16. Questions people ask

1. What the app does and who uses it

One place for the school office and the teachers: applications, students, enrollments, fees, daily attendance, the timetable, assignments and marks, online exams and transport. With the Academic Reports add-on it also prints the report card, the class result sheet and the transcript.

Who	What they do in the app
School administrator	Sets up sessions, grades, subjects, fee structures and grade scales. Confirms applications and enrolls students. Prints report cards when the Academic Reports add-on is installed. Full access.
Office / admissions officer	Handles applications, students, enrollments, fee slips, transport, notices. Cannot delete configuration.
Teacher (staff)	Marks attendance, creates assignments for their subjects, enters marks, runs exams, writes lesson plans.

The top menu follows the school's own order of work: **Applications → Students → Enrollments → Academics → Exams → Assignments → Fees → Attendance → Transport → Other → Configuration**.

2. Give people access

1. Go to **Settings → Users & Companies → Users** and open the person.
2. Under **WT School Management** pick **Staff** (teachers), **Officer** (office) or **Administrator**.
3. Save. The person sees the School Management app on their next login.

> A user without one of these three roles sees an "Access Error" on every school screen, including the person who installed the app. Give yourself **Administrator** first.

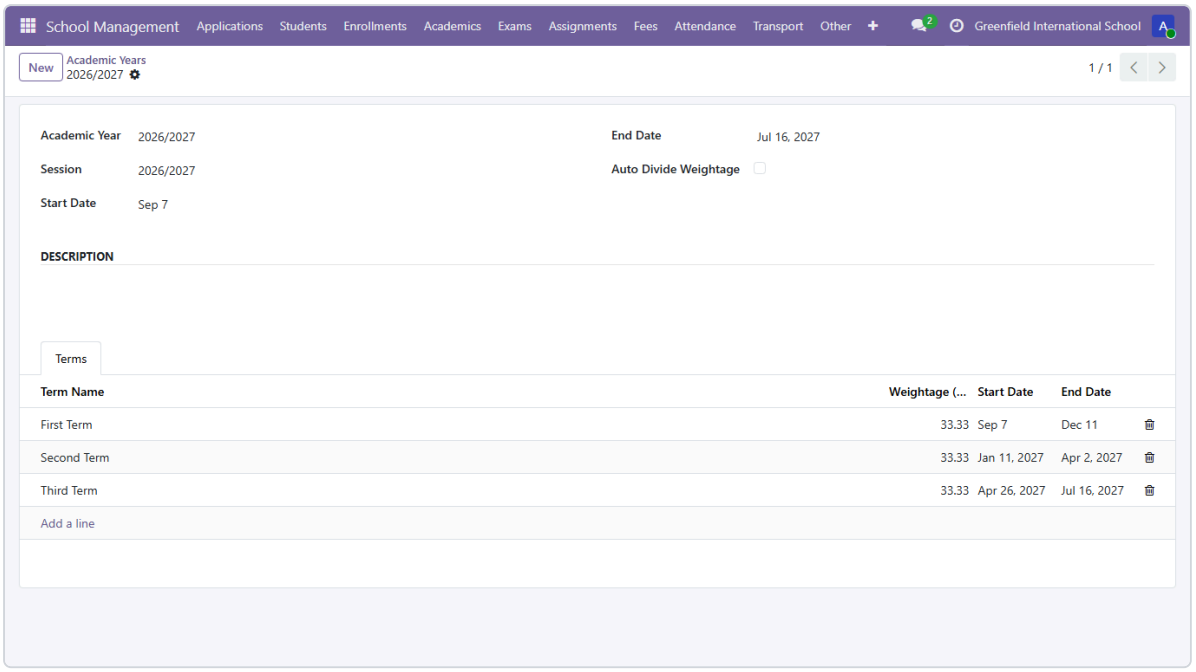

3. Set up the school (do this once)

Work top to bottom; each step feeds the next.

