COMPLETE GUIDE · INTRODUCTION, SETUP AND EVERY ROLE

Field Sales and Distribution for Odoo 19

One app for pre-sale, van sales, delivery and the warehouse counter, in three editions. Every screen and every step, shown on a live demo. No FMCG background needed.

BASE | VAN SALES | ENTERPRISE

START How to read this guide

This is one guide for one product: **Field Sales and Distribution for Odoo 19**. It comes in three editions that build on each other, like floors of the same building. Everything a lower edition does stays when you move up.

ALL EDITIONS
Included in Base, Van Sales and Enterprise.

VAN SALES AND UP
Needs the Van Sales add-on. Enterprise includes it.

ENTERPRISE
Only in the Enterprise edition.

Every section and every step carries one of these badges, so you always know which edition a screen belongs to. The screenshots come from the live demo, which runs the full Enterprise edition.

> **Introduction and full course in one.** Each part starts with what you will learn, explains the business reason behind each screen, shows every step on the live demo, and ends with an exercise you can do yourself.

Who should read what

IF YOU ARE	READ
New to FMCG distribution	Part 1 (the business in five minutes) before anything else.
Choosing an edition	Part 2 (one app, three editions).
Setting the system up	Part 4 (setup, in the order you should do it).
A salesperson or driver on Base or Van Sales	Part 5, the Order Taker and Delivery apps, step by step.
A salesperson, driver or counter clerk on Enterprise	Parts 6 to 10, your own role, step by step.
A sales or operations manager	Parts 11 to 15: the phone cockpit, daily back office, tracking, brands and reports.
Showing the app to someone	Part 17, the 15 minute demo script, and Part 3 for the logins.

PART 18 Where to find everything

OVERVIEW

The product at a glance

A distributor sends people out every day to hundreds of small shops. Orders, cash, stock in vans and credit all move on the road, far from the office. This app puts that whole day into Odoo: every visit, sale, drop, payment and return is recorded where it happens, checked against the rules the manager set, and visible to the manager at once.

3
editions that build on each other: Base, Van Sales, Enterprise

5
roles in one app: order taker, van seller, driver, counter, manager

Offline
sell, deliver and collect for days without signal

1 tap
van sale = order, delivery, invoice and payment

What it solves

Every shop, every visit
Routes with visit days, GPS check-in, a reason for every visit without an order. Coverage and strike rate are measured, not guessed.

Orders without paper
Orders, van sales and deliveries are Odoo records the moment they happen. Nothing is typed in at night.

Cash that adds up
Payments pay the oldest bill first, vans and drawers are counted by note at night, and gaps go to the manager the same evening.

Credit that stays safe
Credit limits, risk bands A to D, new shops cash only until approved. Bad debt is stopped at the shop counter.

Stock you can trust
Each van is a stock location. Loads, sales, returns, damaged goods and unloads are normal Odoo moves.

A manager in control
Live map, approvals, alerts, targets and margin on the phone and in the back office.

Brands that pay back
Promotion cost by funder, budgets, return on promotion and claims to principals with a signed form.

Shelves that sell
Perfect store checks with a score, must-stock products and share of shelf, proved with photos.

A team that wants to win
Live targets, points, badges, contests and incentive plans paid on results.

Built and tested

590
automated tests across the editions, run on fresh databases and after upgrades

143 / 144
offline test runs passed (online, offline, lost answer) in Chrome and Safari engines

~1 s
to open the installed app on a slowed-down phone; under 300 ms between screens

14
security tests on the role matrix and record ownership

BUILT ON	DETAILS
Odoo 19	Community or Enterprise. Uses standard Sales, Inventory, Accounting and Fleet, so orders, transfers, invoices and payments stay standard Odoo records.
Devices	Any Android phone, iPhone (Safari, add to home screen), SUNMI V2/V3 handhelds with built-in printer and scanner, tablets and counter PCs.
Printing	58 mm and 80 mm thermal receipts, A4 PDFs for orders, statements, load sheets, manifests, claims and reports.
Maps	Built-in maps, no Google key. Latin or local labels, CARTO or your own tile server.

PART 1 FMCG distribution in five minutes

FMCG means fast moving consumer goods: drinks, snacks, soap, tea, tissues. Cheap items that shops sell every day and reorder every week. Brands do not deliver to thousands of small shops themselves. A distributor does it for them, in one city or region.

IN THIS PART YOU WILL LEARN

- Who is who in FMCG distribution
- Why routes, credit and cash control matter
- The words used in this guide
- The daily loop every screen fits into
- Pre-sale, van sales and counter, and when each is used

Brand (principal)

Makes the product and funds promotions. Pays the distributor back for some discounts and damaged goods (a "claim").

Distributor

Buys from brands, keeps a warehouse, runs salespeople and vans. This app is built for them.

Shops (outlets)

Mini marts, pharmacies, bakeries, hotels, wholesalers. Hundreds of them, many paying cash or on short credit.

Consumer

Buys one bottle at a time. If the shelf is empty, the sale goes to a competitor.

What makes this business hard

- Every shop must be visited on a fixed day, every week, by the right person.
- Orders are small and many: 30 to 60 shop visits a day per salesperson.
- Much of the money is cash, collected on the road by drivers.
- Some shops pay late. Selling more to them only grows the bad debt.
- Stock sits in vans, not only in the warehouse, and must be counted every evening.
- Brands judge the distributor on shelf presence, not only on sales.
- Promotions cost money, and part of it must be claimed back from the brand.

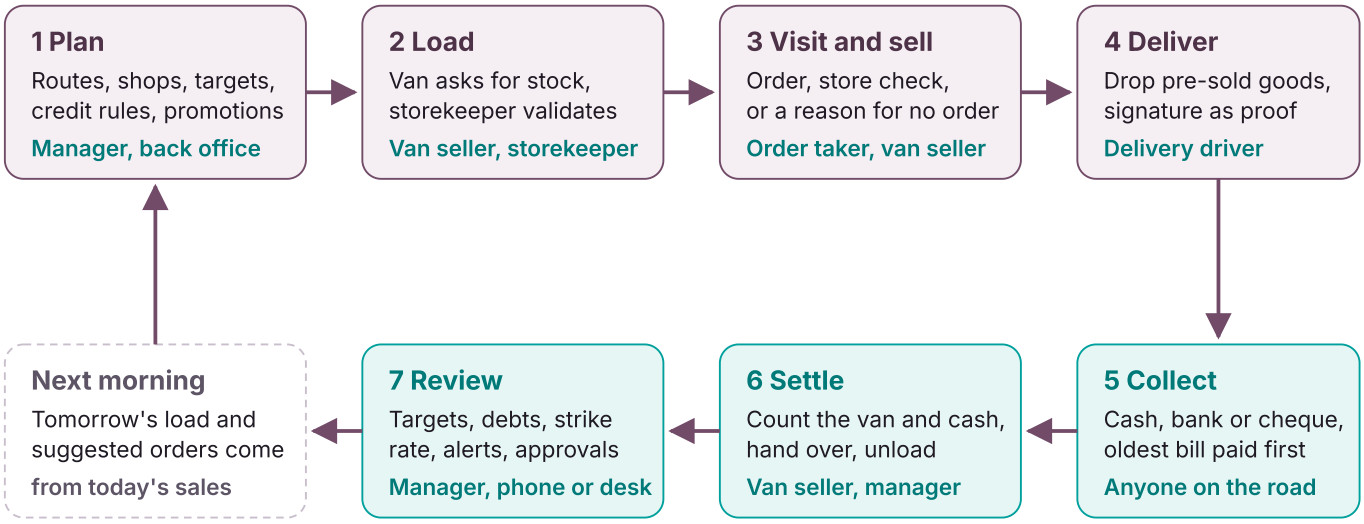

In one line: the app makes sure every shop is visited, every sale is recorded on the spot, every cash note is accounted for at night, and the manager sees all of it live.

Words you will hear

Route (beat)	A fixed list of shops visited on set weekdays, for example "Old Town Bazaar, Tue and Fri".
Order taker	Salesperson who visits shops and books orders. Goods come later. Also called pre-sale.
Van sales	The salesperson drives a stocked van and sells and hands over goods in one visit.
Drop	One delivery stop for a pre-sold order.
Strike rate	Share of visits that ended with an order. 60% is a common target.
Must-stock	Products every shop of a type should always have on the shelf.
Facings	Product fronts facing the customer on the shelf. More facings, more sales.
Scheme	A promotion, such as "buy 10, get 2 free".
Settlement	End of day: count the van, hand over the cash, explain any gap.
Ageing	How old each unpaid bill is: 1 to 30 days, 31 to 60, 61 to 90, over 90.
Cost to serve	What it costs to visit and deliver to a shop: km, time and drops.

One day at a distributor

Everything in the app follows this loop. Learn the loop and every screen has an obvious place in it.

Three ways to sell, in the same app

PRE-SALE

Order today, deliver tomorrow

1. The order taker visits the shop and books the order on the phone.
2. The warehouse picks it overnight.
3. A delivery driver drops it next day and collects the money.

ALL EDITIONS

VAN SALES

Sell and hand over at once

1. The van is loaded in the morning.
2. The seller sells from the van, takes payment and prints a receipt.
3. At night the van and the cash are counted against the sales.

VAN SALES AND UP

COUNTER

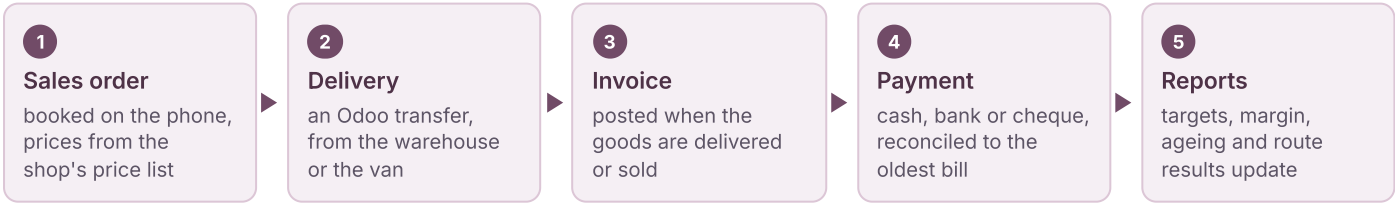

Shops come to the warehouse

1. A counter clerk sells from the main stock to walk-in shopkeepers.
2. Scan, take payment, print.
3. The cash drawer is counted at closing.

ENTERPRISE

A company can run all three at once. The setting **Sales Mode** (pre-sales, van sales or both) is set for the company and can be changed per route.

Order to cash: what happens in Odoo ALL EDITIONS

PART 2 One app, three editions

Start with Base, add Van Sales when your vans carry stock, and move to Enterprise when you want the offline phone app and the tools to run a larger team. Each edition installs on top of the one below it, and every record you made stays when you upgrade.

IN THIS PART YOU WILL LEARN

- What each edition includes
- Which edition fits which business
- How the Base apps and the Enterprise field app differ
- What stays when you upgrade

TRY IT YOURSELF ON THE DEMO

1. Log in to distributor-base.way4tech.com as aisha (password demo) and open Distribution > Order Taker. This is Base.
2. Log in to distributor-demo.way4tech.com as aisha. You land in the Enterprise field app.
3. Compare the two home screens with the pictures in this part.

WHAT YOU GET	BASE	VAN SALES	ENTERPRISE
Territories, routes, stops, visit days, visits with GPS check-in	✓	✓	✓
Order taking with the shop's usual order, focus products, discounts, credit check	✓	✓	✓
Delivery with signature, photo, part delivery and skip with a reason	✓	✓	✓
Collections in cash or bank, older bills too, returns from the field	✓	✓	✓
Order Taker and Delivery apps inside the Odoo web client, camera barcode scan	✓	✓	✓
Sales targets per order taker or route, manager dashboard, sales by route, visit analysis	✓	✓	✓
Route load sheet and delivery manifest (PDF), sample data with one click	✓	✓	✓
Vans on Odoo Fleet, each with its own stock location	–	✓	✓
Van loading and unloading as validated transfers, Sell from van in one step	–	✓	✓
Sales mode per company and route: pre-sales, van sales or both	–	✓	✓
Returns into the van with a credit note, Sales by Van report	–	✓	✓
58 and 80 mm receipts, customer statement (PDF and receipt), keyboard scanners	–	✓	✓
One phone app at /field for every role, offline work, Android app and SUNMI printer	–	–	✓
Day plans, odometer, fuel, end of day settlement with cash and stock count	–	–	✓
Warehouse counter: cash, card, cheque or credit sales, returns, day close	–	–	✓
Suggested order per shop, tomorrow's van load, WhatsApp reorder link	–	–	✓
Credit risk bands A to D, promises to pay, cheques, cash count by notes and coins	–	–	✓
New shops cash only until approved, quarantine for expired returns, settle before selling	–	–	✓
Units and cartons on every line, debt ageing everywhere	–	–	✓
Manager cockpit on the phone: today, approvals, team, alerts	–	–	✓
Live map, route replay, customer map, geofence and field exceptions	–	–	✓
Promotions, budgets and return on promotion, claims to principals, brand scorecard	–	–	✓

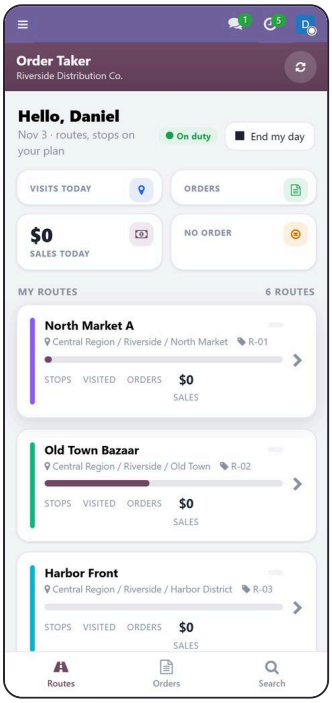

Perfect store checks, points, badges, contests, incentive plans	–	–	✓
Targets per van, KPIs, performance with margin, cost to serve, route profit, daily sales report	–	–	✓

Good fit: FMCG and consumer goods, food and beverage in dry and ambient goods, wholesale, van sales and pre-sales companies, cash and carry with a trade counter. **Not covered today:** lot and expiry tracking, returnable crates and deposits, cold chain, truck and weight planning for building materials. Buying from suppliers is standard Odoo Purchase.

The same work, two kinds of screens

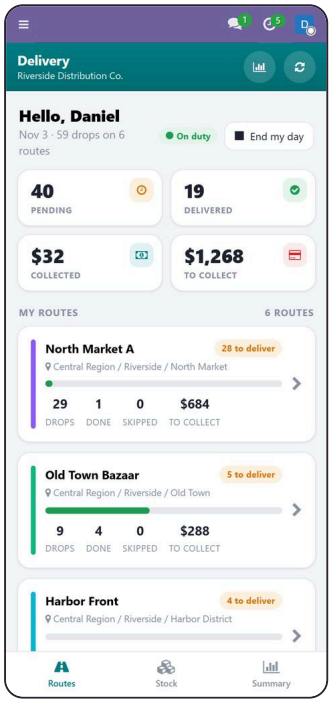

In BASE and VAN SALES the order taker and the driver work in two apps that open inside Odoo (Distribution > Order Taker, Distribution > Delivery). They are made for the phone browser and need a connection.

In ENTERPRISE every role uses one app at **/field**: big tiles, plain words, works offline, installs on the home screen with your logo. Field staff land in it straight after login. Part 5 walks through the Base and Van Sales apps; Parts 6 to 10 walk through the Enterprise app.

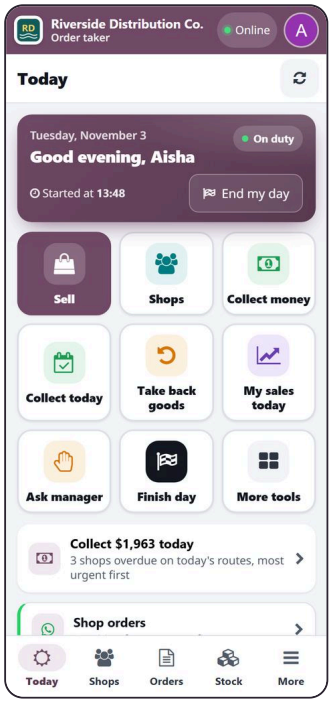

ALL EDITIONS

Order Taker app in the web client

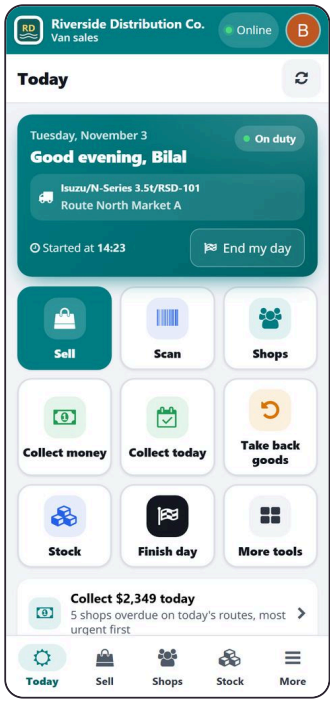

ALL EDITIONS

Delivery app in the web client

ENTERPRISE

One field app, order taker home

ENTERPRISE

Same app, van seller home

Which edition fits

Base

Pre-sale only: order takers book, the warehouse delivers. A small team with good signal.

Van Sales

Vans carry stock and sell on the spot, with receipts and statements. Good signal on the routes.

Enterprise

A larger team, weak signal, a trade counter, credit risk, brands to claim from, managers who run it from the phone.

PART 3 The demo and its people

Riverside Distribution Co. is a fictional distributor in Lahore: 6 routes, about 40 shops, 36 products from six brands of three principals, 3 vans and 6 staff, with months of orders, deliveries and payments behind it.

IN THIS PART YOU WILL LEARN

- The fictional company used in every screenshot
- Which login shows which role
- How to open the field app on a computer

TRY IT YOURSELF ON THE DEMO

1. Open distributor-demo.way4tech.com on your phone and sign in as aisha.
2. In a second browser, sign in as daniel and open Distribution > Dashboard.
3. Keep both open while reading: the phone does the work, the back office shows it arrive.

LOGIN	PERSON AND ROLE	WORKS IN	TRY THIS
`daniel`	Daniel Reed, distribution manager	Back office on a computer, supervisor screens on a phone	Targets, approvals, live map, reports
`aisha` `omar`	Aisha Khan and Omar Malik, order takers	Field app	Today's route, orders, store checks
`bilal`	Bilal Ahmed, van seller, van RSD-101	Field app	Sell from the van, collect, close the day
`sara`	Sara Lopez, van seller and delivery driver, van RSD-102	Field app, switches to Delivery	Deliver pre-sold orders with a signature
`warehouse`	Karim, warehouse counter	Field app on a phone, tablet or counter PC	Walk-in sale, return, close the drawer

Address: **https://distributor-demo.way4tech.com** · Password for every login: `demo`

Best way to look at it. Open the field logins on a real phone. On a computer, use the browser's phone view (F12, then the phone icon) or a narrow window. Field staff land in the field app at **/field** after login.

It is a shared demo. Other visitors may be testing at the same time, so numbers move and what you add stays for the next visitor. Please do not enter real customer data.

BRAND	PRINCIPAL	PRODUCTS
Sparkle, Fresh Valley	Northwind Beverages Ltd	Drinks
Crunchy, Dairy Gold	Golden Harvest Foods	Snacks, dairy, grocery
Brightly, Pure Care	BrightHome Brands	Home care, personal care

PART 4 Set up the business

Do these steps once, in this order, as an administrator or the distribution manager. Each step says where to click. On the demo it is already done, so you can look at every screen with real data.

IN THIS PART YOU WILL LEARN

- The order to set the system up in
- Every setting and what it changes
- How roles decide what each person sees
- How routes, shops, products and vans are prepared
- How rules for credit, promotions and targets are set

TRY IT YOURSELF ON THE DEMO

1. As daniel, open Configuration > Credit Risk Bands and read the message of band C.
2. Open Operations > Routes > Old Town Bazaar and press Optimise order. Compare the old and new order, then press Keep the current order.
3. Open Reporting > Sales Targets and find Aisha's November target.
4. Open Configuration > Schemes > Buy 10 Get 2 Free and look at the Funding and Budget tab.

Set up in this order ALL EDITIONS

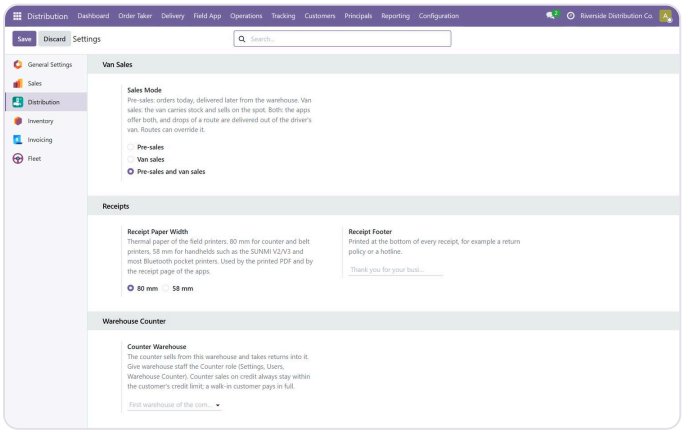

1. **Company** logo, settings, time zone
2. **People** roles for each user
3. **Places** territories, routes, stops
4. **Shops** customers, credit limits, GPS
5. **Products** focus, cartons, brands
6. **Vans** drivers, phones
7. **Rules** reasons, bands, promotions, targets

4.1 Install, and try with sample data ALL EDITIONS

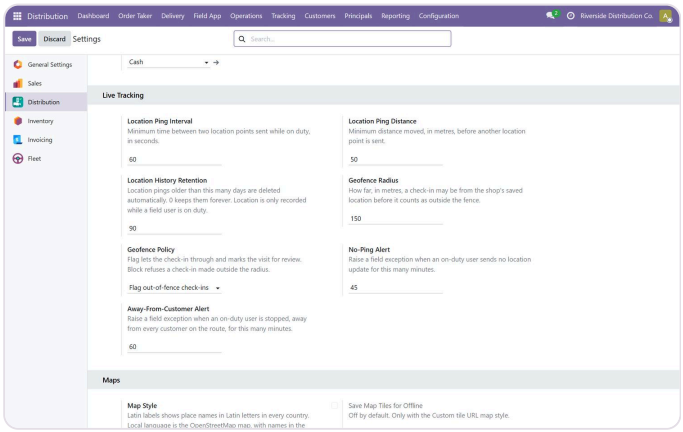

Install **Field Sales and Distribution** from Apps. Sales, Inventory and Accounting install with it. For vans, also install **Van Sales and Van Stock** (Fleet comes with it); for everything, install **Field Sales Enterprise**, which brings both. A new **Distribution** app appears. On a fresh database, Distribution > Configuration > Settings > **Load sample data** creates six routes, forty shops, products with photos, targets and a month of history to practise on.

4.2 Company logo and settings ALL EDITIONS

Set the company logo first: in Enterprise it becomes the icon of the phone app. Then open **Distribution > Configuration > Settings**. Every option has a one-line explanation on the screen. The table below lists all of them.

VAN SALES AND UP Sales mode, receipts and the counter warehouse.

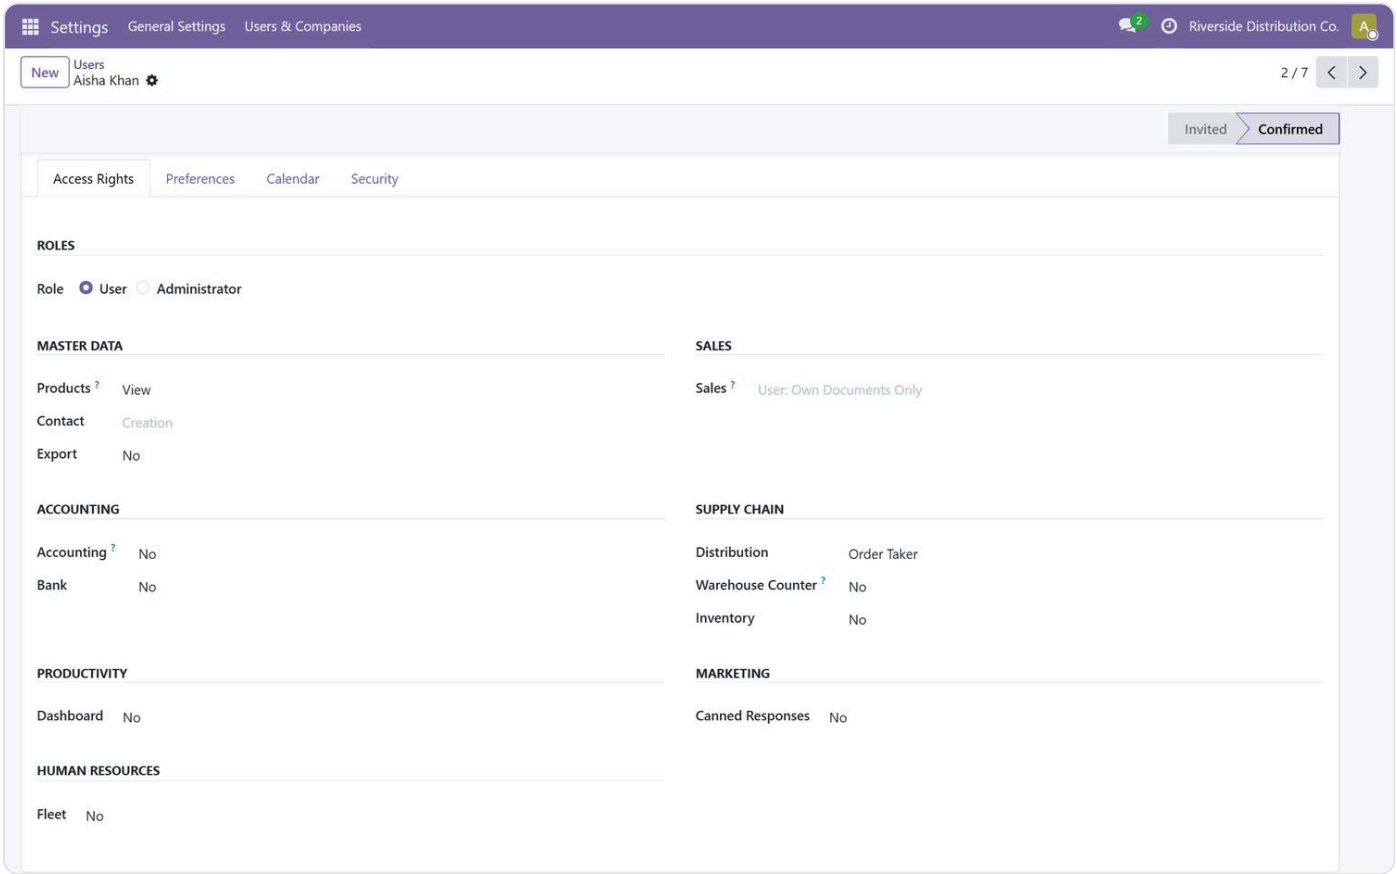

ALL EDITIONS Order taking rules, apps, delivery proof and live tracking.

SETTING	WHAT IT DOES

Sales Mode	Pre-sales, van sales or both. Routes can override it.	VAN SALES AND UP
Receipt paper width and footer	80 mm for counter printers, 58 mm for handhelds. Footer text on every receipt.	VAN SALES AND UP
Counter warehouse	The warehouse the counter sells from and takes returns into.	ENTERPRISE
Enforce credit limit	Refuse credit sales that take a shop over its limit, counting orders not yet invoiced.	ALL EDITIONS
Maximum discount	Highest line discount an order taker may give. 0 means no limit.	ALL EDITIONS
Allow order editing	Order takers may change a draft order from the app.	ALL EDITIONS
Confirm orders immediately	Field orders are confirmed on submission, so delivery is created at once.	ALL EDITIONS
Reason for no-order visits	The salesperson must pick a reason when leaving a shop without an order.	ALL EDITIONS
Product images, available stock	Show photos and stock in the catalogue. Turn images off on slow connections.	ALL EDITIONS
Require payment at delivery	A drop cannot be validated until a payment is recorded.	ALL EDITIONS
Proof of delivery	The customer must sign on the phone before a delivery is validated.	ALL EDITIONS
Default cash journal	Pre-selected when a driver collects cash.	ALL EDITIONS
Location ping interval and distance	How often a phone on duty sends its position.	ENTERPRISE
Location history retention	Days after which old positions are deleted. Positions are recorded only while on duty.	ENTERPRISE
Geofence radius and policy	How far from the shop a check-in may be. Flag it for review, or block it.	ENTERPRISE
No-ping and away-from-customer alerts	Minutes before the manager is alerted that a phone went silent or someone stopped away from any shop.	ENTERPRISE
Map style	Latin labels (default), local language, CARTO with a key, or your own tile server. Offline map tiles only with your own server.	ENTERPRISE
Daily sales report email	Email the day's report to every distribution manager at a set hour.	ENTERPRISE
Report time zone	Decides what "today" means for reports, targets and receipts.	ENTERPRISE
Warn after hours offline	Warn a phone that has unsent work and no signal for this many hours.	ENTERPRISE
Android app download	Link to your signed Android app for SUNMI handhelds and Android phones.	ENTERPRISE
App name and colour	Name under the phone icon and the colour of the app bar.	ENTERPRISE
Returns needing approval	Returns above this amount need the manager's yes from the phone.	ENTERPRISE
Strike rate target	The goal shown on the manager's phone (60% on the demo).	ENTERPRISE

Sales history, spare stock	Days of sales used for suggested orders, and extra days of cover added.	ENTERPRISE
Reorder link lifetime	Days a WhatsApp reorder link keeps working.	ENTERPRISE
Route optimiser	Road factor, average speed, minutes per shop, key accounts first, optional OSRM server.	ENTERPRISE
Credit for new shops	Cash only until a manager approves the shop, or credit up to an amount. Ask for owner, ID and licence photos.	ENTERPRISE
Settle before selling	A van cannot sell on a new day while an earlier day is not settled; a counter not while a day is open.	ENTERPRISE
Claim accounts	Where money paid back by principals is booked.	ENTERPRISE
Cash count	Tolerance, journals and accounts for shortages and overages; notes and coins list.	ENTERPRISE
Cost to serve	Cost per km, staff cost per hour and cost per delivery drop.	ENTERPRISE

4.3 Give each person a role ALL EDITIONS

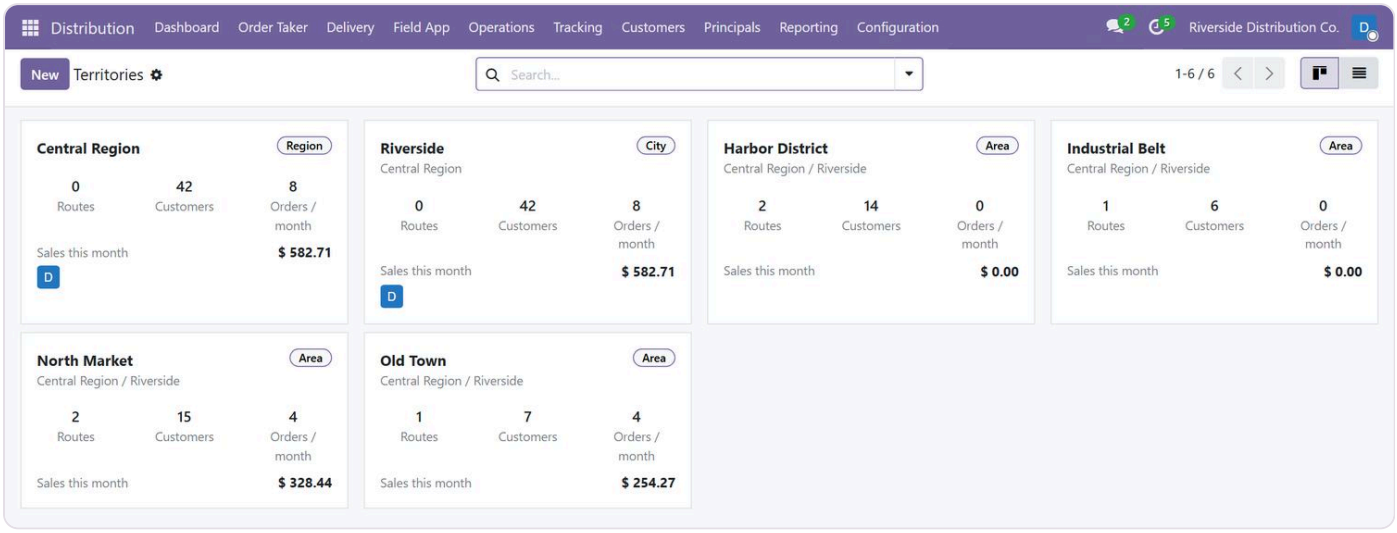

ALL EDITIONS **Settings > Users > open a user > Access Rights.** Under Supply Chain, pick the Distribution role: **Manager**, **Order Taker** or **Delivery Man**. For the counter, set **Warehouse Counter** to Counter. A van seller is a Delivery Man who drives a van (step 4.8). One person can hold two roles.

