

Printing Press Management for Odoo 19

A guided tour of the demo, in place of a video

Demo site: <https://printing-demo.way4tech.com>

Login details are in the message this guide came with.

September 2026

How to use this guide

This guide follows the same path a walkthrough video would, one screen at a time. Each step tells you where to click, what you are looking at, and why it matters to a print shop. The pictures are taken from the demo site itself, so what you see when you log in is exactly what is shown here.

Reading it end to end takes about fifteen minutes. Better still, open the demo alongside it and click as you go. Nothing you do on the demo can break it, and we reset it between visitors. Part 6 at the end is a short exercise that takes a job from a blank estimate to an invoice.

What the demo shop is

The demo is Riverside Press Ltd, a commercial printer in Leeds. It runs three presses (a five-colour Speedmaster XL 75, a two-colour Speedmaster SM 52 and a Versant 280 digital), carries seven paper stocks and eight finishing operations, and has a month of real work on the books: twenty estimates and thirteen job tickets at every stage from prepress to invoiced, with proofs, spoilage records and one reprint.

Every figure in the demo was produced by the system doing the work. Nothing was typed in to look good. When a job shows 1,440 sheets spoiled getting to colour, that is what the make-ready allowance on that press and that run worked out to.

What is in the module

Estimating	Imposition, paper, plates, press time, finishing and overhead built up to a price with a target margin. Quotes emailed from the estimate. Sent, approved, lost and expired tracked.
Job tickets	One ticket per job, from prepress through proofing, press, finishing, despatch and delivery to invoice, with the buttons changing as the job moves.
Proofs	Numbered proof versions sent to the customer and approved by a named person. Nothing goes on press without an approved proof.
Spoilage and reprints	Spoiled sheets recorded against a reason. A press fault forces a reprint at the shop's cost; a customer fault can be charged.

Costing

Actual paper, press and finishing cost against the estimate, and the invoice raised at the quantity actually delivered.

Reporting

Estimated against actual by press, waste by reason, reprints, and the estimating win rate.