3.1 Session and academic year

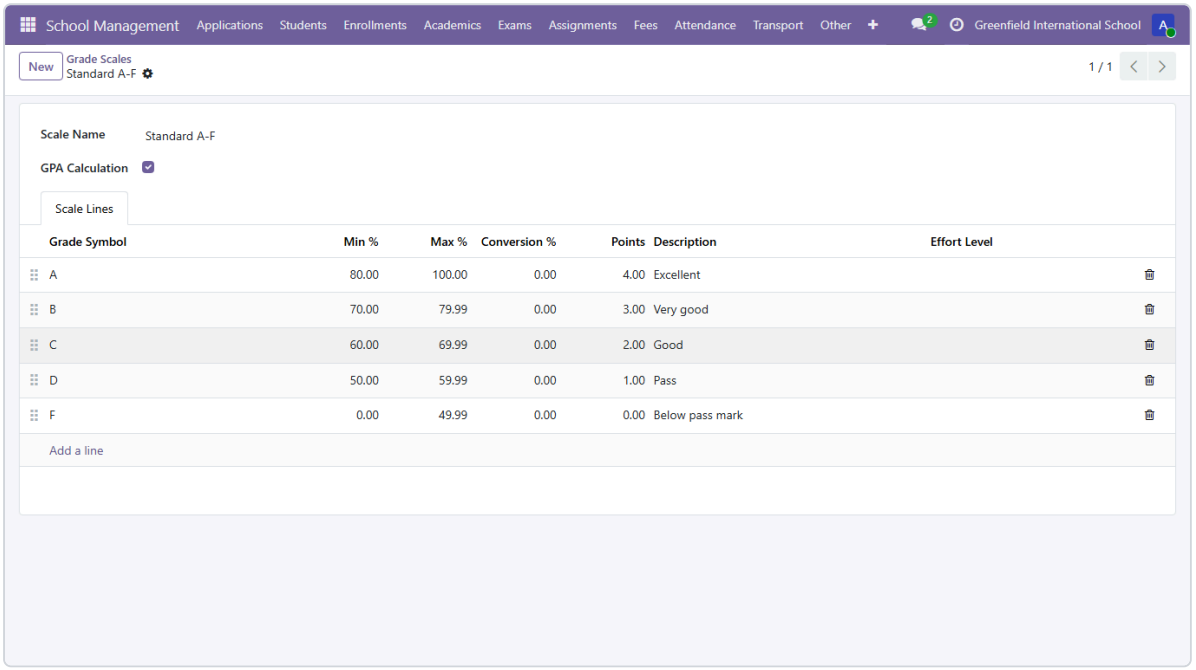

Academics → Sessions: a session is the school year as the office names it, for example `2026/2027`, with its start and end dates and a status (New, In Progress, Completed).

Academics → Academic Years: the same year with its **terms**. Add each term with its dates and weightage (First Term 33.33, Second Term 33.33, Third Term 33.34, or two semesters at 50 each). Tick **Auto Divide Weightage** to split evenly. Terms are what marks are entered against and what report cards are printed for.

3.2 Grade scales

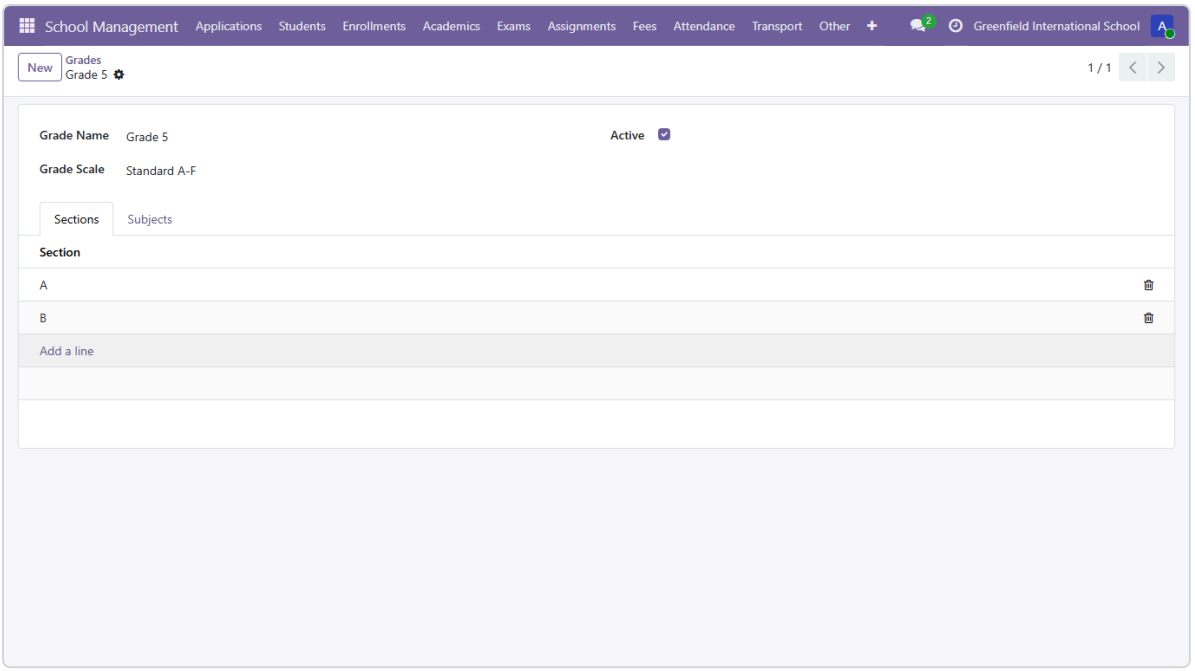

Academics → Grade Scales: the bands that turn a percentage into a grade symbol and points. One line per band: symbol, Min %, Max %, points (used for GPA), and a short description that prints on the report card as the remark.