ROLE	SEES AND DOES
Manager	Everything: setup, all routes, approvals, reports, the supervisor screens on the phone.
Order Taker	Own routes, shops and visits. Books orders, collects money, takes back goods.
Delivery Man	Own drops. Delivers, collects, takes returns. With a van: sells from it and settles it.

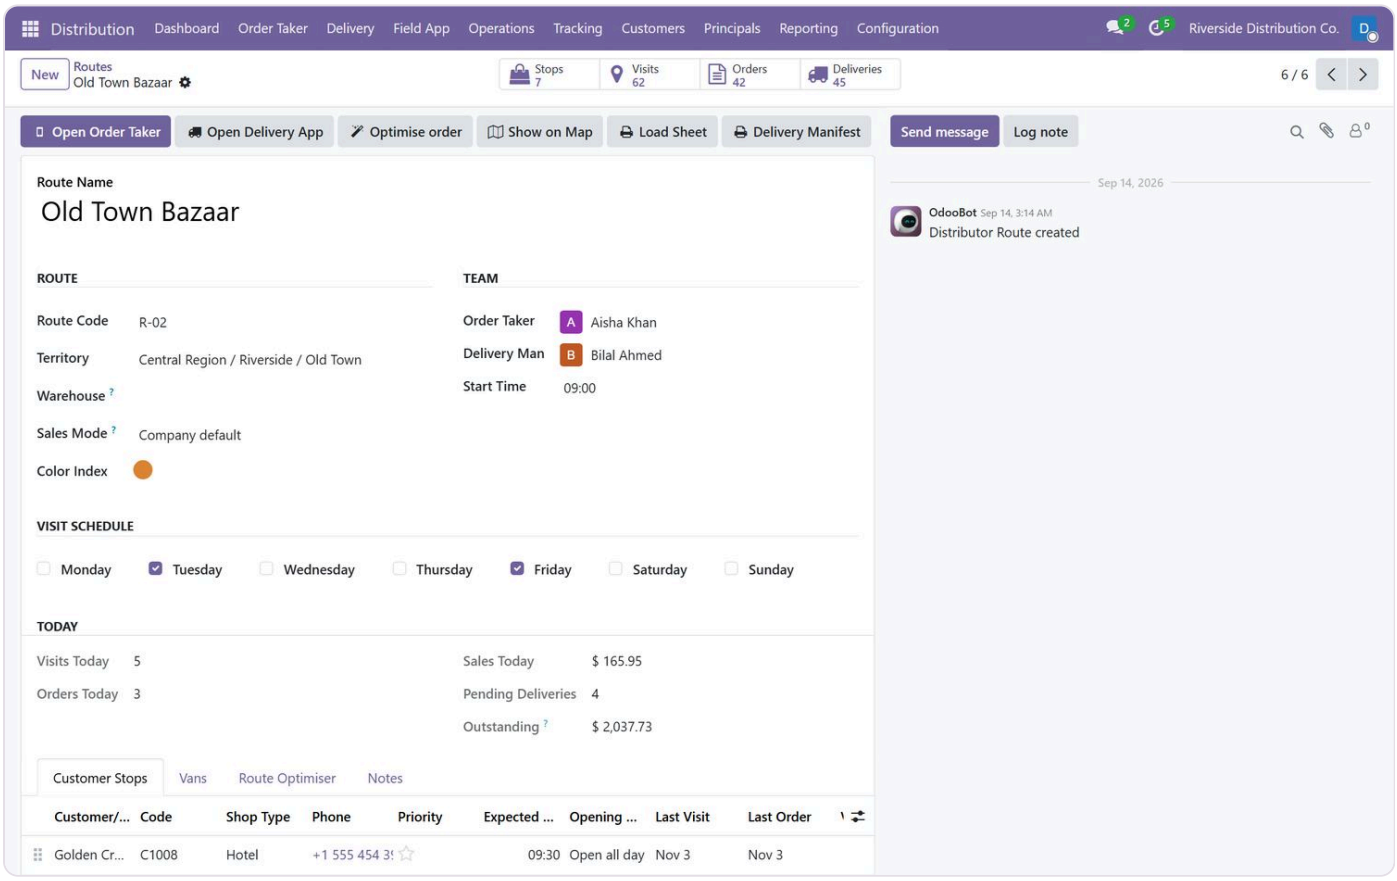

Counter	Sells at the warehouse counter, collects, takes returns, closes the drawer.

4.4 Territories ALL EDITIONS

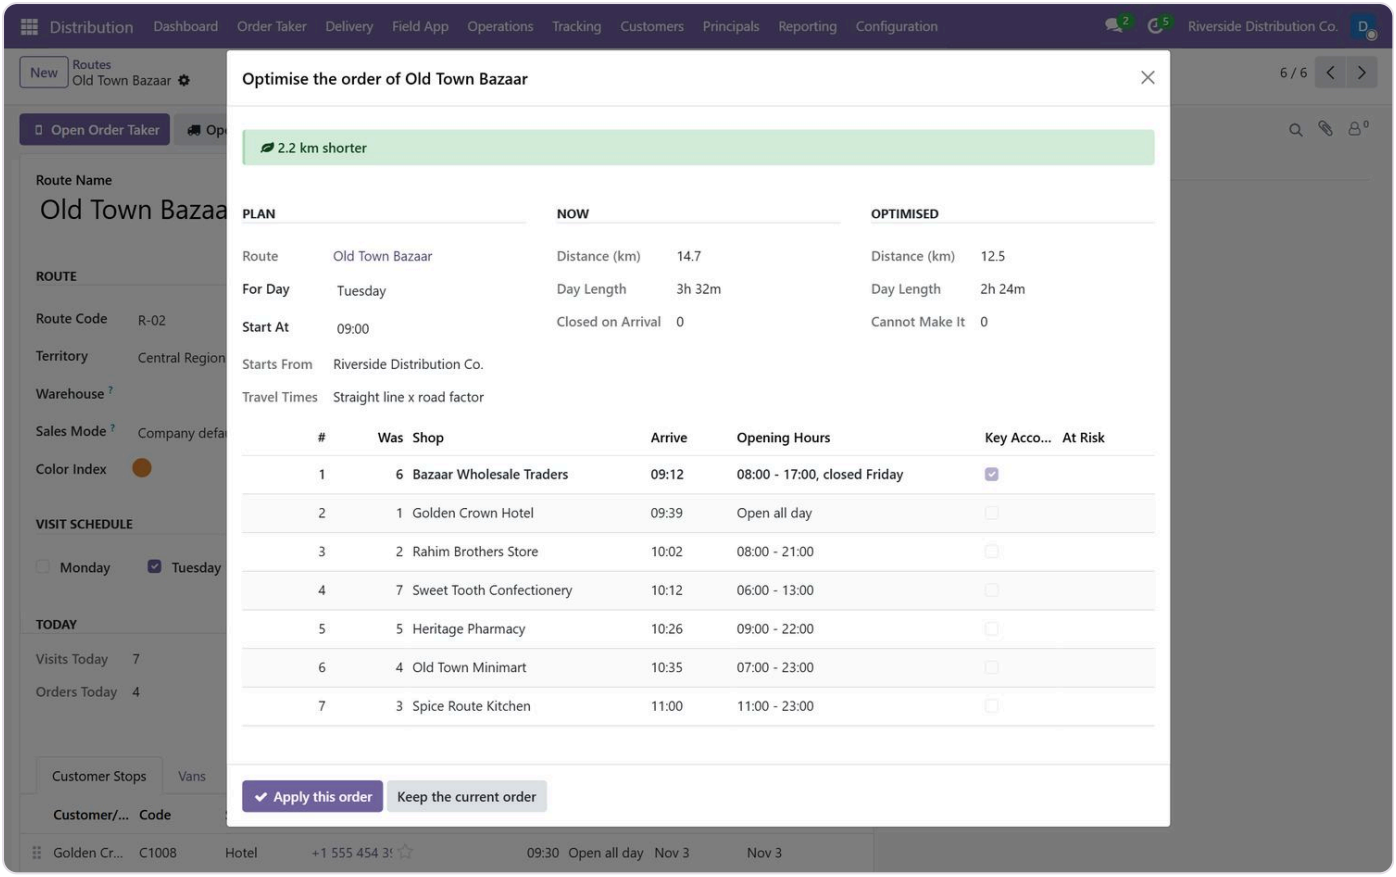

ALL EDITIONS **Configuration > Territories.** Region, city and area in a tree. Each card shows its routes, shops, orders per month and sales, so you can compare areas at a glance.

4.5 Routes and stops ALL EDITIONS

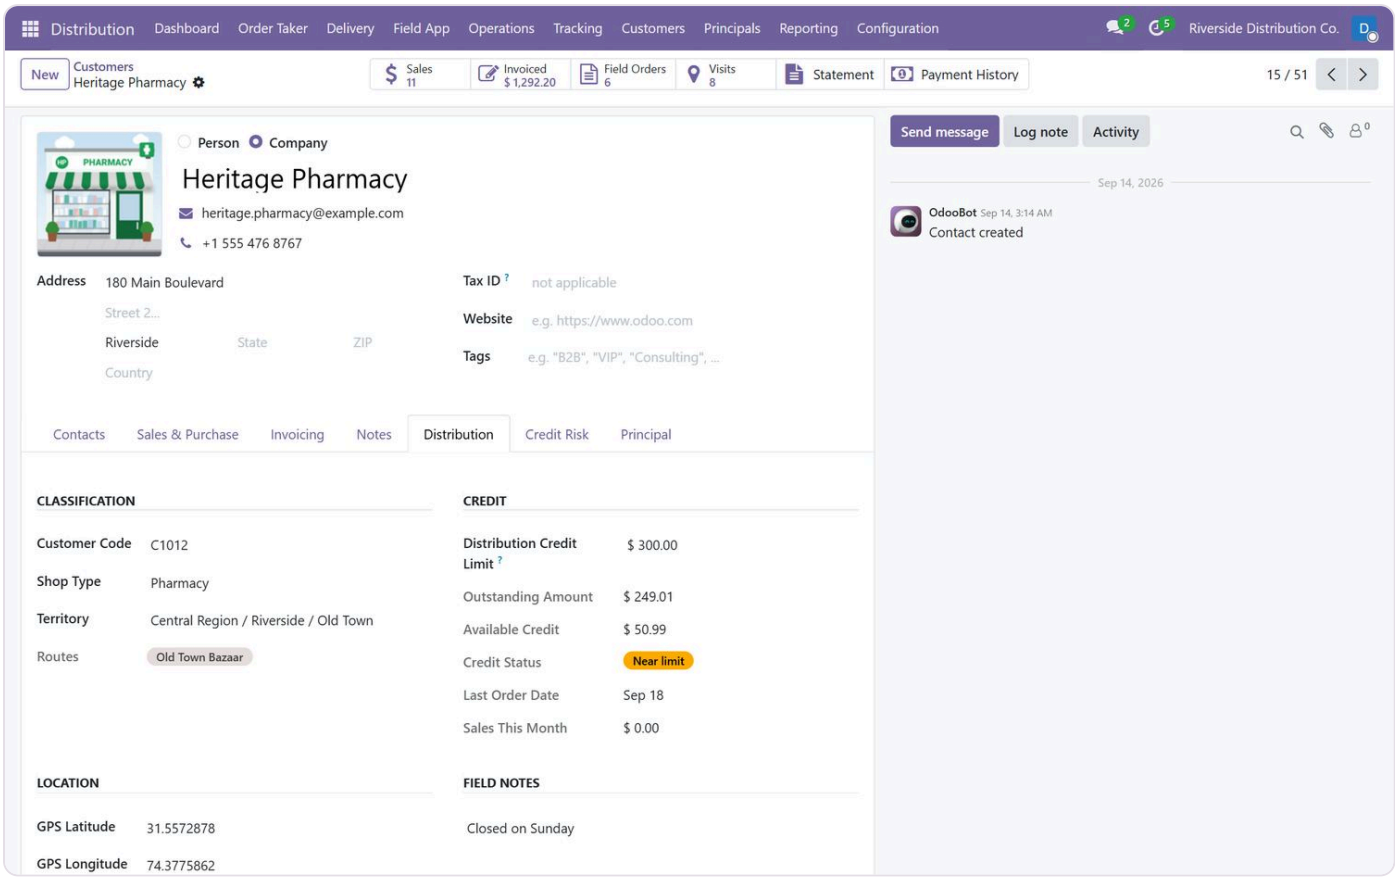

ALL EDITIONS **Operations > Routes > New.** Name and code, territory, order taker, delivery man, warehouse, start time and sales mode. Tick the visit days. In **Customer Stops** add the shops in visiting order with an expected time, opening hours and a star for key accounts. The buttons open the route in the apps, show it on a map and print the load sheet and delivery manifest.

ENTERPRISE **Optimise order** on the route. The optimiser proposes a shorter order (here 2.2 km shorter) with arrival times against opening hours and key accounts first. Apply it, or keep the current order. It uses straight-line distance times a road factor, so it works without any map service.

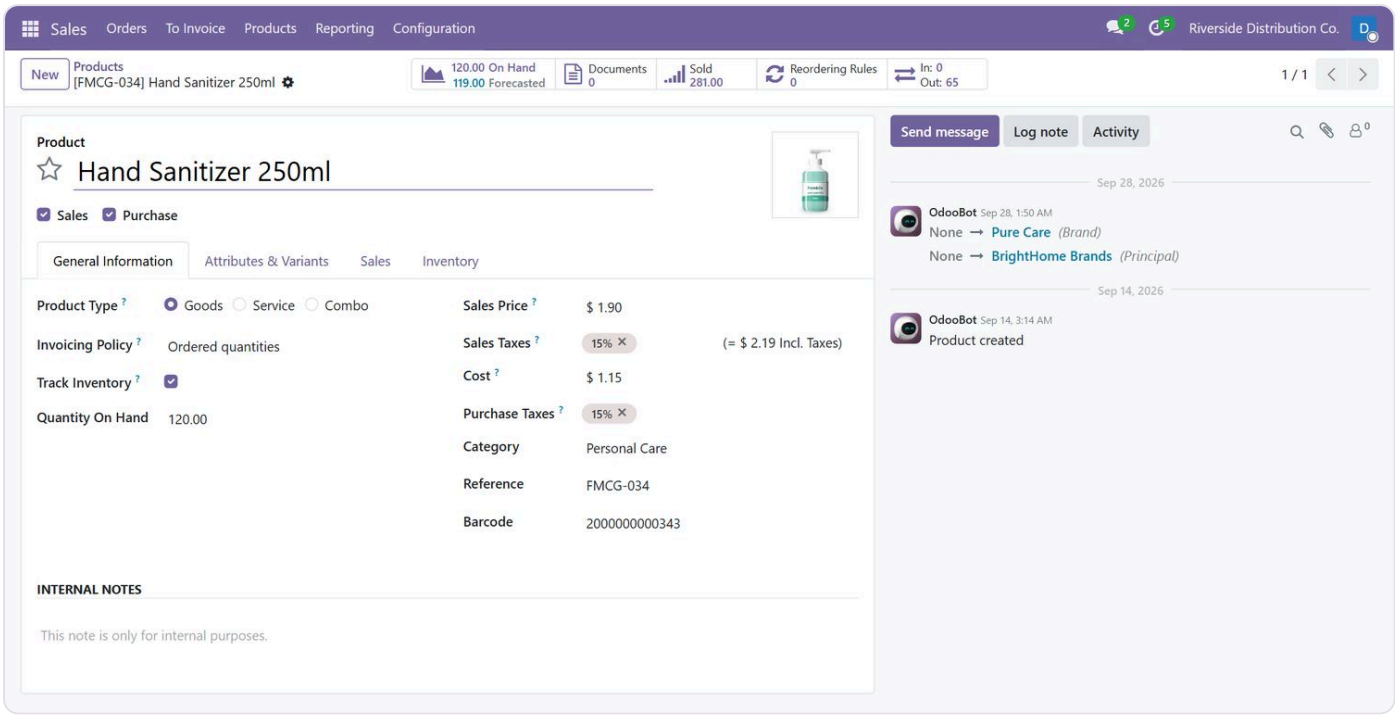

4.6 Customers ALL EDITIONS

ALL EDITIONS **Customers > open a shop > Distribution tab.** Customer code, shop type, territory and routes; the credit limit with what it owes, what is left and a credit status; GPS position and field notes the salesperson sees. Smart buttons open sales, invoices, field orders, visits, the statement and the payment history.

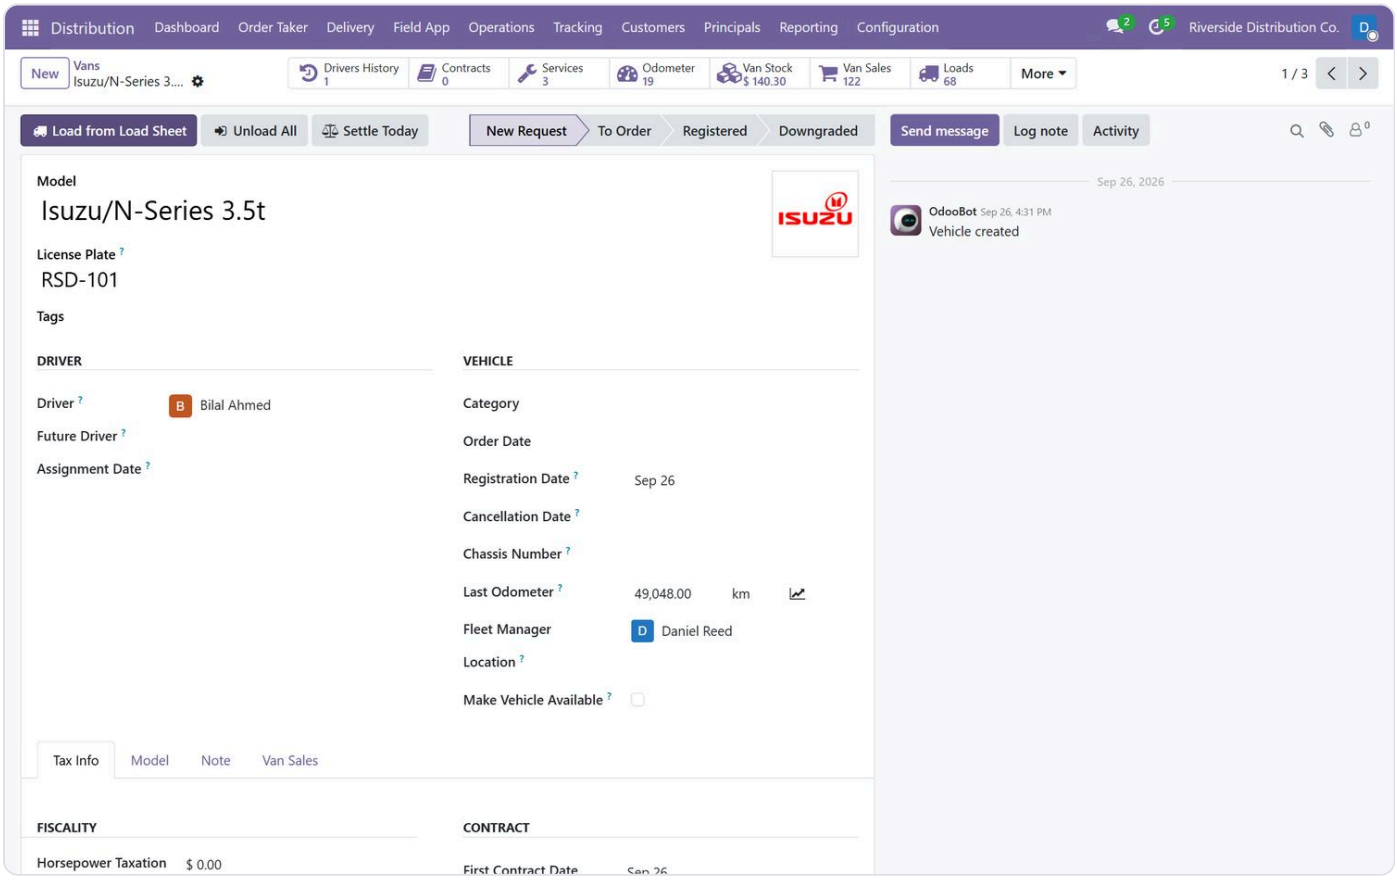

The **Credit Risk** tab ENTERPRISE shows the score, the band and why. The **Principal** tab links a shop to principals where needed.

4.7 Products: focus lines, cartons, brands, barcodes ALL EDITIONS

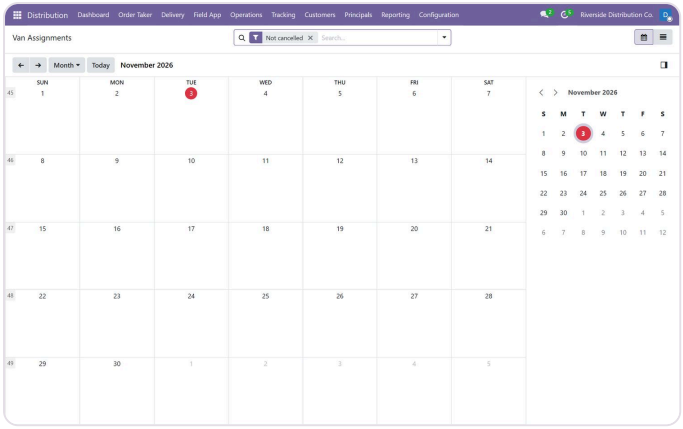

ALL EDITIONS **Sales > Products.** Normal Odoo products: price, tax, cost, barcode. Tick **Focus product** and add a short message to push a line this week; it then shows first on every phone. In Enterprise, add a carton unit (for example Carton of 24) with its own barcode, and set the **Brand**; the principal follows from the brand.

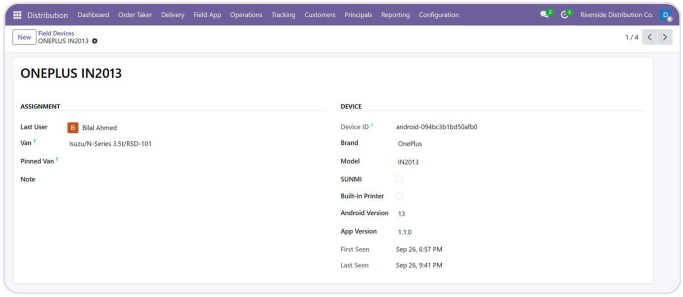

4.8 Vans, van days and phones VAN SALES AND UP

VAN SALES AND UP **Operations > Vans.** Each van is an Odoo Fleet vehicle marked as a distribution van, with a home warehouse, a default route and a driver; its stock location is created under the warehouse on the first load. Buttons load the van from the load sheet, unload everything and settle the day. Smart buttons show van stock, van sales and loads.

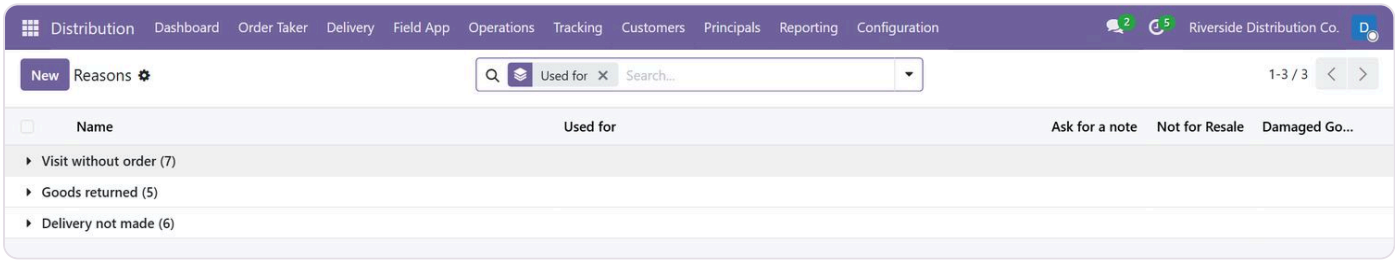

ENTERPRISE **Van Assignments**: which van, driver and route on which day, with the odometer out and in.

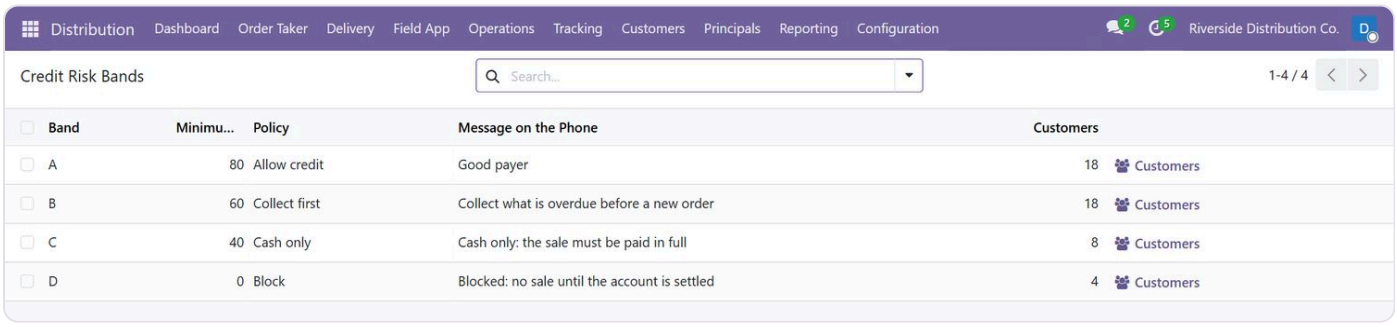

ENTERPRISE **Configuration > Field Devices**: each phone or SUNMI handheld with its last user, van, printer and app version. Pin a device to a van to see when it is used on another van.

