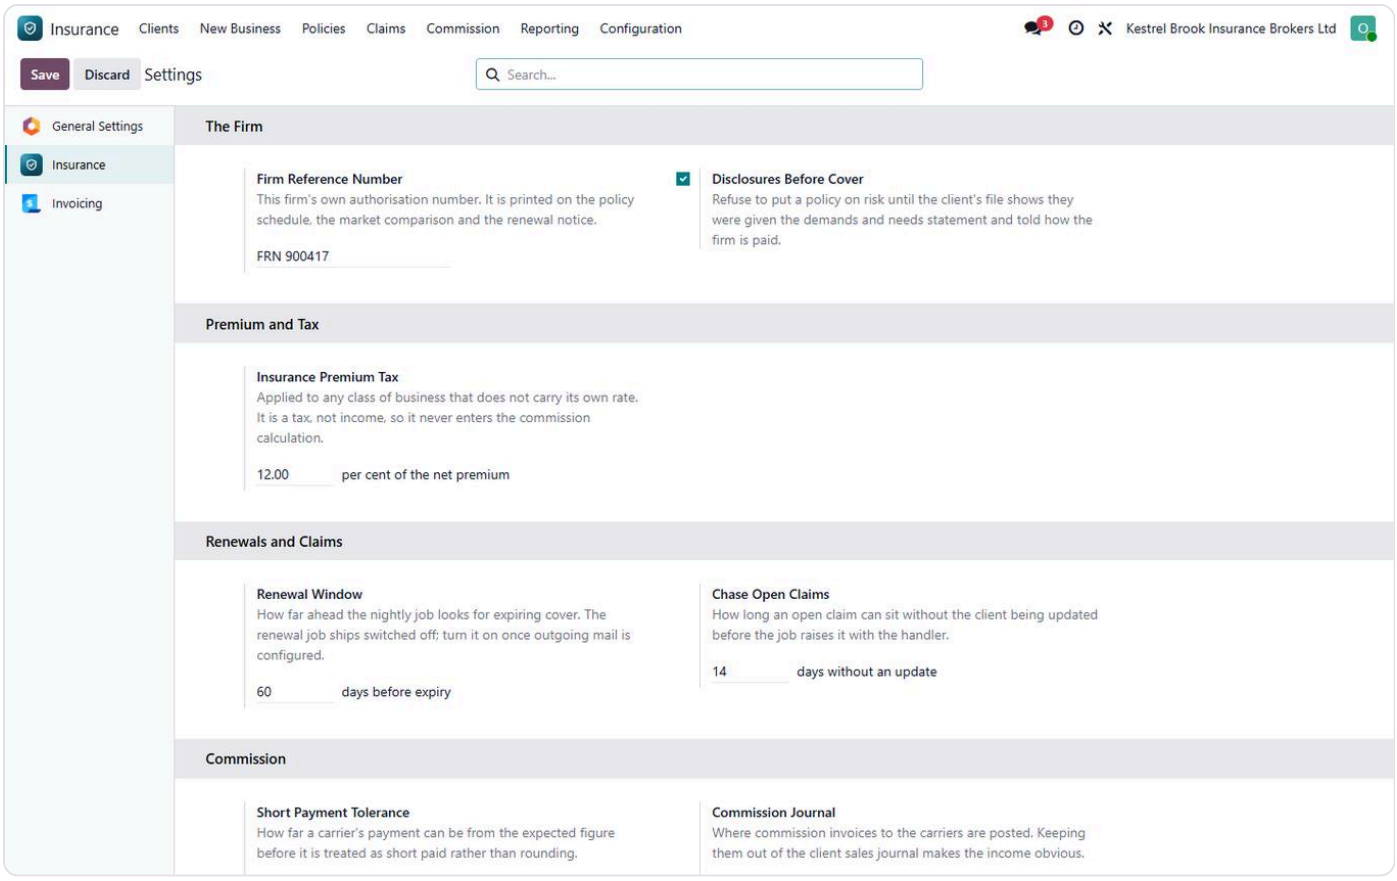

Open **Insurance**. The seven menus run across the top bar. Click one to drop it down; here it is Clients.

Install the app

The module is **Insurance Broker Management** (technical name wt_insurance_broker, USD 299 on the Odoo App Store, version 19.0.1.0.0). Open Apps, search for it and press Install. It brings in Invoicing, part of Odoo Community, because commission can be invoiced to a carrier. Nothing from Odoo Enterprise is needed. It installs eight classes of business (Part 3 below), six scheduled jobs, three email templates and three printed documents.

The settings

Settings, then the Insurance section (or Insurance, Configuration, Settings, for an administrator). Each setting belongs to the company.

The Insurance section of Settings, opened with the administrator, because the demo login cannot reach Settings.

SETTING	WHAT IT DOES	DEFAULT
Firm Reference Number	Your own authorisation number. Printed on the policy schedule and in the renewal email.	empty
Disclosures Before Cover	A policy will not go on risk until the client's file shows the demands and needs statement and how the firm is paid.	on
Insurance Premium Tax (%)	The rate any class without its own rate falls back to.	12
Renewal Window (days)	How far ahead the renewal job looks for expiring cover.	60
Chase Claims After (days)	How long an open claim can go without an update before the claims job raises it.	14
Short Payment Tolerance (%)	How far a carrier's payment can miss the expected commission before it counts as short paid.	1
Commission Journal	The sales journal commission invoices to carriers are posted in.	empty
Commission Product	Carries the income account and taxes for commission invoices.	empty

> On the demo the firm reference is FRN 900417 (invented), the commission journal is Commission Income and the product is Insurance Brokerage Commission with no tax on it.

Carriers

Configuration, Carriers. One record per insurer or agency you place with. The **code**, two or three letters, prefixes every policy number placed with them, so LW/2026/00001 is a Larchway policy at a glance. The form carries the inboxes for new business and claims, the carrier's own authorisation number (printed on the schedule), its financial

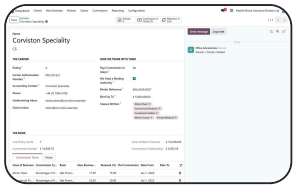

strength rating, how many days it takes to pay commission after a statement, and the **Accounting Contact** the commission invoice is raised against.

3

The carrier list

Code, rating, settlement days, policies and the book figures for each carrier.

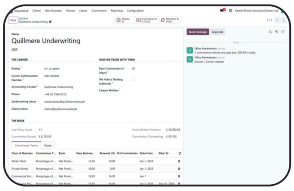

4

A carrier we can bind

Corviston Speciality: **We Hold a Binding Authority** is ticked, so the binder reference has to be filled in, and **Bind Up To** is five million pounds. A market quote from Corviston on a risk with a bigger sum insured is refused. **Classes Written** lists the five classes they take; a quote on any other class is refused too. Leave it empty for a carrier that writes anything.

The top of the form counts the live policies, the gross written premium, commission earned and still outstanding, and the retention rate on business placed with them.

5

A carrier with every class

Quillmere has no class list, so any class can be quoted. The Commission Terms tab lists what they pay per class.

Classes of business

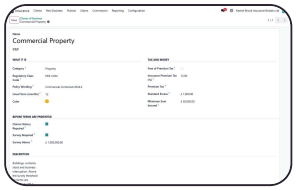

Configuration, Classes of Business. Eight are installed: Motor Fleet, Private Motor, Commercial Property, Combined Liability, Marine Cargo, Private Medical, Term Life and Professional Indemnity. Each carries a category (motor, property, marine, liability, health, life, pecuniary or other), and the category decides which risk questions an enquiry asks: a registration for motor, a voyage for marine, a date of birth for life.

6

The class list

Code, category, tax rate and the survey rule at a glance.

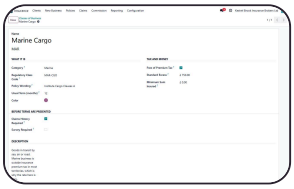

7

Commercial Property

12% premium tax, a usual term of 12 months (it fills the expiry date), a standard excess of 1,000 offered on new enquiries, a **Minimum Sum Insured** of 50,000 below which an enquiry is refused, and **Survey Required** above one million: terms cannot be presented on a bigger risk until a survey is recorded. **Claims History Required** stops a risk being presented without the claims experience.

The Regulatory Class Code (PRP-COM here) is built into the regulatory reference on every policy of this class, so a return can be run off the book.

8

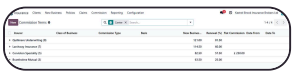

A class free of premium tax

Marine Cargo is ticked **Free of Premium Tax**. Leaving the rate at zero is not enough: a zero rate falls back to the company rate, an exemption does not.

Where the tax has to reach the ledger through a proper tax record, set **Premium Tax** to an Odoo sales tax and the amounts are worked out from that tax instead of the rate.

Commission terms

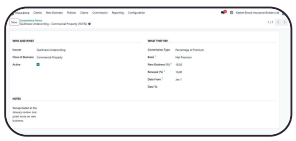

Configuration, Commission Terms. One row per carrier and class: what they pay on **new business** and on a **renewal** (leave renewal at zero to pay the new business rate), whether the rate is on the **net premium** or the **premium including tax**, or a **flat amount** per policy instead. Every term has a start date and can have an end date. A policy picks the term in force on its inception day, not today's.

9

The terms

23 on the demo. Two terms for the same carrier and class may not cover the same day, and a percentage term with no rate is refused, because every policy placed on it would earn nothing.

10

A renegotiated term

Quillmere's property term was 17.5% until 31 December 2025. From 1 January 2026 a new term pays 18.5% on new business and 16% on renewals. Policies incepting before the change keep the old rate.

11

A flat fee

Corviston pays 250 per medical scheme rather than a percentage, because the premium moves with the membership.

Give people their role

Settings, Users. On each user, pick the Insurance Brokerage role (Part 2). A user with no role does not see the app. On the demo, Rhiannon Pryce is a manager, Tomasz Brenner and Leah Marchetti are brokers, Imogen Keld handles claims and Arjun Halewood reconciles commission.