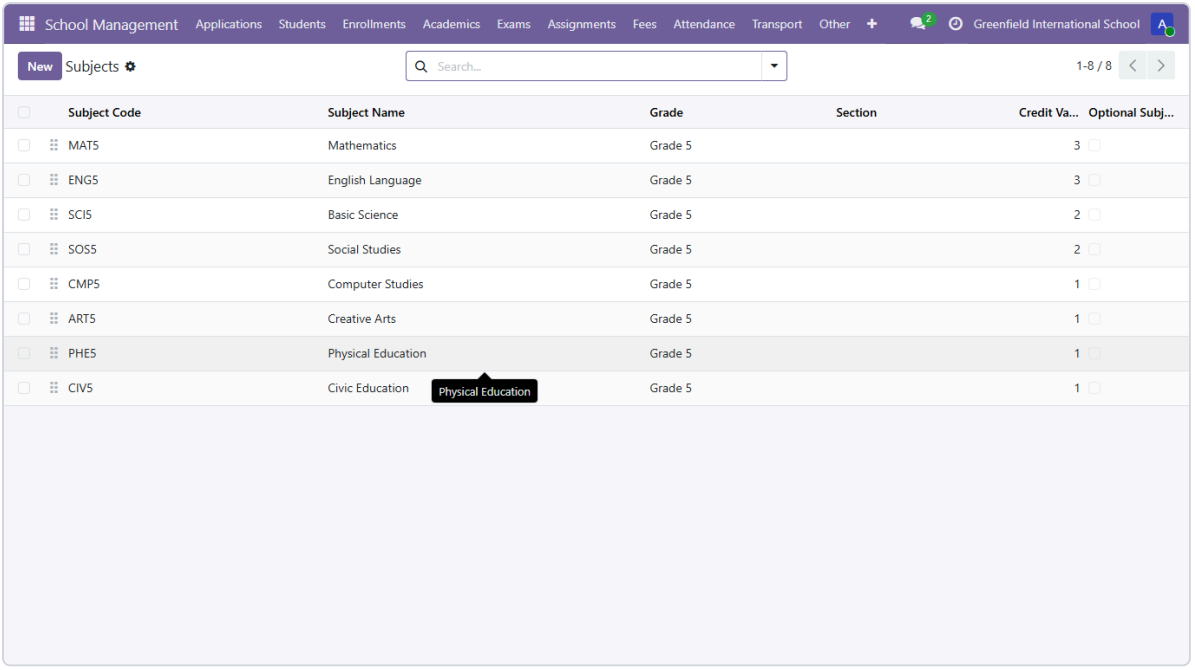

> Tick **GPA Calculation** on the scale you want used for the overall grade on report cards. Bands are inclusive: A = 80 to 100, B = 70 to 79.99, and so on.

3.3 Grades, sections and subjects

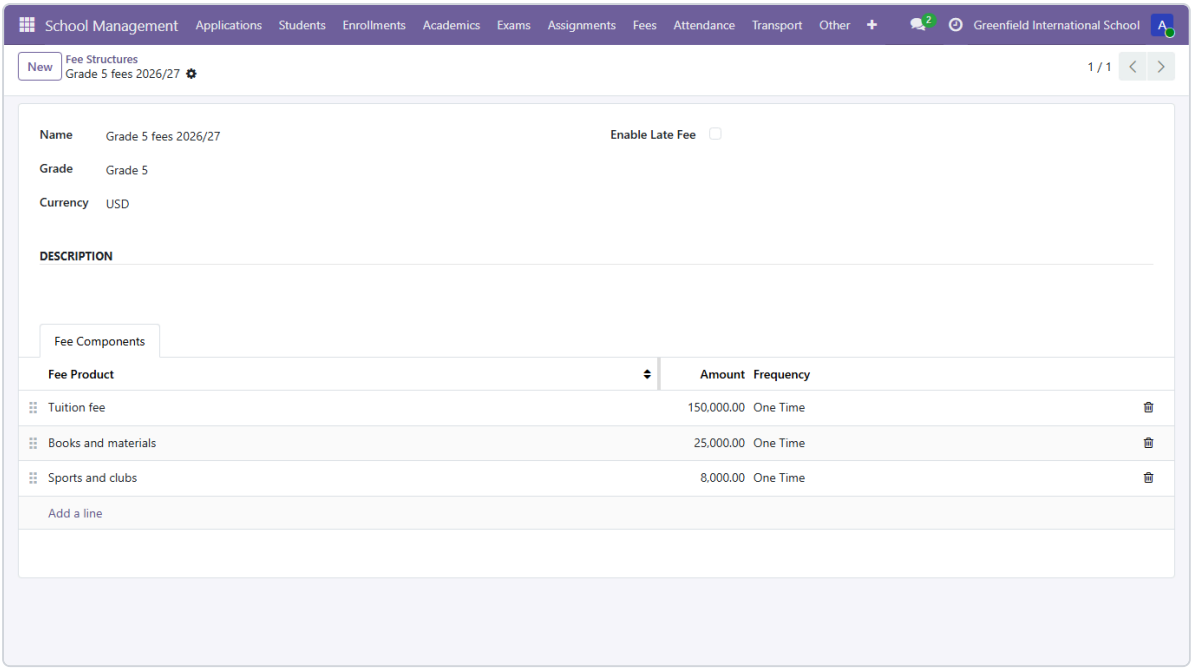

Academics → Grades: one record per grade or class level (Pre-K, KG, Grade 1 to 12). Pick its grade scale, add its **sections** (A, B, C) and its **subjects**. Each subject has a code (unique inside the grade), a credit value (weight in the GPA), an optional flag, its own grade scale if it differs, and the teachers who take it.

3.4 Fee structures

Fees → Fee Structures: one per grade (or per grade and year). Add components as lines: tuition, books, transport, sports, each with a fee product and an amount. Optionally switch on a late fee. An enrollment picks a fee structure, and the fee summary and slips come from it.

3.5 Classrooms, time slots, assignment types, discipline types

Configuration holds the small lists: classrooms (locations), the day's time slots, assignment types (Class Test, Assignment, Examination, Project), and discipline types. Fill them once; the forms then offer them as choices.

