COMPLETE GUIDE · 17 WEBSITE THEMES AND 2 BACKEND THEMES

Website Themes for Odoo 19

Clinic, construction, consulting, eCommerce, education, events, fashion, gym, hotel, law, NGO, photography, real estate, restaurant, SaaS, salon and travel: every page, every section, the colours and fonts, setup and switching. Plus the two back office themes.

START

About this guide

Seventeen ready made website themes for Odoo 19 Community, one per trade, and two backend themes that change how the Odoo back office looks. This guide explains what a theme puts into your database, how to install it so it actually takes effect, how to make it yours in the website editor, and then walks through every theme: its pages, its sections, its colours and fonts, and what to change first.

Who it is for

The owner or the person who builds the company website, and anyone choosing between the themes. No coding is needed for anything in Parts 1 to 4.

How to read it

Parts 1 to 4 apply to every theme: read them once. Then jump to the part for your trade. The backend themes have their own part near the end.

The live demos

Fifteen themes run on their own demo site. The fashion and SaaS themes are described from the module code because they have no theme demo.

HOW IT WORKS

Where to see each theme

Consulting and Agency	`wt_theme_consulting`	consulting.way4tech.com
Law Firm	`wt_theme_lawfirm`	lawfirm.way4tech.com
Real Estate	`wt_theme_realestate`	realestate.way4tech.com
Construction	`wt_theme_construction`	construction.way4tech.com
Clinic and Hospital	`wt_theme_clinic`	clinic.way4tech.com
Gym and Fitness	`wt_theme_gym`	gym.way4tech.com
School and Education	`wt_theme_education`	education.way4tech.com
NGO and Nonprofit	`wt_theme_ngo`	ngo.way4tech.com
Hotel and Resort	`wt_theme_hotel`	hotel.way4tech.com
Restaurant	`wt_theme_restaurant`	restaurant.way4tech.com
Travel Agency and Tour	`wt_theme_travel`	travel.way4tech.com
Event and Conference	`wt_theme_event`	event.way4tech.com
eCommerce	`wt_theme_ecommerce`	ecommerce.way4tech.com
Fashion and Boutique	`wt_theme_fashion`	code only
Photography and Portfolio	`wt_theme_photography`	photography.way4tech.com
SaaS and Startup	`wt_theme_saas`	code only
Salon and Spa	`wt_theme_salon`	salon.way4tech.com

The public pages of each demo need no login. To open the website editor on a demo, sign in at **/web/login** with **w4demo** and **Demo2026**. The demos are shared, so look but do not save: the next visitor sees what you leave behind.

PART 1 What a website theme puts into Odoo

Odoo builds websites out of sections stacked on a page. A theme does not change how the website app works. It brings a set of finished sections written for one trade, a homepage made from them, four inner pages, menu entries, a colour palette, fonts and a few layout choices. After that, everything is edited in the normal Odoo website editor.

IN THIS PART YOU WILL LEARN

- The words Odoo uses: section (snippet), page, menu, palette, website values
- The nine sections every theme ships and what each one holds
- What the themes have in common and where they differ
- Which Odoo apps a theme needs and which it does not touch

Five words you need

WORD	WHAT IT MEANS HERE
Section (snippet)	A full width band on a page: a banner, a grid of cards, a contact block. Odoo calls them snippets or blocks. Each theme ships nine, as QWeb templates named `s_<theme>_<name>`.
Page	A web address such as `/about-us` with sections on it. Each theme adds four published pages (the salon theme five) and replaces the content of the homepage.
Menu	The links across the top of the site. Each theme adds one entry per page under the main menu and removes Odoo's own Contact us entry once, at install.
Palette	Five colours the editor works with: primary, secondary, accent, a dark and a light. Each theme defines one palette named after it, for example `wt-gym`.
Website values	The theme's defaults for the editor's Theme tab: body, heading, menu and button fonts, the header and footer layout, the button corner radius and the menu shadow.

The nine sections, theme by theme

Fifteen of the themes share one skeleton and differ in palette, fonts and every word of text. The clinic and construction themes were built separately and have their own sets, and the salon theme is the newest build of the shared skeleton with photographs and editor registration added.

SECTION	WHAT IT HOLDS (SHARED SKELETON)
Hero	Opening band: a small eyebrow line, the headline, a lead paragraph, two buttons, three stat figures and a visual block on the right.
Services	Six cards, each with an icon, a title and two lines of text.
Features	Four reasons to choose you, each with an icon, a title and a sentence.
Showcase	The sector grid of six cards.
Team	Four people with role and a one line credential.
Testimonials	Three short quotes with who said them.
Faq	A four question accordion (Bootstrap collapse), first one open.
Cta	A coloured band with one line and a single button.
Contact	Address, phone, email and hours on the left, a message form on the right.

The **showcase** is where the trade shows: membership plans for the gym, listings for the estate agent, dishes for the restaurant, a pricing grid for the SaaS theme. Every card in every section is plain text and icons on the page. None of the themes reads Odoo records such as products, events or rooms, so nothing changes by itself when your data changes.

The themes at a glance

THEME	PALETTE	HEADINGS / BODY FONT	BUTTONS	HEADER
Consulting and Agency `wt_theme_consulting`		IBM Plex Serif / IBM Plex Sans	square	default
Law Firm `wt_theme_lawfirm`		Playfair Display / Lora	square	default
Real Estate `wt_theme_realestate`		Manrope / Inter	rounded	default
Construction `wt_theme_construction`		Bebas Neue / Roboto Condensed	square	sidebar
Clinic and Hospital `wt_theme_clinic`		Plus Jakarta Sans / Inter	pill	default
Gym and Fitness `wt_theme_gym`		Anton / Barlow	square	default
School and Education `wt_theme_education`		Merriweather / Nunito	pill	default
NGO and Nonprofit `wt_theme_ngo`		Source Serif Pro / Source Sans Pro	pill	default
Hotel and Resort `wt_theme_hotel`		Cormorant Garamond / Inter	square	default
Restaurant `wt_theme_restaurant`		Cormorant Garamond / Poppins	pill	default
Travel Agency and Tour `wt_theme_travel`		Playfair Display / Poppins	pill	default
Event and Conference `wt_theme_event`		Sora / Inter	pill	default
eCommerce `wt_theme_ecommerce`		Bricolage Grotesque / Inter	pill	default
Fashion and Boutique `wt_theme_fashion`		Bodoni Moda / Inter	square	default
Photography and Portfolio `wt_theme_photography`		Marcellus / Inter	square	default
SaaS and Startup `wt_theme_saas`		Space Grotesk / Inter	rounded	default
Salon and Spa `wt_theme_salon`		Italiana / Lato	square	default

What a theme needs and what it leaves alone

Every theme depends on the Odoo **Website** app only and runs on Odoo 19 Community (it also installs on Enterprise). Each costs USD 39 and is licensed OPL-1. A theme does not install eCommerce, Events, Appointments, Blog or any booking app. Buttons such as Book Now, Get Tickets or Donate Now are links you point at a page or an app yourself. The themes contain no Python business logic; the only code beyond templates and styles is the salon theme's optional demo data.

PART 2 Install a theme and make it the website theme

Installing the module is only half the job. Odoo loads a theme's stylesheet, palette and fonts only for a website whose theme is set to that module. Skip that step and the pages and text appear, but the banner, buttons and colour bands lose their styling.

IN THIS PART YOU WILL LEARN

- Getting the module into Odoo and installing it from Apps
- Picking it as the website theme, the step that loads its styles
- What the theme sets on install, and how to check it worked
- Running more than one website in the same database

TRY IT YOURSELF ON THE DEMO

1. Sign in on any theme demo with w4demo / Demo2026
2. Open Website, click Edit, then the Theme tab
3. Look at the colours and fonts at the top: they are the theme's palette and fonts
4. Compare with the palette table in that theme's part of this guide, then Discard

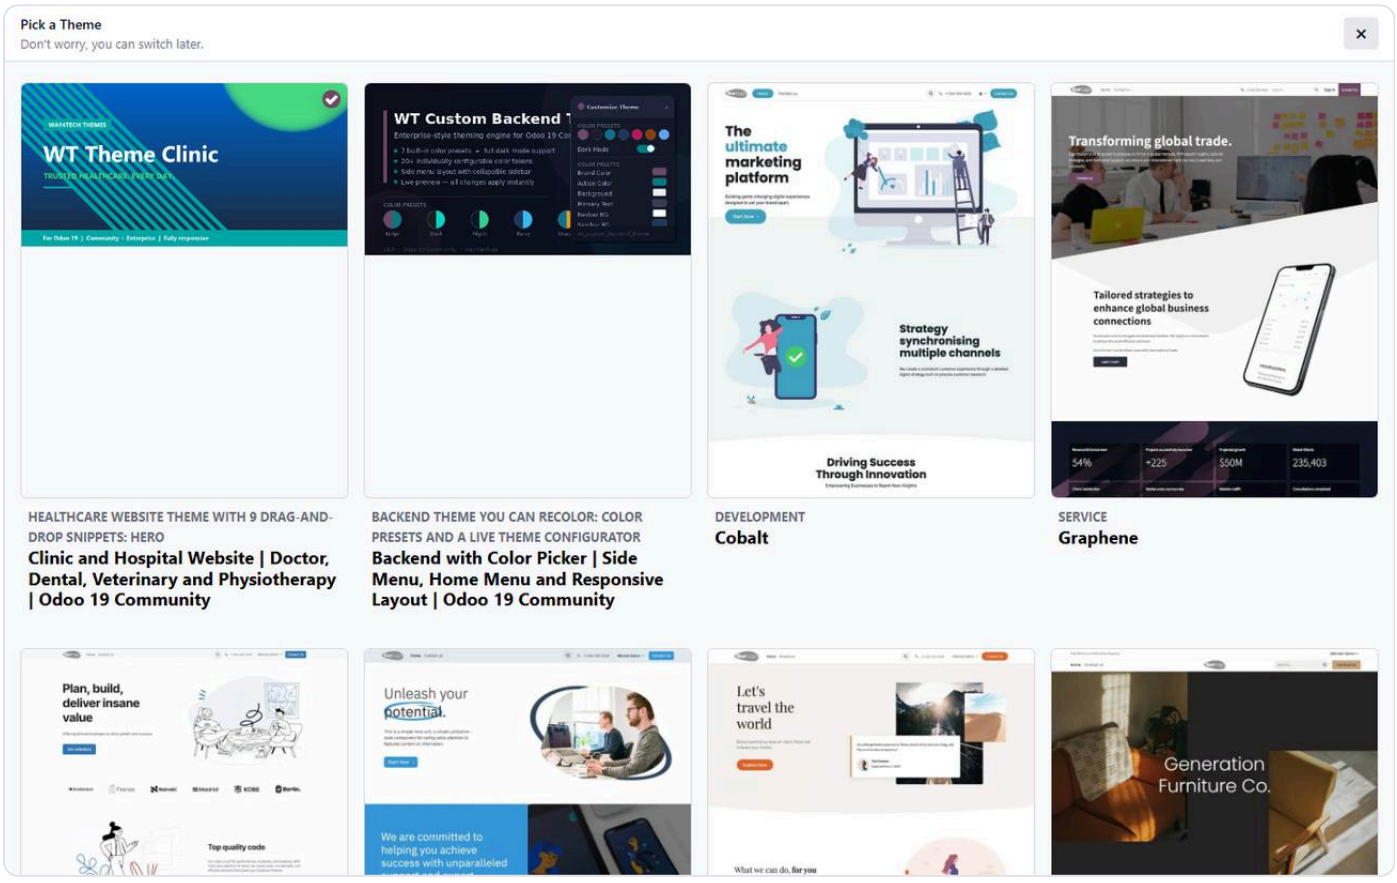

1 Get the module

Buy the theme on the Odoo Apps Store, or receive it as a zip, and place the `wt_theme_<name>` folder in your addons path. On Odoo.sh push it to your repository. Then open **Apps**, click **Update Apps List** (developer mode) and remove the default Apps filter in the search bar so that themes are listed.

The module depends only on Website. If Website is not installed yet, Odoo installs it first.

2 Pick it as the website theme

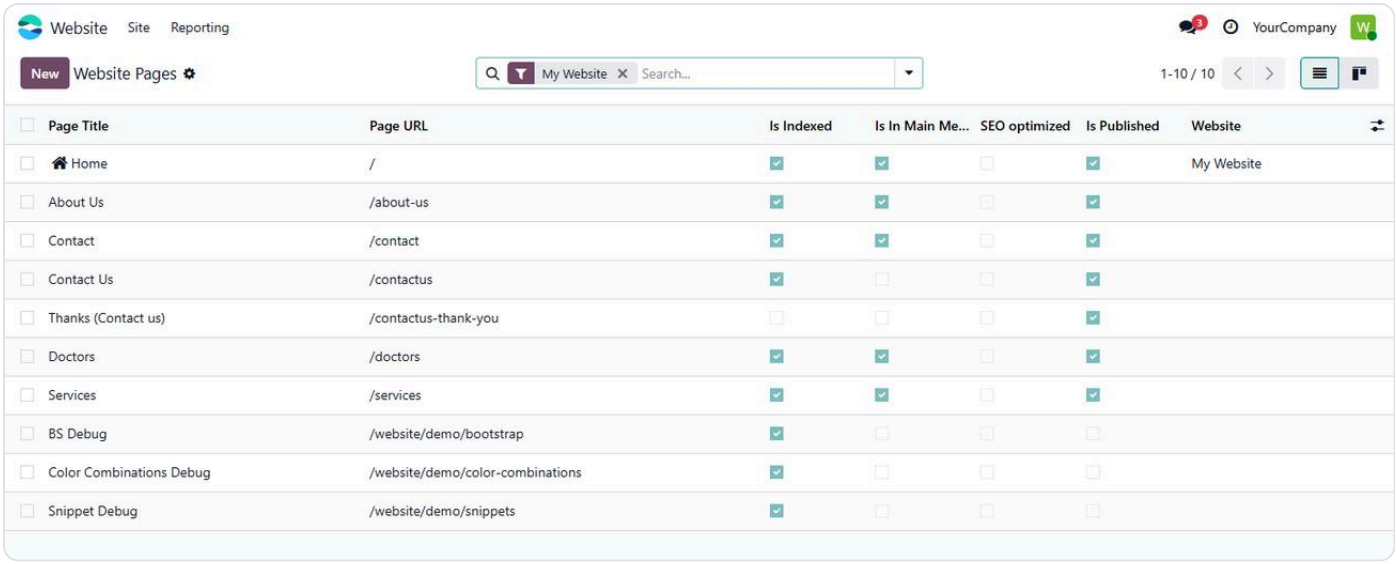

Open the website editor, go to the **Theme** tab and click **Switch Theme**, or open the theme chooser directly. Find your theme card, such as *Gym and Fitness Website Theme*, and click **Use this theme**. Odoo sets it as the theme of the current website, installs the module if it is not installed yet, and reloads the site.

This is the step that makes Odoo load the theme's stylesheet, palette and fonts. A theme installed from Apps alone gets its pages and menus but not its look.

3 Check what arrived

Open **Website, Site, Pages**. You should see the theme's four pages, for example About Us, Services, Doctors and Contact on the clinic theme, all published and indexed. The homepage keeps its own record but now shows the theme's nine sections.