Day one

1. **Settings** — Tax, window, disclosures
2. **Carriers** — Codes, binders, contacts
3. **Classes** — Tax, survey, minimums
4. **Terms** — Rates per carrier and class
5. **Users** — Roles
6. **Clients** — Then the first enquiry

PART 4 Clients and the compliance file

The client record is two things at once: the profile the market judges the client on at renewal, and the file that proves what the office told them and when. Most of that file writes itself.

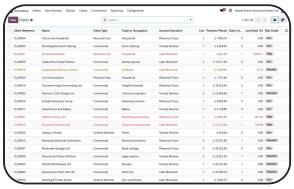

IN THIS PART YOU WILL LEARN

- Creating a client and what each field is for
- The loss ratio and the risk grade, and how a handler overrides it
- Identity checks, sanctions screening and the support flag
- The nine kinds of disclosure, and which ones the system writes for you
- Who can see the restricted fields

TRY IT YOURSELF ON THE DEMO

1. Open Clients, Clients and switch to the kanban view
2. Open Halberd Joinery Ltd and look at The Record the Market Sees
3. Open its Disclosures tab and count what was written automatically
4. Open Thistlewood Household, Compliance tab

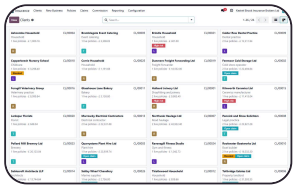

The client list

1

Clients, Clients

One row per client: reference, type, trade, account executive, live policies, premium placed, loss ratio and risk grade. Filters give My Clients, Has Live Cover, Open Claim, Loss Ratio Over 60% and Identity Not Verified; group by account executive, client type, risk grade or identity check.

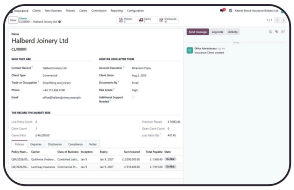

2

The kanban view

The same clients as cards, which is how a broker scans their book on a Monday morning.

A client record

Press **New** on the client list. A client needs a name and a **Contact Record**: an ordinary Odoo contact, because anything that has to reach an accounting document goes through it. The phone and email on the client form are the contact's own. One contact can carry only one client record per company. The reference (CL/00001 and so on) is given on save.

3

Halberd Joinery Ltd

Client Type is Personal Lines, Commercial or Scheme Member. **Trade or Occupation** matters because underwriters rate off it. **Account Executive** owns the relationship: a user with the Broker role sees only the clients they are named on. **Documents By** records how the client asked to receive documents, and it is copied onto every disclosure raised for them.

The Record the Market Sees is worked out from the policies and claims: live policies, premium placed, claims, claims paid and the loss ratio. Halberd's one settled fire claim of 46,200 against 9,883 of premium gives a loss ratio over 400%.

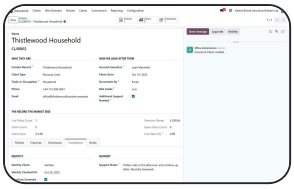

HOW IT WORKS

Risk grade

High	loss ratio 80% or more, or four or more claims
Elevated	loss ratio 50% or more, or two or more claims
Low	no claims at all
Standard	anything else

The grade is worked out again whenever a claim or a policy changes. A handler who knows something the figures do not can pick a different grade by hand.

Identity, sanctions and support

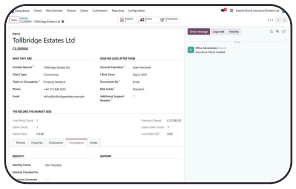

4

The Compliance tab

Identity Check is Not Checked, Verified or Failed. A client marked Verified must have the date it was done, and Sanctions Screened needs its date too: a tick with no date proves nothing. **Additional Support Needed** records that the client needs more care, and the office cannot tick it without writing what support is needed in **Support Notes**.

The Identity Document Number and the Support Notes are visible only to Insurance Managers. Everyone else does their job without them. Thistlewood Household, shown here, has a support note.

5

A client not yet checked

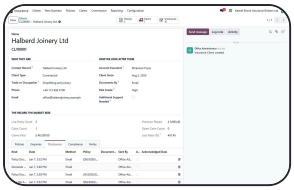

Tollbridge Estates is still Not Checked, waiting on a certified copy of the director's passport. The Identity Not Verified filter on the client list finds every client like this.

The module records that a check was done and when. It does not run identity or sanctions checks itself and is not connected to any screening service.

Disclosures

A disclosure is a dated line that says a document or a piece of information went to the client, how, and by whom. There are nine kinds. You add the first two by hand when a client is taken on; the rest are written by the workflow buttons as the work happens.

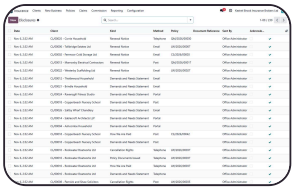

KIND	WRITTEN WHEN
Terms of Business	by hand, when the client is taken on
Complaints Procedure	by hand
Demands and Needs Statement	automatically, when an enquiry is presented to the client
How We Are Paid	automatically, when the client accepts a quote, with the commission amount
Policy Documents Issued	automatically, on Issue Documents
Cancellation Rights	automatically, on Issue Documents
Renewal Notice	automatically, by the renewal job
Product Information Document	by hand
Claims Procedure	by hand

6

On the client

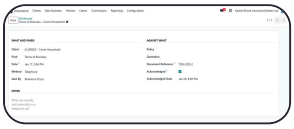

The Disclosures tab lists everything sent to Halberd, newest first. Ten so far: terms of business and the complaints procedure when they were taken on, then a demands and needs statement, how we are paid, policy documents and cancellation rights for each of their two policies.

7

Clients, Disclosures

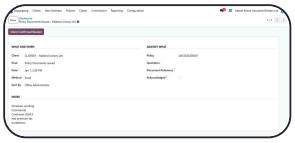

The whole office's compliance file. Filters give Not Acknowledged, Policy Documents and Demands and Needs; group by document, client, method or date sent. The tick on a row marks it acknowledged.

8

An acknowledged disclosure

When the client confirms they received something, press **Acknowledged**. The date is stamped. An acknowledgement dated before the document was sent is refused. Document Reference holds the wording version or the post reference, something that can be produced later.

9

Written by the system

Policy Documents Issued for LW/2026/00001, with the note the system added: the schedule, the wording and the premium tax breakdown.

PART 5 New business: the enquiry and the market

This is where the sale is made. The risk is captured once, sent to several carriers, and every answer sits on the same record with the reason the client took the one they took.

IN THIS PART YOU WILL LEARN

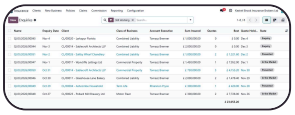

- The six states an enquiry moves through
- Which risk questions appear for which class
- Recording a quote, a decline and a quote still awaited
- The checks that stop terms being presented too early
- Winning, losing, and what happens to a quote nobody took up

TRY IT YOURSELF ON THE DEMO

1. Open New Business, Enquiries; the list opens on Still Working
2. Open QUO/2026/00050 and its Market tab: three quotes side by side
3. Open QUO/2026/00003, won with one decline on file
4. Open QUO/2026/00052, lost to another broker

An enquiry

1. **Enquiry** — The risk and the carriers
2. **In the Market** — Approach the Market
3. **Presented** — Present to the Client
4. **Won** — Client Accepted: policy raised
5. **Lost** — Mark Lost, with the reason
6. **Expired** — Terms not taken up in time

1 New Business, Enquiries

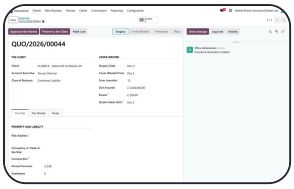

The list opens filtered on Still Working. Each row shows the sum insured, how many carriers quoted, the best premium and the date the terms hold until. Other filters: Waiting on the Market, Won, Lost to Another Broker, Renewal Enquiries and Terms Expiring This Week.

2 The pipeline

The kanban view, one column per state, is the new business pipeline.

Step 1: capture the risk

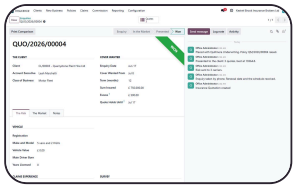

3

A new enquiry

Press **New**. Pick the client, the account executive and the **Class of Business**. The class fills the term and offers its standard excess. Fill the **Sum Insured** and **Cover Wanted From**. **Quote Holds Until** fills in at thirty days after the enquiry date and can be changed.

Cover cannot be wanted from a date before the enquiry was taken: backdating cover is a decision for an underwriter. A sum insured below the class minimum is refused.

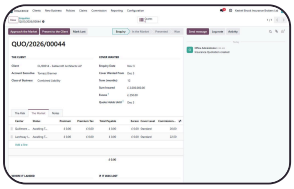

4

The Risk tab

The questions change with the class. Property and liability ask for the risk address, occupancy, construction, turnover and employees. Motor asks for the registration, make and model, value, the main driver's date of birth and years licensed. Marine asks for the vessel, the voyage and the cargo. Life asks for the date of birth of the life assured and whether they smoke. This is a motor fleet enquiry.

Every class also has Claims Experience (the number of claims in five years and the story) and Survey (done, date, findings).

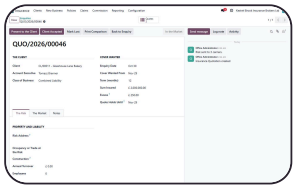

Step 2: go to the market

5

Add the carriers

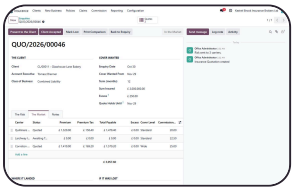

On **The Market** tab add one line per carrier you are approaching. A carrier can appear once per enquiry. A carrier that does not write the class is refused, and so is one where we hold a binder but the sum insured is over the binding limit: that risk has to be referred to the underwriter.