4. Admissions: from application to enrolled student

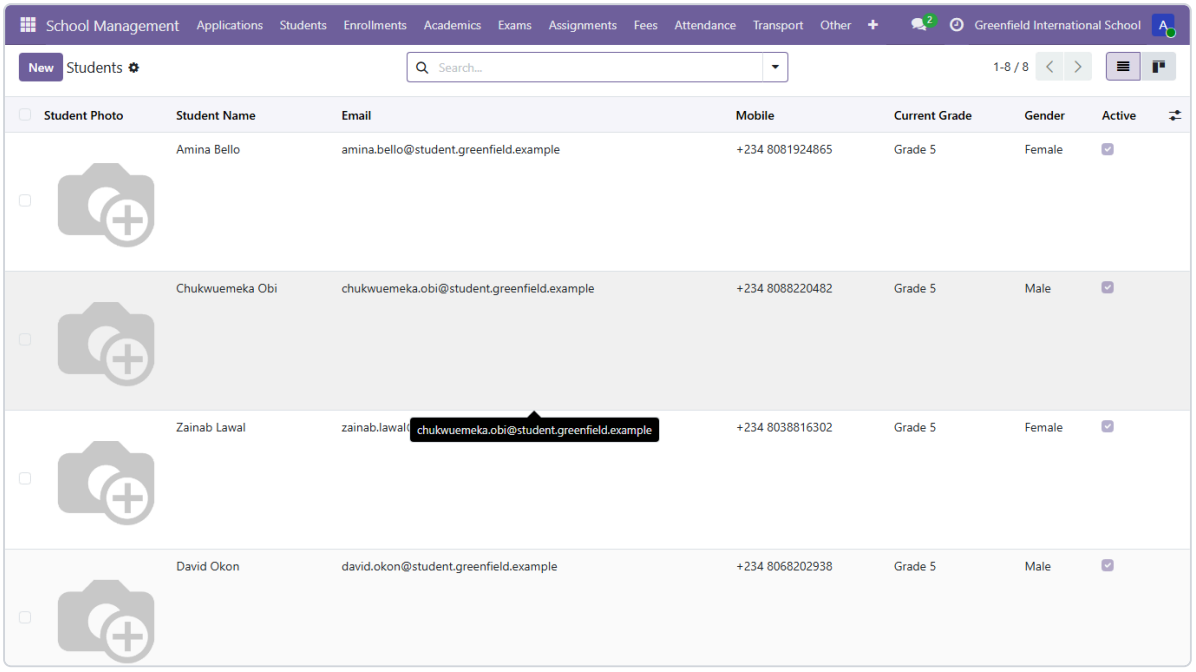

1. Applications → New: the applicant's name, gender, date of birth, parents and contacts, the grade applied for. Attach documents in the chatter.
2. **Confirm** when the office accepts the application.
3. **Enroll**: the app creates the student record (if it does not exist yet) and an enrollment in the chosen session, grade and section with the fee structure. Everything typed on the application is carried over, nothing is typed twice.

> An application can also be cancelled or reset to New. Enrolling twice is refused: the student already has an enrollment for that session.

5. Students and enrollments

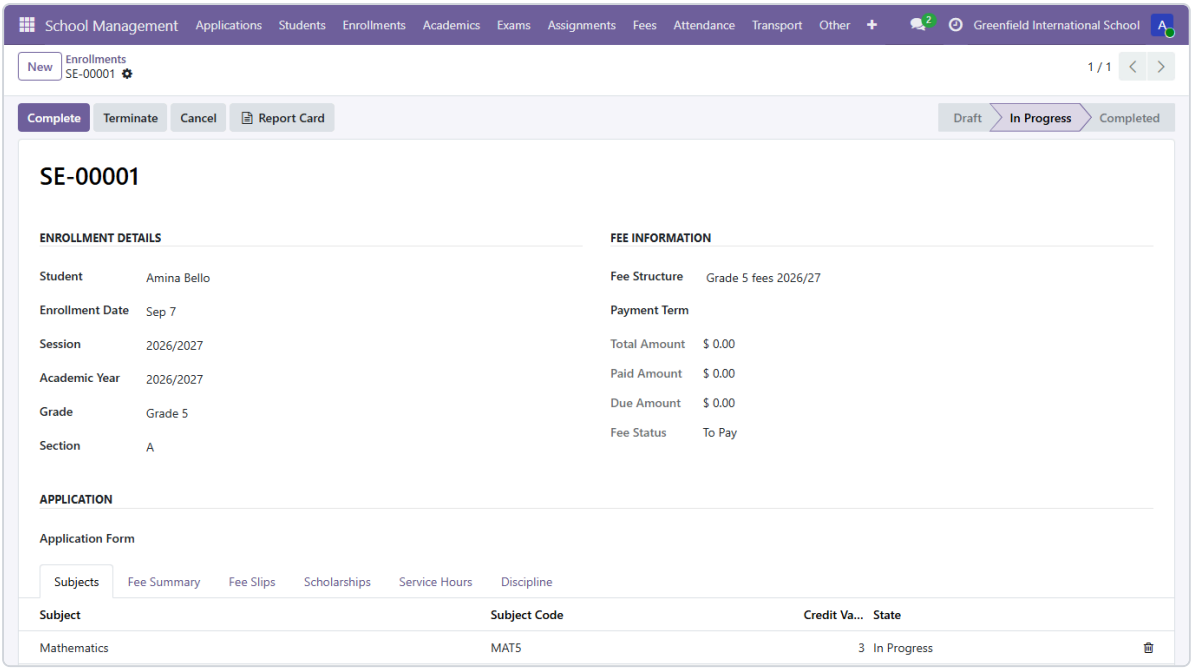

5.1 The student record

Students is the directory: photo, personal details, address, parents with their contacts and occupations, medical notes (food and medicine allergies, known illness), a barcode for ID cards and attendance devices, transport on or off, and a related user if the student (or parent) logs in. The tabs show every enrollment and the attendance history.