4.9 Reasons ALL EDITIONS

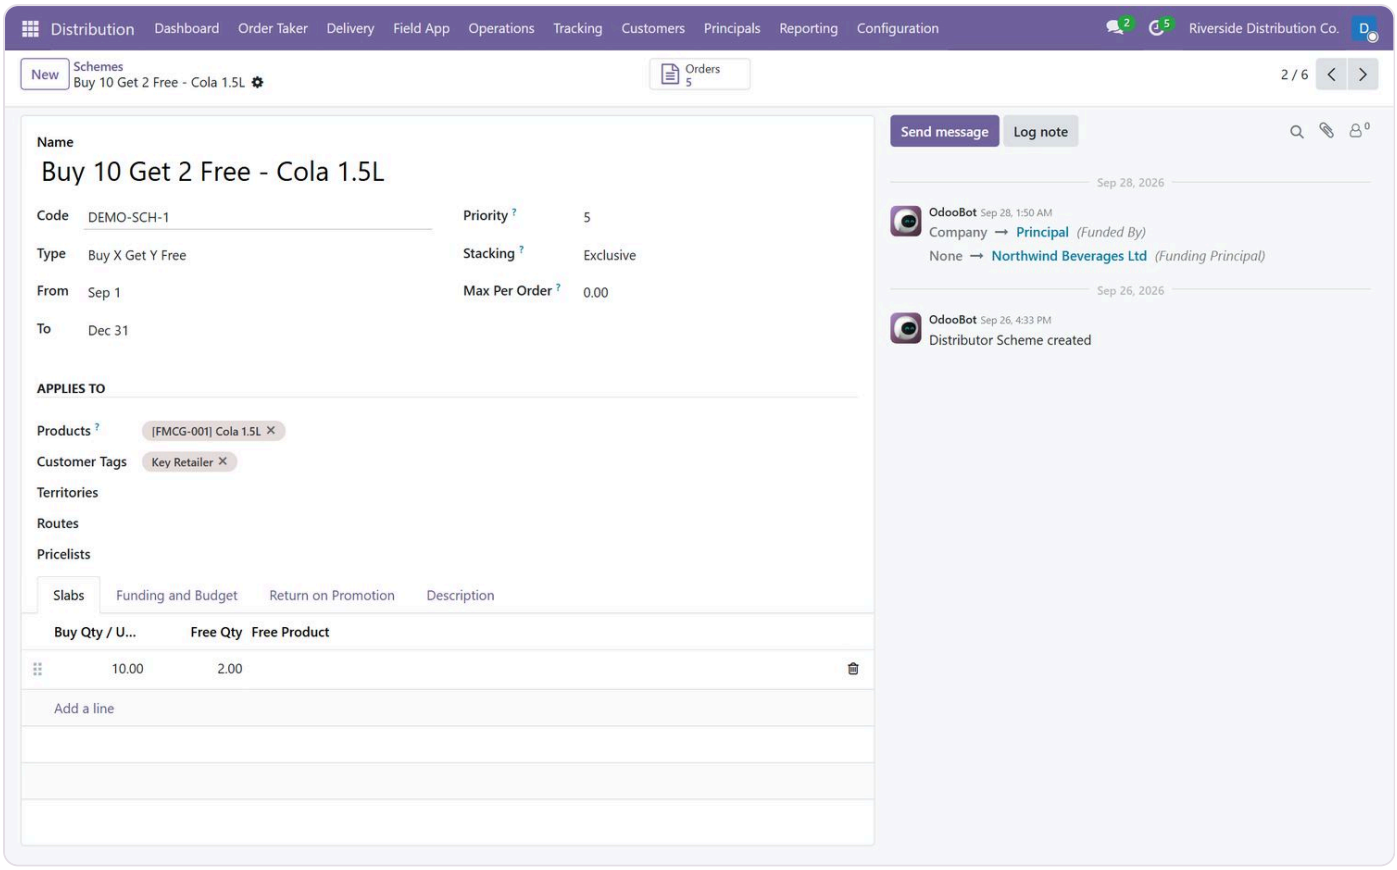

ALL EDITIONS **Configuration > Reasons.** The lists the phone offers when a shop does not order, a delivery is not made or goods come back. Mark a reason "ask for a note", or, for returns, "not for resale" (goes to quarantine) or damaged (scrapped).

4.10 Credit risk bands ENTERPRISE

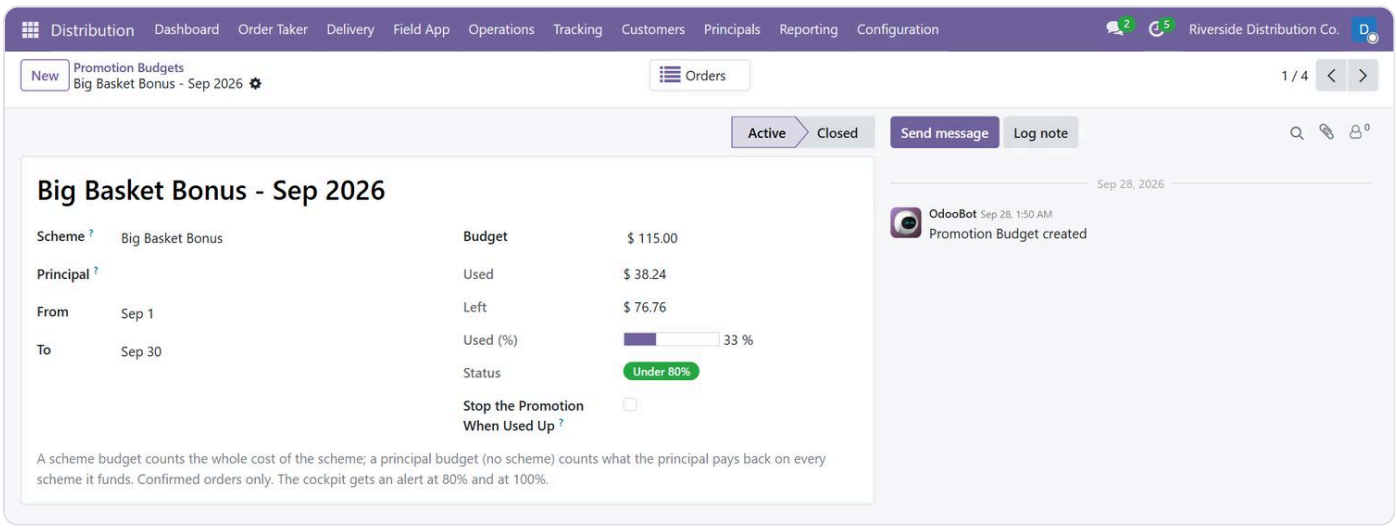

ENTERPRISE **Configuration > Credit Risk Bands.** Every night each shop gets a score from 0 to 100 from days paid late, overdue share, bounced cheques, broken promises and its trend. The score gives band A, B, C or D, (or straight away with **Score now**), and each band has a policy: Allow credit, Collect first, Cash only or Block, with the exact message the salesperson sees.

4.11 Promotions and budgets ENTERPRISE

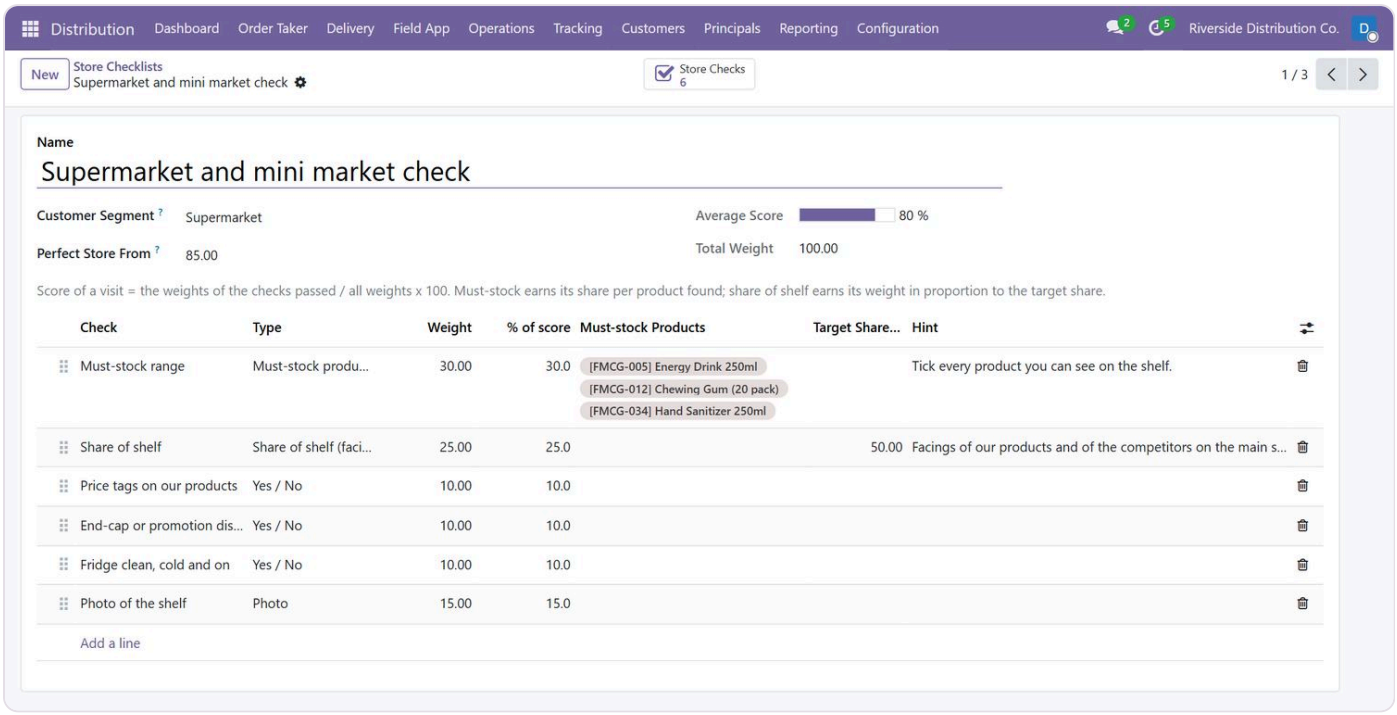

ENTERPRISE **Configuration > Schemes.** Four types: buy X get Y free, quantity slab discount, amount slab discount and bundle price. Limit it to products, customer tags, territories, routes or price lists, with dates, a maximum per order and stacking rules. The **Funding and Budget** tab says who pays: the company, a principal or shared.

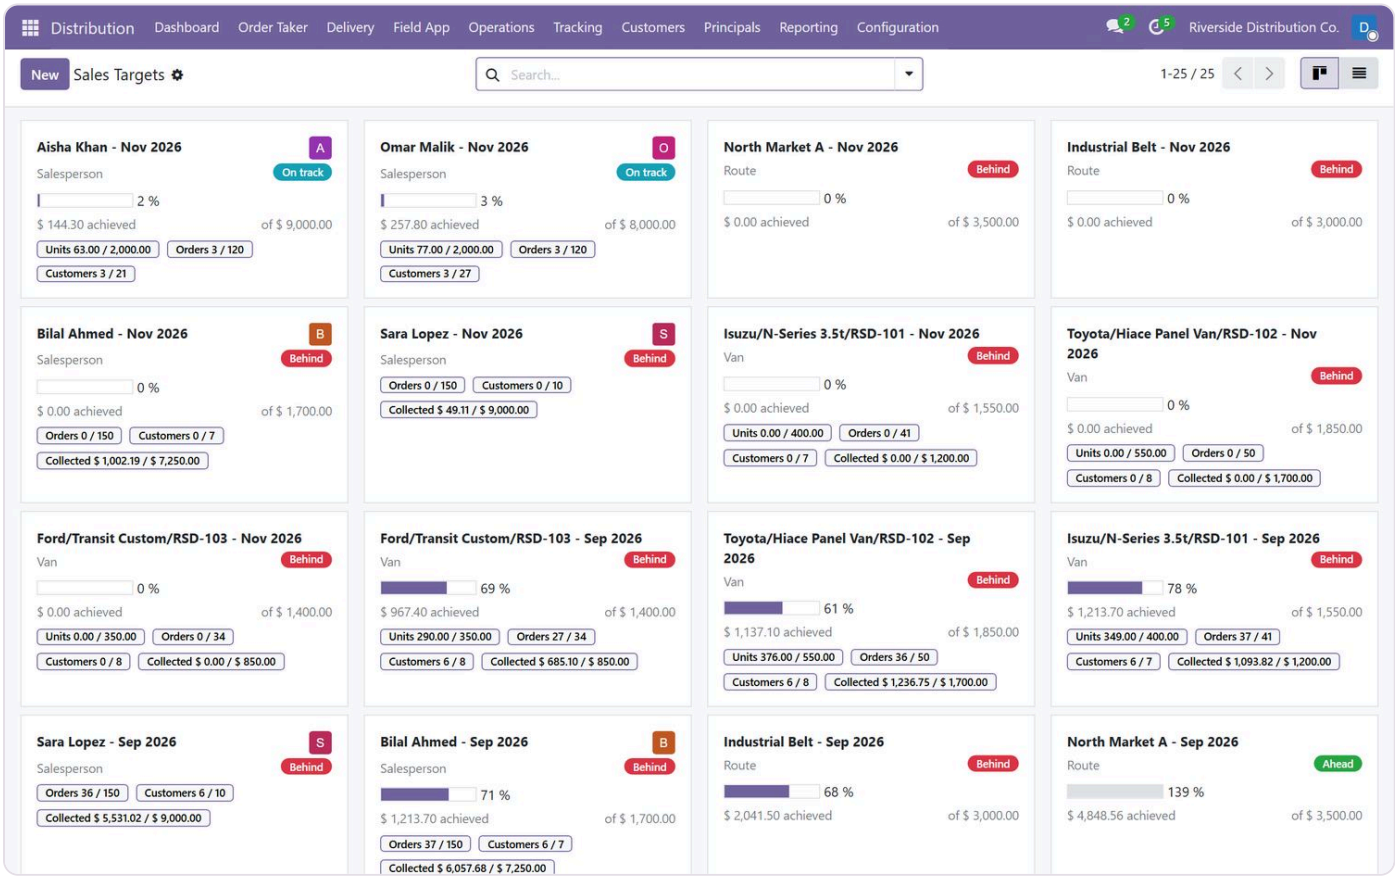

ENTERPRISE **Principals > Promotion Budgets.** A budget for a period with used, left and status. The manager gets an alert at 80% and 100%, and a promotion can stop by itself when its budget is used up.

4.12 Store checklists (perfect store) ENTERPRISE

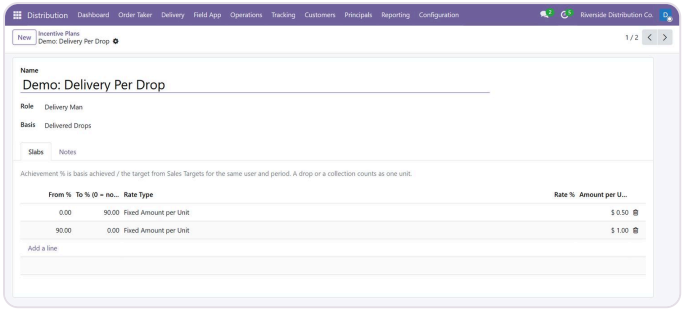

ENTERPRISE **Configuration > Store Checklists.** One checklist per shop type: must-stock products, share of shelf against a target, yes or no questions and photos, each with a weight. Set the score that counts as a perfect store.

4.13 Monthly targets ALL EDITIONS

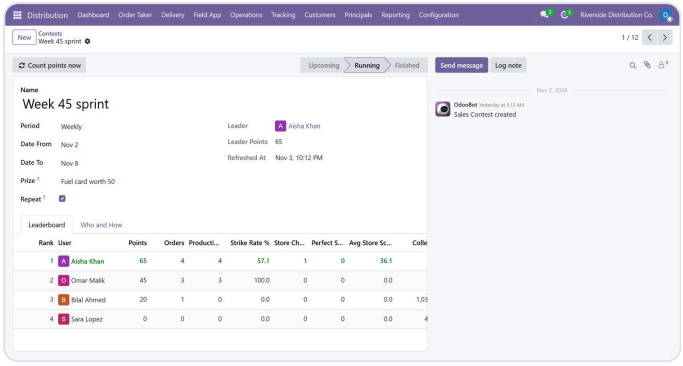

ALL EDITIONS **Reporting > Sales Targets > New.** Pick a salesperson, a route or ENTERPRISE a van, the dates and the target amount. Optional: orders, units, shops served and collections, and in Enterprise one brand or principal. Progress fills in by itself and each person sees it on the phone.

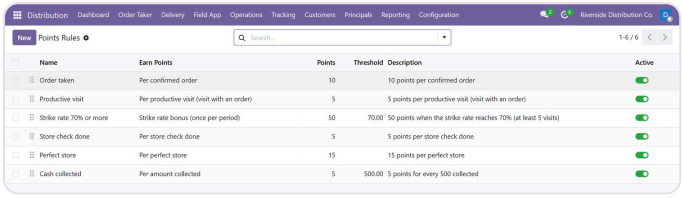

4.14 Incentives, points, badges and contests ENTERPRISE

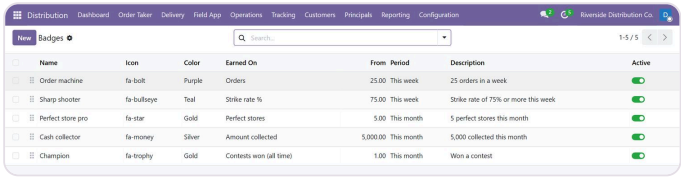

ENTERPRISE **Incentive Plans**: pay a percentage of sales or collections by achievement slab, or an amount per delivered drop.

ENTERPRISE **Reporting > Contests**: weekly or monthly contests with a prize and a live leaderboard.

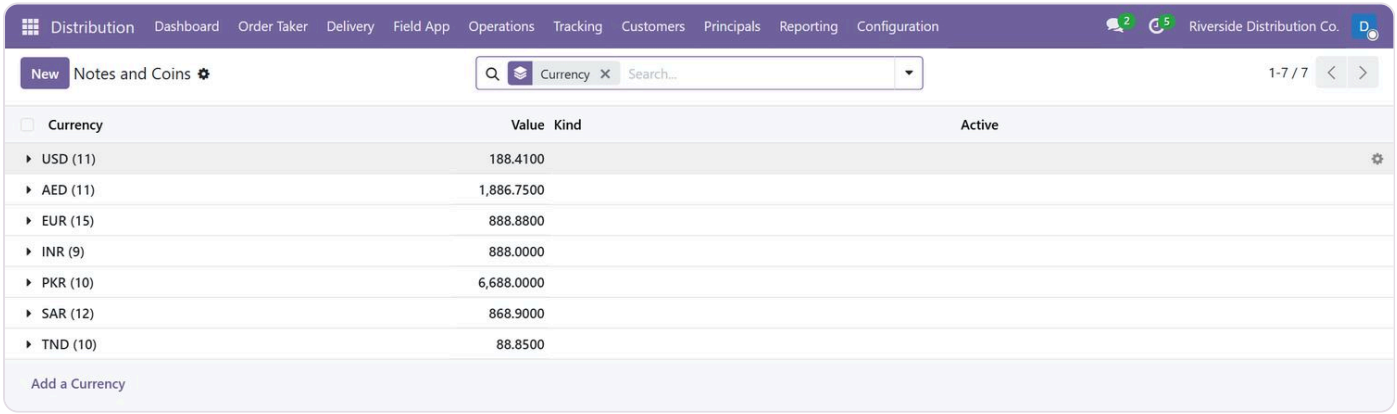

ENTERPRISE **Points Rules**: points for orders, productive visits, collections and store checks.

ENTERPRISE **Badges**: order machine, sharp shooter, perfect store pro, cash collector, champion.

4.15 Notes and coins ENTERPRISE

ENTERPRISE **Configuration > Notes and Coins.** List your currency's notes and coins once. Cash counts on the phone and in the back office then count by note, so the total is never typed by hand.

4.16 Put the app on the phones ENTERPRISE

Each person opens **yourdomain/field** on the phone, signs in and adds it to the home screen (Safari: Share > Add to Home Screen; Chrome: Install). It opens full screen with your logo. For SUNMI handhelds with a built-in printer, install the Android app from More > Get the Android app. In Base and Van Sales, staff open Distribution > Order Taker or Delivery in the phone browser.

HOW IT WORKS

How the credit score works

Every night, or at once with **Score now**, each shop gets a score from 0 to 100 built from the last 12 months: average days it paid late, the share of its balance that is overdue, bounced cheques, broken promises to pay, and whether it is paying better or worse lately.

The score gives the band: on the demo A is 80 and above (allow credit), B 60 and above (collect first), C 40 and above (cash only), D below (block). You set the minimum score, the policy and the phone message of each band. A blocked shop gets no suggested order and an Ask manager button.

HOW IT WORKS

How a promotion is applied and paid for

1. A scheme says what the shop gets: free goods, a slab discount or a bundle price.
2. It applies by itself in van sales, the counter, the order taker app and quotes, when the order matches the products, tags, territory, route or price list and the dates. Stacking and a maximum per order are respected.
3. Each promotion line stores its cost: free goods at real cost, discounts at the value given away.
4. The funder decides who pays: the company, a principal, or shared by a percentage. The principal's share is claimed back (Part 14).

PART 5

Base and Van Sales: the Order Taker and Delivery apps

Without Enterprise, the field team works in two apps that open inside Odoo: **Distribution > Order Taker** and **Distribution > Delivery**. They are built for the phone browser and need a connection. Add them to the phone's home screen for one-tap access. Screens from the Base demo, distributor-base.way4tech.com.

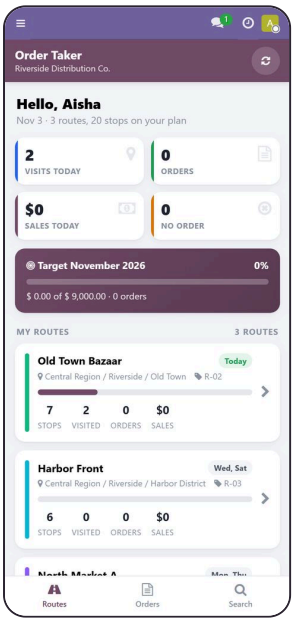

IN THIS PART YOU WILL LEARN

- How an order taker works in Base
- How a driver delivers, part delivers, skips and collects in Base
- What the Van Sales add-on adds: My Van, Sell from van, receipts
- What the Base manager dashboard shows

TRY IT YOURSELF ON THE DEMO

1. On distributor-base.way4tech.com sign in as aisha, open Order Taker, start a visit on Old Town Bazaar and place an order.
2. Sign in as bilal, open Delivery, open the same route and deliver that order with a signature.
3. Open Summary to see the delivered value and what is still unpaid.

The order taker in Base ALL EDITIONS

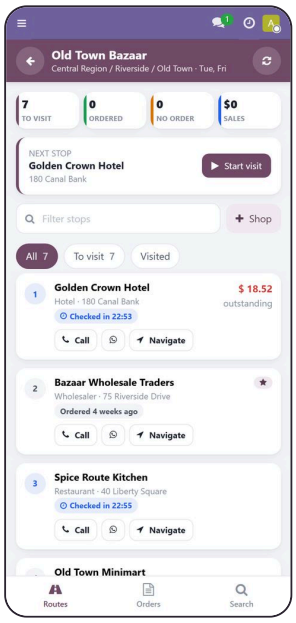

1 ALL EDITIONS

Home

Visits, orders, sales and no-orders today, this month's target with a progress bar, and the routes, with "Today" on those scheduled today. Tabs at the bottom: Routes, Orders, Search.

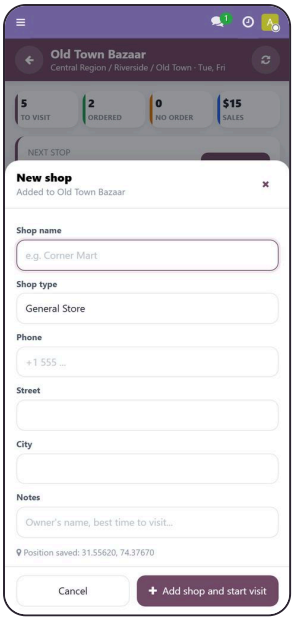

End my day stops the day.

2 ALL EDITIONS

A route

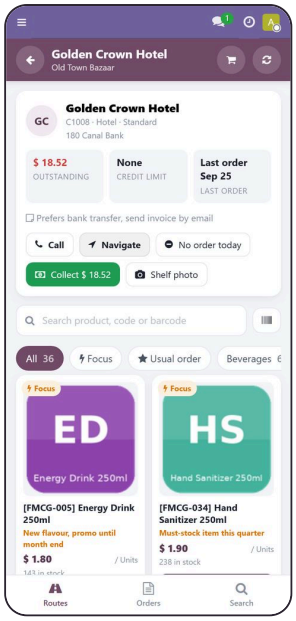

To visit, ordered, no order and sales. **Next stop** with **Start visit**, a filter, and the stops in visiting order with what each owes, Call, WhatsApp and Navigate. Visited shops show "Checked in" with the time.

3 ALL EDITIONS

A new shop

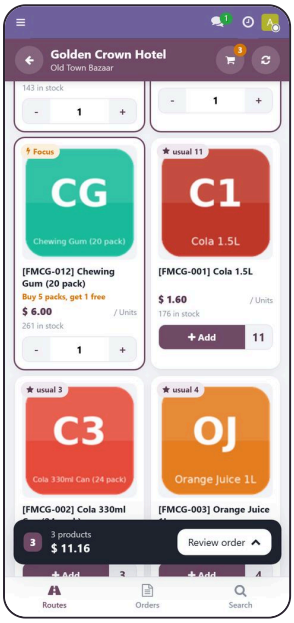

+ Shop: name, type, phone, street, city and notes. The GPS position is saved; **Add shop and start visit** puts it last on the route and opens it.

4 ALL EDITIONS

At the shop

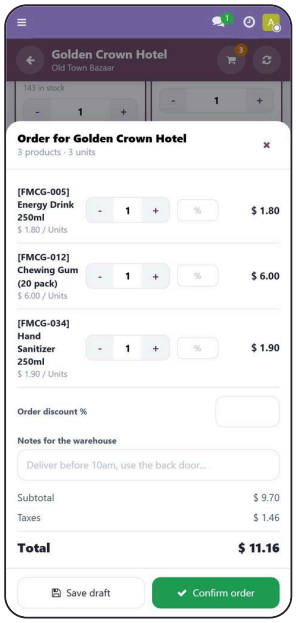

Opening a shop checks in. Outstanding, credit limit, last order and the shop note; Call, Navigate, **No order today** (pick a reason), **Collect** older dues and **Shelf photo**.

5 ALL EDITIONS

Pick products

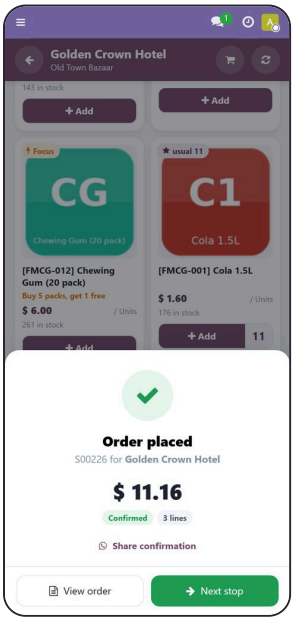

Search, scan with the camera, filter by category, Focus or Usual order. Steppers on every product; "usual 11" is what this shop normally takes. The bar shows the running total and **Review order**.

6 ALL EDITIONS

Review and confirm

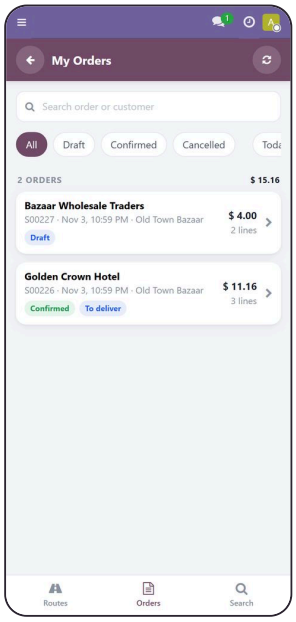

Quantity and discount % per line, an order discount, notes for the warehouse, totals with tax. **Save draft** or **Confirm order**. Discounts above the allowed maximum and orders over the credit limit are refused.

7 ALL EDITIONS

Order placed

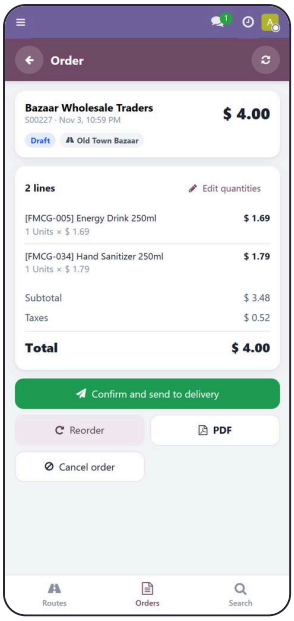

The order number, total and status. **Share confirmation** on WhatsApp, **View order** or **Next stop**. With Confirm Orders Immediately off, the order waits as a quotation for the office.

8 ALL EDITIONS

My orders

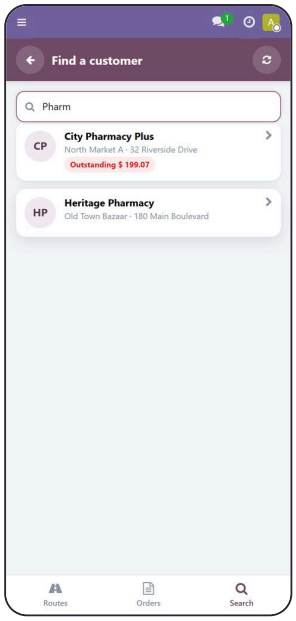

Filter by All, Draft, Confirmed or Cancelled and by Today, 7 days or 30 days, or search by order or customer.

9 ALL EDITIONS

Change, send or cancel

A draft can be edited (**Edit quantities**), sent with **Confirm and send to delivery**, or cancelled. **Reorder** copies it into a new cart; **PDF** opens the order.

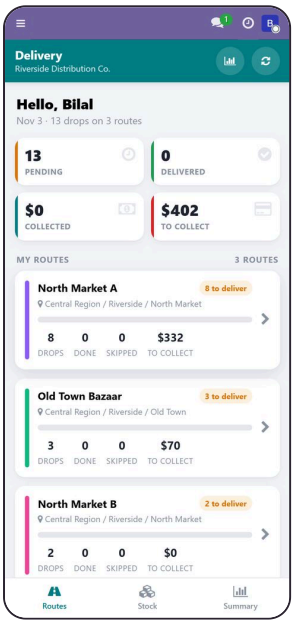

10 ALL EDITIONS

Find any customer

The Search tab finds a shop on any of your routes by name, code or phone, with what it owes, for a shop that calls in outside its day.

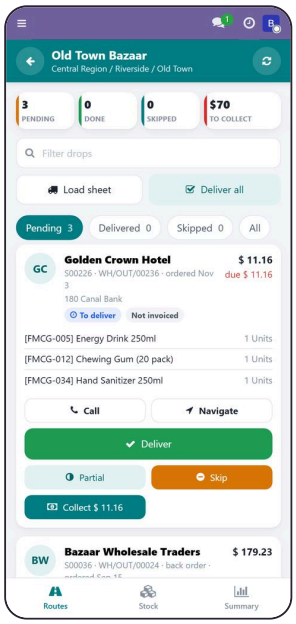

The delivery driver in Base ALL EDITIONS

What to load for the route with drops and stock on hand. **Load sheet PDF** and **Manifest PDF** print for the van.