6

Approach the Market

Press **Approach the Market**. The enquiry moves to In the Market and the chatter records how many carriers it went to. An enquiry with no carriers cannot go.

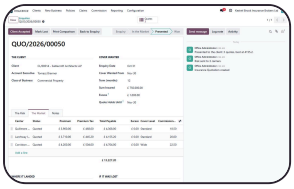

7

Answers coming back

Each line has a status: **Awaiting Terms**, **Quoted** or **Declined**. A quoted line needs a premium. A declined line needs the reason the underwriter gave, which saves sending them the same risk next year. Here Quillmere and Corviston have quoted and Larchway is still awaited.

Premium Tax and Total Payable are worked out from the class. Commission % and basis come from the carrier's commission terms for that class on the enquiry date. Hidden columns give the carrier's reference, terms and subjectivities, exclusions and the date the quote holds until.

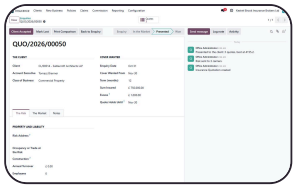

Step 3: present to the client

8

Three quotes side by side

QUO/2026/00050 for Sablecroft Architects: Quillmere, Larchway and Corviston all quoted. The stat button counts the quotes and Best shows the cheapest total. Cover Level (basic, standard, wide) is the reason a client sometimes buys the dearer one.

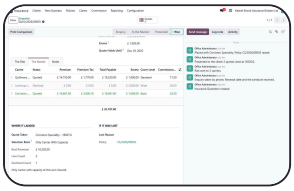

9

Present to the Client

Press **Present to the Client**. Before it moves, the module checks three things: at least one carrier has quoted; the claims experience is written down where the class asks for it; and a survey is recorded where the class needs one at this sum insured. When it moves, a Demands and Needs disclosure is written onto the client's file.

Print Comparison prints the Market Comparison for the client (Part 14).

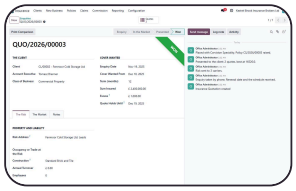

Step 4: the client accepts

10

Take these terms

On The Market tab press the tick at the end of the chosen line. Only a quoted line can be taken. Then fill **Where It Landed**: the basis (lowest premium, wider cover, claims service, only carrier with capacity, existing relationship, only terms received in time) and the reason in full. Here Fenmoor took Corviston, the dearer quote, because it was the only carrier with capacity; Larchway's decline stays on file.

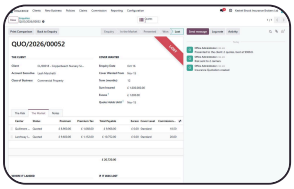

11

Client Accepted

Press **Client Accepted**. The module runs the same three checks as presenting, insists on the quote taken, the basis and the reason, then raises a draft policy from the chosen quote and opens it. The enquiry becomes Won and a How We Are Paid disclosure, with the commission amount, goes on the client's file.

A Won enquiry cannot be reopened, because it would leave two records saying different things about the same risk.

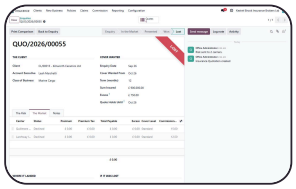

Lost, and expired

12

Lost to another broker

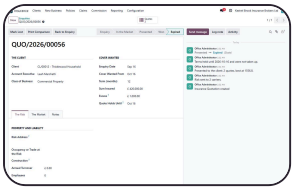

Pick the **Lost Reason** (beaten on price, cover not wide enough, lost to another broker, client went quiet, client withdrew, every carrier declined) and press **Mark Lost**. Lost to Another Broker needs the broker's name in **Placed With**. Six of these in a quarter is a pattern worth acting on.

13

Every carrier declined

A marine cargo enquiry for ceramics that both carriers turned down, with their reasons.

14

Terms that ran out

Every night the **expire stale quotations** job closes any enquiry still in Enquiry, In the Market or Presented whose terms held until a date that has passed, and notes it in the chatter. **Back to Enquiry** reopens a lost or expired one.

> The total under the Market tab's Total Payable column adds every carrier's quote together. On a comparison that figure has no meaning; read the lines, or the Best figure at the top.

PART 6 The policy

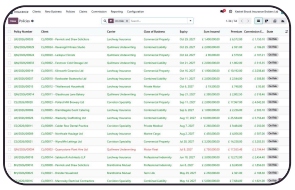

Winning an enquiry raises a draft policy carrying everything from the quote taken. Putting it on risk books the commission and builds the instalments. Issuing documents writes the disclosures and emails the client.

IN THIS PART YOU WILL LEARN

- Every field on the policy and where it came from
- How premium tax and commission are worked out
- Put On Risk, and the disclosure check that can stop it
- Issuing documents and printing the schedule
- The policy list, its filters and the kanban

TRY IT YOURSELF ON THE DEMO

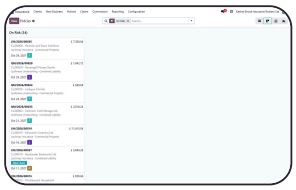

1. Open Policies, Policies; the list opens on On Risk
2. Open LW/2026/00001 and read the four groups
3. Open the draft CS/2026/00042 for Copperbeech Nursery School
4. Open CS/2026/00011, a medical scheme paid on a flat fee

1

Policies, Policies

Policy number, client, carrier, class, inception, expiry, sum insured, total payable, commission and state. Filters: On Risk, Mine, Up For Renewal, Premium Overdue, Has a Claim, Renewal Business, Commission Short and Expiring Within 60 Days. Group by carrier, class, status, renewal outcome, account executive or expiry.

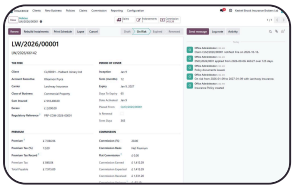

2

The kanban view

The book as cards.

Reading a policy

3

LW/2026/00001

The Risk: client, account executive, carrier, class, sum insured, excess and the **Regulatory Reference**, built from the class's regulatory code, the inception year and the policy sequence (PRP-COM-2026-00001). **Period of Cover**: inception, term, expiry (worked out from the term), days to expiry, the date it went on risk, and the enquiry it was placed from. The second line under the number is the **carrier's own policy number**, the one every claim call starts with.

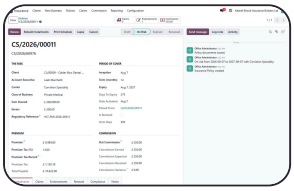

The policy number starts with the carrier's code, so LW is Larchway.

HOW IT WORKS

Premium, tax and commission

Premium	for the whole term, net of tax
Premium Tax	premium × the class rate, or worked out from the Premium Tax Record where the class has one
Total Payable	premium + premium tax
Commission Earned	the flat fee if there is one; otherwise the rate × the net premium, or × the total where the basis is Premium Including Tax
Commission rate	the carrier's term in force on the inception date; the renewal rate if the policy renews an earlier one
Expected / Received / Variance	the sum of the commission entries, what came in, and the difference

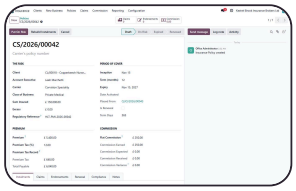

On LW/2026/00001: premium 7,066.96, tax at 12% is 848.04, total 7,915.00. Larchway pays 20% on the net premium, 1,413.39. The carrier paid 1,331.20, so the variance is 82.19 short (an endorsement's commission is still to come, Part 8).

4

A flat fee

A Corviston medical scheme. Flat Commission is 250, so the commission percentage is hidden and the earned figure is the fee.

5

Step 1: the draft

A policy raised from a won enquiry starts as **Draft**. Check the carrier's policy number, the instalment plan on the Instalments tab and the notes. Copperbeech's medical scheme is waiting on the member list.

Step 2: Put On Risk

Press **Put On Risk**. The module refuses a policy with no premium. If **Disclosures Before Cover** is on in Settings, it also refuses unless the client's file shows a demands and needs statement and how the firm is paid; presenting and accepting the enquiry write both, so in normal use the check only bites on a policy typed in by hand. Then it:

Builds the instalments

From the instalment plan, if none exist yet (Part 7).

Books the commission

One commission entry for the commission earned, expected the carrier's settlement days after inception, marked New Business or Renewal (Part 12).

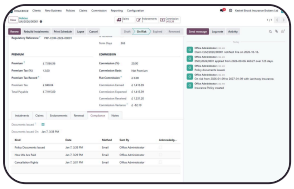

Closes the old policy

If this renews an earlier policy, that one becomes Renewed, Retained, and points at this one (Part 9).

Notes it

The chatter records the period of cover and the carrier.

Step 3: Issue Documents

6

The Compliance tab

Press **Issue Documents** on a policy On Risk. Two disclosures are written, Policy Documents Issued and Cancellation Rights, and the Policy Documents Issued email is queued to the client if the contact has an email address. The tab then shows Documents Issued with the date, and the button disappears.

Print Schedule prints the Policy Schedule (Part 14) for any policy past draft.

The policy states are Draft, On Risk, Lapsed, Cancelled, Expired and Renewed. Expired is set by the nightly run off job once the expiry date has passed; Renewed is set when a renewal goes on risk. Lapse and Cancel are in Parts 7 and 10.

PART 7 Premium collection

A client who pays monthly is twelve chances for the cover to come off. The instalment schedule shows what is due, what came in and what is late, and the policy lapses when the money stops.