5.2 The enrollment

An **enrollment** is one student in one session: grade, section, academic year, fee structure and payment term. Its tabs hold the subjects the student takes, the fee summary and fee slips, scholarships, service hours and discipline records. The status runs Draft → In Progress → Completed, or Promoted, Terminated, Cancelled.

- **Subjects**: add the subjects of the grade (compulsory ones plus the optional ones the student chose). Each line carries the subject's scale and credit value; marks and term reports hang off these lines.
- **Confirm** puts the enrollment In Progress. **Promote** at year end moves the student on; create the next year's enrollment from the student record.
- **Report Card** in the header prints the student's card when the Academic Reports add-on is installed (section 11).

6. Fees

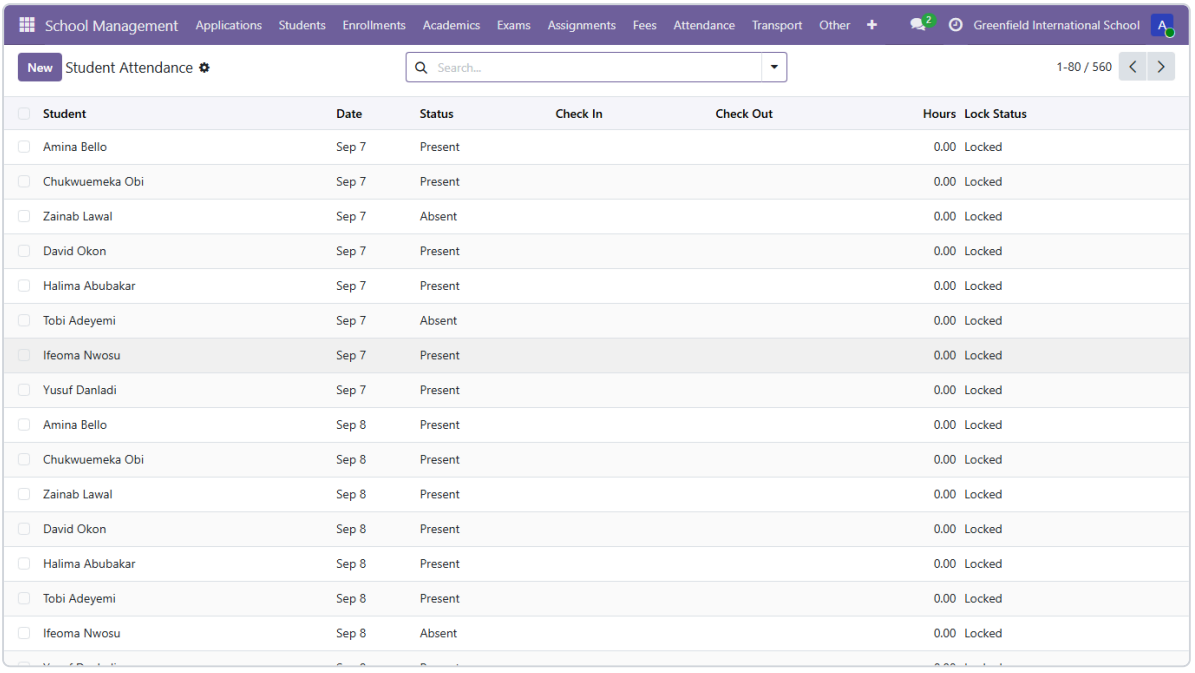

The enrollment shows **Total Amount**, **Paid Amount**, **Due Amount** and a fee status (To Pay, Partially Paid, Fully Paid) computed from its fee slips.

1. **Fees → Fee Slips → New**: pick the enrollment and the period (From and To dates); add the fee lines (each a fee product and an amount, the same components as the fee structure). The slip gets its number on save.
2. **Confirm** the slip: it is now To Pay. When the office receives the money, press **Paid**. A slip past its period can be set **Overdue**; a wrong one is cancelled.
3. **Fees → Fee Slips** grouped by status is the list to chase. A slip can be linked to an invoice in Accounting when the school wants the money in the books.

> A **scholarship** (section 13) is recorded with its amount and approver on the enrollment; reflect it on the slip by lowering the fee line or adding a negative line, so the slip shows what the family actually pays.

7. Attendance

Attendance → Student Attendance: one line per student per day, Present or Absent, with optional check-in and check-out times. Teachers mark it from the list (group by grade or section, select the rows, set the status) or per student. **Lock** a day once it is final; locked lines cannot be edited by staff.