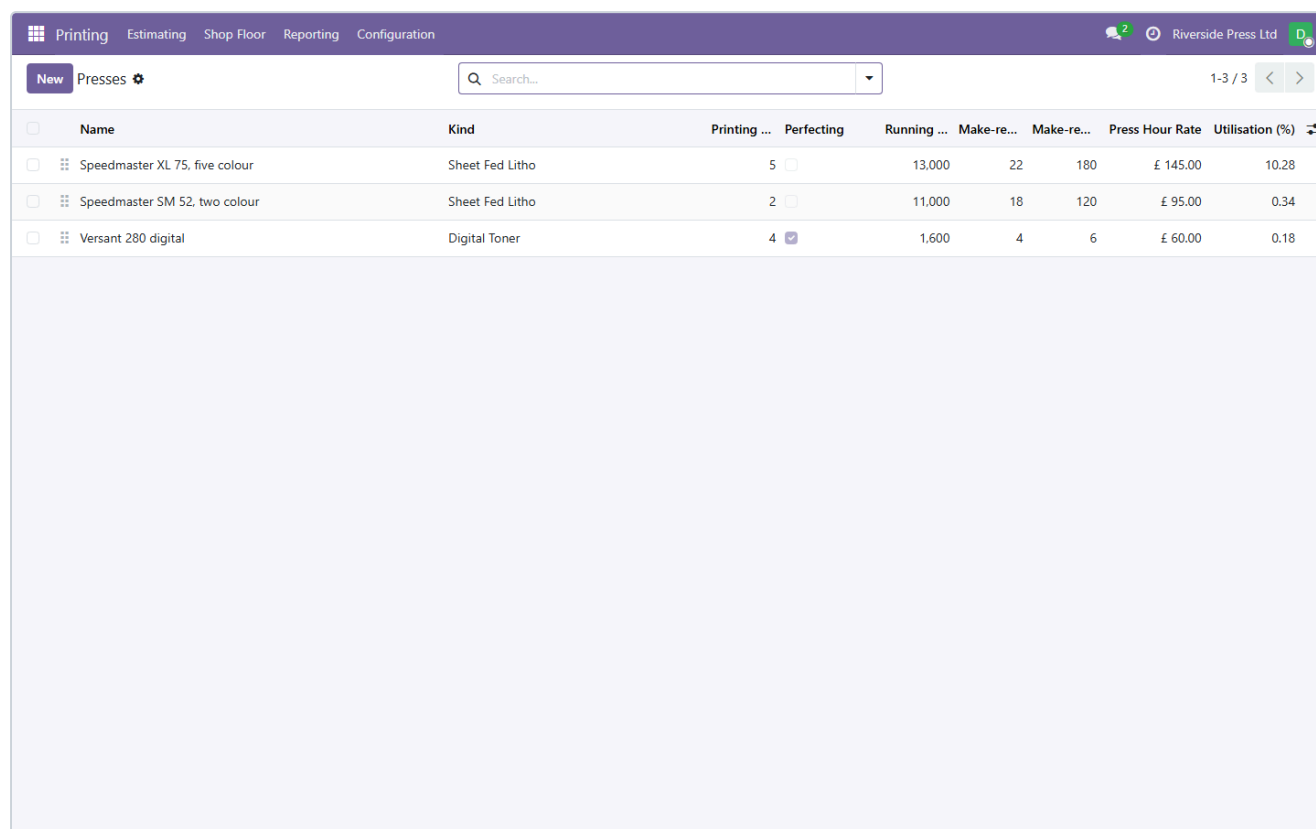

Part 1. The set-up that drives every price

1 Presses

Where: Printing, then Configuration, then Presses

Each press carries what the estimator needs to price a job on it: the number of printing units, the largest and smallest sheet it takes, its running speed in sheets per hour, the make-ready time and the make-ready sheets it wastes, its hourly rate, and for a digital press the click charge per side.

Utilisation shows the hours booked on each press in the last thirty days against the hours available, straight off the job tickets.

Figure 1. The three presses in the demo shop.

2 A press in detail

Where: Open Speedmaster XL 75, five colour

The sheet limits are what stop an estimator putting a job on a press that cannot take the sheet. The make-ready figures are what put a realistic cost on short runs, which is where most print shops lose money without noticing.

The screenshot displays the Odoo 19 Printing Press Management interface. The top navigation bar includes 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. The user is logged in as 'Riverside Press Ltd'. The main header shows 'New Presses' and 'Speedmaster XL 75, five colour'. The interface is divided into three main sections: 'THE MACHINE', 'SPEED AND SETUP', and 'RATES'. The 'THE MACHINE' section includes fields for 'Kind' (Sheet Fed Litho), 'Site' (Riverside Press), 'Printing Units' (5), 'Perfecting' (unchecked), 'Uses Plates' (checked), 'Active' (checked), and 'Color' (blue). The 'SPEED AND SETUP' section includes 'Running Speed (sheets/h)' (13,000), 'Make-ready (min)' (22), 'Make-ready Waste (sheets)' (180), 'Utilisation (%)' (10.28), and 'Hours Booked (30 days)' (33.91). The 'RATES' section includes 'Press Hour Rate' (£ 145.00), 'Plate Cost' (£ 8.50), and 'Ink per 1000 Sheets' (£ 1.90). The 'SHEET RANGE' section includes 'Min Sheet Width (mm)' (210.00), 'Min Sheet Height (mm)' (150.00), 'Max Sheet Width (mm)' (750.00), 'Max Sheet Height (mm)' (530.00), and 'Gripper (mm)' (12.00). A note at the bottom states: 'Put the speed this press actually holds on ordinary work in, not the figure on the brochure. Every run time and every delivery promise comes off it.' On the right side, there is a 'Send message' and 'Log note' button, and a chat window showing messages from Daniel Okafor.