IN THIS PART YOU WILL LEARN

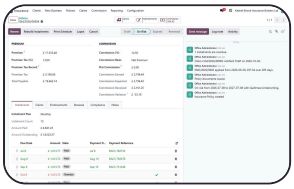

- The four instalment plans and how the schedule is split
- Marking an instalment collected
- Overdue instalments and the nightly job that flags them
- Lapsing a policy for non payment

TRY IT YOURSELF ON THE DEMO

1. Open Policies, Premium Collection; it opens on Outstanding
2. Switch the filter to Overdue
3. Open QM/2026/00004 and its Instalments tab

The plan and the schedule

The **Instalment Plan** on the policy is Single Premium, Half Yearly, Quarterly or Monthly. The schedule splits the total payable (premium plus tax) evenly across the term, with any rounding remainder put on the first instalment, and due dates spread from inception. Instalments must fall inside the policy term and must add up to the total payable to the penny.

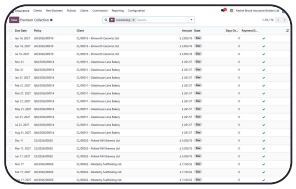

1

QM/2026/00004, paid monthly

Quarrystone Plant Hire's motor fleet: twelve instalments of 1,613.73, the first 1,613.77 because it carries the rounding. Three paid by BACS, October overdue, the rest due. The top shows the count, amount paid and amount outstanding.

The tick at the end of a line marks it collected. A collected line cannot be deleted: refund it through the ledger instead.

2

Policies, Premium Collection

Every instalment in the office, opened on Outstanding. Filters: Overdue and Due This Month. Group by status, client or due date.

3

An overdue instalment

The form shows what is due, the policy and client, the days overdue, and the collection details. **Collected** stamps today's date unless a payment date is already filled; **Cancel** takes an unpaid line off the schedule.

4

A collected instalment

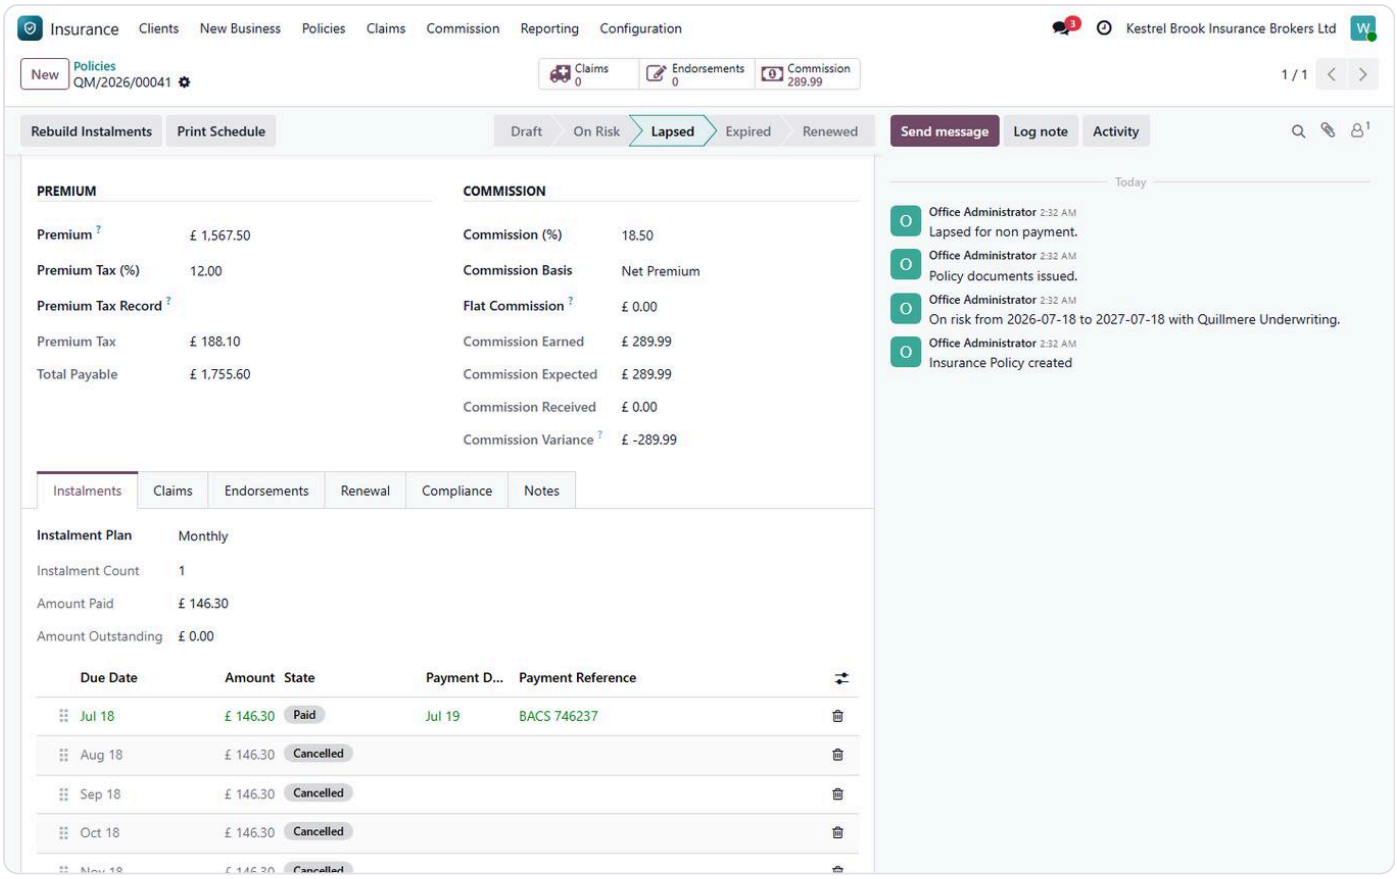

Payment date and the payment reference.

Rebuilding the schedule

Rebuild Instalments on the policy throws the schedule away and builds it again from the current plan and premium, which is what you want after changing the plan on a draft. It is refused once any instalment has been paid: adjust the remaining lines by hand instead.

Overdue and lapsed

Every night the **flag overdue instalments** job marks every instalment still Due after its due date as Overdue, on policies that are On Risk, and posts a count on each policy. If the client does not pay, press **Lapse** on the policy: it becomes Lapsed and every unpaid instalment is cancelled.

QM/2026/00041, Corrie Household: one instalment paid, the rest cancelled when the policy lapsed for non payment.

> Collecting an instalment only marks it paid. It does not raise an invoice to the client or post a payment in Accounting; the premium itself never enters the ledger through this module. Only commission invoiced to a carrier does (Part 12).

PART 8 Mid term changes: endorsements

A client adds a machine, changes a van or moves out of a warehouse. The carrier agrees the change, quotes a figure for a whole year, and the office has to work out what that means for the days left to run, with the tax and the commission on it.

IN THIS PART YOU WILL LEARN

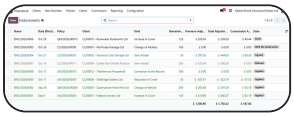

- The eight kinds of endorsement
- How the pro rata premium, tax and commission are worked out
- Draft, with the underwriter, agreed, applied or refused
- Why agreeing is a manager's job
- What a reduction in cover does to the commission

TRY IT YOURSELF ON THE DEMO

1. Open Policies, Endorsements
2. Open END/2026/0001, an increase in cover already applied
3. Open END/2026/0003, a reduction with money going back
4. Open END/2026/0004, agreed but not yet applied

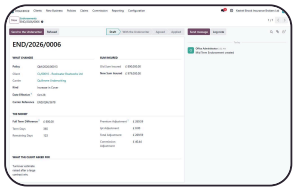

An endorsement

1. **Draft** — What changed and from when
2. **With the Underwriter** — Send to the Underwriter
3. **Agreed** — Underwriter Agreed (manager)
4. **Applied** — Written onto the policy
5. **Refused** — With what the underwriter said

1 Policies, Endorsements

Every change in the office. Filters: Not Yet Applied and Return Premiums. Group by status, change, class, carrier or effective date.

2 Step 1: describe the change

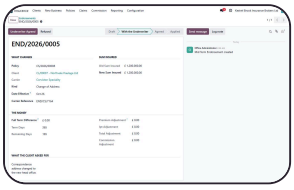

Open the policy's Endorsements stat button, or the menu, and press New. Pick the policy, the **Effective** date (inside the policy term), the kind of change (increase in cover, reduction in cover, item added, item removed, change of address, change of vehicle, correction to the record, other), a description, the **New Sum Insured** and the **Full Term Difference**: what the change would cost for a whole year.

A reduction must have a negative difference and an increase a positive one; the other way round is refused as a typing mistake. The old sum insured is copied from the policy.

HOW IT WORKS

The pro rata arithmetic

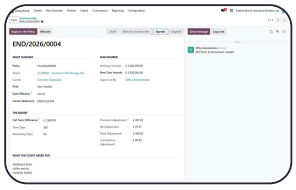

Term days	expiry minus inception
Remaining days	expiry minus the effective date
Pro rata premium	full term difference × remaining days ÷ term days
Tax	on the pro rata premium, the same way as the policy (rate or tax record)
Commission	the policy's rate on the pro rata premium, on the same net or gross basis

3

Step 2: Send to the Underwriter

Press **Send to the Underwriter**. Only a policy On Risk can be endorsed. Record the carrier's reference when it comes back.

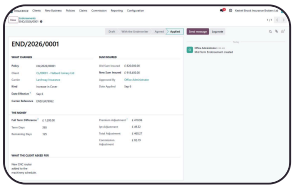

4

Step 3: Underwriter Agreed

When the carrier agrees, a manager presses **Underwriter Agreed**. The button is shown only to Insurance Managers and the action checks it again. The status cannot be typed into Agreed or created already agreed: it changes the premium on a live policy and books commission, so somebody has to sign it off.

Approved By records the manager.

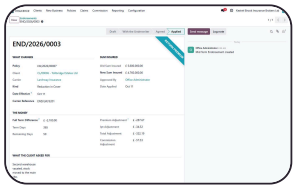

5

Step 4: Apply to the Policy

Press **Apply to the Policy**. The new sum insured goes onto the policy, the pro rata premium is added to its premium, a commission entry is booked for the commission on the change, and the chatter on the policy records the amount and the days. Here a CNC router added to Halberd's machinery schedule.