Student	Date	Status	Check In	Check Out	Hours	Lock Status
Amina Bello	Sep 7	Present			0.00	Locked
Chukwuemeka Obi	Sep 7	Present			0.00	Locked
Zainab Lawal	Sep 7	Absent			0.00	Locked
David Okon	Sep 7	Present			0.00	Locked
Halima Abubakar	Sep 7	Present			0.00	Locked
Tobi Adeyemi	Sep 7	Absent			0.00	Locked
Ifeoma Nwosu	Sep 7	Present			0.00	Locked
Yusuf Danladi	Sep 7	Present			0.00	Locked
Amina Bello	Sep 8	Present			0.00	Locked
Chukwuemeka Obi	Sep 8	Present			0.00	Locked
Zainab Lawal	Sep 8	Present			0.00	Locked
David Okon	Sep 8	Present			0.00	Locked
Halima Abubakar	Sep 8	Present			0.00	Locked
Tobi Adeyemi	Sep 8	Present			0.00	Locked
Ifeoma Nwosu	Sep 8	Absent			0.00	Locked

Attendance → Public Holidays: dates the school is closed. They are skipped when attendance is counted.

> The report card of the Academic Reports add-on counts attendance from these lines, inside the term's dates: school days, present, absent and the percentage. Keep marking daily and the card is right without any extra work.

8. Timetable, classrooms and lesson plans

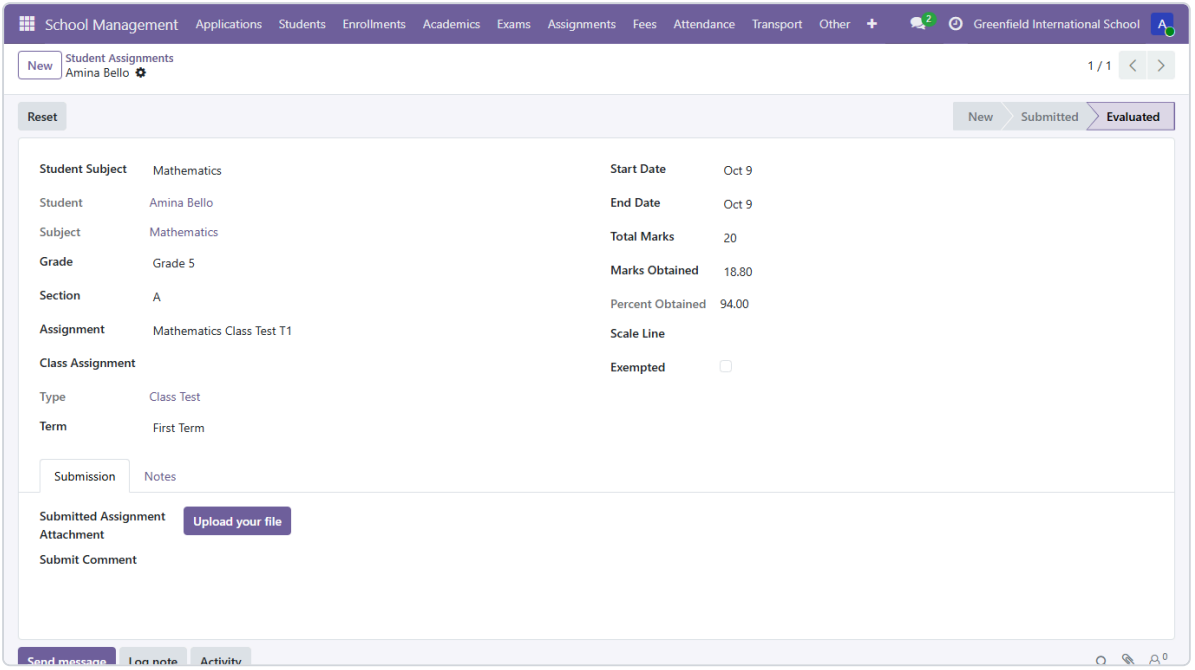

1. **Configuration → Classrooms** and **Time Slots**: the rooms and the periods of the day (08:00-08:45, ...).
2. **Academics → Classes** (Populate Class): a class is a grade and section in a session; it is what the timetable and class assignments are built on.
3. **Academics → Timetables**: one session per subject, teacher, classroom, weekday and time slot. Group the list by class, by teacher or by classroom to check a week for double bookings.

Other → Lesson Plans: what a teacher plans to cover for a grade, section and subject, written up in the description, visible to everyone or only to its author, and approved by the person responsible.

9. Assignments and grading

Marks flow in three steps, and the third one is what the term reports and the printed report card read.

1. **Assignments → Grade Assignments**: the teacher defines a piece of work for a grade and subject: name, type (class test, assignment, examination), description and attachments. **Approve** it.
2. **Assignments → Class Assignments**: schedule it for a class with start and end dates and the total marks. **Start** it; the app creates one **Student Assignment** per student taking that subject. Per-type weightages can be set on the class.
3. **Assignments → Student Assignments**: the student's copy. The student (or the teacher) submits with an attachment, the teacher enters **Marks Obtained**, picks the **Term**, and presses **Evaluate**. The percentage and grade scale line are computed.

> Only assignments in the **Evaluated** state, with a **Term** set and not marked **Exempted**, count on the report card. If a subject shows "Not assessed" on a card, one of these three is missing.

10. Exams and seating plans

Exams → Exams: an exam for a grade and subject with a date, duration, pass marks and instructions. Add questions of three kinds: multiple choice (with the correct choice ticked), true or false, and subjective (free text). Each question carries its marks; the exam total is their sum. Publish it, start it on the day, complete it after.