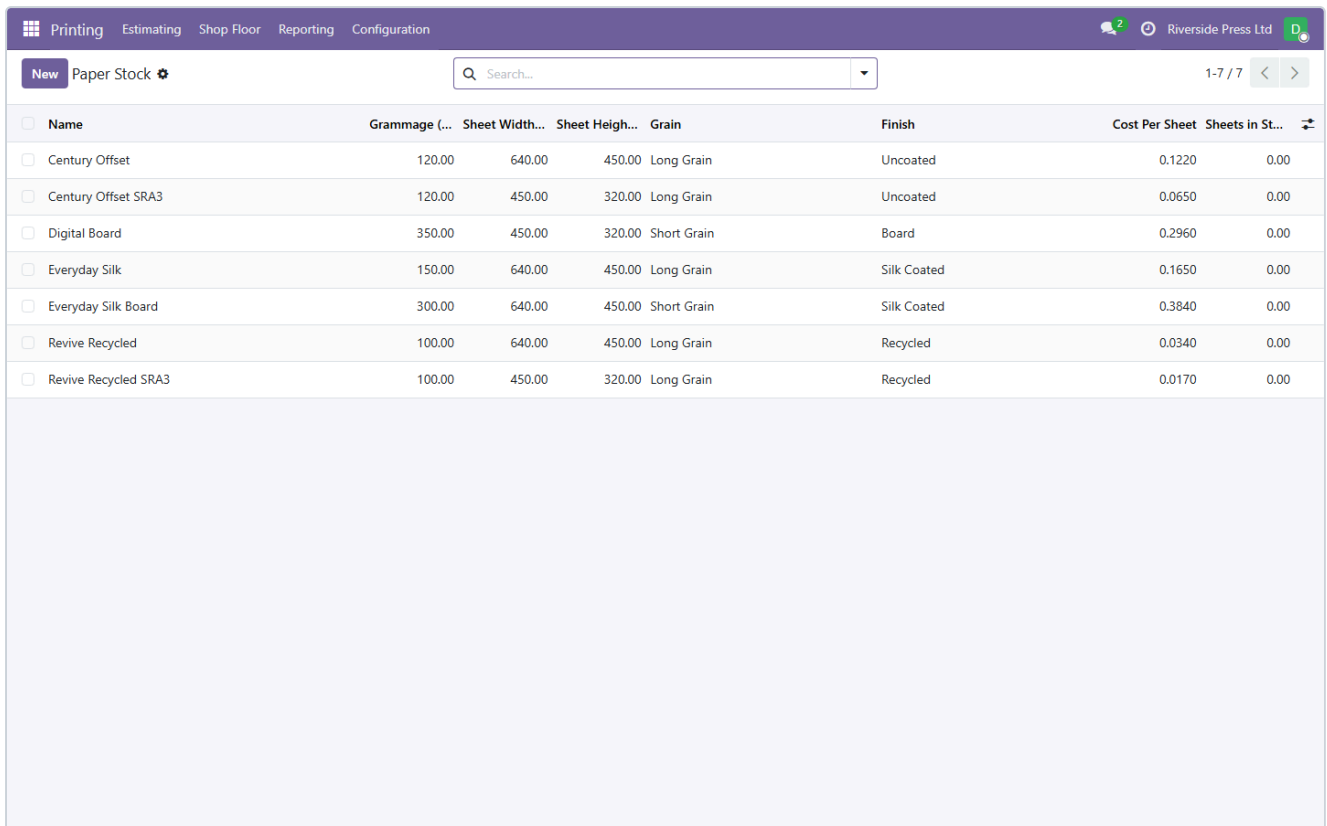

Figure 2. The XL 75: units, sheet range, speed, make-ready and rates.

3 Paper stock

Where: Configuration, then Paper Stock

Each stock has its sheet size, grammage, caliper, grain direction and finish, and how it is bought: per sheet, per ream or per tonne. The system works out the cost per sheet from whichever basis you buy on, so a stock bought by the tonne is costed the same way as one bought by the ream, and the estimate multiplies by that figure.

The demo carries SRA2 sheets for the XL 75 and SRA3 cuts of the same stocks for the SM 52, which is how a real shop buys.

4 Finishing operations

Where: Configuration, then Finishing Operations

Guillotining, folding, laminating, saddle stitching, perfect binding, foil blocking, drilling and packing. Each has a set-up cost and time, a run rate, an hourly rate, and whether it is done in house or bought in from a trade finisher with a lead time. A bought-in operation has to name the finisher.

Figure 5. Twenty estimates across the funnel.

6 The specification

Where: Open RP/EST/2026/00001, the A5 flyer for Harborough Wines

The Specification tab holds the piece (kind of work, finished size, pages, sides, quantity and the over or under run tolerance) and how it prints (colours front and back, stock, press, bleed and gutter).

From those the system imposes the job: how many up on the sheet, how many sheets, how many plates and passes, the make-ready sheets and the running waste. Change the press or the stock and the imposition is worked out again.

On the right is the chatter. The quote that was emailed to the customer sits there in full, so anyone picking up the file can see exactly what was promised.

The screenshot displays the 'RP/EST/2026/00001' estimate in the 'Approved' state. The interface includes a top navigation bar with 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. The main content area is divided into two sections: 'CUSTOMER' and 'THE PIECE'.

Print Estimate created

Figure 7. Finishing operations on the estimate, costed.

8 Cost and price

Where: The Cost and Price tab

The cost build-up is on the left: paper, plates, ink or clicks, make-ready, run time, finishing, bought-in work and carriage, with overhead on top. On the right is the price: the target margin, the sell price, the price per copy and per thousand, and the gross profit.

On this job the shop is aiming at a 35 per cent margin, which gives a sell price of £1,793.15 for 5,000 copies, or £358.63 per thousand. Change the quantity, the stock or the margin and every figure moves with it.

If a customer's price has to include VAT, the price is grossed up so the margin is made on what the shop keeps, not on what the customer pays.

Figure 10. The job tickets list.

11 The press board

Where: Shop Floor, then Press Board

One column per stage in the order the work moves: Prepress, Proofing, On Press, Finishing, Ready to Despatch, Delivered. Each card shows the copies, the sheets to issue and the press, and flags what needs attention: Late, No proof, Reprint. Drag a card to the next column to move the job.