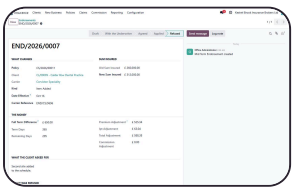

Apply is refused if the policy came off risk after the change was agreed: that would bill the client for cover they no longer have.

6

A reduction in cover

A second warehouse came off Tollbridge Estates' schedule. A full term difference of minus 2,100 becomes a return premium for the days left, with the tax on it, and a commission clawback entry marked Return of Commission.

7

Refused

Fill in what the underwriter said and press **Refused**. Nothing changes on the policy.

Applying an endorsement changes the policy premium but does not add or change any instalment. After an endorsement with money in it, the instalment schedule no longer adds up to the new total, and the difference has to be collected or refunded outside the schedule.

PART 9 Renewals

Every policy on the book has an end date, and the renewal is where a brokerage keeps or loses its income. The module flags what is coming up, invites the client, raises a renewal enquiry off the expiring policy, and records how each one ended.

IN THIS PART YOU WILL LEARN

- The renewal job, the window and what it does to each policy
- Raising a renewal enquiry and placing it
- Retained, lapsed and lost, and the retention rate
- The renewal rate of commission

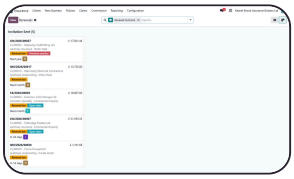

TRY IT YOURSELF ON THE DEMO

1. Open Policies, Renewals
2. Open CS/2026/00003, due in December, and its Renewal tab
3. Open QM/2026/00032 and follow Renewed As to QM/2026/00033
4. Open QM/2026/00038, lost to another broker

The renewal pipeline

The **renewal pipeline** job looks at every policy On Risk. Anything expiring inside the renewal window (60 days unless changed in Settings) is marked **Renewal Due**. For each one still Not Yet Worked it sets the renewal status to **Invitation Sent**, writes a Renewal Notice disclosure, queues the Renewal Invitation email to the client, and leaves a to do for the account executive, due fourteen days before expiry.

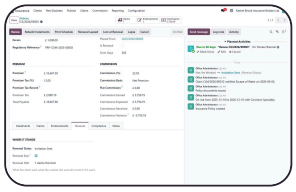

The renewal pipeline job ships switched off. Until it is switched on (Settings, Technical, Scheduled Actions, in developer mode) nothing is flagged and the Renewals menu stays empty. On the demo it was run once when the data was loaded.

1

Policies, Renewals

Everything On Risk and marked Renewal Due, grouped by renewal outcome. Five on the demo, all with invitations sent.

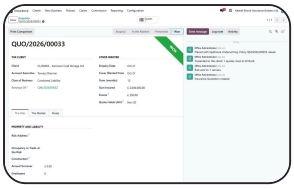

2

A policy coming up

Fenmoor's property policy with Corviston expires on 10 December. The Renewal tab shows Invitation Sent and Renewal Due, and the **Renewal Hint**, one line for whoever picks it up: the claims this term, a loss ratio of 50% or more, overdue instalments, or Clean record. The to do is in the chatter.

Renewal Note holds what the client said, what the market did and who took it if it went.

Renew

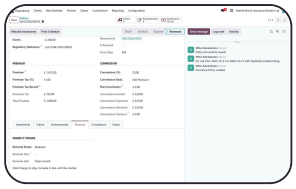

3

Step 1: Renew

Press **Renew** on a policy On Risk or just expired. A new enquiry is raised for the same client, class, sum insured, excess and term, with cover wanted from the expiry date, the claims on the expiring policy written into the claims experience, and Renewal Of pointing back. Press it again and you are taken to the same enquiry rather than a second one.

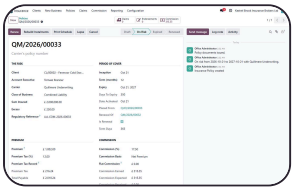

A market line on a renewal enquiry picks up the carrier's renewal rate of commission, where the term has one.

4

Step 2: place it as usual

Work the renewal enquiry like any other (Part 5). When the new policy goes on risk, the old one becomes **Renewed**, its renewal status **Retained**, and Renewed As links to the new policy.

5

The renewal policy

QM/2026/00033 is marked as a renewal and its commission entry is of kind Renewal. Quillmere pays 17.5% on renewed liability business instead of 20%.

When it does not renew

Renewal Lapsed

The client let it run off. Press **Renewal Lapsed** on a policy marked Renewal Due.

Lost at Renewal

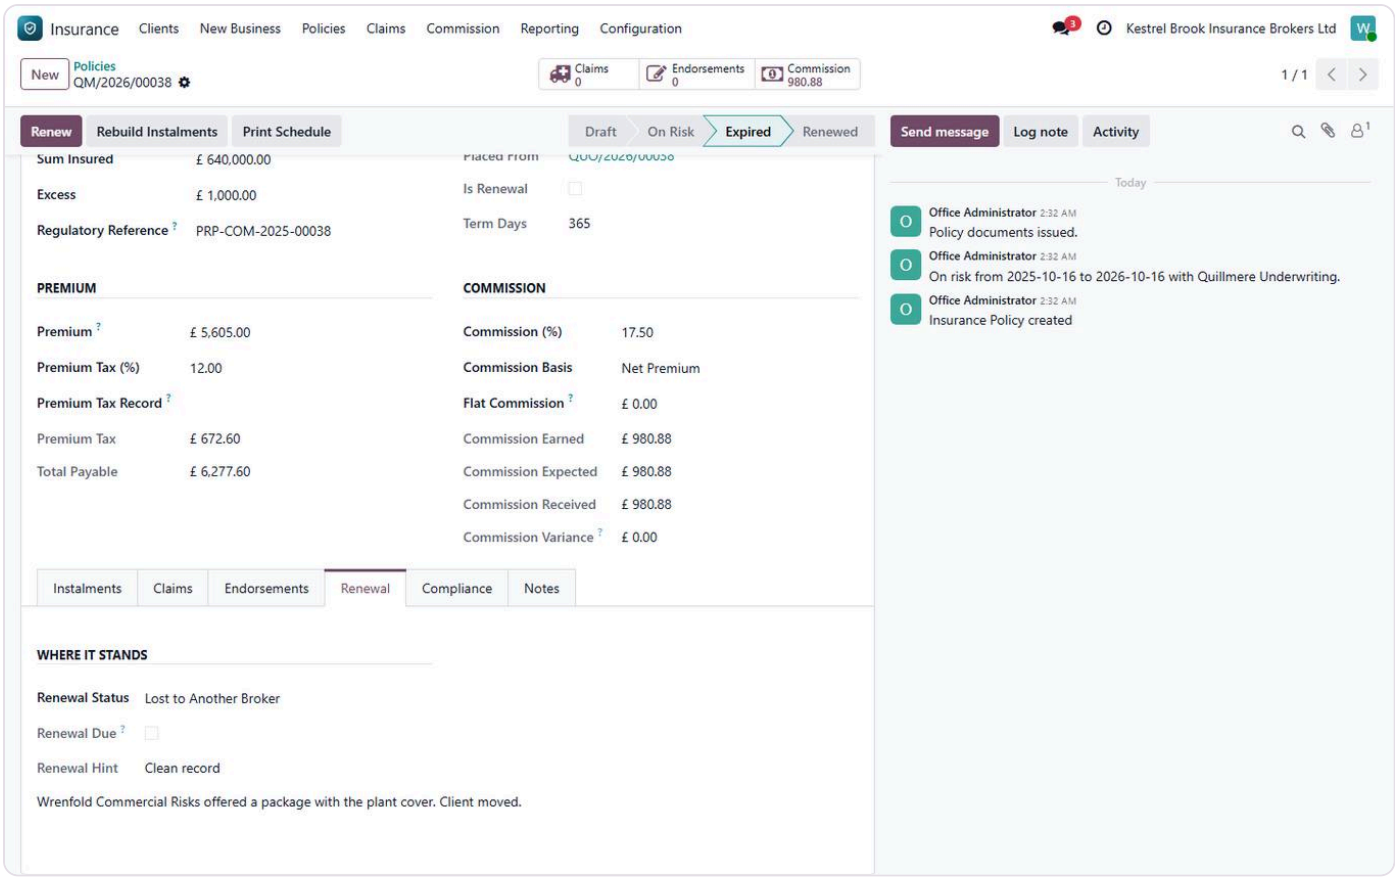

It renewed, somewhere else. Write the Renewal Note first (who took it and on what terms), then press **Lost at Renewal**.

Lost enquiry

Marking the renewal enquiry Lost does the same: lost to another broker sets the old policy to Lost, any other reason to Lapsed.

Nobody did anything

The nightly run off job expires the policy after its expiry date and sets a status still Not Yet Worked or Invitation Sent to Lapsed.

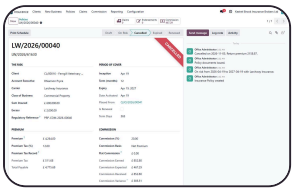

QM/2026/00038, Quarrystone's property cover: lost to another broker at renewal, with the reason on the Renewal tab.

Retained, Lapsed and Lost are what the **retention rate** on each carrier is worked out from: retained divided by all three. The Retention graph under Reporting, The Book (Part 13) shows premium by renewal outcome.

PART 10 Cancelling a policy

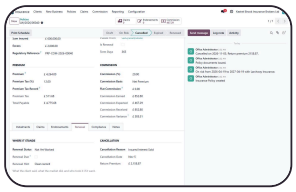

Cover sometimes comes off before the end: the client sells the building, finds duplicate cover, or the carrier cancels. The module works out what goes back to the client and what commission goes back to the carrier.