Every student's paper is a **submission** under **Exams → Submissions**, one answer line per question. The teacher enters or confirms the marks per answer and presses **Grade**; the score, the percentage and pass or fail against the pass marks are computed.

Exams → Seating Plans: for a written exam in a hall, give the number of rows and columns and press **Generate Seats**; the app lays out the seats (A1, A2, ...) and you place a student on each, then finalise the plan.

> To carry exam marks into the report card, create an **Examination** type assignment for the term and enter the marks there (section 9). Online exams and report cards are linked through that entry, so the teacher stays in control of what counts.

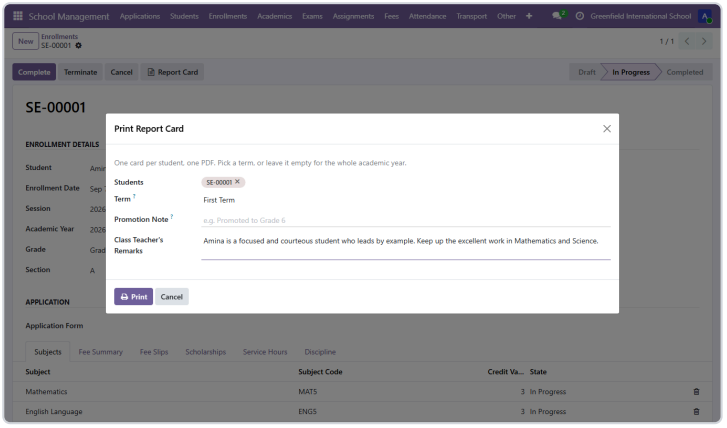

11. Report cards, result sheets and transcripts

These three printed reports come with our **School Academic Reports** add-on (`wt_school_academic_reports`, sold separately on the Odoo store). Install it on top of this app and the buttons and menus below appear. Everything on the reports is computed from the records when you print, nothing is typed twice.

11.1 The Student Academic Report Card: how to print

A one-page A4 PDF per student, for one term or the whole academic year.

- **One student**: open the enrollment (or the student) and press **Report Card** in the header.
- **A whole class**: **Enrollments**, filter the grade and section, tick the students, **Actions → Print Report Card**. One PDF, one page per student, in one go.

In the dialog: pick the **Term** (leave it empty for the whole year), add the **class teacher's remarks** and, at year end, a **promotion note**. Press Print.

CLASS TEACHER'S REMARKS

Amina is a focused and courteous student who leads by example. Keep up the excellent work in Mathematics and Science; a little more care with handwriting in English will make her work shine.

Grading scale (Standard A-F): **A** 80-100% Excellent **B** 70-79.99% Very good **C** 60-69.99% Good **D** 50-59.99% Pass **F** 0-49.99% Below pass mark