The screenshot displays the 'Press Board' interface within a software application. The top navigation bar includes 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. The user is logged in as 'Riverside Press Ltd'. The main area is titled 'New Press Board' and features a search bar. The board is organized into five columns representing different stages of the printing process:

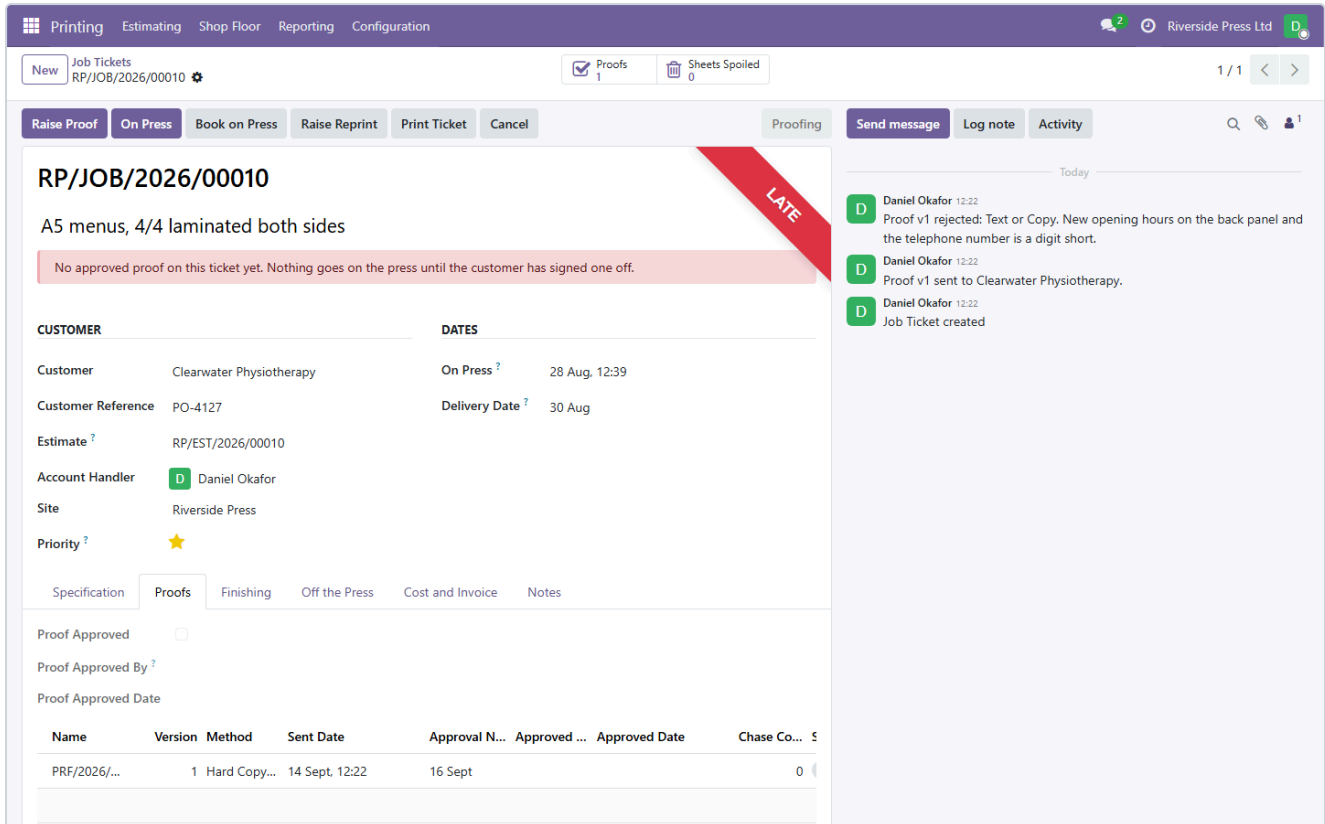

- Prepress (2):** Contains two job cards. The first card (RP/JOB/2026/00012) is for 'A5 notepads, 1/0 on 100gsm recycled' and is marked 'Late' and 'No proof' with a status of '11 days ago'. The second card (RP/JOB/2026/00013) is for 'A5 flyer, 4/4 on 150gsm silk (reprint)' and is marked 'Reprint' and 'No proof' with a status of 'In 2 days'.
- Proofing (2):** Contains two job cards. The first card (RP/JOB/2026/00010) is for 'A5 menus, 4/4 laminated both sides' and is marked 'Late' and 'No proof' with a status of 'Last month'. The second card (RP/JOB/2026/00011) is for 'A4 8pp programme, saddle stitched' and is marked 'Late' and 'No proof' with a status of '13 days ago'.
- On Press (2):** Contains two job cards. The first card (RP/JOB/2026/00008) is for 'A3 posters, 4/0 on 150gsm silk' and is marked 'Late' with a status of 'Last month'. The second card (RP/JOB/2026/00009) is for 'Appointment cards, 4/4 digital' and is marked 'Late' with a status of 'Last month'.
- Finishing (2):** Contains two job cards. The first card (RP/JOB/2026/00007) is for 'A4 32pp catalogue, perfect bound' and is marked 'Late' with a status of 'Last month'. The second card (RP/JOB/2026/00006) is for 'A6 postcards, 4/1 on 300gsm silk' and is marked 'Late' with a status of 'Last month'.
- Ready to Despatch:** The first card (RP/JOB/2026/00005) is partially visible, showing 'DL leaflet, 4/4' and is marked 'Late' with a status of 'Last month'.