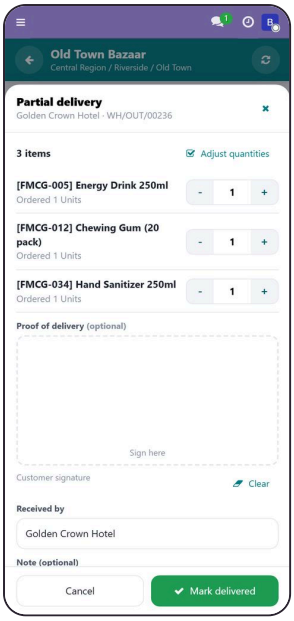

14 ALL EDITIONS

Confirm delivery

The items, the customer signs in the box, who received it and a note. **Adjust quantities** for a short drop. **Mark delivered** validates the Odoo transfer.

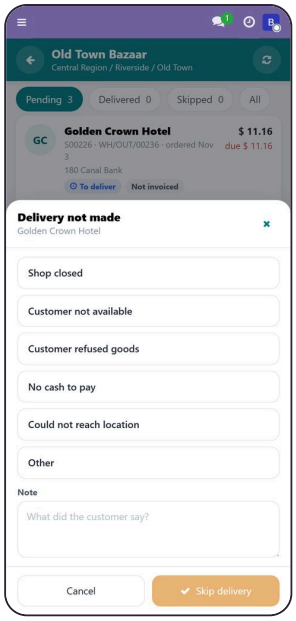

With Proof of Delivery on, the signature is required.

15 ALL EDITIONS

Partial delivery

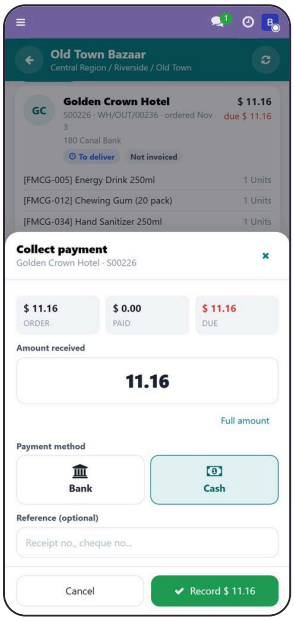

Lower the quantities of the lines not delivered. Odoo makes a back order, which appears as a new drop on the route.

16 ALL EDITIONS

Delivery not made

Shop closed, customer not available, refused, no cash, could not reach, or other with a note. The reason is logged on the transfer for the warehouse.

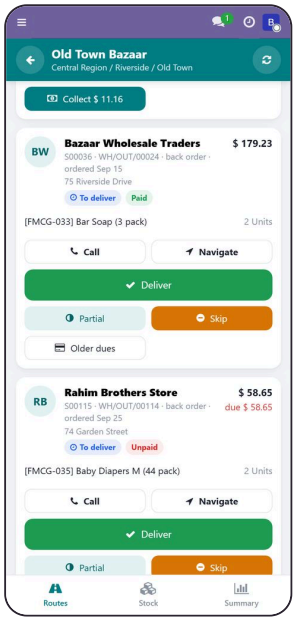

17 ALL EDITIONS

Collect payment

Order, paid and due. Amount received (Full amount fills it), Bank or Cash, a reference. Odoo creates the invoice, registers the payment and reconciles it.

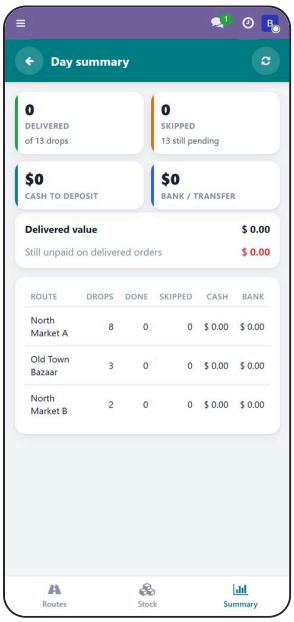

With Require Payment at Delivery on, a drop cannot close unpaid.

18 ALL EDITIONS

Older dues

Collect the shop's earlier invoices at the same stop, oldest first.

19 ALL EDITIONS

Day summary

Delivered and skipped, cash to deposit, bank, delivered value and what is still unpaid, per route. Check it before going back to the warehouse.

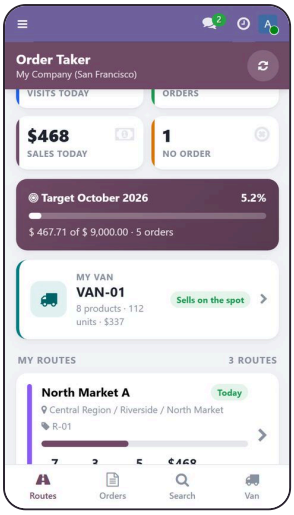

20 ALL EDITIONS

Stock

What is on hand to deliver from, searchable.

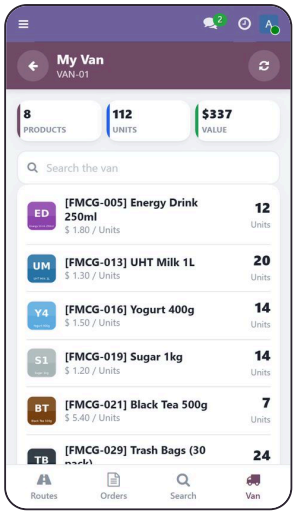

What Van Sales adds to these apps VAN SALES AND UP

21 VAN SALES AND UP

The van card

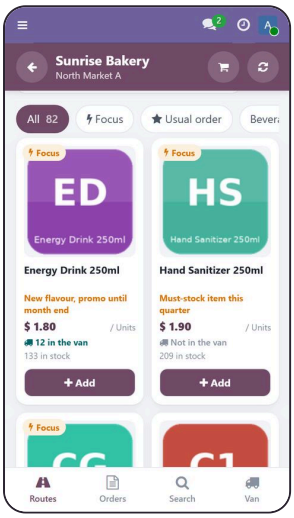

An order taker who drives a van sees **My Van** above the routes: the van, products, units, value and "Sells on the spot". A Van tab is added at the bottom.

22 VAN SALES AND UP

My Van

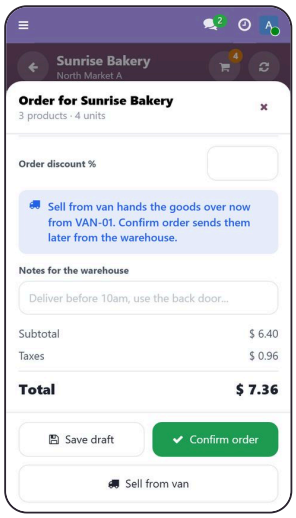

Every product in the van with its quantity, searchable. Buttons ask the warehouse for goods, or **Hand back all** to create the evening unload for the storekeeper.

23 VAN SALES AND UP

How many are in the van

Each product shows how many are in the van as well as in the warehouse.

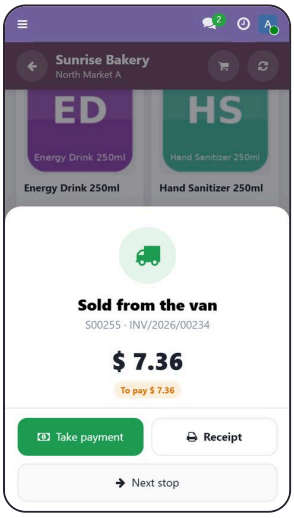

24 VAN SALES AND UP

Sell from van

The cart has **Sell from van**: the goods are handed over now, from the van. Confirm order still sends them later from the warehouse.

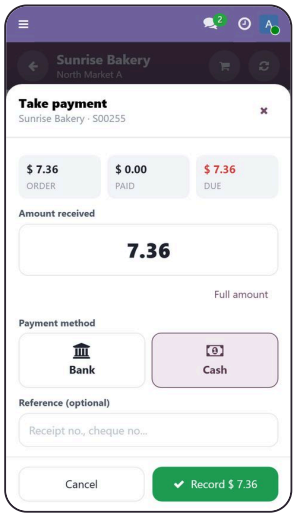

If the van is short, the sale is refused and nothing is saved.

25 VAN SALES AND UP

Sold from the van

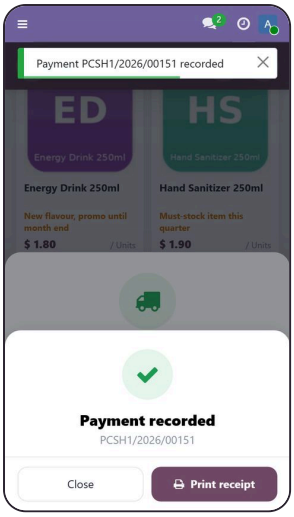

Order, delivery from the van and invoice are done in one step. **Take payment**, **Receipt** or Next stop. Unpaid amounts stay on the account within the credit limit.

26 VAN SALES AND UP

Take payment

The usual payment sheet: amount received, Bank or Cash, a reference.

27 VAN SALES AND UP

Payment recorded

The payment number, and **Print receipt**.

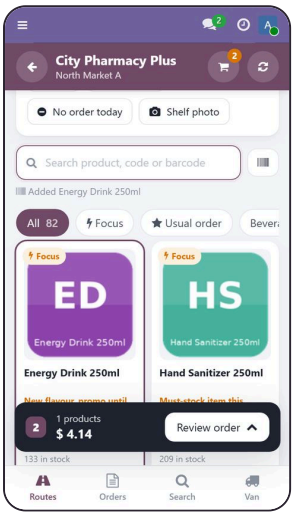

28 VAN SALES AND UP

58 or 80 mm receipt

Sales receipt with the van, route and who served, and the paid amount and balance. Print, PDF, or Back. Payment receipts list the invoices they settle.

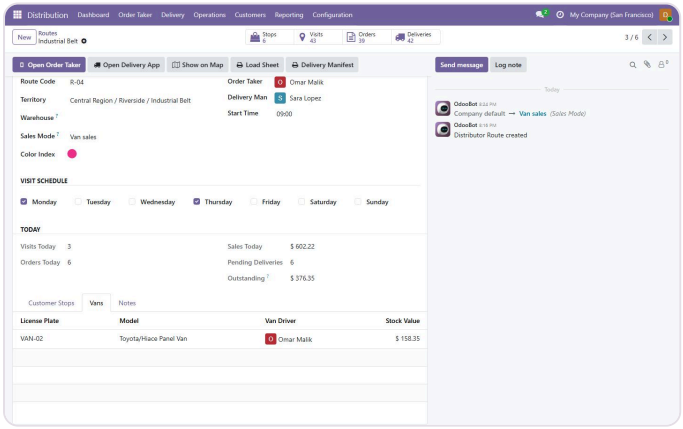

Paper width and footer are in Settings.

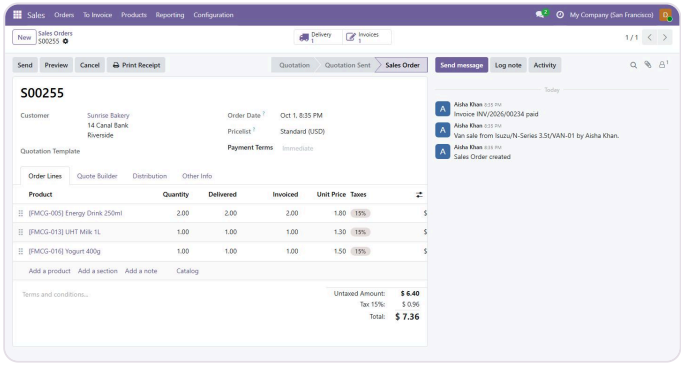

29 VAN SALES AND UP

Typing scanners

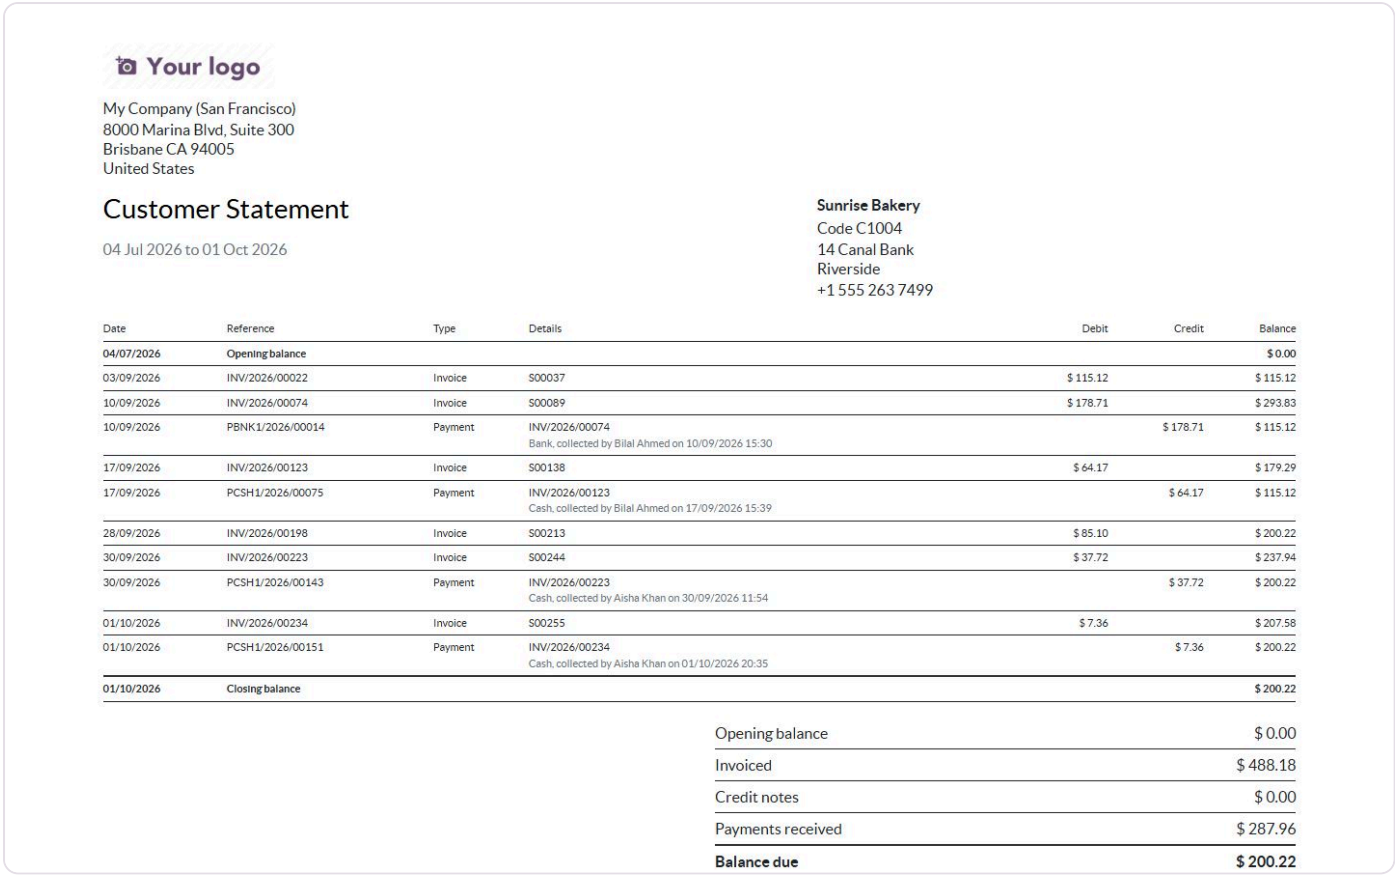

USB, Bluetooth and SUNMI scanners type the barcode and press Enter: the product goes straight into the cart ("Added Energy Drink 250ml"). The camera scan still works.

VAN SALES AND UP **Sales mode per route**: a route set to van sales, with its vans. Routes set to both keep pre-sale orders, and their drops can leave from the driver's van.

VAN SALES AND UP **A van sale in the back office**: tagged with the van and sale type, with **Print Receipt**.

Balance due	**$ 200.22**

VAN SALES AND UP **Customer statement** from the customer form: opening balance, invoices, credit notes, payments with who collected them, returns and the closing balance, as A4 PDF or on receipt paper. Returns go back into the van they left from, with a posted credit note.

The manager in Base ALL EDITIONS

ALL EDITIONS **Distribution > Dashboard** in Base: sales, orders, visits and strike rate today and this month, pending and skipped deliveries, cash collected and outstanding, the sales trend, sales by route, top products, the order taker leaderboard against targets and the reasons shops did not order. Every tile opens its list.

Everything else the Base manager uses is in Part 4 (setup) and in the back office lists that every edition shares: Routes, Visits, Field Orders, Deliveries, Collections, Customers, Sales by Route, Visit Analysis and Sales Targets (Part 12).

> The Van Sales phone screenshots in this part come from the Van Sales store listing demo, so they show a different company name.

PART 6 The order taker, step by step

Log in as `aisha` on a phone. Aisha visits shops on her routes and books orders; a delivery driver brings the goods later. The home screen has the same eight big tiles in every role; everything else is under **More tools**.

IN THIS PART YOU WILL LEARN

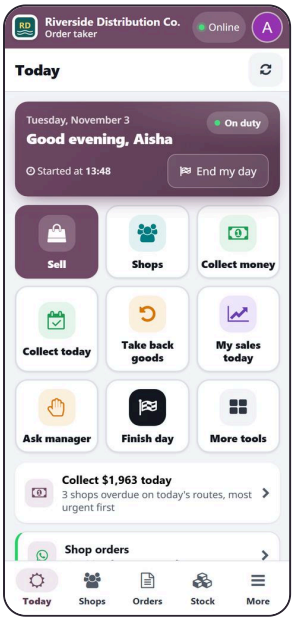

- How a salesperson runs a full day from the phone
- How the suggested order is worked out
- How credit bands change what the rep can do
- How store checks, reorder links and Ask manager work
- How collections, promises and statements are handled

TRY IT YOURSELF ON THE DEMO

1. As aisha, open Old Town Bazaar, then Spice Route Kitchen. Open the suggested order and read the reason on each line.
2. Add a product, switch it to Carton, review and confirm the order.
3. Open Heritage Pharmacy and record a promise to pay for next week.
4. Open Bazaar Wholesale Traders and see why you cannot sell there.
5. Do a store check at Sweet Tooth Confectionery and watch the score ring.

A visit, start to finish ENTERPRISE

1. **Check in** — opening the shop records time and GPS
2. **Look** — what it owes, its band, its note
3. **Check the shelf** — store check or shelf photo
4. **Order** — suggested order, catalogue, discounts
5. **Or say why not** — a reason closes the visit
6. **Collect** — old bills, or a promise

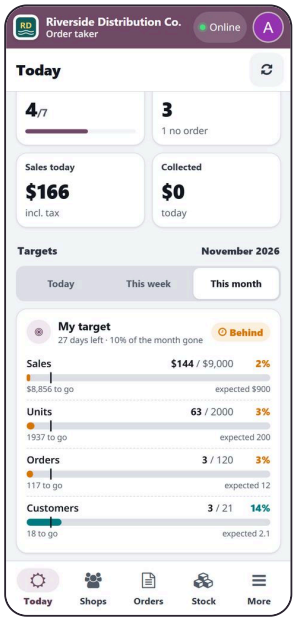

1 ENTERPRISE

Start the day

The home screen greets her with the date and **Start my day**. Once on duty, the phone records visits and position until **End my day**. Tiles: Sell, Shops, Collect money, Collect today, Take back goods, My sales today, Ask manager, Finish day, More tools.

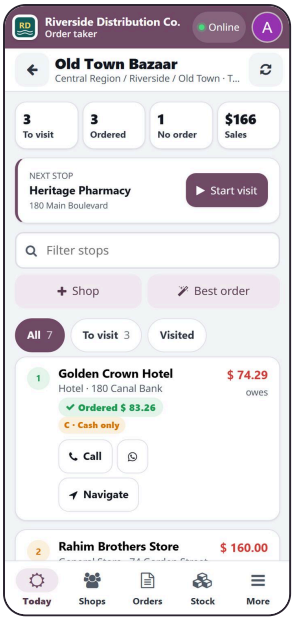

Position is only recorded while on duty.

2 ALL EDITIONS

Her targets, live

Lower on the home screen: sales, units, orders and shops against this month's target, what is left, and where she should be by today. Switch between today, this week and this month.

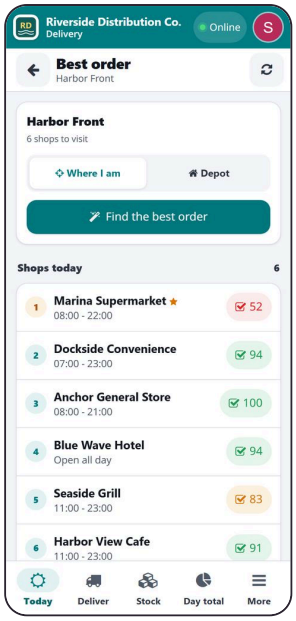

3 ALL EDITIONS

Today's route

Tap the route. The top shows shops to visit, orders, no-orders and sales. **Next stop** says where to go; each shop shows what it owes, its credit band and Call, WhatsApp and Navigate.

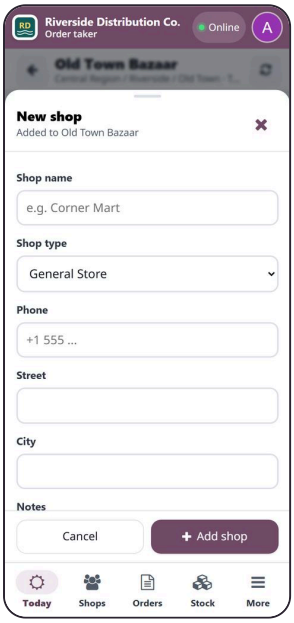

Navigate hands the address to the phone's map app.

4 ENTERPRISE

Best order for the day

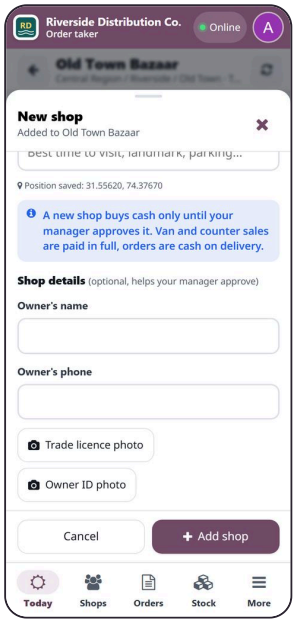

More tools > Best order reorders today's shops from where you are or from the depot, around opening hours, and shows the km saved. It works offline.

5 ALL EDITIONS

A new shop on the road

+ Shop on the route: name, type, phone, address and notes. The GPS position is saved. The shop joins the route and the visit starts.

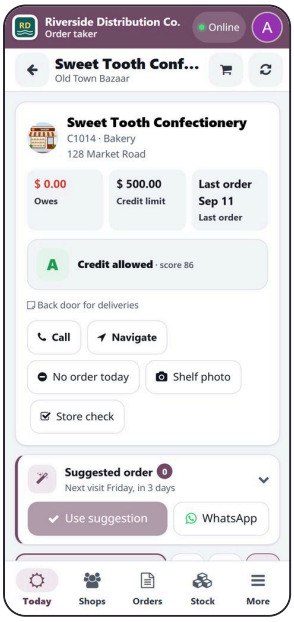

6 ENTERPRISE

New shop details

Optional owner name and phone, and photos of the trade licence and the owner's ID. A new shop buys cash only until the manager approves it.

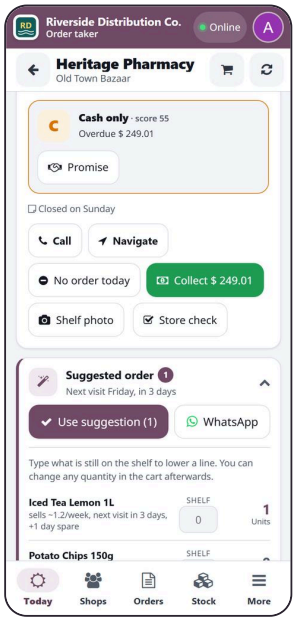

Approval is in Part 11.

7 ALL EDITIONS

At the shop

Opening the shop checks her in. The card shows what the shop owes, its credit limit, its last order, the credit band and the note "back door for deliveries". From here: No order today, Shelf photo, Store check, or a suggested order.

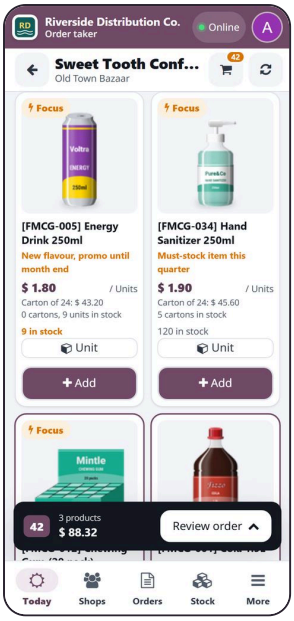

8 ENTERPRISE

Suggested order

Each line says why: "sells about 1.2 a week, next visit in 3 days, plus 1 day spare". Type what is still on the shelf to lower a line, then **Use suggestion** fills the cart.

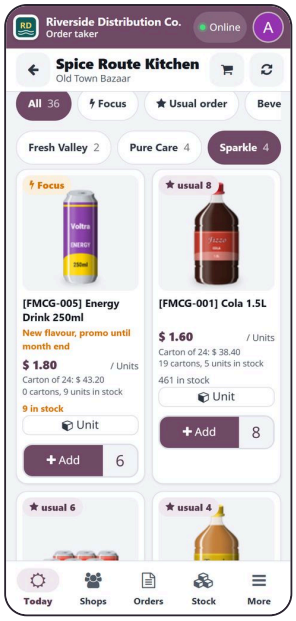

The rep can explain every quantity to the owner.

9 ALL EDITIONS

The catalogue

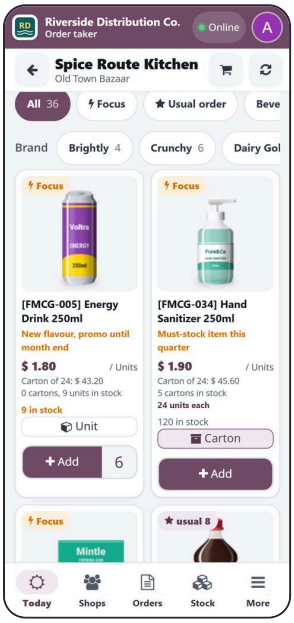

Focus products come first with their message. Each product shows the price, the carton price and stock. Filter by category, Focus or Usual order, search, or scan a barcode with the camera.

10 ENTERPRISE

Brands

The Brand row filters the catalogue to one brand, with the number of products of each.

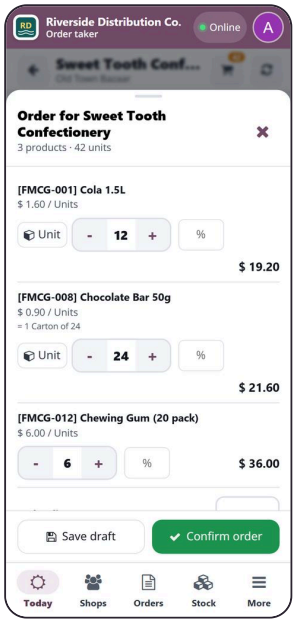

11 ENTERPRISE

Units or cartons

Switch any line between Unit and Carton. The carton price and stock in cartons are shown; scanning a carton barcode adds a carton.

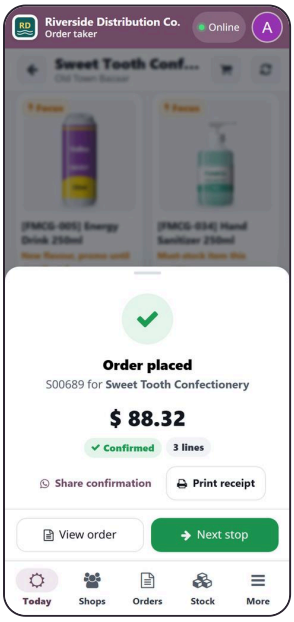

Receipts print "2 Carton of 24 (48 Units)".

12 ALL EDITIONS

Review the order

Change quantities, give a line or order discount up to the allowed maximum, add a note for the warehouse. **Save draft** or **Confirm order**. Totals include tax as Odoo computes it.

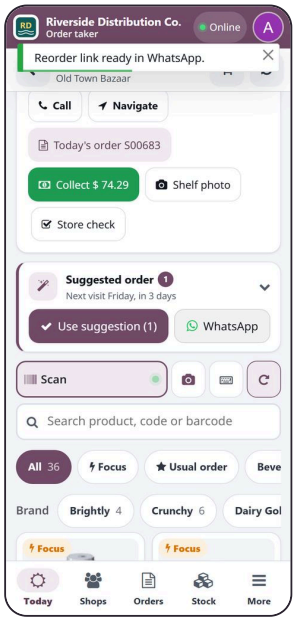

13 ALL EDITIONS

Order placed

The order is in Odoo at once (S00689, $88.32). Share the confirmation on WhatsApp, print a receipt, or go to the next stop. Promotions that apply are added automatically.

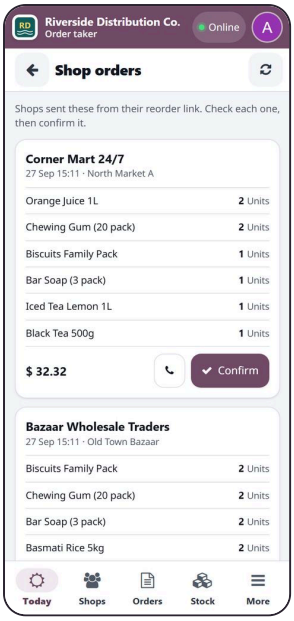

The warehouse sees it for tomorrow's delivery.

14 ENTERPRISE

WhatsApp reorder link

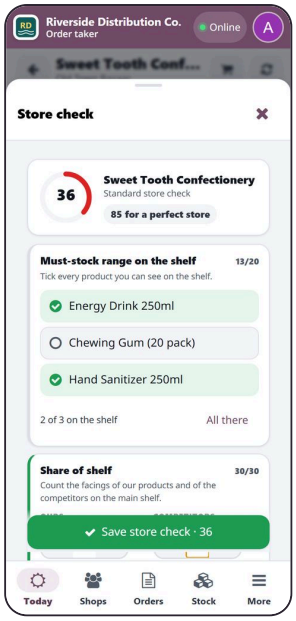

The WhatsApp button sends the shop its own reorder page: its usual products, quantities to change, one Send button, no login. The link expires after 7 days.