Class Teacher | Principal | Parent / Guardian

Printed 09/18/2026 · Greenfield International School · SE-00001

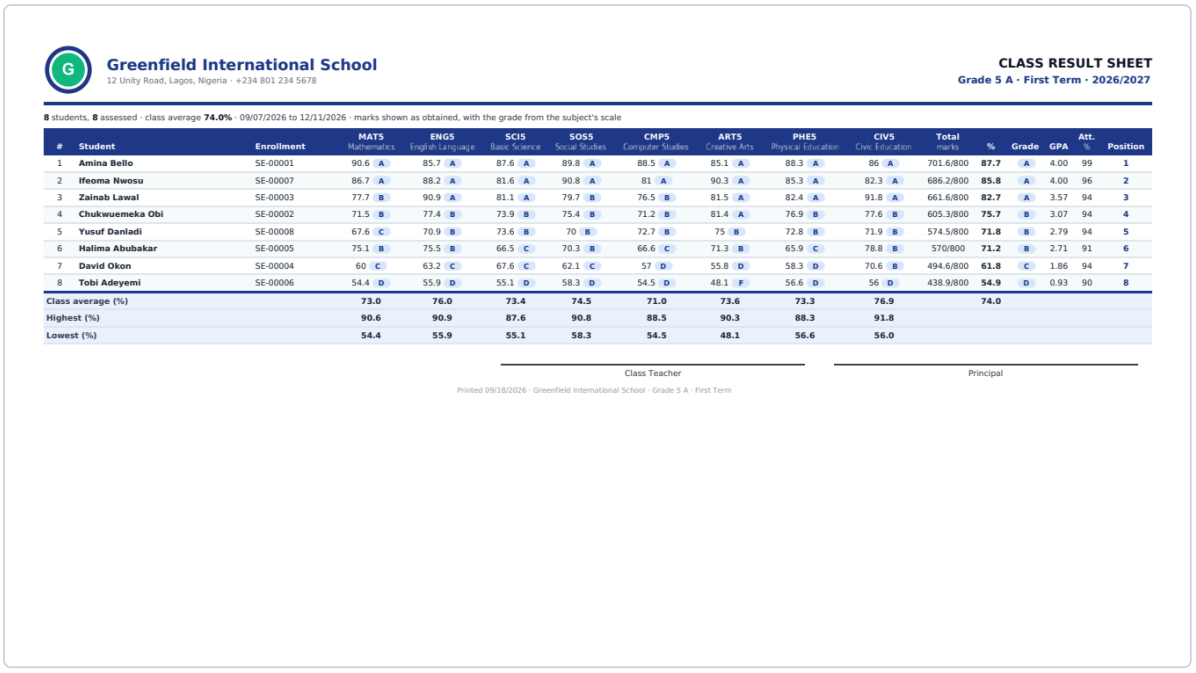

Block	Where it comes from
School header	Company name, logo, address, phone and email from **Settings → Companies**. Change the logo there and every card follows.
Student block	Photo, name, enrollment number, grade and section, academic year, date of birth, parents, the period covered.
Subject rows	One row per subject on the enrollment: teacher, code, credits, number of evaluated assessments in the period, marks obtained, marks out of, percentage, grade symbol and points from the subject's grade scale, and the scale's description as the remark.
Total	All marks added; the overall percentage; the overall grade from the grade's own scale (or the GPA scale when the grade has none); GPA weighted by credits.
Position in class	Rank among the students of the same grade, section and session by overall percentage, for example "3rd of 28".

Attendance	School days, present, absent and percentage from the attendance lines inside the period.
Conduct	Discipline records dated inside the period, if any. Nothing prints when there are none.
Remarks and signatures	The text from the dialog, then lines for class teacher, principal and parent.

> Print the cards after the last assessment of the term is evaluated and attendance for the term is locked. Print again any time: the card always reflects the current records.

11.3 The Class Result Sheet

Academics → Reports → Class Result Sheet (or select enrollments and use **Actions** → **Print Class Result Sheet**). Pick the academic year, grade, section and term; the dialog shows how many students it covers. Leave the section empty for the whole grade, the term empty for the whole year.

Class Teacher Principal

Printed 09/18/2026 · Greenfield International School · Grade 5 A · First Term

One landscape page: a row per student, a column per subject with the marks and the grade, then total, percentage, grade, GPA, attendance and position. The class is ranked by overall percentage; a student with no evaluated assessment yet sits at the bottom without a rank. Under every subject: the class average, the highest and the lowest percentage.

11.4 The Student Transcript

On the student form press **Transcript**, or use **Print** → **Transcript** on the student list. There is nothing to fill in.

Registrar — Principal

Printed 09/18/2026 · Greenfield International School · Official transcript of Amina Bello

A block per academic year on record, oldest first: grade and section, status, the full-year marks per subject, the year total, position and attendance. At the bottom the cumulative credit-weighted GPA, the overall average, the credits and the span of years. Cancelled enrollments stay off it.

12. Transport

1. Transport → Locations: the stops.
2. Transport → Routes: a route has a transport manager, a vehicle and driver (from Fleet), an ordered list of stops with pickup and drop-off times, and the students who ride it. Switch **Transport Enabled** on the student.
3. Transport → Trips: a trip is one run of a route on a date with the students on board; tick **Picked up** and **Dropped off** per student with the times, for the morning and afternoon checks.

13. Scholarships, discipline, service hours, notice board

- **Scholarships** (Fees → Scholarships): an award for a student's enrollment with its amount, the approving staff member, a paid date and a status; it can be linked to an invoice.
- **Discipline** (Other → Discipline): incident date, type, summary and the action taken, on the student's enrollment. Records dated inside a term print in the Conduct block of the report card.
- **Service hours** (Other → Service Hours): community service or club hours logged per student with a start time, the hours, a supervisor and a comment; the total shows on the enrollment.
- **Notice board** (Other → Notice Board): notices with a title, text, start and end dates and an audience (All, Students only, Teachers only). Archive a notice to take it down early.

14. Teachers and staff

Teachers are **employees** (Employees app, installed with this one). On the employee, tick **Is Teacher** (or **Is Supervisor**) and pick the subjects they teach. The timetable, assignments and subject records then offer them. Staff attendance and leave use Odoo's own Attendance and Time Off apps, also installed with this one; transport routes take their vehicles and drivers from the Fleet app.

15. A term in practice: the checklist

When	Do
Before the year	Session and academic year with terms; grade scales; grades, sections, subjects, teachers; fee structures; classrooms and time slots; timetable.
Admissions	Applications → Confirm → Enroll. Check subjects on each enrollment. Confirm enrollments. Generate fee slips.
Every day	Attendance per class; lock the day.
During the term	Grade assignments → class assignments → marks and Evaluate, each with its Term. Fee slips marked paid as money comes in; chase Overdue.
End of term	Last examination entered and evaluated; attendance locked; Enrollments → select the class → Print Report Card with remarks.
End of year	Whole-year report cards with the promotion note; Promote enrollments; new session and academic year; new enrollments.

16. Questions people ask

A subject prints "Not assessed". Its assignments are not Evaluated, have no Term, or are Exempted. Fix the student assignment and print again.

The grade letter is wrong or empty. Check the subject's grade scale bands: they must cover 0 to 100 without gaps. The overall grade uses the scale with GPA Calculation ticked.

Attendance shows 0 days. No attendance lines fall inside the term's dates for that student. Check the term dates on the academic year.

Position in class is missing. Only students with at least one evaluated assessment in the period are ranked; if the student is alone in the section it shows 1st of 1.

Can we change the design? Yes. The card is a QWeb report (`wt_school_management.report_card`); your logo, name and address already come from the company. Colours, wording and extra blocks are a small customisation; ask us.

Support: info@way4tech.com · way4tech.com. Quote your Odoo version and the app version (19.0.1.2.0).