Figure 11. The press board.

12 Proofing

Where: Open RP/JOB/2026/00010, the A5 menus, then the Proofs tab

Each proof is numbered. It records who it was sent to, when, and who approved it or asked for changes. A job cannot go on press until a proof is approved. The Proof Approval Record prints as a PDF for the job bag; a copy is attached with this guide.

RP/JOB/2026/00010

A5 menus, 4/4 laminated both sides

No approved proof on this ticket yet. Nothing goes on the press until the customer has signed one off.

Activity

- Daniel Okafor 12:22: Proof v1 rejected: Text or Copy. New opening hours on the back panel and the telephone number is a digit short.
- Daniel Okafor 12:22: Proof v1 sent to Clearwater Physiotherapy.
- Daniel Okafor 12:22: Job Ticket created

Figure 12. A job in proofing with its proof versions.

13 On press

Where: Open RP/JOB/2026/00008, the A3 posters

The buttons at the top follow the job. On a job that is on press they read Off Press, Book on Press, Raise Reprint, Print Ticket and Cancel. The LATE ribbon appears the moment the delivery date has passed and the job has not been despatched.

The Off the Press tab is where the operator records the sheets that came off and any spoilage with its reason. Print Ticket produces the job ticket that goes round the shop with the work.

The screenshot displays the 'On Press' tab for job RP/JOB/2026/00008. The interface includes a top navigation bar with 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. A sidebar on the left shows 'Job Tickets' and 'RP/JOB/2026/00008'. The main content area is divided into several sections:

- Job Details:** RP/JOB/2026/00008, A3 posters, 4/0 on 150gsm silk.
- CUSTOMER:** Northgate Dental, PO-4121, RP/EST/2026/00008, Daniel Okafor, Riverside Press.
- DATES:** On Press 26 Aug, 19:17, Delivery Date 29 Aug, Started 26 Aug, 19:17.
- WHAT RAN:** Sheets Printed 0, Spoilage Sheets 0, Good Sheets 0, Actual Press Hours 00:00.
- WHAT WENT OUT:** Delivered 0, Quantity Tolerance (%) 10.00, Quantity Min 450, Quantity Max 550, Quantity Variance -500.

A red 'LATE' ribbon is visible in the top right corner of the job details section. The right sidebar shows a chat log with messages from Daniel Okafor.

Figure 13. A job on press, late against its delivery date.

14 Spoilage

Where: Shop Floor, then Spoilage

Every spoiled sheet with its reason and the job it came off. Reasons are set up under Configuration as one of two kinds: a press fault, which forces a reprint at the shop's cost, or a customer fault such as a late artwork change, which can be charged on the invoice. The list is colour coded by which it is.

Figure 14. Spoilage records with their reasons.

15 Finishing

Where: Open RP/JOB/2026/00006, the A6 postcards, then the Finishing tab

The operations from the estimate, each booked off by the person who did it with the time it actually took. The system refuses to book an operation off without the time, because that time is what makes the actual cost real rather than a copy of the estimate.

Activity Log:

- Daniel Okafor 12:22: 60 sheets spoiled: Guillotine Error. This reason forces a reprint. Raise it from the job so the cost lands in the right place.
- Daniel Okafor 12:22: 900 sheets spoiled: Getting to Colour.
- Daniel Okafor 12:22: Proof v1 approved by Douglas Fairweather.
- Daniel Okafor 12:22: Proof v1 sent to Bramley Farm Shop.
- Daniel Okafor 12:22: Job Ticket created

Figure 15. A job in finishing with its operations.

16 Despatch, delivery and the invoice

Where: Open RP/JOB/2026/00001, the A5 flyer, then the Cost and Invoice tab

This is the job from the estimate in Part 2, finished and invoiced. The chatter on the right tells the whole story: proof sent and approved, 1,440 sheets spoiled getting to colour, another 40 to ink density drift, 120 out of register which forced a reprint, and 4,900 copies despatched.

The Cost and Invoice tab sets what the job actually cost against what was estimated: paper £355.58, press £680.76 and finishing £143.17, so £1,321.05 against £1,165.55 estimated, a variance of £155.50. The invoice went out at the 4,900 copies actually delivered, which is inside the 10 per cent tolerance, at the price per copy from the estimate.

The job ticket for this job is attached with this guide.

The screenshot displays the Odoo Printing Press Management interface for job RP/JOB/2026/00001. The top navigation bar includes 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. The job title is 'A5 flyer, 4/4 on 150gsm silk'. The 'Cost and Invoice' tab is active, showing a comparison between actual costs and estimated costs.