15 ENTERPRISE

Shop orders to confirm

What shops send from their link lands in **More tools > Shop orders**. Check it and **Confirm**, or a van seller can sell it straight from the van.

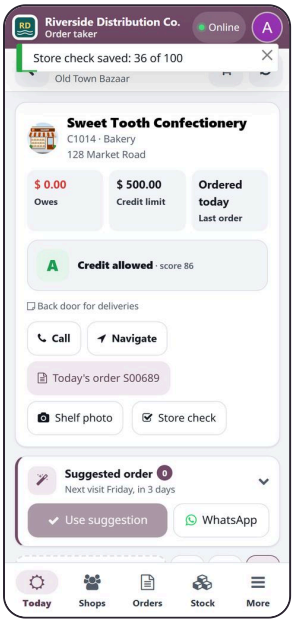

16 ENTERPRISE

Store check

Tick the must-stock products seen on the shelf, count our facings against competitors, answer the yes or no questions and take the shelf photo. The ring shows the score as she goes.

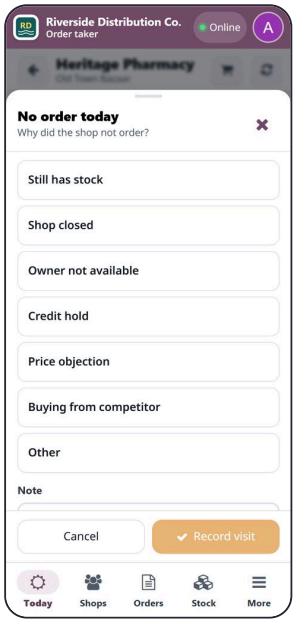

Brands pay for shelf presence. This proves it.

17 ENTERPRISE

Score saved

Store check saved with its score out of 100. **Shelf photo** on the shop card adds a photo to the visit at any time, in every edition.

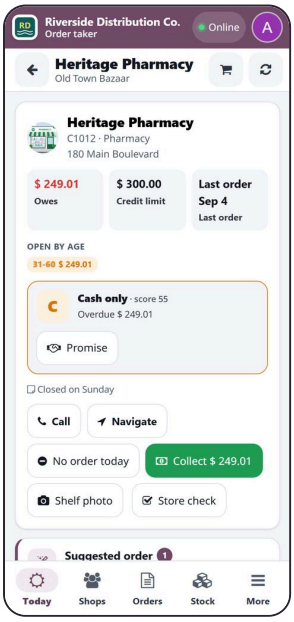

18 ALL EDITIONS

No order? Say why

Pick a reason: still has stock, shop closed, owner away, credit hold, price, buying from a competitor, other with a note. The visit still counts.

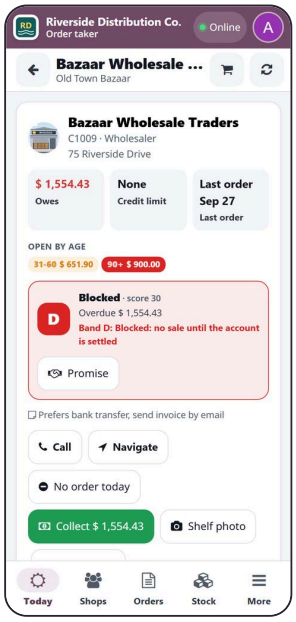

"Price objection" ten times on one route is a pricing problem.

19 ENTERPRISE

A shop that pays late

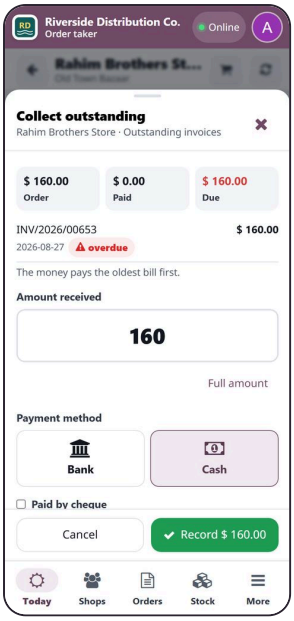

Heritage Pharmacy owes $249 for 31 to 60 days: band C, cash only. The open amount is shown by age. **Collect** and **Promise** are on the card.

20 ENTERPRISE

A blocked shop

Band D: no sale until the account is settled, and no suggested order. She can collect money, or ask the manager for an exception.

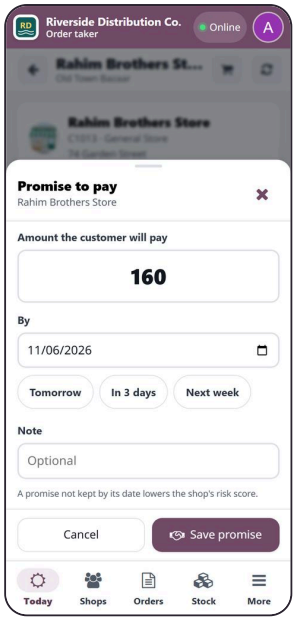

21 ALL EDITIONS

Collect money

The open invoices, oldest first, and the amount received. Cash, bank or (Enterprise) a cheque. The money always pays the oldest bill first; part payments are fine.

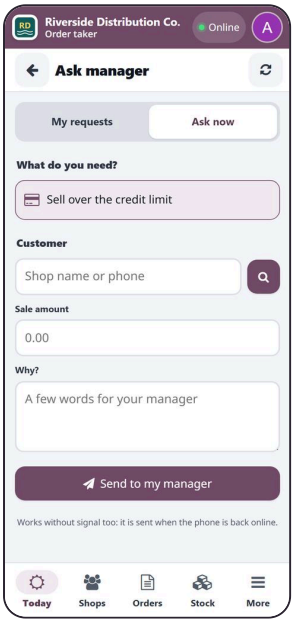

Every payment records who collected it and when.

22 ENTERPRISE

Promise to pay

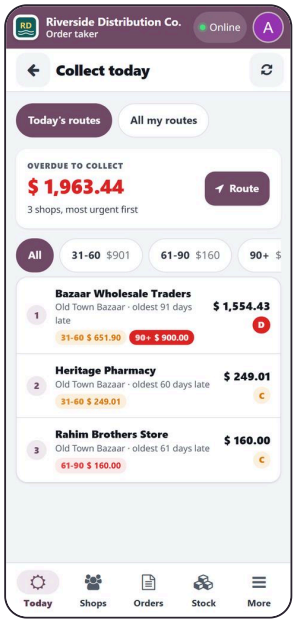

Record how much the shop will pay and by when (Tomorrow, In 3 days, Next week). A broken promise lowers the shop's score.

23 ENTERPRISE

Ask the manager

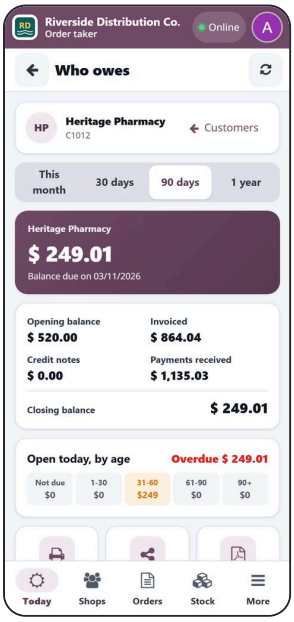

Ask manager > Ask now: a sale over the credit limit, or a big return, with the amount and a reason. The answer comes back to the phone. It works without signal too.

24 ENTERPRISE

Collect today

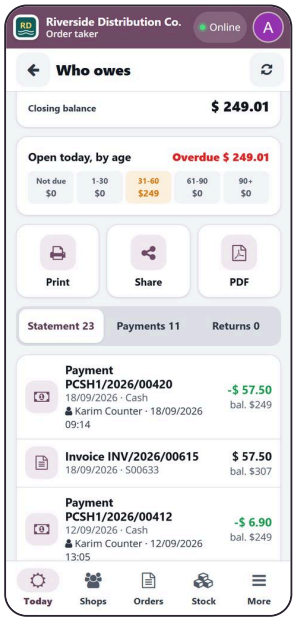

Who owes money on today's routes, most urgent first, filtered by age. Route opens them in the best order.

25 VAN SALES AND UP

Who owes, and the statement

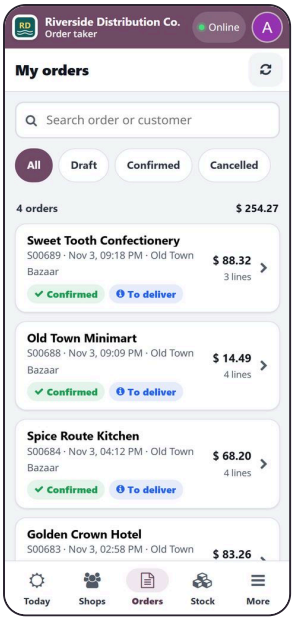

More tools > Who owes lists shops by what they owe. Open one for its balance, opening balance, invoices and payments for this month, 30 or 90 days or a year.

26 VAN SALES AND UP

Statement on the phone

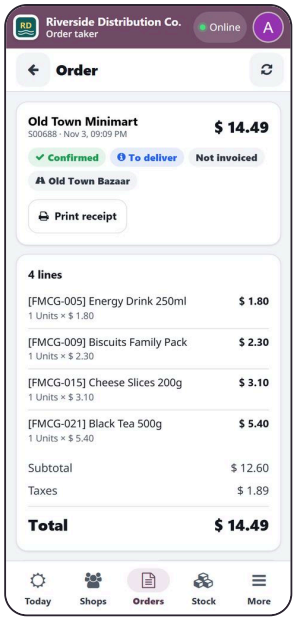

Every invoice and payment with who collected it and when. Print it on the receipt printer, share it, or open a PDF.

27 ALL EDITIONS

My orders

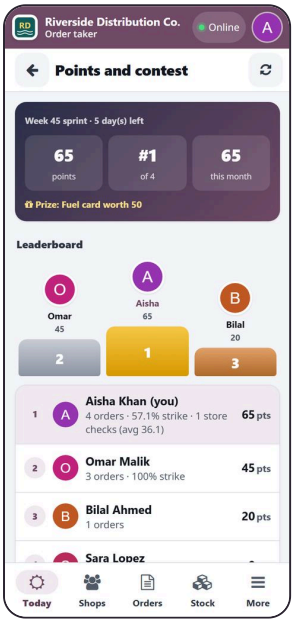

The Orders tab: today, 7 or 30 days, filtered by draft, confirmed or cancelled, with delivery status.

28 ALL EDITIONS

An order

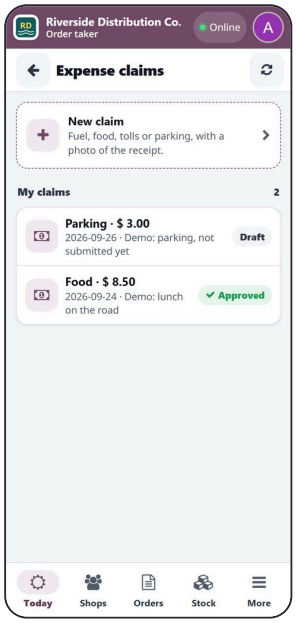

Open an order to see its lines and status, print the receipt, change or cancel a draft, or reorder.

29 ENTERPRISE

Points and contest

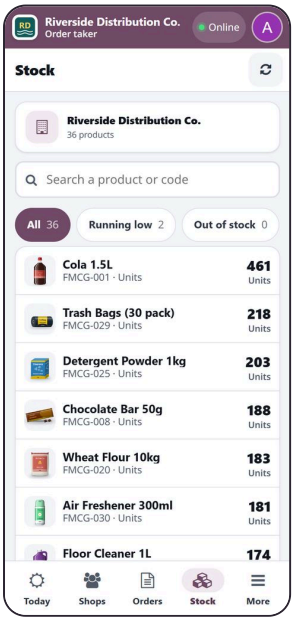

Her points, rank and this week's contest prize, the podium and the badges she is close to.

30 ENTERPRISE

Expense claims

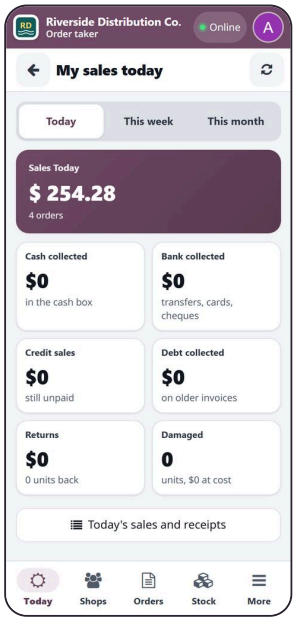

Fuel, food, tolls or parking with a receipt photo. Each claim shows draft, waiting, approved or rejected.

31 ALL EDITIONS

Stock

What the warehouse can supply, with products running low and out of stock, before promising a shop.

32 ENTERPRISE

My sales today, then end the day

Sales, cash and bank collected, credit sales, debts collected and returns for today, this week or this month. At the end, **End my day** on the home screen stops tracking.

HOW IT WORKS

How the suggested order is worked out

For every product the shop has bought, the app measures how many it sells a day from its confirmed orders over the last **Sales History** days (60 on the demo). It multiplies that by the days until the next visit plus the **Spare Stock** days, takes off what the rep counts on the shelf, and rounds to cartons where a carton unit exists. Each line shows the reason, for example "sells ~1.2/week, next visit in 3 days, +1 day spare".

It is worked out on the phone from the saved copy of the day, so it works offline too.

HOW IT WORKS

How a store check is scored

Each checklist item has a weight. A must-stock item scores the share of listed products found; share of shelf scores our facings against the target share; a yes or no scores 1 for yes; a photo scores 1 when taken. The score is the weighted average, from 0 to 100. Reaching the checklist's perfect store score (85 on the demo) counts as a perfect store.

PART 7 The van seller, step by step

Log in as `bilal`. Bilal drives van RSD-101 on route North Market A. Every sale is also a delivery and usually a payment, so the van's stock and cash must match at night.

IN THIS PART YOU WILL LEARN

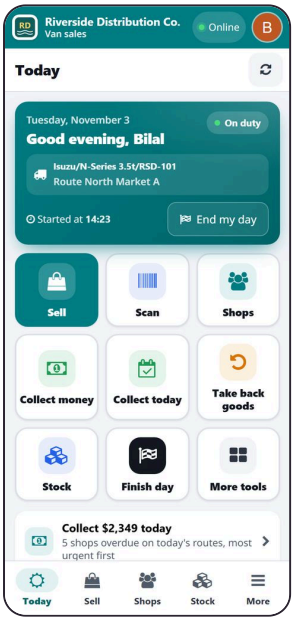

- How a van is loaded, sold from and settled
- Why credit rules stop some sales
- How returns keep van stock right
- How the evening count catches cash and stock gaps

TRY IT YOURSELF ON THE DEMO

1. As bilal, open Tomorrow's load and read why each product is there.
2. Sell to Al Noor General Store from the van, pay cash and open the receipt.
3. Try to sell to Green Valley Supermarket: read the band B message and press Ask manager.
4. Open Finish day, count one product and open Count notes and coins.

A van day ENTERPRISE

1. **Morning** — start my day, odometer, settle earlier days first
2. **Load** — ask for stock or tomorrow's load; storekeeper validates
3. **Sell** — from the van: order, delivery, invoice, payment
4. **Collect and return** — old debts, goods taken back
5. **Count** — van stock by product, damaged units
6. **Hand over** — cash by notes and coins; manager approves

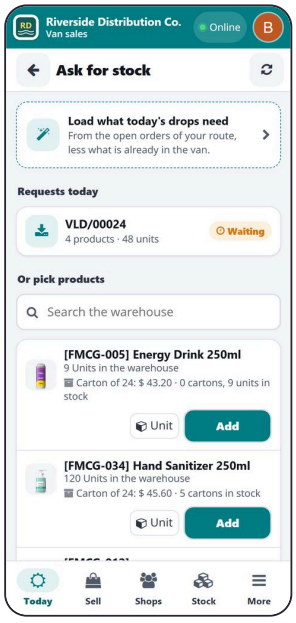

1 ENTERPRISE

On duty with a van

Start my day picks up today's van and route and asks for the odometer. The tiles: Sell, Scan, Shops, Collect money, Collect today, Take back goods, Stock, Finish day.

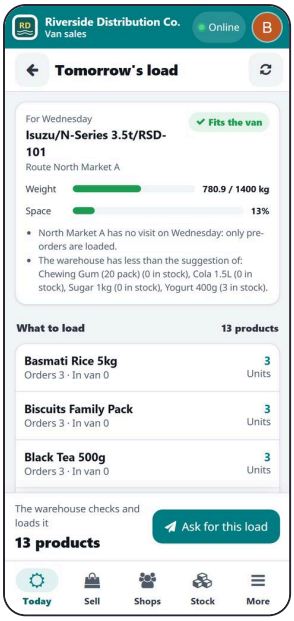

With Settle Before Selling on, an unsettled earlier day must be settled first.

2 VAN SALES AND UP

Ask for stock

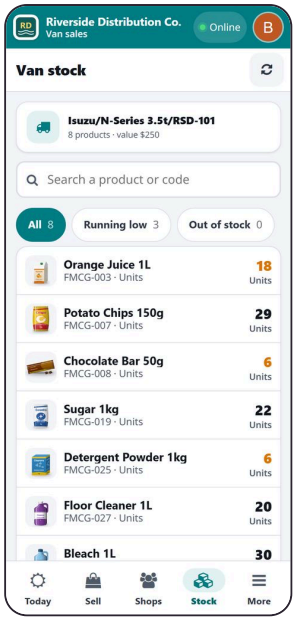

Load what today's drops need in one tap, or pick products and quantities. The request goes to the storekeeper, who validates it in Operations > Van Loading.

3 ENTERPRISE

Tomorrow's load

Pre-orders for the next route day plus expected sales, minus what is already in the van, checked against weight and space. It warns where the warehouse is short. **Ask for this load.**

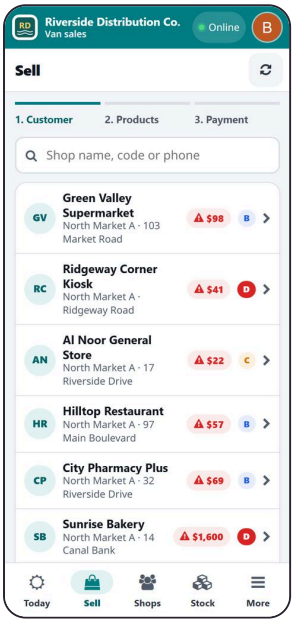

4 VAN SALES AND UP

Van stock

What is in the van now, its value, and what is running low or out.

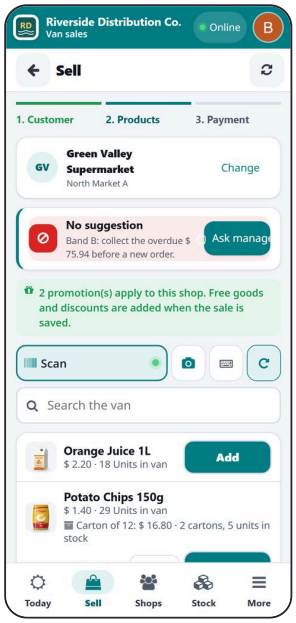

This is the number he must match at night.

5 VAN SALES AND UP

Sell: pick the shop

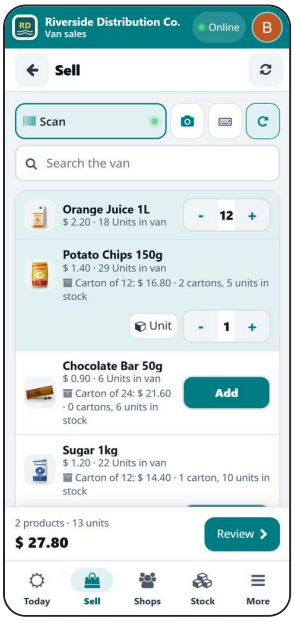

Three steps: customer, products, payment. Each shop shows what it owes and its band.

6 ENTERPRISE

Credit rules stop a bad sale

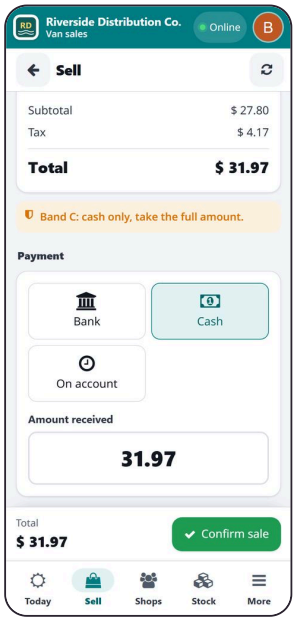

Green Valley is band B with $75.94 overdue: collect first. **Ask manager** requests an exception. The green line says 2 promotions apply here.

7 VAN SALES AND UP

Products from the van

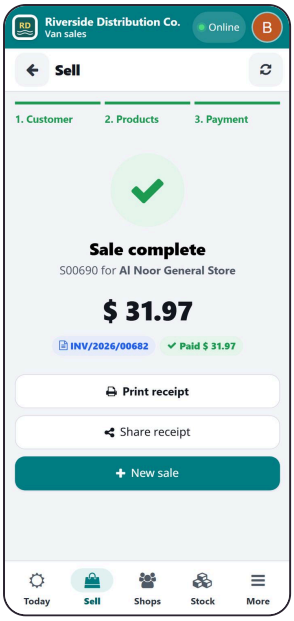

Only what is physically in the van, with the quantity left. Scan, search, or use the suggested sale.

8 VAN SALES AND UP

Take the payment

Cash, Bank, or On account for credit shops. Band C means cash only and the app says so. Enter the amount received and **Confirm sale**.

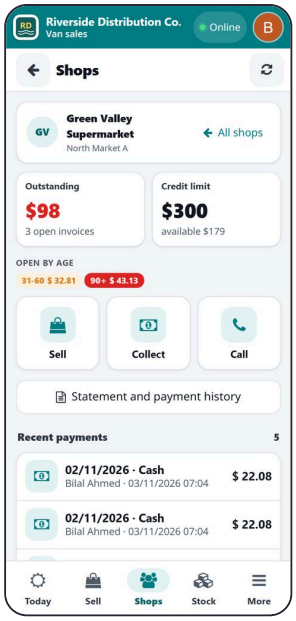

9 VAN SALES AND UP

Sale complete

One tap made the order, the delivery from the van, the invoice and the payment. Print or share the receipt (58 or 80 mm).

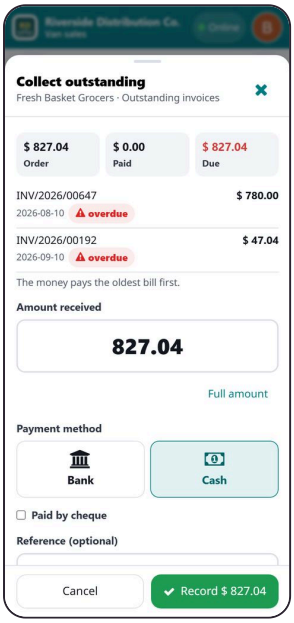

Nothing is typed in later by the office.

10 VAN SALES AND UP

A shop from the van

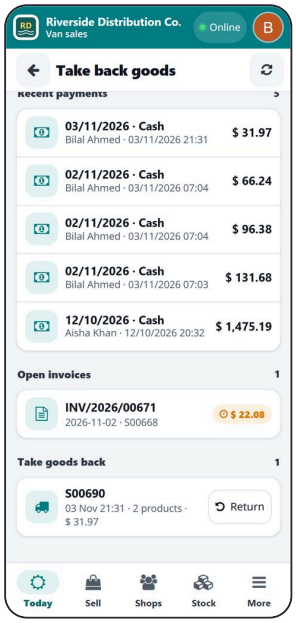

Shops: outstanding, credit limit and what is still available, open amounts by age, Sell, Collect, Call, and the statement and payment history.

11 VAN SALES AND UP

Collect old debts

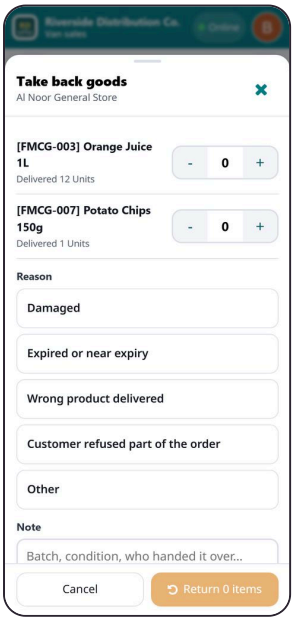

Fresh Basket Grocers owes $827.04 on two overdue bills. The money pays the oldest bill first. Cash, bank or cheque.

12 VAN SALES AND UP

Take back goods

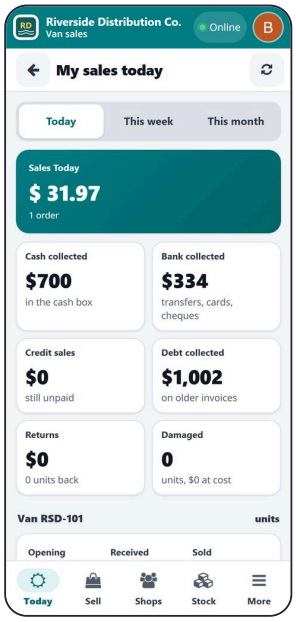

Pick the shop, then **Return** on the sale the goods came from.

13 VAN SALES AND UP

Return with a reason

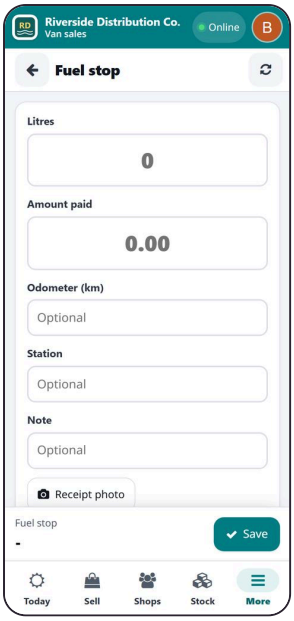

Quantity per line, a reason, a note and a photo. Good goods go back into the van; in Enterprise, expired goods go to quarantine and damaged goods are scrapped. A credit note is posted.

14 ENTERPRISE

My sales today

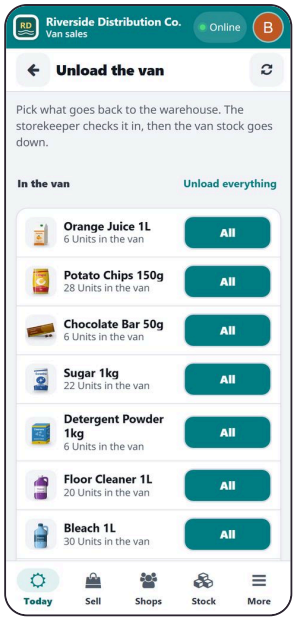

Sales, cash, bank, credit sales, debts collected, returns and damaged goods, plus the van's opening, received, sold and remaining stock.

15 ENTERPRISE

Fuel stop

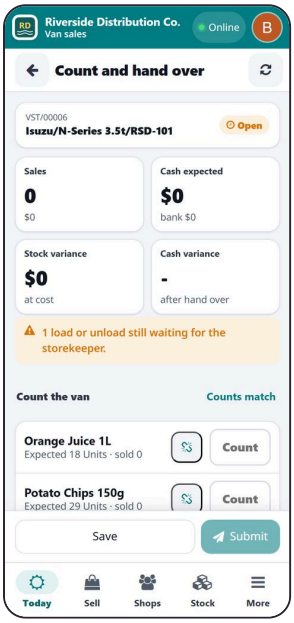

Litres, amount, odometer, station and a receipt photo. It feeds the cost per km report.

16 VAN SALES AND UP

Unload

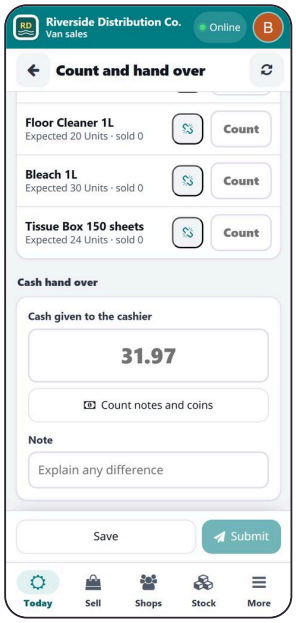

Send unsold goods back to the warehouse, line by line or **Unload everything**. The storekeeper checks it in.

17 ENTERPRISE

Finish day: count the van

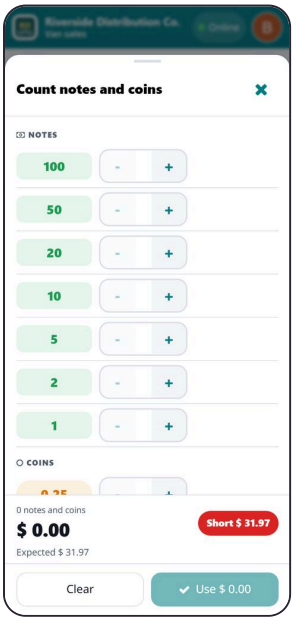

The settlement shows sales and cash expected. He counts each product and marks damaged units; any difference shows as a stock variance.

18 ENTERPRISE

Hand over the cash

Enter the cash given to the cashier, or count it by notes and coins, add a note for any difference, and **Submit** to the manager.

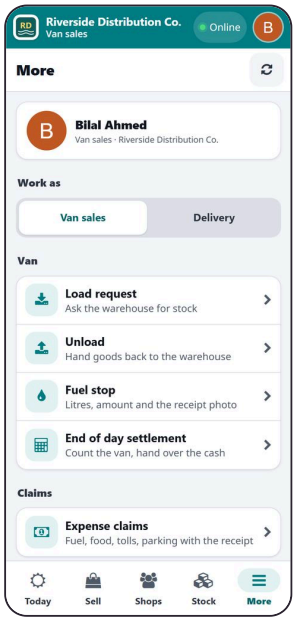

19 ENTERPRISE

Count notes and coins

Tap + for each note and coin. The app adds it up and shows Balanced, Short or Over against what is expected.

The manager recounts; a shortage above the tolerance is booked to the salesperson.

20 ENTERPRISE

More: van tasks

Work as Van sales or Delivery, load request, unload, fuel stop, end of day settlement, expense claims, collect today, and the phone tools of Part 10.