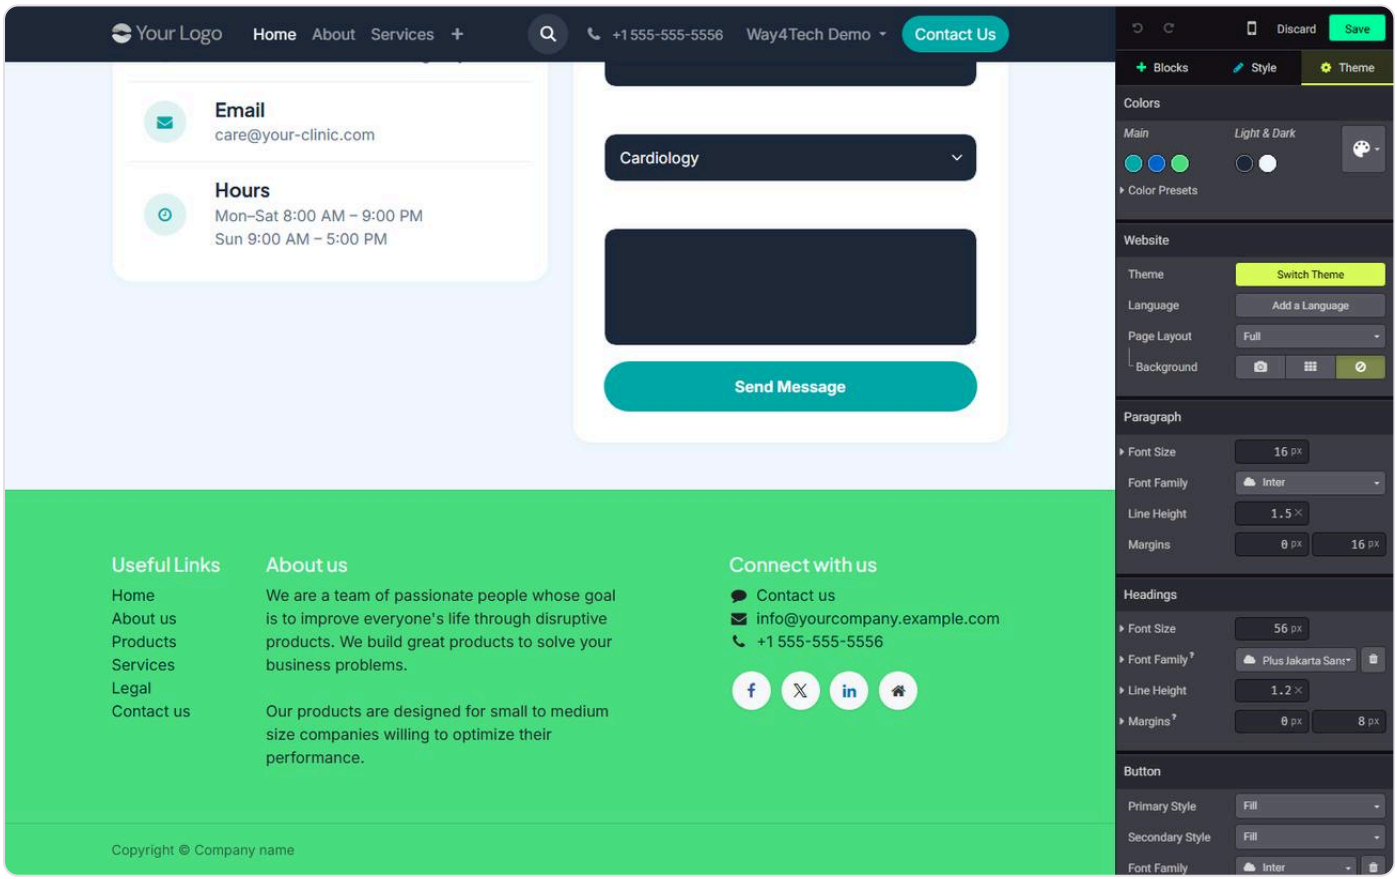

Page Title	Page URL	Is Indexed	Is In Main Me...	SEO optimized	Is Published	Website
Home	/	☑	☑	☐	☑	My Website
About Us	/about-us	☑	☑	☐	☑	
Contact	/contact	☑	☑	☐	☑	
Contact Us	/contactus	☑	☐	☐	☑	
Thanks (Contact us)	/contactus-thank-you	☐	☐	☐	☑	
Doctors	/doctors	☑	☑	☐	☑	
Services	/services	☑	☑	☐	☑	
BS Debug	/website/demo/bootstrap	☑	☐	☐	☐	
Color Combinations Debug	/website/demo/color-combinations	☑	☐	☐	☐	
Snippet Debug	/website/demo/snippets	☑	☐	☐	☐	

The theme's pages carry no website, so every website in the database lists them. Your own pages keep their website.

4 Check the look

In the editor's Theme tab the colour circles at the top should now show the theme's palette and the font boxes the theme's fonts. If they still show Odoo's purple and the Inter font, the theme is installed but not picked: go back to step 2.

What the theme sets

SETTING	WHERE IT LIVES	WHAT THE THEME DOES

Palette	Theme tab, Colors	Adds one five colour palette named after the theme and makes it the default for Odoo blocks, header and footer. The theme sections carry the same colours in their own stylesheet.
Fonts	Theme tab, Paragraph, Headings, Button	Registers its Google fonts and sets body, heading, menu and button fonts.
Header layout	Click the header, Style tab	*default* on sixteen themes, *sidebar* on construction.
Footer layout	Click the footer, Style tab	*descriptive* on every theme.
Button corners	Theme tab, Button, Round Corners	Square, pill or slightly rounded, per theme.
Menu shadow	Header options	On, on every theme.
Homepage	Site, Homepage	Content replaced with the theme's nine sections.
Pages and menu	Site, Pages and Site, Menu Editor	Four pages (five on salon) and their menu entries; Odoo's Contact us menu entry removed once.
Website builder list	manifest configurator_snippets	Names the nine homepage sections for Odoo's website configurator.

More than one website. The theme's pages, menu entries and homepage content are written for the whole database, not for one website, while the look follows each website's own theme setting. If you run several websites in one database, try the theme on a copy of the database first.

PART 3 Make it yours in the website editor

A theme is a starting point full of sample text, sample people and sample numbers. The work is replacing them with yours, which happens entirely in Odoo's own website editor. This part walks through it on the clinic demo, screen by screen. Nothing here needs the theme's code.

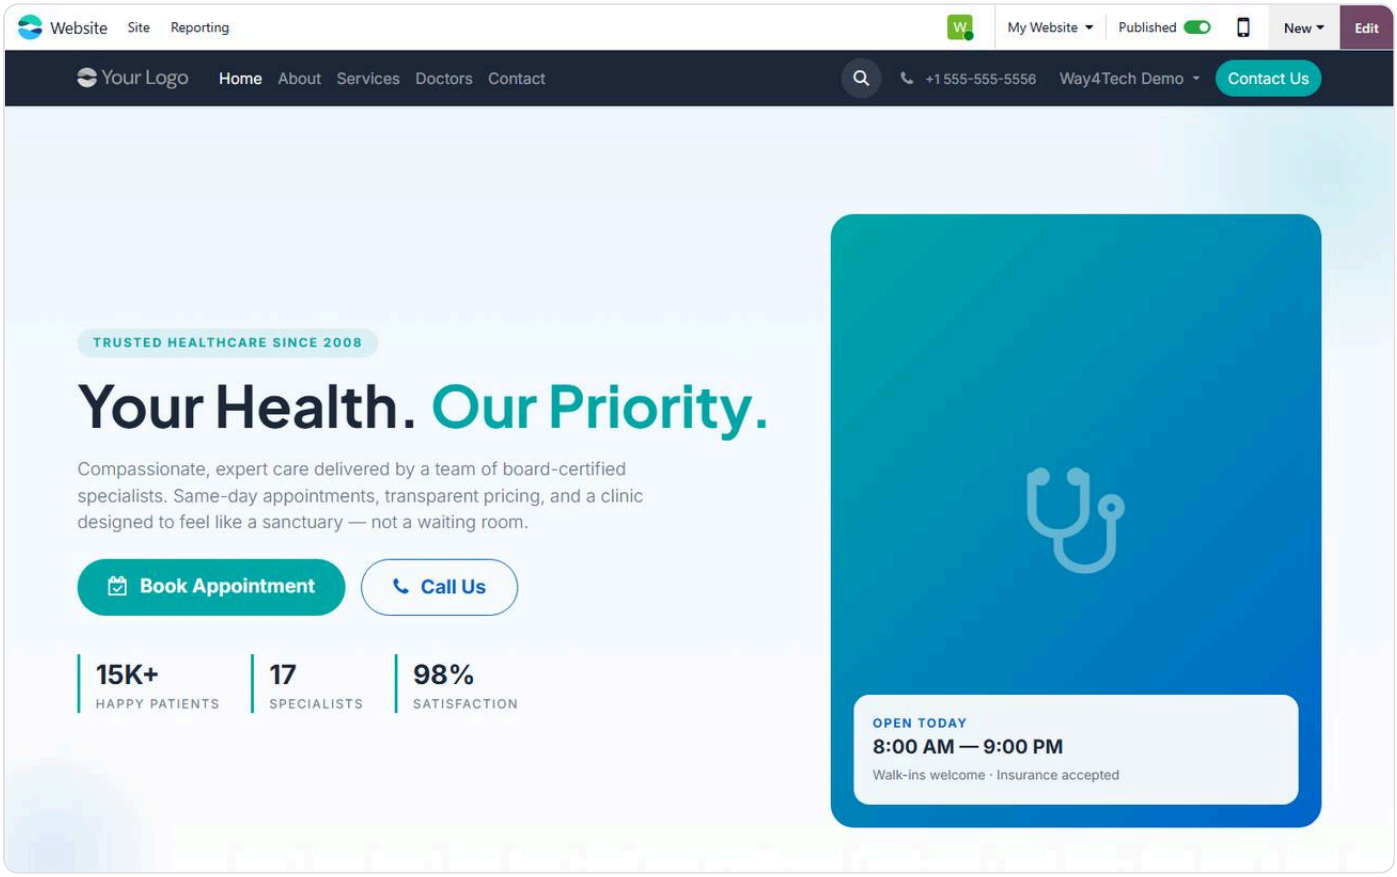

IN THIS PART YOU WILL LEARN

- The website top bar and the three editor tabs
- Editing text, images, sections, the header and the footer
- Colours, fonts and buttons in the Theme tab
- Pages, page properties, new pages and the menu
- Replacing the theme's contact form with Odoo's working form

The editor

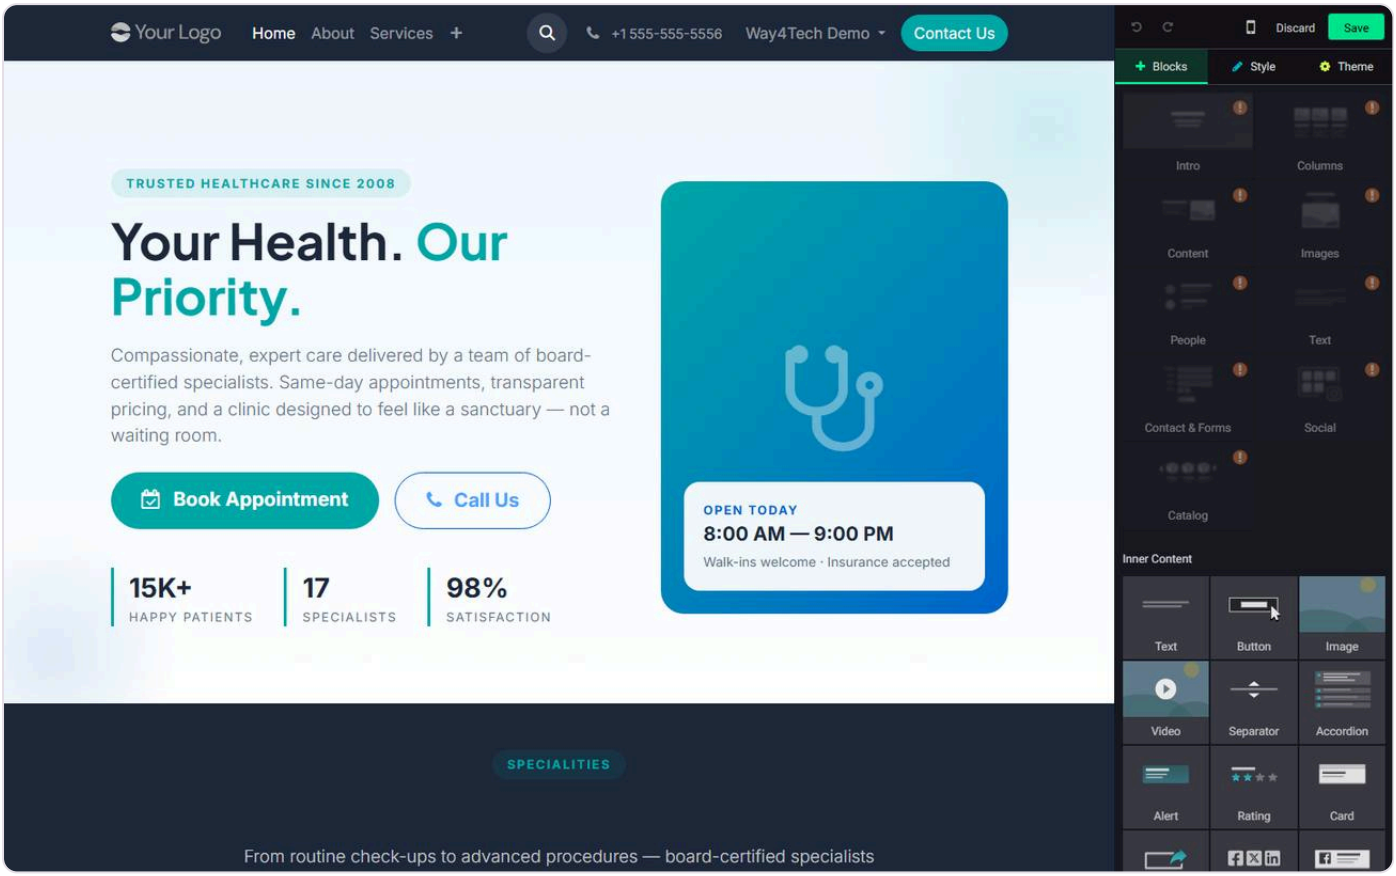

1 Open the website app

Open **Website**. You see your site with a bar on top: **Site** and **Reporting** menus, the website switcher, the **Published** switch, a phone icon for the mobile preview, **New** and **Edit**.

2 Click Edit

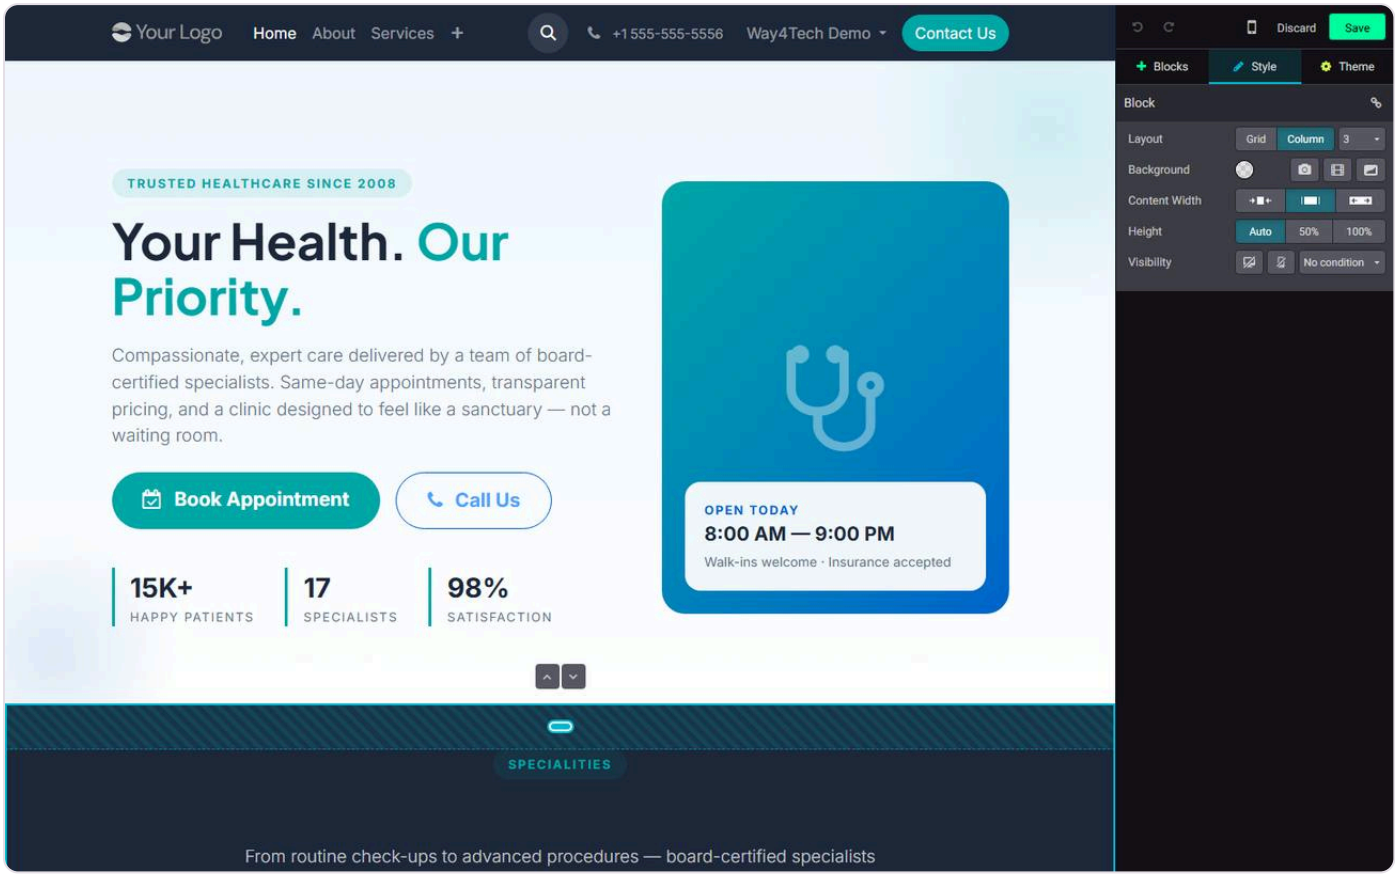

The editor panel opens on the right with three tabs. **Blocks** lists Odoo's own sections by category (Intro, Columns, Content, Images, People, Text, Contact and Forms, Social, Catalog) and the smaller inner content pieces (text, button, image, video, accordion, card, form, map and more). Drag one onto the page to add it.