COST		INVOICE	
Paper Used	£ 355.58	Price per Copy	0.3586
Press	£ 680.76	Charged Spoilage	£ 0.00
Finishing	£ 143.17	Taxes	
Actual Cost	£ 1,321.05	Amount Untaxed	£ 1,757.29
Estimated Cost	£ 1,165.55	Amount Tax	£ 263.59
Cost Variance	£ 155.50	Amount Total	£ 2,020.88

The right-hand side of the interface shows a 'Chatter' log with the following entries:

- Daniel Okafor 12:22: Reprint RP/JOB/2026/00013 raised: Out of Register.
- Daniel Okafor 12:22: 120 sheets spoiled: Out of Register. This reason forces a reprint. Raise it from the job so the cost lands in the right place.
- Daniel Okafor 12:22: Despatched 4900 copies, 26.5 kg.
- Daniel Okafor 12:22: 40 sheets spoiled: Ink Density Drift.
- Daniel Okafor 12:22: 1440 sheets spoiled: Getting to Colour.
- Daniel Okafor 12:22: Proof v1 approved by Marion Selby.
- Daniel Okafor 12:22: Proof v1 sent to Harborough Wines.
- Daniel Okafor 12:22: Job Ticket created

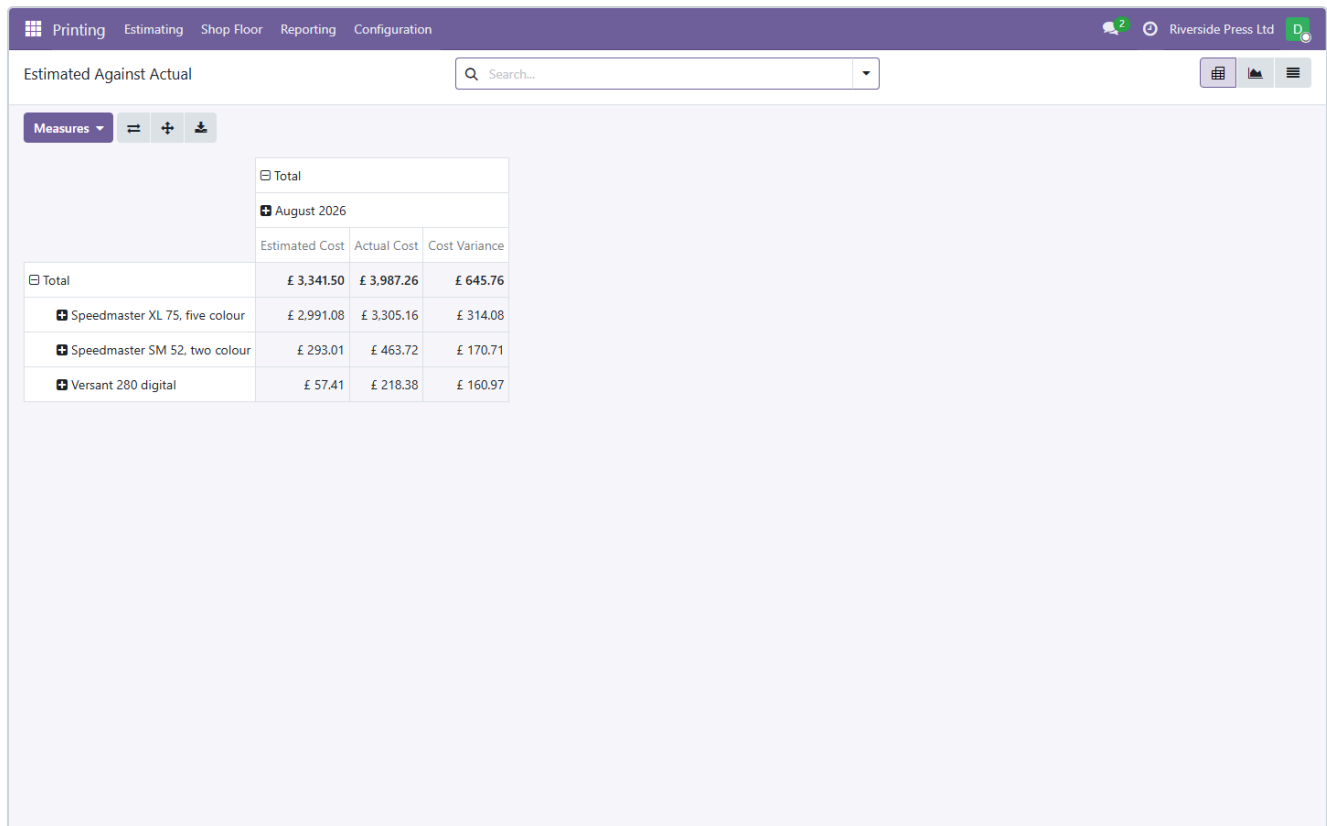

Figure 16. An invoiced job: actual cost against estimate, and the invoice.