HOW IT WORKS

How the settlement and cash count work

1. Expected stock = opening + loaded - sold + returned - unloaded - damaged. The driver counts each product; differences are the stock variance at cost.
2. Expected cash = cash sales + cash debts collected - cash refunds. The driver counts by notes and coins; the app shows Balanced, Short or Over.
3. The settlement goes to the manager, who recounts the cash on the phone or in the back office.
4. A shortage above the tolerance ($2 on the demo) is booked as money the salesperson owes; an overage as a gain.
5. With **Settle Before Selling** on, the van cannot sell on a new day until earlier days are settled, unless the manager allows one day.

HOW IT WORKS

Where returned goods go

Good goods go back into the van. **Expired or near expiry** goes to Quarantine, kept for the claim to the principal. **Damaged** goods are scrapped. A credit note is posted for what was already invoiced, so the shop is not charged twice.

PART 8 The delivery driver, step by step

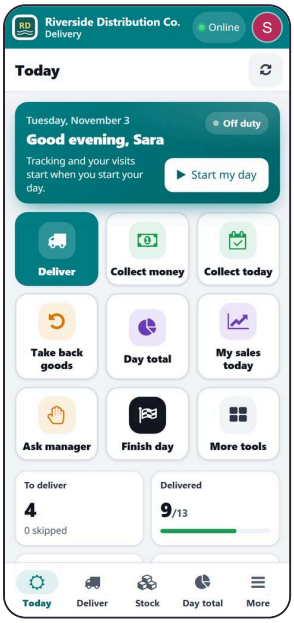

Log in as `sara`. She drives a van but also delivers pre-sold orders. In **More > Work as** she switches to **Delivery**. In Base, drivers use Distribution > Delivery in the phone browser with the same steps.

IN THIS PART YOU WILL LEARN

- How drops are planned and loaded
- How proof of delivery works
- What happens with a part delivery or a skip
- How the day is checked before returning

TRY IT YOURSELF ON THE DEMO

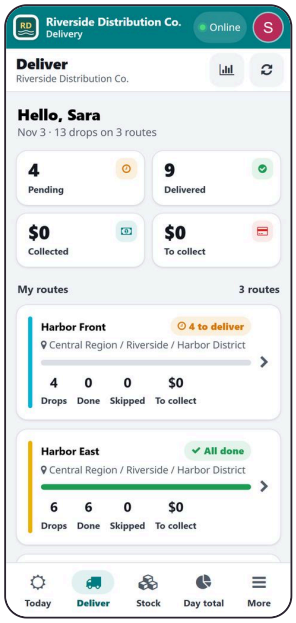

1. As sara, open More > Work as > Delivery.
2. Open Deliver > Harbor Front and press What to load.
3. Open Partial on the first drop and lower one quantity, then cancel.
4. Open Day total.

1 ALL EDITIONS

Delivery home

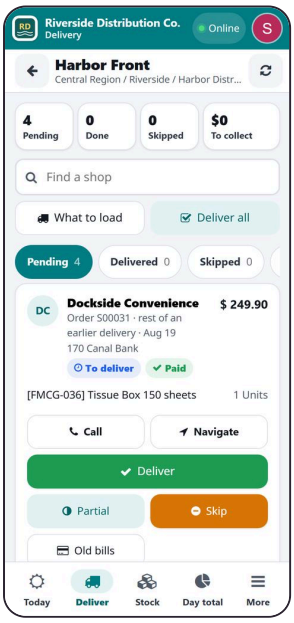

Tiles: Deliver, Collect money, Collect today, Take back goods, Day total, My sales today, Ask manager, Finish day, More tools. Below: drops to deliver, delivered, collected and to collect.

2 ALL EDITIONS

Drops by route

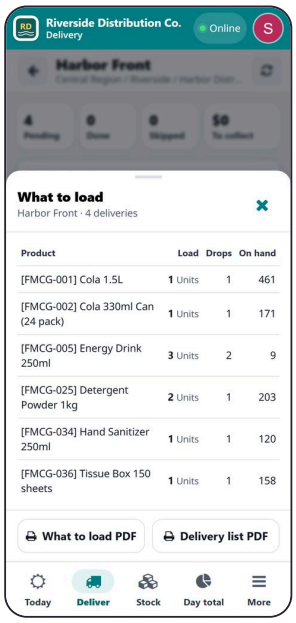

Every open drop on her routes, not only today's, with done, skipped and money to collect per route.

3 ALL EDITIONS

One route

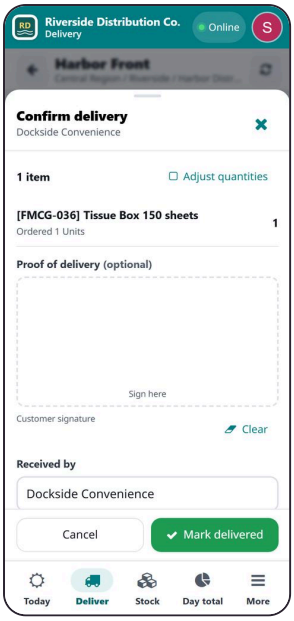

Each drop: order, products, paid or not. **Deliver**, **Partial**, **Skip** or **Old bills**. **Deliver all** validates every ready drop when signatures are not required.

4 ALL EDITIONS

What to load

The goods for the whole route, with drops and stock on hand. Print the What to load PDF and the delivery list.

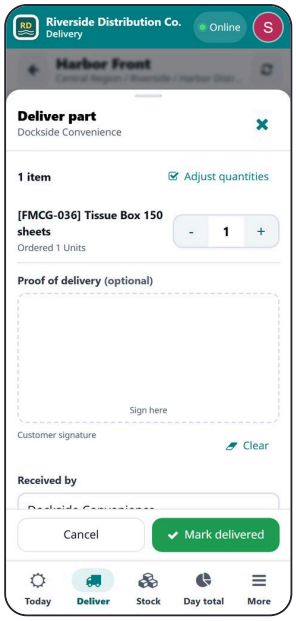

5 ALL EDITIONS

Proof of delivery

Adjust quantities if needed, the shopkeeper signs on the screen, type who received it, add a photo, **Mark delivered**. The stock leaves in Odoo and the signature is on the delivery.

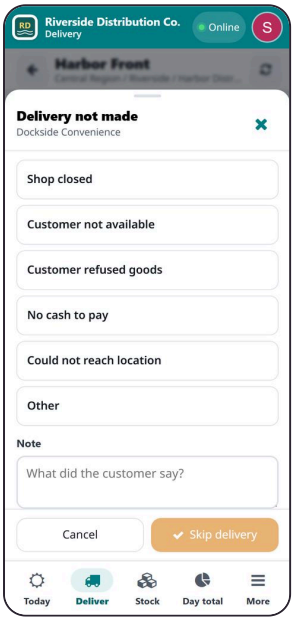

If the order is unpaid, the app then asks for the payment.

6 ALL EDITIONS

Part delivery

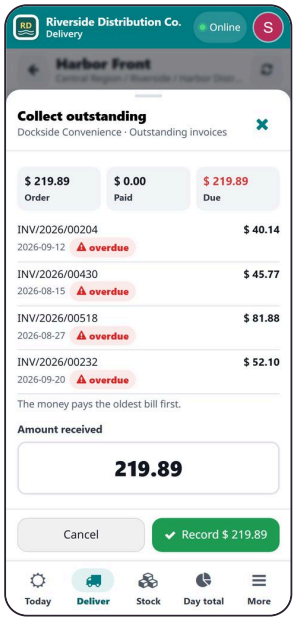

Deliver less than ordered. The rest stays as a back order for a later drop.

7 ALL EDITIONS

Delivery not made

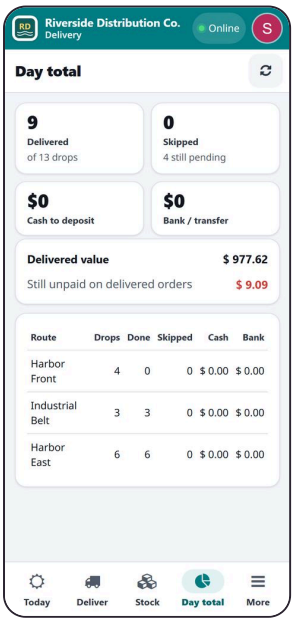

Shop closed, customer away, refused goods, no cash, could not reach, other, with a note. The drop stays open to try again.

8 ALL EDITIONS

Old bills at the same stop

Collect the shop's older invoices while there, oldest first.

9 ALL EDITIONS

Day total

Delivered and skipped, cash to deposit, bank, delivered value and what is still unpaid, per route.

PART 9 The warehouse counter, step by step

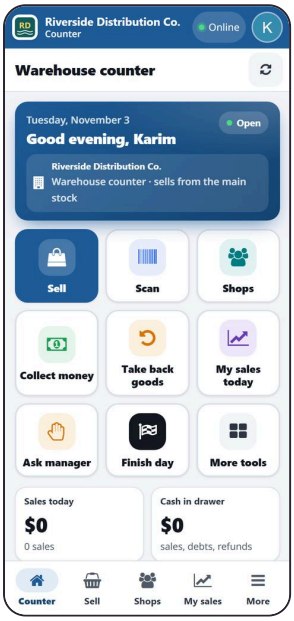

Log in as `warehouse`. Karim sells to shopkeepers who come to the warehouse, on a phone, a tablet or a SUNMI handheld with a scanner. Every sale, payment and return is a normal Odoo record.

IN THIS PART YOU WILL LEARN

- How the counter sells to walk-in shopkeepers
- Cash, card, cheque and credit at the counter
- Returns with refund
- How the drawer is closed

TRY IT YOURSELF ON THE DEMO

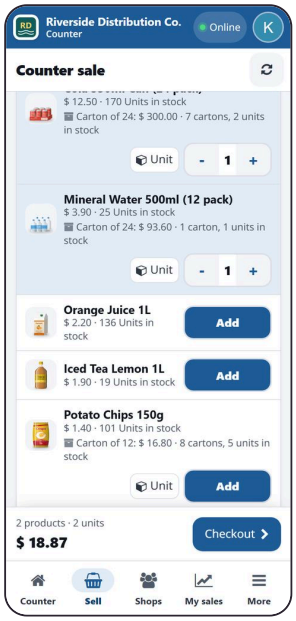

1. As warehouse, open Sell, scan or add two products and go to Checkout.
2. Pick Walk-in Customer and look at the payment options.
3. Open Finish day and read how the cash expected is worked out.

1 ENTERPRISE

Counter home

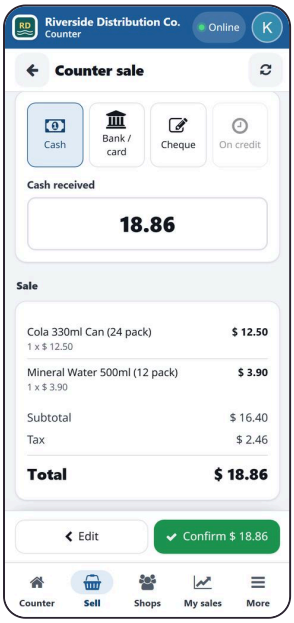

Today's counter with Sell, Scan, Shops, Collect money, Take back goods, My sales today, Ask manager and Finish day.

2 ENTERPRISE

Counter sale

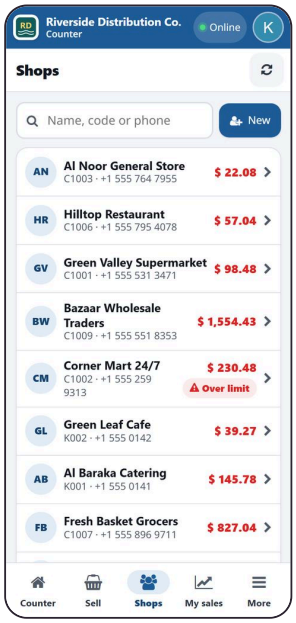

Scan with a keyboard or handheld scanner, or search. Stock is from the counter warehouse. Walk-in customer or a named shop.

3 ENTERPRISE

Payment

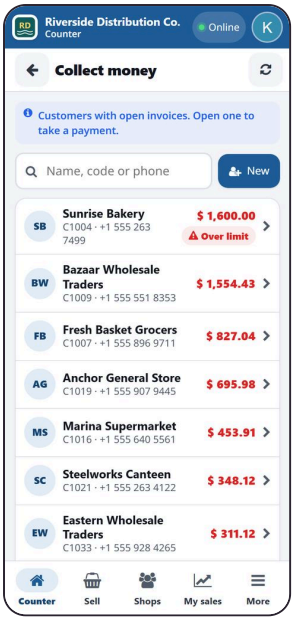

Cash, bank or card, cheque, or on credit within the shop's limit. A walk-in pays in full. Delivery and invoice are done in the same step.

4 ENTERPRISE

Shops and new customers

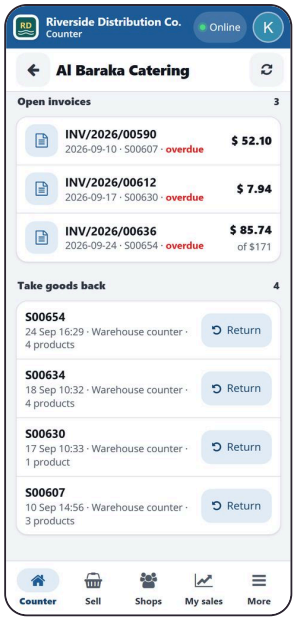

Every customer with what it owes and an Over limit warning. **New** creates a customer on the spot, online or offline.

5 ENTERPRISE

Collect old debts

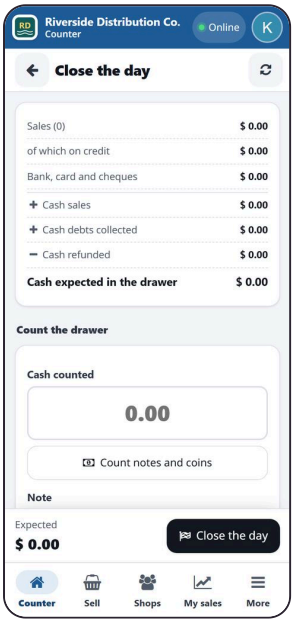

Customers with open invoices, largest first. Take cash, bank or cheque; the oldest invoices are paid first and part payments are fine. Every sale, payment and return has a receipt with Print, Share and PDF.

6 ENTERPRISE

Returns with refund

Open the customer, then **Return** on the sale. Refund in cash or as credit on account, with a credit note. Good goods go back to stock.

7 ENTERPRISE

Close the day

Cash sales plus debts collected minus refunds gives the cash expected in the drawer. Count it, by notes and coins if you like, and **Close the day**.

PART 10 Working offline, printing and the phone

Vans and handhelds spend hours without signal. The field app keeps working and sends everything once when the signal is back.

IN THIS PART YOU WILL LEARN

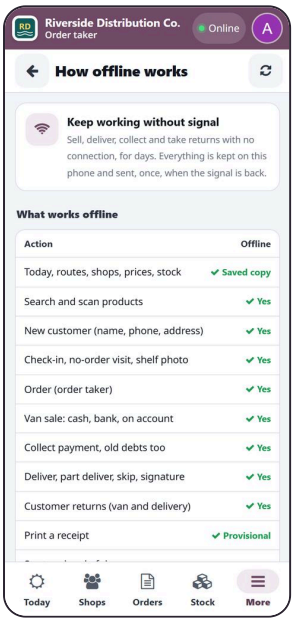

- What works without signal and what does not
- How saved work is sent and never doubled
- How printers and scanners connect

TRY IT YOURSELF ON THE DEMO

1. As aisha, open More > How offline works.
2. Open More > Waiting to send.
3. Turn the phone to airplane mode, place an order, turn signal back on and watch it send.

How offline work reaches Odoo ENTERPRISE

1 On the phone a copy of the day: routes, prices, van stock, open bills ▶ **2 Offline action** saved at once with its own id and a provisional receipt ▶ **3 Signal back** sent oldest first, by itself ▶ **4 Server checks** current prices, taxes, promotions, credit ▶ **5 Result** saved once; anything different shows under Check what changed

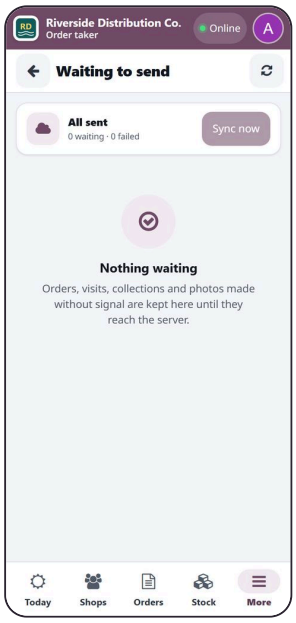

1 ENTERPRISE

What works offline

Routes, shops, prices and stock (saved copy), scan, new customers, check-in, no-order, photos, orders, van sales, collections, deliveries, returns, start and end of day, loads, fuel, expenses, cash counts, promises, store checks, Ask manager and best order. This page is inside the app.

Counter sales, changing a sent order and the van settlement need signal.

2 ENTERPRISE

Waiting to send

What is waiting and what failed, with **Sync now**, **Try now** and **Discard**. Work is sent oldest first by itself, and a failure is retried, never lost.

TOPIC	HOW IT WORKS
Never twice, nothing lost	Each action has its own id, so nothing is ever saved twice. If the server takes offline work differently (new price, credit limit), the rep sees it under Check what changed.
Provisional receipts	Sales, payments and returns made offline print a receipt marked PROVISIONAL with the phone reference, and can be reprinted.
Save today, signed out	More > Save today for offline refreshes the saved copy before leaving coverage. If the login expires, waiting work stays on the phone and is sent after signing in again.
Printers and scanners	58 or 80 mm thermal printers, or the SUNMI built-in printer with the Android app (More > Test print). Phone camera scan, or USB, Bluetooth and handheld scanners that type the code.
Speed and look	Opens in about 1 second, under 300 ms between screens, a route is 10 to 25 KB of data. Light or dark with the phone, a back arrow on every screen.

PART 11 The manager's phone cockpit

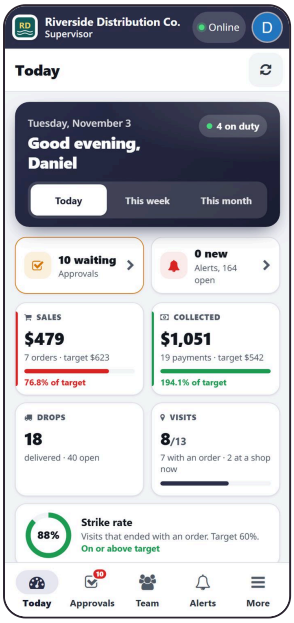

Log in as `daniel` on a phone and open **/field**. A manager gets a cockpit instead of the field tiles: the day, what needs a yes or no, the team and the alerts.

IN THIS PART YOU WILL LEARN

- What the manager sees on the phone
- How approvals work and who can approve
- How to follow the team and money in the field

TRY IT YOURSELF ON THE DEMO

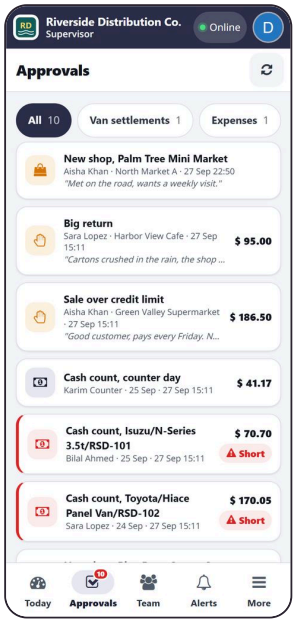

1. As daniel on a phone, open /field.
2. Open Approvals and read the new shop request.
3. Open Team, then Alerts.

1 ENTERPRISE

Today at a glance

People on duty; sales and collections against target; drops delivered and open; visits and the strike rate against its goal; overdue customers by age and new shops waiting.

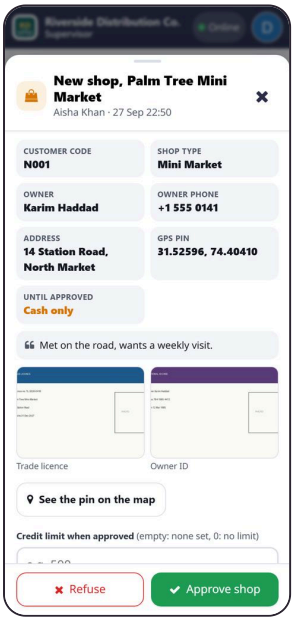

2 ENTERPRISE

Approvals

New shops, big returns, sales over the credit limit, cash counts and van settlements with differences, expense claims and load requests, each with the facts to decide.

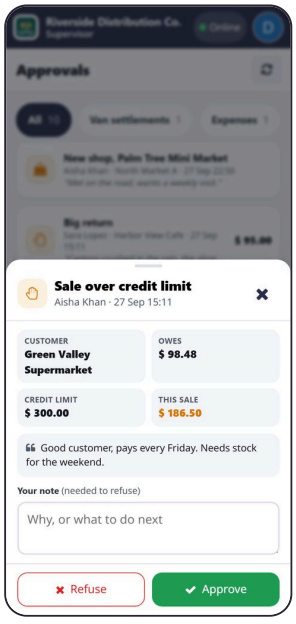

Nobody can approve their own request.

3 ENTERPRISE

Approve a new shop

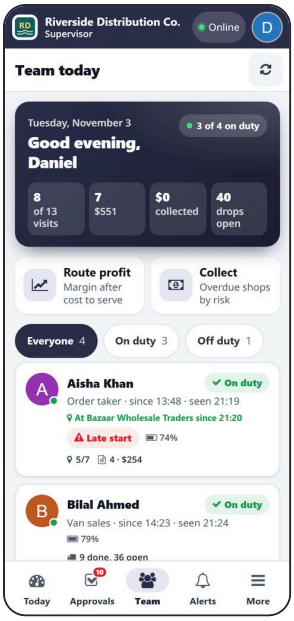

Owner, phone, address, GPS pin, licence and ID photos. Set a credit limit and **Approve shop**, or **Refuse** with a note.

4 ENTERPRISE

A sale over the credit limit

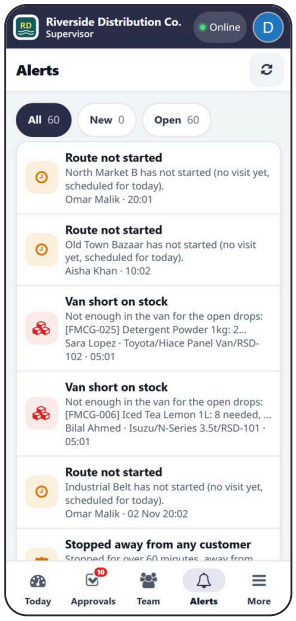

What the shop owes, its limit, this sale and the rep's reason. Approve, or refuse with a note the rep sees.

5 ENTERPRISE

Team today

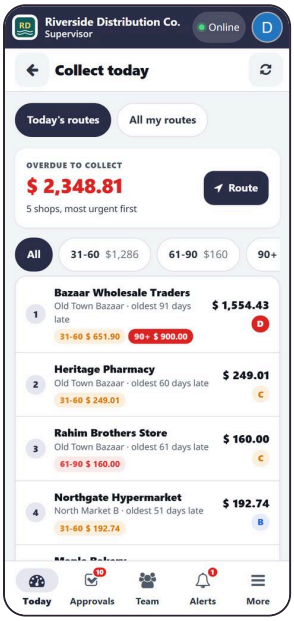

Who is on duty, since when, at which shop, battery, visits and orders. "Late start" flags anyone who began after the route's start time.

6 ENTERPRISE

Alerts

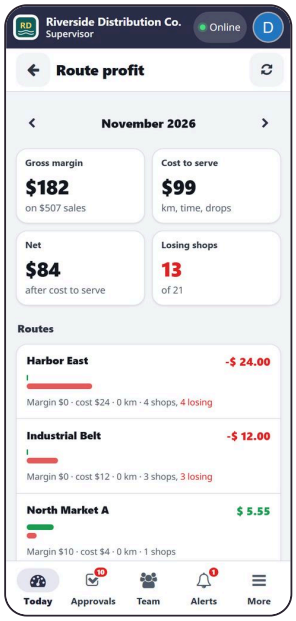

Routes not started, check-ins outside the fence, no location, a van short of stock for its drops, someone stopped away from any shop. Open or dealt with.

7 ENTERPRISE

Collect today

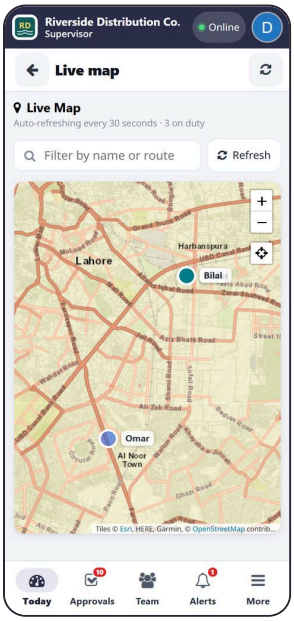

Who owes money on today's routes, by age and risk band, with promises due today.

8 ENTERPRISE

Route profit

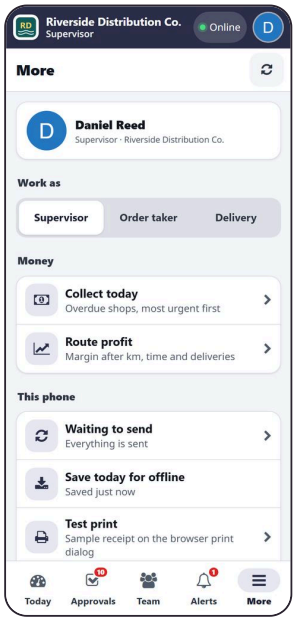

Gross margin, cost to serve and net per route for the month, and how many shops lose money.

9 ENTERPRISE

Live map

Everyone on duty on the map, refreshed every 30 seconds.

10 ENTERPRISE

Work as

A manager can also work as an order taker or a driver from the same phone.

PART 12 The back office, every day

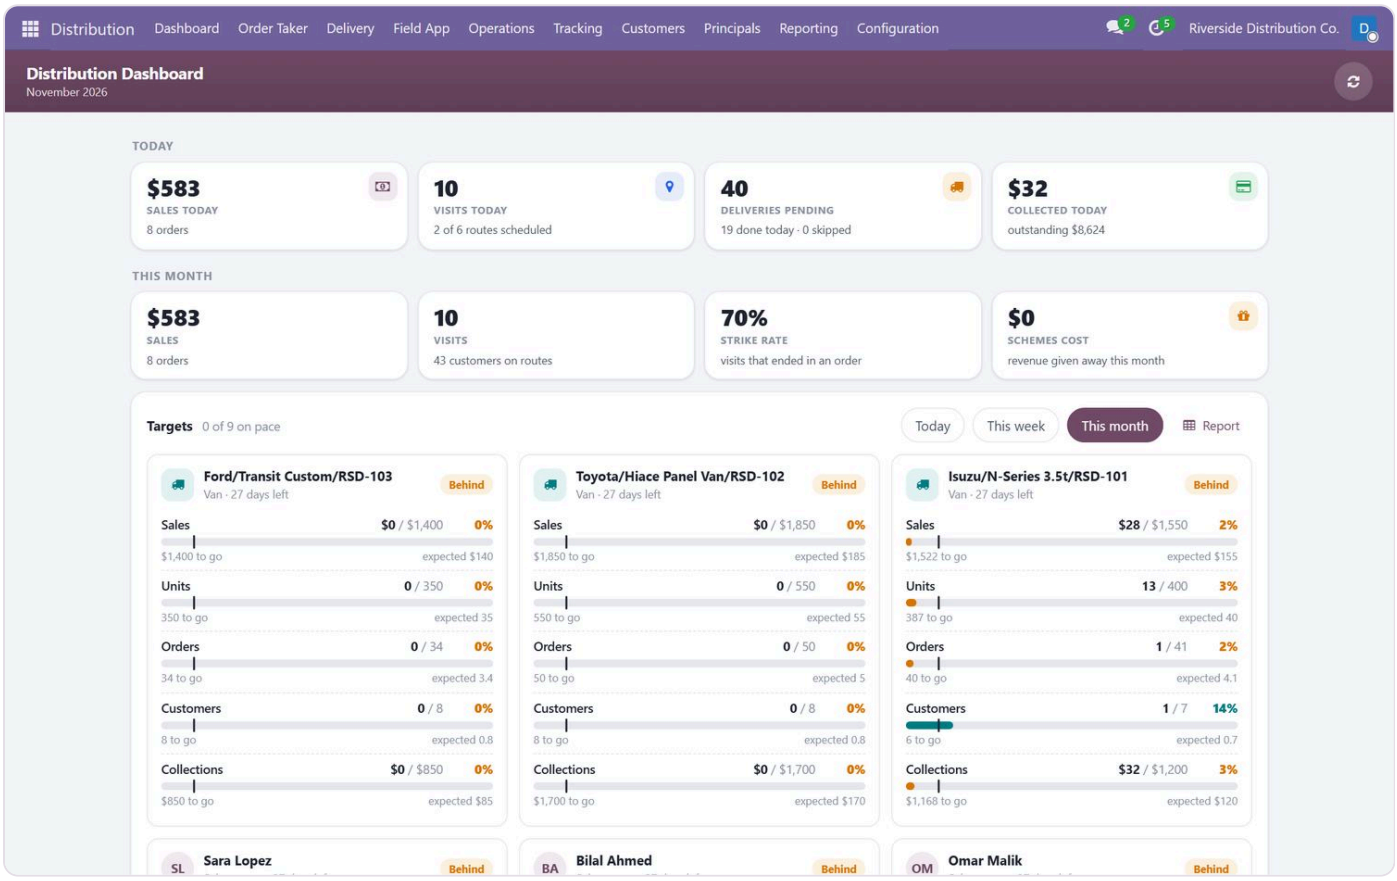

On a computer as `daniel`, in the **Distribution** app. Field orders are normal sales orders, deliveries are normal transfers and collections are normal payments, so accounting and stock stay standard Odoo.