1

Step 1: the reason

Cancel needs a **Cancellation Reason**: client cancelled, premium not paid, insured interest sold, carrier cancelled or duplicate cover. It is refused without one, and refused while the policy has an open claim, because the client would be left with a loss and no cover. The reason lives in the Cancellation group on the Renewal tab.

2

Step 2: Cancel

Press **Cancel**. A draft is simply cancelled. A policy On Risk is cancelled today, and the **Return Premium** is the premium and the tax for the days left to run, pro rata. Unpaid instalments are cancelled, and a commission entry of kind Return of Commission claws back the commission on the returned premium. Ferngill's property policy returned 2,158.87 when the practice sold the building.

> In this version the Cancellation group on the Renewal tab only appears once a reason is already set, so on a live policy the reason cannot be picked from the form and Cancel stops with a message asking for one. Until that is fixed the reason has to be set some other way (for example by an administrator through an import). Cancellation also always runs from today, and the return premium is a figure on the policy: no credit note or refund is raised in Accounting.

Lapse is different: it is for a policy where the premium was never paid (Part 7). It cancels the unpaid instalments but works out no return premium and books no clawback.

PART 11 Claims

When something goes wrong, the broker is the client's advocate. The claim record holds the dates that matter, the money, the adjuster, and the carrier's answer, and every settled claim feeds the loss ratio the market will ask about at renewal.

IN THIS PART YOU WILL LEARN

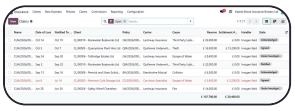

- Notifying a claim and why the notification gap is measured
- Reserve, excess, settlement and net paid
- The seven claim states and the button for each
- Repudiation and withdrawal
- The claims chase job

TRY IT YOURSELF ON THE DEMO

1. Open Claims, Claims and switch to the kanban view
2. Open CLM/2026/00001, settled after a fire
3. Open CLM/2026/00006, repudiated, and read the wording relied on
4. Filter on Notified Late

A claim

1. **Notified** — The client told us
2. **Acknowledged** — The carrier has it
3. **Under Investigation** — Adjuster appointed
4. **Agreed** — The figure is settled
5. **Settled** — Paid, net of excess
6. **Repudiated / Withdrawn** — Closed with the reason

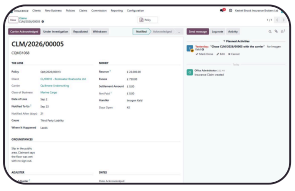

1 Claims, Claims

Opens on Open claims. Filters: Mine, Notified Late, Settled, Repudiated and No Update in 14 Days. Group by status, cause, carrier, class, risk type, client or date of loss.

2 The kanban view

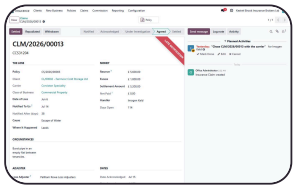

Open claims by state, with late notification and adjuster tags on the cards.

3 Step 1: notify

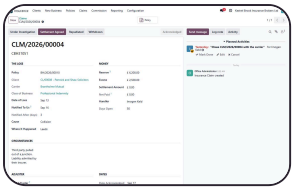

Press New, or Claims on the policy. Pick the policy, the handler, the **Date of Loss**, the date the client **Notified** us, the cause (fire, theft, escape of water, storm and flood, collision, third party liability, illness or injury, other), the circumstances and where it happened. Put the expected cost in **Reserve**. The excess comes from the policy.

The loss must fall inside the period of cover, and the notification cannot be before the loss. The policy's chatter records the claim.

4 Late notification

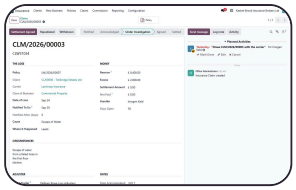

The gap between loss and notification is counted. Over thirty days the claim is flagged **Late Notification**, because that is when most wordings give the carrier grounds to argue. This burst pipe was reported 38 days after it happened.

5

Step 2: Carrier Acknowledged

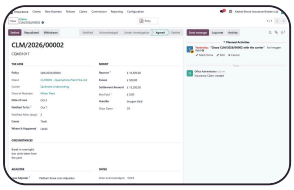

When the carrier confirms they have it, enter their claim number and press **Carrier Acknowledged**. The date is stamped. A claim on a policy that never went on risk is refused.

6

Step 3: Under Investigation

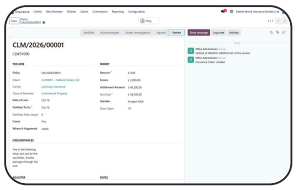

Fill the **Loss Adjuster** (a contact) and their reference, and press **Under Investigation**. The adjuster appointed date is filled in if empty. Without an adjuster the button is refused.

7

Step 4: Settlement Agreed

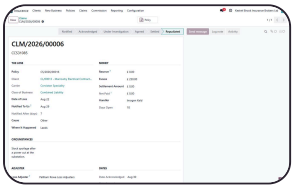

Put the agreed figure in **Settlement** and press **Settlement Agreed**. A settlement above the sum insured is refused.

8

Step 5: Settled

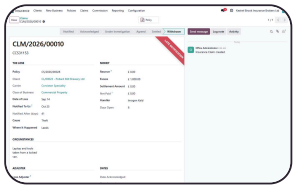

Press **Settled** when the money is paid. The reserve drops to zero, **Net Paid** is the settlement less the excess, and the claim now counts in the client's claims paid and loss ratio. Halberd's fire: 46,200 agreed, 44,200 net of the 2,000 excess.

9

Repudiated

When the carrier declines the claim, write the wording they rely on in full in **Repudiation Reason** and press **Repudiated**. The client is entitled to it, and the file needs it if there is a complaint.

10

Withdrawn

The client drops the claim: record why and press **Withdrawn**. A settled claim cannot be withdrawn.

Chasing

The **chase open claims** job looks for open claims (notified, acknowledged, under investigation or agreed) whose last update is older than the Chase Claims After setting (14 days by default). For each, it stamps today as the last chase date, leaves a to do for the handler and queues the Claim Update email to the client. Acknowledging a claim also stamps the last chase date.

> The chase job ships switched off, like the renewal job. The No Update in 14 Days filter on the claims list is fixed at fourteen days and does not follow the setting.

Claims on a policy show on its Claims tab with the reserve and the paid total; the policy counts open claims and the reserve held. A policy with claims on it cannot be deleted.

PART 12 Commission: expected against received

Commission is the broker's income, and carriers pay it late, short or not at all more often than anyone admits. Every placement, endorsement and cancellation books what the office should receive; this part is how the statements are reconciled against it.

IN THIS PART YOU WILL LEARN

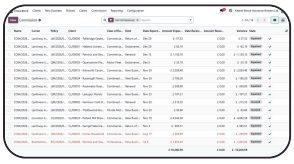

- Where commission entries come from
- Reconciling a carrier statement, in full or short
- Disputes, write offs and clawbacks
- Invoicing a carrier from the entry
- The overdue job

TRY IT YOURSELF ON THE DEMO

1. Open Commission, Commission Receivable; it opens on Not Yet Received
2. Remove the filter and group by Status
3. Open COM entries that are Short Paid and Disputed
4. Open an Invoiced entry and press the invoice button

Where the entries come from

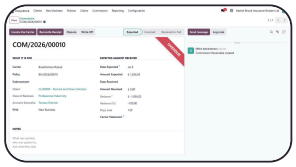

KIND	BOOKED WHEN	AMOUNT
New Business	a policy goes on risk	the commission earned, expected after the carrier's settlement days
Renewal	a renewal policy goes on risk	the same, at the renewal rate
Endorsement	an endorsement that adds premium is applied	the commission on the pro rata premium
Return of Commission	cover is reduced, or a policy is cancelled	a negative amount: the clawback
Profit Share	by hand	whatever the carrier's profit commission agreement pays

1

Commission, Commission Receivable

Opens on Not Yet Received. Filters: Overdue, Short Paid, Disputed and Clawbacks. Group by carrier, class, status, type, account executive or expected date. The tick on a row reconciles it.

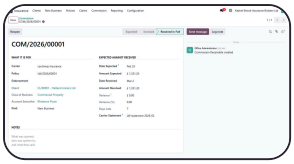

2

An entry waiting

Expected date and amount, the carrier, the policy and its client. **Overdue** is ticked by the nightly job once the expected date has passed with nothing received, and Days Late counts.

Reconcile a statement

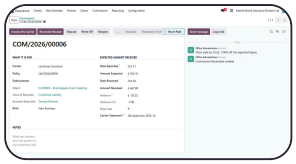

3

Received in full

Enter the **Carrier Statement** it came in on, the date received and the amount, then press **Reconcile Receipt**. If the amount is within the Short Payment Tolerance (1%) of the expected figure the entry becomes **Received in Full**.

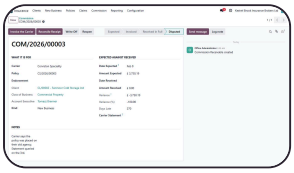

A received amount with no date is refused, and so is a date more than a year before the money was due.

4

Short paid

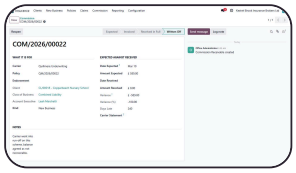

Outside the tolerance the entry becomes **Short Paid** and the chatter records the shortfall in money and percent. Here the carrier paid 7% less than its own terms say. The policy's Commission Short filter finds every policy with a negative variance.

5

Disputed

Write what is being disputed and what was said to the carrier in the notes, then press **Dispute**. A dispute with no note is refused.

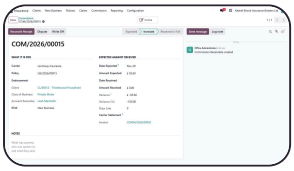

6

Written off

When the money will not come, write why in the notes and press **Write Off**. Written off entries drop out of the policy's expected commission. **Reopen** puts a closed entry back to Expected.