The theme's own sections are not in this list, except on the salon theme. To reuse one, select it on a page and duplicate it, as in the next step.

3 Select a section

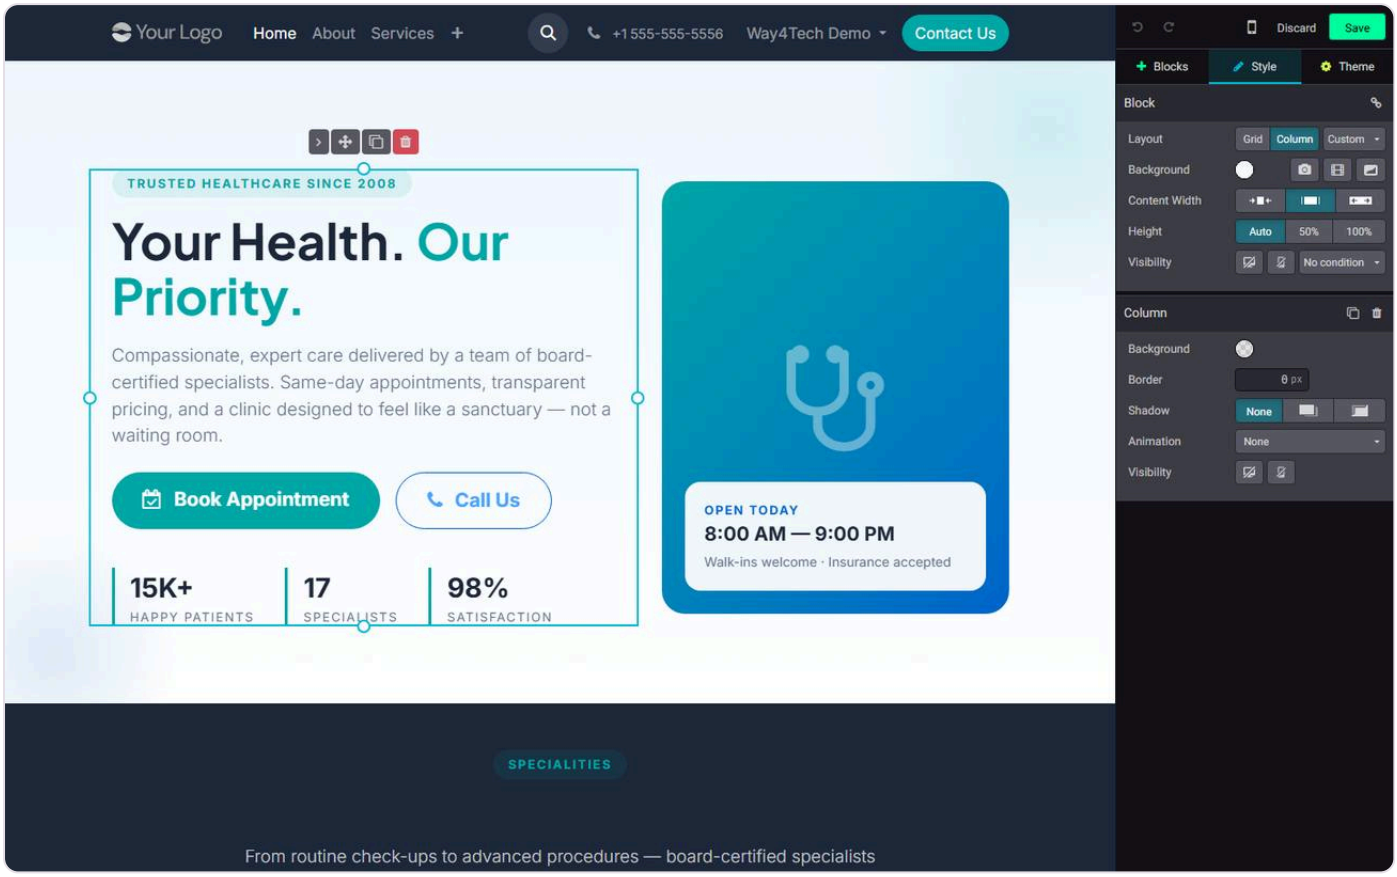

Click inside a section. It gets a blue frame with up and down arrows to move it and a small toolbar to duplicate or delete it, and the **Style** tab shows its options: layout, background colour or image, content width, height and visibility.

Duplicating a section is how you get a second services grid or a second call to action band.

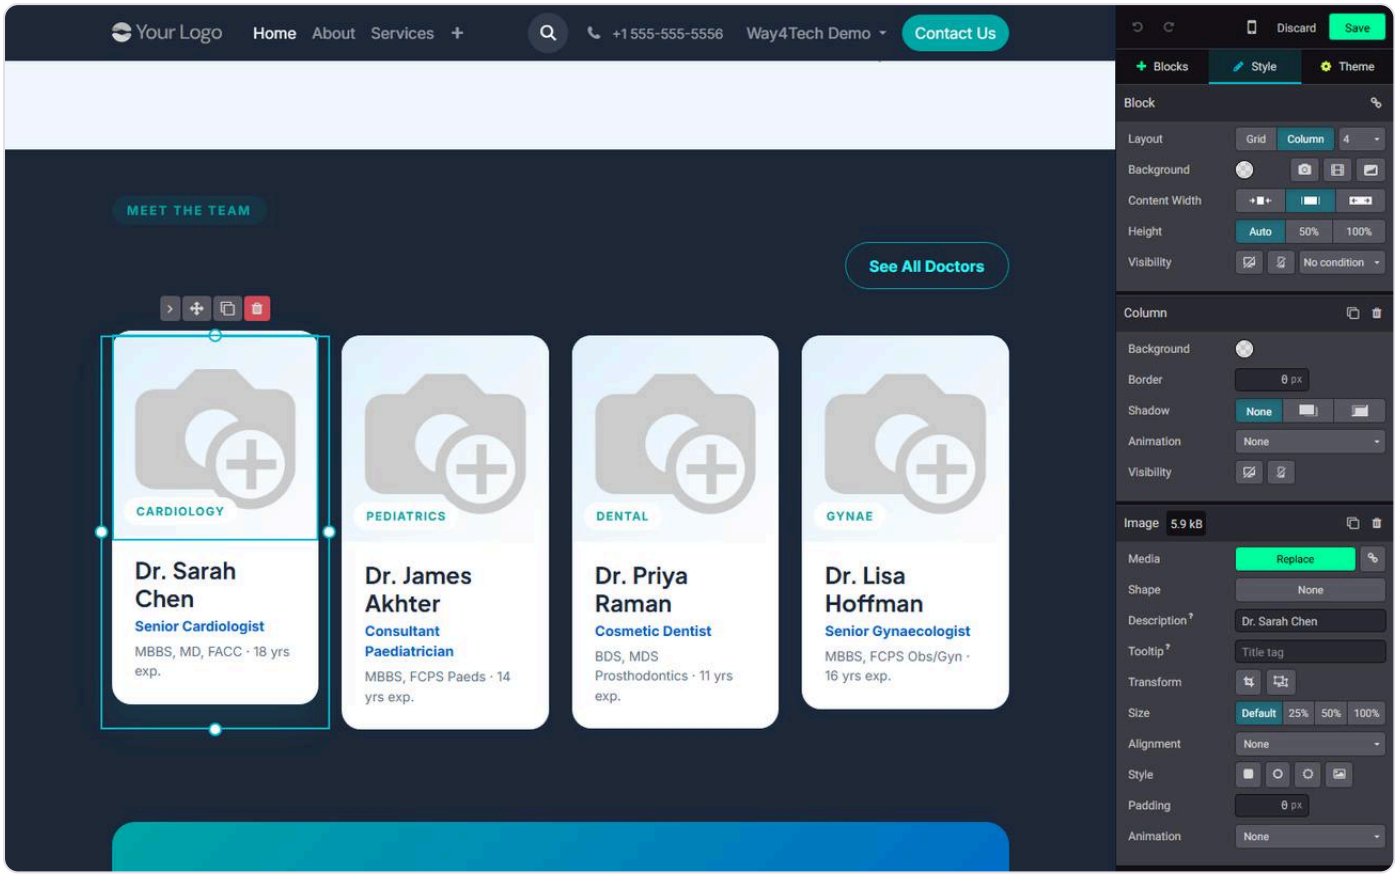

4 Change the words

Click any heading or paragraph and type. Select words to get the text toolbar for bold, links, colour and alignment. Start with the opening banner: the eyebrow line, the headline, the paragraph under it and the three stat figures are all sample text.

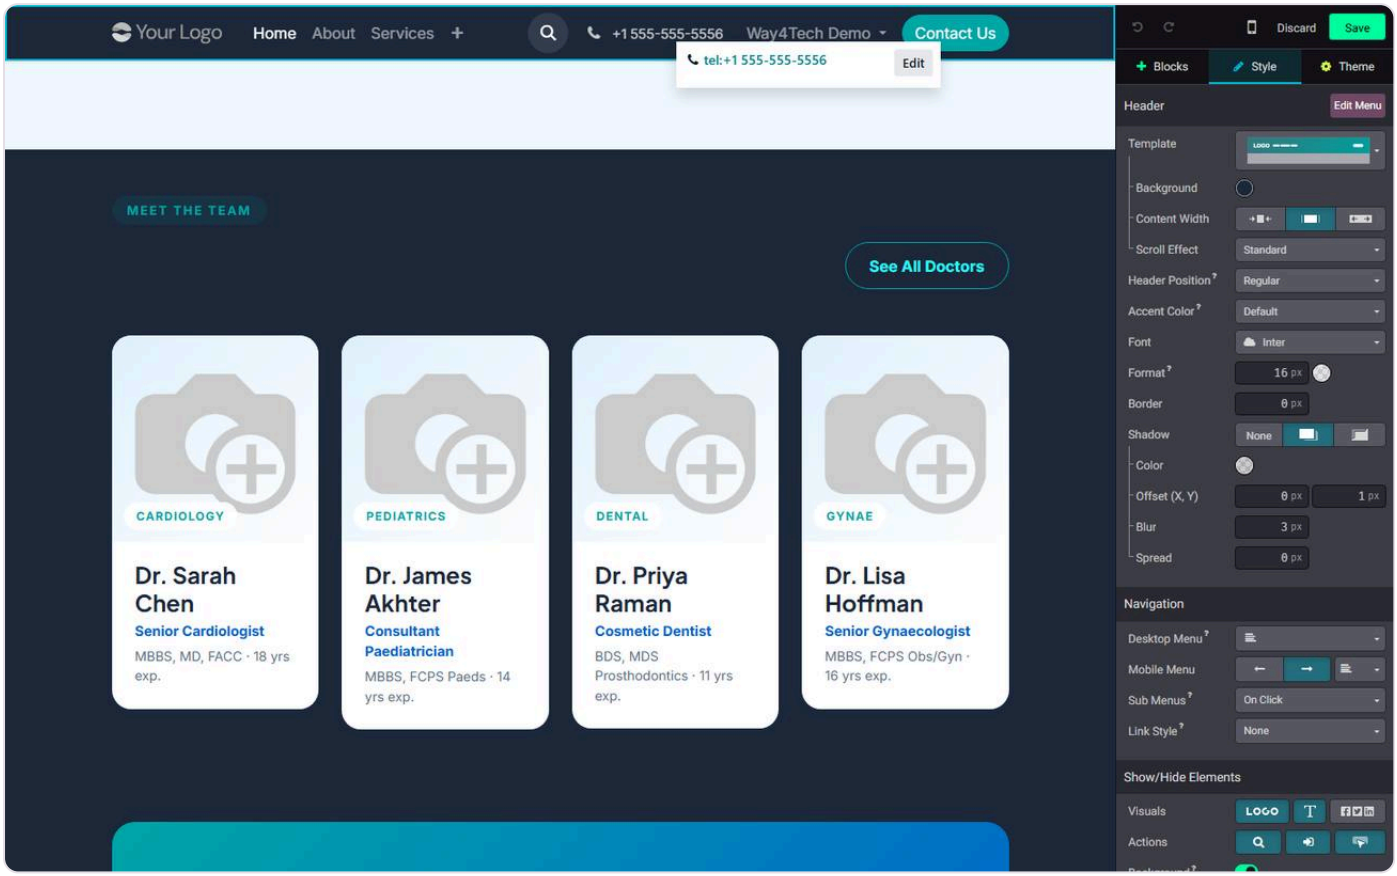

5 Replace images

Click an image and use **Replace** in the Style tab to upload yours or pick from the media library. Most themes use icons and Odoo's placeholder images rather than photographs, so this is the step that makes the site look like your business.

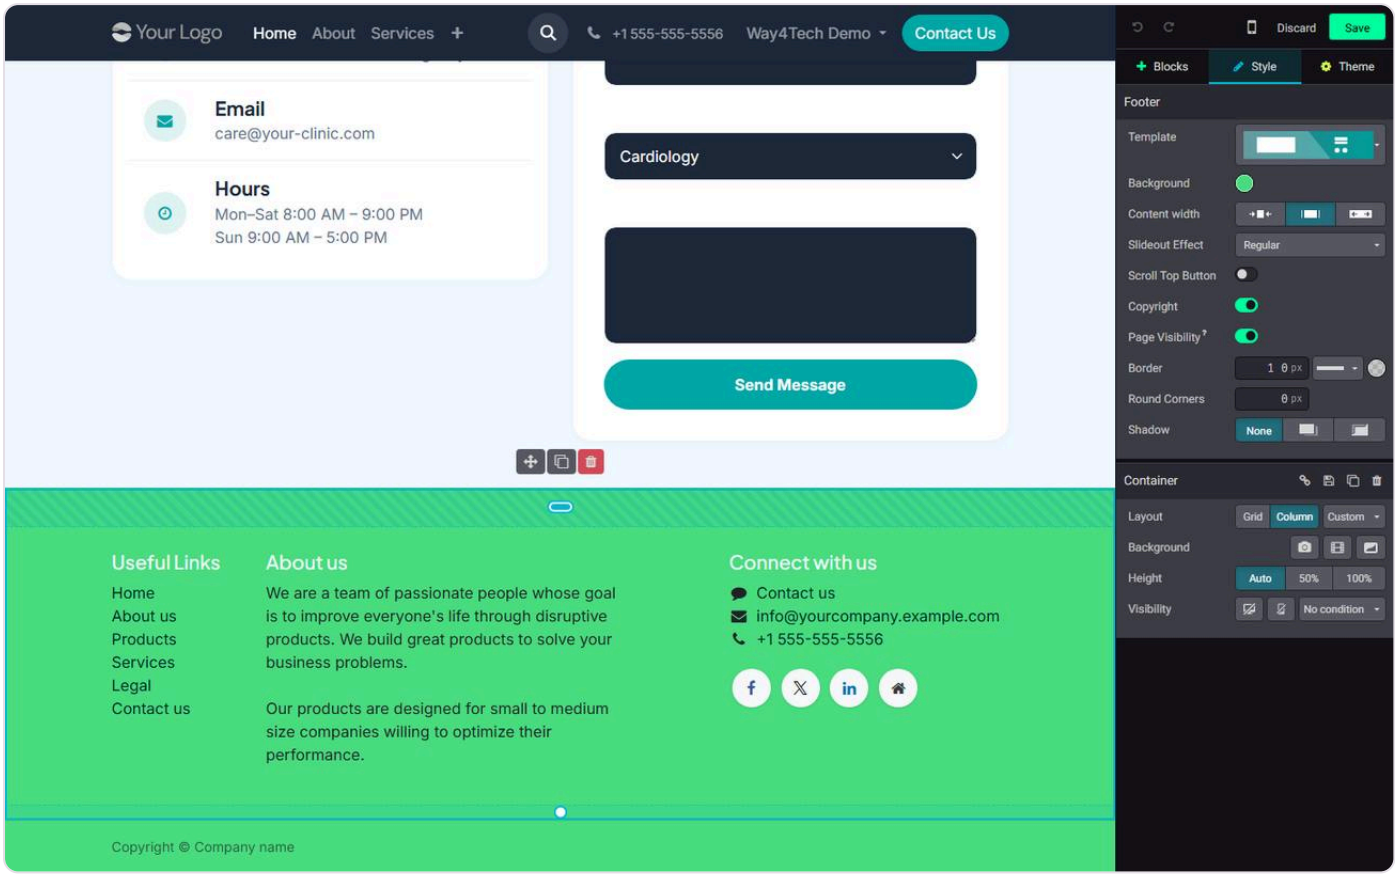

6 Header

Click the header to get its options: template, background, scroll effect, logo and the navigation elements. Your logo and company name come from **Settings, Companies**; the phone number and the Contact Us button in the header are Odoo's own header elements.