Part 4. Reporting

17 Estimated against actual

Where: Reporting, then Estimated Against Actual

Estimated cost, actual cost and the variance, by press and by month, on every job that has been through the shop. In the demo month the XL 75 ran £314.08 over estimate on £2,991.08 of work, most of it make-ready; the digital press ran £160.97 over on much less. This is the report that tells an estimator which rates to move.

The screenshot shows a software interface with a purple header bar containing navigation links: Printing, Estimating, Shop Floor, Reporting, and Configuration. The 'Reporting' link is active. On the right of the header, there are icons for chat, a clock, and the company name 'Riverside Press Ltd'. Below the header, the report title 'Estimated Against Actual' is displayed next to a search bar. A 'Measures' dropdown menu is visible on the left. The main content area displays a table with the following data:

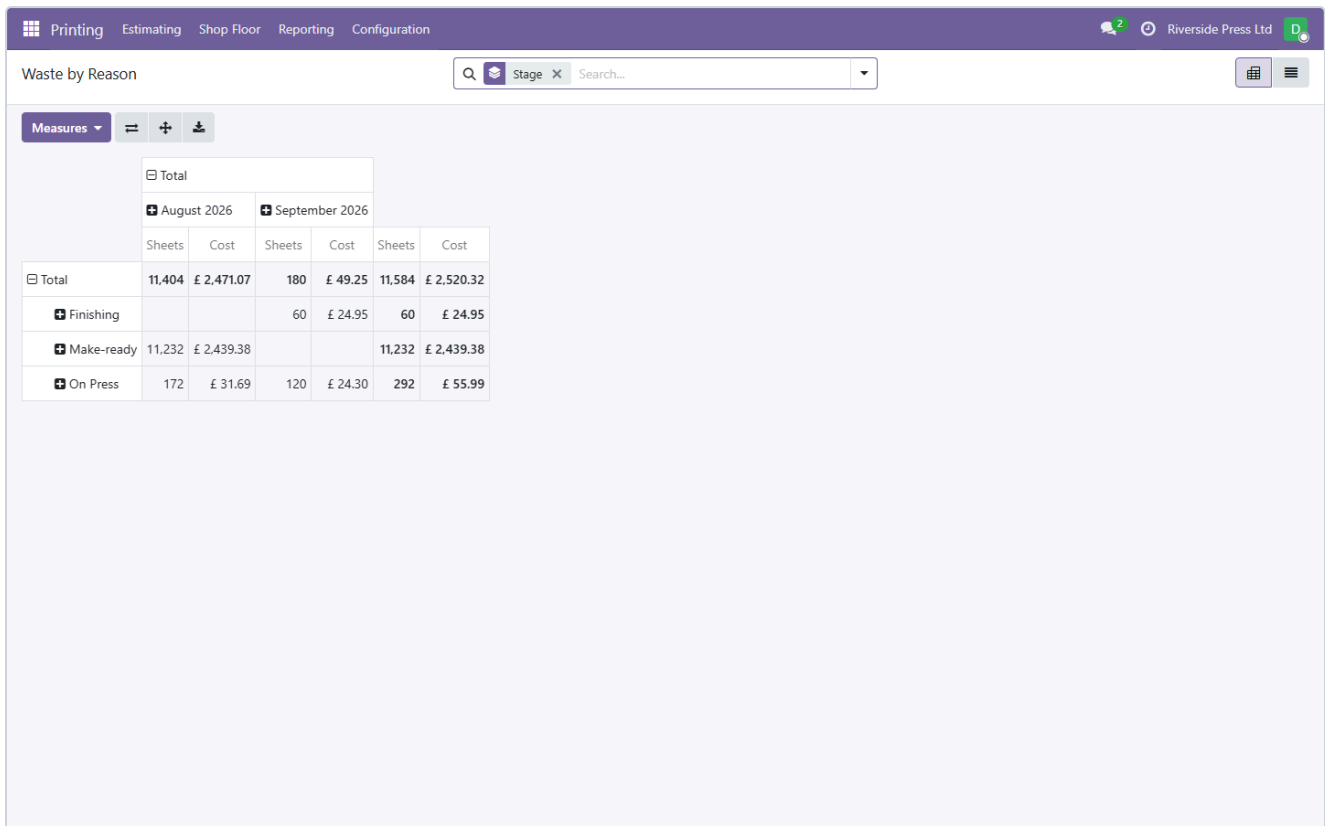

Total			
August 2026			
	Estimated Cost	Actual Cost	Cost Variance
Total	£ 3,341.50	£ 3,987.26	£ 645.76
Speedmaster XL 75, five colour	£ 2,991.08	£ 3,305.16	£ 314.08
Speedmaster SM 52, two colour	£ 293.01	£ 463.72	£ 170.71
Versant 280 digital	£ 57.41	£ 218.38	£ 160.97

Figure 17. Estimated against actual cost by press.