Neither is allowed once the entry has a posted invoice: credit the invoice first, or the ledger and the commission report disagree.

Invoice the carrier

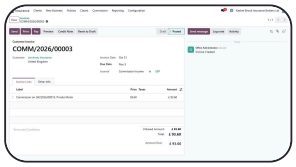

7

Invoice the Carrier

Some carriers pay against an invoice rather than a statement. Press **Invoice the Carrier**: a draft customer invoice is raised to the carrier's Accounting Contact for the expected amount, on the Commission Product (with its taxes) in the Commission Journal, and the entry becomes Invoiced. The invoice button on the entry opens it.

A carrier with no accounting contact cannot be invoiced, and a return of commission cannot go out on an invoice: it is a credit note's job, which you raise in Accounting yourself.

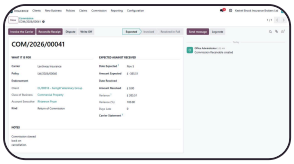

8

The invoice

An ordinary Odoo invoice: post it, send it and register the payment in Accounting as usual. When the money arrives, reconcile the commission entry too; if the amount received differs from the invoice, the chatter says so.

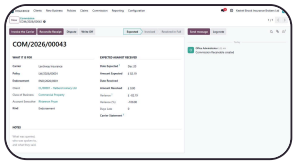

Clawbacks

9

Return of commission

A cancellation books a negative entry for the commission on the returned premium, dated the day of cancellation. A reduction in cover does the same through its endorsement.

10

Commission on an endorsement

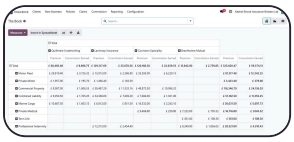

An endorsement that adds premium books its own entry, linked to the endorsement, due after the carrier's settlement days.

The **flag commission not received** job runs nightly: every entry still Expected or Invoiced, with a positive amount and an expected date in the past, is marked Overdue, and each carrier gets a note in its chatter with how many entries and how much.

> Reconciling marks an entry received. It does not post anything in Accounting. Only the commission invoice reaches the ledger, and its payment is registered in Accounting in the normal way.

PART 13 Reporting

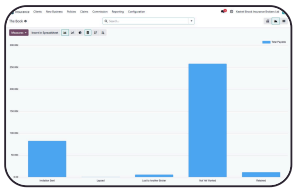

Four reports under Reporting, all pivots you can turn, filter and export, plus the book figures on every carrier and client. Managers only.

1

The Book

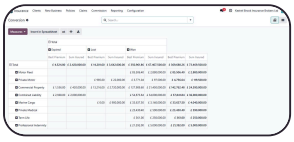

Policies on risk, expired or renewed: premium and commission earned by class down the side and carrier across the top. Change the rows to account executive or expiry month to see whose book is worth what.

2

Retention

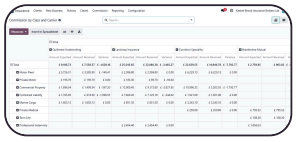

The graph view of The Book: premium by renewal outcome. Retained against lapsed and lost is the retention story in one picture.

3

Conversion

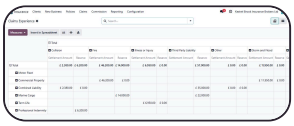

Closed enquiries (won, lost, expired) by class and outcome, with the best premium and the sum insured. Swap the columns for lost reason to see whether the office is losing on price, cover or to other brokers.

4

Commission Analysis

Expected, received and variance by class and carrier. A carrier with a persistent negative variance is a conversation to have.

5

Claims Experience

Settlements and reserves by class and cause.

Figures on the records

RECORD	FIGURES
Carrier	policies, live policies, gross written premium, commission earned and outstanding, retention %
Client	live policies, premium placed, claims, open claims, claims paid, loss ratio, risk grade
Policy	commission expected, received and variance; paid, outstanding and overdue instalments; claims, reserve and paid
Enquiry	quotes, declines and the best premium

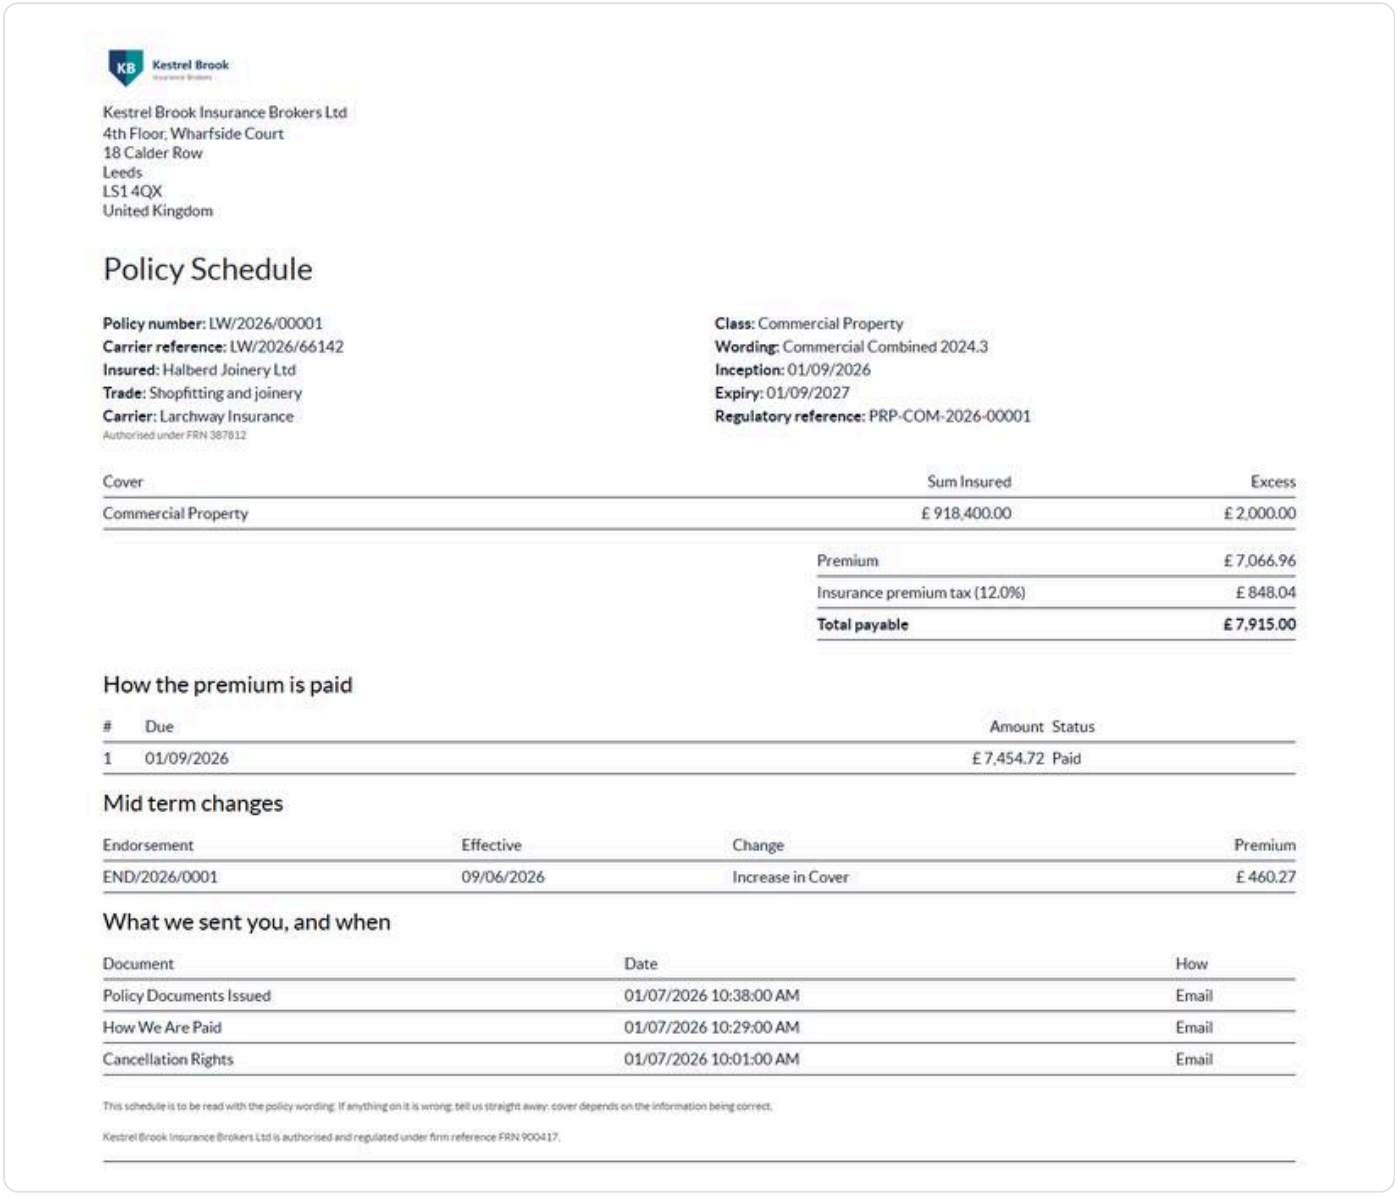

There is no dashboard screen in this version. The four pivots and the list filters are the reporting.

PART 14 Printed documents and emails

Three documents print from the records, and three emails go to the client from the workflow.

The Policy Schedule

Print Schedule on a policy, or Print, Policy Schedule from the list. It carries the policy and carrier numbers, the insured and their trade, the carrier and its authorisation number, the class and wording, the period of cover and the regulatory reference; then the cover, the premium with the tax shown separately, the instalment plan, any mid term changes and the list of what was sent to the client and when. The firm reference closes the page.