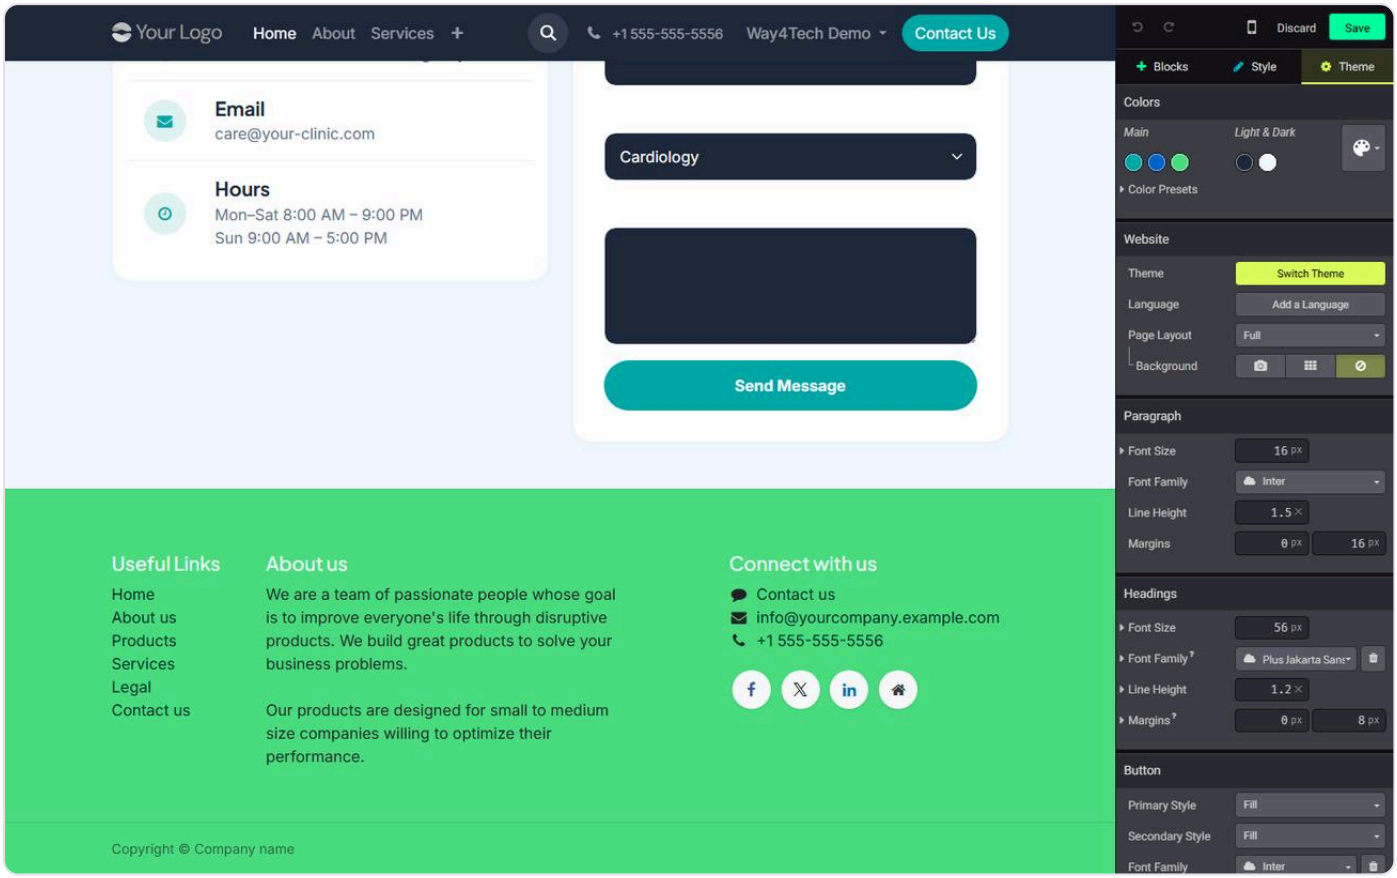

7 Footer

Click the footer for its template, colours, the copyright bar and the scroll to top button. The footer links and the About us text are Odoo's defaults: edit them like any other text.

8 Colours, fonts and buttons

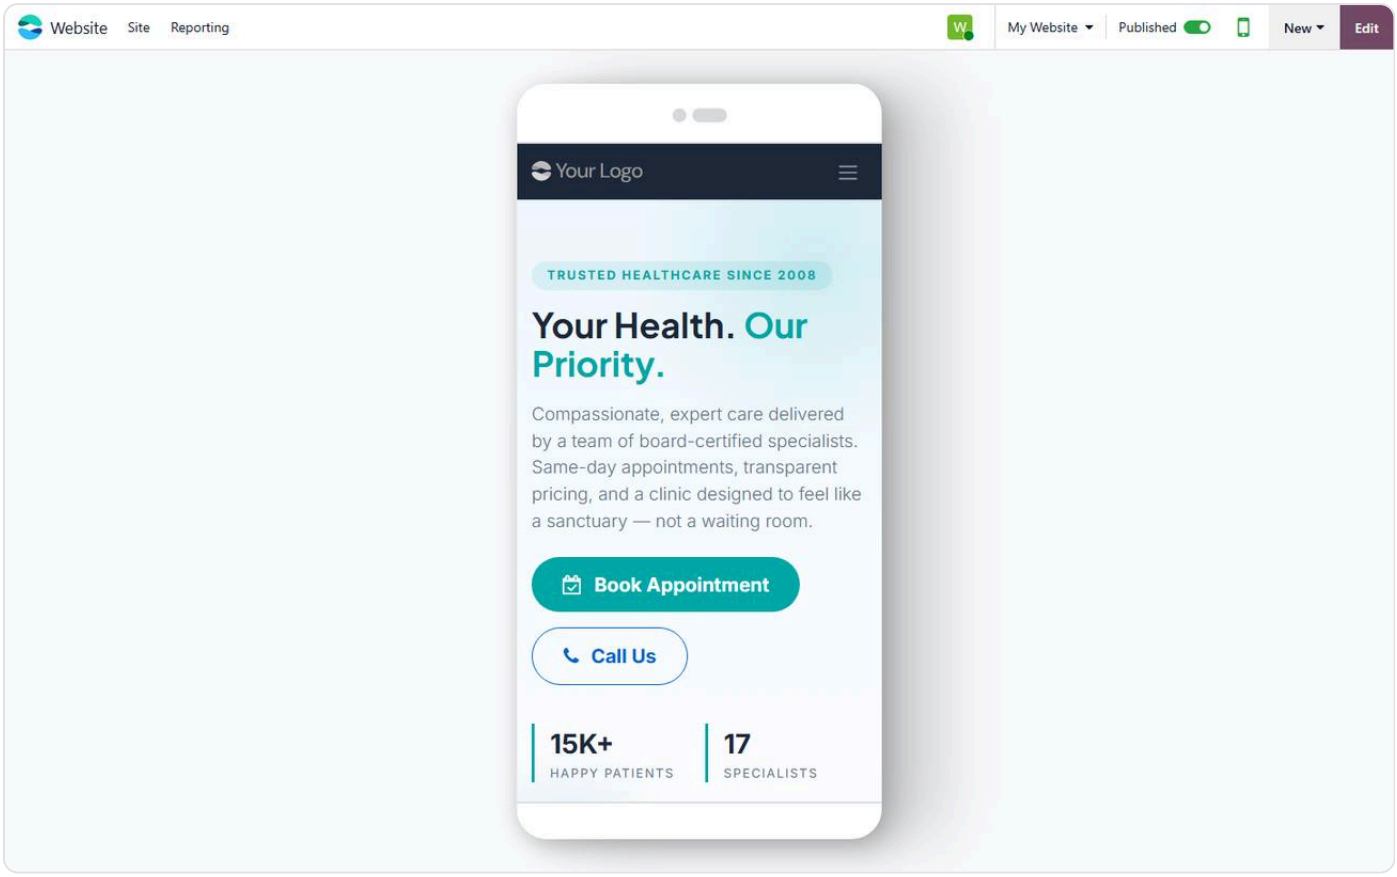

The **Theme** tab holds the site wide settings: the five palette colours (Main, Light and Dark, Color Presets), Switch Theme, languages, page layout, then font size, family, line height and margins for paragraphs and headings, button style, font, padding and corners, link style, input fields, and Advanced options such as code injection. Odoo's own blocks, links, the header and the footer follow these settings.

The theme's own sections take their colours from the theme stylesheet and from the coloured word typed into each headline, not from these palette circles. Recolour them per section (text colour, section background) or have the stylesheet changed. The palette shows here only once the theme is picked as the website theme (Part 2).

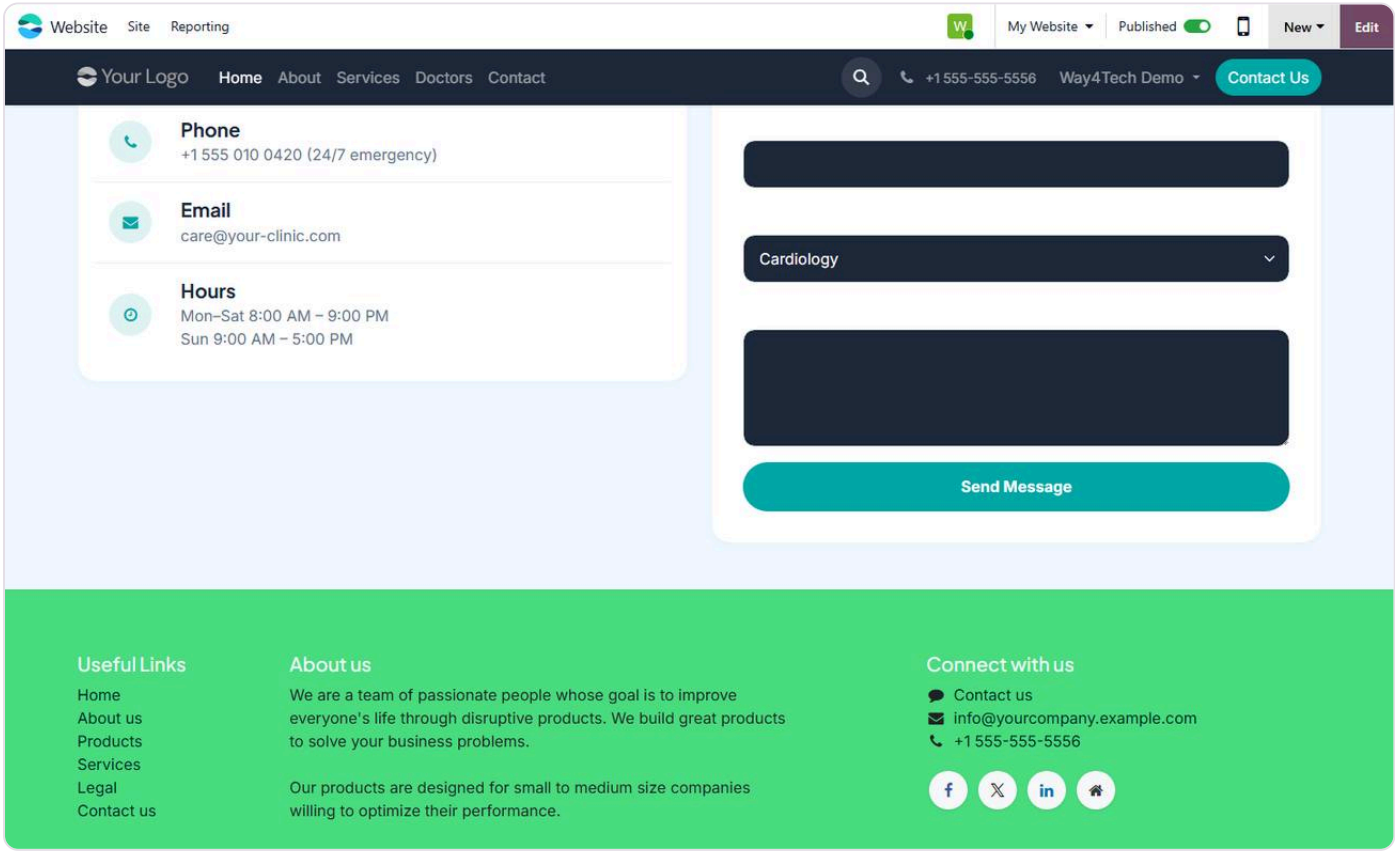

9 Check the phone view

Click the phone icon in the top bar to see the page at phone width. Every theme section stacks to one column on a phone. Use a section's visibility option to hide something on mobile only.

10 Save or Discard

Save at the top of the panel writes your changes. **Discard** throws them away and leaves the editor. Changes are not saved as you type.