18 Waste by reason

Where: Reporting, then Waste by Reason

Spoiled sheets grouped by reason and by press, so a recurring fault shows up as a number rather than a feeling. Reprints and the estimating win rate sit in the same menu.

Waste by Reason						
Measures						
Total						
August 2026 September 2026						
	Sheets	Cost	Sheets	Cost	Sheets	Cost
Total	11,404	£ 2,471.07	180	£ 49.25	11,584	£ 2,520.32
Finishing			60	£ 24.95	60	£ 24.95
Make-ready	11,232	£ 2,439.38			11,232	£ 2,439.38
On Press	172	£ 31.69	120	£ 24.30	292	£ 55.99

Figure 18. Waste by reason.

Part 5. Settings

19 Shop-wide defaults

Where: Configuration, then Settings

The defaults every new estimate starts from: spoilage allowance, target margin, overhead percentage and the quantity tolerance. Each site can override the margin, and each estimate can override any of them.

The screenshot shows the Odoo 19 Settings interface. The top navigation bar includes 'Printing', 'Estimating', 'Shop Floor', 'Reporting', and 'Configuration'. The 'Configuration' menu is active, showing 'Save', 'Discard', and 'Settings' buttons, along with a search bar. The left sidebar lists 'General Settings', 'Printing', 'Inventory', and 'Invoicing'. The main content area is titled 'Estimating' and contains several settings sections:

- Running Spoilage**: Waste allowed on every new estimate on top of the make-ready sheets the press record already accounts for. The estimator moves it per job. Value: 8.00 per cent of the net sheets.
- Overhead Recovery**: Rent, light, sales and administration added to the direct cost of every job. Get this wrong and every estimate is wrong by the same amount. Value: 12.00 per cent of direct cost.
- Estimate Validity**: Paper prices move. Past this an estimate is closed off by the daily job and has to be re-priced before it is honoured. Value: 30 days.
- Target Margin**: Fallback margin for a new estimate when the site has none of its own. Margin on the sell price, not a mark-up on cost. Value: 35.00 per cent.
- Bleed and Gutter**: Added around each finished piece before the imposition is worked out, so the guillotine has somewhere to cut. Value: 6.00 mm per piece.
- Proofs and the Press**:
 - ☒ **No Press Without an Approved Proof**: Refuse to put a job on the press until an approved proof is on the ticket with a name and a timestamp against it. It is the only thing that settles a misprint dispute.
 - Chase a Proof After**: How long a proof sits with the customer before the daily job reminds them. Every day it waits, the press slot moves. Value: 2 days.
 - Shift Starts At**: Clock time the pressroom starts, as hours and minutes: 7.5 is half past seven. Booking a job on press puts it at the start of the next shift.

Figure 19. Module settings.

Part 6. Try it yourself: from a blank estimate to an invoice

About fifteen minutes on the demo site. Every button named here is on screen at that stage.

1. **Estimate.** Estimating, then Estimates, then New. Title *A5 leaflets*, customer Harborough Wines, quantity 2,000, finished size 148 by 210 mm, 2 pages, double sided, 4 colours front and 4 back, stock Everyday Silk 150gsm, press Speedmaster XL 75.
2. **Finishing.** On the Finishing tab add Guillotining to size and Boxing and palletising.
3. **Price.** Open Cost and Price. Read the sell price. Change the target margin and watch it move. Change the quantity to 5,000 and watch the price per copy fall.
4. **Send and approve.** Click Send, then read the email on the chatter. Click Customer Approved, then Open Job Ticket.
5. **Prepress and proof.** On the ticket click Start Prepress, then Raise Proof. On the Proofs tab open the proof, click Send, then Record Approval.
6. **Press.** Click On Press. On the Off the Press tab enter the sheets that came off and add one spoilage line with a reason. Click Off Press.
7. **Finishing.** On the Finishing tab put minutes against each operation and book each one off. Click Finishing Done.
8. **Despatch.** Enter the delivered quantity and click Despatch. The job is now Delivered. Click Invoice and open the invoice from the button at the top.
9. **Paperwork.** Click Print Ticket on the job, and Print on the estimate.
10. **Report.** Reporting, then Estimated Against Actual, and find your job.

What this demo does not show

The demo is one site with one currency. The module supports several sites under one company, each with its own presses and margin. Purchasing of paper against jobs, stock levels and the accounting side of the invoice are standard Odoo and are not set up on the demo. Customer portal access to proofs, and a web-to-print front end, are separate work we quote for.

Next step

If you would like to see it against your own work, send us one recent job (the estimate, the ticket and the invoice) and we will set it up on the demo as a fourth press configuration and a real job, and walk you through it on a call.