IN THIS PART YOU WILL LEARN

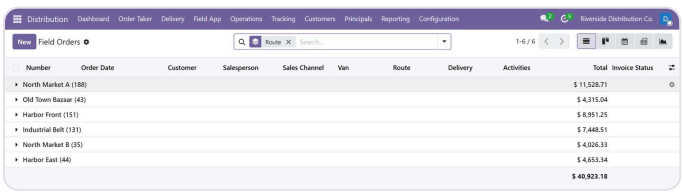

- Where each day's work lands in the back office
- How loads, settlements, cash counts and cheques are checked
- How collections are planned and followed

TRY IT YOURSELF ON THE DEMO

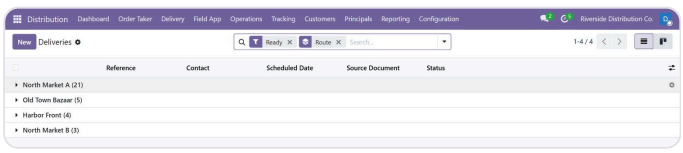

1. As daniel, open Operations > Field Orders and find today's orders.
2. Open Van Settlements and open one with a cash variance.
3. Open Cash Counts and look at the recount.

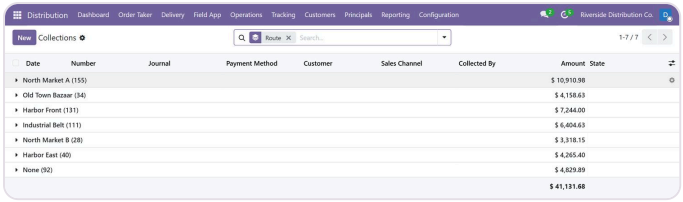

ALL EDITIONS **Dashboard.** Today and this month: sales, visits, open deliveries, collections, strike rate and promotion cost, then every target with its progress and where it should be by today. Every tile opens the matching list.

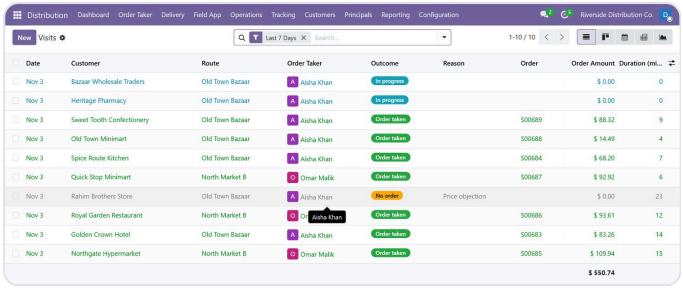

ALL EDITIONS **Operations > Field Orders**: orders from the phones, by route, with channel, van and delivery state.

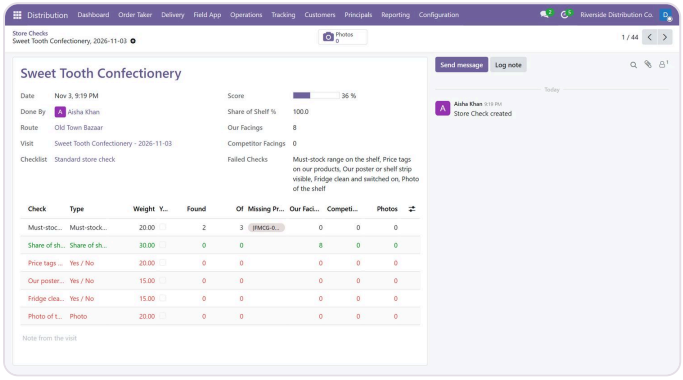

ALL EDITIONS **Deliveries**: open and done drops per route, with signature, photo and skip reason on each.

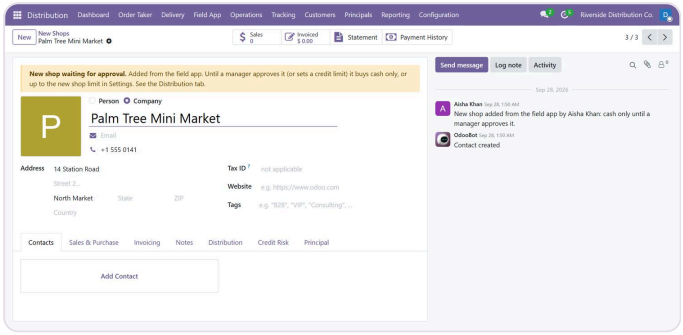

ALL EDITIONS **Collections**: every payment taken on the road, with the route and who collected it.

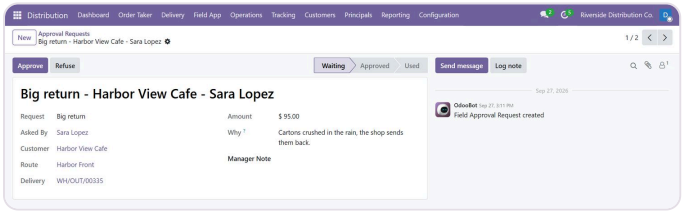

ALL EDITIONS **Visits**: every visit with outcome, reason, order and duration, in list, calendar, pivot and graph.

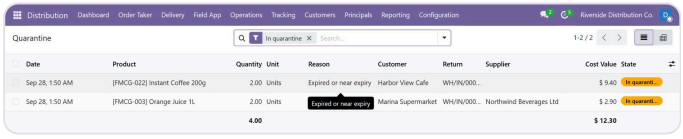

ENTERPRISE **Store Checks**: each check with its score, share of shelf, failed items and photos.

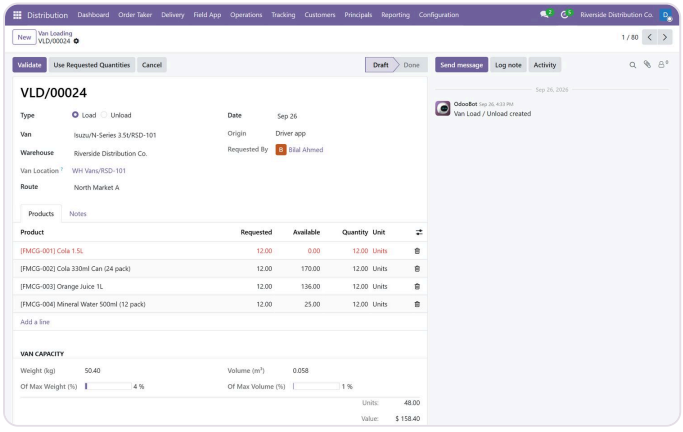

ENTERPRISE **New Shops**: shops added on the road waiting for approval, with Approve Shop or Refuse.

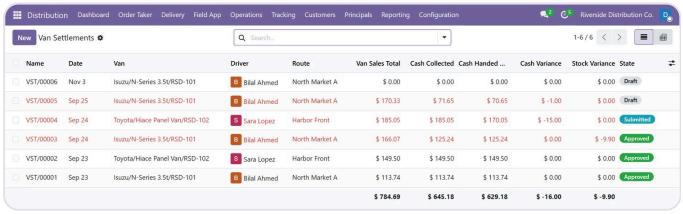

ENTERPRISE **Approval Requests**: the same approvals as the phone, with Approve and Refuse.

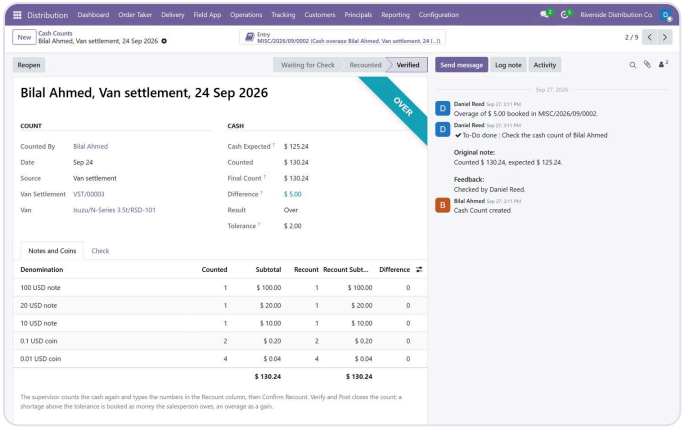

ENTERPRISE **Quarantine**: expired returns kept for the claim, until scrapped.

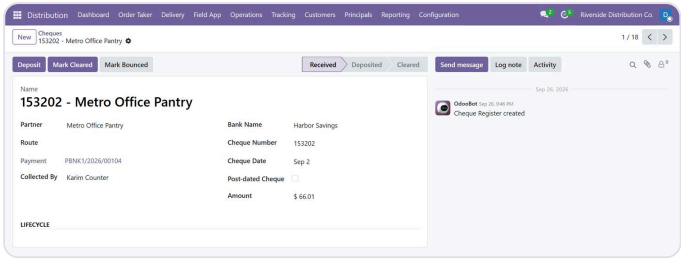

VAN SALES AND UP **Van Loading**: load and unload requests. The storekeeper checks quantities and **Validates**; van capacity is shown.

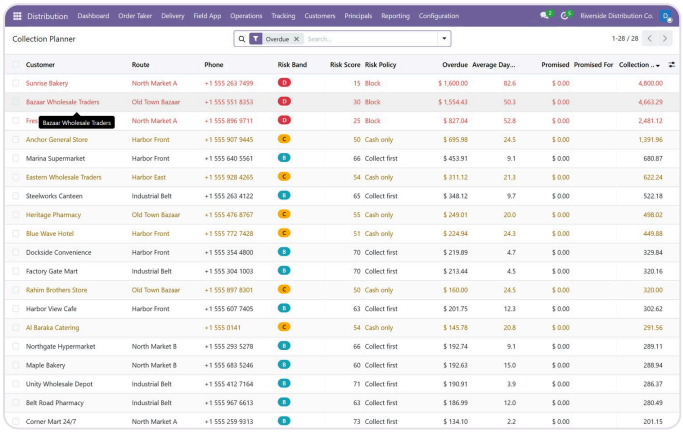

ENTERPRISE **Van Settlements**: each van day with sales, cash collected and handed over, cash and stock variance.

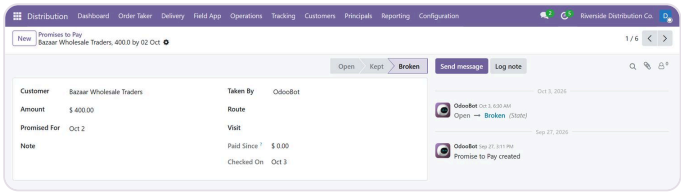

ENTERPRISE **Cash Counts**: counts by note and coin, the manager's recount, and the shortage or overage booked.

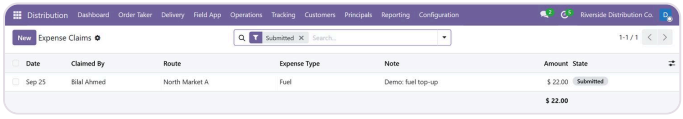

ENTERPRISE **Cheques**: received, deposited, cleared or bounced, with post-dated cheques flagged.

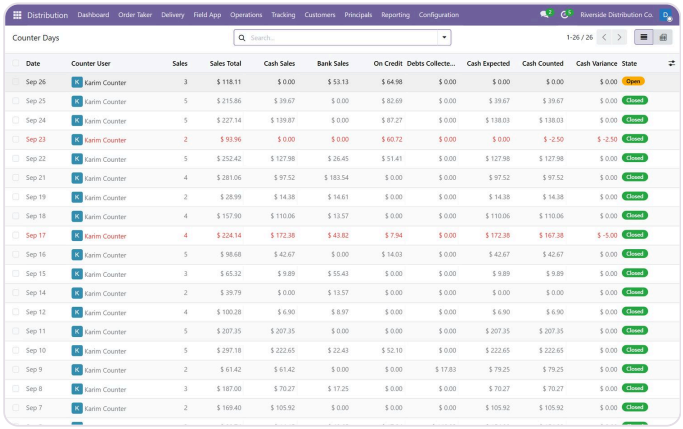

ENTERPRISE **Collection Planner**: overdue shops with band, score, average days late and promises.

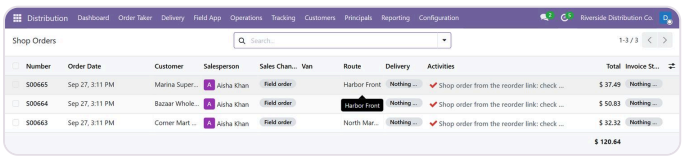

ENTERPRISE **Promises to Pay**: open, kept or broken, checked against payments.

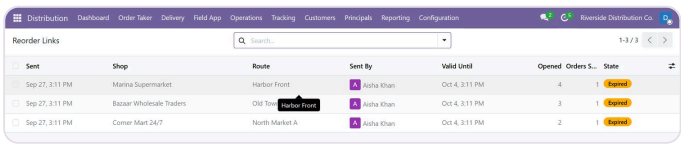

ENTERPRISE **Expense Claims**: approve or reject with a reason.

ENTERPRISE **Counter Days**: each counter day with cash expected, counted and the difference.

ENTERPRISE **Shop Orders**: orders shops sent from a reorder link.

ENTERPRISE **Reorder Links**: links sent, who sent them, expiry and orders received.

PART 13 Tracking and maps

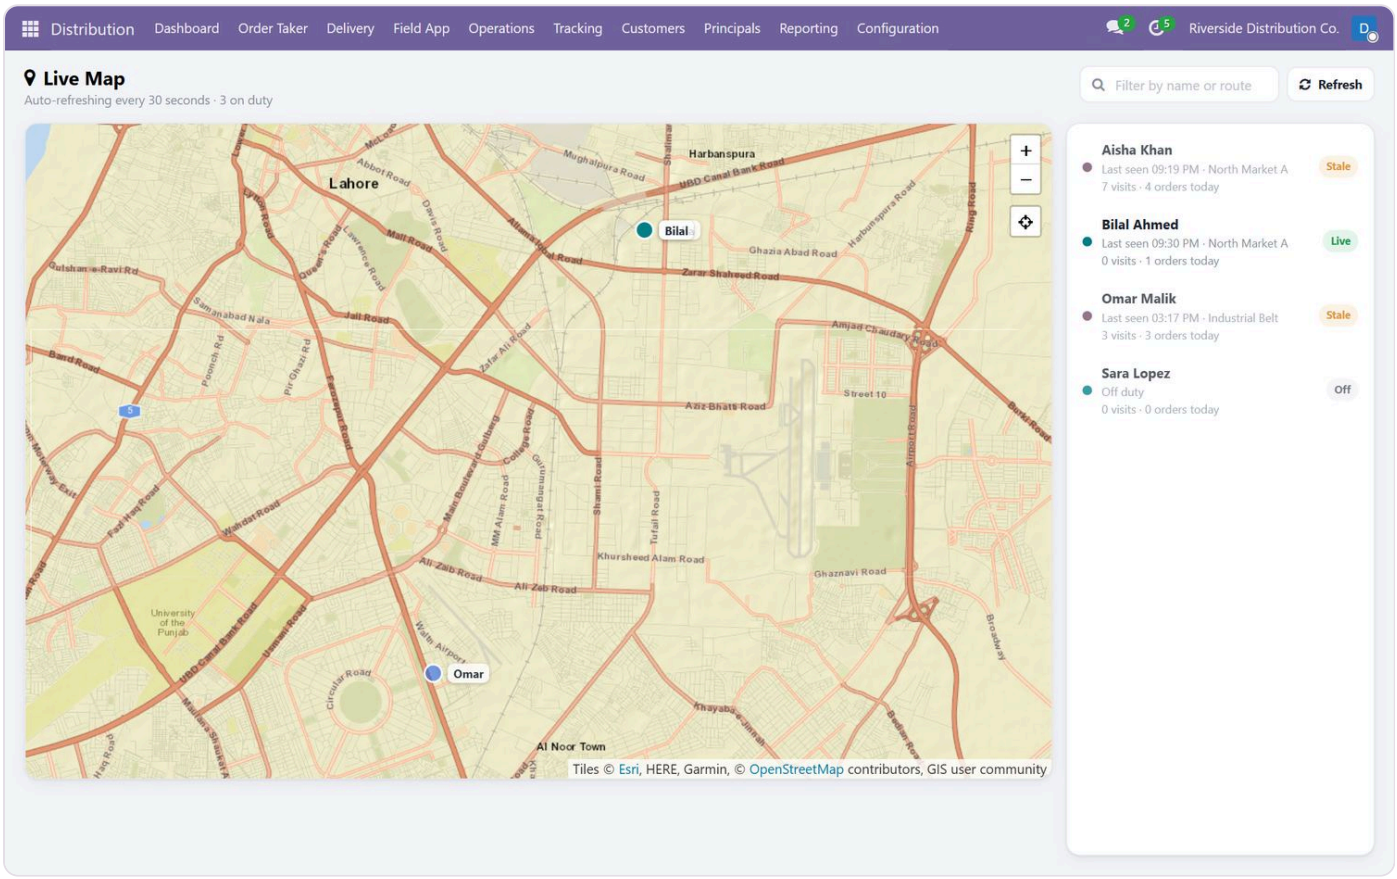

Where the team is now, what it did today and where the customers are. No Google Maps key is needed; positions are only recorded between Start my day and End my day.

IN THIS PART YOU WILL LEARN

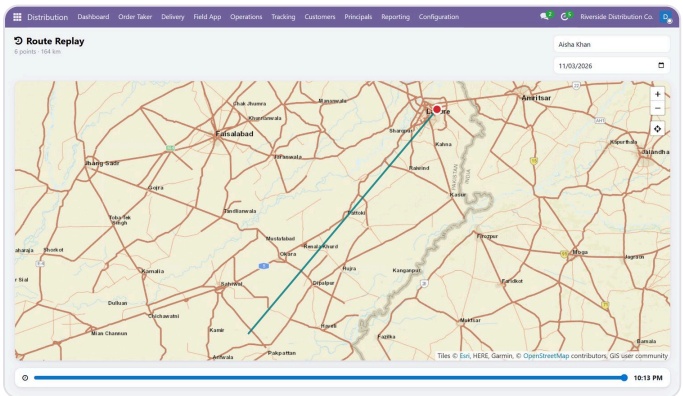

- How to see the team live and replay a day
- How to find shops that stopped ordering
- How field exceptions are raised

TRY IT YOURSELF ON THE DEMO

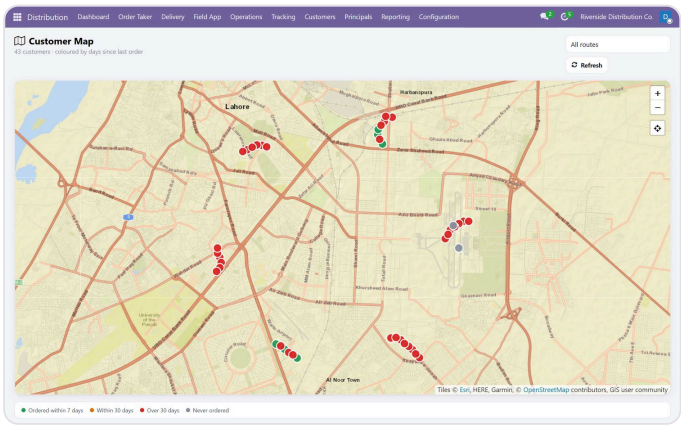

1. Open Tracking > Live Map.
2. Open Route Replay, pick Bilal Ahmed and drag the slider.
3. Open Customer Map and find the red cluster.

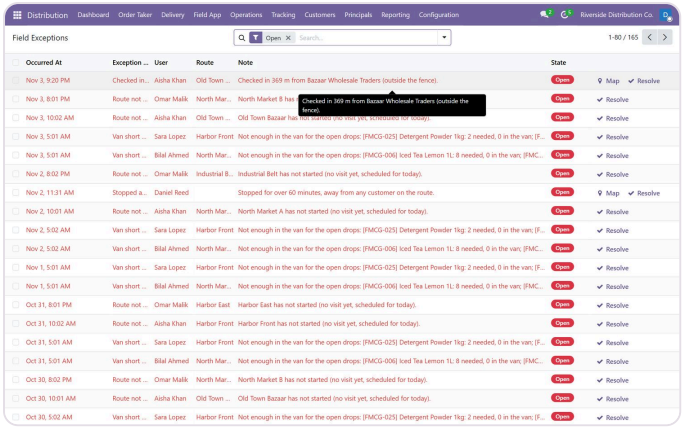

ENTERPRISE **Tracking > Live Map.** Everyone on duty, refreshed every 30 seconds, with last seen time, route, visits and orders.

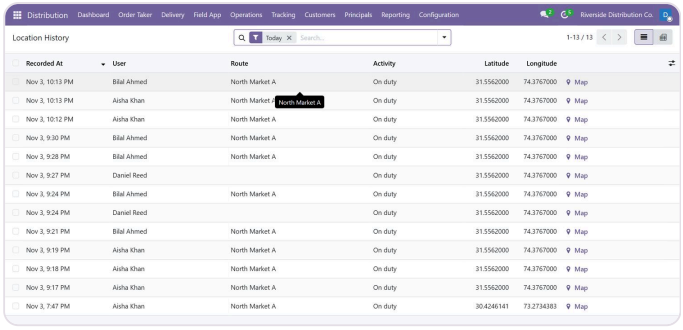

ENTERPRISE **Route Replay**: pick a person and a day and replay the trail with a time slider and the distance covered.

ENTERPRISE **Customer Map**: every shop coloured by days since its last order: green within 7, orange within 30, red over 30, grey never.

ENTERPRISE **Field Exceptions**: late start, check-in outside the fence, no location, stopped away from customers.

ENTERPRISE **Location History**: every position recorded on duty, deleted after the days set in Settings.

PART 14 Brands, principals, promotions and claims

Most distributors carry several manufacturers. Every product has a brand and every brand a principal, so sales, stock, promotions and claims can be read per principal.

IN THIS PART YOU WILL LEARN

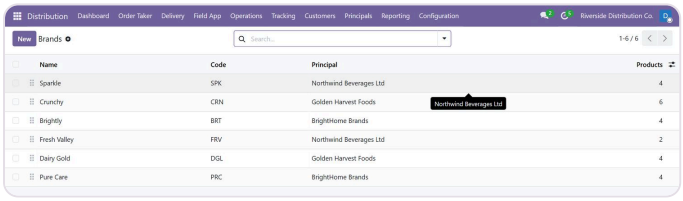

- How brands and principals are linked to products
- How promotion cost, budgets and return are measured
- How claims to principals are built and settled
- What the principal scorecard shows

TRY IT YOURSELF ON THE DEMO

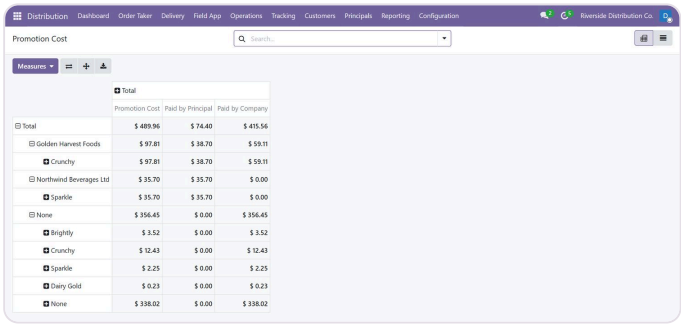

1. Open Principals > Claims > CLM/2026/0003 and read the three kinds of lines.
2. Open Promotion ROI and compare two promotions.
3. Open Principal Scorecard, press Show, then Print.

A claim to a principal ENTERPRISE

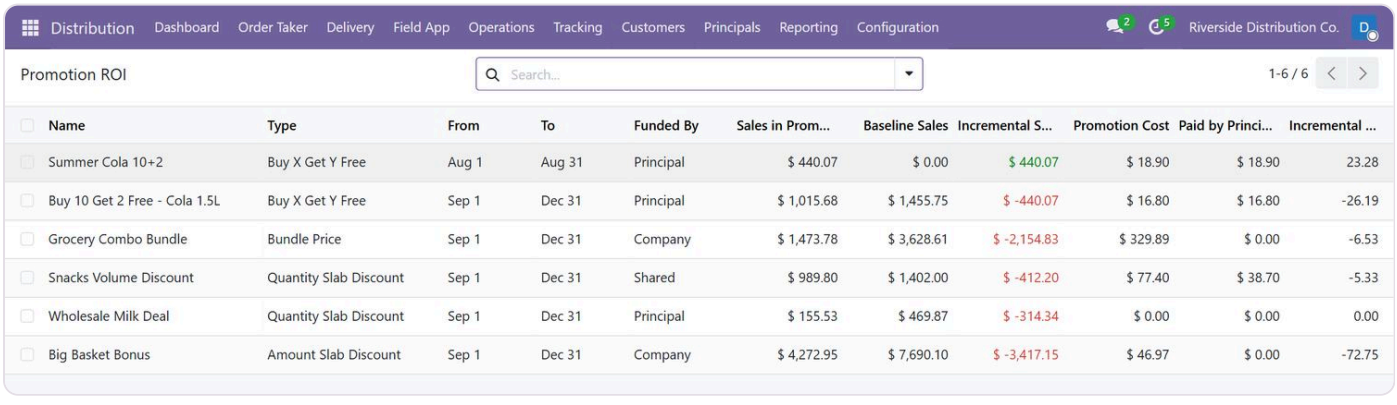

1. **Period** — one claim per principal and period
2. **Fetch Lines** — promotion share, damaged and expired goods, price differences
3. **Submit** — print the claim form
4. **Accept** — in full or in part, line by line
5. **Settle** — credit note from the principal or a receivable

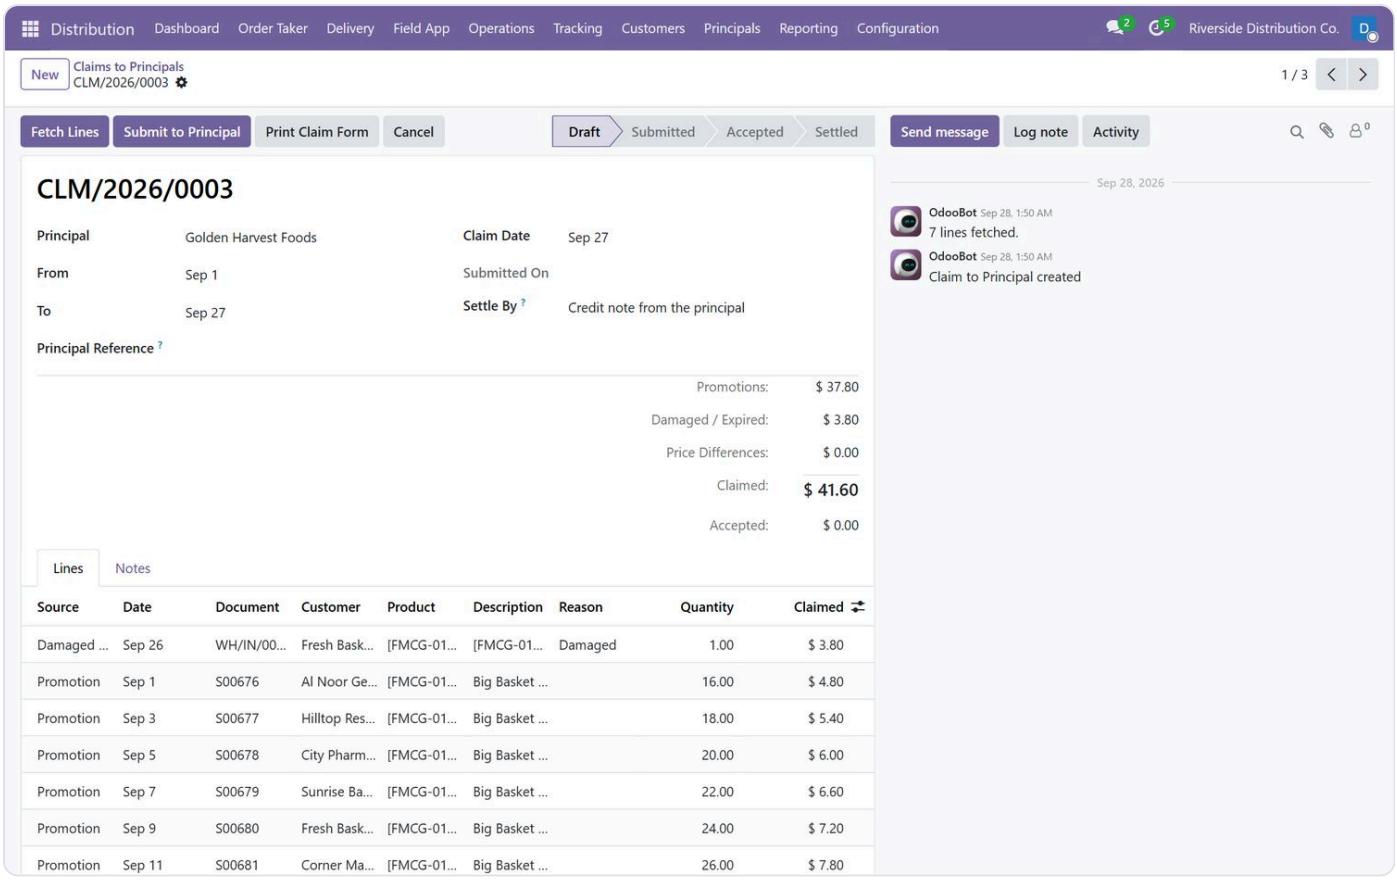

ENTERPRISE **Principals > Brands**: each brand with its code, principal and number of products.