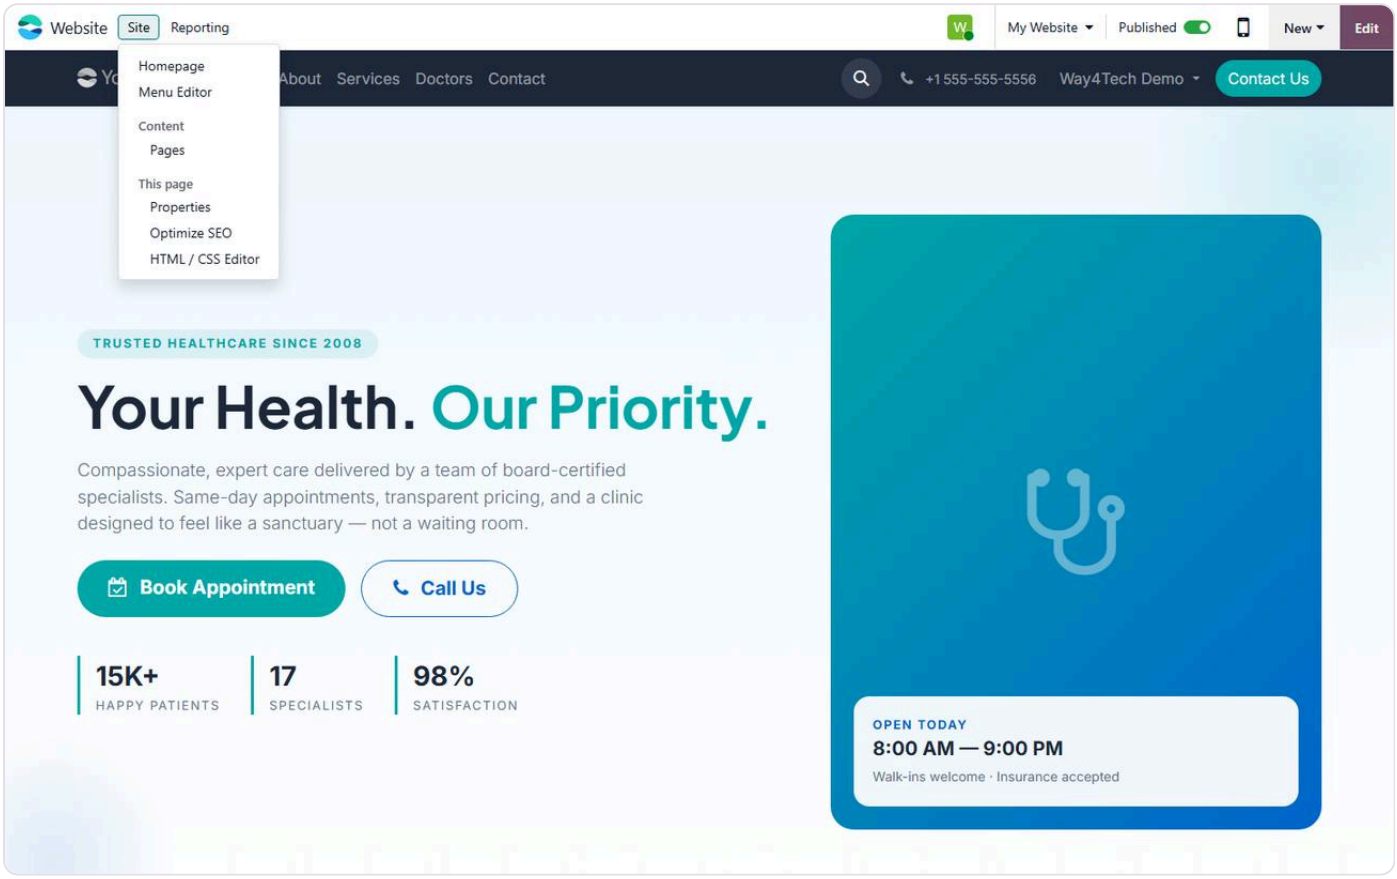

Swap the Light and Dark colours. Odoo uses palette colour 4 as the page background and colour 5 as the dark colour (the Light and Dark circles). The Way4Tech palettes hold the theme's dark colour in slot 4 and its light colour in slot 5, so once the theme is active, sections without their own background, such as most showcase grids, turn dark and their dark headings become hard to read. Swap the two circles in the Theme tab, or set a light background on each affected section.

Pages and the menu

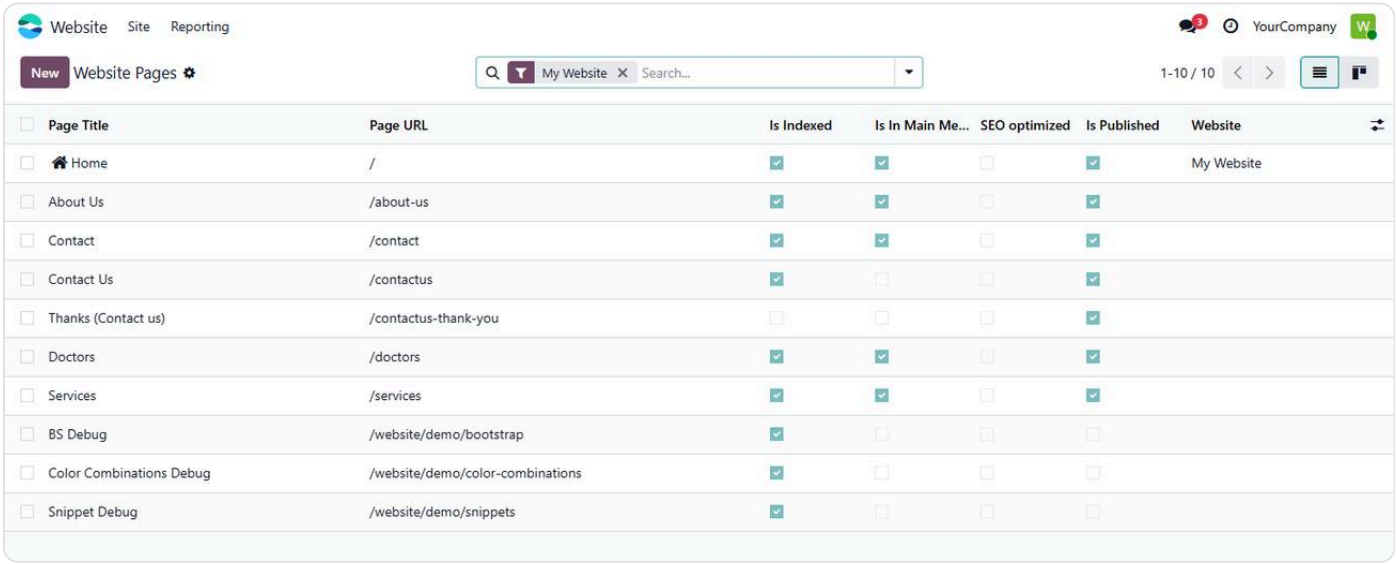

11 The Site menu

Site holds Homepage, Menu Editor, Pages, Properties of the current page, Optimize SEO and the HTML / CSS Editor.

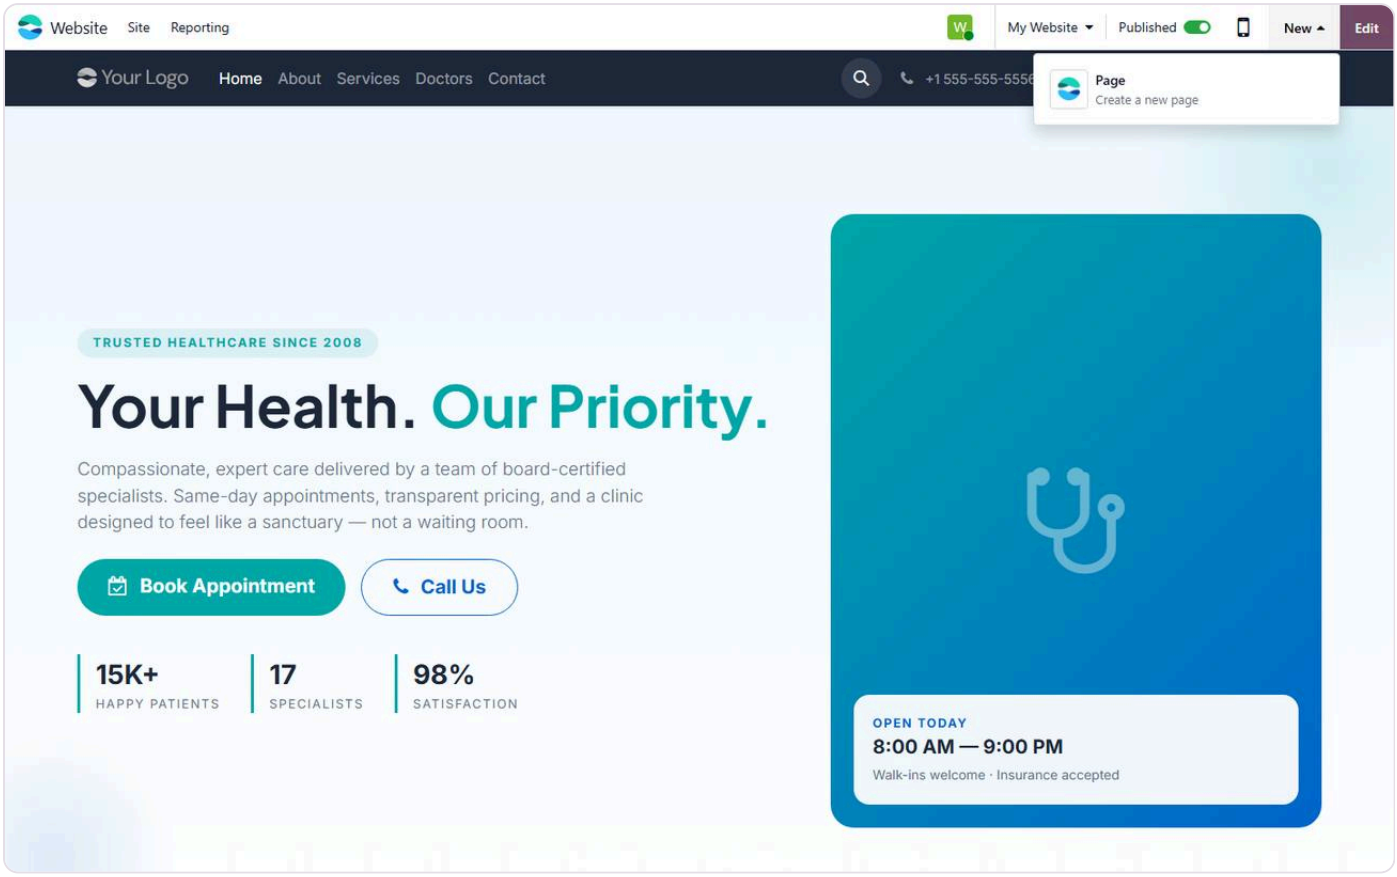

12 All pages

Site, Pages lists every page with its URL and whether it is indexed, in the main menu and published. Open one to rename it, change its URL or unpublish it.

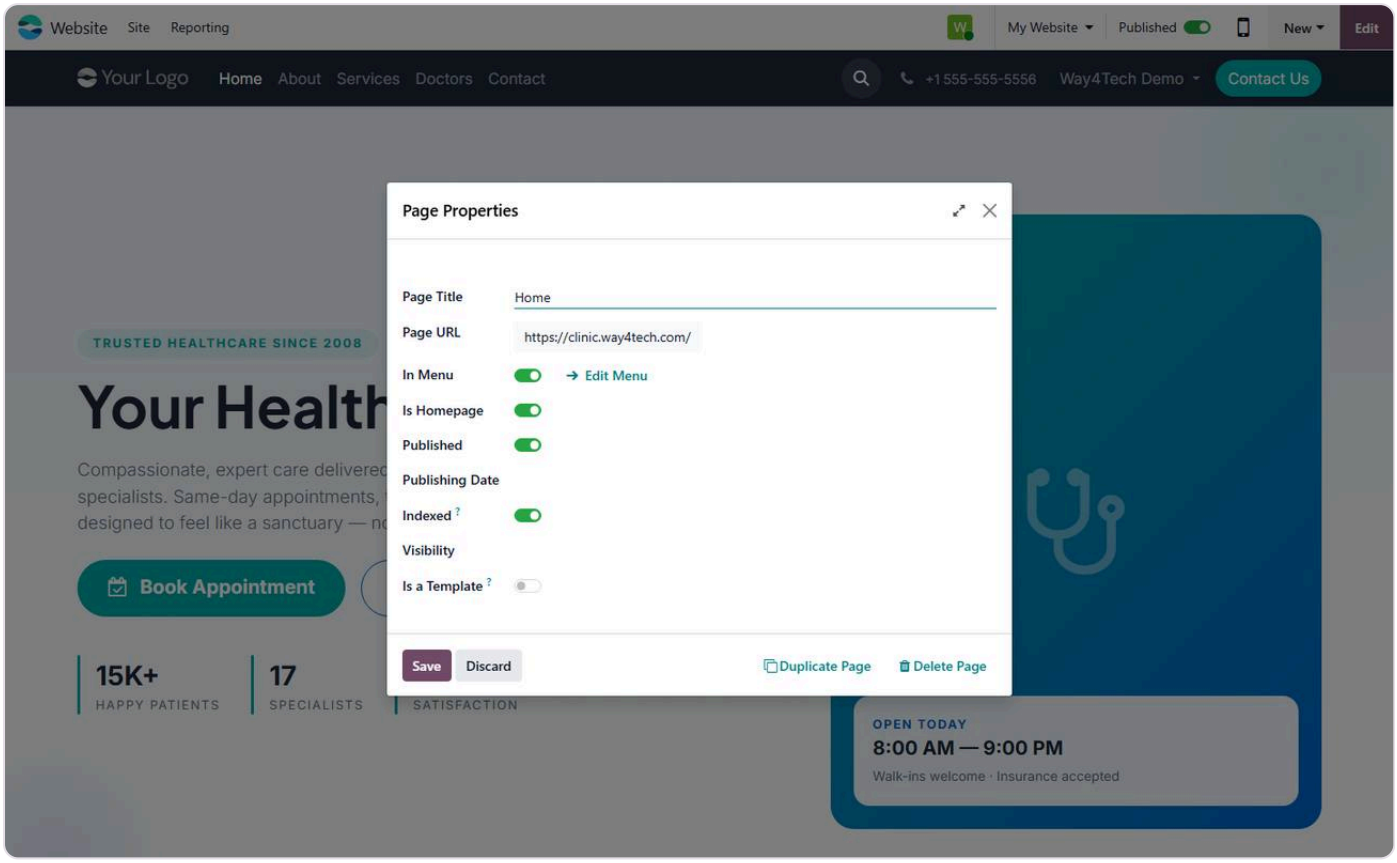

13 Add a page

New, Page creates a page. Give it a name, pick a layout, and Odoo adds it to the menu if you ask. Fill it with blocks from the Blocks tab, or open a theme page, duplicate its sections and copy them over.

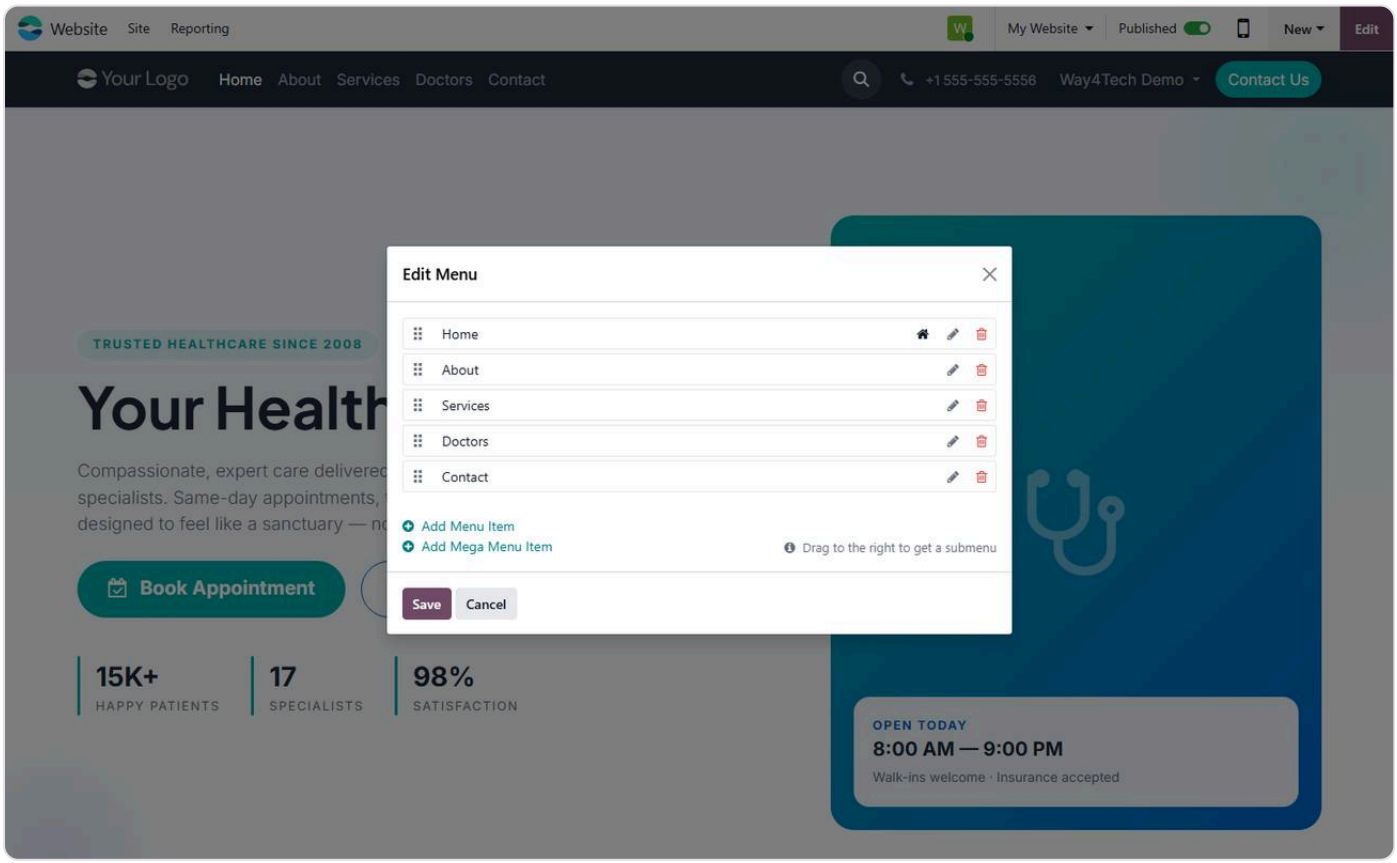

14 Page properties

Site, Properties sets the current page's title, URL, whether it sits in the menu, is the homepage, is published, indexed or visible to everyone.