Kestrel Brook Insurance Brokers Ltd
4th Floor, Wharfside Court

Policy Schedule

Policy number: LW/2026/00001
Carrier reference: LW/2026/66142
Insured: Halberd Joinery Ltd
Trade: Shopfitting and joinery
Carrier: Larchway Insurance
Authorised under FRN 387812

Class: Commercial Property
Wording: Commercial Combined 2024.3
Inception: 01/09/2026
Expiry: 01/09/2027
Regulatory reference: PRP-COM-2026-00001

Cover	Sum Insured	Excess
Commercial Property	£ 918,400.00	£ 2,000.00

Premium	£ 7,066.96
Insurance premium tax (12.0%)	£ 848.04
Total payable	**£ 7,915.00**

How the premium is paid

#	Due	Amount	Status
1	01/09/2026	£ 7,454.72	Paid

Mid term changes

Endorsement	Effective	Change	Premium
END/2026/0001	09/06/2026	Increase in Cover	£ 460.27

What we sent you, and when

Document	Date	How
Policy Documents Issued	01/07/2026 10:38:00 AM	Email
How We Are Paid	01/07/2026 10:29:00 AM	Email
Cancellation Rights	01/07/2026 10:01:00 AM	Email

This schedule is to be read with the policy wording. If anything on it is wrong, tell us straight away: cover depends on the information being correct.

Kestrel Brook Insurance Brokers Ltd is authorised and regulated under firm reference FRN 900417.

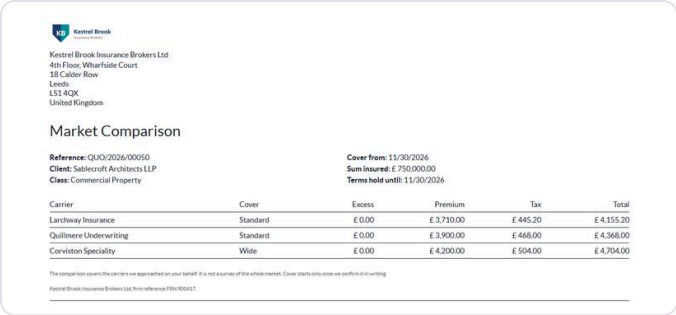

The schedule for LW/2026/00001.

The Market Comparison

Print Comparison on an enquiry past Enquiry. Every carrier approached, its cover level, excess, premium, tax and total, the terms, the declines with their reasons, and the recommendation with the reason it was made.

The Commission Reconciliation

Select commission entries in the list and choose Print, Commission Reconciliation: entry, carrier, policy, due date, expected, received, variance and status, for the carrier conversation.

Commission Reconciliation

Entry	Carrier	Policy	Due	Expected	Received	Variance	Status
COM/2026/00001	Larchway Insurance	LW/2026/00001	02/23/2026	£ 1,331.20	£ 1,331.20	£ 0.00	Received in Full
COM/2026/00006	Larchway Insurance	LW/2026/00006	10/21/2026	£ 503.10	£ 467.88	£ -35.22	Short Paid
COM/2026/00015	Larchway Insurance	LW/2026/00015	11/20/2026	£ 93.60	£ 0.00	£ -93.60	Invoiced
COM/2026/00022	Quillmere Underwriting	QM/2026/00022	03/10/2026	£ 589.00	£ 0.00	£ -589.00	Written Off
COM/2026/00010	Brantholme Mutual	BH/2026/00010	07/08/2026	£ 1,856.03	£ 0.00	£ -1,856.03	Expected

Anything showing a variance has been paid at something other than the agreed terms. Take it up on the next statement rather than absorbing it.

A Commission Reconciliation of five entries.

Emails

EMAIL	SENT BY	SAYS
Policy Documents Issued	Issue Documents on a policy	cover is in force, with the policy number, class, period, sum insured, premium, tax and total
Renewal Invitation	the renewal pipeline job	the cover expires on a date, with the sum insured, the total and the claims this term
Claim Update	the chase open claims job	where the claim stands

> Each email goes only if the client's contact has an email address, and is queued, so it leaves with Odoo's normal outgoing mail. The demo has no outgoing mail server, so nothing is sent from it.

PART 15 The nightly jobs

Six scheduled actions keep the book honest without anybody remembering to. Four ship switched on.

JOB	DOES	SHIPS
Insurance: renewal pipeline	Flags policies inside the renewal window, invites the client, writes the renewal notice, leaves a to do (Part 9)	off
Insurance: run off expired cover	Expires policies past their expiry date; an unworked renewal becomes Lapsed	on
Insurance: expire stale quotations	Expires enquiries whose terms have run out (Part 5)	on
Insurance: flag overdue instalments	Marks unpaid instalments past due as Overdue (Part 7)	on
Insurance: chase open claims	A to do and an email for claims not updated within the chase days (Part 11)	off
Insurance: flag commission not received	Marks commission past its expected date as Overdue (Part 12)	on

All run daily. To switch one on or off, turn on developer mode and open Settings, Technical, Scheduled Actions. Each job works record by record, so one policy with a bad email address or a broker whose account was archived does not stop the rest of the book: the failure is logged and the job carries on.

PART 16 Who sees what

Brokers own their clients. The office roles see across the book. And a few fields are for managers only.

RULE	EFFECT
A broker sees their own	With only the Broker role, a user sees clients where they are the account executive, and the enquiries, policies, instalments, endorsements, disclosures, claims and commission on their own business
The office sees everything	Claims Handler, Commission Accounts and Insurance Manager see every record of the kinds they work with
Restricted fields	Identity Document Number and Support Notes on the client are shown to Insurance Managers only
Signing off	Agreeing an endorsement is an Insurance Manager action
Deleting	Only Insurance Managers can delete clients, enquiries, policies, endorsements and claims
Configuration	Carriers, classes and commission terms are edited by managers; Commission Accounts can also edit a carrier
Companies	Every record belongs to a company and each company sees only its own; a class of business with no company is shared

> Claims Handler and Commission Accounts both include Broker, and Insurance Manager includes both, so one tick on a user is enough.

PART 17 A fifteen minute walk-through

If you have the demo open and fifteen minutes, this path shows the whole office. It is also the order to show it to somebody else in.

#	DO THIS	AND NOTICE
1	Clients, Clients, Halberd Joinery Ltd	*The record the market sees: one fire claim and a loss ratio over 400%, so the grade is High.*
2	Its Disclosures tab	*Ten dated records, eight of them written by the system as the work happened.*
3	New Business, Enquiries, QUO/2026/00050, The Market	*Three carriers side by side with tax, total, cover level and commission.*
4	QUO/2026/00003, The Market	*Won on the dearer quote: the only carrier with capacity, and the decline kept on file.*
5	Policies, Policies, LW/2026/00001	*Premium, 12% tax and 20% commission worked out; carrier code in the number; regulatory reference built from the class.*
6	QM/2026/00004, Instalments tab	*Monthly schedule, rounding on the first line, October overdue.*
7	Policies, Endorsements, END/2026/0001 and END/2026/0003	*A mid term increase and a reduction, pro rated to the day with the commission on each.*
8	Policies, Renewals, CS/2026/00003	*Invitation sent, renewal hint, and a to do waiting for the account executive.*
9	QM/2026/00032, then Renewed As	*Retained at renewal; the new policy pays the renewal rate of commission.*
10	Claims, Claims, kanban	*Every stage from notified to settled, one repudiated with the wording relied on.*
11	Commission, Commission Receivable, group by Status	*Received in full, short paid, disputed, invoiced and written off.*
12	Reporting, The Book	*Premium and commission by class and carrier.*

Questions people ask

QUESTION	ANSWER
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community and installs Invoicing, which is part of Community.
Does it connect to carriers or rating engines?	No. Quotes are typed in from what the carrier sends back. There is no carrier API, aggregator or rating engine connection.
Can clients log in to see their policies?	No. There is no client portal or website page. Documents go by email or post, recorded as disclosures.
Does it post the premium in Accounting?	No. Premium, tax and instalments are tracked on the policy. Only commission invoiced to a carrier becomes an accounting document.
Does it file regulatory returns?	No. It builds a regulatory reference on every policy from the class code so a return can be run from the book, and it keeps the disclosure file a regulator asks to see.

Can it work in another country and currency?	Yes. Premium tax rates are per class with a company fallback and can be routed through an Odoo tax record; amounts are in the company currency. The demo uses pounds and 12%.
Can one database hold several brokerages?	Yes. Every record carries its company and each company sees only its own.
Can a broker see a colleague's clients?	Not with the Broker role alone. Claims Handler, Commission Accounts and Insurance Manager see across the office.
Does it handle life and health as well as general insurance?	It has classes for private medical and term life, with life exempt from premium tax, and a flat fee commission for schemes. It does not do policy administration for life products (surrender values, fund units).

PART 18

The menu map

Every screen in the module, on one page.

Clients

Clients	Risk profile, loss ratio, identity checks, support
Disclosures	What was sent to each client, when and how

New Business

Enquiries	The risk, every carrier's answer, won or lost

Policies

Policies	On risk, premium tax, commission, documents
Renewals	Inside the renewal window, invitation sent
Endorsements	Mid term changes, pro rated to the day
Premium Collection	Instalments due, paid and overdue

Claims

Claims	Notified to settled, repudiated or withdrawn

Commission

Commission Receivable	Expected against received, invoices, clawbacks

Reporting

The Book	Premium and commission by class and carrier, retention
Conversion	Enquiries won, lost and expired
Commission Analysis	Expected, received, variance
Claims Experience	Settlements and reserves by cause

Configuration

Settings	Tax, renewal window, disclosures, tolerance
Carriers	Codes, binders, ratings, contacts
Classes of Business	Tax, term, survey, minimums
Commission Terms	Rates per carrier and class, by date

Want this for your brokerage?

We set it up from your carrier agencies and your classes, load your clients and the live book, set the commission terms from your agency agreements and the premium tax for your territory, connect commission invoicing to your accounts, and train the account executives, the claims desk and whoever reconciles the statements.