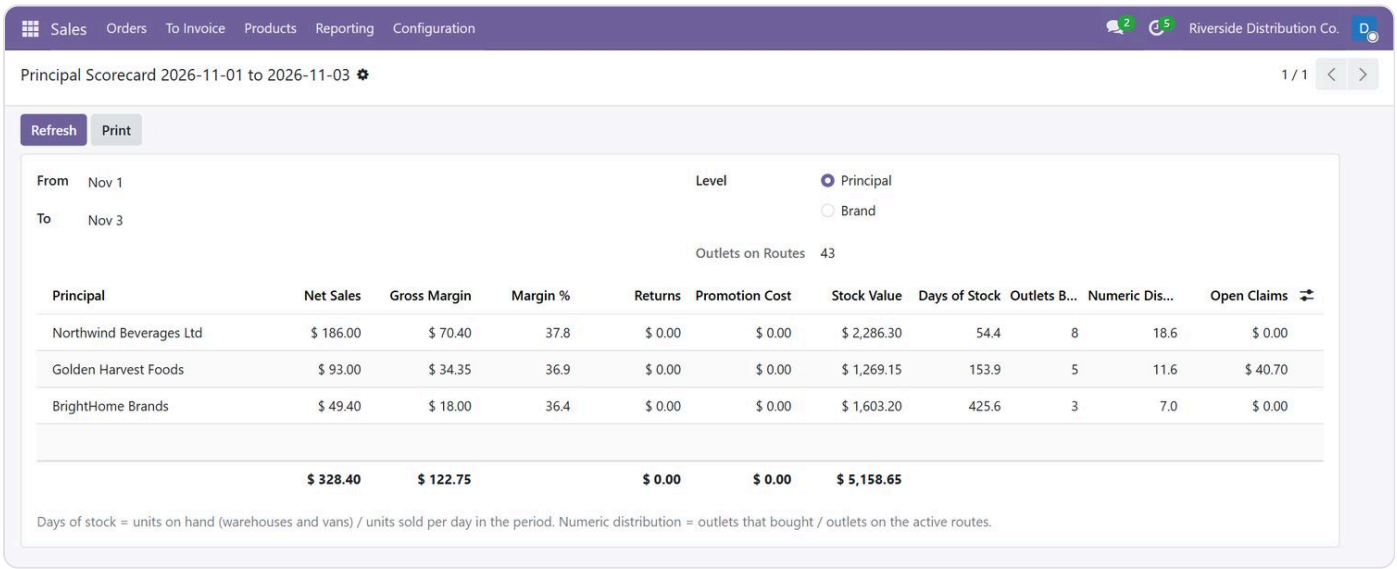

ENTERPRISE **Promotion Cost**: what promotions cost, paid by the principal and by the company.

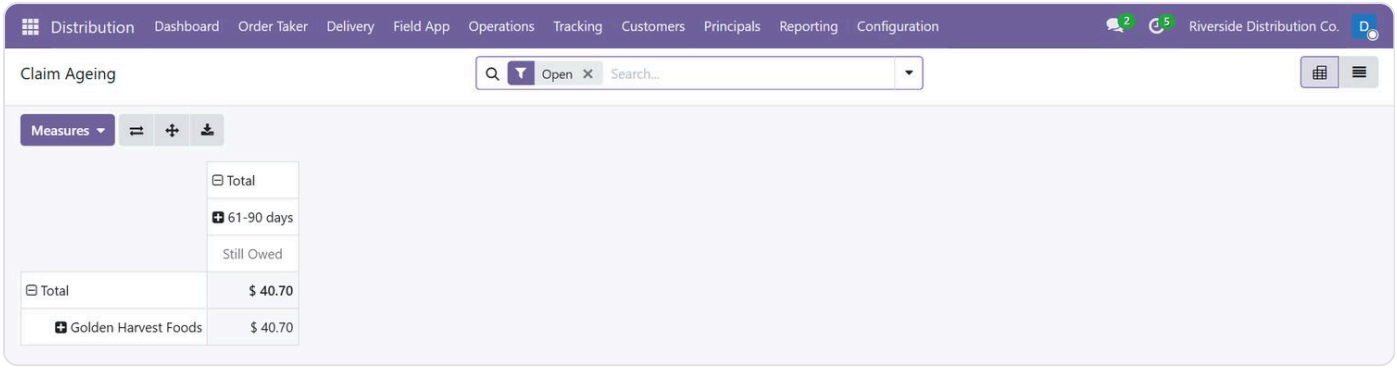

ENTERPRISE **Promotion ROI.** Sales during the promotion against a baseline, the extra sales, the cost and the extra sales per 1 spent.

ENTERPRISE **Claims.** One claim per principal and period. **Fetch Lines** collects the principal's share of promotions, damaged and expired goods taken back, and price differences. Submit, accept in full or in part, settle by credit note or receivable, and print the claim form for the principal to sign.

ENTERPRISE **Principal Scorecard.** For any period, per principal or brand: net sales, margin, returns, promotion cost, stock value, days of stock, outlets that bought, numeric distribution and open claims. Print it for the monthly meeting.

ENTERPRISE **Claim Ageing.** What each principal still owes, and for how long.

HOW IT WORKS

How return on promotion is measured

Sales of the promotion's products during the promotion are compared with a baseline: the same days last month, or the average of the 4 weeks before. The difference is the extra sales; divided by the promotion cost it gives the extra sales per 1 spent. Budgets alert the manager at 80% and 100% used, and a promotion can stop by itself when its budget is used up.

PART 15 Reports

Every report opens in pivot, list or graph, and the main ones print as PDF. Days, weeks and months follow the report time zone in Settings.

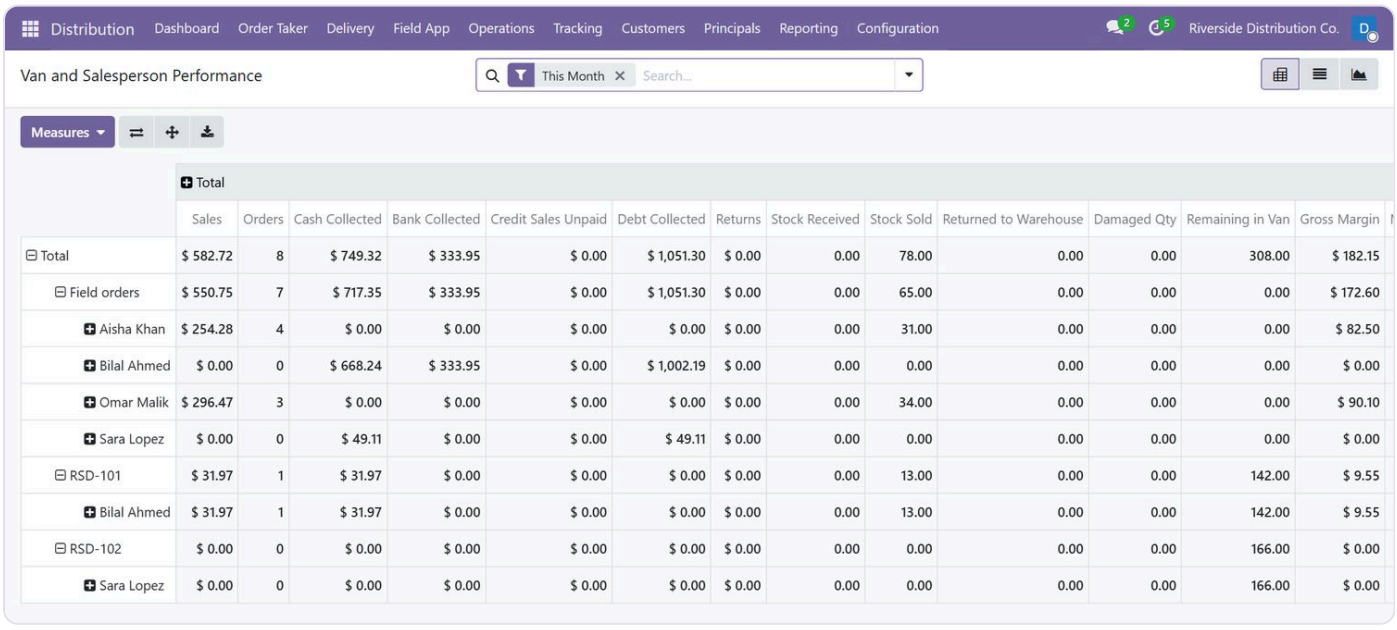

IN THIS PART YOU WILL LEARN

- Which report answers which question
- How margin and cost to serve are worked out
- How to print and email reports

TRY IT YOURSELF ON THE DEMO

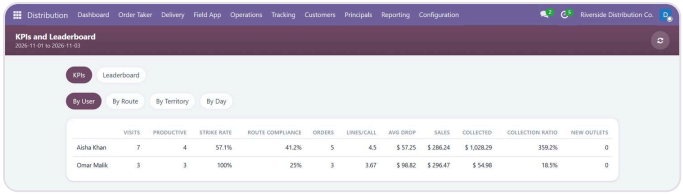

1. Open Reporting > Debt Ageing and expand one customer.
2. Open Reporting > KPIs and switch to By Route.
3. Open Reporting > Daily Sales Report and print today's report.

QUESTION	REPORT
Who is behind target this month?	Dashboard, Target Performance
Which salesperson or van earns the most margin?	Van and Salesperson Performance
Are reps visiting and selling?	KPIs: strike rate, route compliance, lines per call
Who owes us and how long?	Debt Ageing, Collection Planner, Customer Statement
Which routes or shops lose money?	Cost to Serve, Route Profitability
Where did van stock go?	Van Stock Movements, Van Settlements
What did vans cost to run?	Fuel, Cost per km
Is the shelf right?	Perfect Store
What happened today?	Daily Sales Report

	Sales	Orders	Cash Collected	Bank Collected	Credit Sales Unpaid	Debt Collected	Returns	Stock Received	Stock Sold	Returned to Warehouse	Damaged Qty	Remaining in Van	Gross Margin
Total	$ 582.72	8	$ 749.32	$ 333.95	$ 0.00	$ 1,051.30	$ 0.00	0.00	78.00	0.00	0.00	308.00	$ 182.15

Sara Lopez	$ 0.00	0	$ 0.00	$ 0.00	$ 0.00	$ 0.00	$ 0.00	0.00	0.00	0.00	0.00	166.00	$ 0.00

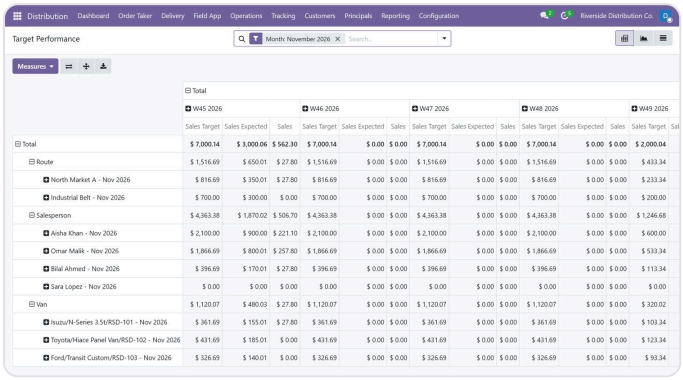

ENTERPRISE **Van and Salesperson Performance.** Sales, orders, cash and bank, credit sales, debts collected, returns, stock received, sold, damaged and left, with gross margin from real cost. Print Performance makes the PDF.

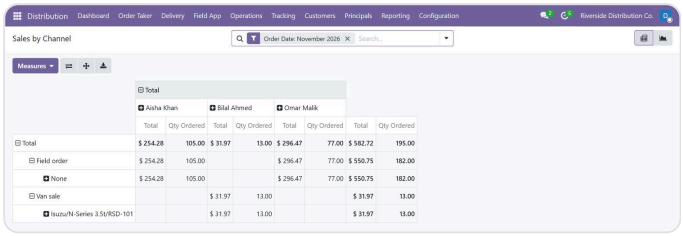

ENTERPRISE **KPIs**: visits, productive visits, strike rate, route compliance, lines per call, average drop, collection ratio, new outlets.

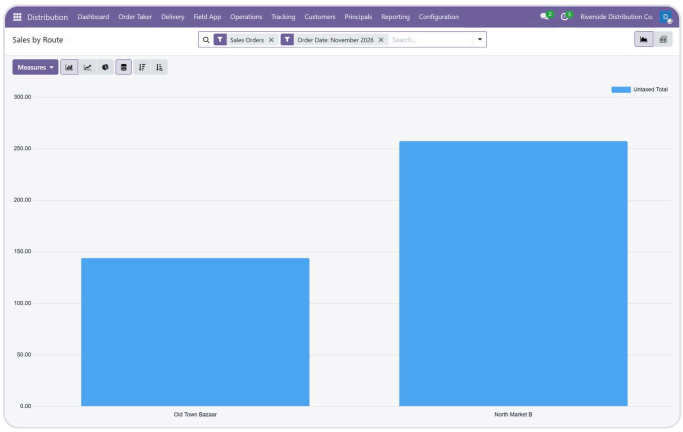

ENTERPRISE **Leaderboard**: the contest, its prize and the ranking.

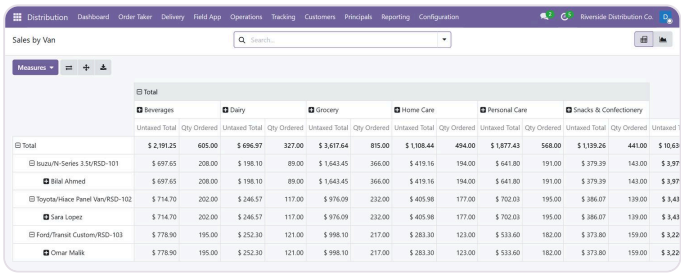

ENTERPRISE **Target Performance**: targets against actual by week, person, route and van.

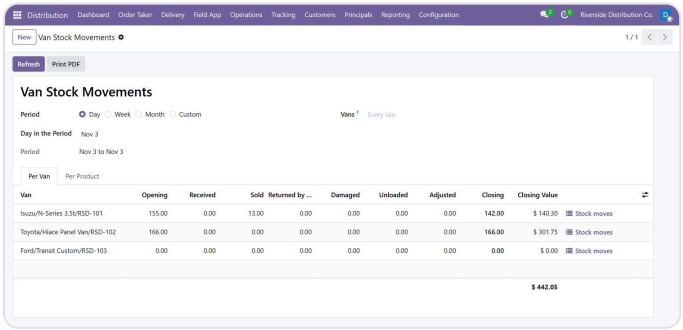

ENTERPRISE **Sales by Channel**: warehouse counter, field order and each van.

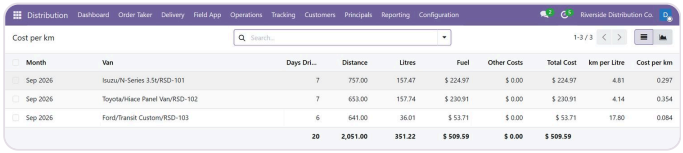

ALL EDITIONS **Sales by Route**: the standard Sales Analysis by route, territory and order taker.

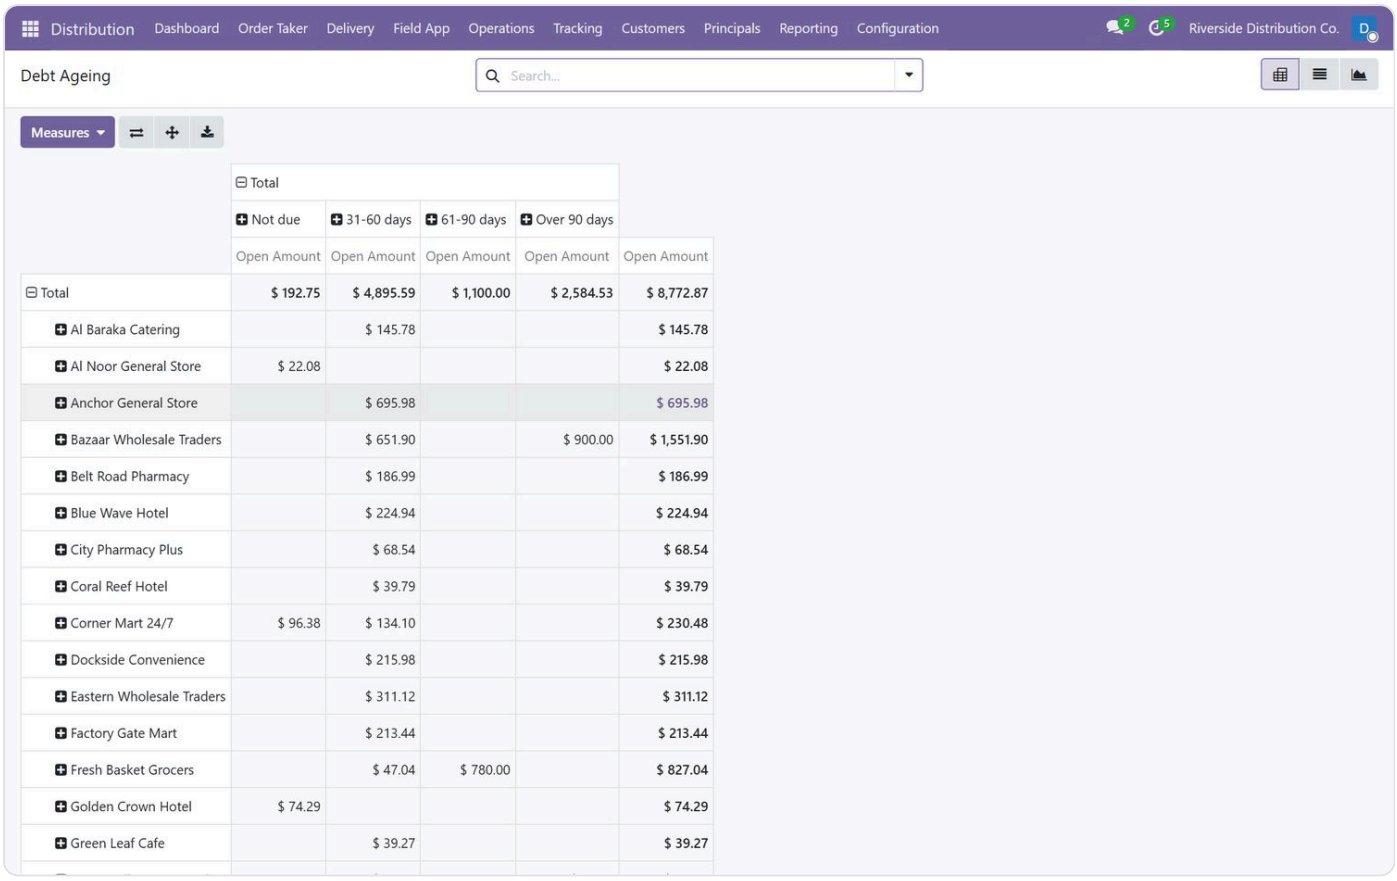

VAN SALES AND UP **Sales by Van**: sales per van and product category.

ENTERPRISE **Van Stock Movements**: opening, received, sold, returned, damaged, unloaded and closing per van.

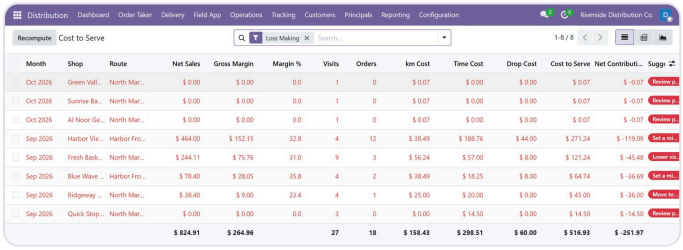

ENTERPRISE **Cost per km**: days driven, distance, litres, fuel and other costs per van and month.

	Total				
	Not due	31-60 days	61-90 days	Over 90 days	
	Open Amount	Open Amount	Open Amount	Open Amount	Open Amount
Total	$ 192.75	$ 4,895.59	$ 1,100.00	$ 2,584.53	$ 8,772.87
Al Baraka Catering		$ 145.78			$ 145.78
Al Noor General Store	$ 22.08				$ 22.08
Anchor General Store		$ 695.98			$ 695.98
Bazaar Wholesale Traders		$ 651.90		$ 900.00	$ 1,551.90
Belt Road Pharmacy		$ 186.99			$ 186.99
Blue Wave Hotel		$ 224.94			$ 224.94
City Pharmacy Plus		$ 68.54			$ 68.54
Coral Reef Hotel		$ 39.79			$ 39.79
Corner Mart 24/7	$ 96.38	$ 134.10			$ 230.48
Dockside Convenience		$ 215.98			$ 215.98
Eastern Wholesale Traders		$ 311.12			$ 311.12
Factory Gate Mart		$ 213.44			$ 213.44
Fresh Basket Grocers		$ 47.04	$ 780.00		$ 827.04
Golden Crown Hotel	$ 74.29				$ 74.29
Green Leaf Cafe		$ 39.27			$ 39.27

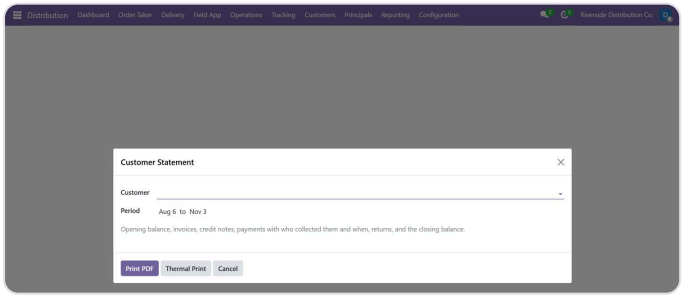

ENTERPRISE **Debt Ageing.** Not due, 1-30, 31-60, 61-90 and over 90 days, by customer, route and salesperson. **Debt Ageing PDF** prints it for a route, salesperson or region.

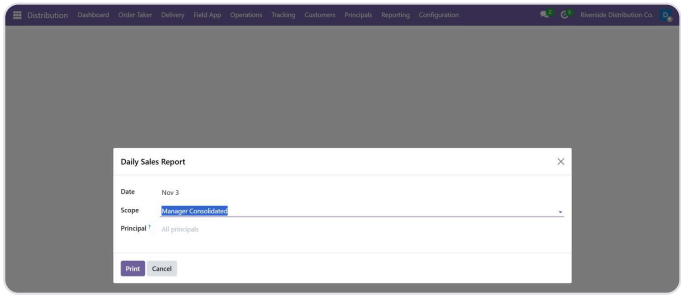

ENTERPRISE **Cost to Serve**: margin after km, time and drops per shop, and the shops that lose money.

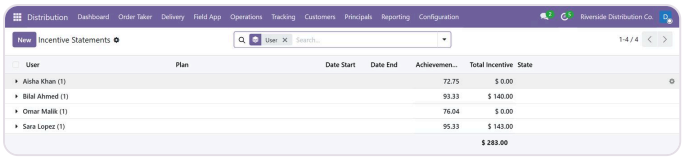

ENTERPRISE **Route Profitability**: net contribution of each route by month.

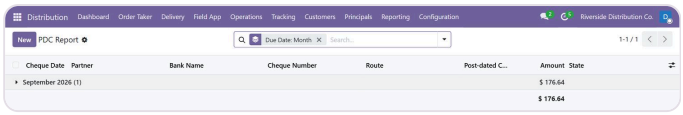

VAN SALES AND UP **Customer Statement**: any customer and period, as A4 PDF or a thermal print.

ENTERPRISE **Daily Sales Report**: print, or have it emailed to managers every evening.

ENTERPRISE **Incentives**: monthly statements with achievement and amount, to approve.

ENTERPRISE **PDC Report**: post-dated cheques by due date.

Also under Reporting: **Perfect Store** (scores by territory and shop type), **Contests**, **Sales Targets**, **Visit Analysis**, **Fuel** and **Cash Count History**.

HOW IT WORKS

How cost to serve is worked out

Each shop is costed per month from three things: kilometres driven on its route (from fuel logs and odometers, or the cost per km in Settings), time spent at the shop (staff cost per hour) and the number of deliveries (cost per drop). Gross margin minus cost to serve is what the shop really earns; shops below zero are listed with a suggestion.

PART 16 Controls and security

Clear rules on who does what, so the field cannot change what the office owns.

IN THIS PART YOU WILL LEARN

- Who can see and do what
- Which rules protect money and stock

CONTROL	WHAT IT MEANS	
Own work only	Each rep sees only their own routes, van, customers, visits and collections. The server checks ownership on every phone request.	ALL EDITIONS
Credit limit	Credit sales that would pass the limit are refused, counting orders not yet invoiced.	ALL EDITIONS
Maximum discount	No line discount above the maximum set by the manager.	ALL EDITIONS
Proof of delivery	With the setting on, no drop is validated without a signature.	ALL EDITIONS
Credit bands	Collect first, cash only or block, by score, with an Ask manager button.	ENTERPRISE
New shops	Cash only until a manager approves them.	ENTERPRISE
Settle before selling	No sales on a new day while an earlier day is not settled; one-day override from approvals.	ENTERPRISE
Approvals	Settlements with differences, cash counts, expenses, big returns and incentive statements need a manager. Nobody approves their own request.	ENTERPRISE
Cost and margin	Margin and credit scores are visible only to managers and accountants; the phone shows staff their sales, not the margin.	ENTERPRISE
Cash counts	Counted by note, recounted by the manager, shortages booked to the salesperson.	ENTERPRISE
Report time zone	One company time zone decides what "today" means, so a sale at 23:30 lands on the right day.	ENTERPRISE
Public reorder page	A long random link per shop that expires, stored hashed, with a rate limit.	ENTERPRISE

PART 17 A 15 minute demo script

Use this order when showing the app to a distributor. Open two windows side by side: the back office as daniel on the left and a phone view on the right. The phone does the work; the back office shows it arrive.

IN THIS PART YOU WILL LEARN

- A tested order to show the app in 15 minutes
- Answers to the questions prospects ask

TIME	DO THIS	SAY THIS
0:00	Ask: how many salespeople and vans, and do they pre-sell, van sell or both?	*"Let me show you a normal day at a distributor like yours, from the morning to the cash count at night."*
1:00	Back office: Routes, open Old Town Bazaar.	*"Every shop has a day and a person. Nobody decides on the road where to go."*
2:30	Phone as aisha: home, then the route.	*"Her target is on her phone. She knows she is behind before her manager tells her."*
4:00	Open a shop, Use suggestion, add a product, confirm.	*"The app suggests what the shop needs and why. Thirty seconds per order."*
5:30	Back office: Operations > Field Orders.	*"It is already here, ready for the warehouse."*
6:30	Phone: Heritage Pharmacy, then Bazaar Wholesale Traders.	*"The app stops your people selling more to shops that do not pay."*
8:00	Phone: Store check, tick two items, save.	*"Your brands want proof of shelf presence. This is it, with a score."*
9:30	Phone as bilal: Sell, Al Noor General Store, products, Cash, Confirm sale.	*"Order, invoice, payment and van stock in one tap."*
11:00	Phone: Finish day and Count notes and coins.	*"At night the van and the cash must match. Any gap shows that evening."*
12:00	Phone as daniel: Today, Approvals, Team.	*"The manager runs the team from his phone, wherever he is."*
13:30	Back office: Live Map, then Debt Ageing.	*"Where everyone is now, and who owes you money and for how long."*
14:30	Ask what they would change.	*"What does your day look like that we did not see here?"*

Questions prospects ask

QUESTION	ANSWER
Does it work without internet?	Yes, in Enterprise: sales, orders, deliveries, collections and returns are kept on the phone and sent once when the signal is back.
Does it need Odoo Enterprise?	No. It runs on Odoo 19 Community or Enterprise. "Enterprise" here is our edition of this app.
Does it work on iPhone and SUNMI?	Yes. Open /field in Safari and add it to the home screen. SUNMI handhelds print with the Android app.

Which printers?	Any 58 or 80 mm thermal printer the phone can print to, the SUNMI built-in printer, or PDF.
Do I need a Google Maps key?	No. Maps are built in, with a choice of map style.
Can we use our own products, prices and customers?	Yes. They are normal Odoo products, price lists and contacts.
Lots and expiry dates?	Not tracked. Expired returns go to quarantine so they are never resold, and are claimed from the principal.
Can a van keep selling without settling?	Not with Settle Before Selling on. A manager can allow one day from the approvals.

PART 18 Where to find everything

The back office menu in plain words. Everything sits under the **Distribution** app.

IN THIS PART YOU WILL LEARN

- Where every menu is and what it holds
- Where each feature is explained in this guide

Operations

Routes	Shops per route, visit days, team, optimise, load sheet
Visits	Every visit with outcome and reason
Store Checks	Perfect store checklists filled on the phone
Field Orders	Orders from the phones
Counter Sales	Sales at the warehouse counter
Shop Orders	Orders shops sent from a reorder link
Reorder Links	Links sent to shops, expiry, orders
Deliveries	Open and done drops, signatures, photos
New Shops	Shops added on the road, waiting for approval
Approval Requests	Everything waiting for a manager
Quarantine	Expired returns kept for claims
Collections	Payments taken on the road
Counter Days	Each counter day and its cash
Vans	Vans, drivers, van stock
Expense Claims	Fuel, food, tolls with receipts
Van Assignments	Van, driver and route per day
Van Loading	Load and unload requests to validate
Van Settlements	End of day per van
Cheques	Received, deposited, cleared, bounced
Cash Counts	Counts by note, recounts
Collection Planner	Who to chase, most urgent first
Promises to Pay	Open, kept or broken

Tracking

Live Map	Everyone on duty now
Route Replay	Play back a day's path
Customer Map	Shops by days since last order
Field Exceptions	Late starts, fences, long stops
Location History	Positions recorded on duty

Customers

Customers	Shops on routes, credit, statement

Principals

Claims	Claims to principals
Claim Ageing	What principals still owe
Principal Scorecard	Results per principal or brand
Promotion Cost	Cost by funder
Promotion Budgets	Budgets and alerts
Promotion ROI	Extra sales per 1 spent
Principals, Brands	Who makes what

Reporting

Performance	Van and salesperson results with margin, and PDF
Van Stock Movements	Stock in and out per van
Customer Statement	A shop's account, PDF or thermal
KPIs, Leaderboard	Field performance and points
Perfect Store	Store check scores
Contests	Weekly or monthly prizes
Sales by Route	Sales Analysis by route
Sales by Channel	Counter, field, each van
Sales by Van	Sales per van
Visit Analysis	Coverage and reasons
Sales Targets	Set and follow targets
Target Performance	Targets by week and person
Fuel, Cost per km	What vans cost to run
Incentives	Commission statements
Debt Ageing (and PDF)	Unpaid bills by age
Daily Sales Report	Printed or emailed each evening
PDC Report	Post-dated cheques
Cost to Serve	Margin after km, time, drops
Route Profitability	Net per route
Cash Count History	Counts and differences

Configuration

Settings	Every option of Part 4.2
Territories	Regions, cities, areas
Route Stops	All stops of all routes
Reasons	No order, skip and return reasons
Schemes	Promotions
Store Checklists	Perfect store per shop type
Incentive Plans	How commission is worked out
Points Rules, Badges	Leaderboard scoring
Field Devices	Phones and handhelds
Notes and Coins	Cash count denominations
Credit Risk Bands	A, B, C, D rules

All editions ● Van Sales and up ● Enterprise