15 The menu

Site, Menu Editor lists the header links. Drag to reorder, drag right to make a sub menu, use the pencil to rename or relink and the bin to delete. Add Menu Item and Add Mega Menu Item add new entries.

Replace the contact form

Every theme ends with a contact section: address, phone, email and opening hours on the left and a message form on the right. The form in the theme code posts to the address `/website_form/`, which Odoo 19 does not answer, and it is not built as Odoo's own form block. Sent as it is, a message does not reach you. Before you publish, swap it for Odoo's form:

1. Edit the Contact page, click the theme form and delete it with the section toolbar or the bin on the form column.
2. From **Blocks, Inner content** drag **Form** into the empty column.
3. In the Style tab choose the action: **Send an E-mail** to your inbox, or **Create a Lead** if CRM is installed.
4. Set the fields you want (name, phone, email, subject, message) and the thank you page, then Save.
5. Do the same on the homepage, which carries the same contact section at the bottom.

Search engines

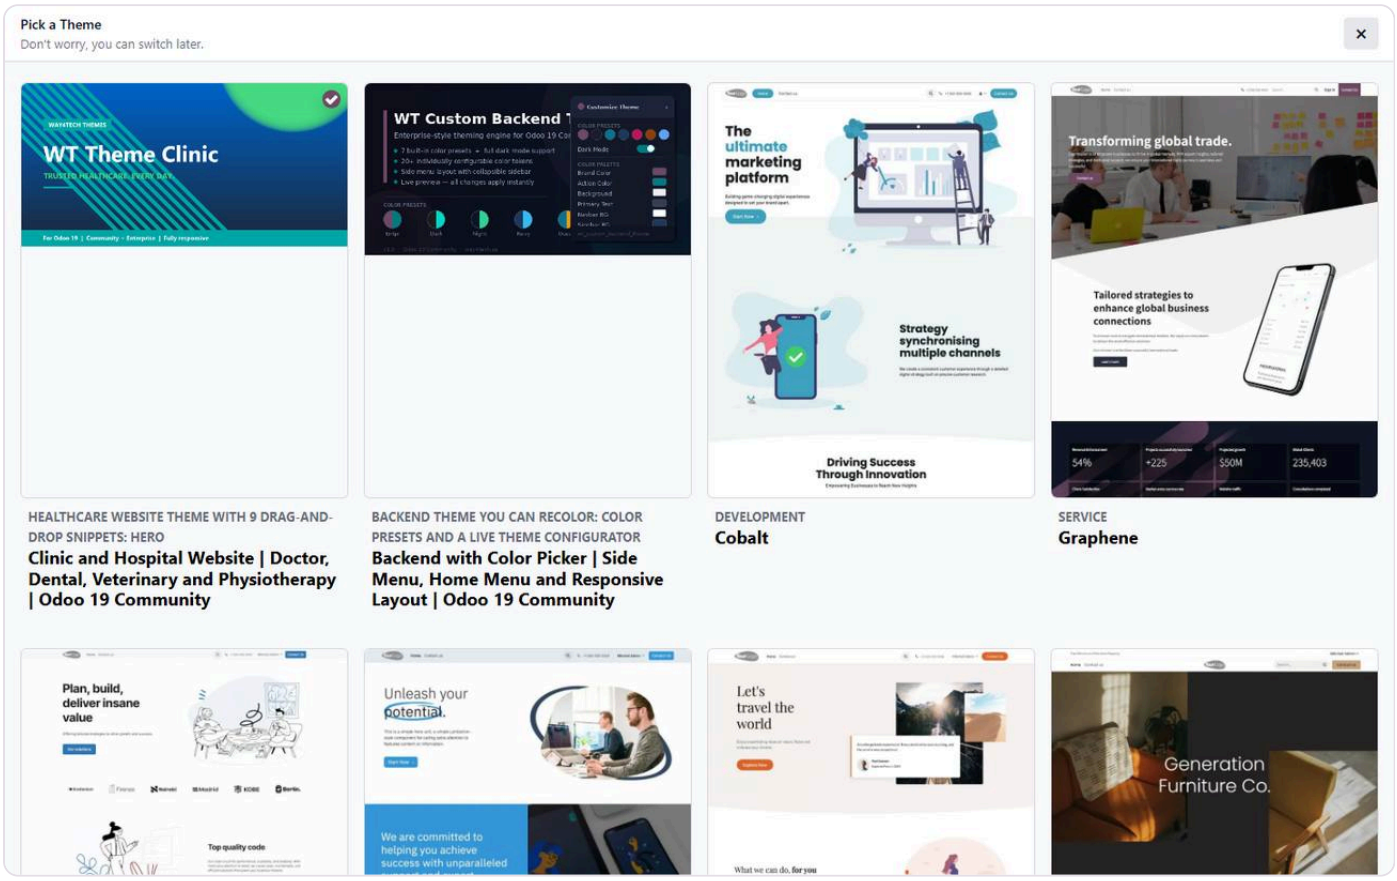

Site, Optimize SEO sets the title, description and sharing image of each page. The theme pages are published and indexed from the start, with titles such as About Us and Services; give each one a proper title and description for your business before you go live.

PART 4 Switch to another theme or remove one

Odoo's theme chooser lets you change the look in one click, and that is true for the look. The pages and menu entries these themes create are ordinary website records, so they stay behind when the look changes. Plan a switch, do not just click it on the live site.

IN THIS PART YOU WILL LEARN

- What changes and what stays when you pick another theme
- The clean way to move from one Way4Tech theme to another
- Why two of these themes should not be installed side by side

The theme chooser lists Odoo's themes and every installed or available theme module. **Use this theme** applies one to the current website.

What happens when you pick another theme

PART OF THE THEME	AFTER SWITCHING TO ANOTHER THEME
Stylesheet, palette, fonts	Switch to the new theme's, because Odoo loads styles only for the website's current theme.
Homepage content	Stays as the old theme's sections until the old module is uninstalled. Each theme replaces the homepage content, so with two installed you get whichever Odoo applies last.
About, Services, showcase and Contact pages	Stay. Several themes use the same URLs (/about-us, /services, /contact, and /cases on both consulting and law firm), so a second theme adds pages with the same addresses.
Menu entries	Stay, and the new theme adds its own next to them.
Your own edits	Stay on the pages you edited.

The clean way to switch

1. Try the new theme on a duplicate of the database first (Odoo.sh staging, or a copy on your own server).
2. Note the texts and images you changed that you want to keep.
3. Open **Apps**, find the old theme module and **Uninstall** it. That removes its pages, menu entries and homepage content.
4. Pick the new theme in the theme chooser, as in Part 2.
5. Check Site, Pages and the Menu Editor for leftovers, then redo your text and images.

> **Do not run two of these themes in one database.** Each one replaces the homepage and adds pages on the same addresses, and the modules do not block each other. Keep one installed at a time.

Going back to a plain Odoo site

Uninstall the theme module. Odoo removes the theme's pages, menu entries and homepage content and the website falls back to its own default look, or pick one of Odoo's own themes in the chooser.

PART 5 Consulting and Agency theme

For consulting firms, agencies, strategy practices and creative studios. The showcase section is six selected engagements, each with a sector tag, a title and a one line result. Palette #000000, #F59E0B, #10B981; headings in IBM Plex Serif.

HOW IT WORKS

The module

Technical name	`wt_theme_consulting` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**consulting.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#000000`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#F59E0B`	outline buttons, names under quotes, the call to action band
Accent	`#10B981`	the tint behind service icons
Dark	`#1F2937`	headings and headline text
Light	`#F9FAFB`	the banner background and quote cards

Headings in **IBM Plex Serif**, body text in **IBM Plex Sans**, buttons in **IBM Plex Sans**. Buttons have square corners, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-consulting` under Color Presets.

Pages and menu

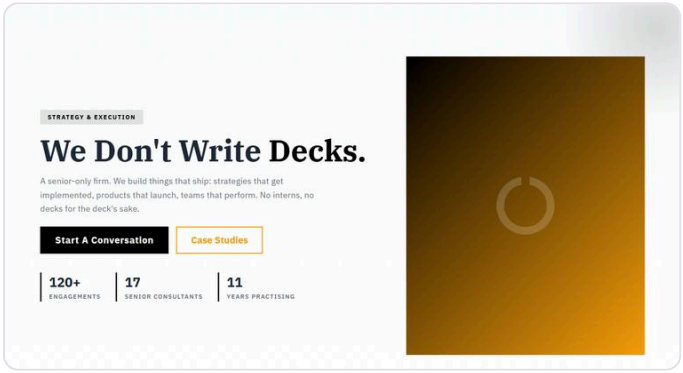

PAGE	URL	MENU LABEL	SECTIONS ON IT
Home	/	Home	hero, services, features, showcase, team, testimonials, faq, cta, contact
About	`/about-us`	About	page banner, features, team, testimonials, cta
Services	`/services`	What We Do	page banner, services, features, cta
Selected Engagements	`/cases`	Selected Engagements	page banner, showcase, testimonials, cta
Contact	`/contact`	Contact	page banner, contact, faq

The nine sections

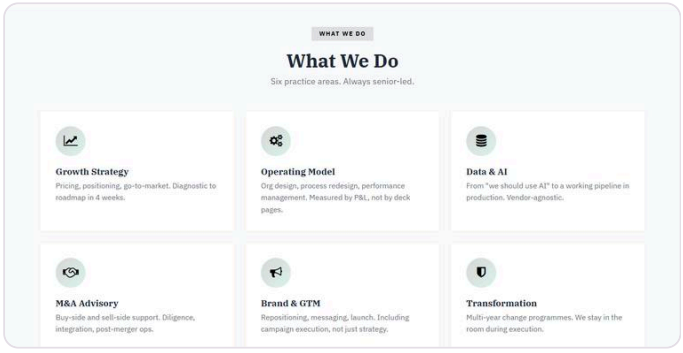

#	SECTION	WHAT IT HOLDS
1	**Consulting Hero** `s_consulting_hero`	Opening band: a small eyebrow line, the headline, a lead paragraph, two buttons, three stat figures and a visual block on the right. Heading: *We Don't Write Decks*. Buttons: Start A Conversation, Case Studies.

2	**Consulting Services** `s_consulting_services`	Six cards, each with an icon, a title and two lines of text. Heading: *What We Do*. For example: Growth Strategy, Operating Model, Data & AI.
3	**Consulting Features** `s_consulting_features`	Four reasons to choose you, each with an icon, a title and a sentence. Heading: *Why Boards Hire Us*. For example: Senior-Only Teams, Fixed Timelines, Outcomes, Tracked, Senior Continuity.
4	**Consulting Showcase** `s_consulting_showcase`	The six selected engagements, each with a sector tag, a title and a one line result. Heading: *Selected Engagements*. For example: SaaS Re-Pricing, Manufacturing Redesign, Insurance Underwriting, Sell-Side Mandate.
5	**Consulting Team** `s_consulting_team`	Four people with role and a one line credential. Heading: *The Partners*. For example: Anya Kowalski, Daniel Cho, Reza Najafi, Mira Patel.
6	**Consulting Testimonials** `s_consulting_testimonials`	Three short quotes with who said them. Heading: *What People Say*.
7	**Consulting FAQ** `s_consulting_faq`	A four question accordion (Bootstrap collapse), first one open. Heading: *Common Questions*. For example: How are engagements scoped?, Do you take retainers?, Industries you serve?.
8	**Consulting CTA** `s_consulting_cta`	A coloured band with one line and a single button. Heading: *Start A Conversation*. Buttons: Start A Conversation.
9	**Consulting Contact** `s_consulting_contact`	Address, phone, email and hours on the left, a message form on the right. Heading: *Talk To A Partner*. For example: Address, Phone, Email, Hours.

The sections on the demo homepage

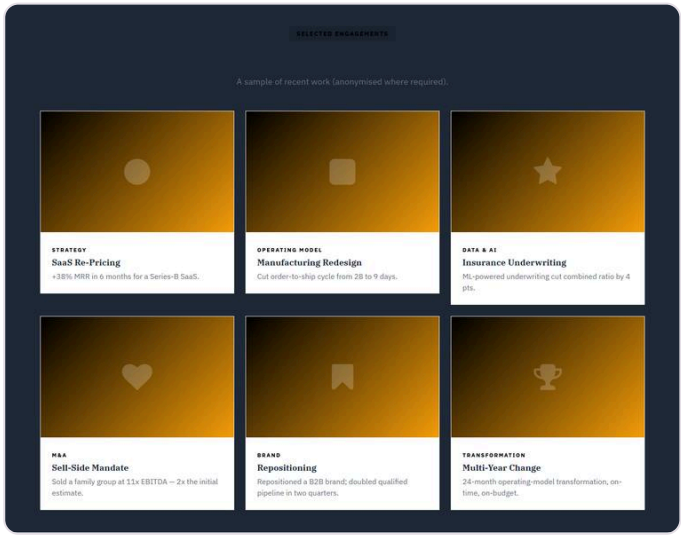

1. Consulting Hero

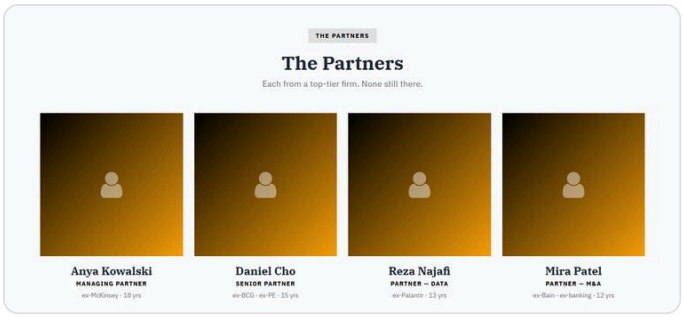

2. Consulting Services

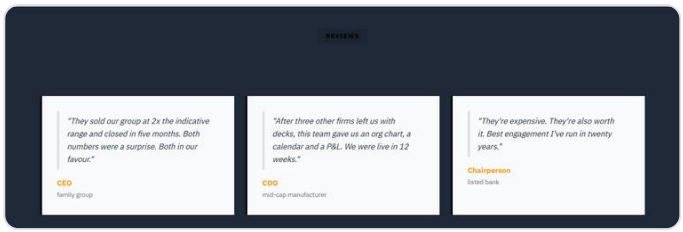

3. Consulting Features

4. Consulting Showcase

5. Consulting Team

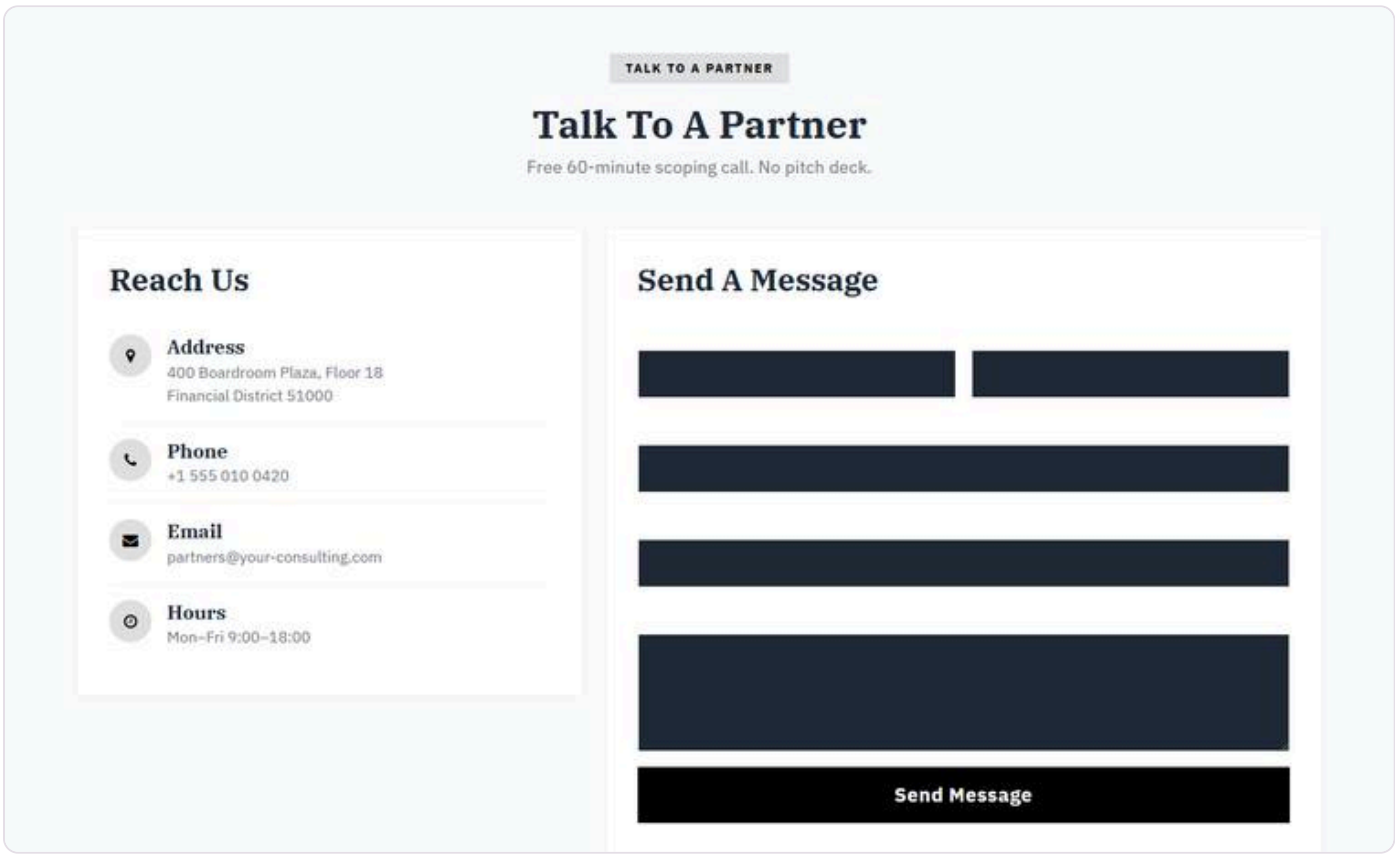

6. Consulting Testimonials

7. Consulting FAQ

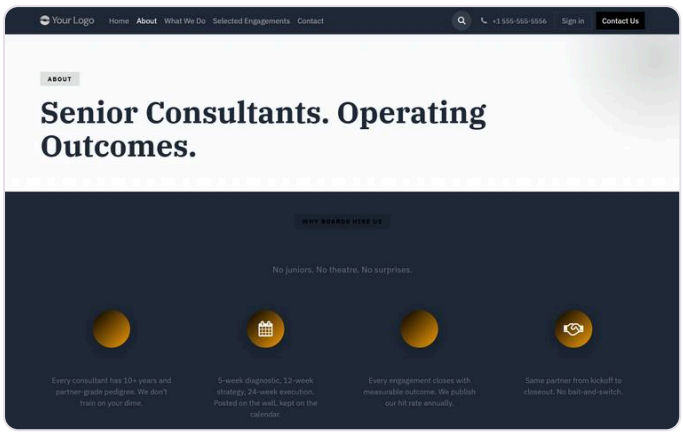

8. Consulting CTA

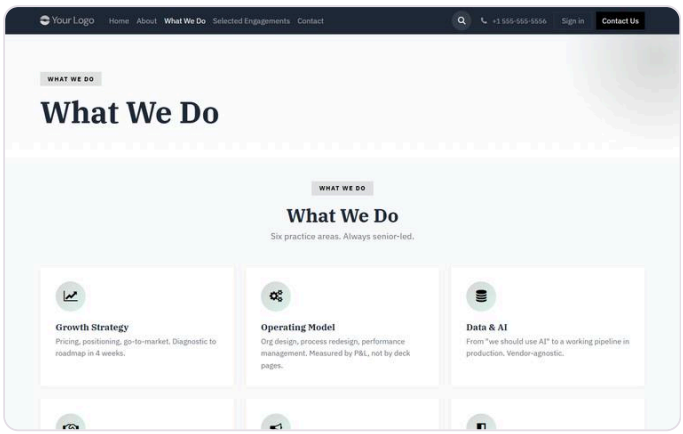

9. Consulting Contact

About on a phone

Services on a phone

Selected Engagements on a phone

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Rewrite the six engagements as your own anonymised case results, and the four partners as your team.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> The showcase page is called Selected Engagements and lives at /cases.

PART 6 Law Firm theme

For law firms, advocates, solicitors and legal consultancies. The showcase section is six recent wins, each a short case summary. Palette #B8860B, #1A2E4D, #D4AF37; headings in Playfair Display.

HOW IT WORKS

The module

Technical name	`wt_theme_lawfirm` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**lawfirm.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#B8860B`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#1A2E4D`	outline buttons, names under quotes, the call to action band
Accent	`#D4AF37`	the tint behind service icons
Dark	`#0F1A2E`	headings and headline text
Light	`#FAF7F0`	the banner background and quote cards

Headings in **Playfair Display**, body text in **Lora**, buttons in **Lora**. Buttons have square corners, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-lawfirm` under Color Presets.

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Replace the six Recent Wins with matters you are allowed to publish, and check your bar rules on advertising results before you do.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> The showcase page is called Recent Wins and also lives at /cases, the same URL as the consulting theme.

PART 7 Real Estate theme

For estate agencies, brokers and property developers. The showcase section is six featured listings typed into the page, each with a type, a price line and a short description. Palette #1E3A8A, #F59E0B, #10B981; headings in Manrope.

HOW IT WORKS

The module

Technical name	`wt_theme_realestate` version 19.0.1.0.1
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**realestate.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#1E3A8A`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#F59E0B`	outline buttons, names under quotes, the call to action band
Accent	`#10B981`	the tint behind service icons
Dark	`#0F172A`	headings and headline text
Light	`#F8FAFC`	the banner background and quote cards

Headings in **Manrope**, body text in **Inter**, buttons in **Inter**. Buttons have slightly rounded, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-realestate` under Color Presets.

Pages and menu

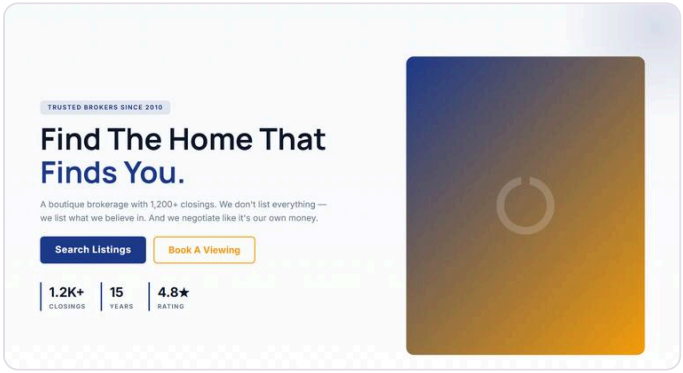

PAGE	URL	MENU LABEL	SECTIONS ON IT

Contact	`/contact`	Contact	page banner, contact, faq

The nine sections

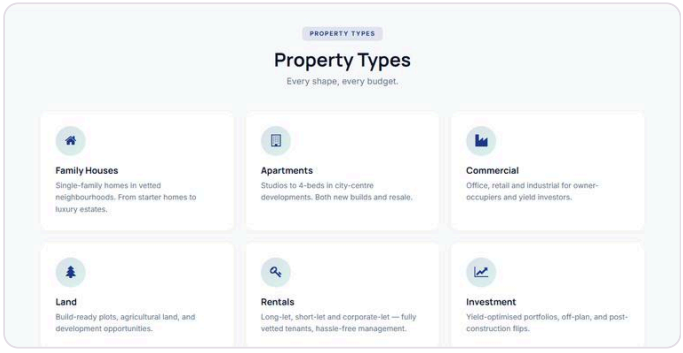

#	SECTION	WHAT IT HOLDS
1	**Real Estate Hero** `s_realestate_hero`	Opening band: a small eyebrow line, the headline, a lead paragraph, two buttons, three stat figures and a visual block on the right. Heading: *Find The Home That Finds You.* Buttons: Search Listings, Book A Viewing.

2	**Real Estate Services** `s_realestate_services`	Six cards, each with an icon, a title and two lines of text. Heading: *Property Types*. For example: Family Houses, Apartments, Commercial.
3	**Real Estate Features** `s_realestate_features`	Four reasons to choose you, each with an icon, a title and a sentence. Heading: *Why Buyers Choose Us*. For example: Curated Listings, Hard Negotiation, Data-Driven, Post-Sale Support.
4	**Real Estate Showcase** `s_realestate_showcase`	The six featured listings typed into the page, each with a type, a price line and a short description. Heading: *Featured Listings*. For example: Riverside Penthouse, Oakwood Lane Family Home, Downtown Office Floor, Heritage Loft Conversion.
5	**Real Estate Team** `s_realestate_team`	Four people with role and a one line credential. Heading: *Our Brokers*. For example: Helena Cross, Marcus Reyes, Aisha Patel, Tom Beck.
6	**Real Estate Testimonials** `s_realestate_testimonials`	Three short quotes with who said them. Heading: *What People Say*.
7	**Real Estate FAQ** `s_realestate_faq`	A four question accordion (Bootstrap collapse), first one open. Heading: *Common Questions*. For example: Do you charge buyers a fee?, How quickly can you arrange a viewing?, Do you handle the mortgage too?.
8	**Real Estate CTA** `s_realestate_cta`	A coloured band with one line and a single button. Heading: *Search Listings*. Buttons: Search Listings.
9	**Real Estate Contact** `s_realestate_contact`	Address, phone, email and hours on the left, a message form on the right. Heading: *Start Your Search*. For example: Address, Phone, Email, Hours.

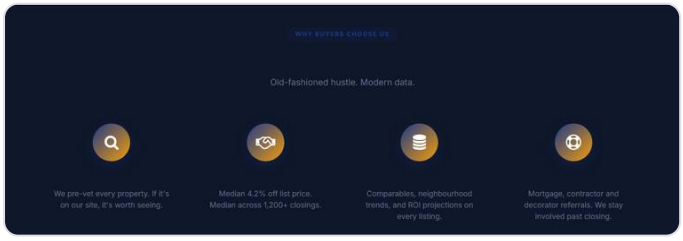

The sections on the demo homepage

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Each listing is a typed card. Keep the page for a handful of featured properties and link Search Listings to wherever your full listings live.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> The listings are text on the page. The theme does not read Odoo products or any property records.

PART 8 Construction theme

For builders, contractors, engineers, architects and fit-out firms. The showcase section is a project gallery with six projects, each with a photo from the Odoo image library. Palette #FF6B35, #2B3A55, #FFB627; headings in Bebas Neue.

HOW IT WORKS

The module

Technical name	`wt_theme_construction` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**construction.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#FF6B35`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#2B3A55`	outline buttons, names under quotes, the call to action band
Accent	`#FFB627`	the tint behind service icons
Dark	`#1F2937`	headings and headline text
Light	`#F8F9FA`	the banner background and quote cards

Headings in **Bebas Neue**, body text in **Roboto Condensed**, buttons in **Roboto Condensed**. Buttons have square corners, the header uses the **sidebar** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-construction` under Color Presets.

7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> There is no donation form or payment: the Donate Now buttons are links you point at a page or a payment provider yourself.

PART 13 Hotel and Resort theme

For hotels, resorts, B and Bs, lodges and holiday rentals. The showcase section is a six step story of the property, from purchase to the latest addition. Palette #1A4D5C, #C9A961, #E2D9C9; headings in Cormorant Garamond.

HOW IT WORKS

The module

Technical name	`wt_theme_hotel` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**hotel.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#1A4D5C`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#C9A961`	outline buttons, names under quotes, the call to action band
Accent	`#E2D9C9`	the tint behind service icons
Dark	`#0F2D38`	headings and headline text
Light	`#F8F5EE`	the banner background and quote cards

Headings in **Cormorant Garamond**, body text in **Inter**, buttons in **Inter**. Buttons have square corners, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-hotel` under Color Presets.

Pages and menu

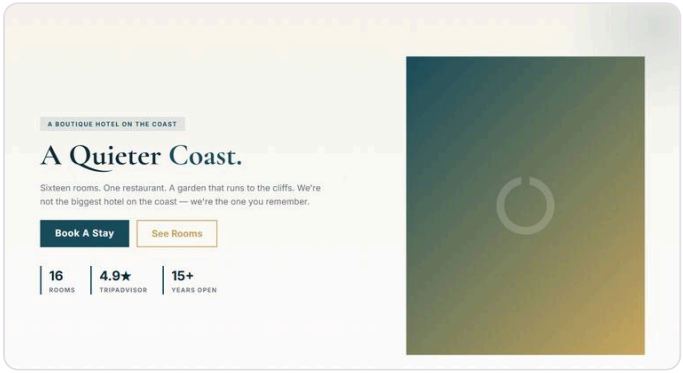

PAGE	URL	MENU LABEL	SECTIONS ON IT
Home	/	Home	hero, services, features, showcase, team, testimonials, faq, cta, contact
About	`/about-us`	About	page banner, features, team, testimonials, cta

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Point Book A Stay at your booking channel. Replace the six step property story with your own history.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> There is no booking engine or room availability: Book A Stay is a link.

PART 14 Restaurant theme

For restaurants, cafes, bistros and pizzerias. The showcase section is six dishes from the kitchen, each with a category, a name and a line of description. Palette #C0392B, #2C3E50, #F1C40F; headings in Cormorant Garamond.

HOW IT WORKS

The module

Technical name	`wt_theme_restaurant` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**restaurant.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR

The nine sections

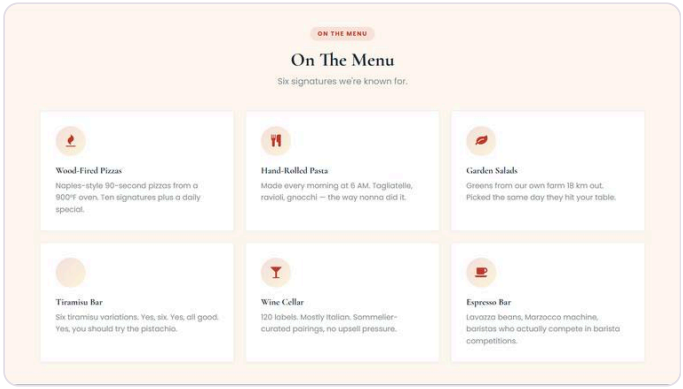

#	SECTION	WHAT IT HOLDS
1	**Photography Hero** `s_photography_hero`	Opening band: a small eyebrow line, the headline, a lead paragraph, two buttons, three stat figures and a visual block on the right. Heading: *Light. Frame. Story.* Buttons: View Portfolio, Book A Session.
2	**Photography Services** `s_photography_services`	Six cards, each with an icon, a title and two lines of text. Heading: *Categories.* For example: Weddings, Portrait, Brand Campaigns.

3	**Photography Features** `s_photography_features`	Four reasons to choose you, each with an icon, a title and a sentence. Heading: *Working Together*. For example: Discovery Call, Production, Edit & Deliver, Prints & Album.
4	**Photography Showcase** `s_photography_showcase`	The six recent projects, each with a category and a short description. Heading: *Recent Work*. For example: Tuscany Wedding, Heritage Tequila Campaign, Profile In TIME, Iceland Long Essay.
5	**Photography Team** `s_photography_team`	Two people with role and a one line credential. Heading: *Studio*. For example: Lou Andersen, Marc Rivera.
6	**Photography Testimonials** `s_photography_testimonials`	Three short quotes with who said them. Heading: *What People Say*.
7	**Photography FAQ** `s_photography_faq`	A four question accordion (Bootstrap collapse), first one open. Heading: *Common Questions*. For example: Do you travel?, Turnaround?, Editing style?.
8	**Photography CTA** `s_photography_cta`	A coloured band with one line and a single button. Heading: *View Portfolio*. Buttons: View Portfolio.
9	**Photography Contact** `s_photography_contact`	Address, phone, email and hours on the left, a message form on the right. Heading: *Start A Conversation*. For example: Address, Phone, Email, Hours.

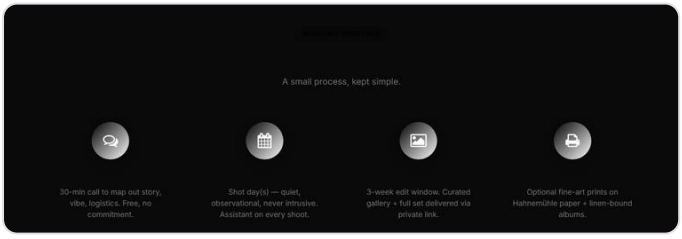

The sections on the demo homepage

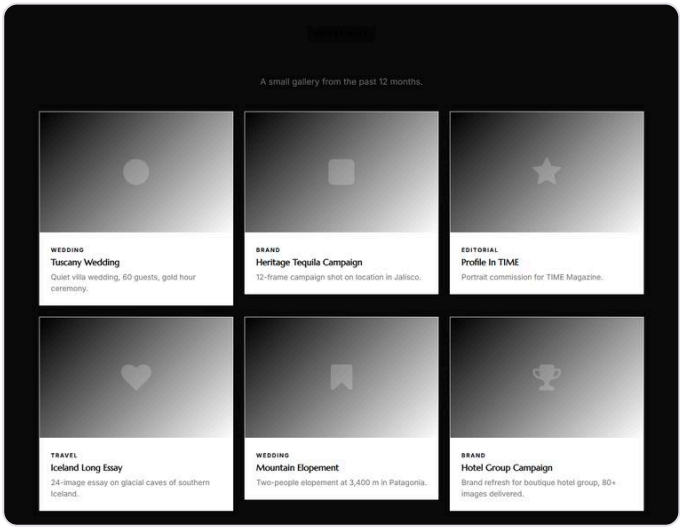

1. Photography Hero

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Add your own photographs to the Recent Work cards: the cards ship with icons, not pictures. The Studio section has two people, not four.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> The section visuals are icons, not photographs: add your own pictures in the editor.

PART 20 SaaS and Startup theme

For software products, apps and startups. The showcase section is a pricing grid with tiers, each with a price line and the team size it suits. Palette #7C3AED, #0EA5E9, #EC4899; headings in Space Grotesk.

HOW IT WORKS

The module

Technical name	`wt_theme_saas` version 19.0.1.0.2
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	no theme demo, described from the code

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#7C3AED`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#0EA5E9`	outline buttons, names under quotes, the call to action band
Accent	`#EC4899`	the tint behind service icons
Dark	`#0F172A`	headings and headline text
Light	`#F8FAFC`	the banner background and quote cards

Headings in **Space Grotesk**, body text in **Inter**, buttons in **Inter**. Buttons have slightly rounded, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-saas` under Color Presets.

Pages and menu

The nine sections

#	SECTION	WHAT IT HOLDS
1	**SaaS Startup Hero** `s_saas_hero`	Opening band: a small eyebrow line, the headline, a lead paragraph, two buttons, three stat figures and a visual block on the right. Heading: *Ship Faster With Less Friction*. Buttons: Start Free, See It In Action.

2	**SaaS Startup Services** `s_saas_services`	Six cards, each with an icon, a title and two lines of text. Heading: *Product Features*. For example: Real-Time Sync, AI Assist, 100+ Integrations.
3	**SaaS Startup Features** `s_saas_features`	Four reasons to choose you, each with an icon, a title and a sentence. Heading: *Why Teams Switch*. For example: 5-Minute Setup, 5x Cheaper, Used By Top Teams, Real Humans.
4	**SaaS Startup Showcase** `s_saas_showcase`	The a pricing grid with tiers, each with a price line and the team size it suits. Heading: *Pricing*. For example: For Individuals, For Small Teams, For Growing Teams, For Big Orgs.
5	**SaaS Startup Team** `s_saas_team`	Four people with role and a one line credential. Heading: *Engineered By*. For example: Mira Tan, Lukas Bauer, Priya Shah, Marcus Park.
6	**SaaS Startup Testimonials** `s_saas_testimonials`	Three short quotes with who said them. Heading: *What People Say*.
7	**SaaS Startup FAQ** `s_saas_faq`	A four question accordion (Bootstrap collapse), first one open. Heading: *Common Questions*. For example: Free trial: what's included?, What happens to my data if I cancel?, Self-host?.
8	**SaaS Startup CTA** `s_saas_cta`	A coloured band with one line and a single button. Heading: *Start Free*. Buttons: Start Free.
9	**SaaS Startup Contact** `s_saas_contact`	Address, phone, email and hours on the left, a message form on the right. Heading: *Talk To Sales*. For example: Address, Phone, Email, Hours.

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Set your real tiers and prices in the Pricing cards and point Start Free at your sign up page.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> Covered from the code only. The pricing tiers are text on the page, not Odoo subscription products.

PART 21 Salon and Spa theme

For hair and nail salons, barbershops, spas and aesthetic studios. The showcase section is a style gallery with six photographs. Palette #D4A574, #1F2937, #E8B4BC; headings in Italiana.

HOW IT WORKS

The module

Technical name	`wt_theme_salon` version 19.0.1.1.1
Price	USD 39, OPL-1, Odoo 19 Community
Needs	Website
Demo	**salon.way4tech.com**

Colours and fonts

PALETTE COLOUR	VALUE	USED FOR
Primary	`#D4A574`	main buttons, eyebrow labels, the coloured headline word, card gradients
Secondary	`#1F2937`	outline buttons, names under quotes, the call to action band
Accent	`#E8B4BC`	the tint behind service icons
Dark	`#111827`	headings and headline text
Light	`#FBF9F4`	the banner background and quote cards

Headings in **Italiana**, body text in **Lato**, buttons in **Lato**. Buttons have square corners, the header uses the **default** template and the footer the **descriptive** one. Change any of these in the editor's Theme tab; the palette is named `wt-salon` under Color Presets.

Set it up for your business

1. Install it and pick it as the website theme (Part 2). Check the Theme tab shows the palette above.
2. In the Theme tab swap the Light and Dark circles (palette colours 4 and 5) so the page background is light (Part 3).
3. Set your company name and logo in Settings, Companies, so the header and footer match.
4. Rewrite the opening banner: the eyebrow, headline, paragraph and the three stat figures are sample text.
5. Replace the six gallery photos and four stylist photos, which ship with the module, and point Book Now at your booking page.
6. Point every button at a real page: the banner buttons and the call to action band jump to the contact section by default.
7. Replace the contact form with Odoo's Form block (Part 3) and type your real address, phone, email and hours.
8. Give each page an SEO title and description in Site, Optimize SEO.

> The newest build: it registers its nine sections in the editor Blocks panel, ships real photographs, a Team page and optional demo data that renames the company to a demo salon.

PART 22

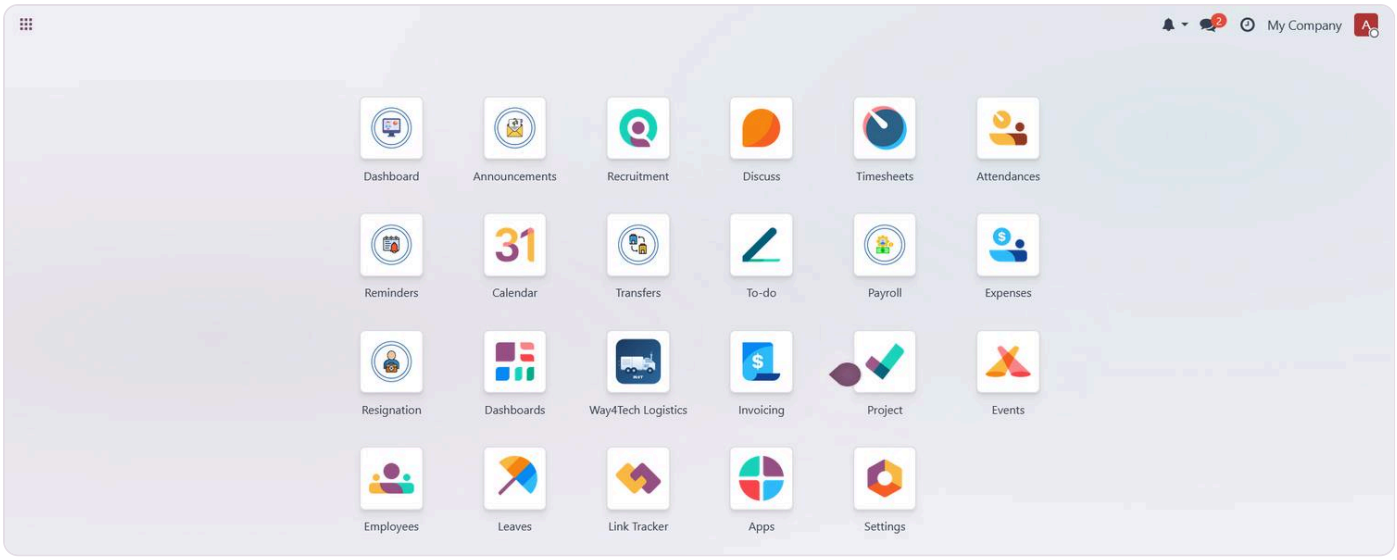

Backend themes: the look of the Odoo back office

The website themes change what visitors see. The two backend themes change what your own staff see after they sign in: a full page grid of apps instead of the Community app menu, a white top bar and the purple and teal colours of Odoo Enterprise, and on the larger one a colour picker and a side menu. They contain no Python and change no data.

IN THIS PART YOU WILL LEARN

- Enterprise Backend Theme Lite: the home menu and the Enterprise look
- Backend Theme with Color Picker: presets, custom colours, dark mode, side menu
- Where the choices are saved, and why the two cannot be installed together

	ENTERPRISE BACKEND THEME LITE	BACKEND THEME WITH COLOR PICKER
Technical name	`wt_enterprise_theme`	`wt_custom_backend_theme`
Version, price	19.0.1.0.0, USD 10	19.0.1.0.0, USD 15
Needs	web (any Odoo 19 Community)	web
Cannot sit with	web_enterprise	web_enterprise and wt_enterprise_theme
Full page home menu with app grid	yes	yes
Opens on the home menu after sign in	yes	yes
Arrow keys, Tab, Enter and Escape on the grid	yes	yes
Drag apps to reorder, saved per user	yes	yes
Enterprise colours, white navbar	fixed	the Enterprise preset, one of seven
Gradient background on the home menu and login page	yes	yes
Colour presets and live colour picker	no	yes, 7 presets and 22 colours
Dark mode	no	yes
Side menu layout, collapsible	no	yes

From the Enterprise Backend Theme Lite store listing: the home menu as a full page grid of apps.

Enterprise Backend Theme Lite

1 Install it

Install **wt_enterprise_theme** from Apps and reload the browser. There is nothing to configure. Odoo refuses the install on a database with Odoo Enterprise's own web client, which already looks like this.

2 Use the home menu

After sign in you land on the app grid. Click an app to open it. The nine dot icon at the top left of every screen (or Alt+H) brings the grid back. On a computer use the arrow keys, Tab and Shift Tab to move, Enter to open and Escape to go back to the app you were in.

On a phone the menu button closes the grid first and then opens the app's own menu.

3 Reorder the apps

Press and hold an app icon for half a second, then drag it. The order is saved to the user's own settings, so each person can have their most used apps first and keeps the order on any device.

Backend Theme with Color Picker

From the store listing: the Customize Theme panel with its presets, dark mode switch and colour palette.

4 Install it

Install **wt_custom_backend_theme** from Apps. Uninstall Enterprise Backend Theme Lite first if you had it: the module declares that the two cannot be installed together.

5 Open the theme panel

A brush button in the top bar (the systray, before the chat and activity icons) opens the **Customize Theme** panel from the right. Click outside it or on the close button to shut it.

6 Pick a preset

Color Presets has seven: **Enterprise** (purple #714B67 and teal #017e84), **Dark**, **Midnight**, **Navy**, **Ocean**, **Rose** and **Amber**. Dark and Midnight are dark themes; the others are light. A click applies it at once, no reload.

7 Fine tune any colour

Color Palette lists 22 colours in six groups: Brand and Action (brand, action, text on each), Backgrounds (page, app, cards and forms, inputs, hover, home menu), Text (primary, muted, light), Borders (border, input border), Navbar (background, text) and Sidebar (background, text, muted text, active background, active text). Changing one switches the preset to **Custom**.

8 Dark mode

The Dark Mode switch flips the backgrounds, text and borders to a dark set and keeps your brand and action colours, so a custom brand colour survives the switch.

9 Layout: top bar or side menu

Layout chooses **Top Navbar**, the normal Odoo layout, or **Side Menu**, a fixed left sidebar with the current app's menus and the systray icons. **Collapsed sidebar (icons only)** narrows it to icons. On a phone the sidebar becomes a drawer opened from the menu button.

Where the choices live. The preset, custom colours, layout and collapsed state are kept in the browser's local storage, not in Odoo. Each person picks their own look, and it follows the browser, not the user: a new laptop or a cleared browser starts again on the Enterprise preset. There is no company wide setting to push one look to everybody. The app order on the home menu is the exception and is saved per user in Odoo.

In Odoo's website theme chooser the Color Picker theme shows up as a card next to the website themes, because its category sits under Theme. Do not click Use this theme on it there: it is a back office theme and is installed from Apps.

PART 23 A 15 minute demo of a theme

For showing a theme to an owner who wants to see their site before they buy. Use their trade's demo and stay read only: open, look, Discard.

MIN	SHOW	SAY
0-2	The demo homepage, scrolled slowly to the bottom	*Nine sections written for your trade: what you do, why you, the showcase, the team, reviews, questions and contact.*
2-4	The four inner pages from the menu	*About, the services page, the showcase page and Contact are there from day one, already in the menu and published.*
4-5	The same pages on a phone (phone icon)	*Every section stacks to one column on a phone.*
5-8	Sign in, Website, Edit; click a headline and a section	*Everything is edited on the page: click and type, move sections up and down, duplicate one.*
8-10	The Theme tab	*Fonts, button shapes and Odoo's colours are set in one place. Then Discard.*
10-12	Site, Pages and Site, Menu Editor (Cancel)	*Pages and menu entries are normal Odoo website records you control.*
12-14	The theme chooser	*Picking the theme for a website is one click. Explain the clean switch from Part 4.*
14-15	What it does not do	*No booking, cart, tickets or donations on its own: the buttons link to whichever Odoo app or page you choose.*

PART 24 Questions people ask

QUESTION	ANSWER
Do I need Odoo Enterprise?	No. Every theme needs only the Website app and runs on Odoo 19 Community. They also install on Enterprise.
Which Odoo versions?	Odoo 19. The modules in this guide are 19.0 builds.
I installed the theme and it looks plain. Why?	It is installed but not picked as the website theme. Odoo loads a theme's styles only for the website whose theme it is. Pick it in the theme chooser (Part 2).
Can I drag the theme's sections onto other pages?	On the salon theme, yes: its nine sections are in the Blocks panel. On the others, the sections are on the pages the theme creates; select one there and duplicate it, or build new pages from Odoo's own blocks, which match the theme's fonts and button shapes.
Does the contact form send email?	Not as shipped: it posts to an address Odoo 19 does not answer. Replace it with Odoo's Form block, which sends an email or creates a CRM lead (Part 3).
Will my edits survive a module update?	Yes. Edits made in the editor are saved on your website, and the theme does not overwrite them.
Can I change the colours?	The Theme tab changes Odoo's blocks, header, footer and links. The theme's own sections keep the colours in their stylesheet and in the coloured headline word; change those per section or have the stylesheet edited.
Does the restaurant theme show my POS menu, the hotel theme my rooms, the estate theme my listings?	No. Every card is text on the page. Link to the relevant Odoo app page where you have one.
Can I use two themes, one per website?	Not cleanly. The pages and homepage content of each theme are written for the whole database. Keep one Way4Tech theme per database.
Does a backend theme change the website?	No. The backend themes change the screens after sign in, plus the login page background.
Is my backend colour choice shared with my team?	No. The Color Picker theme keeps it in each browser. Only the app order on the home menu is saved per user.

PART 25

Menu map

Website top bar

Site	Homepage, Menu Editor, Pages, Properties, Optimize SEO, HTML / CSS Editor
Reporting	Odoo's website analytics
Website switcher	Which website you are editing
Published	Publish or unpublish the current page
